UNAUDITED FINANCIAL STATEMENTS
WITH REVIEW REPORT OF INDEPENDENT ACCOUNTANTS
FOR THE THREE-MONTH PERIODS ENDED
MARCH 31, 2003 AND 2002

The reader is advised that these financial statements have been prepared originally in Chinese. In the event of a conflict between these financial statements and the original Chinese version or difference in interpretation between the two versions, the Chinese language financial statements shall prevail.

REVIEW REPORT OF INDEPENDENT ACCOUNTANTS

English Translation of a Report Originally Issued in Chinese

To the Board of Directors and Shareholders of

United Microelectronics Corporation

We have reviewed the accompanying balance sheets of United Microelectronics Corporation as of March 31, 2003 and 2002, and the related statements of income and cash flows for the three-month periods then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to issue a review report on these financial statements based on our reviews. As described in Note 4(6) to the financial statements, certain long-term investments were accounted for under the equity method based on the financial statements of the investees for the three-month periods ended March 31, 2003 and 2002, which were reviewed by other independent accountants. Our reviews insofar as it relates to the investment income amounting to NT\$27 million and NT\$82 million for the three-month periods ended March 31, 2003 and 2002, respectively, and the related long-term investment balances of NT\$4,316 million and NT\$4,383 million as of March 31, 2003 and 2002, respectively, is based solely on the review reports of the other independent accountants.

We conducted our reviews in accordance with the Statements of Auditing Standards No. 36, "Review of Financial Statements", of the Republic of China. A review is limited primarily to applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of China and thus provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our reviews, we are not aware of any material modifications or adjustments that should be made to the financial statements referred to above in order for them to be in conformity with accounting principles generally accepted in the Republic of China.

Notice to Readers

The accompanying unaudited financial statements are intended only to present the financial position and results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to review such financial statements are those generally accepted and applied in the Republic of China.

UNITED MICROELECTRONICS CORPORATION

NOTES TO UNAUDITED FINANCIAL STATEMENTS

March 31, 2003 and 2002

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Stated)

1. HISTORY AND ORGANIZATION

United Microelectronics Corporation (United Microelectronics or the Company) was incorporated in May 1980 and commenced operations in April 1982. The Company's major business activity is providing dedicated semiconductor wafer foundry services. The Company provides a variety of services to fit individual customer's needs, including intellectual property, embedded IC design, design verification, mask tooling, wafer fabrication, and testing. The Company's common shares were publicly listed on the Taiwan Stock Exchange in July 1985 and its American Depositary Shares (ADSs) were listed on the New York Stock Exchange in September 2000.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements were prepared in conformity with Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China. Summary of significant accounting policies is as follows:

Cash Equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and with maturity dates that do not present significant risks on changes in value resulting from changes in interest rates.

Marketable Securities

Marketable securities are recorded at cost when acquired and are stated at the lower of aggregate cost or market value at the balance sheet date. The market value of listed equity securities, convertible bonds or closed-end funds is determined by the average closing price during the last month of the fiscal year. The market value for open-end funds is determined by their equity per unit at the balance sheet date. The amount by which aggregate cost exceeds market value is reported as a loss in the current year. In subsequent periods, recoveries of market value are recognized as a gain to the extent that the market value does not exceed the original aggregate cost of the investment.

Allowance for Doubtful Accounts

The allowance for doubtful accounts is provided based on management's judgment and on the evaluation of collectibility and aging analysis of accounts and other receivables.

Inventories

Inventories are recorded at cost when acquired and stated at the lower of aggregate cost, based on the weighted average method, or market value at the balance sheet date. The market values of raw materials and supplies are determined on the basis of replacement cost while the work in process and finished goods are determined by net realizable values. An allowance for loss on decline in market value and obsolescence is provided, when necessary.

Long-term Investments

Long-term investments are recorded at cost when acquired. Investments acquired by contribution of technological know-how are credited to deferred credits among affiliates, which will be amortized to income over a period of five years.

Investments in less than 20% owned listed and unlisted companies where significant influence on operational decisions of the investees does not reside with the Company, are accounted for by the lower of aggregate cost or market value method and the cost method, respectively. The market value is determined by the average closing price during the last month of the fiscal year and the unrealized loss resulting from the decline in market value of investments that are held for long-term investment purposes is deducted from the stockholders' equity. Impairment losses for the investees will be recognized if an other than temporary impairment is evident.

Investment income or loss from investments in both listed and unlisted companies is accounted for under the equity method provided that the Company owns at least 20% of the outstanding voting shares of the investees and has significant influence on operational decisions of the investees. The difference of the acquisition cost and the underlying equity in the investee's net assets is amortized over five years.

Unrealized intercompany gains and losses are eliminated under the equity method. Profit from sales of depreciable assets between the investee and the Company is amortized and recognized based on the assets' economic service lives. Profit from other types of intercompany transactions is recognized when realized. The increase in the Company's proportionate share in the net assets of its investee resulting from its subscription to additional shares of stock, issued by such investee, at the rate not proportionate to its existing equity ownership in such investee, is credited to a capital reserve account. Any decrease in the Company's proportionate share in the net assets of the investee is debited against the existing balance of the similar capital reserve account, where the credit balance can only be offset to zero. If any excess amount exists, it will be debited against unappropriated retained earnings.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Interest incurred on loans used to finance the construction of property, plant and equipment is capitalized and depreciated accordingly.

Depreciation is provided on the straight-line basis using the economic service lives of the assets less any salvage value. When the economic service lives are completed, property, plant and equipment, which are still in use, are depreciated over the newly estimated remaining useful lives of the salvage value. The economic service lives of the property, plant and equipment are as follows: buildings 20 to 55 years; leased assets and leasehold improvements the lease period, or economic service lives, whichever is shorter; others 5 years.

Maintenance and repairs are charged to expense as incurred. Significant renewals and improvements are treated as capital expenditures and are depreciated accordingly. When property, plant and equipment are disposed of, their original cost and accumulated depreciation are written off and the related gain or loss is included as non-operating income or expenses. Idle assets are transferred to other assets according to the lower of net book or net realizable value, with the difference charged to non-operating expenses. The corresponding depreciation expenses provided are classified as non-operating expenses also.

Intangible Assets

Patents are stated at cost and amortized over their economic service lives using straight-line method.

Deferred Charges

Deferred charges are stated at cost and amortized on a straight-line basis as follows: intellectual property and technology license fee the term of contract or economic lives of the related technology; software 3 years; and bonds issuance costs over the life of the bonds.

Convertible and Exchangeable Bonds

The excess of the stated redemption price over the par value is accrued as compensation interest payable over the redemption period, using the effective interest method.

When convertible bondholders exercise their conversion rights, the book value of bonds is credited to common stock at an amount equal to the par value of the common stock and the excess is credited to capital reserve; no gain or loss is recognized on bond conversion.

When exchangeable bondholders exercise their rights to exchange for the reference shares, the book value of bonds is to be offset with the book value of the investment in reference shares and the related stockholder's equities accounts, with the difference recognized as gain or loss on

disposal of investments.

Pension Plan

The Company has a funded defined benefit pension plan covering all regular employees and the pension fund is managed by an independently administered pension fund association. The net pension cost is computed based on an actuarial valuation in accordance with the provision of the Statements of Financial Accounting Standards of the Republic of China (ROC SFAS) No. 18, which requires consideration of pension cost components such as service cost, interest cost, expected return on plan assets and amortization of net obligation at transition.

Treasury Stock

The Company adopted the ROC SFAS No. 30, which requires that treasury stock held by the Company itself be accounted for under the cost method. Cost of treasury stock is shown as a deduction to stockholders' equity, while gain or loss of selling treasury stock is treated as an adjustment to capital reserves. The Company's stock held by its subsidiaries is also treated as treasury stock in United Microelectronic's account.

Revenue Recognition

Revenue is recognized when title and liability for risk of loss or damage to the products have been transferred to customers usually upon shipment. Sales returns and discounts taking into consideration customers' complaint and past experience are accrued in the same year of sales. The connected cost is to be deducted from the cost of goods sold.

Capital Expenditures versus Operating Expenditures

An expenditure is treated as an asset when it is probable that future economic benefits associated with the expenditure will flow to the Company, and the total amount exceeds certain level. Otherwise it is charged to expense as incurred.

Translation of Foreign Currency Transactions

The accounts of United Microelectronics are maintained in New Taiwan dollars, the functional currency. Transactions denominated in foreign currencies are translated into New Taiwan dollars at the exchange rates prevailing on the transaction dates. Receivables, other monetary assets, and liabilities denominated in foreign currencies are translated into New Taiwan dollars at the exchange rates prevailing at the balance sheet date. Exchange gains or losses are included in the current year's results. The financial statements of foreign subsidiaries and investees are translated into New Taiwan dollars using the spot rates as of each financial statement date for asset and liability accounts, average exchange rates for profit and loss accounts and historical exchange rates for equity accounts. The cumulative translation effects for subsidiaries and investees using functional currencies other than the New Taiwan dollars are included in the cumulative translation adjustment in stockholders' equity.

Income Tax

The Company adopted the ROC SFAS No. 22 Accounting for Income Taxes for inter-period and intra-period income tax allocation. Provision for income tax includes deferred tax resulting from temporary differences and investment tax credits. Deferred tax assets and liabilities are recognized for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts in the financial statements using enacted tax rates and laws that will be in effect when the difference is expected to reverse. Valuation allowance on deferred tax assets is provided to the extent that it is more likely than not that the tax benefits will not be realized.

Income taxes (10%) on unappropriated earnings generated from January 1, 1998 are recorded as expense in the year when the shareholders have resolved that the earnings shall be retained.

According to the ROC SFAS No. 12, the Company recognized the tax benefit from the tax credit incurred at the year equipment acquired, or the year the expenditure arises from research and development.

Earnings Per Share

Earnings per share is calculated according to the ROC SFAS No. 24. Basic earnings per share is computed by dividing net income (loss) by weighted average number of shares outstanding during the year. Diluted earnings per share is calculated by taking basic earnings per share into consideration plus additional common shares that would have been outstanding if the dilutive share equivalents had been issued. The net income (loss) would also be adjusted for the interest derived from any underlying dilutive share equivalents. The weighted-average outstanding shares are restated for stock dividends and bonus share issues.

Unless previously redeemed, repurchased, cancelled or converted, the bonds will be redeemed at 101.675% of their principal amount on March 1, 2004.

- (b) Redemption at the Option of the Company

The Company may redeem all, but not some only, of the bonds, subject to giving no less than 30 nor more than 60 days advance notice, at the early redemption amount, provided that:

- i. On or at any time after June 13, 2003, the closing price of the ADSs on the New York Stock Exchange or other applicable securities exchange on which the ADSs are listed on any ADS trading day for 20 out of 30 consecutive ADS trading days ending at any time within the period of five ADS trading days prior to the date of the redemption notice shall have been at least 130% of the conversion price or last adjusted conversion price, as the case may be, on each such day, or
- ii. At any time prior to maturity at least 90% in principal amount of the bonds have already been redeemed, repurchased, cancelled or converted.

- (c) Conversion Period

- i. In respect of the Shares, on or after January 22, 2002 up to and including February 20, 2004 or
- ii. In respect of the ADSs, on or after the later of January 22, 2002 and the date on which the shelf registration statement covering resales of certain ADSs issuable upon conversion of the bonds has been declared effective by the US SEC, up to and including February 20, 2004.

(d) Conversion Price

The conversion price

- i. In respect of the Shares, will be NT\$69.60 per Share, and
- ii. In respect of the ADSs, will be US\$10.098 per ADS.

The applicable conversion price will be subject to adjustment for, among other things, subdivision or consolidation of Shares, including Shares represented by ADSs, bonus issues, right issues, distributions of cash and stock dividends and other dilutive events.

e. On May 10, 2002, the Company issued LSE listed zero coupon exchangeable bonds exchangeable for common shares or ADSs of AU Optronics Corp. (AU) with an aggregate principal amount of US\$235 million. The terms and conditions of the bonds are as follows:

(a) Final Redemption

Unless previously redeemed, exchanged or purchased and cancelled, the bonds will be redeemed at their principal amounts in US dollars on May 10, 2007.

(b) Redemption at the Option of the Company

The Company may redeem the bonds, in whole or in part, in principal amount thereof, on or after August 10, 2002 and prior to May 10, 2007 at their principal amount, if the market price of the AU common shares, translated into US dollars at the prevailing exchange rate, for a period of 20 consecutive trading days, the last of which occurs not more than 10 days prior to the date upon which notice of such redemption is published, is at least 120% of the exchange price then in effect translated into US dollars at the rate of NT\$34.645=US\$1.00.

The Company may also redeem the bonds, in whole, but not in part, at their principal amount if at least 90% in principal amount of the bonds has already been exchanged, redeemed or purchased and cancelled.

(c) Redemption at the Option of Bondholders

The Company will, at the option of the holders, redeem such bonds on February 10, 2005 at its principal amount.

(d) Tax Redemption

The Company may redeem all, but not part, of the bonds, at any time at their principal amount in US dollars, in the event of certain changes in the ROC's tax rules which would require the Company to gross up for payments of principal, or to gross up for payments of interest or premium, if any, at a rate exceeding 20%.

(e) Exchange

Subject to prior permitted redemption and as otherwise provided in the offering, the bonds are exchangeable at any time on or after June 19, 2002 and prior to April 10, 2007, into AU shares or AU ADSs at an exchange price of NT\$58.25 per share, determined on the basis of a fixed exchange rate of NT\$34.645=US\$1.00; provided however, that if the exercise date falls within five business days from the beginning of, and during, any closed period, the right of the exchanging holder of the bonds to vote with respect to the shares it receives will be subject to certain restriction.

The exchange price will be subject to adjustment upon the occurrence of certain events including free distribution of AU common shares by AU; subdivision, consolidation or reclassification of AU common shares, distribution of stock dividends by AU, right issues and other dilutive events.

The Company's income tax returns for all fiscal years through 1999 have been assessed and approved by the Tax Authority.

Pursuant to the Statute for the Establishment and Administration of Science-Based Industrial Park, the Company was granted several four-year income tax exemption periods with respect to income derived from expansion of operations located in Hsinchu Science-Based Industrial Park. The starting date of the exemption period attributable to the expansion in 1999 has not yet been decided by the Company. The other exemption periods will expire in December 2007.

An enterprise earns an investment tax credit for the amount invested in production equipment, research and development expenditure, employee training expenditure and other related costs. This credit may be applied over a period of five years.

As of March 31, 2003, the Company's unused investment tax credit is as follows:

<u>Expiration Year</u>	<u>Investment tax credits</u>
2003	\$ 3,974,393
2004	5,899,913
2005	3,393,150
2006	5,946,406
2007	2,283,259
	<u>\$ 21,497,121</u>

Under the rules of Income Tax Law, operating loss can be carried forward for 5 years. As of March 31, 2003, the unutilized accumulative loss brought forward amounted to NT\$15,046 million, which will expire in 2006 and 2007.

The new Taiwan imputation tax system requires that any undistributed current earnings, on tax basis of a company derived on or after January 1, 1998, be subject to an additional 10% corporate income tax if the earnings are not distributed before a specific time. This 10% additional tax on undistributed earnings paid by the Company can be used as tax credit by shareholders, including foreign shareholders, against the withholding tax on dividends. In addition, the domestic shareholders can claim a proportionate share in the Company's corporate income tax as tax credit against its individual income tax liability effective 1998.

The ending balance of unappropriated earnings available for 2003 appropriation amounted to NT\$8,686 million, of which NT\$64 million was earned prior to January 1, 1998.

As of March 31, 2003, the balance of imputation credit account (ICA) was NT\$92 million. The expected creditable ratio for the appropriation of 2002 retained earnings was 1.07% while the actual creditable ratio for the appropriation of 2001 retained earnings was 1.79%.

The Company had no significant disposal of property, plant and equipment to related parties for the three-month period ended March 31, 2002.

i. Other transactions

The Company has made several other transactions, including service charges, joint intellectual property development contracts, processing expenditures and commissions etc., with related parties for an approximate total of NT\$56 million and NT\$38 million for the three-month periods ended March 31, 2003 and 2002, respectively.

Among the transactions, the Company has entered into joint intellectual property development contracts, amounting to approximately NT\$1,229 million, with Faraday. As of March 31, 2003, a total amount of NT\$356 million was paid. In addition, the Company has purchased approximately NT\$133 million and NT\$232 million of supplies from DPT during the three-month periods ended March 31, 2003 and 2002, respectively.

Total	\$ 20,308,733	\$ 32,933,404	

7. COMMITMENTS AND CONTINGENT LIABILITIES

- (1) The Company's unused letters of credit for imports of machinery and equipment were approximately NT\$327 million as of March 31, 2003.
- (2) The Company has entered into contracts, amounting to approximately NT\$15.7 billion, with third parties for rights to use patents registered by the third parties. The contract period is from 1995 to 2011. Royalty payables for the consecutive 5 years starting from April 1, 2003 are approximately NT\$2.7 billion, NT\$1.3 billion, NT\$1.3 billion, NT\$1.2 billion, and NT\$1.3 billion, respectively.
- (3) The Company has signed several construction contracts for the expansion of its factory. As of March 31, 2003, these construction contracts amounted to approximately NT\$1.05 billion and the unaccrued portion of the contracts was approximately NT\$0.2 billion.

- (4) On October 27, 1997, Oak Technology Inc. (Oak) filed a complaint seeking damages of US\$750 million in the Northern District of California alleging that the Company breached a Settlement Agreement entered on July 31, 1997 with respect to a settlement of a dispute between the Company and Oak concerning certain CD ROM controller products made by the Company and a patent owned by Oak. The Company denied Oak s allegations and on December 24, 1997, filed its answer and affirmative defenses refuting Oak s claims. Based on the allegations that it is Oak which has breached the Settlement, the Company simultaneously filed a counterclaim against Oak, seeking damages and a return of the millions paid to Oak under the Settlement. In addition, the Company further seeks a declaration that the Oak patent is invalid and/or unenforceable. Though Oak filed a complaint later with the International Trade Commission (ITC) repeating the allegations made in the District Court, both the ITC and the Court of Appeals for the Federal Circuit issued a ruling affirming that there was no infringement and no violation.

Oak filed enforceable commitments that it would no longer seek recoveries in connection with the Oak patent and accordingly, the District Court concluded there was no longer dispute between Oak and United Microelectronics on the patent and the Company s claim for a declaration of invalidity and unenforceability will be dismissed. The Company intends to continue to defend these matters vigorously. Furthermore, the management does not believe the Oak complaints will have any material adverse impact on the Company s operations and/or financial performance.

- (5) The Company entered into several operating lease contracts for land. Future minimum lease payments under those leases with original maturities, which extend for more than one year as of March 31, 2003, are as follows:

For the twelve-month period ended	Amount (in billion NTD)
March 31, 2004	\$0.12
March 31, 2005	0.12
March 31, 2006	0.12
March 31, 2007	0.11
March 31, 2008	0.10
April 1, 2008 and thereafter	0.82
Total	\$1.39

- (6) The Company entered into several wafer-processing contracts with its main clients. According to the contracts, the Company shall guarantee processing capacity, while the clients make deposits to the Company. In case the clients orders do not meet the capacity

guaranteed, the client needs to pay the Company penalties.

- (7) As a condition precedent to the making of the loan contemplated by a US\$600 million Amortizing Term Loan Facility Agreement among UMCi Pte. Ltd. (UMCi), a subsidiary of the Company, and several financial institutions, the Company has provided a letter of undertaking to the financial institutions and Citicorp Investment Bank (Singapore) Ltd., the facility agent, to undertake that:
- a. The Company shall continue to own and control, directly or indirectly, a minimum of 40% of the total issued and outstanding shares of UMCi. The Company shall also provide technical support to UMCi and maintain management control with no less than half of the seats of the board of directors.
 - b. The Company shall take necessary actions to ensure UMCi to have at least US\$600 million of issued and paid-in capital in cash by December 31, 2003, to make investments necessary to complete the 300mm fab plant on time, and to meet all the obligations under the Facility Agreement.

The methods and assumptions used to measure the fair value of financial instruments are as follows:

- i. The carrying amounts of short-term financial assets and liabilities (excluding marketable securities) approximate fair values due to their short maturities.
- ii. The fair values of marketable securities and long-term investments are based on the market value of the securities or, if market value is unavailable, the net equities of the investee companies are used as fair values.
- iii. The fair value of bonds payable is determined by the market value.
- iv. The carrying value of long-term loans approximates the fair value as the loans bear floating rates.

(3) The Company held several credit-linked deposits principally for the earning of interest income. Details are disclosed as follows:

a. Principal amount in original currency (in thousands)

Credit-linked deposits referenced to	As of March 31,

Euro convertible bonds (in JPY)	2,000,000	1,000,000

b. Credit Risk

The counter parties of the above investments are major international financial institutions. The repayment in full of these deposits is subject to the non-occurrence of one or more credit events, which are referenced to the entities fulfillment of their own obligations as well as repayment of their corporate bonds. Upon the occurrence of one or more of such credit events, the Company may receive nil or less than full amount of these deposits. The Company has undertaken to minimize the credit risk by selecting reference entities with high credit ratings.

c. Liquidity Risk

Though early withdrawal is not allowed for the above credit-linked deposits unless called by the issuer, the anticipated liquidity risk is low as most of the contracts are mature within one year.

d. Market Risk

There is no market risk for the above investments except for the fluctuations in the exchange rates of US dollars and Japanese Yen to NT dollars.
