Table of Contents

PACIFIC PREMIER BANCORP, INC. AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS June 30, 2017 (UNAUDITED)

Note 1 - Basis of Presentation

The consolidated financial statements include the accounts of Pacific Premier Bancorp, Inc. (the "Corporation") and its wholly owned subsidiaries, including Pacific Premier Bank (the "Bank") (collectively, the "Company," "we," "our" or "us"). A significant intercompany accounts and transactions have been eliminated in consolidation.

In the opinion of management, the consolidated financial statements contain all adjustments (consisting of normal recurring accruals) necessary to present fairly the Company's financial position as of June 30, 2017 and December 31, 2016, the results of its operations and comprehensive income for the three months ended June 30, 2017, March 31, 2017 and June 30, 2016 and the six months ended June 30, 2017 and June 30, 2016 and the changes in stockholders' equity and cash flows for the six months ended June 30, 2017 and 2016. Operating results or comprehensive income for the six months ended June 30, 2017 are not necessarily indicative of the results or comprehensive income that may be expected for any other interim period or the full year ending December 31, 2017.

Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016 (the "2016 Annual Report").

The Company accounts for its investments in its wholly owned special purpose entity, PPBI Trust I, under the equity method whereby the subsidiary's net earnings are recognized in the Company's statement of operations.

Note 2 - Recently Issued Accounting Pronouncements

Accounting Standards Adopted in 2017

In March 2016, the FASB issued ASU 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Accounting. The amendments simplify several aspects of the accounting for share-based payment award transactions, including accounting for excess tax benefits and tax deficiencies, classifying excess tax benefits on the statement of cash flows, accounting for forfeitures, classifying awards that permit share repurchases to satisfy statutory tax-withholding requirements and classifying tax payments on behalf of employees on the statement of cash flows. For public business entities, the amendment is effective for annual periods beginning after December 15, 2016 and interim periods within those annual periods. Early adoption is permitted for any organization in any interim or annual period. As a result of the adoption of ASU 2016-09, the Company began recognizing the tax effects of exercised or vested awards as discrete items in the reporting period in which they occur, resulting in a \$461,000 tax benefit to the Company for the second quarter of 2017 compared with \$1.1 million tax benefit in the first quarter of 2017.

In March 2016, the FASB issued ASU 2016-05, Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships. The amendments clarify that a change in the counterparty to a derivative instrument designated as a hedging instrument does not, in and of itself, require designation of that hedging relationship provided that all other hedge accounting criteria remain the same. The Update is effective for

public business entities for fiscal years beginning after December 31, 2016, including interim

periods within those years. The adoption of this standard did not have a material effect on the Company's operating results or financial condition.

Recent Accounting Guidance Not Yet Effective

In May 2017, the FASB issued ASU 2017-09, Compensation-Stock Compensation (Topic 718): Scope of Modification Accounting. The amendments provide guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in Topic 718. Modification accounting will apply unless all of the following are the same immediately before and after the modification:

The award's fair value – or calculated value or intrinsic value, if an alternative method is used. If the modification does not affect any inputs to the valuation of the award, estimating the value immediately before and after the modification is not required.

The award's vesting provisions

The award's classification as an equity instrument or a liability instrument

The Update is effective for all entities for fiscal years beginning after December 15, 2017, including interim periods within those years. The amendments should be applied prospectively to awards modified on or after the effective date. The adoption of this standard will not material effect the Company's operating results or financial condition, as historically the Company has not modified share-based awards.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The amendments replace the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. For public business entities, the amendment is effective for annual periods beginning after December 15, 2019 and interim period within those annual periods. The Company is currently evaluating the effects of ASU 2016-13 on its financial statements and disclosures. The Company is in the process of compiling key data elements and considering software models that will meet the requirements of the new guidance.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). The new standard is being issued to increase the transparency and comparability around lease obligations. Previously unrecorded off-balance sheet obligations will now be brought more prominently to light by presenting lease liabilities on the face of the balance sheet, accompanied by enhanced qualitative and quantitative disclosures in the notes to the financial statements. The Update is generally effective for public business entities in fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is in the early stages of its implementation assessment, which includes identifying the population of the Company's leases that are within the scope of the new guidance and gathering all key lease data that will facilitate application of the new accounting requirements.

ASU 2014-09, Revenue From Contracts With Customers (Topic 606), ASU 2015-14 Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date, ASU 2016-08 Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net), ASU 2016-10 Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing, ASU 2016-11 Revenue Recognition (Topic 605) and Derivatives ad Hedging (Topic 815): Rescission of SEC Guidance Because of Accounting Standards Updates 2014-09 and 2014-16 Pursuant to Staff Announcements at the March 3, 2016 EITF Meeting, ASU 2016-12 Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients, and ASU 2016-20 Revenue from Contracts with Customers (Topic 606): Technical Corrections

and Improvements to Topic 606. The FASB amended existing guidance related to revenue from contracts with customers, superseding and replacing nearly all existing revenue recognition guidance, including industry-specific guidance, establishing a new control-based revenue recognition model, changing the basis for deciding when revenue is recognized over time or at a point in time, providing new and more detailed

guidance on specific topics and expanding and improving disclosures about revenue. In addition, this guidance specifies the accounting for some costs to obtain or fulfill a contract with a customer. The amendments are effective for public entities for annual reporting periods beginning after December 15, 2017. Substantially all of the Company's revenue is generated from interest income related to loans and investment securities, which are not within the scope of this guidance. The contracts that are within the scope of this guidance include service charges and fees on deposit accounts and the Company does not expect the adoption will have a significant impact on its Consolidated Financial Statements.

Note 3 - Significant Accounting Policies

Except as discussed below, our accounting policies are described in Note 1. Description of Business and Summary of Significant Accounting Policies, of our audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2016 as filed with the Securities and Exchange Commission ("Form 10-K").

Certain Acquired Loans–As part of business acquisitions, the Bank acquires certain loans that have shown evidence of credit deterioration since origination. These acquired loans are recorded at the allocated fair value, such that there is no carryover of the seller's allowance for loan losses. Such acquired loans are accounted for individually. The Bank estimates the amount and timing of expected cash flows for each purchased loan, and the expected cash flows in excess of the allocated fair value is recorded as interest income over the remaining life of the loan (accretable yield). The excess of the loan's contractual principal and interest over expected cash flows is not recorded (non-accretable difference). Over the life of the loan, expected cash flows continue to be estimated. If the present value of expected cash flows is less than the carrying amount, a loss is recorded through the allowance for loan losses. If the present value of expected cash flows is greater than the carrying amount, it is recognized as part of future interest income.

Goodwill and Core Deposit Intangible–Goodwill is generally determined as the excess of the fair value of the consideration transferred, plus the fair value of any noncontrolling interests in the acquiree, over the fair value of the net assets acquired and liabilities assumed as of the acquisition date. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but tested for impairment at least annually or more frequently if events and circumstances exist that indicate the necessity for such impairment tests to be performed. The Company has selected November 30 as the date to perform the annual impairment test. Intangible assets with definite useful lives are amortized over their estimated useful lives to their estimated residual values. Goodwill is the only intangible asset with an indefinite life on our balance sheet.

Core deposit intangible assets arising from whole bank acquisitions are amortized on either an accelerated basis, reflecting the pattern in which the economic benefits of the intangible assets is consumed or otherwise used up, or on a straight-line amortization method over their estimated useful lives, which range from 6 to 10 years.

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Note 4 – Acquisitions

The Company accounted for the following transactions under the acquisition method of accounting which requires purchased assets and liabilities assumed to be recorded at their respective fair values at the date of acquisition. The Company determined the fair value of the loans, core deposit intangible, securities and deposits with the assistance of third party valuations.

Table of Contents

Heritage Oaks Bancorp Acquisition

The Company completed the acquisition, effective as of April 1, 2017, of Heritage Oaks Bancorp ("HEOP"), the holding company of Heritage Oaks Bank, a Paso Robles, California based state-chartered bank ("Heritage Oaks Bank") with \$2.0 billion in total assets, \$1.4 billion in gross loans and \$1.7 billion in total deposits at March 31, 2017. Heritage Oaks Bank operates branches within San Luis Obispo and Santa Barbara Counties and a loan production office in Ventura County.

Pursuant to the terms of the merger agreement, each outstanding share of HEOP common stock was converted into the right to receive 0.3471 shares of Company common stock. The value of the total deal consideration was approximately \$465 million, which included approximately \$3.9 million of aggregate cash consideration payable to holders of Heritage Oaks share-based compensation awards, and the issuance of 11,959,022 shares of the Corporation's common stock, which had a value of \$38.55 per share, which was the closing price of the Corporation's common stock on March 31, 2017, the last trading day prior to the consummation of the acquisition.

Goodwill in the amount of \$268 million was recognized in the HEOP acquisition. Goodwill represents the future economic benefits arising from net assets acquired that are not individually identified and separately recognized and is attributable to synergies expected to be derived from the combination of the two entities. Goodwill recognized in this transaction is not deductible for income tax purposes.

The following table represents the assets acquired and liabilities assumed of HEOP as of April 1, 2017 and the fair value adjustments and amounts recorded by the Company in 2017 under the acquisition method of accounting:

	HEOP Book Value	Fair Value Adjustments	Fair Value
ASSETS ACQUIRED	(dollars in th	e e	, value

Excess of assets acquired over liabilities assumed	\$188,272	\$ 10,220	198,492
Consideration paid			464,982
Capitalized merger-related expense			1,585
Goodwill recognized			\$268,075

The fair values are preliminary estimates and are subject to adjustment for up to one year after the merger date or when additional information relative to the closing date fair values becomes available and such information is considered final, whichever is earlier.

Security California Bancorp Acquisition

On January 31, 2016, the Company completed its acquisition of Security California Bancorp ("SCAF") whereby we acquired \$714 million in total assets, \$456 million in loans and \$637 million in total deposits. Under the terms of the merger agreement, each share of SCAF common stock was converted into the right to receive 0.9629 shares of the Corporation's common stock. The value of the total deal consideration was \$120 million, which includes \$788,000 of aggregate cash consideration to the holders of SCAF stock options and the issuance of 5,815,051 shares of the Corporation's common stock, valued at \$119 million based on a closing stock price of \$20.53 per share on January 29, 2016.

SCAF was the holding company of Security Bank of California, a Riverside, California, based state-chartered bank with six branches located in Riverside County, San Bernardino County and Orange County.

Goodwill in the amount of \$51.7 million was recognized in the SCAF acquisition. Goodwill represents the future economic benefits arising from net assets acquired that are not individually identified and separately recognized and is attributable to synergies expected to be derived from the combination of the two entities. Goodwill recognized in this transaction is not deductible for income tax purposes.

The following table represents the assets acquired and liabilities assumed of SCAF as of January 31, 2016 and the fair value adjustments and amounts recorded by the Company in 2016 under the acquisition method of accounting:

	Goodwill recognized				\$51,658

The fair values are estimates and are subject to adjustment for up to one year after the merger date or when additional information relative to the closing date fair values becomes available and such information is

considered final, whichever is earlier. In the second quarter of 2016, the Company made a \$146,000 adjustment to fixed assets and goodwill. As of March 31, 2017, the Company finalized its fair values with this acquisition.

For loans acquired from SCAF and HEOP, the contractual amounts due, expected cash flows to be collected, interest component and fair value as of the respective acquisition dates were as follows:

	Acquired Loans			
	SCAF HEOP			
	(dollars in	thousands)		
Contractual amounts due	\$539,806	\$1,717,230		
Cash flows not expected to be collected	2,765	4,442		
Expected cash flows	537,041	1,712,788		
Interest component of expected cash flows	80,883	348,100		
Fair value of acquired loans	\$456,158	\$1,364,688		

In accordance with generally accepted accounting principles, there was no carryover of the allowance for loan losses that had been previously recorded by SCAF and HEOP.

The operating results of the Company for the three months ended June 30, 2017, March 31, 2017 and June 30, 2016 and the six months ended June 30, 2017 and June 30, 2016 include the operating results of SCAF and HEOP since its acquisition date. The following table presents the net interest and other income, net income and earnings per share as if the acquisition of SCAF and HEOP were effective as of January 1, 2016. There were no material, nonrecurring adjustments to the pro forma net interest and other income, net income and earnings per share presented below:

At June 30, 2017, mortgage-backed securities ("MBS ") with an estimated par value of \$56.0 million and a fair value of \$58.0 million were pledged as collateral for the Bank's three repurchase agreements which totaled \$28.5 million and homeowner's association ("HOA") reverse repurchase agreements which totaled \$20.9 million.

At December 31, 2016, MBS with an estimated par value of \$63.6 million and a fair value of \$65.3 million were pledged as collateral for the Bank's three repurchase agreements which totaled \$28.5 million and HOA reverse repurchase agreements which totaled \$21.5 million.

At June 30, 2017 and December 31, 2016, there were not holdings of securities of any one issuer, other than the U.S. Government and its agencies, in an amount greater than 10% of shareholders' equity.

Table of Contents

The Company reviews individual securities classified as available-for-sale to determine whether a decline in fair value below the amortized cost basis is temporary because (i) those declines were due to interest rate changes and not to a deterioration in the creditworthiness of the issuers of those investment securities, and (ii) we have the ability to hold those securities until there is a recovery in their values or until their maturity.

If it is probable that the Company will be unable to collect all amounts due according to contractual terms of the debt security not impaired at acquisition, an other-than-temporary impairment ("OTTI") shall be considered to have occurred. If an OTTI occurs, the cost basis of the security will be written down to its fair value as the new cost basis and the write down accounted for as a realized loss.

The Company did not realize any OTTI recoveries or losses for the three months ended June 30, 2017. However, the Company did realize an OTTI recovery of \$1,000 for the three months ended March 31, 2017, which relates to investment income from a previously charge-off investment. A \$207,000 OTTI was taken in the first quarter of 2016, related to a CRA investment purchased in June of 2014 with a par value of \$50, and a book value of \$500,000. In March 2016, the shareholders of the investment voted to approve a sale of the institution at a per share acquisition price less the Bank's book value, and the sale closed in July 2016. The Company is currently waiting to receive the proceeds for its outstanding shares. As a result, the Company's current holdings were written down and the loss recognized.

The table below shows the number, fair value and gross unrealized holding losses of the Company's investment securities by investment category and length of time that the securities have been in a continuous loss position. June 30, 2017

Unrealized gains and losses on investment securities available-for-sale are recognized in stockholders' equity as accumulated other comprehensive income or loss. At June 30, 2017, the Company had an accumulated other comprehensive income of \$5.5 million, or \$3.3 million net of tax, compared to an accumulated other comprehensive loss of \$4.7 million, or \$2.7 million net of tax, at December 31, 2016.

Table of Contents

During the three months ended June 30, 2017 and June 30, 2016, the Company recognized gross gains on sales of available-for-sale securities in the amount of \$2.1 million and \$532,000, respectively. The Company did not recognize any gross gains on sales of available-for-sale securities during the three months ended March 31, 2017. During the three months ended June 30, 2017, the Company recognized gross losses on the sales of available-for-sale securities in the amount of \$50,000. The Company did not recognize any gross losses on the sales of available-for sale securities during the three months ended March 31, 2017 and June 30, 2016. The Company had net proceeds from the sale of available-for-sale securities of \$215 million during the three months ended June 30, 2017 and \$21.1 million during the three months ended June 30, 2016. The Company had zero net proceeds from the sale of available-for-sale securities during the three months ended March 31, 2017.

During the six months ended June 30, 2017 and June 30, 2016, the Company recognized gross gains on sales of available-for-sale securities in the amount of \$2.1 million and \$1.3 million, respectively. During the six months ended June 30, 2017 and June 30, 2016, the Company recognized gross losses on sales of available-for-sale securities in the amount of \$50,000 and \$9,000, respectively. The Company had net proceeds from the sale of available-for-sale securities of \$215 million during the six months ended June 30, 2017 and \$207 million during the six months ended June 30, 2016.

FHLB, FRB and other stock

At June 30, 2017, the Company had \$17.3 million in Federal Home Loan Bank ("FHLB") stock, \$25.0 million in Federal Reserve Bank of San Francisco ("FRB") stock, and \$14.4 million in other stock, all carried at cost. During the three months ended June 30, 2017, the Company acquired \$7.9 million of FHLB stock through the HEOP acquisition, of which the FHLB subsequently repurchased \$5.0 million through their stock repurchase program. During the three months ended June 30, 2016 and December 31, 2016, the FHLB did not repurchase any of the Company's excess FHLB stock through their stock repurchase program. In addition, the Company acquired another \$1.9 million of other stock through the HEOP acquisition and was required to increase its holdings of FRB stock by \$14.1 million. The Company evaluates its investments in FHLB, FRB and other stock for impairment periodically, including their capital adequacy and overall financial condition. No impairment losses have been recorded through June 30, 2017.

Note 6 - Loans Held for Investment

The following table sets forth the composition of our loan portfolio in dollar amounts at the dates indicated:

	June 30,	December 31,			
	2017	2016

Loans held for investment, net	\$4,833,556	\$3,220,317			

(1) Secured by real estate.

(2) Includes second trust deeds.

(3) Total gross loans for June 30, 2017 are net of the unaccreted fair value purchase discounts of \$25.2 million.

From time to time, we may purchase or sell loans in order to manage concentrations, maximize interest income, change risk profiles, improve returns and generate liquidity.

The Company makes residential and commercial loans held for investment to customers located primarily in California. Consequently, the underlying collateral for our loans and a borrower's ability to repay may be impacted unfavorably by adverse changes in the economy and real estate market in the region.

Under applicable laws and regulations, the Bank may not make secured loans to one borrower in excess of 25% of the Bank's unimpaired capital plus surplus and likewise in excess of 15% for unsecured loans. These loans-to-one borrower limitations result in a dollar limitation of \$261.4 million for secured loans and \$156.8 million for unsecured loans at June 30, 2017. At June 30, 2017, the Bank's largest aggregate outstanding balance of loans to one borrower was \$35.0 million of secured credit.

Purchased Credit Impaired

The Company has purchased loans as part of its acquisitions of Canyon National Bank in 2011, Palm Desert National Bank in 2012, Independence Bank in 2015, Security Bank of California in 2016 and Heritage Oaks Bank in 2017 for which there was, at acquisition, evidence of deterioration of credit quality since origination and for which it was probable, at acquisition, that all contractually required payments would not be collected. The carrying amount of those loans is as follows:

	June 30,December 2017 31, 2016 (dollars in thousands)					
Business loans:		,				
Commercial and industrial	\$3,679	\$ 2,586				
Commercial owner occupied	3,208	491				
SBA	361	_				
Real estate loans:						
Commercial non-owner occupied	1,151	1,088				
Multi-family	237					
One-to-four family	262	1				
Construction/Land	549					
Other loans	274	393				
Total purchase credit impaired	\$9,721	\$ 4,559				

On the acquisition date, the amount by which the undiscounted expected cash flows of the purchased credit impaired loans exceed the estimated fair value of the loan is the "accretable yield." The accretable yield is measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the purchased credit impaired loan. At June 30, 2017, the Company had \$9.7 million of purchased credit impaired loans, of which none were placed on nonaccrual status.

The following table summarizes the accretable yield on the purchased credit impaired loans for the three months ended June 30, 2017, March 31, 2017 and June 30, 2016 and for the six months ended June 30, 2017 and 2016:

The Company considers a loan to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement or it is determined that the likelihood of the Company receiving all scheduled payments, including interest, when due is remote. The Company has no commitments to lend additional funds to debtors whose loans have been impaired.

The Company reviews loans for impairment when the loan is classified as substandard or worse, delinquent 90 days, or determined by management to be collateral dependent, or when the borrower files

Table of Contents

bankruptcy or is granted a troubled debt restructuring ("TDR"). Measurement of impairment is based on the loan's expected future cash flows discounted at the loan's effective interest rate, measured by reference to an observable market value, if one exists, or the fair value of the collateral if the loan is deemed collateral dependent. All loans are generally charged-off at such time the loan is classified as a loss. Valuation allowances are determined on a loan-by-loan basis or by aggregating loans with similar risk characteristics.

The following table provides additional detail on the components of impaired loans at the period end indicated:

June 3December 31, 2017 2016 (dollars in thousands) Nonaccruing loans \$395 \$ 1,141 Accruing loans \$395 \$ 1,141

When loans are placed on nonaccrual status all accrued interest is reversed from earnings. Payments received on nonaccrual loans are generally applied as a reduction to the loan principal balance. If the likelihood of further loss is remote, the Company will recognize interest on a cash basis only. Loans may be returned to accruing status if the Company believes that all remaining principal and interest is fully collectible and there has been at least three months of sustained repayment performance since the loan was placed on nonaccrual.

The Company does not accrue interest on loans 90 days or more past due or when, in the opinion of management, there is reasonable doubt as to the collection of interest. The Company had impaired loans on nonaccrual status of \$395,000 at June 30, 2017 and \$1.1 million at December 31, 2016. The Company had no loans 90 days or more past due and still accruing at June 30, 2017 and December 31, 2016.

At June 30, 2017, the Company had a recorded investment in one TDR of \$1.6 million. The modification of the terms of the loan included the restructuring of three loans related to one borrower into one loan and an extension of the maturity to six years. There were no TDRs at December 31, 2016. In addition, the Company had \$41,000 in consumer mortgage loans collateralized by residential real estate property for which formal foreclosure proceedings were in process as of June 30, 2017 and December 31, 2016.

Concentration of Credit Risk

As of June 30, 2017, the Company's loan portfolio was primarily collateralized by various forms of real estate and business assets located predominately in California. The Company's loan portfolio contains concentrations of credit in multi-family real estate, commercial non-owner occupied real estate and commercial owner occupied real estate and business loans. The Bank maintains policies approved by the Bank's Board of Directors (the "Bank Board") that address these concentrations and continues to diversify its loan portfolio through loan originations, purchases and sales to meet approved concentration levels. While management believes that the collateral presently securing these loans is adequate, there can be no assurances that a significant deterioration in the California real estate market or economy would not expose the Company to significantly greater credit risk.

Credit Quality and Credit Risk Management

The Company's credit quality is maintained and credit risk managed in two distinct areas. The first is the loan origination process, wherein the Bank underwrites credit quality and chooses which risks it is willing to accept. The second is in the ongoing oversight of the loan portfolio, where existing credit risk is measured and monitored, and

where performance issues are dealt with in a timely and comprehensive fashion.

Table of Contents

The Company maintains a comprehensive credit policy which sets forth minimum and maximum tolerances for key elements of loan risk. The policy identifies and sets forth specific guidelines for analyzing each of the loan products the Company offers from both an individual and portfolio wide basis. The credit policy is reviewed annually by the Bank Board. The Bank's seasoned underwriters ensure key risk factors are analyzed with nearly all underwriting including a comprehensive global cash flow analysis of the prospective borrowers.

Credit risk is managed within the loan portfolio by the Company's portfolio managers based on a comprehensive credit and portfolio review policy. This policy requires a program of financial data collection and analysis, comprehensive loan reviews, property and/or business inspections and monitoring of portfolio concentrations and trends. The portfolio managers also monitor asset-based lines of credit, loan covenants and other conditions associated with the Company's business loans as a means to help identify potential credit risk. Individual loans, excluding the homogeneous loan portfolio, are reviewed at least every two years and in most cases, more often, including the assignment of a risk grade.

Risk grades are based on a six-grade Pass scale; along with Special Mention, Substandard, Doubtful and Loss classifications as such classifications are defined by the regulatory agencies. The assignment of risk grades allows the Company to, among other things; identify the risk associated with each credit in the portfolio, and to provide a basis for estimating credit losses inherent in the portfolio. Risk grades are reviewed regularly by the Company's Credit and Portfolio Review committee, and are reviewed annually by an independent third-party, as well as by regulatory agencies during scheduled examinations.

The following provides brief definitions for risk grades assigned to loans in the portfolio:

Pass classifications represent assets with a level of credit quality which contain no well-defined deficiency or weakness.

Special Mention assets do not currently expose the Bank to a sufficient risk to warrant classification in one of the adverse categories, but possess correctable deficiencies or potential weaknesses deserving management's close attention.

Substandard assets are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. These assets are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. OREO acquired from foreclosure is also classified as substandard. Doubtful credits have all the weaknesses inherent in substandard credits, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loss assets are those that are considered uncollectible and of such little value that their continuance as assets is not warranted. Amounts classified as loss are promptly charged off.

The portfolio managers also manage loan performance risks, collections, workouts, bankruptcies and foreclosures. Loan performance risks are mitigated by our portfolio managers acting promptly and assertively to address problem credits when they are identified. Collection efforts are commenced immediately upon non-payment, and the portfolio managers seek to promptly determine the appropriate steps to minimize the Company's risk of loss. When foreclosure will maximize the Company's recovery for a non-performing loan, the portfolio managers will take appropriate action to initiate the foreclosure process.

When a loan is graded as special mention or substandard or doubtful, the Company obtains an updated valuation of the underlying collateral. If the credit in question is also identified as impaired, a valuation allowance, if necessary, is established against such loan or a loss is recognized by a charge to the allowance for loan losses ("ALLL") if management believes that the full amount of the Company's recorded investment in the loan is no longer collectable. The Company typically continues to obtain or confirm updated valuations of underlying collateral for special mention

and classified loans on an annual basis in order to have the most current indication of

fair value. Once a loan is identified as impaired, an analysis of the underlying collateral is performed at least quarterly, and corresponding changes in any related valuation allowance are made or balances deemed to be fully uncollectable are charged-off.

The following tables stratify the loan portfolio by the Company's internal risk grading as of the periods indicated:

Note 7 – Allowance for Loan Losses

The Company's ALLL covers estimated credit losses on individually evaluated loans that are determined to be impaired as well as estimated credit losses inherent in the remainder of the loan portfolio. The ALLL is prepared in accordance with the historical loss method, using the information provided by the Company's credit review process together with data from peer institutions and economic information gathered from published sources.

The loan portfolio is segmented into groups of loans with similar risk characteristics. Each segment possesses varying degrees of risk based on, among other things, the type of loan, the type of collateral, and the sensitivity of the borrower or industry to changes in external factors such as economic conditions. An estimated loss

Table of Contents

rate calculated using the Company's actual historical loss rates adjusted for current portfolio trends, economic conditions, and other relevant internal and external factors, is applied to each group's aggregate loan balances.

The Company's base ALLL factors are determined by management using the Bank's annualized actual trailing charge-off data over a full credit cycle (replacing prior period's interval ranging from 8 to 87 months) with the loss emergence period extending from 1 year to 1.4 years. The aforementioned enhancements did not materially impact the allowance balance at June 30, 2017. Adjustments to those base factors are made for relevant internal and external factors. Those factors may include:

Changes in national, regional and local economic conditions, including trends in real estate values and the interest rate environment,

Changes in the nature and volume of the loan portfolio, including new types of lending,

Changes in volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans, and

The existence and effect of concentrations of credit, and changes in the level of such concentrations.

For loans risk graded as watch or worse, progressively higher potential loss factors are applied based on management's judgment, taking into consideration the specific characteristics of the Bank's portfolio and analysis of results from a select group of the Company's peers.

The following tables summarize the allocation of the ALLL, as well as the activity in the ALLL attributed to various segments in the loan portfolio as of and for the three and six months ended for the periods indicated:

Note 8 - Subordinated Debentures

In August 2014, the Corporation issued \$60 million in aggregate principal amount of 5.75% Subordinated Notes Due 2024 (the "Notes") in a private placement transaction to institutional accredited investors (the "Private Placement"). The Corporation contributed \$50 million of net proceeds from the Private Placement to the Bank to support general corporate purposes. The Notes bear interest at an annual fixed rate of 5.75%, and the first interest payment on the Notes occurred on March 3, 2015, and will continue to be payable semiannually each March 3 and September 3 until September 3, 2024. The Notes can only be redeemed, partially or in whole, prior to the maturity date if the notes do not constitute Tier 2 Capital (for purposes of capital adequacy guidelines of the Board of Governors of the Federal Reserve). Outstanding principal and accrued and unpaid interest are due upon early redemption.

In connection with the Private Placement, the Corporation obtained ratings from Kroll Bond Rating Agency ("KBRA"). KBRA assigned investment grade ratings of BBB+ and BBB for the Corporation's senior unsecured debt and subordinated debt, respectively, and a senior deposit rating of A- for the Bank. These ratings were reaffirmed by KBRA on November 1, 2016.

In March 2004, the Corporation issued \$10.3 million of Floating Rate Junior Subordinated Deferrable Interest Debentures (the "Subordinated Debentures") to PPBI Trust I, which funded the payment of \$10 million of Floating Rate Trust Preferred Securities ("Trust Preferred Securities") issued by PPBI Trust I in March 2004 due April 7, 2034. The net proceeds from the offering of Trust Preferred Securities were contributed as capital to the Bank to support further growth. Interest is payable quarterly on the Subordinated Debentures at three-month LIBOR plus 2.75% per annum, for an effective rate of 3.91% per annum as of June 30, 2017.

On April 1, 2017, as part of the Heritage Oaks acquisition, the Company assumed \$5.2 million of floating rate junior subordinated debt securities associated with Heritage Oaks Capital Trust II. Interest is payable quarterly at three-month LIBOR plus 1.72% per annum, for an effective rate of 2.86761% per annum as of June 30, 2017. At June 30, 2017, the carrying value of these debentures was \$3.9 million, which reflects purchase accounting fair value adjustments of \$1.4 million. The Company also assumed \$3.1 million and \$5.2 million of floating rate junior subordinated debt associated with Mission Community Capital Trust I and Santa Lucia Bancorp (CA) Capital Trust, respectively. At June 30, 2017, the carrying value of Mission Community Capital Trust I and Santa Lucia Bancorp (CA) Capital Trust were \$2.8 million and \$3.7 million, which reflects purchase accounting fair value adjustments of \$342,000 and \$1.5 million. Interest is payable quarterly at three-month LIBOR plus 2.95% per annum, for an effective rate of 4.10844% per annum as of June 30, 2017 for Mission Community Capital Trust I. Interest is payable quarterly at three-month LIBOR plus 1.48% per annum, for an effective rate of 2.63844% per annum as of June 30, 2017 for Santa Lucia Bancorp (CA) Capital Trust. These three debentures are callable by the Company at par.

The Corporation is not allowed to consolidate any trust preferred securities into the Company's consolidated financial statements. The resulting effect on the Company's consolidated financial statements is to report only the Subordinated Debentures as a component of the Company's liabilities.

Note 9 – Earnings Per Share

Basic earnings per share excludes dilution and is computed by dividing net income or loss available to common stockholders by the weighted average number of common shares outstanding for the period, excluding common shares in treasury. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted from the issuance of common stock that would then share in earnings and excludes common shares in treasury. Stock options exercisable for shares of common stock are excluded from the computation of diluted earnings per share if they are anti-dilutive due to their exercise price exceeding the average market price during the period.

The impact of stock options which are anti-dilutive are excluded from the computations of diluted earnings per share. The dilutive impact of these securities could be included in future computations of diluted earnings per share if the market price of the common stock increases. The following table sets forth the weighted average number of stock options excluded for the periods indicated:

Three Months EndedSix Months
EndedJune $30 \frac{March}{31}$ June 30, June 30,20172017201620172016

Weighted average stock options excluded 15,531 — 154,251 7,389 131,703

The following tables set forth the Company's earnings per share calculations for the periods indicated:

Note 10 - Fair Value of Financial Instruments

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. In estimating fair value, the Company utilizes valuation techniques that are consistent with the market approach, the income approach, and/or the cost approach. Such valuation techniques are consistently applied. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. ASC Topic 825 requires disclosure of the fair value of financial assets and financial liabilities, including both those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis and a non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value, and for estimating the fair value of financial assets and financial liabilities not recorded at fair value, are discussed below.

In accordance with accounting guidance, the Company groups its financial assets and financial liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, prepayment speeds, volatilities, etc.) or model-based valuation techniques where all significant assumptions are observable, either directly or indirectly, in the market.

Level 3 - Valuation is generated from model-based techniques where one or more significant inputs are not observable, either directly or indirectly, in the market. These unobservable assumptions reflect the Company's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques may include use of matrix pricing, discounted cash flow models, and similar techniques.

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the fair values presented. Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction at June 30, 2017, March 31, 2017 and June 30, 2016.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Management maximizes the use of observable inputs and attempts to minimize the use of unobservable inputs when determining fair value measurements. The following is a description of both the general and specific valuation methodologies used for certain instruments measured at fair value, as well as the general classification of these instruments pursuant to the valuation hierarchy.

Cash and due from banks – The carrying amounts of cash and short-term instruments approximate fair value due to the liquidity of these instruments.

Investment securities – Investment securities are generally valued based upon quotes obtained from independent third-party pricing services, which uses evaluated pricing applications and model processes. Observable market inputs, such as, benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data are considered as part of the evaluation. The inputs are related directly to the security being evaluated, or indirectly to a similarly situated security. Market assumptions and market data are utilized in the valuation models. The Company reviews the market prices provided by the third-party pricing service for reasonableness based on the Company's understanding of the market place and credit issues related to the securities. The Company has not made any adjustments to the market quotes provided by them and, accordingly, the Company categorized its investment portfolio within Level 2 of the fair value hierarchy.

FHLB, FRB, Other Stock – Due to restrictions placed on transferability, it is not practical to determine the fair value of the stock.

Loans Held for Sale — The fair value of loans held for sale is estimated based upon binding contracts and quotes from third party investors resulting in a Level 2 classification.

Loans Held for Investment — The fair value of loans, other than loans on nonaccrual status, was estimated by discounting the remaining contractual cash flows using the estimated current rate at which similar loans would be made to borrowers with similar credit risk characteristics and for the same remaining maturities, reduced by deferred net loan origination fees and the allocable portion of the allowance for loan losses. Accordingly, in determining the estimated current rate for discounting purposes, no adjustment has been made for any change in borrowers' credit risks since the origination of such loans. Rather, the allocable portion of the allowance for loan losses is considered to provide for such changes in estimating fair value. As a result, this fair value is not necessarily the value which would be derived using an exit price. These loans are included within Level 3 of the fair value hierarchy.

Impaired loans and OREO – Impaired loans and OREO assets are recorded at the fair value less estimated costs to sell at the time of foreclosure. The fair value of impaired loans and OREO assets are generally based on recent real estate appraisals adjusted for estimated selling costs. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are typically significant and result in a Level 3 classification of the inputs for determining fair value.

Deposit Accounts and Short-term Borrowings — The amounts payable to depositors for demand, savings, and money market accounts, and short-term borrowings are considered to approximate fair value. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities using a discounted cash flow calculation. Interest-bearing deposits and borrowings are included within Level 2 of the fair value hierarchy.

Term FHLB Advances and Other Long-term Borrowings— The fair value of long term borrowings is determined using rates currently available for similar borrowings with similar credit risk and for the remaining maturities and are classified as Level 2.

Subordinated Debentures – The fair value of subordinated debentures is estimated by discounting the balance by the current three-month LIBOR rate plus the current market spread. The fair value is determined based on the maturity date as the Company does not currently have intentions to call the debenture and is classified as Level 2.

Accrued Interest Receivable/Payable – The carrying amounts of accrued interest receivable and accrued interest payable are deemed to approximate fair value.

Table of Contents

Estimated fair values are disclosed for financial instruments for which it is practicable to estimate fair value. These estimates are made at a specific point in time based on relevant market data and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering the Company's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

The fair value estimates presented herein are based on pertinent information available to management as of the periods indicated.

The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

A loan is considered impaired when it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement. Impairment is measured based on the fair value of the underlying collateral or the discounted expected future cash flows. The Company measures impairment on all non-accrual loans for which it has reduced the principal balance to the value of the underlying collateral less the anticipated selling cost. As such, the Company records impaired loans as Level 3. At June 30, 2017, substantially all the Company's impaired loans were evaluated based on the fair value of their underlying collateral based upon the most recent appraisal available to management.

The fair value of impaired loans and other real estate owned were determined using Level 3 assumptions, and represents impaired loan and other real estate loan balances for which a specific reserve has been established or on which a write down has been taken. Generally, the Company obtains third party appraisals (or property valuations) and/or collateral audits in conjunction with internal analysis based on historical experience on its impaired loans and other real estate owned to determine fair value. In determining the net realizable value of the underlying collateral for impaired loans, the Company will then discount the valuation to cover both market price fluctuations and selling costs the Company expected would be incurred in the event of foreclosure. In addition to the discounts taken, the Company's calculation of net realizable value considered any other senior liens in place on the underlying collateral.

Note 11 - Derivative Instruments

From time to time, the Company enters into interest rate swap agreements with certain borrowers to assist them in mitigating their interest rate risk exposure associated with the loans they have with the Company. At the same time, the Company enters into identical interest rate swap agreements with another financial institution to mitigate the Company's interest rate risk exposure associated with the swap agreements it enters into with its borrowers. At June 30, 2017, the Company had swaps with matched terms with an aggregate notional amount of \$41.3 million and a fair value of \$1.2 million. The fair values of these swaps are recorded as components of other assets and other liabilities in the Company's condensed consolidated balance sheet. Changes in the fair value of these swaps, which occur due to changes in interest rates, are recorded in the Company's income statement as a component of noninterest

income. Since the terms of the swap agreements between the Company and its borrowers have been matched with the terms of swap agreements with another financial institution, the adjustments for the change in their fair value offset each other in non-interest income.

Although changes in the fair value of swap agreements between the Company and borrowers and the Company and other financial institutions offset each other, changes in the credit risk of these counterparties may

Table of Contents

result in a difference in the fair value of these swap agreements. Offsetting swap agreements the Company has with other financial institutions are collateralized with cash, and swap agreements with borrowers are secured by the collateral arrangements for the underlying loans these borrowers have with the Company. During the six months ended June 30, 2017, there were no losses recorded on swap agreements, attributable to the change in credit risk associated with a counterparty. All interest rate swap agreements entered into by the Company as of June 30, 2017 are not designated as hedging instruments.

The following tables summarize the Company's derivative instruments, included in "other assets" and "other liabilities" in the consolidated statements of financial condition. The Company's derivative instruments were acquired as part of the HEOP acquisition, and the Company did not have any at December 31, 2016:

	June 30, 2017	
	Derivative	Derivative
	Assets	Liabilities
	Notional Fair Value	Notional Fair Value
	(dollars in thous	ands)
Derivative instruments not designated as hedging instruments:		
Interest rate swap contracts	\$41,259 \$1,177	\$41,259 \$1,177
Total derivative instruments	\$41,259 \$1,177	\$41,259 \$1,177

Note 12 - Balance Sheet Offsetting

Derivative financial instruments may be eligible for offset in the consolidated balance sheets, such as those subject to enforceable master netting arrangements or a similar agreement. Under these agreements, the Company has the right to net settle multiple contracts with the same counterparty. The Company offers an interest rate swap product to qualified customers which are then paired with derivative contracts the Company enters into with a counterparty bank. While derivative contracts entered into with counterparty banks may be subject to enforceable master netting arrangements. As such, these instruments have been excluded from the table below.

Financial instruments that are eligible for offset in the consolidated statements of financial condition as of June 30, 2017 are presented in the table below:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains information and statements that are considered "forward looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These forward-looking statements represent plans, estimates, objectives, goals, guidelines, expectations, intentions, projections and statements of our beliefs concerning future events, business plans, objectives, expected operating results and the assumptions upon which those statements are based. Forward-looking statements include without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and are typically identified with words such as "may," "could," "should," "will," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan," or words or phrases of similar meaning. We ca the forward-looking statements are based largely on our expectations and are subject to a number of known and unknown risks and uncertainties that are subject to change based on factors which are, in many instances, beyond our control. Actual results, performance or achievements could differ materially from those contemplated, expressed, or implied by the forward-looking statements.

The following factors, among others, could cause our financial performance to differ materially from that expressed in such forward-looking statements:

•The strength of the U.S. economy in general and the strength of the local economies in which we conduct operations; The effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System (the "Federal Reserve");

Inflation/deflation, interest rate, market and monetary fluctuations;

The timely development of competitive new products and services and the acceptance of these products and services by new and existing customers;

The impact of changes in financial services policies, laws and regulations, including those concerning taxes, banking, securities and insurance, and the application thereof by regulatory bodies;

•Technological and social media changes;

The effect of acquisitions we have made or may make, including, without limitation, the failure to achieve the expected revenue growth or expense savings from such acquisitions, or the failure to effectively integrate an acquisition target into our operations;

Changes in the level of our nonperforming assets and charge-offs;

The effect of changes in accounting policies and practices, as may be adopted from time-to-time by bank regulatory agencies, the SEC, the Public Company Accounting Oversight Board, the FASB or other accounting standards setters; Possible OTTI of securities held by us;

The impact of current governmental efforts to restructure the U.S. financial regulatory system, including enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act")

Changes in consumer spending, borrowing and savings habits;

The effects of our lack of a diversified loan portfolio, including the risks of geographic and industry concentrations; Ability to attract deposits and other sources of liquidity;

Changes in the financial performance and/or condition of our borrowers;

Changes in the competitive environment among financial and bank holding companies and other financial service providers;

Geopolitical conditions, including acts or threats of terrorism, actions taken by the United States or other governments in response to acts or threats of terrorism and/or military conflicts, which could impact business and economic conditions in the United States and abroad;

Unanticipated regulatory or judicial proceedings; and

Our ability to manage the risks involved in the foregoing.

If one or more of the factors affecting our forward-looking information and statements proves incorrect, then our actual results, performance or achievements could differ materially from those expressed in, or implied by, forward-looking information and statements contained in this Quarterly Report on Form 10-Q and other reports and registration statements filed by us with the SEC. Therefore, we caution you not to place undue reliance on our forward-looking information and statements. We will not update the forward-looking information and statements to reflect actual results or changes in the factors affecting the forward-looking information and statements. For information on the factors that could cause actual results to differ from the expectations stated in the forward-looking statements, see "Risk Factors" under Part I, Item 1A of our 2016 Annual Report.

Forward-looking information and statements should not be viewed as predictions, and should not be the primary basis upon which investors evaluate us. Any investor in our common stock should consider all risks and uncertainties disclosed in our filings with the SEC, all of which are accessible on the SEC's website at http://www.sec.gov.

GENERAL

This discussion should be read in conjunction with our Management Discussion and Analysis of Financial Condition and Results of Operations included in our 2016 Annual Report, plus the unaudited consolidated financial statements and the notes thereto appearing elsewhere in this Quarterly Report on Form 10-Q. The results for the three and six months ended June 30, 2017 are not necessarily indicative of the results expected for the year ending December 31, 2017.

The Corporation is a California-based bank holding company incorporated in the state of Delaware and registered as a bank holding company under the Bank Holding Company Act of 1956, as amended ("BHCA"). Our wholly owned subsidiary, Pacific Premier Bank, is a California state-chartered commercial bank. As a bank holding company, the Corporation is subject to regulation and supervision by the Federal Reserve. We are required to file with the Federal Reserve quarterly and annual reports and such additional information as the Federal Reserve may require pursuant to the BHCA. The Federal Reserve may conduct examinations of bank holding companies, such as the Corporation, and its subsidiaries. The Corporation is also a bank holding company within the meaning of the California Financial Code. As such, the Corporation and its subsidiaries are subject to examination by, and may be required to file reports with, the California Department of Business Oversight-Division of Financial Institutions ("DBO").

A bank holding company, such as the Corporation, is required to serve as a source of financial strength to its subsidiary depository institutions and to commit resources to support such institutions in circumstances where it might not do so absent such a policy. The Federal Reserve, under the BHCA, has the authority to require a bank holding company to terminate any activity or to relinquish control of a nonbank subsidiary (other than a nonbank subsidiary of a bank) upon the Federal Reserve's determination that such activity or control constitutes a serious risk to the financial soundness and stability of any bank subsidiary of the bank holding company.

As a California state-chartered commercial bank which is a member of the Federal Reserve, the Bank is subject to supervision, periodic examination and regulation by the DBO and the Federal Reserve. The Bank's deposits are insured by the FDIC through the Deposit Insurance Fund. In general terms, insurance coverage is up to \$250,000 per depositor for all deposit accounts. As a result of this deposit insurance function, the FDIC also has certain supervisory authority and powers over the Bank. If, as a result of an examination of the Bank, the regulators should determine that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity or other aspects of the Bank's operations are unsatisfactory or that the Bank or our management is violating or has violated any law or regulation, various remedies are available to the regulators. Such remedies include the power to enjoin unsafe or unsound practices, to require affirmative action to correct any conditions resulting from any violation or practice, to issue an administrative order that can be judicially enforced, to direct an increase in capital, to restrict growth, to assess civil monetary penalties, to remove officers and directors and ultimately to request the FDIC to terminate the Bank's deposit insurance. As a California-chartered commercial bank, the Bank is also subject to certain provisions of California law.

We provide banking services within our targeted markets in California to businesses, including the owners and employees of those businesses, professionals, real estate investors and non-profit organizations, as well as consumers in the communities we serve. Additionally, through our HOA Banking and Lending and Franchise Capital units we can provide customized cash management, electronic banking services and credit facilities to HOAs, HOA management companies and quick service restaurant ("QSR") franchise owners nationwide. Our corporate

headquarters are located in Irvine, California. At June 30, 2017, the Bank operated 26 full-service depository branches in California located in the counties of Orange, Los Angeles, Riverside, San Bernardino, San

Table of Contents

Diego, San Luis Obispo and Santa Barbara. Through our branches and our web site at www.ppbi.com, we offer a broad array of deposit products and services for both business and consumer customers, including checking, money market and savings accounts, cash management services, electronic banking, and on-line bill payment. We also offer a variety of loan products, including commercial business loans, lines of credit, commercial real estate loans, SBA loans, residential home loans, and home equity loans. The Bank funds it's lending and investment activities with retail and commercial deposits obtained through its branches, advances from the FHLB, lines of credit, and wholesale and brokered certificates of deposits.

Our principal source of income is the net spread between interest earned on loans and investments and the interest costs associated with deposits and borrowings used to finance the loan and investment portfolios. Additionally, the Bank generates fee income from loan and investment sales and various products and services offered to both depository and loan customers.

CRITICAL ACCOUNTING POLICIES

Management has established various accounting policies that govern the application of U.S. GAAP in the preparation of our financial statements. Our significant accounting policies are described in the Notes to the Consolidated Financial Statements in our 2016 Annual Report. There have been no significant changes to our Critical Accounting Policies as described in our 2016 Annual Report.

Certain accounting policies require management to make estimates and assumptions which have a material impact on the carrying value of certain assets and liabilities; management considers these to be critical accounting policies. The estimates and assumptions management uses are based on historical experience and other factors, which management believes to be reasonable under the circumstances. Actual results could differ significantly from these estimates and assumptions, which could have a material impact on the carrying value of assets and liabilities at balance sheet dates and our results of operations for future reporting periods.

We consider the ALLL to be a critical accounting policy that requires judicious estimates and assumptions in the preparation of our financial statements that is particularly susceptible to significant change. For further information, see "Allowances for Loan Losses" discussed in Note 7 to the Consolidated Financial Statements in this Quarterly Report on Form 10-Q and Note 5 to the Consolidated Financial Statements in our 2016 Annual Report.

HEOP ACQUISITION

Effective April 1, 2017, the Company acquired HEOP, and its wholly-owned bank subsidiary, Heritage Oaks Bank, a Paso Robles, California, based state-chartered bank, pursuant to the terms of a definitive agreement entered into by the Corporation and HEOP on December 12, 2016. As a result of the HEOP acquisition, the Bank acquired and recorded at the acquisition date assets with a fair value of approximately \$2.0 billion, including:

\$1.4 billion of gross loans;
\$443 million in investment securities;
\$268 million in goodwill;
\$78.7 million of cash and cash equivalents;
\$45.5 million of other types of assets;
\$34.9 million in fixed assets; and
\$28.1 million of a core deposit intangible.

Also as a result of the HEOP acquisition, the Company recorded \$465 million of equity in connection with the Corporation's stock issued to HEOP shareholders as part of the acquisition consideration and assumed at acquisition date liabilities with a fair value of approximately \$1.8 billion, including:

\$1.7 billion in deposit accounts; and

\$147 million in other liabilities.

The fair values of the assets acquired and liabilities assumed were determined based on the requirements of FASB ASC Topic 820: Fair Value Measurements and Disclosures. Such fair values are preliminary estimates and are subject to adjustment for up to one year after the merger date or when additional information relative to the closing date fair values becomes available and such information is considered final, whichever is earlier.

The acquisition was an opportunity for the Company to further strengthen its competitive position and move into the Central Coast of California. The integration and system conversion of HEOP was completed in July 2017.

SCAF ACQUISITION

Effective January 31, 2016, the Company acquired SCAF, and its wholly-owned bank subsidiary, Security Bank of California, a Riverside, California, based state-chartered bank, pursuant to the terms of a definitive agreement entered into by the Corporation and SCAF on October 2, 2015. As a result of the SCAF acquisition, the Bank acquired and recorded at the acquisition date assets with a fair value of approximately \$765 million, including:

\$456 million of gross loans;
\$190 million in investment securities;
\$51.7 million in goodwill;
\$40.9 million of cash and cash equivalents;
\$18.1 million of other types of assets;
\$4.2 million in fixed assets; and
\$4.3 million of a core deposit intangible.

Also as a result of the SCAF acquisition, the Company recorded \$119 million of equity in connection with the Corporation's stock issued to SCAF shareholders as part of the acquisition consideration and assumed at acquisition date liabilities with a fair value of approximately \$645 million, including:

\$637 million in deposit transaction accounts; and \$8.8 million other liabilities.

The fair values of the assets acquired and liabilities assumed were determined based on the requirements of FASB ASC Topic 820: Fair Value Measurements and Disclosures. Such fair values are preliminary estimates and are subject to adjustment for up to one year after the merger date or when additional information relative to the closing date fair values becomes available and such information is considered final, whichever is earlier. In the second quarter of 2016, the Company made a \$146,000 adjustment to fixed assets and goodwill. As of March 31, 2017, the Company finalized its fair values with this acquisition.

The acquisition was an opportunity for the Company to further strengthen its competitive position as one of the premier community banks headquartered in Southern California. The integration and system conversion of SCAF was completed in April 2016.

NON-GAAP MEASURES

For periods presented below, return on average tangible common equity is a non-GAAP financial measures derived from U.S. GAAP-based amounts. We calculate these figures by excluding core deposit intangible ("CDI") amortization expense and exclude the average CDI and average goodwill from the average stockholders' equity during the period. Management believes that the exclusion of such items from these financial measures provides useful information to an understanding of the operating results of our core business. However, these non-GAAP financial measures are supplemental and are not a substitute for an analysis based on U.S. GAAP measures. As other companies may use different calculations for these adjusted measures, this presentation may not be comparable to other similarly titled adjusted measures reported by other companies.

RESULTS OF OPERATIONS

In the second quarter of 2017, we reported net income of \$14.2 million, or \$0.35 per diluted share. This compares with net income of \$9.5 million, or \$0.34 per diluted share, for the first quarter of 2017. The increase in net income was primarily driven by an increase in net interest income which increased \$21.6 million, reflecting an increase in earning assets, which was partially offset by an increase in noninterest expense of \$18.7 million. The increase in noninterest expense were primarily driven by an increase in merger-related expense of \$5.2 million associated with the HEOP acquisition and an increase of \$6.7 million in compensation and benefits expense as a result of the acquisition as well as continued investment in personnel.

Net income of \$14.2 million, or \$0.35 per diluted share, for the second quarter of 2017 compares to net income for the second quarter of 2016 of \$10.4 million, or \$0.37 per diluted share. The increase in net income of \$3.8 million was primarily due to the \$25.8 million increase in net interest income resulting from average interest-earning asset growth of \$2.4 billion. The increase in average interest-earning assets was primarily from the acquisition of HEOP and organic loan growth since the end of the second quarter of 2016. These items were partially offset by an \$24.8 million increase in noninterest expense, including \$9.6 million in merger-related expenses and \$8.5 million in compensation and benefits expenses associated with both the acquisition of HEOP and an increase in staffing to support organic growth.

For the three months ended June 30, 2017, the Company's return on average assets was 0.89% and return on average tangible common equity was 11.33%. For the three months ended March 31, 2017, the return on average assets was 0.94% and the return on average tangible common equity was 11.03%. For the three months ended June 30, 2016, the return on average assets was 1.16% and the return on average tangible common equity was 13.30%.

For the first six months of 2017, the Company recorded net income of \$23.7 million, or \$0.69 per diluted share. This compares with net income of \$18.9 million or \$0.70 per diluted share for the first six months of 2016. The increase in net income of \$4.8 million was mostly due to the \$33.3 million increase in net interest income resulting from earning asset growth, primarily from the acquisition of HEOP and organic loan growth, partially offset by growth in non-interest expense of \$30.9 million, including \$11.4 million in merger-related expenses and \$11.7 million in compensation and benefits expenses associated with both the acquisition of HEOP and an increase in staffing to support organic growth. Prior period comparisons for the year-to-date results are impacted by the acquisition of HEOP in the second quarter of 2017 and the acquisition of SCAF in the first quarter of 2016.

For the six months ended June 30, 2017, the Company's return on average assets was 0.91% and return on average tangible common equity was 11.21%, compared with a return on average assets of 1.11% and a return on average tangible common equity of 12.83% for the six months ended June 30, 2016.

Net Interest Income

Our primary source of revenue is net interest income, which is the difference between the interest earned on loans, investment securities, and interest earning balances with financial institutions ("interest-earning assets") and the interest paid on deposits and borrowings ("interest-bearing liabilities"). Net interest margin is net interest income expressed as a percentage of average interest earning assets. Net interest income is affected by changes in both interest rates and the volume of interest-earning assets and interest-bearing liabilities.

Net interest income totaled \$63.3 million in the second quarter of 2017, an increase of \$21.6 million or 52% from the first quarter of 2017. The increase in net interest income was primarily due to an increase in average interest-earning assets of \$1.9 billion, primarily related to the acquisition of HEOP, which at acquisition added \$1.4 billion of loans and \$445 million of securities, before purchase accounting adjustments.

Table of Contents

The increase in the net interest margin from 4.39% to 4.40% was primarily due to higher loan yields, as a result of increased accretion income, which increased 10 basis points to 5.29% from 5.19% in the prior quarter, and a decrease in average cost of interest-bearing liabilities, which decreased 4 basis points to 0.61% from 0.65% in the prior quarter, all of which was partially offset by a 16 basis point decrease in the investment portfolio yield to 2.42% from 2.58% in the prior quarter. Included in the net interest margin for the second quarter of 2017 was \$4.2 million of accretion income associated with acquired loans, representing 30 basis points of net interest margin, including \$3.3 million associated with the Heritage Oaks Bank portfolio, compared to \$1.1 million of accretion income representing 12 basis points of net interest margin in the first quarter of 2017.

Net interest income for the second quarter of 2017 increased \$25.8 million, or 69%, compared to the second quarter of 2016. The increase was related to an increase in average interest-earning assets of \$2.4 billion, which resulted primarily from our organic loan growth since the end of the second quarter of 2016 and our acquisition of HEOP during the second quarter of 2017. Our net interest margin decreased 8 basis points to 4.40% from the prior year margin of 4.48%. The decrease was driven by an 11 basis point decrease in the yield on earning assets, partially offset by a 3 basis point decrease in cost of funds.

For the first six months ended 2017, net interest income increased \$33.3 million, or 46%, compared to the first six months ended 2016. The increase was related to an increase in average interest-earning assets of \$1.6 billion, which resulted primarily from our organic loan growth since the end of the first six months ended 2016 and our acquisition of HEOP during the second quarter of 2017.

The following tables present for the periods indicated the average dollar amounts from selected balance sheet categories calculated from daily average balances and the total dollar amount, including adjustments to yields and costs, of:

Interest income earned from average interest-earning assets and the resultant yields; and Interest expense incurred from average interest-bearing liabilities and resultant costs, expressed as rates.

Table of Contents

The tables below set forth our net interest income, net interest rate spread and net interest rate margin for the periods indicated. The net interest rate margin reflects the relative level of interest-earning assets to interest-bearing liabilities and equals our net interest rate spread divided by average interest-earning assets for the periods indicated.

(1) Average balance includes loans held for sale and nonperforming loans and is net of deferred loan origination fees, unamortized discounts and premiums.

(2) Represents the difference between the yield on interest-earning assets and the cost of interest-bearing liabilities.

(3) Represents net interest income divided by average interest-earning assets.

51

Table of Contents

Changes in our net interest income are a function of changes in volumes, days in a period and rates of interest-earning assets and interest-bearing liabilities. The following table presents the impact the volume, days in a period and rate changes have had on our net interest income for the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, we have provided information on changes to our net interest income with respect to:

Changes in volume (changes in volume multiplied by prior rate);

Changes in days in a period (changes in days in a period multiplied by daily interest);

Changes in interest rates (changes in interest rates multiplied by prior volume); and

The net change or the combined impact of volume, days in a period and rate changes allocated proportionately to changes in volume, days in a period and changes in interest rates.

Provision for Loan Losses

A provision for loan losses was recorded for the second quarter of 2017 in the amount of \$1.9 million, compared with a provision for loan losses of \$2.5 million in the quarter ended March 31, 2017. Net loan recoveries were \$76,000 for the recent quarter of 2017, compared with net loan charge-offs of \$723,000 for the quarter ended March 31, 2017. Lower credit losses as evidenced by net loan recoveries of \$76,000 contributed to the decrease in our provision for loan losses.

The \$1.9 million provision for loan losses during the second quarter of 2017 increased by \$315,000 from the second quarter of 2016. Net loan recoveries were \$76,000 for the recent quarter of 2017, compared with net loan charge-offs of \$1.1 million from the second quarter of 2016.

For the first six months of 2017, we recorded a \$4.4 million provision for loan losses, an increase from \$2.7 million recorded for the first six months of 2016. The increase in the provision for loan losses was primarily due to loan growth. Net loan charge-offs amounted to \$647,000 for the first six months of 2017, a decrease from \$1.1 million for the first six months of 2016.

For purchased credit impaired loans, charge-offs are recorded when there is a decrease in the estimated cash flows of the credit from original cash flow estimates. Purchased credit impaired loans were recorded at their estimated fair value, which incorporated our estimated expected cash flows until the ultimate resolution of these credits. To the extent actual or projected cash flows are less than originally estimated, additional provisions for loan losses or charge-offs will be recognized into earnings or against the allowance, if applicable. To the extent actual or projected cash flows are more than originally estimated, the increase in cash flows is prospectively recognized in loan interest income. Due to the accounting rules associated with our purchased credit impaired loans, each quarter we are required to re-estimate cash flows which could cause volatility in our reported net interest margin and provision for loan losses. During the second quarter of 2017, no additional allowance was recorded associated with certain purchased credit impaired loans. See "Allowance for Loan Losses" discussed below in this Quarterly Report on Form 10-Q.

Noninterest Income

Noninterest income for the second quarter of 2017 was \$8.8 million, an increase of \$4.1 million, or 87%, from the first quarter of 2017. The increase from the first quarter of 2017 was primarily related to a \$2.1 million increase in net gain from the sale of \$213 million of investment securities, a \$799,000 increase in deposit fees and a \$1.1 million increase in other income all related to the HEOP acquisition. During the recent quarter of 2017, the Bank sold \$29.6 million of Small Business Administration ("SBA") loans for a gain of \$2.9 million, compared with \$30.4 million of SBA loans sold and a gain of \$2.6 million in the quarter ended March 31, 2017.

Noninterest income for the second quarter of 2017 increased \$4.3 million, or 97%, compared to the second quarter of 2016. The increase from the second quarter of 2016 was primarily related to a \$1.6 million increase in net gain from the sale of investment securities, a \$829,000 increase in deposit fees, a \$763,000 increase in net gain from sales of loans and a \$1.2 million increase in other income.

For the first six months of 2017, noninterest income totaled \$13.4 million, an increase from \$9.3 million for the first six months of 2016. The increase was primarily related to higher net gain from sale of loans of \$1.7 million and higher net gain from sales of investment securities of \$808,000. In addition, higher deposit fees of \$848,000 were received, primarily as a result of the HEOP acquisition in the second quarter of 2017.

Noninterest Expense

Noninterest expense totaled \$48.5 million for the second quarter of 2017, an increase of \$18.7 million, or 63%, compared with the first quarter of 2017. The increase was primarily driven by merger-related expenses of \$10.1 million for the HEOP acquisition in the second quarter of 2017 compared with \$4.9 million for the first quarter of 2017. In addition, the Company had higher compensation and benefits expenses during the first quarter of 2017 of \$6.7 million.

In comparison to the second quarter of 2016, noninterest expense grew by \$24.8 million, or 105%. The \$24.8 million increase in noninterest expense includes a \$9.6 million increase in merger-related expenses and a \$8.5 million increase in compensation and benefits expenses associated with both the acquisition of HEOP and an increase in staffing to support organic growth.

Noninterest expense totaled \$78.2 million for the first six months of 2017, an increase of \$30.9 million, or 65%, compared with the first six months of 2016. The increase was primarily driven by merger-related expenses of \$15.1 million for the HEOP acquisition in the first six months of 2017 compared with \$3.6 million for the first six months of 2016 for the SCAF acquisition. In addition, the Company had higher compensation and benefits expenses during the first six months of 2017 of \$11.7 million.

The Company's efficiency ratio was 52.3% for the second quarter of 2017, compared to 52.3% for the first quarter of 2017 and 54.4% for the second quarter of 2016. The Company's efficiency ratio was 52.3% for the first six months of 2017, compared to 53.6% for the first six months of 2016.

Income Taxes

For the three months ended June 30, 2017, March 31, 2017 and June 30, 2016, income tax expense was \$7.5 million, \$4.6 million and \$6.4 million, respectively, and the effective income tax rate was 34.7%, 32.7% and 38.0%, respectively. The decrease in the effective tax rate in 2017 as compared to 2017 was primarily the result of the adoption of ASU 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Accounting, which went into effect for the Company on January 1, 2017. As a result of the adoption of ASU 2016-09, the Company began recognizing the tax effects of exercised or vested awards as discrete items in the reporting period in which they occur, resulting in a \$1.6 million tax benefit to the Company for the six months ended June 30, 2017.

The Company did not have unrecognized tax benefits that related to uncertainties associated with federal and state income tax matters as of June 30, 2017 and December 31, 2016.

The Company and its subsidiaries are subject to U.S. federal income tax, as well as state income and franchise taxes in multiple state jurisdictions. The statute of limitations related to the consolidated federal income tax returns is closed for all tax years up to and including 2012. The expiration of the statute of limitations related to the various state income and franchise tax returns varies by state.

The Company accounts for income taxes by recognizing deferred tax assets and liabilities based upon temporary differences between the amounts for financial reporting purposes and tax basis of its assets and liabilities. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion, or all, of the deferred tax asset will not be realized. In assessing the realization of deferred tax assets, management evaluates both positive and negative evidence, including the existence of any cumulative losses in the current year and the prior two years, the amount of taxes paid in available carry-back years, the forecasts of future income, applicable tax planning strategies, and assessments of current and future economic and business conditions. This analysis is updated quarterly and adjusted as necessary. Based on this analysis, Management has determined that

a valuation allowance for deferred tax assets was not required as of June 30, 2017.

FINANCIAL CONDITION

At June 30, 2017, assets totaled \$6.4 billion, an increase of \$2.4 billion, or 60%, from December 31, 2016. The increase from the prior quarter was primarily due to the acquisition of HEOP, which after purchase accounting adjustments, added \$1.4 billion in gross loans and \$443 million in investment securities, of which \$213 million were sold subsequent to the acquisition, and goodwill of \$268 million was recognized in the acquisition.

Loans

Loans held for investment totaled \$4.9 billion at June 30, 2017, an increase of \$1.5 billion, or 44%, from December 31, 2016. The increase from December 31, 2016 was primarily due to the acquisition of HEOP, which after purchase accounting adjustments, added \$1.4 billion in gross loans and organic loan commitments of \$947 million during the first six months of 2017.

The total end-of-period weighted average contractual interest rate on loans, excluding fees and discounts, at June 30, 2017 was 4.79%, compared to 4.81% at December 31, 2016.

The following table sets forth the composition of our loan portfolio in dollar amounts, as a percentage of the portfolio and gives the weighted average interest rate by loan category at the dates indicated:

(3) Total gross loans for June 30, 2017 are net of the unaccreted fair value purchase discounts of \$25.2 million.

Delinquent Loans. When a borrower fails to make required payments on a loan and does not cure the delinquency within 30 days, we normally record a notice of default and, after providing the required notices to the borrower, commence foreclosure proceedings. If the loan is not reinstated within the time permitted by law, we may sell the property at a foreclosure sale. At these foreclosure sales, we generally acquire title to the property. At June 30, 2017 and December 31, 2016, loans delinquent 30 or more days as a percentage of total gross loans was 0.06%, compared to 0.03% at December 31, 2016.

The following table sets forth delinquencies in the Company's loan portfolio at the dates indicated:

Allowance for Loan Losses. The ALLL represents an estimate of probable incurred losses inherent in our loan portfolio and is based on our continual review of credit quality of the loan portfolio. The allowance contains a specific reserve component for loans that are determined to be impaired and a general reserve component for loans without credit impairment. The general reserve is determined by applying a systematically derived loss factor to individual segments of the loan portfolio. The adequacy and appropriateness of the ALLL and the individual loss factors are reviewed each quarter by management.

58

Table of Contents

The loss factor for each segment of our loan portfolio is generally based on our actual historical loss rate experience supplemented by industry data where we lack loss history experience. The loss factor is adjusted by qualitative adjustment factors to arrive at a final loss factor for each loan portfolio segment. For additional information regarding the qualitative adjustments, please see "Allowances for Loan Losses" as discussed in our 2016 Annual Report. The qualitative factors allow management to assess current trends within our loan portfolio and the economic environment to incorporate their effect when calculating the ALLL. The final loss factors are applied to pass graded loans within our loan portfolio. Higher factors are applied to loans graded below pass, including classified and criticized assets.

No assurance can be given that we will not, in any particular period, sustain loan losses that exceed the amount reserved, or that subsequent evaluation of our loan portfolio, in light of the prevailing factors, including economic conditions which may adversely affect our market area or other circumstances, will not require significant increases in the loan loss allowance. In addition, regulatory agencies, as an integral part of their examination process, periodically review our ALLL and may require us to recognize additional provisions to increase the allowance or take charge-offs in anticipation of future losses.

At June 30, 2017, our ALLL was \$25.1 million, an increase of \$3.8 million from December 31, 2016. The increase in the allowance for loan losses at June 30, 2017 was mainly attributable to loan growth in the loan portfolio and, to a lesser extent, net loan charge-offs of \$723,000. At June 30, 2017, given the composition of our loan portfolio, as well as the unamortized fair value discount of loans acquired, the ALLL was considered adequate to cover probable incurred losses inherent in the loan portfolio. Should any of the factors considered by management in evaluating the appropriate level of the ALLL change, the Company's estimate of probable incurred losses could also change, which could affect the level of future provisions for loan losses.

The following table sets forth the Company's ALLL and its corresponding percentage of the loan category balance and the percent of loan balance to total gross loans in each of the loan categories listed for the periods indicated:

Investment Securities

We primarily use our investment portfolio for liquidity purposes and to support our interest rate risk management strategies. Investment securities available-for-sale totaled \$703 million at June 30, 2017, an increase of \$322 million, or 85%, from December 31, 2016. The increase in investment securities from December 31, 2016 was primarily the result of the acquisition of HEOP, which at acquisition added \$445 million of securities, before purchase accounting adjustments, and purchases of \$121 million, partially offset by approximately \$213

million in sales of securities resulting in a gain of \$2.1 million.

The following tables set forth the amortized cost, unrealized gains and losses, and estimated fair value of our investment securities portfolio at the dates indicated:

Each quarter, we review individual securities classified as available-for-sale to determine whether a decline in fair value below the amortized cost basis is other-than-temporary. If it is probable that we will be unable to collect all amounts due according to the contractual terms of the debt security, an OTTI write-down is recorded against the security and a loss recognized.

In determining if a security has an OTTI loss, we consider the 1) length of time and the extent to which the fair value has been less then amortized cost; 2) financial condition and near term prospects of the issuer; 3) impact of changes in market interest rates; and 4) intent and ability of the Company to retain its investment for a period of time sufficient to allow any anticipated recovery in fair value and whether it is not more likely than not the Company would be required to sell the security. We estimate OTTI losses on a security primarily through:

An evaluation of the present value of estimated cash flows from the security using the current yield to accrete beneficial interest and including assumptions in the prepayment rate, default rate, delinquencies, loss severity and percentage of nonperforming assets;

An evaluation of the estimated payback period to recover principal;

An analysis of the credit support available in the underlying security to absorb losses; and

A review of the financial condition and near term prospects of the issuer.

Table of Contents

The Company realized no OTTI recovery for the quarter ended June 30, 2017, December 31, 2016 and June 30, 2016. The Company realized OTTI recovery of \$1,000 for the quarter ended March 31, 2017. We recorded no impairment credit losses on available-for-sale securities in our consolidated statement of operations for the three months ended June 30, 2017, December 31, 2016 and June 30, 2016. A \$207,000 OTTI was taken during the quarter ended March 31, 2016, related to a CRA investment purchased in June of 2014 with a par value of \$50, and a book value of \$500,000.

Nonperforming Assets

Nonperforming assets consist of loans on which we have ceased accruing interest (nonaccrual loans), restructured loans and OREO. It is our general policy to account for a loan as nonaccrual when the loan becomes 90 days delinquent or when collection of interest appears doubtful.

Nonperforming assets totaled \$767,000, or 0.01% of total assets at June 30, 2017, a decrease from \$1.6 million, or 0.04% of total assets at December 31, 2016. At June 30, 2017, nonperforming loans totaled \$395,000, or 0.01% of loans held for investment, a decrease from \$1.1 million, or 0.04% of loans held for investment at December 31, 2016. Other real estate owned decreased to \$372,000.

The following table sets forth our composition of nonperforming assets at the dates indicated:

	June 30,	December
	2017	31, 2016
	(dollars in	thousands)
Nonperforming assets		
Business loans:		
Commercial and industrial	\$—	\$250
Commercial owner occupied	206	436
SBA	73	316
Real estate:		
One-to-four family	104	124
Land	12	15
Total nonperforming loans	395	1,141
Other real estate owned	372	460
Total nonperforming assets	\$767	\$1,601
	* * *	\$21.2 00
Allowance for loan losses	\$25,055	\$21,296
Allowance for loan losses as a percent of total nonperforming loans	6,343 %	1,866 %
Nonperforming loans as a percent of loans held for investment	0.01	0.04
Nonperforming assets as a percent of total assets	0.01	0.04

Liabilities and Stockholders' Equity

Total liabilities were \$5.48 billion at June 30, 2017, compared to \$3.58 billion at December 31, 2016. The increase of \$1.9 billion, or 53%, from December 31, 2016 was primarily related to a \$1.8 billion, or 57%, increase to deposits from December 31, 2016.

Deposits. At June 30, 2017, deposits totaled \$4.9 billion, an increase of \$1.8 billion, or 57%, from December 31, 2016, primarily as a result of the acquisition of HEOP. Non-maturity deposits totaled \$4.1 billion, 84% of total deposits, an increase of \$1.6 billion, or 61% from December 31, 2016, highlighted by an increase in money market and savings accounts of \$804 million, noninterest-bearing checking of \$624 million and demand deposit of \$141

million. Time deposits increased \$232 million, or 40% from December 31, 2016, which included

an increase of \$34.6 million and \$197 million to wholesale/brokered certificate of deposits and retail certificate of deposits, respectively.

The total end of period weighted average rate of deposits at June 30, 2017 was 0.28%, a decrease from 0.32% December 31, 2016.

Our ratio of loans held for investment to deposits was 98.2% and 103.1% at June 30, 2017 and December 31, 2016, respectively.

The following table sets forth the distribution of the Company's deposit accounts at the dates indicated and the weighted average interest rates on each category of deposits presented:
