	=========	==========
CASH DISTRIBUTION PER COMMON SHARE	\$ 0.4350	\$ 0.4250

The primary differences between Net Income as calculated under generally accepted accounting principles ("GAAP") and Cash Available For Distribution ("CAD") result from the timing of income and expense recognition and non-cash events. These differences between CAD and GAAP income include the treatment of loan origination fees, which for CAD purposes are recognized when received but for GAAP purposes are amortized over the life of the associated loan. In addition, there are differences related to non-cash gains and losses associated with bond valuations and sales, non-cash gains and losses associated with changes in market value of derivative financial instruments, amortization of goodwill and intangibles and capitalization of mortgage servicing rights, net of deferred taxes for GAAP purposes, which are not included in the calculation of CAD.

The common shares outstanding reported for Cash Available for Distribution are the actual shares outstanding at the end of the quarter. For GAAP, the weighted average shares outstanding during the period are reported for the basic net income per share calculation. The weighted average shares outstanding for diluted net income per share include the potential dilutive effect from the exercise of options, vesting of restricted shares, conversion of the preferred shares and provision for shares to be awarded under the Midland acquisition earn out provision.

VARIANCE ANALYSIS FOR CAD

1st Quarter 2002 Compared to 1st Quarter 2001:

Total income for the first quarter of 2002 increased \$3.5 million over the same period last year due primarily to: (1) an increase of \$2.3 million in interest income due to increase in interest collected on bond and other bond-related investments, as well as an increase in interest earned on construction lending activities; (2) an increase in loan servicing fees of \$0.3 million; and (3) an increase in loan origination and brokerage fees of \$0.8 million due primarily to an increase in fees associated with tax credit and conventional equity transactions.

Total expenses for the first quarter increased \$1.5 million over the same period last year due primarily to: (1) an increase of \$0.4 million in salary and related benefits expense associated with 2001 new hires; (2) an increase of \$0.7 million in other operating expenses primarily driven by completion and deployment of accounting information systems and other upgrades in technology infrastructure, as well as commissions earned on increased syndication production, which was partially offset by a decrease of \$0.5 million in professional fees; (3) an increase of \$0.6 million in interest expense primarily associated with increased construction lending production and an increase in financing costs associated with securitizations accounted for as borrowings; and (4) an increase of \$0.4 million in income taxes primarily due to an increase in taxable fee income.

VARIANCE ANALYSIS FOR GAAP

1st Quarter 2002 compared to 1st Quarter 2001:

Total income for the first quarter of 2002 increased \$2.9 million over the same period last year due primarily to: (1) an increase of \$3.6 million in interest income due to increase in interest collected on bond and other bond-related investments, as well as an increase in interest earned on construction lending activities; (2) a \$0.5 million decrease in interest on short-term investments resulting from the use of equity offering proceeds to repurchase senior interests in current securitization trusts and funding of other operations, as well as a decrease in interest collected on margin call accounts; (3) a decrease in other income of \$3.1 million primarily due to other income associated with the Dynex transaction in the first quarter of 2001; (4) a \$2.0 million increase in gain on sales associated with a \$1.2 million gain on the sale of taxable loans and a \$1.0 million sale of an investment in RITES; and (5) an increase in loan origination and brokerage fees of \$0.6 million due primarily to an increase in fees associated with tax credit and conventional equity transactions.

Total expenses for the first quarter of 2002 decreased \$1.9 million over the same period last year due primarily to: (1) an increase of \$0.4 million in salary and related benefits expense associated with 2001 new hires; (2) an increase of \$0.7 million in other operating expenses driven primarily by completion and deployment of accounting information systems and other upgrades in technology infrastructure, as well as commissions earned on increased syndication production, which was partially offset by a decrease of \$0.5 million in professional fees; (3) an increase of \$1.1 million in interest expense primarily associated with increased construction lending production and an increase in financing costs associated with securitizations accounted for as borrowings; (4) a decrease of \$0.4 million in amortization expense due to changes in accounting guidelines relating to amortization of goodwill; and (5) a \$3.1 million impairment recorded in 2001 associated with the Dynex transaction.

The company recorded net holding gains for mark to market adjustments on derivative financial instruments of \$3.1 million for the first quarter of 2002. Excluding this quarter's mark to market adjustment, earnings from net operating income was \$0.50 per common share.
