ING Prime Rate Trust

PORTFOLIO MANAGERS' REPORT

Dear Shareholders:

ING Prime Rate Trust (the "Trust") is a diversified, closed-end investment company that seeks to provide investors with as high a level of current income as is consistent with the preservation of capital. The Trust seeks to achieve this objective by investing in a professionally managed portfolio comprised primarily of senior loans.

PERFORMANCE SUMMARY

The Trust declared \$0.10 of common dividends during the third fiscal quarter

## Edgar Filing: ING PRIME RATE TRUST - Form N-30B-2

ended November 30, 2003, which, based on the average month-end net asset value ("NAV") per share of \$7.18, resulted in an annualized distribution rate of 5.83%(1). Total return (based on NAV) for the quarter was 4.65%, versus a gross total return of 2.53% for the S&P/LSTA Loan Index, while total return for the nine months ended November 30, 2003 was 12.52% compared to 7.46% for the S&P/LSTA Loan Index. During the nine-month period ended November 30, 2003, total return based on the market value of the Trust's common shares (assuming full dividend reinvestment) was 21.11%.

The non-investment grade loan market remained strong during the quarter, again taking its cue from robust conditions in several other key credit markets. A confluence of positive developments, including a now visibly strengthening U.S. economy, healthier corporate earnings, and a further decline in non-investment grade default rates, resulted in the continuation of a strong technical rally in loan prices, thereby propelling 2003 returns to unprecedented levels. The S&P/LSTA Loan Index posted a total return of 9.78% for the full calendar year, up from 2.16% in 2002, and approximately 8.5% in excess of the average three-month London inter-bank offering rate (LIBOR) during the same period.

Broadly speaking, during the quarter, loan values improved across virtually all industry sectors held by the Trust. The primary catalyst behind the Trust's favorable results for the quarter, however, was again an overweight of the cable and wireless sectors. Cable (at 10.1% of total assets as of quarter-end, the leading sector exposure) has clearly ridden the coattails of Charter Communications (the second largest individual position at 3.3% of total assets at quarter-end). Charter, the leading contributor to index returns during 2003, is now bid at near-par levels, due to improved operating visibility and liquidity, and further independent market validation of the underlying value of the company's cable assets. Similarly, all of the Trust's wireless names (at 9.6% of total assets, the second largest sector concentration at quarter-end) improved further during the quarter. Notably, while it remains the Trust's largest single holding (4.7% of total assets at quarter-end), we reduced slightly our aggregate exposure to Nextel Communications as the company refinanced its sizeable institutional term loan during the period. Also favorably impacting performance during the quarter was a continued decline in the number of existing non-performing assets.

Always a key component of our ongoing strategy, we remain focused on maintaining an appropriate level of diversification across both industry sector and issuer lines. During the quarter, the Trust's average amount outstanding per loan declined slightly (to 0.28% of total loan assets, from 0.30% at August 30, 2003), while the number of individual loan positions increased to 355 from 330. We continue to believe that adequate diversification represents the best line of defense against systemic credit risk.

### USE OF LEVERAGE

The Trust utilizes financial leverage to seek to increase the yield to the holders of common shares. As of November 30, 2003, the Trust had \$655 million of leverage, consisting of \$450 million of "Aaa(2)/AAA(3)" rated cumulative auction rate preferred shares, and \$205 million outstanding

### PORTFOLIO MANAGERS' REPORT (Continued)

under \$415 million in available credit facilities. Total leverage, as a percentage of total assets (including preferred shares), was 39.49% at quarter end. The weighted average leverage cost including all borrowings and preferred

## Edgar Filing: ING PRIME RATE TRUST - Form N-30B-2

shares as of quarter end was 1.40%. The use of leverage for investment purposes increases both investment opportunity and investment risk, and we continue to deploy leverage only when it is in the best interest of the Trust's common shareholders.

### OUTLOOK

The year 2003 was a pivotal year in the leveraged loan market. One look at annual total return statistics and trailing default rates clearly reveals the market's recovery from its lows of 2002. It also sets the stage for more modest expectations going forward. As we enter 2004, due primarily to excess demand for floating rate secured assets, most seasoned loans remain well bid, many without offer. Assuming no external event or events, we expect little change over the very near-term. As such, we continue to expect further spread tightening, albeit at a somewhat slower pace than in the latter portion of 2003. We also continue to be on watch for structural compromise (e.g.; higher leverage multiples, second lien secured paper) and will, if necessary, sacrifice yield in an attempt to maintain credit discipline. As stated previously, the most significant uncertainty at this point surrounds the timing of a rise in short-term rates. Clearly, an upward move would prove a positive for the performance of adjustable rate senior loans. As we monitor these developments, we will continue to adhere to a disciplined investment strategy that seeks to maintain a high degree of diversification while attempting to take advantage of selective market opportunities.

We thank you for your investment in ING Prime Rate Trust.

### PORTFOLIO MANAGERS' REPORT (Continued)

1. The distribution rate is calculated by annualizing dividends declared during the quarter and dividing the resulting annualized dividend by the Trust's average month-end net asset value (In the case of NAV) or the average month-end NYSE Composite closing price (in the case of Market). The distribution rate is based solely on the actual dividends and distributions, which are made at the discretion of management. The distribution rate may or may not include all investment income and ordinarily will not include capital gains or losses, if any.
2. Obligations rated Aaa by Moody's are judged to be of the highest quality, with minimal credit risk.
3. An obligator rated 'AAA' has extremely strong capacity to meet its financial commitments. 'AAA' is the highest Issuer Credit Rating assigned by Standard & Poor's.

### INDEX DESCRIPTIONS

The S&P 500 INDEX is a capitalization-weighted index of 500 stocks chosen for market size, liquidity, and industry group representation.

The S&P/LSTA LEVERAGED LOAN INDEX ("LLI") is a total return index that captures accrued interest, repayments, and market value changes. It represents a broad cross section of leveraged loans syndicated in the United States, including dollar-denominated loans to overseas issuers. Standard & Poor's and the Loan Syndications & Trading Association ("LSTA") conceived the LLI to establish a performance benchmark for the syndicated leveraged loan industry.

ALL INDICES ARE UNMANAGED. AN INVESTOR CANNOT INVEST DIRECTLY IN AN INDEX.

#### STATISTICS AND PERFORMANCE FOOTNOTES

- (A) Yield is calculated by dividing the Trust's net investment income per share for the most recent thirty days by the net asset value (in the case of NAV) or the NYSE Composite closing price (in the case of market) at quarter-end. Yield calculations do not include any commissions or sales charges, and are compounded for six months and annualized for a twelve-month period to derive the Trust's yield consistent with the SEC standardized yield formula for open-end investment companies.
- (B) The distribution rate is calculated by annualizing each monthly dividend, then averaging the annualized dividends declared for each month during the quarter and dividing the resulting average annualized dividend amount by the Trust's average net asset value (in the case of NAV) or the NYSE Composite closing price (in the case of Market) at the end of the period.
- (C) Calculation of total return assumes a hypothetical initial investment at the net asset value (in the case of NAV) or the NYSE Composite closing price (in the case of Market) on the last business day before the first day of the stated period, with all dividends and distributions reinvested at the actual reinvestment price.
- (D) On December 27, 1994, the Trust issued to its shareholders transferable rights which entitled the holders to subscribe for 17,958,766 shares of the Trust's common stock at the rate of one share of common stock for each four rights held. On January 27, 1995, the offering expired and was fully subscribed. The Trust issued 17,958,766 shares of its common stock to exercising rights holders at a subscription price of \$8.12. Offering costs of \$4,470,955 were charged against the offering proceeds.
- (E) On October 18, 1996, the Trust issued to its shareholders non-transferable rights which entitled the holders to subscribe for 18,122,963 shares of the Trust's common stock at the rate of one share of common stock for each five rights held. On November 12, 1996, the offering expired and was fully subscribed. The Trust issued 18,122,963 shares of its common stock to exercising rights holders at a subscription price of \$9.09. Offering costs of \$6,972,203 were charged against the offering proceeds.
- (F) Inception Date -- May 12, 1988. Since inception return is not applicable since the Trust did not trade on the NYSE prior to March 9, 1992.

ADDITIONAL NOTES AND INFORMATION

SHAREHOLDER INVESTMENT PROGRAM

The Trust offers a Shareholder Investment Program (the "Program," formerly known as the Dividend Reinvestment and Cash Purchase Plan) which allows holders of the Trust's common shares a simple way to reinvest dividends and capital gains distributions, if any, in additional common shares of the Trust. The Program also offers holders of the Trust's common shares the ability to make optional cash investments in any amount from \$100 to \$25,000 on a monthly basis. Amounts in excess of \$25,000 require prior approval of the Trust. DST Systems, Inc., the Trust's Transfer Agent, is the administrator for the Program.

For dividend reinvestment purposes, DST Systems, Inc. will purchase shares of the Trust on the open market when the market price plus estimated commissions is less than the net asset value on the valuation date. The Trust may issue new shares when the market price plus estimated commissions is equal to or exceeds the net asset value on the valuation date. New shares may be issued at the greater of (i) net asset value or (ii) the market price of the shares during the pricing period, minus a discount of 5%.

For optional cash investments, shares will be purchased on the open market by the DST Systems, Inc. when the market price plus estimated commissions is less than the net asset value on the valuation date. New shares may be issued by the Trust when the market price plus estimated commissions is equal to or exceeds the net asset value on the valuation date.

There is no charge to participate in the Program. Participants may elect to discontinue participation in the Program at any time. Participants will share, on a pro-rata basis, in the fees or expenses of any shares acquired in the open market.

Participation in the Program is not automatic. If you would like to receive more information about the Program or if you desire to participate, please contact your broker or our Shareholder Services Department at (800) 992-0180.

- (1) Total investment return calculations are attributable to common shareholders.
- (2) Total investment return measures the change in the market value of your investment assuming reinvestment of dividends and capital gain distributions, if any, in accordance with the provisions of the dividend reinvestment plan.
- (3) Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of each period and a sale at net asset value at the end of each period and assumes reinvestment of dividends and capital gain distributions in accordance with the provisions

### ING Prime Rate Trust

NOTES TO FINANCIAL STATEMENTS as of November 30, 2003 (Unaudited)

#### NOTE 1 -- SIGNIFICANT ACCOUNTING POLICIES

ING Prime Rate Trust (the "Trust"), a Massachusetts business trust, is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified, closed-end, investment management company. The Trust invests in senior loans which are exempt from registration under the Securities Act of 1933 as amended (the "33 Act"), but contain certain restrictions on resale and cannot be sold publicly. These loans bear interest (unless otherwise noted) at rates that float periodically at a margin above the Prime Rate of a U.S. bank specified in the credit agreement, the London Inter-Bank Offered Rate ("LIBOR"), the certificate of deposit rate, or in some cases another base lending rate. The following is a summary of the significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America.

- A. SENIOR LOAN AND OTHER SECURITY VALUATION. Loans are normally valued at the mean of the means of one or more bid and asked quotations obtained from a pricing service or other sources determined by the Board of Trustees to be independent and believed to be reliable. Loans for which reliable market value quotations are not readily available may be valued with reference to another loan or a group of loans for which quotations are more readily available and whose characteristics are comparable to the loan being valued. Under this approach, the comparable loan or loans serve as a proxy for changes in value of the loan being valued. The Trust has engaged an independent pricing service to provide quotations from dealers in loans and to calculate values under the proxy procedure described above. As of November 30, 2003, 94.87% of total investments were valued based on these procedures. It is expected that most of the loans held by the Trust will be valued with reference to quotations from the independent pricing service or with reference to the proxy procedure described above.

Prices from a pricing source may not be available for all loans and ING Investments, LLC (the "Investment Manager") or Aeltus Investment Management, Inc. ("ING Aeltus" the "Sub-Advisor"), may believe that the price for a loan derived from market quotations or the proxy procedure described above is not reliable or accurate. Among other reasons, this may

## Edgar Filing: ING PRIME RATE TRUST - Form N-30B-2

be the result of information about a particular loan or borrower known to the Investment Manager that the Investment Manager believes may not be known to the pricing service or reflected in a price quote. In this event, the loan is valued at fair value as determined in good faith under procedures established by the Trust's Board of Trustees and in accordance with the provisions of the 1940 Act. Under these procedures, fair value is determined by the Investment Manager and monitored by the Trust's Board of Trustees through its Valuation Committee. In fair valuing a loan, consideration is given to several factors, which may include, among others, the following: (i) the characteristics of and fundamental analytical data relating to the loan, including the cost, size, current interest rate, period until the next interest rate reset, maturity and base lending rate of the loan, the terms and conditions of the loan and any related agreements, and the position of the loan in the borrower's debt structure; (ii) the nature, adequacy and value of the collateral, including the Trust's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the borrower and the cash flow coverage of outstanding principal and interest, based on an evaluation of its financial condition, financial statements and information about the borrower's business, cash flows, capital structure and future prospects; (iv) information relating to the market for the loan, including price quotations for, and trading in, the loan and interests in similar loans; (v) the reputation and financial condition of the agent for the loan and any intermediate participants in the loan; (vi) the borrower's management; and (vii) the general economic and market conditions affecting the fair value of the loan. Securities for which the primary market is a national securities exchange are valued at the last reported sale price. Securities reported by NASDAQ will be valued at NASDAQ official closing price. Debt and equity securities traded in the over-the-counter market

14

### ING Prime Rate Trust

#### NOTES TO FINANCIAL STATEMENTS as of November 30, 2003 (Unaudited) (Continued)

and listed securities for which no sale was reported on that date are valued at the mean between the last reported bid and asked price. Securities other than senior loans for which reliable quotations are not readily available and all other assets will be valued at their respective fair values as determined in good faith by, or under procedures established by, the Board of Trustees of the Trust. Investments in securities maturing in less than 60 days from the date of acquisition are valued at amortized cost.

- B. FEDERAL INCOME TAXES. It is the Trust's policy to comply with the requirements of the Internal Revenue Code applicable to "regulated investment companies" and to distribute all of its taxable income to its shareholders. Therefore, no provision for Federal income taxes is required. In addition, by distributing during each calendar year substantially all of its net investment income and net realized capital gains (if any), the Trust intends not to be subject to any federal excise tax.
- C. SECURITY TRANSACTIONS AND REVENUE RECOGNITION. Loans are booked on a settlement date basis and security transactions are accounted for on trade date (date the order to buy or sell is executed). Realized gains or losses are reported on the basis of identified cost of securities delivered. Dividend income is recognized on the ex-dividend date. Interest income is recorded on an accrual basis at the then-current interest rate of the loan. The accrual of interest on loans is discontinued when, in the opinion of management, there is an indication that the borrower may be unable to meet

## Edgar Filing: ING PRIME RATE TRUST - Form N-30B-2

payments as they become due. Upon such discontinuance, all unpaid accrued interest is reversed. Cash collections on nonaccrual senior loans are generally applied as a reduction to the recorded investment of the loan. Senior loans are returned to accrual status only after all past due amounts have been received. For all loans acquired prior to March 1, 2001, arrangement fees, which represent non-refundable fees associated with the acquisition of loans are deferred and recognized over the shorter of 2.5 years or the actual terms of the loan. For all loans, except revolving credit facilities, acquired subsequent to February 28, 2001, fees are treated as discounts and accreted as described in Note 1.H. Fees associated with revolving credit facilities acquired subsequent to February 28, 2001 are deferred and recognized over the shorter of four years or the actual term of the loan.

- D. DISTRIBUTIONS TO COMMON SHAREHOLDERS. The Trust records distributions to its shareholders on the ex-dividend date. Distributions from income are declared by the Trust on a monthly basis. Distributions from capital gains, if any, are declared on an annual basis.
- E. DIVIDEND REINVESTMENTS. Pursuant to the Shareholder Investment Program (formerly known as the Automatic Dividend Reinvestment Plan), DST Systems, Inc., the Plan Agent, purchases, from time to time, shares of beneficial interest of the Trust on the open market to satisfy dividend reinvestments. Such shares are purchased only when the closing sale or bid price plus commission is less than the net asset value per share of the stock on the valuation date. If the market price plus commissions is equal to or exceeds the net asset value, new shares are issued at the greater of (i) net asset value or (ii) the market price of the shares during the pricing period, minus a discount of 5%.
- F. USE OF ESTIMATES. Management of the Trust has made certain estimates and assumptions relating to the reporting of assets, liabilities, revenues, expenses and contingencies to prepare these financial statements in conformity with generally accepted accounting principles in the United States of America. Actual results could differ from these estimates.
- G. SHARE OFFERINGS. During the year ended February 28, 1999, the Trust began issuing shares under various shelf registration statements, whereby the net proceeds received by the Trust from share sales may not be less than the greater of (i) the NAV per share or (ii) 94% of the average daily market price over the relevant pricing period.

15

NOTES TO FINANCIAL STATEMENTS as of November 30, 2003 (Unaudited) (Continued)

- H. CHANGE IN ACCOUNTING PRINCIPLE. In November 2000 the American Institute of Certified Public Accountants (the "AICPA") issued a revised version of the AICPA Audit and Accounting Guide for Investment Companies (the "Guide"). Effective March 1, 2001, the Fund adopted the provisions of the Guide and began amortizing premiums and accreting discounts on debt securities. Prior to March 1, 2001, the Trust had not amortized premiums nor accreted discounts. The cumulative effect of this accounting change had no impact on net assets of the Trust, but resulted in a \$3,653,000 increase in the cost of securities and a corresponding \$3,653,000 increase in net unrealized depreciation of investments, based on securities held by the Trust on March 1, 2001.

NOTE 2 -- INVESTMENTS

## Edgar Filing: ING PRIME RATE TRUST - Form N-30B-2

For the nine months ended November 30, 2003, the cost of purchases and the proceeds from principal repayment and sales of investments, excluding short-term notes, totaled \$981,891,893 and \$954,048,503, respectively. At November 30, 2003, the Trust held senior loans valued at \$1,580,741,268 representing 96.6% of its total investments. The market value of these assets is established as set forth in Note 1.

The senior loans acquired by the Trust may take the form of a direct lending relationship with the borrower, an assignment of a lender's interest in a loan. The lead lender in a typical corporate loan syndicate administers the loan and monitors collateral. In the event that the lead lender becomes insolvent, enters FDIC receivership or, if not FDIC insured, enters into bankruptcy, the Trust may incur certain costs and delays in realizing payment, or may suffer a loss of principal and/or interest.

Common and preferred shares, and stock purchase warrants held in the portfolio were acquired in conjunction with senior loans held by the Trust. Certain of these stocks and warrants are restricted and may not be publicly sold without registration under the '33 Act, or without an exemption under the '33 Act. In some cases, these restrictions expire after a designated period of time after issuance of the shares or warrant.

The Fund values portfolio securities by using the market value of the securities when reliable market value quotations for the securities are readily available. When reliable market value quotations are not readily available, the Fund determines, in good faith, the fair value of the

NOTES TO FINANCIAL STATEMENTS as of November 30, 2003 (Unaudited) (Continued)

#### NOTE 3 -- MANAGEMENT AND ADMINISTRATION AGREEMENTS

The Trust has entered into an Investment Management Agreement with the Investment Manager, a wholly-owned subsidiary of ING Funds Services, LLC (the "Administrator"), to provide advisory and management services. The Investment Management Agreement compensates the Investment Manager with a fee, computed daily and payable monthly, at an annual rate of 0.80% of the Trust's average daily net assets (inclusive of preferred stock) plus borrowings ("Managed Assets").

The Investment Manager entered into a subadvisory agreement with ING Aeltus, a wholly owned subsidiary of ING Groep N.V. effective August 19, 2003. Subject to such policies as the Board or the Investment Manager may determine, ING Aeltus manages the Trust's assets in accordance with the Trust's investment objectives, policies, and limitations.

The Trust has also entered into an Administration Agreement with the Administrator to provide administrative services and also to furnish facilities. The Administrator is compensated with a fee, computed daily and payable monthly,

## Edgar Filing: ING PRIME RATE TRUST - Form N-30B-2

at an annual rate of 0.25% of the Trust's average daily Managed Assets.

At November 30, 2003, the Trust had the following amounts recorded in payable to affiliates on the accompanying Statement of Assets and Liabilities:

ACCRUED INVESTMENT MANAGEMENT FEES	ACCRUED ADMINISTRATIVE FEES	TOTAL
\$ 1,087,756	\$ 339,924	\$ 1,427,680

The Trust has adopted a Retirement Policy covering all independent trustees of the Trust who will have served as a independent trustee for at least five years at the time of retirement. Benefits under this plan are based on an annual rate as defined in the plan agreement.

#### NOTE 4 -- COMMITMENTS

The Trust has entered into both a \$90 million 364-day revolving credit agreement which matures on August 25, 2004 and a \$325 million 364-day revolving securitization facility which matures on June 12, 2004, collateralized by assets of the Trust. Borrowing rates under these agreements are based on a fixed spread over LIBOR, the federal funds rate, or a commercial paper-based rate. Prepaid arrangement fees for any unborrowed amounts are amortized over the term of the agreements. The amount of borrowings outstanding at November 30, 2003, was \$205 million, at a weighted average interest rate of 1.61%. The amount of borrowings represented 12.4% of total assets at November 30, 2003. Average borrowings for the period ended November 30, 2003 were \$130,534,545 and the average annualized interest rate was 1.95%.

As of November 30, 2003, the Trust had unfunded loan commitments pursuant to the terms of the following loan agreements:

#### NOTE 5 -- RIGHTS AND OTHER OFFERINGS

As of November 30, 2003, share offerings pursuant to shelf registrations were as follows:

REGISTRATION DATE -----	SHARES REGISTERED -----	SHARES REMAINING -----
6/11/98	15,000,000	--
6/19/98	10,000,000	9,730,800
9/15/98	25,000,000	19,126,437
3/04/99	5,000,000	3,241,645

On November 2, 2000, the Trust issued 3,600 shares each of Series M, Series W and Series F Auction Rate Cumulative Preferred Shares, \$.01 Par Value, \$25,000 liquidation preference, for a total issuance of \$270 million. Also, on November 16, 2000, the Trust issued 3,600 shares of Series T and Series Th Auction Rate Cumulative Preferred Shares, \$.01 Par Value, \$25,000, liquidation preference, for a total issuance of \$180 million. Costs associated with the offering of approximately \$5,438,664 were charged against the proceeds received. The Trust used the net proceeds of the offering to partially pay down the then existing indebtedness. The Trust may reborrow amounts in the future to increase its use of leverage which will be consistent with the limitations imposed by the 1940 Act. Preferred Shares pay dividends based on a rate set at auctions, normally held every 7 days. In most instances dividends are also payable every 7 days, on the first business day following the end of the rate period.

#### NOTE 6 -- CUSTODIAL AGREEMENT

State Street Bank and Trust Company ("SSB") serves as the Trust's custodian and recordkeeper. Custody fees paid to SSB are reduced by earnings credits based on the cash balances held by SSB for the Trust. There were no earnings credits for the period ended November 30, 2003.

#### NOTE 7 -- SUBORDINATED LOANS AND UNSECURED LOANS

The primary risk arising from investing in subordinated loans or in unsecured loans is the potential loss in the event of default by the issuer of the loans. The Trust may acquire a subordinated loan only if, at the time of acquisition, it acquires or holds a Senior Loan from the same borrower. The Trust will

## Edgar Filing: ING PRIME RATE TRUST - Form N-30B-2

acquire unsecured loans only where the Investment Manager believes, at the time of acquisition, that the Trust would have the right to payment upon default that is not subordinate to any other creditor. The Trust may invest up to 5% of its total assets, measured at the time of investment, in subordinated loans and unsecured loans. As of November 30, 2003, the Trust held 0.90% of its total assets in subordinated loans and unsecured loans.

### NOTE 8 -- FEDERAL INCOME TAXES

Dividends paid by the Trust from net investment income and distributions of net realized short-term capital gains (if any) are, for federal income tax purposes, taxable as ordinary income to shareholders. The tax composition of dividends and distributions to common shareholders for nine months ended November 30, 2003 and year ended February 28, 2003 were as follows:

	ORDINARY INCOME	LONG-TERM CAPITAL GAINS	TAX RETURN OF CAPITAL
	-----	-----	-----
November 30, 2003	\$ 42,934,867	\$ --	\$ --
February 28, 2003	61,643,423	--	--

The amount of distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles. These "book/tax" differences are either considered temporary or

19

### ING Prime Rate Trust

#### NOTES TO FINANCIAL STATEMENTS as of November 30, 2003 (Unaudited) (Continued)

permanent in nature. Key differences are the treatment of short-term capital gains, foreign currency transactions, organization costs and other temporary differences. To the extent that these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassifications. To the extent distributions exceed net investment income and/or net realized capital gains for tax purposes, they are reported as distributions of paid-in capital.

### NOTE 9 -- OTHER INFORMATION

As with many financial services companies, ING investments and affiliates of ING investments (collectively, "ING") have received requests for information from various governmental and self-regulatory agencies in connection with investigations related to trading in investment company shares. In each case, full cooperation and responses are being provided. ING is also conducting an internal review of investment company share trading as well as reviewing their policies and procedures in this area.
