UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

Annual report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the year ended December 31, 2013

or

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number: 0-25871

INFORMATICA CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

77-0333710

(I.R.S. Employer
Identification No.)

2100 Seaport Boulevard

Redwood City, California 94063

(Address of principal executive offices and zip code)

(650) 385-5000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Common Stock, par value \$0.001
per share

Name of exchange on which
registered

The NASDAQ Stock Market LLC
(NASDAQ Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act of 1934 (the "Exchange Act"). Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements

Edgar Filing: INFORMATICA CORP - Form 10-K

incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. "

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting stock held by non-affiliates of the Registrant as of June 28, 2013 was approximately \$3,754,238,000 (based on the last reported sale price on June 28, 2013 for the Registrant's common stock, as reported on the NASDAQ Global Select Market).

As of January 31, 2014, there were approximately 109,212,000 shares of the registrant's Common Stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the registrant's 2014 Annual Meeting of Stockholders are incorporated by reference into Part III of this Form 10-K to the extent stated herein. The Proxy Statement will be filed within 120 days of the registrant's fiscal year ended December 31, 2013.

PART I

ITEM 1. BUSINESS

Overview

Informatica Corporation is the leading independent provider of data integration software and services. Organizations around the world rely on Informatica to realize their information potential and drive top business imperatives. We believe data is one of an organization's most strategic assets, and our vision is to empower the data-centric world. We address the growing challenge organizations face with data, including data that is fragmented across and beyond the enterprise and data of varying quality. We have developed, and continue to innovate, solutions for a wide range of enterprises, regardless of which technology platform, application, or database a customer chooses and whether the data resides on-premise or in the cloud. Our solutions enable a wide variety of complex, enterprise-wide data integration initiatives through technologies including data integration, data quality, information lifecycle management, data exchange, and master data management. We have built our platform and products on the Informatica Vibe architecture. Vibe is an embeddable virtual data machine that allows companies to access, aggregate, and manage data regardless of data type, source, volume, compute platform or user. Vibe enables companies to map data once, and deploy anywhere, providing our customers with the agility to avoid costly and time-consuming hand coding, recoding or redevelopment as data technologies evolve.

We are focused on growing across all data initiatives, advancing our technology leadership, and expanding our geographic presence and capabilities across all major regions. We believe we can expand our business by leveraging our success, knowledge, and the strength of our proven products that have helped our customers deploy thousands of large data management implementations.

We are organized and operate in a single segment. See Note 17. Significant Customer Information and Segment Information of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report, which is incorporated herein by reference.

Products

We provide data integration software and services. Our products enable organizations to gain a competitive advantage in the global information economy by empowering them to access, integrate, and trust their information assets. These products comprise a comprehensive, unified, open, and economical data integration platform that enables business and IT executives, architects, and managers to provide trusted, relevant data to the business - when and where it is needed. The Informatica Platform, powered by Vibe virtual data machine, handles most types of data integration and data management projects required to support business goals.

The following products are included in the Informatica Platform:

Data Integration. Our enterprise data integration family of products includes Informatica PowerCenter, Informatica PowerExchange and Informatica Data Integration Hub. We also offer Informatica PowerCenter Express, an entry-level data integration and profiling edition for departments or small to mid-market business, and Informatica Cloud Data Integration solutions.

Informatica PowerCenter integrates data from virtually any business system, in almost any format, and quickly delivers that data throughout the enterprise to improve operational efficiency. Highly scalable and high-performance, PowerCenter serves as the foundation for all data integration projects. PowerCenter is available in a variety of editions. Additionally, many options are available to extend Informatica PowerCenter's core data integration capabilities. Informatica PowerExchange is a family of data access products that enable IT organizations to access mission-critical data and deliver it throughout the enterprise without having to develop custom data access programs. Informatica Data Integration Hub simplifies application-to-application data integration with a publish-and-subscribe model that allows IT organizations to publish once and support one-to-many consuming applications.

Informatica Cloud Data Integration provides easy to use cloud data integration applications and integration platform as a service ("iPaaS") that allow organizations to combine the enterprise-class benefits of the Informatica Platform with the cost and usability advantages of the latest cloud computing applications platforms. We offer Cloud integration

applications, which are purpose-built, multi-tenant cloud services that allow users to integrate data across cloud-based applications, on-premise systems, databases, files and social data sources, as well as Cloud Connectors to connect to a wide variety of on-premise and cloud-based applications, including enterprise applications, databases, flat files, file feeds, and social networking sites.

Data Quality. Informatica Data Quality products deliver pervasive data quality to stakeholders, projects, and data domains, on premise or in the cloud, using a comprehensive and unified platform. Our Data Quality family of products includes a variety of Data Quality editions and AddressDoctor.

Table of Contents

Information Lifecycle Management. Informatica Application Information Lifecycle Management ("ILM") products are designed to help IT organizations to cost-effectively manage every phase of the data lifecycle, by handling data growth, safely retiring legacy systems and applications, optimizing test data management, and protecting sensitive data. Informatica ILM products include Data Archive, Data Subset, Persistent Data Masking, Dynamic Data Masking and ILM Nearline.

Data Exchange. Informatica B2B Data Exchange offers a comprehensive technology infrastructure for multi-enterprise data integration, partner management, and business event monitoring, allowing organizations to aggregate, exchange and share data. Our data exchange products also include Data Transformation for converting structured and unstructured data to and from more broadly consumable data formats to support business-to-business and multi-enterprise transactions, as well as HParser, a data transformation (data handler) environment optimized for Hadoop.

Master Data Management. Informatica Master Data Management ("MDM") products deliver consolidated and reliable business-critical data - also known as master data - to improve business operations. Informatica MDM identifies all business-critical master data as well as the relationships between master data that is stored in different formats and multiple systems across the enterprise. Our MDM family of products includes MDM, Product Information Management ("PIM"), Identity Resolution and Cloud MDM.

Other Solutions. We also provide a variety of other data integration software solutions, including Informatica Complex Event Processing, Informatica Data Replication, Informatica Data Services, Informatica Procurement, Informatica Ultra Messaging and Informatica Vibe Data Stream.

In addition, Informatica Communities, created in 2001, has grown to over 100,000 members in more than 190 countries using our products as a platform on which to build or customize a specific data integration solution. These developers extend Informatica's presence and profile in the broad data integration market and provide a network of knowledge that can be shared to amplify our brand and its influence. Also, the Informatica Marketplace, created in 2010, has grown to approximately 150,000 active data integration users and developers. The Informatica Marketplace provides vendors, partners and individual developers with a central location to buy and sell assets and solutions called blocks. A block can be developed for on-premise or cloud use and may include data models, mappings, mapplets, tools, utilities, packaged services, methodologies, white papers, connectors and other useful resources. Users are able to browse blocks for industry specific solutions or platform use cases. Blocks contributed to the Informatica Marketplace are evaluated for quality and value by us before becoming available.

Services

We offer a comprehensive set of services, including product-related customer support, consulting services, and education services.

We provide technical customer support for Informatica software deployments through support centers in the United States, the United Kingdom, and India, as well as staff in Brazil, Canada, China, Germany, Ireland, Japan, the Netherlands, Spain, and South Korea for both regional installations as well as geographically dispersed projects. Informatica's Global Customer Support offers a well-engineered and comprehensive set of support programs tailored to fit customer needs. Customers and partners can access our 24x7 technical support over the phone using toll-free lines, via email, and online through Informatica's Web portal "<http://mysupport.informatica.com>."

Our consulting services are focused on helping customers to become agile data-driven enterprises, both tactically and strategically. Our services include initial configuration of the Informatica Platform, knowledge transfer to customers and partners, designing and implementing custom data integration solutions, project audit, and performance tuning, and helping customers implement enterprise-wide integration strategies such as integration competency centers or leadership lean integration practices. Our consulting strategy is to provide specialized expertise on our products to enable our customers and partners to successfully implement and sustain business solutions using our integration platform. Our Professional Services consultants use a services methodology called Informatica Velocity to guide the successful implementation of our software. Our services methodology reflects the best practices that Informatica has developed and refined through hundreds of successful projects. We have professional services staff in 19 countries.

Informatica University offers a comprehensive role-based curriculum of product and solution oriented education offerings to enable our worldwide customers and strategic partners to build proficiency in using our products. Informatica University delivers education services in more than 45 countries with over 60 course offerings through instructor led, virtual academy, and onDemand delivery options to make training easy, flexible and cost effective. We have established the Informatica Certified Professional Program for PowerCenter, Informatica Data Quality, Informatica MDM and Informatica ILM, which has created a database of expert professionals with verifiable skills in the design and administration of Informatica-based systems.

Table of Contents

Customers

Our customers represent a wide range of corporations and governmental and educational institutions. Our targeted markets include automotive, energy and utilities, entertainment/media, financial services, healthcare, high technology, insurance, manufacturing, public sector, retail, services, telecommunications, and travel/transportation. Financial services remains our largest vertical industry sector. No single customer accounted for 10% or more of our total revenues in 2013, 2012, or 2011.

Sales, Marketing, and Distribution

We market and sell software and services through both our direct sales force and indirect channel partners. As of December 31, 2013, we employed 1,060 people in our sales and marketing organization worldwide. Over the past several years, we have expanded our presence and capabilities in a number of geographic regions. We currently have a direct sales presence in over 20 countries and an indirect presence, through distributors and partners, in over 80 countries. We market and sell our software and services through our sales operations in North and Latin America (including Brazil, Canada, Mexico, and the United States), Europe, Middle East and Africa (including France, Denmark, Germany, Ireland, Israel, Italy, the Netherlands, Russia, South Africa, Spain, Sweden, Switzerland, United Arab Emirates, and the United Kingdom), and Asia-Pacific (including Australia, China, Hong Kong, India, Japan, South Korea, Singapore, and Taiwan).

Sales and marketing programs are focused on creating awareness of Informatica and its products and services, generating interest among new customers as well as interest in new products within existing customers, documenting compelling customer references, and creating up-sell/cross-sell opportunities for our products. These programs are targeted at chief information officers and other key executives of specific functional areas such as marketing, sales, service, finance, human resources, manufacturing, distribution, and procurement as well as enterprise architects and other key IT professionals focused on data integration. Our marketing personnel engage in a variety of activities, including positioning our software products and services, conducting public relations programs, establishing and maintaining relationships with industry analysts, producing online campaigns, web content, and collateral that describes our products, services, and solutions, and generating qualified sales leads. Additionally, we utilize sales specialists and domain experts to facilitate our sales and marketing efforts and expand our customer opportunities. Our global sales process consists of several phases: lead generation, opportunity qualification, needs assessment, product demonstration, proposal generation, and contract negotiation. Although the typical sales cycle requires three to six months, some sales cycles have lasted substantially longer. In a number of instances, our relationships with systems integrators and other strategic partners have reduced sales cycles by generating qualified sales leads, making initial customer contacts, assessing needs prior to our introduction to the customers, and endorsing our products to the customers before their product selection. Also, partners have assisted in the creation of presentations and demonstrations, which we believe enhances our overall value proposition and competitive position.

In addition to our direct sales efforts, we distribute our products through systems integrators, resellers, distributors, and OEM partners in the United States and internationally. Systems integrators typically have expertise in vertical or functional markets. In some cases, they resell our products, bundling them with their broader service offerings. In other cases, they refer sales opportunities to our direct sales force for our products. Distributors sublicense our products and provide service and support within their territories. OEMs embed portions of our technology in their product offerings.

Partners

We maintain relationships with a variety of strategic partners to jointly develop, market, sell, recommend, and/or implement our solutions. We also have relationships with distributors and channel partners who resell and sublicense in various regions and industries, including the United States, Canada, Europe, Middle East, Africa, Asia-Pacific, and Latin America, and provide services and support within their territories.

Informatica's partners include industry leaders in enterprise software, computer hardware, and systems integration. We offer a comprehensive strategic partner program for major companies in these areas so that they can provide sales and marketing leverage, have access to required technology, and can furnish complementary products and services to our

joint customers. As of December 31, 2013, more than 500 companies helped market, resell, implement, or offer Informatica's solution around the world.

Research and Development

As of December 31, 2013, we employed 1,068 people in our research and development organization and have 18 development centers in 10 countries. This team is responsible for the design, development, release and maintenance of our products. The group is organized into four disciplines: development, quality assurance, documentation, and product management. Members from each discipline, along with product marketing, form focus teams that work closely with sales, marketing, services, customers, and prospects to better understand market needs and user requirements. These teams utilize a well-defined agile software development

Table of Contents

methodology that we believe enables us to deliver products that satisfy real business needs for the global market while also meeting commercial quality expectations and minimizing schedule risk.

When appropriate, we also use third parties to expand the capacity and technical expertise of our internal research and development team. On occasion, we have licensed third-party technology. We believe this approach shortens time to market without compromising competitive position or product quality, and we plan to continue drawing on third-party resources as needed in the future.

Approximately 28% of Informatica's research and development team is based in the United States and the remainder is based in Australia, Canada, Germany, India, Ireland, Israel, the Netherlands, Russia, and the United Kingdom. Our international development effort is intended to both increase development productivity and deliver innovative product capabilities. Our research and development expenditures, which are expensed as incurred, were \$165.9 million in 2013, \$143.6 million in 2012, and \$132.5 million in 2011.

Competition

The market for our products is highly competitive, quickly evolving, and subject to rapidly changing technology, which may expand the alternatives to our current and potential customers for their data integration requirements. Our competition consists of hand-coded, custom-built data integration solutions developed in-house by various companies in the industry segments that we target, large vendors of data integration software products (such as IBM, Microsoft, Oracle, SAP, and SAS Institute), certain privately held companies, alternate technologies, and open source solutions. From time to time, we compete with business intelligence and analytics vendors that offer, or may develop, products with functionalities that compete with our products.

We believe we currently compete on the basis of the breadth and depth of our products' functionality as well as on the basis of price. Additionally, we compete on the basis of certain other factors, including neutrality, dependability, user efficiency, quality of products, services, support, and versatility. We believe that we currently compete favorably with respect to these factors. For a further discussion on competition, see "Risk Factors — If we do not compete effectively, our revenues may not grow and could decline" in Part I, Item 1A of this Report.

Seasonality and Backlog

Our business is influenced by seasonal factors, largely due to customer buying patterns. In recent years, the fourth quarter has had the highest level of license revenues and license orders, and we have generally had weaker demand for our software products and services in the first and third quarters of the year. The first, second and fourth quarters of 2013, and the first and fourth quarters of 2012 followed these seasonal trends. However, license revenues in the third quarter of 2013 were higher as compared to the first and second quarters of 2013. In addition, license revenues in the second and third quarters of 2012 were lower as compared to the first quarter of 2012. The uncertain macroeconomic conditions and continued changes in our sales organization make our future results more difficult to predict based on historical seasonal trends. See "Potential Future Revenues (New Orders, Backlog, and Deferred Revenue)" in Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 of this Report, which is incorporated herein by reference. Our consulting and education services have sometimes been negatively impacted in the fourth and first quarters of the year due to holidays and internal Informatica meetings, which result in fewer billable hours for our consultants and fewer education classes.

Intellectual Property and Other Proprietary Rights

Our success depends in part upon our proprietary technology. We rely on a combination of patent, copyright, trademark and trade secret rights, confidentiality procedures, and licensing arrangements to establish and protect our proprietary rights. As part of our confidentiality procedures, we generally enter into non-disclosure agreements with our employees, distributors, and corporate partners and into license agreements with respect to our software, documentation, and other proprietary information. In addition, we have over 75 patents issued in a variety of jurisdictions. Our issued patents are scheduled to expire at various times through February 2031. Where appropriate, we have also entered into patent cross-license agreements with third parties, thereby acquiring additional intellectual property rights which preserve our ability to pursue normal business activity and minimize our risks in entering new and adjacent technology markets.

Nonetheless, our intellectual property rights may not be successfully asserted in the future or may be invalidated, circumvented, or challenged. In addition, the laws of various foreign countries where our products are distributed do not protect our intellectual property rights to the same extent as U.S. laws. Our inability to protect our proprietary information could harm our business. For a further discussion of our intellectual property rights, see "Risk Factors - If we are not able to adequately protect our proprietary rights, third parties could develop and market products that are equivalent to our own, which would harm our sales efforts" in Part I, Item 1A of this Report.

Table of Contents

Employees

As of December 31, 2013, we had a total of 3,234 employees, including 1,068 in research and development, 1,060 in sales and marketing, 728 in consulting, customer support, and education services, and 378 in general and administrative services. None of our employees is represented by a labor union. We have not experienced any work stoppages, and we consider employee relations to be good.

Additional Information

Informatica's corporate headquarters are located at 2100 Seaport Boulevard, Redwood City, California 94063, and the telephone number at that location is (650) 385-5000. We can also be reached at our Web site at www.informatica.com; however, the information in, or that can be accessed through, our Web site is not part of this Report. Informatica was incorporated in California in February 1993 and reincorporated in Delaware in April 1999. Copies of annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") are available, free of charge, on Informatica's Web site as soon as reasonably practicable after we file such material electronically with the Securities and Exchange Commission ("SEC"). The SEC also maintains a Web site that contains our SEC filings. The address of the site is www.sec.gov. The public may also read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington DC, 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

ITEM 1A. RISK FACTORS

In addition to the other information contained in this Annual Report on Form 10-K, we have identified the following risks and uncertainties that may have a material adverse effect on our business, financial condition, or results of operation. Investors should carefully consider the risks described below before making an investment decision. The trading price of our common stock could decline due to any of these risks, and investors may lose all or part of their investment.

If we do not compete effectively, our revenues may not grow and could decline.

The market for our products is highly competitive, quickly evolving, and subject to rapidly changing technology, which may expand the alternatives to our current and potential customers for their data integration requirements. Our competition consists of hand-coded, custom-built data integration solutions developed in-house by various companies in the industry segments that we target, large vendors of data integration software products (such as IBM, Microsoft, Oracle, SAP, and SAS Institute), certain privately held companies, alternate technologies, and open source solutions. From time to time, we compete with business intelligence and analytics vendors that offer, or may develop, products with functionalities that compete with our products.

Many of our competitors have longer operating histories, substantially greater financial, technical, marketing, and other resources, greater name recognition, specialized sales or domain expertise, broader product portfolios and stronger customer relationships than we do and may be able to exert greater influence on customer purchase decisions. Our competitors may be able to respond more quickly than we can to new or emerging technologies, technological trends and changes in customer requirements. Our current and potential competitors may develop and market new technologies that render our existing or future products obsolete, unmarketable, or less competitive. In addition, new products or enhancements of existing products that we introduce may not adequately address or respond to new or emerging technologies, technological trends or changes in customer requirements. Also, new or emerging technologies, technological trends or changes in customer requirements may result in certain of our strategic partners becoming potential competitors in the future.

We believe we currently compete on the basis of the breadth and depth of our products' functionality, as well as on the basis of price. We may have difficulty competing on the basis of price in circumstances where our competitors develop and market products with similar or superior functionality and pursue an aggressive pricing strategy. For example, some of our competitors may provide guarantees of prices and product implementation, offer data integration products at no cost in order to charge a premium for additional functionality, or bundle data integration and

data quality products at no cost to the customer or at deeply discounted prices for promotional purposes or as a long-term pricing strategy. These difficulties may increase as larger companies target the data integration markets. A customer may be unwilling to pay a separate cost for our data integration products if the customer has a bundled pricing arrangement with a larger company that offers a wider variety of products than us. As a result, increased competition, alternate pricing models and bundling strategies could seriously impede our ability to sell additional products and services on terms favorable to us.

In addition, consolidation among vendors in the software industry is continuing at a rapid pace. Our current and potential competitors may make additional strategic acquisitions, consolidate their operations, or establish cooperative relationships among

Table of Contents

themselves or with other solution providers, thereby increasing their ability to provide a broader suite of software products or solutions and more effectively address the needs of our current and prospective customers. Such acquisitions could cause customers to defer their purchasing decisions. Our current and potential competitors may also establish or strengthen cooperative relationships with our current or future strategic partners, thereby limiting our ability to sell products through these channels. If any of this were to occur, our ability to market and sell our software products would be impaired. In addition, competitive pressures could reduce our market share or require us to reduce our prices, either of which could harm our business, results of operations, and financial condition.

Furthermore, during periods of U.S. and global economic slowdowns or uncertainty, as we are currently experiencing, our customers' capital spending is significantly reduced. As a result, there is significantly increased competition for the allocation of IT budget dollars, and other IT implementations may take priority over the use of our products and services.

Our success depends upon the introduction of new products, the integration of acquired products, and the enhancement of existing products.

Rapid technological changes, including changes in customer requirements and preferences, are characteristic in the software industry. In order to address the expanding data integration needs of our customers and prospective customers, we introduce new products and technology enhancements on a regular basis, including products we acquire. For example, in the past few years, we have delivered a version upgrade to our entire data integration platform by delivering the generally available version of Informatica 9, and introduced Informatica Vibe, an embedded virtual data machine, designed to embed data integration into the next generation of applications. In addition, we extended our existing master data management (“MDM”) offerings through the acquisition of Heiler Software, and we introduced various solutions for the cloud market, among others. The introduction of new products, integration of acquired products and enhancement of existing products, is a complex and costly process involving inherent risks, such as:

- the failure to accurately anticipate changes in technological trends;
- the failure to accurately anticipate changes in customer requirements and preferences;
- delays in completion, launch, delivery, or availability;
- delays in customer adoption or market acceptance;
- delays in customer purchases in anticipation of products not yet released;
- product quality issues, including the possibility of defects and the costs of remediating any such defects;
- market confusion based on changes to the product packaging and pricing as a result of a new product release;
- interoperability and integration issues between our existing products and newly acquired products or technologies, and the costs of remediating any such issues;
- interoperability and integration issues with third-party technologies and the costs of remediating any such issues;
- customer issues with migrating or upgrading from previous product versions and the costs of remediating any such issues;
- loss of existing customers that choose a competitor's product instead of upgrading or migrating to the new or enhanced product; and
- loss of maintenance revenues from existing customers that do not upgrade or migrate.

We devote significant resources to the development of new products, the acquisition of products, and the enhancement of existing products, as well as to the integration of these products with each other. As a result of the risks involved, we cannot predict the impact on our overall sales from new or enhanced products, and we may not generate sufficient revenues from these products to justify their costs, which would adversely affect our competitive position and results of operations.

We may experience fluctuations in our quarterly operating results, especially in the amount of license revenues we recognize, which could cause our stock price to decline.

Our quarterly operating results, including our software revenues and particularly our license revenues, have fluctuated in the past and may do so in the future. These fluctuations have caused our stock price to decline and could cause our

stock price to significantly fluctuate or decline in the future. Our license revenues, which are primarily sold on a perpetual license basis, are difficult to forecast accurately and are vulnerable to short-term shifts in customer demand. Also, we may experience order deferrals by customers in anticipation of future new product introductions or product enhancements, as well as a result of their particular budgeting and purchase cycles. The continued global economic uncertainty is also likely to cause further customer order deferrals or reductions, stricter customer purchasing controls and approval processes, and adversely affect budgeting and purchase cycles. By comparison, our short-term expenses are relatively fixed and based in part on our expectations of future revenues. In addition, our backlog of license orders at the end of a given fiscal period has tended to vary. Historically, our backlog typically decreases

Table of Contents

from the prior quarter at the end of the first and third quarters and increases from the prior quarter at the end of the fourth quarter. Furthermore, we generally recognize a substantial portion of our license revenues in the last month of each quarter and, sometimes in the last few weeks or days of each quarter. As a result, we cannot predict the adverse impact caused by cancellations or delays in prospective orders until the end of each quarter. Moreover, the expansion of our product portfolio through the introduction of new products and enhancements has increased the complexity and size of our transactions. The likelihood of an adverse impact may be greater if we experience increased average transaction sizes due to a mix of relatively larger deals in our sales pipeline.

Due to the difficulty we experience in predicting our quarterly license revenues, we believe that quarter-to-quarter comparisons of our operating results are not necessarily a good indication of our future performance. In addition, a number of the other factors discussed in this section may cause fluctuations in our quarterly operating results. Our future operating results or forecasts of future operating results could fail to meet the expectations of stock analysts and investors. If any of these happen, the price of our common stock would likely fall.

Continued uncertainty in the U.S. and global economies, particularly Europe, could negatively affect sales of our products and services and could harm our operating results, which could result in a decline in the price of our common stock.

As our business has grown, we have become increasingly subject to the risks arising from adverse changes in the domestic and global economies, particularly Europe. Revenues from Europe, the Middle East, and Africa (“EMEA”) accounted for approximately 22% and 25% of our total revenues in 2013 and 2012, respectively. We have experienced the adverse effect of economic slowdowns in the past, which resulted in a significant reduction in capital spending by our customers, as well as longer sales cycles and the deferral or delay of purchases of our products.

Uncertainty in the macroeconomic environment and associated global economic conditions have resulted in extreme volatility in credit, equity, and foreign currency markets. In particular, economic concerns continue with respect to the European sovereign debt markets and potential ramifications of any U.S. debt, income tax and budget issues, including future delays in approving the U.S. budget or reductions in government spending. Such uncertainty and associated conditions have also resulted in volatility in various vertical markets, particularly the financial services and public sectors, which are typically two of the larger vertical sectors that we serve. For example, in 2010 and through the first three quarters of 2012, we experienced a decline in European public sector transactions, and we continue to expect uncertainty in Europe at least until the sovereign debt issues are resolved. In addition, we experienced a decline in financial services transactions in the fourth quarter of 2012 as compared to the fourth quarter of 2011. We expect public sector transactions to continue to be volatile in the near term, and as a result, growth in our business becomes more dependent on growth in the financial services and other sectors in the U.S. and internationally.

These conditions have also adversely affected the buying patterns of our customers and prospective customers and have adversely affected our overall pipeline conversion rate as well as our revenue growth expectations. For example, in the second and third quarters of 2012, the macroeconomic uncertainty in Europe contributed to a delay in customer purchasing decisions, stricter customer purchasing controls and approval processes, and a decline in our pipeline conversion rate. In addition, in the third quarter of 2013, we experienced weaker than expected results in Asia-Pacific. We expect these macroeconomic conditions, together with our recent sales execution challenges and our international sales leadership transitions, will continue to adversely affect our international results in the near term. If macroeconomic conditions continue to deteriorate or if the pace of economic recovery is slower or more uneven, our overall results of operations could be adversely affected, we may not be able to grow at the rates we have experienced in the past and we could fail to meet the expectations of stock analysts and investors, which could cause the price of our common stock to decline.

We continue to invest in our international operations. There are significant risks with overseas investments, and our growth prospects in these regions are uncertain. Increased volatility or further declines in the European credit, equity and foreign currency markets could cause delays in or cancellations of European orders. Deterioration of economic conditions in the countries in which we do business could also cause slower or impaired collections on accounts receivable. In addition, we could experience delays in the payment obligations of our worldwide reseller customers if

they experience weakness in the end-user market, which would increase our credit risk exposure and harm our financial condition.

If we are unable to accurately forecast sales and trends in our business, we may fail to meet expectations and our stock price could decline.

We use a “pipeline” system, a common industry practice, to forecast sales and trends in our business. Our sales personnel monitor the status of all potential sales of our products and estimate when a customer will make a purchase decision and the potential dollar amount of the sale. We aggregate these estimates periodically in order to generate a sales pipeline. We assess the pipeline at various points in time to look for trends in our business. While this pipeline analysis may provide us with some guidance in business planning and budgeting, these pipeline estimates are necessarily speculative. Our pipeline estimates may not consistently correlate to revenues in a particular quarter or over a longer period of time, particularly in a weak or uncertain global macroeconomic environment. In addition, our pipeline estimates can prove to be unreliable in a particular quarter or over a longer period of time,

Table of Contents

in part because both the “conversion rate” of the pipeline into contracts and the quality and timing of pipeline generation can be very difficult to estimate. For example, in the second and third quarters of 2012, continued changes in our sales organization and challenges in our sales execution generally, together with the macroeconomic uncertainty in Europe, adversely affected our pipeline management capabilities, the reliability of our pipeline estimates, and, consequently, our pipeline conversion rate. In particular, in the third quarter of 2012, our pipeline conversion rate was significantly lower as compared to the second quarter of 2012. In response, we made further changes to our sales, marketing and field operations organizations, including the implementation of pipeline generation initiatives, more rigorous sales planning and process measures; however, in the near term, such actions may decrease the predictive value of our pipeline in assessing near term trends in our business or in comparison to historical trends.

The conversion of the sales pipeline into license revenues may also be affected by the tendency of some of our customers to wait until the end of a fiscal period in the hope of obtaining more favorable terms, which can also impede our ability to negotiate, execute and deliver on these contracts in a timely manner. Because we have historically recognized a substantial portion of our license revenues in the last month of each quarter and sometimes in the last few weeks of each quarter, we may not be able to adjust our cost structure in a timely manner in response to variations in the pipeline conversion rate. In addition, for newly acquired companies, we have limited ability to predict how their pipelines will convert into sales or revenues following acquisition. Any change in the conversion rate of the pipeline into customer sales or in the pipeline itself could cause us to improperly budget for future expenses that are in line with our expected future revenues, which would adversely affect our operating margins and results of operations and could cause the price of our common stock to decline.

A reduction in our sales pipeline and pipeline conversion rate could adversely affect the growth of our company and the price of our common stock.

In the past and recently, we have experienced a reduced conversion rate of our overall license pipeline, primarily as a result of general economic slowdowns and general macroeconomic uncertainty, which caused the amount of customer purchases to be reduced, deferred, or cancelled. Although the size of our sales pipeline and our pipeline conversion rate generally have increased as a result of our additional investments in sales personnel and a gradually improving IT spending environment, they are not consistent on a quarter-to-quarter basis. The recent global economic recession and continued macroeconomic uncertainty has had and will continue to have an adverse effect on our pipeline conversion rate in the near future. Our pipeline conversion rate declined in 2008, remained depressed in certain geographies in 2009, increased in 2010 and decreased in certain geographies and vertical industry sectors in 2011 and 2012. If we are unable to continue to increase the size of our sales pipeline and our pipeline conversion rate, our results of operations could fail to meet the expectations of stock analysts and investors, which could cause the price of our common stock to decline.

Furthermore, we have expanded our international operations and opened new sales offices in other countries. We have also experienced leadership transitions in our international sales organizations, continued to make investments in our sales specialists and domain experts, and implemented changes in our worldwide sales, marketing and field operations to address recent sales execution challenges and improve performance, particularly with respect to our pipeline generation and management capabilities, the reliability of our pipeline estimates and our pipeline conversion rates. As a result of our international expansion and these changes, as well as the increase in our direct sales headcount in the United States, our sales and marketing expenses have increased. As our products become more complex and we target new customers for our software and services, we expect to broaden our go-to-market initiatives and, as a result, our expenses may increase. We expect these investments to increase our revenues, sales productivity, and eventually our profitability. However, if we experience an increase in sales personnel turnover, do not achieve expected increases in our sales pipeline, experience a decline in our sales pipeline conversion ratio, or do not achieve increases in productivity and efficiencies from our new sales personnel as they gain more experience, then we may not achieve our expected increases in revenue, sales productivity, and profitability.

As a result of our lengthy sales cycles, our expected revenues are susceptible to fluctuations, which could cause us to fail to meet expectations, resulting in a decline in the price of our common stock.

Due to the expense, broad functionality, and company-wide deployment of our products, our customers' decisions to purchase our products typically require the approval of their executive decision makers. Also, macroeconomic uncertainty and global economic conditions can adversely affect the buying patterns of our customers and prospective customers and lengthen our sales cycle. For example, in the second and third quarters of 2012, the macroeconomic uncertainty in Europe contributed to a delay in customer purchasing decisions and stricter customer purchasing controls and approval processes in EMEA. In addition, we frequently must educate our potential customers about the full benefits of our products, which also can require significant time. These trends toward greater customer executive level involvement or stricter customer purchasing controls and approval processes and increased customer education efforts are likely to increase, particularly as we expand our market focus to broader data integration initiatives. Further, our sales cycle may lengthen as we continue to focus our sales efforts on large corporations. As a result of these factors, the length of time from our initial contact with a customer to the customer's decision to purchase our products

Table of Contents

typically ranges from three to nine months. We are subject to a number of significant risks as a result of our lengthy sales cycle that could delay, reduce or otherwise adversely affect the purchase of our products, including:

- changes in our customers' budgetary constraints and internal acceptance review procedures;
- the timing of our customers' budget cycles;
- the seasonality of technology purchases, which historically has resulted in stronger sales of our products in the fourth quarter of the year, especially when compared to lighter sales in the first quarter of the year;
- our customers' concerns about the introduction of our products or new products from our competitors; or
- potential downturns in general economic or political conditions or potential tightening of credit markets that could occur during the sales cycle.

If our sales cycles lengthen unexpectedly, they could adversely affect the timing of our revenues or increase costs, which may independently cause fluctuations in our revenues and results of operations, adversely affecting the price of our common stock. Finally, if we are unsuccessful in closing sales of our products after spending significant funds and management resources, our operating margins and results of operations could be adversely impacted, and the price of our common stock could decline.

Our subscription offering strategy may not be successful and may adversely affect our profitability.

We offer a variety of subscription offerings, including cloud data integration products and services that provide our customers with functionality within a cloud-based IT environment, and address validation offerings that we manage and offer via a subscription-based model. Our strategy and business model for these subscription offerings, which differs from our traditional perpetual license-based model for our on-premise software products, continue to evolve. The market for subscription-based offerings, particularly for cloud-based solutions, is not as mature as the market for on-premise software products and it may not develop as anticipated. In addition, market acceptance of subscription-based offerings, particularly cloud-based solutions, may be affected by a variety of factors, including the data security, privacy, cost, reliability, performance and perceived value associated with such offerings. Many customers have invested substantial resources on traditional, perpetually licensed, on-premise software solutions and they may be unwilling or reluctant to migrate to cloud-based solutions or other subscription offerings. We may not be able to compete effectively or generate significant demand for or revenues from our subscription offerings. Also, demand for our subscription offerings may unfavorably impact demand for certain of our other products and services. In addition, our subscription offering strategy will require continued investment in product development and operations, including cloud-based IT infrastructure. We may incur costs at a higher than expected rate as we expand our subscription business, adversely affecting our profitability. In addition, we will incur costs associated with the investments in our subscription business in advance of our ability to recognize the revenue associated with our subscription offerings.

Subscription offerings may increase the difficulty of evaluating our future financial position.

With our subscription offerings, we generally recognize revenue from customers ratably over the terms of their subscription agreements. As a result, most of the subscription revenue we report in each quarter is the result of subscription agreements entered into during previous quarters. Consequently, a decline in subscriptions in any one quarter may not affect our results in that quarter, but could reduce revenue in future quarters. We may not be able to adjust our cost structure in response to changes in revenue. Accordingly, the effect of significant downturns in sales of our subscription offerings may not be fully reflected in our results of operations until future periods. Also, as revenue from new customers is recognized over the term of their subscription, it is difficult for us to rapidly increase revenue through additional sales in any period. In addition, if we sell certain elements of our subscription-based offerings together with our perpetual license-based products, we may not be able to recognize the revenue associated with the perpetually licensed products up-front, and we may be required to recognize such revenue ratably over the term of the subscription agreement. The timing of such revenue recognition could have a potentially negative impact on our financial performance.

Furthermore, our customers have no obligation to renew their subscriptions after the expiration of their initial subscription period, and in fact, some customers have elected not to renew. As a result, we may not be able to

accurately predict future renewal rates, and our customers' renewal rates may decline or fluctuate as a result of a number of factors, including satisfaction with our subscription offerings, the prices of our subscription offerings and the prices offered by competitors, the perceived information security of our systems, reductions in customers' spending levels and general economic conditions. If our customers do not renew their subscriptions, or if they renew on less favorable terms, our revenue may decline.

Our international operations expose us to increased risks that could limit our future growth.

We have significant operations outside the United States, including sales and professional services operations, software development centers and customer support centers. We have recently expanded our presence and capabilities in a number of major

Table of Contents

geographic regions, including Canada, Mexico, South America, Europe and the Middle East and Asia-Pacific, and we plan to continue such expansion. Our international operations are subject to numerous risks, including:

- general economic and political conditions in these foreign markets;
- fluctuations in exchange rates between the U.S. dollar and foreign currencies;
- increased operating costs and wage inflation, particularly in India and Brazil;
- greater difficulty in protecting our ownership rights to intellectual property developed in foreign countries, which may have laws that materially differ from those in the United States;
- higher risk of unexpected changes in regulatory practices, tariffs, and tax laws and treaties;
- greater risk of a failure of our employees to comply with both U.S. and foreign laws, including antitrust regulations, the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act of 2010, and any trade regulations ensuring fair trade practices;
- increased expenses, delays and our limited experience in developing, testing and marketing localized versions of our products;
- increased competition from companies in the industry segments that we target or other vendors of data integration software products that are more established in a particular region than us;
- potential conflicts with our established distributors in countries in which we elect to establish a direct sales presence, or the inability to enter into or maintain strategic distributor relationships with companies in certain international markets where we do not have a local presence;
- our limited experience in establishing a sales, marketing and support presence and the appropriate internal systems, processes, and controls, particularly in Brazil, Russia, and Asia-Pacific (especially China, Japan, South Korea, and Taiwan);
- difficulties in recruiting, training, managing, and retaining our international staff, particularly our international sales management and sales personnel, which have adversely affected our ability to increase sales productivity, and the costs and expenses associated with such activities;
 - differing business practices, which may require us to enter into software license agreements that include non-standard terms related to payment, maintenance rates, warranties, or performance obligations that may affect our ability to recognize revenue ratably; and
- communication delays between our main development center in California and our international development centers, which may delay the development, testing or release of new products, and communication delays between our operations in the U.S. and India.

These factors and other factors could harm our ability to gain future international revenues and, consequently, materially impact our business, results of operations, and financial condition. The expansion of our existing international operations and entry into additional international markets will require significant management attention and financial resources. Our failure to manage our international operations and the associated risks effectively could limit the future growth of our business.

The loss of our key personnel, an increase in our sales force personnel turnover rate or decrease in sales force productivity, or the inability to attract and retain additional personnel could adversely affect our ability to grow our company successfully and may negatively impact our results of operations.

We believe our success depends upon our ability to attract and retain highly skilled personnel and key members of our management team. Historically, there has been a significant level of competition to attract these individuals, and we have recently experienced significant changes in our senior management team. For example, we announced the appointment of a new executive vice president of worldwide field operations and new chief marketing officer in 2012 and a new chief product officer in 2013. As new senior personnel join our company and become familiar with our business strategy and systems, their integration could result in disruption to our ongoing operations.

The market for talent has become increasingly competitive and hiring has become more difficult and costly, and our personnel-related costs are likely to increase as we compete to attract and retain employees. Our employees are increasingly becoming more attractive to other companies. Many of our competitors have greater financial and other

resources than us for attracting experienced personnel. Our plan for continued growth requires us to add personnel to meet our growth objectives and places increased importance on our ability to attract, train, and retain new personnel, in particular, new sales personnel. For example, recent changes we implemented in customer segmentation and sales territories adversely affected the quality of our pipeline estimates in 2012. In addition, the leadership transition in our EMEA sales organization adversely affected our pipeline management capabilities in 2012 and 2013. Continued leadership transitions in our international sales, marketing and field operations may adversely affect our ability to manage and grow our business. As we continue to implement further changes to our worldwide sales, marketing and

Table of Contents

field operations organizations, including the implementation of more rigorous sales planning and process measures and continued investment in sales specialists and domain experts, we may experience increased sales force turnover and additional disruption to our ongoing operations, and we may not experience the increases in sales force productivity that we anticipate, particularly in EMEA. These changes may also take longer to implement than expected, which may adversely affect our sales force productivity. If we are unable to effectively attract and train new personnel on a timely basis, or if we experience an increase in the level of turnover, our results of operations may be negatively affected.

Furthermore, from time to time, we have experienced an increased level of turnover in our direct sales force, particularly in the first quarter of a fiscal year. Such increase in the turnover rate affected our ability to generate license revenues. Although we have hired replacements in our sales force and are continuing to hire additional sales personnel to grow our business, we typically experience lower productivity from newly hired sales personnel for a period of six to twelve months. We continue to invest in training for our sales personnel, including updates to cover new, acquired, or enhanced products, as we broaden our product platform. In addition, we periodically make adjustments to our sales organization in response to a variety of internal and external factors, such as market opportunities, competitive threats, management changes, product introductions or enhancements, acquisitions, sales performance, increases in sales headcount and cost levels. Such adjustments may be temporarily disruptive and result in reduced productivity. If we are unable to effectively attract, train and retain new sales personnel, particularly sales specialists or domain experts, or if we experience an increase in the level of sales force turnover or decrease in sales force productivity, our ability to generate license revenues and our growth rate may be negatively affected.

We currently do not have any key-man life insurance relating to our key personnel, and the employment of the key personnel in the United States is at will and not subject to employment contracts.

We have relied on our ability to grant equity awards as one mechanism for recruiting and retaining highly skilled talent. If we are unable to grant such awards, we may not be able to attract and retain outstanding and highly skilled individuals in the extremely competitive labor markets in which we compete.

We may experience fluctuations in foreign currency exchange rates that could adversely impact our results of operations.

Our international sales and operations expose us to fluctuations in foreign currency exchange rates. An unfavorable change in the exchange rate of foreign currencies against the U.S. dollar would result in lower revenues when translated into U.S. dollars, although operating expenditures would be lower as well. Historically, the effect of changes in foreign currency exchange rates on our revenues and operating expenses has been immaterial, although on occasion exchange rates have been particularly volatile and have affected quarterly revenue and profitability. We have attempted to reduce the impact of certain foreign currency exchange rate fluctuations through hedging programs where we do not have a natural hedge. However, as our international operations grow, or if the current dramatic fluctuations in foreign currency exchange rates continue or increase or if our hedging programs become ineffective, the effect of changes in the foreign currency exchange rates could become material to revenue, operating expenses, and income.

We rely on our relationships with our strategic partners. If we do not maintain and strengthen these relationships, our ability to generate revenue and control expenses could be adversely affected, which could cause a decline in the price of our common stock.

We believe that our ability to increase the sales of our products depends in part upon maintaining and strengthening relationships with our current strategic partners and any future strategic partners. In addition to our direct sales force, we rely on established relationships with a variety of strategic partners, such as systems integrators, resellers, and distributors, for marketing, licensing, implementing, and supporting our products in the United States and internationally. We also rely on relationships with strategic technology partners, such as enterprise application providers, database vendors, data quality vendors, and enterprise integrator vendors, for the promotion and implementation of our products.

Our strategic partners offer products from several different companies, including, in some cases, products that compete with our products. We have limited control, if any, as to whether these strategic partners devote adequate resources to promoting, selling, and implementing our products as compared to our competitors' products. Also, new or emerging technologies, technological trends or changes in customer requirements may result in certain of our strategic partners becoming potential competitors in the future. In addition, from time to time our strategic partners have acquired, and will likely continue to acquire, competitors of ours. Such consolidation makes it critical that we continue to strengthen our relationships with other strategic partners. We may not be able to strengthen such relationships and successfully generate additional revenue.

In addition, we may not be able to maintain strategic partnerships or attract sufficient additional strategic partners who have the ability to market our products effectively, are qualified to provide timely and cost-effective customer support and service, or have the technical expertise and personnel resources necessary to implement our products for our customers. In particular, if our strategic partners do not devote sufficient resources to implement our products, we may incur substantial additional costs associated

Table of Contents

with hiring and training additional qualified technical personnel to implement solutions for our customers in a timely manner. Furthermore, our relationships with our strategic partners may not generate enough revenue to offset the significant resources used to develop these relationships. If we are unable to leverage the strength of our strategic partnerships to generate additional revenues, our revenues and the price of our common stock could decline.

Acquisitions and investments present many risks, which could adversely affect our business, operating results and financial condition.

From time to time, we evaluate potential acquisitions or investments in complementary businesses, products, or technologies. For example, we acquired Active Endpoints in 2013, Data Scout and TierData in 2012, and ActiveBase and WisdomForce Technologies in 2011. In addition, in 2011, we purchased certain assets from Sand Technology relating to their Information Lifecycle Management for SAP product line. Also, in December 2012, we completed the takeover offer for Heiler Software, a publicly-traded German company. The squeeze-out of the remaining shareholders was effective in the second quarter of 2013, increasing our ownership to 100 percent. Certain minority shareholders of Heiler Software have initiated appraisal proceedings before the Stuttgart District Court for review of the adequacy of the cash compensation paid in connection with the squeeze-out. These proceedings may result in an increase of the cash compensation to be paid to minority shareholders if the court finds that the valuation underlying the cash compensation was too low.

Acquisitions and investments involve a number of risks, including:

the failure to capture the value of the business we acquired, including the loss of any key personnel, customers and business relationships, including strategic partnerships, or the failure of the transaction to advance our business strategy as anticipated;

the difficulties in and costs associated with successfully integrating or incorporating the acquired company's products, technologies, services, employees, customers, partners, business operations and administrative systems with ours, particularly when the acquired company operates in international jurisdictions;

the disruption of our ongoing business and the diversion of management's attention by transition or integration issues; any difficulties in consolidating the acquired company's financial results with ours, in particular as a result of different accounting principles or financial reporting standards, and the adverse consequences to us of any delay in obtaining the necessary financial information for such consolidation, any unanticipated change in financial information previously reported to us, or the impact the acquired company's financial performance has on our financial performance as a result of such consolidation;

- the failure to accurately predict how the acquired company's pipeline will convert into sales or revenues following the acquisition, as conversion rates post-acquisition may be quite different from the acquired company's historical conversion rates and can be affected by changes in business practices that we implement;

any inability to generate revenue from the acquired company's products in an amount sufficient to offset the associated acquisition and maintenance costs, including addressing issues related to the availability of offerings on multiple platforms and from cross-selling and up-selling our products to the acquired company's installed customer base or the acquired company's products to our installed customer base;

the failure to adequately identify or assess significant problems, liabilities or other issues, including issues with the acquired company's technology or intellectual property, product quality, data security, privacy practices, accounting practices, employees, customers or partners, regulatory compliance, or legal or financial contingencies, particularly when the acquired company operates in international jurisdictions.

We may not be successful in overcoming these risks or any other problems encountered in connection with our acquisitions or investments. To the extent that we are unable to successfully manage these risks, our business, operating results, or financial condition could be adversely affected, and the price of our common stock could decline. Due to the complexity and scope of the Heiler Software transaction, the foregoing risks may be exacerbated. Our ability to realize any benefits of the transaction, including any potential synergies, will depend on our ability to fully integrate Heiler Software's business with ours.

In addition, the consideration paid in connection with an investment or acquisition also affects our financial results. If we should proceed with one or more significant acquisitions in which the consideration includes cash, we could be required to use a substantial portion of our available cash to consummate any such acquisition. To the extent that we issue shares of stock or other rights to purchase stock, existing stockholders may be diluted and earnings per share may decrease. In addition, acquisitions may result in our incurring additional taxes, unforeseen or higher than expected costs, debt, material one-time write-offs, or purchase accounting adjustments including the write-down of deferred revenue and restructuring charges. They may also result in recording goodwill and other intangible assets in our financial statements which may be subject to future impairment charges or ongoing amortization costs, thereby reducing future earnings. In addition, from time to time, we may enter into negotiations for acquisitions

Table of Contents

or investments that are not ultimately consummated. Such negotiations could result in significant diversion of management time, as well as incurring expenses that may impact operating results.

If our products are unable to interoperate with hardware and software technologies developed and maintained by third parties that are not within our control, our ability to develop and sell our products to our customers could be adversely affected, which would result in harm to our business and operating results.

Our products are designed to interoperate with and provide access to a wide range of third-party developed and maintained hardware and software technologies, which are used by our customers. The future design and development plans of the third parties that maintain these technologies are not within our control and may not be in line with our future product development plans. We may also rely on such third parties, particularly certain third-party developers of database and application software products, to provide us with access to these technologies so that we can properly test and develop our products to interoperate with the third-party technologies. These third parties may in the future refuse or otherwise be unable to provide us with the necessary access to their technologies. In addition, these third parties may decide to design or develop their technologies in a manner that would not be interoperable with our own. The continued consolidation in the enterprise software market may heighten these risks. Furthermore, our expanding product line, including our combination of products delivered on a comprehensive, unified and open data integration platform makes maintaining interoperability more difficult as various products may have different levels of interoperability and compatibility, which may change from version to version. If any of the situations described above were to occur, we would not be able to continue to market our products as interoperable with such third-party hardware and software, which could adversely affect our ability to successfully sell our products to our customers.

If our products and services do not achieve and/or maintain broad market acceptance, our revenues and revenue growth rate may be adversely affected.

Historically, a significant portion of our revenues have been derived from sales of our traditional data integration products, such as PowerCenter and PowerExchange, and related services. We expect sales of our traditional data integration products and services to comprise a significant portion of our revenues for the foreseeable future. If these products and services do not maintain market acceptance, our revenues may decrease.

In addition to our traditional data integration products, we have expanded our platform to include products and services in the emerging market for broader data integration initiatives, such as cloud data integration, data quality, information lifecycle management, data exchange, and MDM, among others. The market for our broader data integration products and services remains relatively new and continues to change, and efforts to expand beyond our traditional data integration products may not succeed and may not result in significant revenue. Our newer products may not achieve market acceptance if our customers or prospective customers:

- do not fully value the benefits of using our products;
- do not achieve favorable results using our products;
- use their budgets for other products that have priority over our products;
- defer or decrease product purchases due to macroeconomic uncertainty or global economic conditions;
- experience technical difficulties in implementing our products; or
- use alternative methods to solve the problems addressed by our products.

Market acceptance of our products may also be affected if, among other things, competition substantially increases in the enterprise data integration market or transactional applications suppliers integrate their products to such a degree that the utility of the functionality that our products and services provide is minimized or rendered unnecessary. In addition, in order to enable our sales personnel and our external distribution channel to sell these newer products effectively, we have continued to invest resources and incur additional costs in training programs on new product functionalities, key differentiators, and key business values. If these newer products do not achieve market acceptance, our revenues could be adversely affected and our revenue growth rate, profitability and stock price could decline.

If we are unable to successfully respond to technological advances and evolving industry standards, we could experience a reduction in our future product sales, which would cause our revenues to decline.

The market for our products is characterized by continuing technological development, the emergence of new technologies, evolving industry standards, changing customer needs, and frequent new product introductions and enhancements. The introduction of products by our direct competitors or others incorporating new technologies, the emergence of new industry standards, or changes in customer requirements could render our existing products obsolete, unmarketable, or less competitive. In addition, industry-wide adoption or increased use of hand-coding, open source standards or other uniform open standards across heterogeneous applications could minimize the importance of the integration functionality of our products and materially adversely

Table of Contents

affect the competitiveness and market acceptance of our products. Furthermore, the standards on which we choose to develop new products or enhancements may not allow us to compete effectively for business opportunities. Our success depends upon our ability to enhance existing products, to respond to changing customer requirements, and to develop and introduce in a timely manner new products that keep pace with technological and competitive developments and emerging industry standards. We have in the past experienced delays in releasing new products and product enhancements and may experience similar delays in the future. As a result, in the past, some of our customers deferred purchasing our products until the next upgrade was released. Future delays or problems in the installation or implementation of our new releases may cause customers to forgo purchases of our products and purchase those of our competitors instead. Additionally, even if we are able to develop new products and product enhancements, we cannot ensure that they will achieve market acceptance.

Any significant defect in our products could cause us to lose revenue and expose us to product liability claims. The software products we offer are inherently complex and, despite extensive testing and quality control, have in the past and may in the future contain errors or defects, especially when first introduced. These defects and errors could cause damage to our reputation, loss of revenue, product returns, order cancellations, or lack of market acceptance of our products. As the use of our products, including products recently acquired or developed, expands to more sensitive, secure, or mission critical uses by our customers, we may be subject to increased scrutiny, potential reputational risk, or potential liability should our products fail to perform as contemplated in such deployments. We have in the past and may in the future need to issue corrective releases of our software products to fix these defects or errors, which could require us to allocate significant customer support resources to address these problems.

Our license agreements with our customers typically contain provisions designed to limit our exposure to potential product liability claims. However, the limitation of liability provisions contained in our license agreements may not be effective as a result of existing or future national, federal, state, or local laws or ordinances or unfavorable judicial decisions. Although we have not experienced any product liability claims to date, the sale and support of our products entail the risk of such claims, which could be substantial in light of the use of our products in enterprise-wide environments. In addition, our insurance against product liability may not be adequate to cover a potential claim. We are currently facing and may face future intellectual property infringement claims that could be costly to defend and result in our loss of significant rights.

As is common in the software industry, we have received and may continue from time to time receive notices from third parties claiming infringement by our products of third-party patent and other proprietary rights. As the number of software products in our target markets increases and the functionality of these products further overlaps, we may become increasingly subject to claims by a third party that our technology infringes such party's proprietary rights. In addition, there is a growing occurrence of patent suits being brought by organizations that use patents to generate revenue without manufacturing, promoting, or marketing products or investing in research and development in bringing products to market. These organizations have been increasingly active in the enterprise software market and have targeted whole industries as defendants. For example, in 2007, JuxtaComm Technologies filed a complaint alleging patent infringement against us and various defendants, and in 2008 and 2010, Data Retrieval Technologies LLC filed complaints alleging patent infringement against us and another company. While we settled both these matters, we continue to defend ourselves against additional claims of patent infringement. For example, in September 2013, Protegrity filed a complaint alleging patent infringement against us.

Any claims, with or without merit, could be time consuming, result in costly litigation, cause product shipment delays, or require us to enter into royalty or licensing agreements, any of which could adversely affect our business, financial condition, and operating results. Although we do not believe that we are currently infringing any proprietary rights of others, additional legal action claiming patent infringement could be commenced against us. We may not prevail in such litigation given the complex technical issues and inherent uncertainties in patent litigation. The potential effects on our business that may result from third-party infringement claims include the following:

- we could be and have been obligated to incur significant legal costs and expenses defending the patent infringement suit;

- we may be forced to enter into royalty or licensing agreements, which may not be available on terms favorable to us;
- we may be required to indemnify our customers or obtain replacement products or functionality for our customers;
- we may be forced to significantly increase our development efforts and resources to redesign our products as a result of these claims; and
- we may be forced to discontinue the sale of some or all of our products.

Table of Contents

If we are not able to adequately protect our proprietary rights, third parties could develop and market products that are equivalent to our own, which would harm our sales efforts.

Our success depends upon our proprietary technology. We believe that our product development, product enhancements, name recognition, and the technological and innovative skills of our personnel are essential to establishing and maintaining a technology leadership position. We rely on a combination of patent, copyright, trademark, and trade secret rights, confidentiality procedures, and licensing arrangements to establish and protect our proprietary rights.

However, these legal rights and contractual agreements may provide only limited protection. Our pending patent applications may not be allowed or our competitors may successfully challenge the validity or scope of any of our issued patents or any future issued patents. Our patents alone may not provide us with any significant competitive advantage, and third parties may develop technologies that are similar or superior to our technology or design around our patents. Third parties could copy or otherwise obtain and use our products or technology without authorization or develop similar technology independently. We cannot easily monitor any unauthorized use of our products, and, although we are unable to determine the extent to which piracy of our software products exists, software piracy is a prevalent problem in our industry in general. We may be forced to initiate litigation to protect our proprietary rights. Litigating claims related to the enforcement of proprietary rights is very expensive and can be burdensome in terms of management time and resources, which could adversely affect our business and operating results. In addition, the risk of not adequately protecting our proprietary technology and our exposure to competitive pressures may be increased if a competitor should resort to unlawful means in competing against us.

We have entered into agreements with many of our customers and partners that require us to place the source code of our products into escrow. Such agreements generally provide that such parties will have a limited, non-exclusive right to use such code if: there is a bankruptcy proceeding by or against us; we cease to do business; or we fail to meet our support obligations. Although our agreements with these third parties limit the scope of rights to use of the source code, we may be unable to effectively control such third parties' actions.

Furthermore, effective protection of intellectual property rights is unavailable or limited in various foreign countries. The protection of our proprietary rights may be inadequate and our competitors could independently develop similar technology, duplicate our products, or design around any patents or other intellectual property rights we hold. A breach of security in our products or computer systems may compromise the integrity of our products or allow unauthorized access to our customers' data, harm our reputation, create additional liability and adversely impact our financial results.

We make significant efforts to maintain the security and integrity of our product source code and computer systems. There appears to be an increasing number of computer "hackers" developing and deploying a variety of destructive software programs (such as viruses, worms, and other malicious software programs) that could attack our products and computer systems, including our internal network. Despite significant efforts to create security barriers to such programs, it is virtually impossible for us to entirely mitigate this risk. Like all software products, our software is vulnerable to such attacks. The impact of such an attack could disrupt the proper functioning of our software products, cause errors in the output of our customers' work, allow unauthorized access to sensitive, proprietary or confidential information of ours or our customers and other destructive outcomes. If this were to occur, our reputation may suffer, customers may stop buying our products, we could face lawsuits and potential liability and our financial performance could be negatively affected. In addition, we may need to devote more resources to address security vulnerabilities in our products, and the cost of addressing these vulnerabilities could reduce our operating margins. If we do not address security vulnerabilities or otherwise provide adequate security features in our products, certain customers, particularly government and other public sector customers, may delay or stop purchasing our products. Furthermore, the risks related to security breaches will increase as we continue to develop our cloud products and services, which may store, transmit and process our customers' sensitive, proprietary or confidential data, including personal or identifying information, in cloud-based IT environments. Unauthorized access or security breaches could expose us to loss of this data, litigation, indemnity obligations and significant other liabilities, which may adversely affect our business. In

addition, we also have acquired a number of companies, products, services and technologies over the years. As a result, we may inherit additional IT security issues when we integrate these acquisitions.

A portion of our revenue is generated by sales to government entities, which are subject to a number of challenges and risks.

Sales to U.S. and foreign federal, state, and local governmental agency end-customers have accounted for a portion of our revenue, and we may in the future increase sales to government entities. However, government entities have recently announced reductions in, or experienced increased pressure to reduce, government spending. In particular, such measures have adversely affected European public sector transactions. Furthermore, the continued U.S. debt, income tax and budget issues, including future delays in approving the U.S. budget or reductions in government spending, may adversely impact future U.S. public sector transactions. Such budgetary constraints or shifts in spending priorities of government entities may adversely affect sales of our

Table of Contents

products and services to such entities. We expect these conditions to continue to adversely affect public sector transactions in the near-term.

In addition, sales to government entities are subject to a number of risks. Selling to government entities can be highly competitive, expensive and time consuming, often requiring significant upfront time and expense without any assurance that we will successfully sell our products to such governmental entity. Government entities may require contract terms that differ from our standard arrangements. Government contracts may require the maintenance of certain security clearances for facilities and employees which can entail administrative time and effort possibly resulting in additional costs and delays. In addition, government demand and payment for our products may be more volatile as they are affected by public sector budgetary cycles, funding authorizations, and the potential for funding reductions or delays, making the time to close such transactions more difficult to predict. This risk is enhanced as the size of such sales to the government entities increases. As the use of our products, including products recently acquired or developed, expands to more sensitive, secure or mission critical uses by our government customers, we may be subject to increased scrutiny, potential reputational risk, or potential liability should our products fail to perform as contemplated in such deployments or should we not comply with the terms of our government contracts or government contracting requirements.

Most of our sales to government entities have been made indirectly through providers that sell our products. Government entities may have contractual or other legal rights to terminate contracts with our providers for convenience or due to a default, and any such termination may adversely impact our future results of operations. For example, if the provider receives a significant portion of its revenue from sales to such governmental entity, the financial health of the provider could be substantially harmed, which could negatively affect our future sales to such provider. Governments routinely audit and investigate government contractors, and we may be subject to such audits and investigations. If an audit or investigation uncovers improper or illegal activities, including any misuse of confidential or classified information by our employees, we may be subject to civil or criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines, and suspension or prohibition from doing business with such government entity. In addition, we could suffer serious reputational harm if allegations of impropriety were made against us or our employees or should our products not perform as contemplated in government deployments.

We recognize revenue from specific customers at the time we receive payment for our products, and if these customers do not make timely payment, our revenues could decrease.

Based on limited credit history, we recognize revenue from direct end users, resellers, distributors, and OEMs that have not been deemed creditworthy when we receive payment for our products and when all other criteria for revenue recognition have been met, rather than at the time of sale. We have seen certain customers lengthen their payment cycles as a result of the continued difficult macroeconomic environment. As our business grows, if these customers and partners do not make timely payment for our products, our revenues could decrease. If our revenues decrease, the price of our common stock may fall.

We rely on a number of different distribution channels to sell and market our products. Any conflicts that we may experience within these various distribution channels could result in confusion for our customers and a decrease in revenue and operating margins.

We have a number of relationships with resellers, systems integrators, and distributors that assist us in obtaining broad market coverage for our products and services. Although our discount policies, sales commission structure, and reseller licensing programs are intended to support each distribution channel with a minimum level of channel conflicts, we may not be able to minimize these channel conflicts in the future. Any channel conflicts that we may experience could result in confusion for our customers and a decrease in revenue and operating margins.

Our effective tax rate is difficult to project, and changes in such tax rate or adverse results of tax examinations could adversely affect our operating results.

We are a United States-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. A significant portion of our foreign earnings for the current fiscal year were earned by our Netherlands and other

European subsidiaries. Our results of operations would be adversely affected to the extent that our geographical mix of income becomes more weighted toward jurisdictions with higher tax rates and would be favorably affected to the extent the relative geographic mix shifts to lower tax jurisdictions. Any change in our mix of earnings is dependent upon many factors and is therefore difficult to predict.

The process of determining our anticipated tax liabilities involves many calculations and estimates that are inherently complex and make the ultimate tax obligation determination uncertain. As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate prior to the completion and filing of tax returns for such periods. This process requires estimating both our geographic mix of income and our current tax

Table of Contents

exposures in each jurisdiction where we operate. These estimates involve complex issues, require extended periods of time to resolve, and require us to make judgments, such as anticipating the outcomes of audits with tax authorities and the positions that we will take on tax returns prior to actually preparing the returns. We also determine the need to record deferred tax liabilities and the recoverability of deferred tax assets. A valuation allowance is established to the extent recovery of deferred tax assets is not likely based on our estimation of future taxable income and other factors in each jurisdiction.

Furthermore, our overall effective income tax rate and tax expenses may be affected by various factors in our business, including acquisitions, changes in our legal structure, changes in the geographic mix of income and expenses, changes in valuation allowances, changes in applicable tax laws and accounting pronouncements. For example, our effective tax rate has historically benefited from the federal research and development tax credit. As of December 31, 2012, the credit had not been extended resulting in no tax benefit in 2012. This credit was extended retroactively for 2012 and prospectively for 2013 in January of 2013. We have recognized the entire benefit of the 2012 research and development credit of approximately \$2.0 million during the first quarter of 2013. The benefit of the 2013 research and development tax credit was recognized in our current year effective tax rate over the entire year. In addition, we incurred significant acquisition integration-related income tax expenses during 2013, which caused our effective tax rate to increase for the full year 2013 compared to 2012. Further, the geographic mix of income and expense is impacted by the fluctuation in exchange rates between the U.S. dollar and the functional currencies of our subsidiaries.

We are under examination by various taxing authorities covering the past several years. We may receive additional assessments from domestic and foreign tax authorities that might exceed amounts reserved by us. In the event we are unsuccessful in reducing the amount of such assessment, our business, financial condition, or results of operations could be adversely affected. Specifically, if additional taxes and/or penalties are assessed as a result of these audits, there could be a material effect on our income tax provision, operating expenses, and net income in the period or periods when that determination is made.

As our business expands, we are subject to increasingly complex regulatory and compliance obligations and differing business practices, both foreign and domestic, which may strain our resources and divert management's attention. During the past few years, our organizational structure has increased in complexity due to compliance with financial reporting obligations, tax regulations and tax accounting requirements, acquisitions, and other regulatory and compliance requirements, including compliance with the rules and regulations related to the Sarbanes-Oxley Act of 2002 and anti-corruption and anti-bribery laws such as the U.S. Foreign Corrupt Practices Act (the "FCPA") and the UK Bribery Act of 2010 (the "UK Bribery Act"). In addition, new or changing rules and regulations, including those relating to corporate governance, securities laws and public disclosure, often create uncertainty for public companies, increasing legal and financial compliance costs and making some activities more time consuming. These practices may evolve over time upon new guidance from regulatory or governing bodies, resulting in continued uncertainty regarding compliance and higher costs to adopt or modify our practices accordingly. Also, as we expand internationally, we become subject to the various rules and regulations of foreign jurisdictions. If we are unable to effectively comply with the rules and regulations applicable to us, particularly those relating to financial reporting, investors may lose confidence in our ability to manage our compliance obligations, which would have an adverse effect on our stock price. Furthermore, we continue to develop our cloud products and services, which may store, transmit and process our customers' sensitive, proprietary or confidential data, including personal or identifying information, in cloud-based IT environments. These new cloud products and services may expose us to higher regulation than our traditional on-premise products and services, particularly with respect to privacy and data security. Privacy laws are changing and evolving globally, and many countries have more stringent data protection laws than those in the U.S. As a result, new cloud products and services may increase our liability exposure, compliance requirements and costs associated with privacy and data security issues. Our efforts to comply with all of these requirements may result in an increase in expenses and a diversion of management's time and attention from other business activities. If our efforts to comply differ from those intended by regulatory or governing bodies, such

authorities may initiate proceedings against us and our business may be harmed.

Further, we have expanded our presence in the Asia-Pacific region, where business practices can differ from those in other regions of the world and can create internal control risks. To address potential risks, we recognize revenue on transactions derived in this region (except for direct sales in Japan and Australia) only when the cash has been received and all other revenue recognition criteria have been met. We also provide business practices training to our sales teams. Overall, the combination of increased structural complexity and the ever-increasing regulatory complexity make it more critical for us to attract and retain qualified and technically competent employees in the United States and internationally.

We may not be able to successfully manage the growth of our business if we are unable to scale our operations and improve our internal systems, processes, and controls.

We continue to experience growth in our customer base and operations, which may place a strain on our management, administrative, operational and financial infrastructure. We anticipate that additional investments in our infrastructure will be necessary to scale our operations and increase productivity. These additional investments will increase our costs, and may adversely

Table of Contents

affect our operating margins if we are unable to sufficiently increase revenues to cover these additional costs. If we are unable to successfully scale our operations and increase productivity, we may be unable to execute our business strategies. Also, we have substantial real estate commitments, both leased and owned, in the United States and internationally. Our business has grown in recent years through internal expansion and through acquisitions, and we expect such growth to continue. As a result, we may need to enter into additional lease commitments, expand existing facilities, or purchase new facilities or undeveloped real estate, which may adversely affect our cash flows and results of operations. For example, in February 2012 we purchased the property associated with our former corporate headquarters in Redwood City, California, for approximately \$148.6 million, which reflects a purchase price of \$153.2 million less a rent credit of \$4.6 million. We relocated our corporate headquarters to these facilities in the third quarter of 2013.

In advance of our relocation, we also moved our existing data center from our corporate headquarters to an external third party facility. We also utilize other third party data center facilities to host certain of our services, systems and data. If any of these third party facilities become unavailable due to outages, interruptions or other unanticipated problems, or because they are no longer available on commercially reasonable terms or prices, our costs may increase and our operations may be impaired, which would adversely affect our business.

In addition, we need to continue to improve our internal systems, processes, and controls to effectively manage our operations and growth, including our international growth into new geographies, particularly the Asia-Pacific and Latin American markets. We are continually investing resources to upgrade and improve our internal systems, processes and controls in order to meet the growing requirements of our business. For example, we have recently upgraded our human resources information systems and our enterprise resource planning systems. Upgrades or improvements to our internal systems, processes, and controls may require us to implement incremental reconciliation or additional reporting measures to evaluate the effectiveness of such upgrade or improvement, or to adopt new processes or procedures in connection with the upgrade or improvement. We may not be able to successfully implement upgrades and improvements to our systems, processes, and controls in an efficient or timely manner, and we may discover deficiencies in existing systems, processes, and controls, which could adversely affect our business. We have licensed technology and utilized support services from various third parties to help us implement upgrades and improvements. We may experience difficulties in managing upgrades and improvements to our systems, processes, and controls or in connection with third-party software, which could disrupt existing customer relationships, causing us to lose customers, limit us to smaller deployments of our products, or increase our technical support costs. The support services available for such third-party technology also may be negatively affected by mergers and consolidation in the software industry, and support services for such technology may not be available to us in the future. In addition, we use both on-premise and cloud resources, and any security or other flaws in such resources could have a negative impact on our internal systems, processes, or controls.

We may also need to realign resources from time to time to more efficiently address market or product requirements. To the extent any realignment requires changes to our internal systems, processes, and controls or organizational structure, we could experience disruption in customer relationships, increases in cost, and increased employee turnover. Furthermore, as we expand our geographic presence and capabilities, we may also need to implement additional or enhance our existing systems, processes and controls to ensure compliance with U.S. and international laws.

Changes in existing financial accounting standards or practices may adversely affect our results of operations. We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP"). Changes in existing accounting rules or practices, including the possible conversion to unified international accounting standards, new accounting pronouncements, or varying interpretations of current accounting pronouncements could have a significant adverse effect on our results of operations or the manner in which we conduct our business. For example, the adoption of Financial Accounting Standards Board's ("FASB") Accounting Standards Codification 718, Stock Compensation, has had a significant adverse impact on our consolidated results of operations as it has increased our operating expenses and the number of diluted shares

outstanding and reduced our operating income and diluted earnings per share. Further, we may not be able to accurately forecast the effect of stock-based compensation on our operating income, net income, and earnings per share because the underlying assumptions, including volatility, interest rate, and expected life, of the Black-Scholes-Merton option pricing model could vary over time.

In addition, the FASB is currently working together with the International Accounting Standards Board (“IASB”) to converge certain accounting principles and facilitate more comparable financial reporting between companies who are required to follow GAAP and those who are required to follow International Financial Reporting Standards (“IFRS”). These projects may result in different accounting principles under GAAP, which may have a material impact on the way in which we report financial results in areas including, but not limited to, principles for revenue recognition and lease accounting. A change in existing financial accounting standards or practices may even retroactively adversely affect previously reported transactions. It is not clear if we have the proper systems and controls in place to accommodate such changes.

Table of Contents

The price of our common stock fluctuates as a result of factors other than our operating results, such as volatility in the capital markets and the actions of our competitors and securities analysts, as well as developments in our industry and changes in accounting rules.

The market price for our common stock has experienced significant fluctuations and may continue to fluctuate significantly. The market price for our common stock may be affected by a number of factors other than our operating results, including:

- volatility in the capital markets;
- the announcement of new products or product enhancements by our competitors;
- quarterly variations in our competitors' results of operations;
- changes in earnings estimates and recommendations by securities analysts;
- developments in our industry; and
- changes in accounting rules.

After periods of volatility in the market price of a particular company's securities, securities class action litigation has often been brought against that particular company. For example, Informatica and certain of our former officers were defendants in a purported class action complaint, which was filed on behalf of certain persons who purchased our common stock between April 29, 1999 and December 6, 2000. Such actions could cause the price of our common stock to decline.

Our credit agreement contains certain restrictions that may limit our ability to operate our business.

In September 2010, we entered into a credit agreement for an unsecured revolving credit facility in an amount of up to \$220.0 million, with an option for us to request to increase the revolving loan commitments by an aggregate amount of up to \$30.0 million with new or additional commitments, for a total credit facility of up to \$250.0 million. No amounts were outstanding under the credit agreement as of December 31, 2013. The credit agreement contains affirmative and negative covenants, including covenants that may limit or restrict our ability to, among other things, incur indebtedness, grant liens, merge or consolidate, dispose of assets, make investments, make acquisitions, enter into hedging agreements, enter into certain transactions with affiliates, pay dividends or make distributions, repurchase stock, enter into restrictive agreements and enter into sale and leaseback transactions, in each case subject to certain exceptions. We are also required to maintain compliance with a consolidated leverage ratio and a consolidated interest coverage ratio. We were in compliance with all covenants under the credit agreement as of December 31, 2013. Our ability to comply with these covenants is dependent on our future performance, which will be subject to many factors, some of which are beyond our control, including prevailing economic conditions. The breach of any of these covenants for any reason could result in an event of default under our credit facility. If such a default occurs, all of our outstanding debt thereunder, if any, could become immediately due and payable, which could result in a default under any other outstanding debt that we may have incurred and could lead to an acceleration of the obligations related to such other outstanding debt. The existence of such a default could preclude us from borrowing funds under our credit facility. Any such default under our credit facility, if not cured or waived, could have a material adverse effect on us. If our cash is utilized to repay any outstanding debt, depending on the amount of debt outstanding, we could experience an immediate and significant reduction in working capital available to operate our business. Even if we are able to comply with all of the applicable covenants under our credit facility, the restrictions on our ability to operate our business could adversely affect our business by, among other things, limiting our ability to take advantage of financings, mergers, acquisitions, investments and other corporate opportunities that may be beneficial to the business.

Our investment portfolio is subject to credit and liquidity risks and fluctuations in the market value of our investments and interest rates, which may result in impairment or loss of value of our investments, an inability to sell our investments or a decline in interest income.

We maintain an investment portfolio, which consists primarily of certificates of deposit, commercial paper, corporate notes and bonds, money market funds, time deposits, municipal securities, U.S. government and agency notes and bonds, and equity securities. Although we follow an established investment policy, which specifies credit quality

standards for our investments and limits the amount of credit exposure to any single issue, issuer, or type of investment, and other criteria in order to help mitigate our exposure to interest rate and credit risk, the assets in our investment portfolio may lose value or become impaired, or our interest income may decline. We may be required to record impairment charges for other-than-temporary declines in fair market value in our investments. Future fluctuations in economic and market conditions could adversely affect the market value of our investments, and we could record additional impairment charges and lose some of the principal value of investments in our portfolio. A total loss of an investment or a significant decline in the value of our investment portfolio could adversely affect our operating results and financial condition. For information regarding interest rate risk, see “Quantitative and Qualitative Disclosures About Market Risk” in Part II, Item 7A of this Report. In addition, from time to time we make investments in private companies. Our investments in private companies are subject to risk of loss of investment capital. Some of these investments may have been made to further our strategic objectives and support our key business initiatives. Our investments in private companies are inherently

Table of Contents

risky because the markets for the technologies they have under development are typically in the early stages and may never materialize. We could lose the value of our entire investment in these companies.

Business interruptions could adversely affect our business.

Our operations are vulnerable to interruption by fire, earthquake, power loss, telecommunications or network failure, and other events beyond our control. We have prepared a detailed disaster recovery plan which includes the use of internal and external resources and will continue to expand the scope over time. Disasters or disruptions, such as the March 2011 earthquake and tsunami off the coast of Japan and the December 2006 earthquake off the coast of Taiwan, can negatively affect our operations given necessary interaction among our international facilities. For example, the December 2006 Taiwan earthquake resulted in a major fiber outage, which affected network connectivity in some of our facilities in Asia. In the event such an earthquake or any other natural disaster or man-made failure occurs, it could disrupt the operations of our affected facilities and recovery of our resources. In addition, we do not carry sufficient business interruption insurance to compensate us for losses that may occur, and any losses or damages incurred by us could have a material adverse effect on our business.

Delaware law and our certificate of incorporation and bylaws contain provisions that could deter potential acquisition bids, which may adversely affect the market price of our common stock, discourage merger offers, and prevent changes in our management or Board of Directors.

Our basic corporate documents and Delaware law contain provisions that might discourage, delay, or prevent a change in the control of Informatica or a change in our management. For example, our bylaws provide that we have a classified board of directors, with each class of directors subject to re-election every three years. A classified board has the effect of making it more difficult for third parties to elect their representatives on our board of directors and gain control of Informatica. Our bylaws also contain advance notice procedures for stockholders to nominate candidates for election as directors or bring matters before a meeting of stockholders. These provisions, among others, could discourage proxy contests and make it more difficult for our stockholders to elect directors and take other corporate actions. The existence of these provisions could limit the price that investors might be willing to pay in the future for shares of our common stock.

Table of Contents

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our corporate headquarters are located in two buildings totaling approximately 290,000 square feet in Redwood City, California, which we purchased in February 2012 and relocated to in the third quarter of 2013. Corporate headquarters are the principal facilities for our administrative, sales, marketing, product development, customer support, and services groups. We also own the associated 11.6 acres of land on which the buildings are located. Prior to the relocation, from January 2005 through August 2013, our corporate headquarters were located in a leased facility in Redwood City, California totaling approximately 159,000 square feet, and we no longer lease this facility.

We also occupy additional leased facilities in the United States, including offices located in Alpharetta, Georgia; Austin and Plano, Texas; Boston, Massachusetts; Chicago and Naperville, Illinois; New York, New York; Raleigh, North Carolina; and Reston, Virginia, which are primarily used for sales, marketing, services, and to a lesser degree, product development. Leased facilities located outside of the United States and used primarily for sales, marketing, customer support, and services include offices in Melbourne and Sydney, Australia; Sao Paulo, Brazil; Toronto, Canada; Beijing, China; Paris, France; Frankfurt, Maxdorf, and Stuttgart, Germany; Mumbai, India; Dublin, Ireland; Tel Aviv, Israel; Tokyo, Japan; Nieuwegein, the Netherlands; Lisbon, Portugal; Singapore; Seoul, South Korea; Barcelona and Madrid, Spain; and London and Maidenhead, United Kingdom.

We also lease facilities in Hyderabad, India, Canberra City, Australia, Toronto, Canada, and St. Petersburg and Kazan, Russia where our offices are primarily used for product development. We also lease a facility in Bangalore, India, which is used primarily for product development, customer support, professional services, finance, and other operations. In addition, we lease office space throughout the world for our local sales and services needs. These leased facilities expire at various times through 2024. We are continually evaluating the adequacy of existing facilities and additional facilities in new cities, and we believe that, if needed, suitable additional space will be available in the future on commercially reasonable terms as needed.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

Price Range of Common Stock

Our common stock is listed on the NASDAQ Global Select Market under the symbol "INFA." The price range per share in the table below reflects the highest and lowest sale prices for our stock as reported by the NASDAQ Global Select Market during the last two fiscal years.

	High	Low
Year Ended December 31, 2013		
Fourth quarter	\$41.50	\$36.40
Third quarter	\$39.93	\$34.75
Second quarter	\$36.86	\$31.15
First quarter	\$37.73	\$30.02
Year Ended December 31, 2012		
Fourth quarter	\$33.63	\$24.90
Third quarter	\$43.37	\$27.49
Second quarter	\$54.15	\$40.02
First quarter	\$53.24	\$35.24

Holders of Record

At January 31, 2014, there were approximately 79 stockholders of record of our common stock, and the closing price per share of our common stock was \$40.36. Since many of our shares of common stock are held by brokers and other institutions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

Dividends

We have never declared or paid cash dividends on our common stock. Because we currently intend to retain all future earnings to finance future growth, we do not anticipate paying any cash dividends in the near future.

Table of Contents

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The following table provides information about the repurchase of our common stock for the quarter ended December 31, 2013.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (in thousands)
October 1 — October 31				
From employees ⁽¹⁾	1,022	\$39.04	—	—
Repurchase program ⁽²⁾	117,018	\$38.35	117,018	\$27,644
November 1 — November 30				
From employees ⁽¹⁾	23,342	\$38.11	—	—
Repurchase program ⁽²⁾	484,367	\$38.70	484,367	\$8,899
December 1 — December 31				
From employees ⁽¹⁾	—	—	—	—
Repurchase program ⁽²⁾	125,839	\$38.94	125,839	\$3,999
Total	751,588	\$38.67	727,224	

(1) The repurchases from employees represent shares cancelled in settlement of employee minimum statutory tax withholding obligations due upon the vesting of restricted stock units.

(2) We repurchased shares in the fourth quarter of fiscal 2013 under our ongoing stock repurchase program. This program does not have a specific expiration date and authorizes repurchases in the open market. As of December 31, 2013, we had \$4.0 million remaining under the program for future share repurchases. In January 2014, we announced that our Board of Directors authorized an additional \$100 million increase to the program. For further information about our stock repurchase program, see the subsection Stock Repurchase Plan in Note 7. Stockholders' Equity of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report.

Five-Year Performance Graph: 2009-2013

The following performance graph shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any filing of Informatica under the Securities Act of 1933, as amended, or the Exchange Act.

The following graph compares the cumulative total return to stockholders of Informatica's common stock with the cumulative total return of the NASDAQ Stock Market (U.S.) Index, the NASDAQ Computer and Data Processing Services Group Index, and the NASDAQ U.S. Benchmark Computer Services TR Index. As a result of a change in the total return data made available to us, we will be replacing the NASDAQ Computer and Data Processing Services Group Index with the NASDAQ U.S. Benchmark Computer Services TR Index in our performance graph.

The graph assumes that \$100 was invested on January 1, 2009 in Informatica's common stock and in each of the indices discussed above, including reinvestment of dividends. Historic stock performance is not necessarily indicative of future stock price performance.

ITEM 6. SELECTED FINANCIAL DATA

The following selected consolidated financial data is qualified in its entirety by, and should be read in conjunction with the consolidated financial statements and the notes thereto included in Part II, Item 8 and Management's Discussion and Analysis of Financial Condition and Results of Operations included in Part II, Item 7 of this Report. The selected consolidated statements of income data and consolidated balance sheet data as of and for each of the five years in the period ended December 31, 2013, have been derived from our audited consolidated financial statements. All share and per share amounts have been adjusted to give retroactive effect to stock splits that have occurred since our inception.

	Years Ended December 31,

(1) As discussed in Note 2 of this report, we revised presentation of revenues and cost of revenues in 2013.

Subscription revenues and cost of subscription revenues were previously presented within Service, and are now included in Software. Subscription revenues of \$29.2 million, \$18.6 million, \$12.0 million, and \$6.9 million for the years end December 31, 2012, 2011, 2010, and 2009, respectively were reclassified from service revenues to

software revenues. Cost of subscription revenues of \$3.4 million, \$3.1 million, \$2.0 million, and \$1.3 million for the years end December 31, 2012, 2011, 2010, and 2009, respectively were reclassified from cost of service revenues to cost of software revenues.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Annual Report on Form 10-K includes “forward-looking statements” within the meaning of the federal securities laws, particularly statements referencing our expectations relating to the productivity of our sales force, license revenues, service revenues, international revenues, deferred revenues, cost of license revenues, cost of service revenues, operating expenses, amortization of acquired technology, stock-based compensation, and provision for income taxes; the growth of our customer base and customer demand for our products and services; the sufficiency of our cash balances and cash flows for the next 12 months; our stock repurchase programs; investment and potential investments of cash or stock to acquire or invest in complementary businesses, products, or technologies; the impact of recent changes in accounting standards; market risk sensitive instruments, contractual obligations; and assumptions underlying any of the foregoing. In some cases, forward-looking statements can be identified by the use of terminology such as “may,” “will,” “expects,” “intends,” “plans,” “anticipates,” “estimates,” “potential,” or “continue,” or the thereof, or other comparable terminology. Although we believe that the expectations reflected in the forward-looking statements contained herein are reasonable, these expectations or any of the forward-looking statements could prove to be incorrect, and actual results could differ materially from those projected or assumed in the forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to risks and uncertainties, including but not limited to the factors set forth in this Report under Part I, Item 1A. Risk Factors. All forward-looking statements and reasons why results may differ included in this Report are made as of the date of the filing of this Report, and we assume no obligation to update any such forward-looking statements or reasons why actual results may differ.

The following discussion should be read in conjunction with our consolidated financial statements and notes thereto appearing in Part II, Item 8 of this Report.

Overview

We are the leading independent provider of data integration software and services. We generate revenues from sales of software licenses, subscription-based licenses, maintenance and support services, and professional services, consisting of consulting and education services.

We receive license revenues from licensing our products under perpetual licenses directly to end users and indirectly through resellers, distributors, and OEMs in the United States and internationally. We also receive an increasing amount of software revenues from our customers and partners under subscription-based licenses for a variety of cloud and address validation offerings. We receive service revenues from maintenance contracts, consulting services, and education services that we perform for customers that license our products either directly or indirectly. Most of our international sales have been in EMEA. Revenues outside of EMEA and North America comprised approximately 10% of total consolidated revenues during 2013 and 2012, and less than 10% during 2011.

During the first quarter of 2013, we performed a review of the presentation of certain of our revenue categories and adopted a revised presentation, which we believe more accurately reflects our evolving product and service offerings. A change was made to rename other revenues to subscription revenues and present subscription revenues and license revenues as software revenues. Other revenues were previously presented in services revenues. A corresponding change was made to present cost of license revenues and cost of other revenues as cost of software revenues. This change in presentation did not affect our total revenues, total cost of revenues or total gross margin. Conforming changes have been made for all prior periods presented. Subscription revenues of \$29.2 million and \$18.6 million for the years ended December 31, 2012, and 2011, respectively, were reclassified

Table of Contents

from service revenues to software revenues. Cost of subscription revenues of \$3.4 million and \$3.1 million for the years ended December 31, 2012 and 2011, respectively, were reclassified from cost of service revenues to cost of software revenues.

We license our software and provide services to many industry sectors, including, but not limited to, automotive, energy and utilities, entertainment/media, financial services, healthcare, high technology, insurance, manufacturing, public sector, retail, services, telecommunications, and travel/transportation. Financial services remains our largest vertical industry sector.

We grew our total revenues in 2013 by 17% to \$948.2 million compared to \$811.6 million in 2012. Our software revenues increased by 18% to \$413.7 million from \$350.2 million in 2012 due to a 14% increase in license revenues and a 60% increase in subscription revenues. The increase in license revenues reflected increases in the average transaction size of license orders and number of transactions in 2013 compared to 2012. The increase in subscription revenues was due to growth in the installed customer base and higher customer demand of subscription offerings. Service revenues increased by 16% year over year due to a 13% growth in maintenance revenues and a 24% increase in consulting and education services. The maintenance revenues growth was attributable to the increased size of our installed customer base, and the increase in consulting and education services revenues was due to higher customer demand for both services.

Due to our dynamic market, we face both significant opportunities and challenges, and as such, we focus on the following key factors:

Competition: Inherent in our industry are risks arising from competition with existing software solutions, including solutions from IBM, Oracle, and SAP, technological advances from other vendors, and the perception of cost savings by solving data integration challenges through customer hand-coding development resources. Our prospective customers may view these alternative solutions as more attractive than our offerings. Additionally, the consolidation activity in our industry poses challenges as competitors market a broader suite of software products or solutions and bundled pricing arrangements to our existing or prospective customers. Moreover, because of current macroeconomic uncertainty, there is increased competition for the allocation of customers' IT budget dollars.

Product Introductions and Enhancements: To address the expanding data integration needs of our customers and prospective customers, we introduce new products and technology enhancements on a regular basis, including products we acquire. The introduction of new products, integration of acquired products and enhancement of existing products, is a complex process involving inherent risks, and to which we devote significant resources. We cannot predict the impact of new or enhanced products on our overall sales and we may not generate sufficient revenues to justify their costs.

Quarterly and Seasonal Fluctuations: Historically, purchasing patterns in the software industry have followed quarterly and seasonal trends that are likely to continue in the future. Specifically, it is normal for us to recognize a substantial portion of our new license orders in the last month of each quarter and sometimes in the last few weeks or days of each quarter, though such fluctuations are mitigated somewhat by recognition of backlog orders. In recent years, the fourth quarter has had the highest level of license revenues and license orders, and we generally had weaker demand for our software products and services in the first and third quarters of the year. The first, second and fourth quarters of 2013, and the first and fourth quarters of 2012 followed these seasonal trends. However, license revenues in the third quarter of 2013 were higher as compared to the first and second quarters of 2013, and license revenues in the second and third quarters of 2012 were lower as compared to the first quarter of 2012. The uncertain macroeconomic conditions and recent changes in our sales organization, particularly the recent transition in our EMEA sales leadership, make our future results more difficult to predict based on historical seasonal trends.

Macroeconomic Conditions: The United States and many foreign economies, particularly in Europe, continue to experience uncertainty driven by varying macroeconomic conditions. Although some of these economies have shown signs of improvement, including in the United States, the macroeconomic environment remains uncertain and uneven. Uncertainty in the macroeconomic environment and associated global economic conditions have resulted in extreme volatility in credit, equity, and foreign currency markets. In particular, economic concerns continue with respect to the

European sovereign debt markets and potential ramifications of any U.S. debt, income tax and budget issues, including future delays in approving the U.S. budget or reductions in government spending. Such uncertainty and associated conditions have also resulted in volatility in several of our vertical markets, particularly financial services and public sectors. These conditions have also adversely affected the buying patterns of customers and our overall pipeline conversion rate, as well as our revenue growth expectations. Furthermore, we have made incremental investments in Asia-Pacific and Latin America, and have continued investing in EMEA. There are significant risks with overseas investments, and our growth prospects in these regions are uncertain.

We focus on a number of key initiatives to address these factors and other opportunities and challenges. These key initiatives include the broadening of our distribution capability worldwide, the enablement of our sales force and distribution channel to sell both our existing products and technologies as well as new products and technologies, the alignment of our worldwide sales and

Table of Contents

field operations with company-wide initiatives and the implementation of a more rigorous sales process, the strengthening of our partnerships, and strategic acquisitions of complementary businesses, products, and technologies. If we are unable to execute these key initiatives successfully, we may not be able to continue to grow our business at our historic growth rates.

We concentrate on maintaining and strengthening our relationships with our existing strategic partners and building relationships with additional strategic partners. These partners include systems integrators, resellers and distributors, and strategic technology partners, including enterprise application providers, database vendors, and enterprise information integration vendors, in the United States and internationally. See “Risk Factors - We rely on our relationships with our strategic partners. If we do not maintain and strengthen these relationships, our ability to generate revenue and control expenses could be adversely affected, which could cause a decline in the price of our common stock” in Part I, Item 1A of this Report.

We have broadened our distribution efforts, and we have continued to expand our sales both in terms of traditional data warehousing products and more strategic data integration solutions beyond data warehousing, including cloud data integration, data quality, information lifecycle management, data exchange, and master data management, among others. We also operate the Informatica Marketplace, which allows buyers and sellers to share and leverage data integration solutions. To address the risks of introducing new products or enhancements to our existing products, we have continued to invest in programs to help train our internal sales force and our external distribution channel on new product functionalities, key differentiators, and key business values. These programs include user conferences for customers and partners, our annual sales kickoff conference for all sales and key marketing personnel, “webinars” and other informational seminars and materials for our direct sales force and indirect distribution channel, in-person technical seminars for our pre-sales consultants, the building of product demonstrations, and creation and distribution of targeted marketing collateral.

We continue to implement changes in our worldwide sales, marketing and field operations to address recent sales execution challenges and improve performance, particularly with respect to our pipeline generation and management capabilities, the reliability of our pipeline estimates and our pipeline conversion rates. In addition to the leadership transitions in our international sales organizations and continued investment in our sales specialists and domain experts, we have also implemented pipeline generation and management initiatives and more rigorous sales planning and processes. Additionally, we have expanded our international sales presence in recent years by opening new offices, increasing headcount, and through acquisitions. As a result of these changes and our international expansion, as well as the increase in our direct sales headcount in the United States, our sales and marketing expenses have increased. As our products become more complex and we target new customers for our software and services, we expect to broaden our go-to-market initiatives and, as a result, our expenses may increase. In the long term, we expect these investments to result in increased revenues and productivity and ultimately higher profitability. As we continue to implement further changes, we may experience increased sales force turnover and additional disruption to our ongoing operations. These changes may also take longer to implement than expected, which may adversely affect our sales force productivity. If we experience an increase in sales personnel turnover, do not achieve expected increases in our sales pipeline, experience a decline in our sales pipeline conversion ratio, or do not achieve increases in sales productivity and efficiencies from our new sales personnel as they gain more experience, then it is unlikely that we will achieve our expected increases in revenue, sales productivity, or profitability.

For further discussion regarding these and related risks, see Risk Factors in Part I, Item 1A of this Report.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with generally accepted accounting principles (“GAAP”) in the United States, which require us to make estimates, judgments, and assumptions. We believe that the estimates, judgments, and assumptions upon which we rely are reasonable based upon information available to us at the time that these assumptions, judgments, and estimates are made. These estimates, judgments, and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported

amounts of revenues and expenses during the periods presented. Any material differences between these estimates and actual results will impact our consolidated financial statements. On a regular basis, we evaluate our estimates, judgments, and assumptions and make changes accordingly. We also discuss our critical accounting estimates with the Audit Committee of the Board of Directors. We believe that the estimates, judgments, and assumptions involved in the accounting for revenue recognition, income taxes, business combinations, impairment of goodwill and intangible assets, stock-based compensation, and allowance for doubtful accounts have the greatest potential impact on our consolidated financial statements, so we consider these to be our critical accounting policies. We discuss below the critical accounting estimates associated with these policies. Historically, our estimates, judgments, and assumptions relative to our critical accounting policies have not differed materially from actual results. See Note 2. Summary of Significant Accounting Policies of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report for further information on our significant accounting policies.

Table of Contents

Revenue Recognition

The basis for recognizing our revenue is determined by ASC 985-605, Software Revenue Recognition, ASC 605-25, Multiple Element Arrangements, ASC 605-35, Revenue Recognition for Construction-Type and Production-Type Contracts, and the Securities and Exchange Commission's Staff Accounting Bulletin ("SAB") 104, Revenue Recognition, which is discussed in the subsection Revenue Recognition in Note 2. Summary of Significant Accounting Policies of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report. The accounting rules related to revenue recognition are complex and require management to make significant judgments. We derive revenues from sales of software licenses, subscription-based licenses for a variety of cloud and address validation offerings, maintenance and support services (which entitle the customer to receive product support and unspecified software updates), and professional services, consisting of consulting and education services. We recognize revenue applying the basic revenue recognition criteria when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is probable. In applying these criteria to sales transactions, we must exercise judgment and use estimates to determine the amount of software and services revenue to be recognized at each period.

We enter into multiple element arrangements that contain software and software-related elements, such as software licenses, subscription-based licenses for address validation offerings, maintenance and support, consulting, and education services. We use the residual method to allocate revenue to the software license and recognize license revenue upon delivery when vendor-specific objective evidence ("VSOE") of fair value exists for all undelivered elements of the arrangement. If VSOE does not exist for any undelivered software product element of the arrangement, all revenue is deferred until all elements have been delivered, or VSOE is established. If VSOE does not exist for any undelivered services elements of the arrangement, all revenue is recognized ratably over the period that the services are expected to be performed. We are required to exercise judgment in determining if VSOE exists for each undelivered element.

We enter into multiple element arrangements that contain both software, such as software licenses, and deliverables not within the scope of ASC 985-605, such as cloud offerings. We first allocate the total arrangement consideration based on the relative selling prices of the software group of elements as a whole, and to the elements not within the scope of ASC 985-605. The allocation of arrangement consideration is based on the selling price hierarchy, which includes (i) VSOE if available, (ii) third party evidence ("TPE") if VSOE is not available, or (iii) estimated selling price ("ESP") if neither VSOE nor TPE is available. We then further allocate consideration within the software group to the respective elements within that group following the guidance in ASC 985-605. Revenue allocated to each element is then recognized when the basic revenue recognition criteria are met for each element as described above. We establish VSOE for each element based on the price charged when an element is sold separately. In certain limited instances, we are not able to establish VSOE for all deliverables in an arrangement with multiple elements. This may be due to the infrequent selling of each element separately, not pricing products or services within a narrow range, or only having a limited sales history.

For multiple element arrangements that contain both software and deliverables not within the scope of ASC 985-605, when VSOE cannot be established for deliverables not within the scope of ASC 985-605, we attempt to establish a selling price based on TPE. TPE is determined based on competitor prices for similar deliverables when sold separately. When we are unable to establish a selling price using VSOE or TPE, we use ESP in our allocation of the arrangement consideration. We determine ESP by reviewing historical transactions, including transactions whereby the deliverable was sold on a standalone basis and considering several other external and internal factors including, but not limited to, pricing practices including discounting levels dependent on the size of transactions, whether an order represents an upgrade of a previous order and the type of customer. The determination of ESP is made through consultation with our management, taking into consideration our pricing practices and go-to-market strategy. As our, or our competitors', pricing and go-to-market strategies evolve, we may modify our pricing practices in the future, which could result in changes to our determination of VSOE, TPE and ESP. As a result, our future revenue recognition for multiple-element arrangements could differ materially from our results in the current period. Selling

prices are analyzed on a quarterly basis or more frequently if we experience significant changes in our selling prices. Subscription revenues, primarily consisting of revenues from customers and partners under subscription-based licenses for a variety of cloud and address validation offerings, are recognized ratably over the subscription term. Maintenance revenues, which consist of fees for ongoing support and product updates, if and when available, are recognized ratably over the term of the contract, typically one year.

Consulting revenues are primarily related to configuration, installation, and implementation of our products. These services are generally performed on a time-and-materials basis and, accordingly, revenues are recognized as the services are performed. Occasionally, contracts are on a fixed-fee basis and, accordingly, revenues are recognized on a proportional performance model based on actual services performed. If uncertainty exists about our ability to complete the project, our ability to collect the amounts

Table of Contents

due, or in the case of fixed-fee consulting arrangements, our ability to estimate the remaining costs to be incurred to complete the project, revenue is deferred until the uncertainty is resolved. Consulting services, if included as part of the software arrangement, generally do not require significant modification or customization of the software and are not considered essential to the functionality of the software. If, in our judgment, the software arrangement includes significant modification or customization of the software, then software license revenue is recognized as the consulting services revenue is recognized.

Education service revenues are generated from classes offered at our headquarters, sales and training offices, customer locations, and on-line. Revenues are recognized as the classes are delivered.

We recognize revenues net of applicable sales taxes, financing charges that we have absorbed, and amounts retained by our resellers and distributors, if any. Our agreements do not permit returns, and historically we have not had any significant returns or refunds; therefore, we have not established a sales return reserve at this time.

Accounting for Income Taxes

We use the asset and liability method of accounting for income taxes in accordance with ASC 740, Income Taxes.

Under this method, income tax expenses or benefits are recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of events that have been recognized in our consolidated financial statements or tax returns. The measurement of current and deferred tax assets and liabilities is based on provisions of currently enacted tax laws. The effects of any future changes in tax laws or rates have not been taken into account.

A two-step approach is applied pursuant to ASC 740 in the recognition and measurement of uncertain tax positions taken or expected to be taken in a tax return. The first step is to determine if the weight of available evidence indicates that it is more likely than not that the tax position will be sustained in an audit, including resolution of any related appeals or litigation processes. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement. We recognize interest and penalties related to uncertain tax positions in our income tax provision line of our consolidated statements of income.

As part of the process of preparing consolidated financial statements, we estimate our income taxes and tax contingencies in each of the tax jurisdictions in which we operate prior to the completion and filing of tax returns for such periods. This process involves estimating actual current tax expense together with assessing temporary differences resulting from differing treatment of items, such as deferred revenue, for tax and accounting purposes. These differences result in net deferred tax assets and liabilities. We must then assess the likelihood that the deferred tax assets will be realizable, and to the extent we believe that a deferred tax asset is not likely to be realized, we must establish a valuation allowance. In assessing the need for any additional valuation allowance, we considered all the evidence available to us, both positive and negative, including historical levels of income, legislative developments, expectations and risks associated with estimates of future taxable income, and ongoing prudent and feasible tax planning strategies.

Business Combinations

We record the acquired tangible and intangible assets and liabilities assumed based on their estimated fair values at the acquisition date. Goodwill as of the acquisition date is measured as the excess of consideration transferred and the net of the acquisition fair values of the assets acquired and the liabilities assumed. The valuation process requires management to make significant estimates and assumptions, especially at the acquisition date with respect to intangible assets, support obligations assumed, estimated restructuring liabilities, and pre-acquisition contingencies. Although we believe the estimates and assumptions that we have made are reasonable and appropriate, they are based in part on historical experience and information obtained from management of the acquired companies and are inherently uncertain. The following are some of the examples of critical estimates that we have applied in our acquisitions:

- future expected cash flows from software license sales, subscriptions, support agreements, consulting contracts, other customer contracts, and acquired developed technologies and patents;

expected costs to develop the in-process research and development into commercially viable products and estimated cash flows from the projects when completed;
the acquired company's brand and competitive position as well as assumptions about the period of time the acquired brand will continue to be used in the combined company's product portfolio; and
discount rates.

Unanticipated events and circumstances may occur that may affect the accuracy of our estimates and assumptions.

Table of Contents

In connection with our acquisitions, we estimate the fair value of the support obligations assumed. The estimated fair value of the support obligations is determined utilizing a cost build-up approach. The cost build-up approach determines fair value by estimating the costs related to fulfilling the obligations plus a normal profit margin. The estimated costs to fulfill the support obligations are based on the historical costs related to fulfilling the obligations. The sum of these costs and operating profit approximates, in theory, the amount that we would be required to pay a third party to assume the support obligations.

We expense transaction costs and restructuring expenses related to the acquisition as incurred and identify pre-acquisition contingencies and determine their respective fair values as of the end of the measurement period. We record any adjustments to pre-acquisition contingencies in our operating results in the period in which the adjustment is determined. Furthermore, any adjustments to estimates of acquisition related tax contingencies are recorded to goodwill during the measurement period and in our operating results after the conclusion of the measurement period. Moreover, we identify in-process research and development costs, determine their respective fair values and classify them as an indefinite lived intangible asset until the asset is put to use or deemed to be impaired.

Accounting for Impairment of Goodwill and Intangible Assets

We assess goodwill for impairment annually on October 31 of each year and whenever an event or changes in circumstances indicate that the carrying value of the asset may not be recoverable. Consistent with our determination that we have only one reporting segment, we have determined that there is only one reporting unit and test goodwill for impairment at the entity level. We test goodwill using the two-step process in accordance with ASC 350, Intangibles - Goodwill and Other. In the first step, we compare the carrying amount of the reporting unit to the fair value based on quoted market prices of our common stock. If the fair value of the reporting unit exceeds the carrying value, goodwill is not considered impaired and no further testing is required. If the carrying value of the reporting unit exceeds the fair value, goodwill is potentially impaired and the second step of the impairment test must be performed. In the second step, we would compare the implied fair value of the goodwill, as defined by ASC 350, to its carrying amount to determine the amount of impairment loss, if any. We performed our annual goodwill impairment tests on October 31, 2013, 2012, and 2011 and concluded that there was no impairment.

We evaluate intangible assets, other than goodwill, for impairment whenever events or changes in circumstances indicate that the carrying value of these assets may not be recoverable. Recoverability of these assets is measured by comparison of the carrying amount of an asset to the future undiscounted cash flows attributable to that asset. We measure any amount of impairment based on the difference between the carrying value and the fair value of the impaired asset. We did not recognize any impairment charges of intangible assets in 2013, 2012, and 2011.

We have made assumptions and estimates about future values and remaining useful lives which are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts. Although we believe that the assumptions and estimates that we have made are reasonable and appropriate, different assumptions and estimates could materially impact our reported financial results.

Stock-based Compensation

We account for stock-based compensation in accordance with the provisions of ASC 718, Stock Compensation. Stock-based awards granted include stock options, restricted stock units ("RSUs"), performance-based restricted stock units ("PRSUs"), and stock purchased under our Employee Stock Purchase Plan ("ESPP"). Stock-based compensation expense is measured at the grant date based on the fair value of the awards and is recognized as an expense ratably on a straight line basis over its requisite service period. It requires a certain amount of judgment to select the appropriate fair value model and calculate the fair value of stock-based awards, including estimating stock price volatility and expected life. Further, estimates of forfeiture rates could impact stock-based compensation expense from one period to the next.

We have estimated the expected volatility as an input into the Black-Scholes-Merton valuation formula when assessing the fair value of options granted. Our current estimate of volatility is based upon a blend of average historical and market-based implied volatilities of our stock price. To the extent that the volatility rate in our stock

price increases in the future, our estimates of the fair value of options granted will increase accordingly. We derived our expected life of the options that we granted in 2013 from the historical option exercises, post-vesting cancellations, and estimates concerning future exercises and cancellations for vested and unvested options that remain outstanding. In addition, we apply an expected forfeiture rate in determining the amount of stock-based compensation. We use historical forfeitures to estimate our future forfeiture rates.

We recognize the stock-based compensation expense for PRSUs based on the probability of achieving certain performance criteria, as defined in the PRSU agreements. We estimate the number of PRSUs ultimately expected to vest and recognize expense using the graded vesting attribution method over the requisite service period. Changes in our estimates related to probability of

Table of Contents

achieving certain performance criteria and number of PRSUs expected to vest could significantly affect the stock-based compensation expense from one period to the next.

We believe that the estimates that we have used for the calculation of the variables to arrive at stock-based compensation expense are reasonable and appropriate. The assumptions entered into the option valuation model we use to fair value our stock-based awards are subjective estimates, and changes to these estimates will cause the fair value of our stock-based awards and related stock-based compensation expense that we record to vary. We will continue to monitor the historical performance of these variables and will modify our methodology and assumptions in the future as needed.

See Note 8. Stock-based Compensation of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report for a description of the Company's stock-based compensation plans and more information on the assumptions used to calculate the fair value of stock-based compensation.

Allowance for Doubtful Accounts

We make estimates as to the overall collectability of accounts receivable and provide an allowance for accounts receivable considered uncollectible. We specifically analyze accounts receivable based on historical bad debt experience, customer concentrations, customer credit-worthiness, the age of the receivable, current economic trends, and changes in customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. We record the adjustment in general and administrative expense.

Recent Accounting Pronouncements

For recent accounting pronouncements, see Note 2. Summary of Significant Accounting Policies of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report.

Table of Contents

Results of Operations

The following table presents certain financial data as a percentage of total revenues:

	Years Ended December 31,			
	2013	2012	2011	
Revenues:				
Software	44	% 43	% 47	%
Service	56	57	53

Revenues

Our total revenues increased to \$948.2 million in 2013 compared to \$811.6 million in 2012, and \$783.8 million in 2011, representing an increase of \$136.6 million (or 17%) in 2013 from 2012 and an increase of \$27.8 million (or 4%) in 2012 from 2011. The increase in 2013 from 2012 was primarily due to an increase in license revenues resulting from increases in average transaction size and the number of transactions in 2013 as compared to 2012, as well as an increase in maintenance revenues as a result of growth in our customer installed base. The increase in 2012 from 2011 was primarily due to an increase in maintenance revenues as a result of growth in our customer installed base, partially offset by a decrease in license revenues as a result of reduced number of license transactions.

Table of Contents

The following table and discussion compare our revenues for the three years ended December 31, 2013 (in thousands, except percentages):

	Years Ended December 31,			Percentage Change		
	2013	2012	2011	2012	2011	
				to	to	
				2013	2012	
Software revenues:						
License	\$367,074	\$320,982	\$353,664	14	% (9)%
Subscription	46,664	29,193	18,565	60	% 57	%
Total software revenues	413,738	350,175	372,229	18	% (6)%
Service revenues:						
Maintenance	409,325	360,769	314,043	13	% 15	%
Consulting and education	125,108	100,627	97,507	24	% 3	%
Total service revenues	534,433	461,396	411,550	16	% 12	%
Total revenues	\$948,171	\$811,571	\$783,779	17	% 4	%

Software Revenues

Our software revenues were \$413.7 million (or 44% of total revenues) in 2013 compared to \$350.2 million (or 43% of total revenues) in 2012, and \$372.2 million (or 47% of total revenues) in 2011, representing an increase of \$63.6 million (or 18%) in 2013 from 2012, and a decline of \$22.1 million (or 6%) in 2012 from 2011.

License Revenues

Our license revenues were \$367.1 million (or 39% of total revenues) in 2013 compared to \$321.0 million (or 40% of total revenues) in 2012, and \$353.7 million (or 45% of total revenues) in 2011, representing an increase of \$46.1 million (or 14%) in 2013 from 2012, and a decline of \$32.7 million (or 9%) in 2012 from 2011. The increase in license revenues in 2013 from 2012 was primarily due to an increase in the number of transactions and the average transaction size of license orders. The decrease in license revenues in 2012 from 2011 was primarily due to a decrease in the number of license transactions as a result of a decline in our pipeline conversion rate, and due to the factors discussed above in the “Overview” section.

We offer two types of upgrades: (1) upgrades that are not part of the post-contract services for which we charge customers an additional fee, and (2) upgrades that are part of the post-contract services that we provide to our customers at no additional charge, when and if available. The average transaction amount for orders greater than \$100,000 in 2013, including upgrades, for which we charge customers an additional fee, increased to \$484,000 from \$451,000 and \$430,000 in 2012 and 2011, respectively. The number of transactions greater than \$1.0 million increased to 89 in 2013 from 65 in 2012 and 66 in 2011.

Subscription Revenues

Subscription revenues, which primarily represent revenues from customers and partners under subscription-based licenses for a variety of cloud and address validation offerings, increased to \$46.7 million (or 5% of total revenues) in 2013 compared to \$29.2 million (or 4% of total revenues) in 2012, and \$18.6 million (or 2% of total revenues) in 2011. The increases in subscription revenues of \$17.5 million (or 60%) in 2013 from 2012, and \$10.6 million (or 57%) in 2012 from 2011 were primarily due to an increase in the installed base of subscription customers and higher customer demand.

We expect our revenues from subscriptions to increase in 2014 from the 2013 levels primarily due to our growing installed customer base and an anticipated increase in demand for subscription offerings.

Table of Contents

Service Revenues

Our service revenues were \$534.4 million (or 56% of total revenues) in 2013 compared to \$461.4 million (or 57% of total revenues) in 2012, and \$411.6 million (or 53% of total revenues) in 2011, representing growth of \$73.0 million (or 16%) in 2013 from 2012, and \$49.8 million (or 12%) in 2012 from 2011.

Maintenance Revenues

Maintenance revenues increased to \$409.3 million (or 43% of total revenues) in 2013 from \$360.8 million (or 44% of total revenues) in 2012, and \$314.0 million (or 40% of total revenues) in 2011, representing growth of \$48.6 million (or 13%) in 2013 from 2012, and \$46.7 million (or 15%) in 2012 from 2011. The increases in maintenance revenues in 2013 and 2012 were primarily due to the increasing size of our installed customer base, including those customers acquired through our recent acquisitions. See Note 19. Acquisitions of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report.

We expect maintenance revenues to increase in 2014 from the 2013 levels due to our growing installed customer base.

Consulting and Education Revenues

Consulting and education revenues increased to \$125.1 million (or 13% of total revenues) in 2013 from \$100.6 million (or 12% of total revenues) in 2012, and \$97.5 million (or 12% of total revenues) in 2011, representing growth of \$24.5 million (or 24%) in 2013 from 2012, and \$3.1 million (or 3%) in 2012 from 2011. The increases in consulting and education revenues were primarily due to higher customer demand in both services.

We expect our revenues from consulting and education revenues to increase in 2014 from the 2013 levels due to an anticipated increase in demand for consulting services.

International Revenues

Our international revenues were \$305.5 million (or 32% of total revenues) in 2013, \$287.4 million (or 35% of total revenues) in 2012, and \$267.4 million (or 34% of total revenues) in 2011. The increase of \$18.1 million (or 6%) in 2013 from 2012 was primarily due to increases in maintenance revenues in EMEA, Asia and Latin America; increases in consulting revenues in EMEA and Latin America, partially offset by a decrease in Asia; and increases in subscription revenues in EMEA and Asia. Conversely, license revenues decreased in EMEA, partially offset by an increase in Asia. The increase of \$19.9 million (or 7%) in 2012 from 2011 was primarily due to an increase in maintenance and consulting revenues in EMEA, Asia and Latin America, partially offset by a decrease in license revenues in EMEA.

We expect our international revenues as a percentage of total revenues in 2014 to be relatively consistent with, or increase from, the comparable 2013 levels, subject to the continued macroeconomic uncertainty in Europe.

Potential Future Revenues (New Orders, Backlog, and Deferred Revenues)

Our potential future revenues include backlog consisting primarily of (1) product orders (both on a perpetual and subscription basis) that have not shipped as of the end of a given quarter, (2) product orders received from certain distributors, resellers, OEMs, and end users not included in deferred revenues, where revenue is recognized after cash receipt (collectively (1) and (2) above are referred as "aggregate backlog"), and (3) deferred revenues. Our deferred revenues consist primarily of the following: (1) maintenance revenues that we recognize over the term of the contract, typically one year, (2) subscription offerings that are recognized over the period of performance as services are provided, (3) license product orders that have shipped but where the terms of the license agreement contain acceptance language or other terms that require that the license revenues be deferred until all revenue recognition criteria are met or recognized ratably over an extended period, and (4) consulting and education services revenues that have been prepaid but for which services have not yet been performed.

We typically ship products shortly after the receipt of an order, which is common in the software industry, and historically our backlog of license orders awaiting shipment at the end of any given quarter has varied. However, our backlog historically decreases from the prior quarter at the end of the first and third quarters and increases at the end of the fourth quarter. Aggregate backlog and deferred revenues at December 31, 2013 were approximately \$343.2 million compared to \$297.1 million at December 31, 2012. The increase in 2013 was primarily due to an increase in deferred maintenance revenues. The international portion of aggregate backlog and deferred revenues may

fluctuate with changes in foreign currency exchange rates. Aggregate backlog and deferred revenues as of any particular date are not necessarily indicative of future results.

Table of Contents

Cost of Revenues

The following table sets forth, for the periods indicated, our cost of revenues (in thousands, except percentages):

	Years Ended December 31,			Percentage Change		
	2013	2012	2011	2012 to 2013	2011 to 2012	
Cost of software revenues	\$9,838	\$7,844	\$8,121	25	(3))%
Cost of service revenues	149,136	122,798	115,831	21	6	%
Amortization of acquired technology	22,307	21,980	19,503	1	13	%
Total cost of revenues	\$181,281	\$152,622	\$143,455	19	6	%
Cost of software revenues, as a percentage of software revenues	2	% 2	% 2	% —	% —	%
Cost of service revenues, as a percentage of service revenues	28	% 27	% 28	% 1	% (1))%

Cost of Software Revenues

Our cost of software revenues is a combination of costs of license and subscription revenues. Cost of license revenues consists primarily of software royalties, product packaging, documentation, and production costs. Cost of subscription revenues consists primarily of fees paid to third party vendors for hosting services related to our subscription services and royalties paid to postal authorities. Cost of software revenues was \$9.8 million (or 2% of software revenues) in 2013, \$7.8 million (or 2% of software revenues) in 2012, and \$8.1 million (or 2% of software revenues) in 2011. The increase of \$2.0 million (or 25%) in 2013 from 2012 was primarily due to a \$1.1 million increase in software royalties and a \$0.9 million increase in fees paid to third party vendors for hosting services in 2013 compared to 2012.

We expect that our cost of software revenues as a percentage of software revenues in 2014 to be relatively consistent with 2013 levels.

Cost of Service Revenues

Our cost of service revenues is a combination of costs of maintenance, consulting and education services revenues. Our cost of maintenance revenues consists primarily of costs associated with customer service personnel expenses and royalty fees for maintenance related to third-party software providers. Cost of consulting revenues consists primarily of personnel costs and expenses incurred in providing consulting services at customers' facilities. Cost of education services revenues consists primarily of the costs of providing education classes and materials at our headquarters, sales and training offices, and customer locations.

Cost of service revenues was \$149.1 million (or 28% of service revenues) in 2013, \$122.8 million (or 27% of service revenues) in 2012, and \$115.8 million (or 28% of service revenues) in 2011. The increase of \$26.3 million (or 21%) in 2013 from 2012 was primarily due to a \$17.8 million increase in personnel related costs (including stock-based compensation), a \$7.1 million increase in subcontractor services, and a \$1.4 million increase in general overhead costs.

The \$7.0 million (or 6%) increase in 2012 from 2011 was primarily due to a \$5.8 million increase in personnel related costs (including stock-based compensation) and a \$0.4 million increase in reimbursable expenses. The majority of these increases were driven by increased headcount in 2012 compared to 2011.

We expect that our cost of service revenues, in absolute dollars, to increase in 2014 from the 2013 levels, mainly due to headcount increases to support and deliver increased service revenues. We expect, however, the cost of service revenues as a percentage of service revenues in 2014 to remain relatively consistent with 2013 levels.

Table of Contents

Amortization of Acquired Technology

The following table sets forth, for the periods indicated, our amortization of acquired technology (in thousands, except percentages):

	Years Ended December 31,			Percentage Change	
	2013	2012	2011	2012 to 2013	2011 to 2012
Amortization of acquired technology	\$22,307	\$21,980	\$19,503	1%	13%

Amortization of acquired technology is the amortization of technologies acquired through business acquisitions and technology licenses. Amortization of acquired technology totaled \$22.3 million, \$22.0 million, and \$19.5 million in 2013, 2012, and 2011, respectively. The \$0.3 million (or 1%) increase in 2013 from 2012 was primarily due to \$1.4 million increase in amortization of certain technologies from the acquisition of Active Endpoints in 2013, partially offset by a \$1.1 million decrease in amortization of developed technology acquired before 2013. The \$2.5 million (or 13%) increase in 2012 from 2011 is the result of amortization of certain technologies that we acquired from the acquisitions of ActiveBase, WisdomForce Technologies, Sand Technology, Data Scout Solutions, and TierData. We expect the amortization of acquired technology to be approximately \$13.0 million in 2014 before the effect of any potential future acquisitions subsequent to December 31, 2013.

Operating Expenses

Research and Development

The following table sets forth, for the periods indicated, our research and development expenses (in thousands, except percentages):

	Years Ended December 31,			Percentage Change	
	2013	2012	2011	2012 to 2013	2011 to 2012
Research and development	\$165,875	\$143,607	\$132,528	16%	8%

Our research and development expenses consist primarily of salaries and other personnel-related expenses, consulting services, facilities, and related overhead costs associated with the development of new products, enhancement and localization of existing products, quality assurance, and development of documentation for our products. Research and development expenses were \$165.9 million (or 17% of total revenues), \$143.6 million (or 17% of total revenues), and \$132.5 million (or 17% of total revenues) for the years ended December 31, 2013, 2012, and 2011, respectively. All software development costs have been expensed in the period incurred since the costs incurred subsequent to the establishment of technological feasibility have not been significant.

The \$22.3 million (or 16%) increase in 2013 from 2012 was primarily due to a \$18.6 million increase in personnel-related costs (including stock-based compensation) as a result of increased headcount and a \$3.7 million increase in general overhead costs.

The \$11.1 million (or 8%) increase in 2012 from 2011 was primarily due to a \$9.6 million increase in personnel-related costs (including stock-based compensation) as a result of increased headcount and a \$1.5 million increase in general overhead costs.

We expect research and development expenses as a percentage of total revenues in 2014 to be relatively consistent with, or slightly increase from, the comparable 2013 levels.

Table of Contents

Sales and Marketing

The following table sets forth, for the periods indicated, our sales and marketing expenses (in thousands, except percentages):

	Years Ended December 31,			Percentage Change		
	2013	2012	2011	2012	2011	
				to 2013	to 2012	
Sales and marketing	\$374,315	\$305,682	\$278,073	22	% 10	%

Our sales and marketing expenses consist primarily of personnel costs, including commissions and bonuses, as well as costs of public relations, seminars, marketing programs, lead generation, travel, and trade shows. Sales and marketing expenses were \$374.3 million (or 40% of total revenues), \$305.7 million (or 38% of total revenues), and \$278.1 million (or 36% of total revenues) for 2013, 2012, and 2011, respectively.

The \$68.6 million (or 22%) increase from 2012 to 2013 was primarily due to a \$61.5 million increase in personnel-related costs, a \$5.0 million increase in general overhead costs, and a \$2.1 million increase in outside services. Personnel-related costs include salaries, employee benefits, sales commissions, and stock-based compensation. Sales and marketing headcount increased from 968 in 2012 to 1,060 in 2013. The sales and marketing expenses as a percentage of total revenues increased by 2 percentage points in 2013 compared to 2012 primarily due to an increase in headcount and personnel costs, and a decline in sales productivity in 2013.

The \$27.6 million (or 10%) increase from 2011 to 2012 was primarily due to a \$24.1 million increase in personnel-related costs, a \$2.0 million increase in general overhead costs, and a \$1.5 million increase in outside services. The sales and marketing expense as a percentage of total revenues increased by 2 percentage points in 2012 compared to 2011 primarily due to an increase in headcount and personnel costs, and a decline in sales productivity in 2012. Sales and marketing headcount increased from 869 in 2011 to 968 in 2012.

We expect sales and marketing expenses as a percentage of total revenues in 2014 to be relatively consistent with 2013 levels. The sales and marketing expenses as a percentage of total revenues may fluctuate from one period to the next due to the timing of hiring new sales and marketing personnel, our spending on marketing programs, and the level of the commission expenditures, in each period.

General and Administrative

The following table sets forth, for the periods indicated, our general and administrative expenses (in thousands, except percentages):

	Years Ended December 31,			Percentage Change		
	2013	2012	2011	2012	2011	
				to 2013	to 2012	
General and administrative	\$77,641	\$63,616	\$57,373	22	% 11	%

Our general and administrative expenses consist primarily of personnel costs for finance, human resources, legal, and general management, as well as professional service expenses associated with recruiting, legal, tax and accounting services. General and administrative expenses were \$77.6 million (or 8% of total revenues), \$63.6 million (or 8% of total revenues), and \$57.4 million (or 7% of total revenues) for the years ended December 31, 2013, 2012, and 2011, respectively.

General and administrative expenses increased by \$14.0 million (or 22%) in 2013 from 2012 due to a \$10.0 million increase in personnel-related costs (including stock-based compensation) and a \$4.0 million increase in general overhead and facilities costs. The increase in personnel-related costs of \$10.0 million was due to headcount growth in 2013 from 2012 and an increase of \$3.3 million in stock-based compensation.

General and administrative expenses increased by \$6.2 million (or 11%) in 2012 from 2011 due to a \$4.5 million increase in personnel-related costs (including stock-based compensation), a \$1.3 million increase in general overhead costs, and a \$0.4 million increase in the provision for doubtful accounts. The increase in personnel-related costs of \$4.5 million was due to headcount growth in 2012 from 2011 and an increase of \$1.3 million in stock-based compensation.

Table of Contents

We expect general and administrative expenses as a percentage of total revenues in 2014 to be relatively consistent with the 2013 levels.

Amortization of Intangible Assets

The following table sets forth, for the periods indicated, our amortization of intangible assets (in thousands, except percentages):

	Years Ended December 31,			Percentage Change	
	2013	2012	2011	2012 to 2013	2011 to 2012
Amortization of intangible assets	\$7,729	\$6,578	\$7,717	17 %	(15)%

Amortization of intangible assets is the amortization of customer relationships and vendor relationships acquired, trade names, covenants not to compete, and patents through prior business acquisitions. Amortization of intangible assets was \$7.7 million, \$6.6 million, and \$7.7 million for the years ended December 31, 2013, 2012, and 2011, respectively.

The increase of \$1.2 million in 2013 in amortization of intangible assets compared to 2012 was primarily due to increases in amortization of intangible assets from the acquisitions of Heiler Software in late 2012 and Active Endpoints in 2013. The decrease of \$1.1 million in 2012 in amortization of intangible assets compared to 2011 was primarily due to decreases in amortization of customer relationships.

We expect amortization of the remaining intangible assets to be approximately \$4.7 million in 2014, before the impact of any amortization for any possible intangible assets acquired as part of any potential future acquisitions.

Facilities Restructuring and Facility Lease Termination Costs (Benefit), Net

The following table sets forth, for the periods indicated, our facilities restructuring and facility lease termination costs (benefit), net (in thousands, except percentages):

	Years Ended December 31,			Percentage Change	
	2013	2012	2011	2012 to 2013	2011 to 2012
Facilities restructuring and facility lease termination costs (benefit), net	\$—	\$710	\$(1,094)	(100)%	(165)%

In February 2012, we purchased the property associated with our former corporate headquarters in Redwood City, California. The purchase of the buildings discharged our future lease obligations that were previously accounted for under the 2001 and 2004 Restructuring Plans. During 2012, we reversed the existing accrued facilities restructuring liability of \$20.6 million and recorded a corresponding facilities restructuring benefit on the consolidated statements of income in accordance with ASC 420, Exit or Disposal Cost Obligations. We also recorded a charge of approximately \$21.2 million representing the cost to terminate the operating lease included in facility lease termination costs, net in the consolidated statements of income.

In 2012, we recorded net facilities restructuring and facility lease termination costs of \$0.7 million for accretion charges related to the 2004 Restructuring Plan of \$0.1 million and an expense of \$21.2 million related to the net cost to settle an existing lease obligation, partially offset by a benefit as a result of the reversal of the existing accrued facilities restructuring liability of \$20.6 million. There were no further activities after the first quarter of 2012.

In 2011, we recorded \$1.1 million of restructuring benefit related to the 2004 and 2001 Restructuring Plans. This benefit included an adjustment of \$2.9 million due to changes in our assumed sublease income, partially offset by a \$1.7 million of accretion charges and a \$0.1 million of tenant improvements amortization charges.

Table of Contents

Acquisitions and Other Charges

The following table sets forth, for the periods indicated, our acquisitions and other charges (in thousands, except percentages):

	Years Ended December 31,			Percentage Change	
	2013	2012	2011	2012 to 2013	2011 to 2012
Acquisitions and other charges	\$2,467	\$2,797	\$1,029	(12)%	172 %

In 2013, acquisition and other charges of \$2.5 million primarily consisted of \$2.9 million in charges for legal, accounting, tax, bankers' and other professional services fees, and \$1.2 million of severance liabilities to former employees of acquirees. This was partially offset by \$1.6 million net benefit for earn-out related adjustments and accretion charges associated with prior acquisitions.

In 2012, acquisition and other charges of \$2.8 million consisted of \$3.3 million charges for legal, bankers' and other professional service fees which was partially offset by a \$0.5 million net benefit for accretion charges, earn-out and holdback related adjustments associated with prior acquisitions.

In 2011, acquisition and other charges of \$1.0 million consisted of a \$0.5 million each for the additional accrual and accretion charges related to earn-outs for prior acquisitions.

Interest and Other Expense, Net

The following table sets forth, for the periods indicated, our interest and other expense, net (in thousands, except percentages):

	Years Ended December 31,			Percentage Change	
	2013	2012	2011	2012 to 2013	2011 to 2012
Interest income	\$3,486	\$3,993	\$4,813	(13)%	(17)%
Interest expense	(462)	(497)	(2,126)	(7)%	(77)%
Other expense, net	(1,165)	(1,688)	(757)	31 %	(123)%
Interest and other expense, net	\$1,859	\$1,808	\$1,930	3 %	(6)%

Interest and other expense, net consists primarily of interest income earned on our cash, cash equivalents, and short-term investments, as well as foreign exchange transaction gains and losses, and interest expenses. Interest and other expense, net was \$1.9 million, \$1.8 million, and \$1.9 million in 2013, 2012, and 2011, respectively.

Income Tax Provision

The following table sets forth, for the periods indicated, our provision for income taxes (in thousands, except percentages):

	Years Ended December 31,			Percentage Change	
	2013	2012	2011	2012 to 2013	2011 to 2012
Income tax provision	\$54,327	\$44,585	\$49,133	22 %	(9)%
Effective tax rate	39 %	32 %	29 %	7 %	3 %

Our effective tax rates were 39%, 32%, and 29% for 2013, 2012, and 2011, respectively. The higher tax rate for 2013 was primarily attributable to non-deductible stock-based compensation, state income taxes, the accrual of reserves related to uncertain tax positions and acquisition integration-related income tax expenses resulted in higher taxes in our foreign earnings partially

Table of Contents

offset by the domestic manufacturing deduction pursuant to Section 199 of the Internal Revenue Code and the recognition of the 2012 and 2013 federal research and development credits.

Due to the expiration of the research and development credit in 2012, we were unable to recognize any benefit during 2012. This credit was reinstated retroactively in January 2013. Due to the timing of the enactment, we recognized the entire benefit of the 2012 credit in the first quarter of 2013. As of December 31, 2013, net undistributed earnings from our foreign subsidiaries are continued to be indefinitely reinvested and no provision for U.S. income taxes has been provided thereon.

The effective tax rate of 32% for 2012 and 29% for 2011 differed from the federal statutory rate of 35% primarily due to benefits of foreign earnings in lower-tax jurisdictions, the domestic manufacturing deduction and the benefit of foreign tax credits, partially offset by non-deductible stock-based compensation, state income taxes, acquisition related items, and the accrual of reserves related to uncertain tax positions. The benefit of the 2012 research and development credit was recognized in the first quarter of 2013 due to the timing of enactment.

We are a U.S.-based multinational company subject to tax in various U.S. and foreign tax jurisdictions. This fact causes our tax rate to be sensitive to the geographic mix of our business. A significant portion of our foreign earnings for the current fiscal year were earned by Netherlands and other European subsidiaries. Our results of operations will continue to be adversely affected to the extent that our geographical mix of income becomes more weighted toward jurisdictions with higher tax rates and will be favorably affected to the extent the relative geographic mix shifts to lower tax jurisdictions. Any change in our mix of earnings is dependent upon many factors and is therefore difficult to predict.

Our effective tax rate in 2014 will be highly dependent on the result of our global operations, the execution of business combinations, the outcome of various tax audits and any changes in applicable tax laws. For example, our effective tax rate has historically benefited from the federal research and development tax credit. This credit is currently expired for 2014 and has not yet been reinstated. Further, the geographic mix of earnings is impacted by the fluctuation in currency exchange rates between the U.S. dollar and the functional currencies of our foreign subsidiaries.

Liquidity and Capital Resources

We have funded our operations primarily through cash flows from operations and equity and debt offerings in the past. As of December 31, 2013, we had \$677.4 million in available cash and cash equivalents and short-term investments. Our primary sources of cash are the collection of accounts receivable from our customers and proceeds from the exercise of stock options and stock purchased under our employee stock purchase plan. In addition, as of December 31, 2013, we had \$220.0 million available for borrowing under the Credit Agreement discussed below. Our uses of cash include payroll and payroll-related expenses and operating expenses such as marketing programs, travel, professional services, and facilities and related costs. We have also used cash to purchase property and equipment, repurchase common stock from the open market to reduce the dilutive impact of stock option issuances, and acquire businesses and technologies to expand our product offerings. In February 2012, we purchased the property associated with our former corporate headquarters located in Redwood City, California, for approximately \$148.6 million in cash.

The following table summarizes our cash flows for 2013, 2012, and 2011 (in thousands):

	Years Ended December 31,		
	2013	2012	2011
Cash provided by operating activities	\$201,150	\$200,501	\$174,475
Cash used in investing activities	\$(71,440)	\$(290,098)	\$(69,155)
Cash provided by (used in) financing activities	\$(23,781)	\$(37,784)	\$6,965

Operating Activities: Cash provided by operating activities in 2013 was \$201.2 million, representing an increase of \$0.6 million from 2012. This increase resulted primarily from a \$22.3 million increase in accrued facilities restructuring charges, a \$17.8 million increase in accounts payable and accrued liabilities, an \$11.4 million increase in

deferred revenues and an \$8.0 million increase in income taxes payable, which were partially offset by a \$40.7 million increase in accounts receivable, a \$10.2 million increase in prepaid expenses and other assets, a \$6.8 million decrease in net income, and a \$1.2 million decrease in adjustments for non-cash expenses. We recognized excess tax benefits from stock-based compensation of \$27.5 million during the year ended December 31, 2013. This amount is recorded as a use of cash in operating activities and an offsetting amount is recorded as a source of cash provided by financing activities. We made net cash payments for taxes in different jurisdictions of

Table of Contents

\$42.7 million during the year ended December 31, 2013. Our “days sales outstanding” in accounts receivable was 67 days at both December 31, 2012 and December 31, 2013.

Cash provided by operating activities in 2012 was \$200.5 million, representing an increase of \$26.0 million from 2011. This increase resulted primarily from a \$13.8 million increase in adjustments for non-cash expenses, a \$37.0 million decrease in accounts receivable, and a \$30.8 million decrease in prepaid expenses and other assets, which were partially offset by a \$24.3 million decrease in net income, an \$11.5 million decrease in accounts payable and accrued liabilities, a \$10.5 million decrease in income taxes payable, and a \$9.6 million decrease in accrued facilities restructuring charges. We recognized excess tax benefits from stock-based compensation of \$17.0 million during the year ended December 31, 2012. This amount is recorded as a use of cash in operating activities and an offsetting amount is recorded as a source of cash provided by financing activities. We made net cash payments for taxes in different jurisdictions of \$31.2 million during the year ended December 31, 2012. Our “days sales outstanding” in accounts receivable decreased from 71 days at December 31, 2011 to 67 days at December 31, 2012 due to stronger collections in the fourth quarter of 2012, compared to 2011.

Cash provided by operating activities in 2011 was \$174.5 million, representing an increase of \$42.6 million from 2010. This increase resulted primarily from a \$31.2 million increase in net income, a \$7.8 million increase in adjustments for non-cash expenses, a \$1.8 million increase in deferred revenues, and a \$29.8 million increase in income taxes payable, which were partially offset by a \$0.7 million increase in accounts receivable, a \$20.8 million increase in prepaid expenses and other assets, and a \$6.5 million decrease in accounts payable and accrued liabilities. We recognized excess tax benefits from stock-based compensation of \$30.0 million during the year ended December 31, 2011. This amount is recorded as a use of cash in operating activities and an offsetting amount is recorded as a source of cash provided by financing activities. We made net cash payments for taxes in different jurisdictions of \$7.1 million during the year ended December 31, 2011. Our “days sales outstanding” in accounts receivable increased from 68 days at December 31, 2010 to 71 days at December 31, 2011 due to a higher amount of billings which occurred toward the end of 2011, compared to 2010.

Investing Activities: Net cash used in investing activities was \$71.4 million in 2013 due to \$367.6 million of purchases of investments, \$7.5 million used for acquisitions of businesses, net of cash acquired, \$26.5 million in purchases of property and equipment and \$0.4 million in purchase of developed technology. These amounts were partially offset by cash provided from the maturities of investments of \$188.0 million and sales of investments of \$144.6 million.

Net cash used in investing activities was \$290.1 million in 2012. In February 2012, we purchased the property associated with our former corporate headquarters located in Redwood City, California, for approximately \$148.6 million in cash, of which \$127.5 million was capitalized under property and equipment in the consolidated balance sheet, and approximately \$21.2 million was recorded in our consolidated statement of income as the net cost to terminate the facility lease. We relocated our corporate headquarters to the purchased property in the third quarter of 2013. We also used cash in purchases of investments of \$266.1 million and acquisitions of businesses of \$90.5 million, net of cash acquired. These amounts were partially offset by cash provided from the sales of investments of \$119.0 million and maturities of investments of \$89.4 million.

Net cash used in investing activities was \$69.2 million in 2011 due to \$351.0 million of purchases of investments, \$33.0 million used for acquisitions of businesses and certain assets, net of cash acquired, and \$12.7 million in purchases of property and equipment. These amounts were partially offset by cash provided from the maturities of investments of \$208.0 million and sales of investments of \$118.9 million.

We acquire property and equipment in our normal course of business. The amount and timing of these purchases and the related cash outflows in future periods depend on a number of factors, including the hiring of employees, the rate of upgrade of computer hardware and software used in our business, as well as our business outlook.

We have identified our investment portfolio as “available for sale,” and our investment objectives are to preserve principal and provide liquidity while maximizing yields without significantly increasing risk. We may sell an investment at any time if the credit rating of the investment declines, the yield on the investment is no longer

attractive, or we need additional cash. We invest only in money market funds, time deposits, and marketable debt securities. We believe that the purchase, maturity, or sale of our investments has no material impact on our overall liquidity.

We have used cash to acquire businesses and technologies that enhance and expand our product offerings, and we anticipate that we will continue to do so in the future. Due to the nature of these transactions, it is difficult to predict the amount and timing of such cash requirements to complete such transactions. We may be required to raise additional funds to complete future acquisitions. In addition, we may be obligated to pay certain variable and deferred earn-out payments based upon achievement of certain performance targets.

Table of Contents

In February 2013, we acquired Active Endpoints for approximately \$10.0 million in cash. Approximately \$1.5 million of the consideration otherwise payable to former Active Endpoints stockholders was placed into an escrow and held as partial security for certain indemnification obligations. The escrow will remain in place until May 2014.

In 2012, we completed a takeover offer and acquired a majority interest in Heiler Software for an aggregate amount of \$82.1 million, net of cash acquired. As of December 31, 2012, we held approximately 97.7% of the outstanding shares of Heiler Software. The squeeze-out of the remaining shareholders of Heiler Software was effective in the second quarter of 2013, increasing our ownership of Heiler Software to 100 percent. Also in 2012, we acquired DataScout Solutions Group Limited and TierData, Inc. for an aggregate amount of \$8.4 million, net of cash acquired.

Approximately \$1.4 million of the consideration otherwise payable to former Data Scout shareholders was held as partial security for certain indemnification obligations, and will be held back until March 2014. Approximately \$1.4 million of the consideration otherwise payable to former TierData stockholders was held as partial security for certain indemnification obligations, and will be held back until March 2014.

In 2011, we acquired WisdomForce Technologies, Inc., ActiveBase Ltd., and certain assets of Sand Technology Inc. for an aggregate amount of \$33.0 million, net of cash acquired.

During 2013, we made a \$2.0 million investment in a privately-held company. In 2010, we made a \$1.5 million investment in a privately-held company, and from 2011 to 2012, we made additional investments in that company of \$0.6 million. The carrying value of these investments was \$4.1 million at December 31, 2013.

Financing Activities: Net cash used in financing activities in 2013 was \$23.8 million due to repurchases and retirement of our common stock of \$92.1 million, payment of contingent consideration in connection with acquisitions of \$4.2 million, purchase of Heiler Software securities of \$6.4 million, and withholding taxes for restricted stock units net share settlement of \$7.3 million. These amounts were partially offset by \$58.7 million of proceeds received from the issuance of common stock to option holders and participants of our ESPP program and \$27.5 million of excess tax benefits from stock-based compensation.

Net cash used in financing activities in 2012 was \$37.8 million due to repurchases and retirement of our common stock of \$81.0 million, payment of contingent consideration in connection with acquisitions of \$8.1 million, and withholding taxes for restricted stock units net share settlement of \$6.7 million. These amounts were offset by \$41.4 million of proceeds received from the issuance of common stock to option holders and participants of our ESPP program and \$17.0 million of excess tax benefits from stock-based compensation.

Net cash provided by financing activities in 2011 was \$7.0 million due to \$58.7 million of proceeds received from the issuance of common stock to option holders and participants of our ESPP program and \$30.0 million of excess tax benefits from stock-based compensation. These amounts were offset by repurchases and retirement of our common stock of \$74.5 million, withholding taxes for restricted stock units net share settlement of \$6.2 million, and payment of contingent consideration of \$1.0 million.

We receive cash from the exercise of common stock options and the sale of common stock under our employee stock purchase plan ("ESPP"). Although we expect to continue to receive some proceeds from the issuance of common stock to option holders and participants of ESPP in future periods, the timing and amount of such proceeds are difficult to predict and are contingent on a number of factors, including the price of our common stock, the number of employees participating in our stock option plans and our employee stock purchase plan, and overall market conditions.

Our Board of Directors has approved a stock repurchase program for the repurchase of our common stock. Purchases can be made from time to time in the open market and will be funded from our available cash. The primary purpose of these programs is to enhance shareholder value, including to partially offset the dilutive impact of stock based incentive plans. The number of shares to be purchased and the timing of purchases are based on several factors, including the price of our common stock, our liquidity and working capital needs, general business and market conditions, and other investment opportunities. The repurchased shares are retired and reclassified as authorized and unissued shares of common stock. We may continue to repurchase shares from time to time, as determined by management as authorized by the Board of Directors.

Edgar Filing: INFORMATICA CORP - Form 10-K

We repurchased 2,487,957 shares for \$92.1 million, 2,434,647 shares for \$81.0 million, and 1,574,612 shares for \$74.5 million in fiscal 2013, 2012, and 2011, respectively. During 2011, we repurchased \$29.0 million of our Convertible Senior Notes at a cost of \$27.3 million up through its redemption on March 18, 2011. We have \$4.0 million available to repurchase additional shares of our common stock under this program as of December 31, 2013. In January 2014, we announced that our Board authorized an additional \$100 million increase to the program. See Part II, Item 5 of this Report for information regarding the number of shares purchased under the stock repurchase program.

In connection with our acquisitions, we are obligated to pay up to an additional \$4.3 million for certain variable and deferred earn-out payments based upon the achievement of certain performance targets.

Table of Contents

We believe that our cash balances and the cash flows generated by operations will be sufficient to satisfy our anticipated cash needs for working capital and capital expenditures for at least the next 12 months. However, we may be required to raise or desire additional funds for selective purposes, such as acquisitions or other investments in complementary businesses, products, or technologies, and may raise such additional funds through public or private equity or debt financing or from other sources.

Less than 30% of our cash, cash equivalents, and marketable securities are held by our foreign subsidiaries. Our intent is to permanently reinvest our earnings from foreign operations and current plans do not anticipate that we will need funds generated from foreign operations to fund our domestic operations. In the event funds from foreign operations are needed to fund operations in the United States and if U.S. tax has not already been previously provided, we would be required to accrue and pay additional U.S. taxes in order to repatriate these funds.

Credit Agreement

In September 2010, we entered into a Credit Agreement (the "Credit Agreement") that matures in September 2014. The Credit Agreement provides for an unsecured revolving credit facility in an amount of up to \$220.0 million, with an option for us to request to increase the revolving loan commitments by an aggregate amount of up to \$30.0 million with new or additional commitments, for a total credit facility of up to \$250.0 million. No amounts were borrowed in 2013 and 2012. No amounts were outstanding under the Credit Agreement as of December 31, 2013, and a total of \$220.0 million remained available for borrowing. The Credit Agreement contains customary representations and warranties, covenants and events of default, including the requirement to maintain a maximum consolidated leverage ratio of 2.75 to 1.00 and a minimum consolidated interest coverage ratio of 3.50 to 1.00. We were in compliance with all covenants under the Credit Agreement as of December 31, 2013. For further information, see Note 6. Borrowings of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report.

Contractual Obligations and Operating Leases

The following table summarizes our significant contractual obligations, including future minimum lease payments at December 31, 2013, under non-cancelable operating leases with original terms in excess of one year, and the effect of such obligations on our liquidity and cash flows in the future periods (in thousands):

	Payment Due by Period				
	Total	2014	2015 and 2016	2017 and 2018	2019 and Beyond
Operating lease payments	\$48,910	\$10,324	\$18,803	\$10,447	\$9,336

The above commitment table does not include approximately \$29.9 million of long-term income tax liabilities recorded in accordance with ASC 740, Income Taxes. We are unable to make a reasonably reliable estimate of the timing of these potential future payments in individual years beyond 12 months due to uncertainties in the timing of tax audit outcomes. As a result, this amount is not included in the table above. For further information, see Note 12.

Income Taxes of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report.

Contractual Obligations

Purchase orders or contracts for the purchase of certain goods and services are not included in the preceding table. We cannot determine the aggregate amount of such purchase orders that represent contractual obligations because purchase orders may represent authorizations to purchase rather than binding agreements. For the purposes of this table, contractual obligations for purchase of goods or services are defined as agreements that are enforceable and legally binding and that specify all significant terms, including fixed or minimum quantities to be purchased; fixed, minimum, or variable price provisions; and the approximate timing of the transaction. Our purchase orders are based on our current needs and are fulfilled by our vendors within short time horizons. We also enter into contracts for outsourced services; however, the obligations under these contracts were not significant and the contracts generally contain clauses allowing for cancellation without significant penalty. Contractual obligations that are contingent upon the achievement of certain milestones are not included in the table above.

We estimate the expected timing of payment of the obligations discussed above based on current information. Timing of payments and actual amounts paid may be different depending on the time of receipt of goods or services or changes to agreed-upon amounts for some obligations.

Operating Leases

We lease certain office facilities and equipment under non-cancelable operating leases, which expire at various dates through 2024.

Table of Contents

The expected timing of payment of the obligations discussed above is estimated based on current information. Timing of payments and actual amounts paid may be different.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet financing arrangements, transactions, or relationships with “special purpose entities.”

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**Foreign Currency Exchange Rate Risk**

We market and sell our software and services through our direct sales force and indirect channel partners in North America, EMEA, Asia-Pacific, and Latin America. Accordingly, we are subject to exposure from adverse movements in foreign currency exchange rates. The functional currency of our foreign subsidiaries is their local currencies, except for Informatica Cayman Ltd., which uses the Euro as its functional currency. Our exposure to foreign exchange risk is related to the magnitude of foreign net profits and losses denominated in foreign currencies, in particular the Indian rupee, Euro and British pound sterling, as well as our net position of monetary assets and monetary liabilities held by our foreign subsidiaries in their non-functional currencies. These exposures have the potential to produce either gains or losses within our consolidated results. Our foreign operations, however, in most instances act as a natural hedge since both operating expenses as well as revenues are generally denominated in their respective local currency. In these instances, although an unfavorable change in the exchange rate of foreign currencies against the U.S. dollar will result in lower revenues when translated into U.S. dollars, the operating expenses will be lower as well.

Our earnings and cash flows are subject to fluctuations due to changes in foreign currency exchange rates. We use derivative instruments to manage our exposure to fluctuations in certain foreign currency exchange rates which exist as part of ongoing business operations.

Cash Flow Hedge Activities

We enter into certain cash flow hedge programs in an attempt to reduce the impact of certain foreign currency fluctuations. The purpose of these programs is to reduce the volatility of identified cash flow and expenses caused by movement in certain foreign currency exchange rates, in particular, the Indian rupee. Under these programs, the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income (loss) and is reclassified into earnings in the same period or periods during which the hedged forecasted transaction affects earnings.

As of December 31, 2013, the remaining open foreign exchange contracts, carried at fair value, hedge Indian rupee expenses and have a maturity of thirteen months or less. These foreign exchange contracts mature monthly as the foreign currency denominated expenses are paid and any gain or loss is offset against expense.

The table below presents the notional amounts of the foreign exchange forward contracts that we committed to purchase in 2013 for Indian rupees, which were outstanding as of December 31, 2013 (in thousands):

Functional currency	Notional Amount Purchased	
	Foreign Amount	USD Equivalent
Indian rupee	1,910,000	\$ 30,058
	1,910,000	\$ 30,058

We record the effective portion of changes in fair value of these cash flow hedges in accumulated other comprehensive income (loss). When the forecasted transaction occurs, we reclassify the effective portion related gain or loss on the cash flow hedge to operating expenditures. If the hedge program becomes ineffective or if the underlying forecasted transaction does not occur for any reason, or it becomes probable that it will not occur, we reclassify the gain or loss on the related cash flow hedge from accumulated other comprehensive income (loss) to other income (expense) in the consolidated statements of income.

Balance Sheet Hedge Activities

We also enter into foreign exchange contracts to hedge net monetary assets and liabilities that are denominated in currencies other than the functional currency of our subsidiaries. The notional amounts of foreign currency contracts

open at year end were \$2.6 million and \$2.7 million to buy at December 31, 2013 and 2012, respectively. These foreign exchange contracts are carried

47

Table of Contents

at fair value and either did not or no longer qualify for hedge accounting treatment and are not designated as hedging instruments. Changes in the value of the foreign exchange contracts are recognized in other income (expense) and offset the foreign currency gain or loss on the underlying monetary assets or liabilities.

The table below presents the notional amount of the non-designated foreign currency contracts as of December 31, 2013 (in thousands):

Functional currency	Notional Amount Purchased	
	Foreign Amount	USD Equivalent
Indian rupee	147,000	\$2,568
	147,000	\$2,568

See Note 2. Summary of Significant Accounting Policies, Note 9. Accumulated Other Comprehensive Loss, Note 10. Derivative Financial Instruments, and Note 14. Commitments and Contingencies of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report for a further discussion.

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates primarily to our investment portfolio. We do not use derivative financial instruments in our investment portfolio. The primary objective of our investment activities is to preserve principal while maximizing yields without significantly increasing risk. Our investment policy specifies credit quality standards for our investments and limits the amount of credit exposure to any single issue, issuer, or type of investment. Our investments consist of certificates of deposit, commercial paper, corporate notes and bonds, money market funds, time deposits, municipal securities, and U.S. government and agency notes and bonds. All investments are carried at market value, which approximates cost. See Note 3. Cash, Cash Equivalents, and Short-Term Investments of Notes to Consolidated Financial Statements in Part II, Item 8 of this Report.

The following table presents the fair value of cash equivalents and short-term investments that are subject to interest rate risk and the average interest rate as of December 31, 2013 and 2012 (dollars in thousands):

	December 31,		
	2013	2012	
Cash equivalents and short-term investments	\$413,862	\$364,043	
Average rate of return	0.5	% 0.6	%

Our cash equivalents and short-term investments are subject to interest rate risk and will decline in value if market interest rates increase. As of December 31, 2013, we had net unrealized gain of \$0.1 million associated with these securities. If market interest rates were to change immediately and uniformly by 100 basis points from levels as of December 31, 2013, the fair market value of the portfolio would change by approximately \$4.7 million. Additionally, we have the ability to hold our investments until maturity and, therefore, we would not necessarily expect to realize an adverse impact on income or cash flows. At this time, we do not expect a significant change in our average rate of return in 2014.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The following consolidated financial statements, and the related notes thereto, of Informatica Corporation and the Reports of Independent Registered Public Accounting Firm are filed as a part of this Report.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of Informatica Corporation

We have audited Informatica Corporation's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). Informatica Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Report of Management on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Informatica Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Informatica Corporation as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2013 of Informatica Corporation and our report dated February 21, 2014 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of Informatica Corporation

We have audited the accompanying consolidated balance sheets of Informatica Corporation as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2013. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Informatica Corporation at December 31, 2013 and 2012, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Informatica Corporation's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated February 21, 2014 expressed an unqualified opinion thereon.

INFORMATICA CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Organization and Business

Informatica Corporation ("Informatica" or the "Company") was incorporated in California in February 1993 and reincorporated in Delaware in April 1999. The Company is the leading independent provider of data integration software and services. The Company's solutions enable a wide variety of complex, enterprise-wide data integration initiatives through technologies including data integration, data quality, information lifecycle management, data exchange, and master data management.

Note 2. Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned and majority-owned subsidiaries. All intercompany accounts and transactions have been eliminated.

In November 2012, the Company acquired a majority interest in the shares of Heiler Software at the end of the initial acceptance period of the takeover offer. The squeeze-out of the remaining shareholders was effective in the second quarter of 2013, increasing the Company's ownership in Heiler Software to 100 percent. The Company consolidated the financial results of Heiler Software with its financial results beginning in November 2012. The noncontrolling interest position was reported as a separate component of consolidated equity from the equity attributable to the Company's stockholders as of December 31, 2012. The noncontrolling interest in the Company's net income was not significant to consolidated results for the years ended December 31, 2013 and 2012 and therefore has been included as a component of other expense, net in the consolidated statements of income.

Use of Estimates

The Company's consolidated financial statements are prepared in accordance with generally accepted accounting principles ("GAAP") in the United States, which require the Company to make certain estimates, judgments, and assumptions. The Company believes that the estimates, judgments, and assumptions upon which it relies are reasonable based upon information available to it at the time that these estimates, judgments, and assumptions are made. These estimates, judgments, and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. Any material differences between these estimates and actual results will impact the Company's consolidated financial statements. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result.

Reclassifications

During the first quarter of 2013, the Company performed a review of the presentation of certain of its revenue categories and adopted a revised presentation, which the Company believes more accurately reflects its evolving product and service offerings. A change was made to rename other revenues to subscription revenues and present subscription revenues and license revenues as software revenues. Other revenues were previously presented in services revenues. A corresponding change was made to present cost of license revenues and cost of other revenues as cost of software revenues. This change in presentation did not affect total revenues, total cost of revenues or total gross margin. Conforming changes have been made for all prior periods presented. Subscription revenues of \$29.2 million and \$18.6 million for the years ended December 31, 2012, and 2011, respectively, were reclassified from service revenues to software revenues. Cost of subscription revenues of \$3.4 million and \$3.1 million for the years ended December 31, 2012 and 2011, respectively, were reclassified from cost of service revenues to cost of software revenues.

Revenue Recognition

The Company derives its revenues from sales of software licenses, subscription-based licenses for a variety of cloud and address validation offerings, maintenance and support services, and professional services, consisting of consulting and education services. The Company recognizes revenue in accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 985-605, Software Revenue Recognition, ASC 605-25, Multiple Element Arrangements, ASC 605-35, Revenue Recognition for Construction-Type and Production-Type Contracts, the Securities and Exchange Commission's Staff Accounting Bulletin No. 104 (“SAB 104”), Revenue Recognition, and other authoritative accounting literature.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is probable.

Multiple Element Arrangements

The Company enters into multiple element arrangements that contain software and software-related elements, such as software licenses, subscription-based licenses for address validation offerings, maintenance and support, consulting, and education services. The Company uses the residual method to allocate revenue to the software license and recognize license revenue upon delivery when vendor-specific objective evidence (“VSOE”) of fair value exists for all undelivered elements of the arrangement. If VSOE does not exist for any undelivered software product element of the arrangement, all revenue is deferred until all elements have been delivered, or VSOE is established. If VSOE does not exist for any undelivered services elements of the arrangement, all revenue is recognized ratably over the period that the services are expected to be performed.

The Company enters into multiple element arrangements that contain both software, such as software licenses, and deliverables not within the scope of ASC 985-605, such as cloud offerings. The Company first allocates the total arrangement consideration based on the relative selling prices of the software group of elements as a whole, and to the elements not within the scope of ASC 985-605. The allocation of arrangement consideration is based on the selling price hierarchy, which includes (i) VSOE if available, (ii) third party evidence (“TPE”) if VSOE is not available, or (iii) estimated selling price (“ESP”) if neither VSOE nor TPE is available. The Company then further allocates consideration within the software group to the respective elements within that group following the guidance in ASC 985-605. Revenue allocated to each element is then recognized when the basic revenue recognition criteria are met for each element as described above.

The Company establishes VSOE for each element based on the price charged when an element is sold separately. In certain limited instances, the Company is not able to establish VSOE for all deliverables in an arrangement with multiple elements. This may be due to the infrequent selling of each element separately, not pricing products or services within a narrow range, or only having a limited sales history.

For multiple element arrangements that contain both software and deliverables not within the scope of ASC 985-605, when VSOE cannot be established for deliverables not within the scope of ASC 985-605, the Company attempts to establish a selling price based on TPE. TPE is determined based on competitor prices for similar deliverables when sold separately. When the Company is unable to establish a selling price using VSOE or TPE, the Company uses ESP in the allocation of the arrangement consideration. The Company determines ESP by reviewing historical transactions, including transactions whereby the deliverable was sold on a standalone basis and considering several other external and internal factors including, but not limited to, pricing practices including discounting levels dependent on the size of transactions, whether an order represents an upgrade of a previous order and the type of customer. The determination of ESP is made through consultation with the Company's management, taking into consideration the Company's pricing practices and go-to-market strategy.

Software

Under ASC 985-605, revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is probable.

Persuasive evidence of an arrangement exists. The Company determines that persuasive evidence of an arrangement exists when it has a written contract, signed by both the customer and the Company, and written purchase authorization.

Delivery has occurred. Software is considered delivered when title to the physical software media passes to the customer or, in the case of electronic delivery, when the customer has been provided with the access codes to download and operate the software.

Fee is fixed or determinable. The Company considers arrangements with extended payment terms not to be fixed or determinable. The Company also consider factors including financing arrangements, the category of customer (end-user customer, distributor, or reseller), rights of return or refund, and history of enforcing terms and conditions of

customer contracts. If the license fee in an arrangement is not fixed or determinable, revenue is recognized as payments become due or upon cash receipt, whichever is earlier. The Company's standard agreements do not contain product return rights.

Collection is probable. The Company first assesses the credit-worthiness and collectability at a country level based on the country's overall economic climate and general business risk. Then, for the customers in the countries that are deemed credit-worthy, it assesses credit and collectability based on their payment history and credit profile. When a customer is not deemed credit-worthy, revenue is recognized at the time that payment is received.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Company requires evidence of sell-through from resellers and distributors for order acceptance. The Company then recognizes revenue from resellers and distributors upon shipment if all other revenue recognition criteria are met, which in substantially all cases is when cash is collected or when the reseller or distributor is deemed credit-worthy based on their payment history and credit profile to conclude that collectability is probable.

The Company also enters into Original Equipment Manufacturer (“OEM”) arrangements that provide for license fees based on inclusion of technology and/or products in the OEM’s products. These arrangements provide for fixed and irrevocable royalty payments. The Company recognizes royalty payments as revenues based on the royalty report that it receives from the OEMs. In the case of OEMs with fixed royalty payments, revenue is recognized upon execution of the agreement, delivery of the software, and when all other criteria for revenue recognition have been met.

Multiple contracts with a single counterparty executed within close proximity of each other are evaluated to determine if the contracts should be combined and accounted for as a single arrangement. The Company recognizes revenues net of applicable sales taxes, financing charges absorbed by the Company, and amounts retained by our resellers and distributors, if any.

Subscription revenues, primarily consisting of revenues from customers and partners under subscription-based licenses for a variety of cloud and address validation offerings, are recognized ratably over the subscription term.

Services

The Company recognizes maintenance revenues, which consist of fees for ongoing support and product updates, if and when available, ratably over the term of the contract, typically one year.

Consulting revenues are primarily related to configuration, installation, and implementation of our products. These services are generally performed on a time-and-materials basis and, accordingly, revenues are recognized as the services are performed. Occasionally, contracts are on a fixed-fee basis and, accordingly, revenues are recognized on a proportional performance model based on actual services performed. If uncertainty exists about the Company’s ability to complete the project, ability to collect the amounts due, or in the case of fixed-fee consulting arrangements, ability to estimate the remaining costs to be incurred to complete the project, revenue is deferred until the uncertainty is resolved. Consulting services, if included as part of the software arrangement, generally do not require significant modification or customization of the software and are not considered essential to the functionality of the software. If, in the Company’s judgment, the software arrangement includes significant modification or customization of the software, then software license revenue is recognized as the consulting services revenue is recognized.

Education service revenues are generated from classes offered at our headquarters, sales and training offices, customer locations, and on-line. Revenues are recognized as the classes are delivered.

Deferred Revenues

Deferred revenues include deferred license, subscription, maintenance, consulting, and education revenues. For customers not deemed credit-worthy, the Company’s practice is to net unpaid deferred revenue for that customer against the related receivable balance.

Cash and Cash Equivalents

The Company considers highly liquid investment securities with maturities of 90 days or less at the date of purchase to be cash equivalents. Cash equivalents include money market funds, time deposits, and marketable debt securities. Cash and cash equivalents outside of marketable debt securities are stated at cost, which approximates fair value.

Investments

Investments are comprised of time deposits and marketable debt securities. The Company’s marketable debt securities consist primarily of certificates of deposit, commercial paper, corporate notes and bonds, U.S. government and agency notes and bonds, and municipal securities with original maturities beyond 90 days. The Company’s marketable debt securities are classified as available-for-sale and are reported at fair value, with unrealized gains and losses, net of tax, reported as a separate component of accumulated other comprehensive income (loss) in stockholders’ equity. The Company classifies all available-for-sale marketable debt securities, including those with original maturity dates greater than one year, as short-term investments. Realized gains or losses and permanent declines in value, if any, on

available-for-sale securities are reported in other income (expense) as incurred.

58

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Company recognizes realized gains and losses upon sales of investment and reclassifies unrealized gains and losses out of accumulated other comprehensive income (loss) into earnings using the specific identification method. In accordance with ASC 320, Investments - Debt and Equity Securities, the Company periodically evaluates the investments for other-than-temporary impairment. The Company considers factors such as the length of time and extent to which the investment has been in a continuous unrealized loss position, the financial condition and near-term prospects of the issuer, and the Company's intent to sell, or whether it is more likely than not the Company will be required to sell the investment before recovery of the investment's amortized cost basis. The Company also considers industry analysts' reports and credit ratings in evaluating for other-than-temporary impairment. If the Company believes that an other-than-temporary decline exists, the Company will write down the investment to its fair value. During fiscal years 2013, 2012, and 2011, the Company did not consider any investments to be other-than-temporarily impaired.

The Company also has investments in privately-held companies that are accounted for under the cost method and included in other non-current assets. The Company periodically evaluates these investments for other-than-temporary impairment. During fiscal years 2013, 2012, and 2011, the Company did not consider these investments to be other-than-temporarily impaired.

Allowance for Doubtful Accounts

The Company makes estimates as to the overall collectability of accounts receivable and provides an allowance for accounts receivable considered uncollectible. The Company specifically analyzes its accounts receivable based on historical bad debt experience, customer concentrations, customer credit-worthiness, the age of the receivable, current economic trends, and changes in its customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. The Company records the adjustment in general and administrative expense. At December 31, 2013 and 2012, the Company's allowance for doubtful accounts was \$4.1 million and \$5.5 million, respectively.

Property and Equipment

Property and equipment are stated at cost, net of accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets. Building, building improvements, and site improvements are amortized over the estimated useful life of 25 years, 10-15 years and 15 years, respectively. Leasehold improvements are amortized over the shorter of the lease term or the estimated useful life of the asset, which range from one to nine years. Computers and equipment and furniture and fixtures are stated at cost and depreciated using the straight-line method over the estimated useful lives of the assets, generally one to five years.

Software Development Costs

The Company accounts for software development costs in accordance with ASC 985-20, Costs of Software to Be Sold, Leased, or Marketed. Software development costs are expensed as incurred until the establishment of technological feasibility, at which time those costs are capitalized until the product is available for general release to customers and amortized over the estimated life of the product. Technological feasibility is established upon completion of a working model. To date, costs incurred subsequent to the establishment of technological feasibility have not been significant, and all software development costs have been charged to research and development expense in the accompanying consolidated statements of income.

Pursuant to ASC 350-40, Internal - Use Software, the Company capitalizes certain costs relating to software acquired, developed, or modified solely to meet the Company's internal requirements and for which there are no substantive plans to market the software. The Company capitalized \$2.4 million of internal use software costs for the year ended December 31, 2012. There was a negligible amount capitalized during the year ended December 31, 2013. These capitalized costs are depreciated on a straight-line basis over the estimated useful life.

Business Combinations

The Company records the acquired tangible and intangible assets and liabilities assumed based on their estimated fair values at the acquisition date. Goodwill as of the acquisition date is measured as the excess of consideration transferred and the net of the acquisition fair values of the assets acquired and the liabilities assumed. The valuation

process requires management to make significant estimates and assumptions, especially at the acquisition date with respect to intangible assets, support obligations assumed, estimated restructuring liabilities, and pre-acquisition contingencies.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

In connection with the measurement process for acquisitions, the Company estimates the fair value of the support obligations assumed. The estimated fair value of the support obligations is determined utilizing a cost build-up approach by estimating the costs related to fulfilling the obligations plus a normal profit margin. The estimated costs to fulfill the support obligations are based on the historical costs related to fulfilling the obligations. The sum of these costs and operating profit approximates, in theory, the amount that we would be required to pay a third party to assume the support obligations.

The Company expenses transaction costs and restructuring expenses related to the acquisition as incurred. Additionally, the Company identifies pre-acquisition contingencies and determines their respective fair values as of the end of the purchase price allocation period. Any adjustments to pre-acquisition contingencies are recorded in the Company's operating results in the period in which the adjustment is determined. Furthermore, any adjustments to estimates of acquisition related tax contingencies are recorded to goodwill during the measurement period, and in the Company's operating results after the conclusion of the measurement period. Moreover, the Company identifies in-process research and development costs and classifies them as an indefinite lived intangible asset until the asset is put to use or deemed to be impaired.

Goodwill and Indefinite-Lived Intangible Assets

The Company tests goodwill and intangible assets with indefinite useful lives for impairment annually on October 31 of each year and whenever events or changes in circumstances indicate that the carrying value of the asset may not be recoverable in accordance with ASC 350, Intangibles - Goodwill and Other. While the Company is permitted to conduct a qualitative assessment to determine whether it is necessary to perform a two-step quantitative goodwill impairment test, for its annual goodwill impairment test in the fourth quarter of fiscal 2013, the Company performed a quantitative test for its reporting unit.

Consistent with the Company's assessment that it has only one reporting segment, the Company has determined that it has only one reporting unit and tests goodwill for impairment at the entity level. The Company tests its goodwill using the two-step process in accordance with ASC 350. In the first step, the Company compares the carrying amount of the reporting unit to the fair value based on quoted market prices of the Company's common stock. If the fair value of the reporting unit exceeds the carrying value, goodwill is not considered impaired and no further testing is required. If the carrying value of the reporting unit exceeds the fair value, goodwill is potentially impaired and the second step of the impairment test must be performed. In the second step, the Company compares the implied fair value of the goodwill, as defined by ASC 350, to its carrying amount to determine the impairment loss, if any. Recoverability of indefinite-lived intangible assets is measured by comparison of the carrying amount of the asset to the future undiscounted cash flows attributable to that asset.

The Company performed its annual goodwill and indefinite-lived intangible assets impairment tests as of October 31, 2013, 2012, and 2011 and concluded that there was no impairment.

Impairment of Long-Lived Assets

The Company evaluates long-lived assets, which includes amortized intangible assets and tangible assets, for impairment whenever events or changes in circumstances indicate that the carrying value of these assets may not be recoverable. Recoverability of these assets is measured by comparison of the carrying amount of an asset to the future undiscounted cash flows attributable to that asset. The Company measures any amount of impairment based on the difference between the carrying value and the fair value of the impaired asset. The Company did not recognize any impairment charges of long-lived assets in 2013, 2012, or 2011.

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Money Market Funds, Time Deposits, and Marketable Debt Securities

The Company uses a market approach for determining the fair value of all its Level 1 and Level 2 money market funds, time deposits, and marketable debt securities.

To value its money market funds and time deposits, the Company values the funds at \$1 stable net asset value, which is the market pricing convention for identical assets that the Company has the ability to access.

The Company's marketable debt securities consist of certificates of deposit, commercial paper, corporate notes and bonds, municipal securities, and U.S. government and agency notes and bonds. To value its certificates of deposit and commercial paper, the Company uses mathematical calculations to arrive at fair value for these securities, which generally have short maturities and infrequent secondary market trades. For example, in the absence of any observable transactions, the Company may accrete from purchase price at purchase date to face value at maturity. In the event that a transaction is observed on the same security in the marketplace, and the price on that subsequent transaction clearly reflects the market price on that day, the Company will adjust the price to the observed transaction price and follow a revised accretion schedule to determine the daily price.

To determine the fair value of its corporate notes and bonds, municipal securities, and U.S. government and agency notes and bonds, the Company uses a third party pricing source for each security. If the market price is not available from the third party source, pricing from the Company's investment custodian is used.

Foreign Currency Derivatives and Hedging Instruments

The Company uses the income approach to value the derivatives using observable Level 2 market expectations at the measurement date and standard valuation techniques to convert future amounts to a single present value amount, assuming that participants are motivated but not compelled to transact. Level 2 inputs are limited to quoted prices that are observable for the assets and liabilities, which include interest rates and credit risk. The Company uses mid-market pricing as a practical expedient for fair value measurements. Key inputs for foreign currency derivatives are the spot rates, forward rates, interest rates, and credit derivative market rates. The spot rate for each currency is the same spot rate used for all balance sheet translations at the measurement date and is sourced from the Federal Reserve Bulletin. The following values are interpolated from commonly quoted intervals available from Bloomberg: forward points and the London Interbank Offered Rate ("LIBOR") used to discount and determine the fair value of assets and liabilities. Credit default swap spread curves identified per counterparty at month end in Bloomberg are used to discount derivative assets for counterparty non-performance risk, all of which have terms of thirteen months or less. The Company discounts derivative liabilities to reflect the Company's own potential non-performance risk to lenders and has used the spread over LIBOR on its most recent corporate borrowing rate.

The counterparties associated with the Company's foreign currency forward contracts are large credit-worthy financial institutions, and the derivatives transacted with these entities are relatively short in duration; therefore, the Company does not consider counterparty concentration and non-performance to be material risks at this time. Both the Company and the counterparties are expected to perform under the contractual terms of the instruments.

There were no transfers between Level 1 and Level 2 categories during the years ended December 31, 2013 and 2012. See Note 9. Accumulated Other Comprehensive Loss, Note 10. Derivative Financial Instruments, and Note 14.

Commitments and Contingencies of Notes to Consolidated Financial Statements for a further discussion.

Acquisition-related Contingent Consideration

The Company estimated the fair value of the acquisition-related contingent consideration using a probability-weighted discounted cash flow model. This fair value measure was based on significant inputs not observed in the market and thus represented a Level 3 instrument. Level 3 instruments are valued based on unobservable inputs that are supported by little or no market activity and reflect our own assumptions in measuring fair value. There were no transfers into or out of the Level 3 category during the years ended December 31, 2013 and 2012. The change in fair value of acquisition-related contingent consideration is included in acquisitions and other charges in the consolidated statements of income.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The changes in the acquisition-related contingent consideration liability for the year ended December 31, 2013 consisted of the following (in thousands):

	December 31, 2013	
Beginning balance as of December 31, 2012	\$9,230	
Change in fair value of contingent consideration	(1,989)
Payment of contingent consideration	(4,170)
Ending balance as of December 31, 2013	\$3,071	

Fair Value of Assets and Liabilities on a Nonrecurring Basis

The Company has direct investments in privately held companies accounted for under the cost method, which are periodically assessed for other-than-temporary impairment. The carrying value of these investments was \$4.1 million and \$2.1 million at December 31, 2013 and 2012, respectively. If it is determined that an other-than-temporary impairment has occurred, the Company writes down the investment to its fair value. The Company estimates fair value of cost method investments considering available information such as pricing in recent rounds of financing, current cash positions, earnings and cash flow forecasts, recent operational performance, and any other readily available data. During fiscal years 2013, 2012, and 2011, the Company did not consider these investments to be other-than-temporarily impaired.

Fair Value of Financial Instruments, Concentrations of Credit Risk, and Credit Evaluations

The fair value of the Company's cash, cash equivalents, short-term investments, accounts receivable, and accounts payable approximates their respective carrying amounts due to their short-term maturity.

Financial instruments, which subject the Company to concentrations of credit risk, consist primarily of cash, cash equivalents, investments in time deposits and marketable debt securities, and trade accounts receivable. The Company maintains its cash and cash equivalents and investments with financial institutions with high credit standing.

The Company performs ongoing credit evaluations of its customers and generally does not require collateral. The Company makes judgments as to its ability to collect outstanding receivables and provide allowances for the portion of receivables when collection becomes doubtful. Provisions are made based upon a specific review of all significant outstanding invoices. For those invoices not specifically reviewed, provisions are provided at differing rates, based upon the age of the receivable. In determining these percentages, the Company analyzes its historical collection experience and current economic trends. If the historical data it uses to calculate the allowance for doubtful accounts does not reflect the future ability to collect outstanding receivables, additional provisions for doubtful accounts may be needed and the future results of operations could be materially affected. The Company evaluates its counterparties associated with the Company's foreign exchange forward contracts at least quarterly as part of its cash flow hedge program. Since all these counterparties are large credit-worthy commercial banking institutions, the Company does not consider counterparty non-performance to be a material risk.

Stock-based Compensation

The Company accounts for stock-based compensation in accordance with the provisions of ASC 718, Stock Compensation. Stock-based awards granted include stock options, restricted stock units ("RSUs"), performance-based restricted stock units ("PRSUs"), and stock purchased under the Company's Employee Stock Purchase Plan.

Stock-based compensation expense for stock options, RSUs, and stock purchased under the Employee Stock Purchase Plan is measured at the grant date based on the fair value of the awards and is recognized as an expense ratably on a straight line basis over the requisite service period. See Note 8. Stock-based Compensation for a description of the Company's stock-based compensation plans and more information on the assumptions used to calculate the fair value of stock-based awards.

Stock-based compensation expense is recognized for PRSUs based on the probability of achieving certain performance criteria, as defined in the PRSU agreements. The Company estimates the number of PRSUs ultimately expected to vest and recognizes expense using the graded vesting attribution method over the requisite service period.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Shipping and Handling Costs

Shipping and handling costs in connection with our packaged software products are not material and are expensed as incurred in cost of software revenues in the Company's consolidated statements of income.

Advertising Expense

Advertising costs are expensed as incurred. Advertising expenses were negligible for the years ended December 31, 2013, 2012, and 2011.

Income Taxes

The Company uses the asset and liability method of accounting for income taxes in accordance with ASC 740, Income Taxes. Under this method, income tax expenses or benefits are recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of events that have been recognized in the Company's consolidated financial statements or tax returns. The measurement of current and deferred tax assets and liabilities is based on provisions of currently enacted tax laws. The effects of future changes in tax laws or rates are not contemplated.

A two-step approach is applied pursuant to ASC 740 in the recognition and measurement of uncertain tax positions taken or expected to be taken in a tax return. The first step is to determine if the weight of available evidence indicates that it is more likely than not that the tax position will be sustained in an audit, including resolution of any related appeals or litigation processes. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement. We recognize interest and penalties related to uncertain tax positions in our income tax provision line of our consolidated statements of income.

As part of the process of preparing consolidated financial statements, we estimate our income taxes and tax contingencies in each of the tax jurisdictions in which we operate prior to the completion and filing of tax returns for such periods. This process involves estimating actual current tax expense together with assessing temporary differences resulting from differing treatment of items, such as deferred revenue, for tax and accounting purposes. These differences result in net deferred tax assets and liabilities. We must then assess the likelihood that the deferred tax assets will be realizable, and to the extent we believe that a deferred tax asset is not likely to be realized, we must establish a valuation allowance. In assessing the need for any additional valuation allowance, we considered all the evidence available to us, both positive and negative, including historical levels of income, legislative developments, expectations and risks associated with estimates of future taxable income, and ongoing prudent and feasible tax planning strategies.

Reporting Segments

ASC 280, Segment Reporting, establishes standards for the manner in which public companies report information about operating segments in annual and interim financial statements. It also establishes standards for related disclosures about products and services, geographic areas, and major customers. The method for determining the information to report is based on the way management organizes the operating segments within the Company for making operating decisions and assessing financial performance.

The Company's chief operating decision maker is the chief executive officer, who reviews financial information presented on a consolidated basis, accompanied by disaggregated information about revenues by revenue stream and geographic region for purposes of making operating decisions and assessing financial performance. On this basis, the Company is organized and operates in a single segment: the design, development, marketing, and sales of software solutions.

Recent Accounting Pronouncements

In December 2011, the FASB issued Accounting Standard Update ("ASU") No. 2011-11, Balance Sheet (Topic 210) - Disclosures about Offsetting Assets and Liabilities. ASU 2011-11 requires an entity to disclose additional information about offsetting and related arrangements to enable users of the financial statements to understand the effect of those arrangements on the financial position. In January 2013, the FASB issued ASU No. 2013-01, Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities, which clarifies that the scope of ASU 2011-11 applies to

derivatives accounted for in accordance with Topic 815, Derivatives and Hedging, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset or subject to an enforceable master

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

netting arrangement. The Company adopted both standards as required on January 1, 2013 and adoption did not impact the Company's consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, Comprehensive Income (Topic 220) - Reporting of Amounts Reclassified Out Of Accumulated Other Comprehensive Income. ASU 2013-02 requires an entity to present, either on the face of its statement where net income is presented or in a note, the effect of significant reclassifications out of accumulated other comprehensive income if the amount being reclassified is required under GAAP to be reclassified in its entirety to net income. For amounts that are not required under GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference to other related disclosures that provide additional detail. The Company adopted ASU 2013-02 prospectively as required on January 1, 2013 by electing to present the required information in a single footnote. Adoption of this new amended guidance did not have a material impact on the Company's disclosures to its financial statements.

In March 2013, the FASB issued ASU 2013-05, Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity. ASU 2013-05 clarifies that the cumulative translation adjustment ("CTA") should be released into net income upon the occurrence of certain qualifying events. ASU 2013-05 will be effective for the Company in 2014, which will be applied prospectively. The Company does not expect its adoption of ASU 2013-05 to have a material impact on its consolidated financial statements and disclosures.

In July 2013, the FASB issued ASU 2013-11, Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists, which clarifies that an unrecognized tax benefit should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward if such settlement is required or expected in the event the uncertain tax position is disallowed. In situations where a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available or the tax law of the jurisdiction does not require, and the entity does not intend to use the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The guidance will be effective prospectively for reporting periods beginning after December 15, 2013. The Company does not expect its adoption of ASU 2013-11 to have a material impact on its consolidated financial statements or disclosures.

Note 3. Cash, Cash Equivalents, and Short-Term Investments

Cash consists of deposits with financial institutions. Cash equivalents include money market funds, time deposits, and marketable debt securities. Investments are comprised of time deposits and marketable debt securities. The Company's marketable debt securities consist primarily of certificates of deposit, commercial paper, corporate notes and bonds, U.S. government and agency notes and bonds, and municipal securities with original maturities beyond 90 days. Realized gains or losses and other-than-temporary impairments, if any, on available-for-sale securities are reported in other income or expense as incurred. The Company recognizes realized gains and losses upon sales of investment and reclassifies unrealized gains and losses out of accumulated other comprehensive income into earnings using the specific identification method. Realized gains recognized for the years ended December 31, 2013 and 2012 was negligible, and for the year ended December 31, 2011 was approximately \$0.3 million. The cost of securities sold was determined based on the specific identification method.

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

See Note 2. Summary of Significant Accounting Policies of Notes to Consolidated Financial Statements for further information regarding the fair value of the Company's financial instruments.

The following table summarizes the fair value and gross unrealized losses related to the Company's short-term investments, aggregated by investment category that have been in a continuous unrealized loss position for less than twelve months, at December 31, 2013 (in thousands):

	Less Than 12 months		
	Fair Value	Gross Unrealized Losses	
Corporate notes and bonds	\$73,860	\$(220))
Federal agency notes and bonds	41,260	(69))
Municipal notes and bonds	22,816	(14))
Total	\$137,936	\$(303))

As of December 31, 2013, the Company did not have any investments that were in a continuous unrealized loss position for periods greater than 12 months. The changes in value of these investments are primarily related to changes in interest rates and are considered to be temporary in nature.

The following table summarizes the cost and estimated fair value of the Company's short-term investments by contractual maturity at December 31, 2013 (in thousands):

	Cost	Fair Value
Due within one year	\$149,626	\$149,680
Due in one year to two years	139,428	139,637
Due after two years	90,461	90,299
Total	\$379,515	\$379,616

Note 4. Property and Equipment

The following table summarizes the cost of property and equipment and related accumulated depreciation at December 31, 2013 and 2012 (in thousands):

	Estimated Useful Lives	December 31,	
		2013	2012
Land	N/A	\$20,637	\$20,637
Buildings	25 years	105,725	105,725

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

In 2012, the Company purchased the property at 2000 and 2100 Seaport Boulevard in Redwood City, California, which the Company occupied from August 2001 through December 2004 as its former corporate headquarters. In the third quarter of 2013, the Company relocated its corporate headquarters to the purchased property. The property consists of two office buildings and the associated 11.6 acres of land. The transaction has been accounted for as a purchase of an asset that was previously subject to an operating lease during the lease term in accordance with ASC 840, Leases. The purchase of the property totaled approximately \$148.6 million in cash. The Company recorded a charge of approximately \$21.2 million representing the cost to terminate the operating lease in the consolidated statement of income during the year ended December 31, 2012. The net purchase price of the land and buildings was \$127.5 million, which represents the fair value at date of purchase. The net purchase price was allocated as \$105.7 million to buildings, \$20.6 million to land, and \$1.2 million to site improvements. The building, building improvements and site improvements are depreciated on a straight-line basis over the estimated useful life of 25 years, 10-15 years and 15 years, respectively.

Note 5. Intangible Assets and Goodwill

The carrying amounts of the intangible assets other than goodwill as of December 31, 2013 and 2012 are as follows (in thousands, except years):

	December 31, 2013			December 31, 2012			Weighted Average Useful Life (Years)
	Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net	
Developed and core technology	\$130,744	\$(99,026)) \$31,718	\$123,221	\$(76,721)) \$46,500	6
Other intangible assets:							
Customer relationships	41,683	(35,216)) 6,467	40,952	(30,063)) 10,889	6
All other ⁽¹⁾	17,205	(13,765)) 3,440	17,208	(11,187)) 6,021	4-11
Total other intangible assets	58,888	(48,981)) 9,907	58,160	(41,250)) 16,910	
Total intangible assets subject to amortization	189,632	(148,007)) 41,625	181,381	(117,971)) 63,410	
In-process research and development	—	—	—	3,850	—	3,850	N.A.
Total intangible assets, net	\$189,632	\$(148,007)) \$41,625	\$185,231	\$(117,971)) \$67,260	

(i) All other includes vendor relationships, trade names, covenants not to compete, and patents.

Total amortization expense related to intangible assets was \$30.0 million, \$28.6 million, and \$27.2 million for the years ended December 31, 2013, 2012, and 2011, respectively. Of the \$30.0 million amortization of intangible assets recorded in 2013, \$7.7 million was recorded in operating expenses and \$22.3 million was recorded in cost of revenues. Of the \$28.6 million amortization of intangible assets recorded in 2012, \$6.6 million was recorded in operating expenses and \$22.0 million was recorded in cost of revenues. Of the \$27.2 million amortization of intangible assets recorded in 2011, \$7.7 million was recorded in operating expenses and \$19.5 million was recorded in cost of revenues. Certain intangible assets were recorded in foreign currencies; and therefore, the gross carrying amount and accumulated amortization are subject to foreign currency translation adjustments.

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

As of December 31, 2013, the amortization expense related to identifiable intangible assets in future periods is expected to be as follows (in thousands):

	Acquired Technology	Other Intangible Assets	Total Intangible Assets
2014	\$13,017	\$4,730	\$17,747
2015	8,611	2,097	10,708
2016	5,082	1,299	6,381
2017	3,163	863	4,026
2018	1,395	439	1,834
Thereafter	450	479	929
Total intangible assets subject to amortization	\$31,718	\$9,907	\$41,625

During the year ended December 31, 2012, the Company recorded in-process research and development (IPR&D) of \$3.8 million associated with the acquisition of a majority interest in Heiler Software. The IPR&D capitalized costs were associated with software development efforts in process at the time of the business combination that had not yet achieved technological feasibility and no future alternative uses had been identified. Technological feasibility was achieved during 2013 for the IPR&D from the acquisition, which was reclassified to developed technology and will be amortized over the expected useful life of the technology. See Note 19. Acquisitions for further discussion of intangible assets from acquisitions.

The changes in the carrying amount of goodwill for the years ended December 31, 2013 and 2012 are as follows (in thousands):

	December 31,	
	2013	2012
Beginning balance	\$510,121	\$432,269
Goodwill from acquisitions	7,110	76,669
Subsequent goodwill adjustments	5,911	1,183
Ending balance	\$523,142	\$510,121

During the year ended December 31, 2013, the Company recorded subsequent goodwill adjustments of \$5.9 million which consist of a \$2.8 million measurement period adjustment related to Heiler Software accrued liabilities and foreign currency translation adjustments of \$4.0 million, partially offset by income tax related balance sheet adjustments of \$0.9 million within the measurement period related to prior acquisitions. During the year ended December 31, 2012, the Company recorded subsequent goodwill adjustments of \$1.2 million which consist of foreign currency translation adjustments of \$1.9 million, partially offset by other credit adjustments of \$0.7 million resulting from differences between provisional estimates of liabilities and assets recorded at the time of the acquisition and the actual amounts within the measurement period related to prior acquisitions. See Note 19. Acquisitions for further discussion of goodwill from acquisitions.

Note 6. Borrowings

Credit Agreement

On September 29, 2010, the Company entered into a Credit Agreement (the "Credit Agreement") that matures on September 29, 2014. The Credit Agreement provides for an unsecured revolving credit facility in an amount of up to \$220.0 million, with an option for the Company to request to increase the revolving loan commitments by an aggregate amount of up to \$30.0 million with new or additional commitments, for a total credit facility of up to \$250.0 million. No amounts were outstanding under the Credit Agreement as of December 31, 2013 and 2012, and a total of \$220.0 million remained available for borrowing.

Revolving loans accrue interest at a per annum rate based on either, at our election, (i) the base rate plus a margin ranging from 1.00% to 1.75% depending on the Company's consolidated leverage ratio, or (ii) LIBOR (based on 1-

2-, 3-, or 6-month interest periods) plus a margin ranging from 2.00% to 2.75% depending on the Company's consolidated leverage ratio. The base rate is equal to the highest of (i) JPMorgan Chase Bank, N.A.'s prime rate, (ii) the federal funds rate plus a margin equal to 0.50%,

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

and (iii) LIBOR for a 1-month interest period plus a margin equal to 1.00%. Revolving loans may be borrowed, repaid and reborrowed until September 29, 2014, at which time all amounts borrowed must be repaid. Accrued interest on the revolving loans is payable quarterly in arrears with respect to base rate loans and at the end of each interest rate period (or at each 3- month interval in the case of loans with interest periods greater than 3 months) with respect to LIBOR loans. The Company is also obligated to pay other customary closing fees, arrangement fees, administrative fees, commitment fees, and letter of credit fees. A quarterly commitment fee is applied to the average daily unborrowed amount under the credit facility at a per annum rate ranging from 0.35% to 0.50% depending on the Company's consolidated leverage ratio. The Company may prepay the loans or terminate or reduce the commitments in whole or in part at any time, without premium or penalty, subject to certain conditions including minimum amounts in the case of commitment reductions and reimbursement of certain costs in the case of prepayments of LIBOR loans.

The Credit Agreement contains customary representations and warranties, covenants, and events of default, including the requirement to maintain a maximum consolidated leverage ratio of 2.75 to 1.00 and a minimum consolidated interest coverage ratio of 3.50 to 1.00. The occurrence of an event of default could result in the acceleration of the obligations under the Credit Agreement. Under certain circumstances, a default interest rate will apply on all obligations during the existence of an event of default under the Credit Agreement at a per annum rate equal to 2.00% above the applicable interest rate for any overdue principal and 2.00% above the rate applicable for base rate loans for any other overdue amounts. The Company was in compliance with all covenants under the Credit Agreement as of December 31, 2013.

Note 7. Stockholders' Equity

Preferred Stock

The Company is authorized to issue 2.0 million shares of preferred stock with a par value of \$0.001 per share of which 200,000 shares have been designated as Series A preferred stock. The Company may issue preferred stock from time to time in one or more series. The Board of Directors is authorized to provide for the rights, preferences, privileges, and restrictions of the shares of such series. As of December 31, 2013 and 2012, no shares of preferred stock had been issued.

Common Stock

The Company has authorized 200 million shares of common stock with a par value of \$0.001 per share. Each share of common stock has the right to one vote. The holders of common stock are also entitled to receive dividends whenever funds are legally available and when declared by the Board of Directors, subject to the rights of holders of all classes of stock having priority rights as to dividends. No cash dividends have been declared or paid through December 31, 2013.

Stock Repurchase Plan

The Company's Board of Directors has approved a stock repurchase program for the Company to repurchase its common stock. The primary purpose of the program is to enhance shareholder value, including to offset the dilutive impact of stock based incentive plans. The number of shares to be purchased and the timing of the purchases are based on several factors, including the price of the Company's common stock, the Company's liquidity and working capital needs, general business and market conditions, and other investment opportunities. These purchases can be made from time to time in the open market and are funded from the Company's available working capital. As of December 31, 2013, \$4.0 million remained available for repurchase under this program. In January 2014, the Company announced that the Board of Directors approved the repurchase of up to an additional \$100.0 million of the Company's outstanding stock.

This repurchase program does not have an expiration date. Repurchased shares are retired and reclassified as authorized and unissued shares of common stock. The Company may continue to repurchase shares from time to time, as determined by management under programs approved by the Board of Directors.

The Company repurchased 2,487,957 shares for \$92.1 million, 2,434,647 shares for \$81.0 million, and 1,574,612 shares for \$74.5 million in fiscal 2013, 2012, and 2011, respectively.

Note 8. Stock-based Compensation

Summary of Plans

1999 Stock Incentive Plan

The Company's stockholders approved the 1999 Stock Incentive Plan (the "1999 Incentive Plan") in April 1999 under which 2,600,000 shares were reserved for issuance. In addition, any shares not issued under the 1996 Stock Plan were also available for grant. The number of shares reserved under the 1999 Incentive Plan automatically increased annually beginning on January 1, 2000 by the lesser of 16,000,000 shares or 5% of the total amount of fully diluted shares of common stock outstanding as of such date. Under the 1999 Incentive Plan, eligible employees, officers, and directors may be granted stock options, stock appreciation rights, restricted shares, and stock units. The exercise price for incentive stock options and non-qualified options may not be less than 100% and 85%, respectively, of the fair value of the Company's common stock at the option grant date. Options granted are exercisable over a maximum term of seven to ten years from the date of the grant and generally vest ratably over a period of four years, with options for new employees generally including a 1-year cliff period. This plan expired in March 2009. No further shares will be awarded from this plan. As of December 31, 2013, there were approximately 2,994,056 options outstanding under the 1999 Incentive Plan.

Assumed Option Plans

In connection with the acquisition of Itemfield in 2006, the Company assumed options in the Itemfield 2003 Stock Option Plan (the "Itemfield Plan"). As of December 31, 2013, the Company had 50 options outstanding under the Assumed Plan. As a result of the acquisition of Siperian in 2010, the Company assumed unvested in the money options under the Siperian 2003 Equity Incentive Plan (the "Siperian Plan") that were converted to unvested options to purchase the Company's common stock. As of December 31, 2013, there were 12,245 options outstanding under the Siperian Plan. No further options will be granted under these assumed option plans.

2009 Equity Incentive Plan

The Company's stockholders approved the 2009 Equity Incentive Plan (the "2009 Incentive Plan") in April 2009 under which 9,000,000 shares have been reserved for issuance. In May 2011, the Company's stockholders approved amendments to the 2009 Equity Incentive Plan to increase the number of shares reserved for issuance by 2,500,000 and to increase the ratio by which full value awards count against the share reserve from 1.52 to 2.37. In May 2012, the Company's stockholders approved an amendment to the 2009 Equity Incentive Plan to increase the number of shares reserved for issuance by 5,000,000. In May 2013, the Company's stockholders approved an amendment to the 2009 Equity Incentive Plan to increase the number of shares reserved for issuance by 4,000,000. Under the 2009 Incentive Plan, eligible employees, officers, and directors may be granted stock options (incentive and non-qualified), stock appreciation rights, restricted stock, restricted stock units ("RSUs"), performance shares and performance units. The exercise price for incentive stock options and non-qualified options may not be less than 100% and 85%, respectively, of the fair value of the Company's common stock at the option grant date. Certain employees and non-employee directors may elect to defer the delivery of vested RSUs, and settlement of such RSUs will be in shares of common stock at the end of the elected deferral period.

During 2013, the Company granted 2,267,152 options, 834,950 RSUs, and 649,900 performance-based restricted stock units ("PRSUs") under the 2009 Incentive Plan to certain employees, executives and directors of the Company. During 2012, the Company granted 2,844,150 options and 1,094,884 RSUs under the 2009 Incentive Plan to certain employees, executives and directors of the Company. During 2011, the Company granted 1,339,310 options and 733,111 RSUs under the 2009 Incentive Plan to certain employees, executives and directors of the Company. As of December 31, 2013, there were 4,823,800 shares available for grant and 11,799,058 options, RSUs and PRSUs outstanding under the 2009 Incentive Plan.

For purposes of the share reserve, the grant of a RSU is deemed an award for 1.52 or 2.37 shares of authorized common stock for each one share of authorized common stock subject to such award. The ratio by which an RSU counts against the share reserve is based upon the ratio effective on the date of grant. If a share that was subject to an

award and is returned to the 2009 Incentive Plan, the Company would credit the 2009 Incentive Plan reserve by the same ratio as it was originally issued. These returned shares would be available for issuance under the 2009 Incentive Plan. Of the 1,778,000 unvested RSUs, 1,498,000 RSUs were granted at the 2.37 ratio, and 280,000 were granted at the 1.52 ratio. All 507,000 PRSUs outstanding were granted at the 2.37 ratio.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Stock Options and Restricted Stock Units

The Company grants stock options which are exercisable over a maximum term of seven to ten years for employees and five to seven years for directors from the date of the grant. These grants generally vest ratably over a period of four years for employees and one to three years for directors. Options granted to new employees generally include a 1-year cliff period.

The Company also grants RSUs to its employees and directors which vest over four years with annual vesting dates for employees and one to three years for directors. Upon vesting of restricted stock, the recipient has the option to settle minimum withholding taxes by electing to have the Company withhold otherwise deliverable shares having a fair market value equal to the required tax obligations ("net-settlement"). The net-settlement shares are then immediately cancelled and retired. Shares are issued on the vesting dates net of the minimum statutory tax withholding requirements to be paid by the Company on behalf of its employees. As a result, the actual number of shares issued will be fewer than the actual number of RSUs outstanding.

Performance-Based Restricted Stock Units

The performance period for the PRSUs granted in 2013 was the 2013 fiscal year. If certain performance goals were met, PRSUs would have become eligible to vest, with one fourth vesting on the first anniversary date of the grant, and the remaining three fourths vesting evenly on the following three annual anniversary dates of the grant, contingent upon the recipient's continued service to the company. Certain participants had the ability to receive up to 110% to 125% of the target number of shares originally granted.

The performance period for the PRSUs granted in 2012 was the 2012 fiscal year. If certain performance goals were met, PRSUs would have become eligible to vest, with one fourth vesting on the first anniversary date of the grant, and the remaining three fourths vesting evenly on the following three annual anniversary dates of the grant, contingent upon the recipient's continued service to the company. Certain participants had the ability to receive up to 150% of the target number of PRSUs originally granted.

Employee Stock Purchase Plan

The Company's stockholders approved the Employee Stock Purchase Plan ("ESPP") in May 2008 under which 8,850,000 shares have been reserved for issuance. Under the ESPP, eligible employees may elect to contribute from 1% to 20% or a lesser percentage that the committee may establish from time to time of their eligible compensation. Currently, the committee established the maximum contribution percentage at 10%. The purchase price is 85% of the lower of the closing price of the Common Stock on the NASDAQ Global Select Market at the beginning or end of the six-month offering period. As of December 31, 2013, the Company had 6,172,544 shares available for future issuance under the ESPP.

Summary of Assumptions

The fair value of each option award is estimated on the date of grant using the Black-Scholes-Merton option pricing model that uses the assumptions in the following table. The Company has consistently used a blend of average historical and market-based implied volatilities for calculating the expected volatilities for employee stock options, and uses market-based implied volatilities for its ESPP. The expected term of employee stock options granted is derived from historical exercise patterns of the options, and the expected term of ESPP is based on the contractual terms. The expected term of options granted to employees is derived from the historical option exercises, post-vesting cancellations, and estimates concerning future exercises and cancellations for vested and unvested options that remain outstanding. The risk-free interest rate for the expected term of the option and ESPP is based on the U.S. Treasury yield curve in effect at the time of grant. The Company recognizes its stock-based compensation related to options using a straight-line method over the vesting term of the awards.

The fair value of RSUs and PRSUs is the grant date closing price of our common stock. The Company recognizes expense related to RSUs using a straight-line method over the vesting term of the awards. The Company recognizes expense for PRSUs based on the probability of achieving certain performance criteria, as defined in the PRSU agreements, and uses the graded vesting attribution method over the requisite service period.

The Company records stock-based compensation for options, RSUs, and PRSUs granted net of estimated forfeiture rates. ASC 718, Stock Compensation, requires the Company to estimate forfeiture rates at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. The Company uses historical forfeitures to estimate its future forfeiture rates. The Company's forfeiture rates for stock options, RSUs and PRSUs were 10% for 2011, 2012 and 2013.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The fair value of the Company's stock-based awards was estimated based on the following assumptions:

	Years Ended December 31,			
	2013	2012	2011	
Option grants:				
Expected volatility	41 - 43	% 39 - 48	% 35 - 43	%
Weighted-average volatility	41	% 44	% 36	%
Expected dividends	—	—	—	
Expected term of options (in years)	3.3	3.3	3.8	
Risk-free interest rate	0.7	% 0.5	% 1.5	%
ESPP:				
Expected volatility	37 - 42	% 43 - 53	% 35 - 38	%
Weighted-average volatility	40	% 49	% 36	%
Expected dividends	—	—	—	
Expected term of ESPP (in years)	0.5	0.5	0.5	
Risk-free interest rate	0.1	% 0.1	% 0.2	%

The allocation of the stock-based compensation, net of estimated income tax benefit, is as follows (in thousands):

	Years Ended December 31,		
	2013	2012	2011
Cost of service revenues	\$5,525	\$4,349	\$3,539
Research and development	19,002	14,919	10,848
Sales and marketing	19,323	13,518	10,185
General and administrative	13,354	10,017	8,691
Total stock-based compensation	57,204	42,803	33,263
Estimated tax benefit of stock-based compensation	(15,934) (10,994) (8,490
Total stock-based compensation, net of tax benefit	\$41,270	\$31,809	\$24,773

In connection with the acquisition of Heiler Software, \$1.1 million of post-combination stock-based compensation expense was recorded to accrued liabilities due to the Company's contractual requirement to settle all outstanding options with cash upon the squeeze-out.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Restricted Stock Unit Activity

The Company started granting RSUs in 2009. A summary of RSU activity through December 31, 2013 is presented below (in thousands, except per share amounts):

	Number of Shares	Weighted- Average Grant Date Fair Value
Outstanding at December 31, 2010	1,405	
Awarded	733	\$ 50.00
Released	(407) \$ 50.55
Forfeited	(120)	\$ 29.00
Outstanding at December 31, 2011	1,611	
Awarded	1,095	\$ 40.13
Released	(535)	\$ 42.16
Forfeited	(244)	\$ 39.30
Outstanding at December 31, 2012	1,927	
Awarded	835	\$ 35.50
Released	(711)	\$ 35.74
Forfeited	(258)	\$ 39.91
Outstanding at December 31, 2013	1,793	

As of December 31, 2013, there were approximately 15,000 vested deferred RSUs outstanding and not yet released included in the RSU activity above. As of December 31, 2013, there was a total of approximately 1,778,000 unvested RSUs with a fair value of \$45.0 million. The Company expects to recognize the fair value of the unvested RSUs over a weighted-average period of 2.56 years.

Performance-Based Restricted Stock Unit Activity

The Company started granting PRSUs in 2012. The performance period for the 649,900 target number of PRSUs granted in 2013 was the 2013 fiscal year. Certain participants had the ability to receive up to 110% to 125% of the target number of PRSUs originally granted. In the first quarter of fiscal 2014, the Compensation Committee of the Board of Directors certified actual performance achievement for PRSUs granted in 2013, and as a result, 507,000 shares became eligible to vest. One fourth of the shares vested in the first quarter of 2014 and the remaining three fourths vest evenly on the following three annual anniversary dates of the grant, contingent upon the recipient's continued service to the Company. As of December 31, 2013, there was a total of approximately 507,000 unvested PRSUs with a fair value of \$8.0 million. The Company expects to recognize the fair value of the unvested PRSUs over a weighted-average period of 1.59 years.

The performance period for the 224,000 target number of PRSUs granted in 2012 was the 2012 fiscal year. Certain participants had the ability to receive up to 150% of the target number of PRSUs originally granted. In the first quarter of fiscal 2013, the Compensation Committee of the Board of Directors certified the actual performance achievement of participants for PRSUs granted in 2012. The performance metrics were not achieved, and therefore no PRSUs became eligible to vest. All 224,000 target PRSUs granted were cancelled. The Company did not record any stock-based compensation related to these performance awards.

Disclosures Pertaining to All Stock-based Compensation Plans

The weighted-average fair value of options granted with exercise prices equal to fair market value at the date of grant under stock options plans during 2013, 2012, and 2011 was \$8.96, \$12.06, and \$14.15, respectively. No options were granted with exercise prices less than fair value at the date of grant in 2013, 2012, and 2011. The total intrinsic value of options exercised for the years ended, December 31, 2013, 2012, and 2011 was \$58.4 million, \$53.5 million, and \$117.6 million, respectively. The weighted average grant date fair value of unvested RSUs for the years ended

Edgar Filing: INFORMATICA CORP - Form 10-K

December 31, 2013, 2012, and 2011 was \$38.50, \$38.08, and \$34.47, respectively. The RSUs granted in 2013 vest in 2014 through 2017. The weighted-average grant date fair value of unvested PRSUs for the year ended December 31, 2013 was \$37.42. The weighted-average grant date fair value of employee stock purchase shares granted under the ESPP for the years ended December 31, 2013, 2012, and 2011 was \$10.01, \$9.93, and

75

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

\$12.34, respectively. The total intrinsic value of stock purchase shares granted under the ESPP exercised during the years ended December 31, 2013, 2012, and 2011 was \$6.5 million, \$2.8 million, and \$8.7 million, respectively. Upon the exercise of options and stock purchase shares granted under the ESPP, the Company issues new common stock from its authorized shares.

Cash received from option exercises and ESPP contributions under all stock-based compensation arrangements for the years ended December 31, 2013, 2012, and 2011 were \$58.7 million, \$41.4 million, and \$58.7 million, respectively. The total realized tax benefits attributable to stock options exercised and restricted stock units vested were \$26.1 million, \$16.5 million, and \$29.1 million for the years ended December 31, 2013, 2012, and 2011, respectively. The gross excess tax benefits from stock-based compensation in the fiscal year ended December 31, 2013, 2012, and 2011 were \$27.5 million, \$17.0 million, and \$30.0 million, respectively, as reported on the consolidated statements of cash flows in the financing activities section, which represent a reduction in income taxes otherwise payable during the periods. These amounts are related to the actual gross tax benefits in excess of the expected tax benefits for stock options exercised in 2013, 2012, and 2011.

Note 9. Accumulated Other Comprehensive Loss

The following table summarizes the changes in accumulated balances for each component of other comprehensive income (loss), for the year ended December 31, 2013, net of taxes (in thousands):

	Cumulative Translation Adjustments	Net Unrealized Gain (Loss) on Available-for-Sale Investments	Net Unrealized Loss on Cash Flow Hedges	Total
Accumulated other comprehensive income (loss) as of December 31, 2012	\$(8,012)	\$ 242	\$(260)	\$(8,030)
Other comprehensive income (loss):				
Other comprehensive income (loss) before reclassifications, net of tax benefit (expense) of \$(172), \$126 and \$794	5,133	(205)	(1,295)	3,633
Net loss reclassified from accumulated other comprehensive income (loss), net of tax benefit of \$ —, \$16 and \$710	—	26	⁽ⁱ⁾ 1,159	⁽ⁱⁱ⁾ 1,185
Total other comprehensive income (loss), net of tax effect	5,133	(179)	(136)	4,818
Accumulated other comprehensive loss as of December 31, 2013	\$(2,879)	\$ 63	\$(396)	\$(3,212)

(i) Included in other income (expense), net on the consolidated income statements.

(ii) Included in operating expenses on the consolidated income statements.

The Company did not have any other-than-temporary gain or loss reflected in accumulated other comprehensive loss as of December 31, 2013 and 2012.

The Company determines the basis of the cost of a security sold and the amount reclassified out of other comprehensive income into statement of income based on specific identification.

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Note 10. Derivative Financial Instruments

The Company's earnings and cash flows are subject to fluctuations due to changes in foreign currency exchange rates. The Company uses derivative instruments to manage its exposures to fluctuations in certain foreign currency exchange rates which exist as part of ongoing business operations. The Company and its subsidiaries do not enter into derivative contracts for speculative purposes.

Cash Flow Hedges

The Company enters into certain cash flow hedge programs in an attempt to reduce the impact of certain foreign currency fluctuations. These contracts are designated and documented as cash flow hedges. The purpose of these programs is to reduce the volatility of identified cash flow and expenses caused by movement in certain foreign currency exchange rates, in particular, the Indian rupee. The Company is currently using foreign exchange forward contracts to hedge certain non-functional currency anticipated expenses for its subsidiary in India.

The Company releases the amounts accumulated in other comprehensive income into earnings in the same period or periods during which the forecasted hedge transaction affects earnings. The Company will reclassify all amounts accumulated in other comprehensive income into earnings within the next twelve months.

The Company has forecasted the amount of its anticipated foreign currency expenses based on its historical performance and its projected financial plan. As of December 31, 2013, the remaining open foreign exchange contracts, carried at fair value, are hedging Indian rupee expenses and have a maturity of thirteen months or less. These foreign exchange contracts mature monthly as the foreign currency denominated expenses are paid and any gain or loss is offset against expense. Once the hedged item is recognized, the cash flow hedge is de-designated and subsequent changes in value are recognized in other income (expense) to offset changes in the value of the resulting non-functional currency monetary liabilities.

The notional amounts of these foreign exchange forward contracts in U.S. dollar equivalents were \$30.1 million, and \$23.6 million to buy as of December 31, 2013 and 2012, respectively.

Balance Sheet Hedges

Balance sheet hedges consist of cash flow hedge contracts that have been de-designated and non-designated hedge contracts. These foreign exchange contracts are carried at fair value and either did not or no longer qualify for hedge accounting treatment and are not designated as hedging instruments. Changes in the value of the foreign exchange contracts are recognized in other income (expense) and offset the foreign currency gain or loss on the underlying net monetary assets or liabilities. The notional amounts of foreign currency contracts open at year end in U.S. dollar equivalents were \$2.6 million and \$2.7 million to buy at December 31, 2013 and 2012, respectively.

The following table reflects the fair value amounts for the foreign exchange contracts designated and not designated as hedging instruments at December 31, 2013 and 2012 (in thousands):

	December 31, 2013		December 31, 2012	
	Fair Value Derivative Assets (i)	Fair Value Derivative Liabilities (ii)	Fair Value Derivative Assets (i)	Fair Value Derivative Liabilities (ii)
Derivatives designated as hedging instruments	\$284	\$830	\$—	\$224
Derivatives not designated as hedging instruments	—	194	—	184
Total fair value of derivative instruments	\$284	\$1,024	\$—	\$408

(i) Included in prepaid expenses and other current assets on the consolidated balance sheets.

(ii) Included in accrued liabilities on the consolidated balance sheets.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Company presents its derivative assets and derivative liabilities at gross fair values in the consolidated balance sheets. However, under the master netting arrangements or similar agreements with the respective counterparties of the foreign exchange contracts, subject to applicable requirements, the Company is allowed to net settle transactions of the same currency with a single net amount payable by one party to the other. The derivatives held by the Company are not subject to any credit contingent features negotiated with its counterparties nor is the Company required to post collateral against its derivative positions.

As of December 31, 2012, there was no potential effect of rights of offset associated with the above foreign exchange contracts that would result in a net derivative asset or net derivative liability. As of December 31, 2013, information related to these offsetting arrangements was as follows (in thousands):

Offsetting of Assets:

	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Consolidated Balance Sheets	Net Amounts of Assets Presented in the Consolidated Balance Sheets	(i) Financial Instruments	Cash Collateral Pledged	Net Amount
Foreign exchange contracts	\$284	\$—	\$284	\$(268)) \$—	\$16

(i) The balances at December 31, 2013 were related to derivative liabilities which are allowed to net settled against derivative assets in accordance with the master netting agreements.

Offsetting of Liabilities:

	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Consolidated Balance Sheets	Net Amounts of Liabilities Presented in the Consolidated Balance Sheets	(ii) Financial Instruments	Cash Collateral Pledged	Net Amount
Foreign exchange contracts	\$1,024	\$—	\$1,024	\$(268)) \$—	\$756

(ii) The balances at December 31, 2013 were related to derivative assets which are allowed to net settled against derivative liabilities in accordance with the master netting agreements.

The Company evaluates prospectively as well as retrospectively the effectiveness of its hedge programs using statistical analysis. Prospective testing is performed at the inception of the hedge relationship and quarterly thereafter. Retrospective testing is performed on a quarterly basis. In October 2013, the Company changed its effectiveness assessment method from the spot to spot price method to include time value in the assessment. Prospectively, the Company will include all changes in value that are effective including changes in time value to accumulated other comprehensive income. The Company will no longer record amounts as an excluded component of the hedge relationship.

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The effects of derivative instruments designated as cash flow hedges on the accumulated other comprehensive loss and consolidated statements of income for the years ended December 31, 2013, 2012, and 2011 are as follows (in thousands and not tax-effected):

	Years Ended December 31,		
	2013	2012	2011
Amount of loss recognized in other comprehensive income (effective portion)	\$ (2,089) \$ (594) \$ (4,037
Amount of loss reclassified from accumulated other comprehensive income to operating expenses (effective portion)	\$ (1,869) \$ (2,275) \$ (2,395
Amount of gain recognized in income excluded from effectiveness testing located in operating expenses	\$ 728	\$ 1,227	\$ 161

The Company did not have any ineffective portion of the derivative recorded in the consolidated statements of income.

The gain recognized in other income (expense), net for non-designated foreign currency forward contracts for the years ended December 31, 2013, 2012, and 2011 is as follows (in thousands):

	Years Ended December 31,		
	2013	2012	2011
Gain (loss) recognized in interest and other income (expense), net	\$ (161) \$ (904) \$ 2,296

See Note 2. Summary of Significant Accounting Policies and Note 9. Accumulated Other Comprehensive Loss of Notes to Consolidated Financial Statements for a further discussion.

Note 11. Employee 401(K) Plan

The Company's employee savings and retirement plan (the "Plan") is qualified under Section 401 of the Internal Revenue Code. The Plan is available to all regular employees on the Company's U.S. payroll and provides employees with tax deferred salary deductions and alternative investment options. Employees may contribute up to 50% of their salary up to the statutory prescribed annual limit. The Company matches 50% of the contribution made by an employee, up to a maximum of \$4,000 per calendar year. Contributions made by the Company vest 100% upon contribution. The Company contributed \$4.5 million, \$3.6 million, and \$2.7 million for the years ended December 31, 2013, 2012, and 2011 respectively. In addition, the Plan provides for discretionary contributions at the discretion of the Board of Directors. No discretionary contributions have been made by the Company to date.

Note 12. Income Taxes

The federal, state, and foreign income tax provisions for the years ended December 31, 2013, 2012, and 2011 are summarized as follows (in thousands):

	Years Ended December 31,		
	2013	2012	2011
Current tax provision:			
Federal	\$65,344	\$35,481	\$38,179
State	10,167	4,337	5,954
Foreign	2,882	9,417	4,943
Total current tax provision	78,393	49,235	49,076
Deferred tax provision:			
Federal	(24,469) (3,044) 3,119
State	(3,334) 597	(3,197
Foreign	3,737	(2,203) 135
Total deferred tax provision	(24,066) (4,650) 57
Total provision for income taxes	\$54,327	\$44,585	\$49,133

The components of income before income taxes attributable to domestic and foreign operations are as follows (in thousands):

	Years Ended December 31,		
	2013	2012	2011
Domestic	\$118,939	\$87,981	\$120,507
Foreign	21,783	49,786	46,121
Income before income taxes	\$140,722	\$137,767	\$166,628

A reconciliation of the provision computed at the statutory federal income tax rate to the Company's income tax provision is as follows (in thousands):

	Years Ended December 31,		
	2013	2012	2011
Income tax provision computed at federal statutory tax rate	\$49,253	\$48,218	\$58,320
State taxes, net of federal benefit	2,249	1,402	2,231
Foreign earnings taxed at different rates	1,550	(10,951) (9,328
Stock-based compensation	3,397	3,270	571
Return to provision true-up	(668) 92	(131
Research and development tax credits	(3,715) —	(3,023
ASC 740-10 and other	(746) 679	493
Valuation allowance	3,007	1,875	—
Total provision for income taxes	\$54,327	\$44,585	\$49,133

The higher tax rate for 2013 was primarily attributable to non-deductible stock-based compensation, state income taxes, the accrual of reserves related to uncertain tax positions and acquisition integration-related income tax expenses resulted in higher taxes in our foreign earnings partially offset by the domestic manufacturing deduction pursuant to Section 199 of the Internal Revenue Code and the recognition of the 2012 and 2013 federal research and development credits.

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Significant components of the Company's deferred tax assets are as follows (in thousands):

	December 31,	
	2013	2012
Deferred tax assets:		
Net operating loss carryforwards	\$23,710	\$33,095
Tax credits carryforwards	10,131	8,563
Deferred revenue	19,240	11,231
Reserves and accrued costs not currently deductible	15,097	12,325
Depreciable assets	6,450	11,003
Stock-based compensation	20,149	15,208
Other	381	—
Valuation allowance	(4,552) (20,179
Total deferred tax assets	90,606	71,246
Deferred tax liabilities:		
Non-deductible intangible assets	(12,887) (25,435
Other	—	(897
Total deferred tax liabilities	(12,887) (26,332
Net deferred tax assets	\$77,719	\$44,914

ASC 740, Income Taxes, provides for the recognition of deferred tax assets if realization of such assets is more likely than not. In assessing the need for any additional valuation allowance in 2013, the Company considered all available evidence both positive and negative, including historical levels of income, legislative developments, expectations and risks associated with estimates of future taxable income, and ongoing prudent and feasible tax planning strategies.

As a result of this analysis for the year ended December 31, 2013, it was considered more likely than not that our non-stock-based payments related deferred tax assets would be realized except for any increase to the deferred tax asset related to the California research and development credit. A valuation allowance of \$3.5 million has been recorded against this portion of the credit, even though this tax attribute has an indefinite life. The valuation allowance decreased by \$15.6 million in 2013, \$4.9 million in 2012, and \$6.6 million in 2011. The valuation allowance is primarily related to deferred tax assets that were created through the benefit from stock option deductions on a “with” and “without” basis and recorded on the balance sheet with a corresponding valuation allowance prior to the Company's adoption of ASC 718, Stock Compensation. Pursuant to ASC 718-740-25-10, the benefits of these deferred tax assets were recorded in the stockholders' equity when they were utilized on an income tax return to reduce the Company's taxes payable, and as such, they will not impact the Company's effective tax rate.

As of December 31, 2013, the Company had U.S. federal and state net operating loss carryforwards of approximately \$57.3 million and \$23.3 million, respectively. If not utilized, the federal and state net operating loss carryforwards will start to expire in 2014. The Company has state research and development tax credit carryforwards of approximately \$19.4 million that do not expire. The utilization of the Company's U.S. net operating losses is subject to various limitations under Section 382 and similar state tax provisions. The Company does not anticipate any expiration of the U.S. net operating loss carryforwards prior to their utilization.

As of December 31, 2013, the Company's international subsidiaries had combined net operating loss carryforwards of \$5.4 million that do not expire. The Company believed that it is more likely than not that the benefit from some of these net operating loss carryforwards will not be realized and provided a valuation allowance of \$1.1 million relating to these net operating loss carryforwards.

The Company has not provided for U.S. federal and foreign withholding taxes on \$103.4 million of undistributed earnings from its foreign subsidiaries as of December 31, 2013 because the Company intends to indefinitely reinvest such earnings offshore. The Company makes the determination of whether to accrue taxes on such earnings on an entity by entity basis. The residual tax liability if such earnings were remitted may be reduced by foreign tax credits and other tax adjustments. It is not practicable to determine the tax liability that might be incurred if these earnings were repatriated.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

A reconciliation of the beginning and ending amount of the unrecognized tax benefits is as follows (in thousands):

	December 31,		
	2013	2012	2011
Beginning balance	\$21,079	\$16,298	\$12,400
Additions for tax positions of prior years	672	2,407	1,925
Reductions for tax positions of prior years	(668) (475) (569
Additions based on tax positions related to the current year	9,671	4,335	3,155
Reductions due to lapse of statute of limitations	(1,580) (1,486) (491
Reductions due to settlements	—	—	(122
Ending balance	\$29,174	\$21,079	\$16,298

The unrecognized tax benefits related to ASC 740-10, if recognized, would impact the income tax provision by \$25.9 million, \$18.9 million, and \$15.3 million for the years ended December 31, 2013, 2012, and 2011, respectively. The unrecognized tax benefits were \$29.2 million, \$21.1 million, and \$16.3 million as of December 31, 2013, 2012, and 2011, respectively. The Company has elected to include interest and penalties as a component of income tax expense. Accrued interest and penalties at December 31, 2013 and 2012 were approximately \$3.2 million and \$2.3 million, respectively. The Company does not anticipate that the amount of existing unrecognized tax benefits will significantly increase or decrease within the next 12 months.

The Company files income tax returns in the U.S. federal jurisdiction and in various U.S. states and foreign jurisdictions. As of December 31, 2013, the Company is in various stages of examinations and appeals in connection with its taxes in U.S. states and foreign jurisdictions, which generally span tax years 2003 through 2011.

Although the outcome of any tax audit is uncertain, the Company believes that it has adequately provided in its financial statements for any additional taxes that it may be required to pay as a result of such examinations. The Company regularly assesses the likelihood of outcomes resulting from these examinations to determine the adequacy of its provision for income taxes, and believes the reserve to be reasonable. If tax payments are ultimately proved to be unnecessary, the reversal of these tax liabilities would result in tax benefits in the period when the Company concluded such determination. However, if an ultimate tax assessment exceeds its estimate of tax liabilities, an additional tax provision might be required.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Note 13. Net Income per Common Share

Basic net income per share is computed using the weighted-average number of common shares outstanding during the period. Diluted net income per share reflects the potential dilution of securities by adding other common stock equivalents, primarily stock options, restricted stock units, and common shares potentially issuable under the terms of the Convertible Senior Notes, to the weighted-average number of common shares outstanding during the period, if dilutive. Potentially dilutive securities have been excluded from the computation of diluted net income per share if their inclusion is anti-dilutive.

The calculation of basic and diluted net income per share is as follows (in thousands, except per share amounts):

	Years Ended December 31,		
	2013	2012	2011
Basic:			
Net income	\$86,395	\$93,182	\$117,495
Weighted-average shares of common stock used to compute basic net income per share	108,146	107,874	103,956
Net income per share-basic	\$0.80	\$0.86	\$1.13
Diluted:			
Net income	\$86,395	\$93,182	\$117,495
Effect of convertible senior notes, net of related tax effects	—	—	811
Net income adjusted-diluted	\$86,395	\$93,182	\$118,306
Weighted-average shares of common stock used to compute basic net income per share	108,146	107,874	103,956
Effect of dilutive common stock equivalents:			
Dilutive effect of employee stock options	2,925	3,863	6,001
Dilutive effect of unvested restricted stock units	323	352	522
Dilutive effect of convertible senior notes	—	—	2,061
Shares used in computing diluted net income per common share	111,394	112,089	112,540
Net income per share-diluted	\$0.78	\$0.83	\$1.05
Weighted average stock options and restricted stock units excluded from calculation due to anti-dilutive effect	5,666	3,844	1,273

The diluted net income per common share calculation requires the dilutive effect of convertible securities to be reflected in the diluted net income per share by application of the “if-converted” method. This method assumes an add-back of interest and amortization of issuance cost, net of income taxes, to net income if the securities are converted. The Company determined that for year ended December 31, 2011, the Convertible Senior Notes had a dilutive effect on diluted net income per share, and as such, it had an add-back of \$0.8 million in interest and issuance cost amortization, net of income taxes, to net income for the diluted net income per share calculation. The impact of the Notes for the year ended December 31, 2011 represents interest and issuance cost amortization until the redemption of the Notes on March 18, 2011.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Note 14. Commitments and Contingencies

Lease Obligations

The Company leases certain office facilities under various non-cancelable operating leases, which expire at various dates through 2024 and require the Company to pay operating costs, including property taxes, insurance, and maintenance. Rental expense was \$16.3 million, \$15.1 million, and \$14.9 million in fiscal years 2013, 2012, and 2011, respectively.

Future minimum lease payments as of December 31, 2013 under non-cancelable operating leases with original terms in excess of one year are summarized as follows (in thousands):

	Operating Leases
2014	\$10,324
2015	10,892
2016	7,911
2017	5,771
2018	4,676
Thereafter	9,336
Total future minimum operating lease payments	\$48,910

Warranties

The Company generally provides a warranty for its software products and services to its customers for a period of three to six months and accounts for its warranties. The Company's software products' media are generally warranted to be free from defects in materials and workmanship under normal use, and the products are also generally warranted to substantially perform as described in certain Company documentation and the product specifications. The Company's services are generally warranted to be performed in a professional manner and to materially conform to the specifications set forth in a customer's signed contract. In the event there is a failure of such warranties, the Company generally will correct or provide a reasonable work-around or replacement product. To date, the Company's product warranty expense has not been significant. The warranty accrual as of December 31, 2013 and 2012 was not material.

Indemnification

The Company's software license agreements generally include certain provisions for indemnifying the customer against losses, expenses, liabilities, and damages that may be awarded against the customer in the event the Company's software is found to infringe upon a patent, copyright, trademark, or other proprietary right of a third party. The agreements generally limit the scope of and remedies for such indemnification obligations in a variety of industry-standard respects, including but not limited to certain time and scope limitations and a right to replace an infringing product with a non-infringing product.

The Company believes its internal development processes and other policies and practices limit its exposure related to these indemnification provisions. In addition, the Company requires its employees to sign a proprietary information and inventions agreement, which assigns the rights to its employees' development work to the Company. To date, the Company has not had to reimburse any of its customers for any losses related to these indemnification provisions, and no material claims against the Company are outstanding as of December 31, 2013. The Company cannot determine the maximum amount of potential future payments, if any, related to such indemnification provisions due to the limited and infrequent history of prior indemnification claims.

As permitted under Delaware law, the Company has agreements whereby the Company indemnifies its officers and directors for certain events or occurrences while the officer or director is, or was serving, at our request, in such capacity. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, the Company has director and officer insurance coverage that reduces the Company's exposure and enables the Company to recover a portion of any future amounts paid. The Company believes the estimated fair value of these indemnification agreements in excess of applicable insurance

coverage is minimal.

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Company accrues for loss contingencies when available information indicates that it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated in accordance with ASC 450, Contingencies.

Derivative Financial Instruments

The Company uses derivative instruments to manage its exposure to fluctuations in certain foreign currency exchange rates which exist as part of ongoing business operations. See Note 2. Summary of Significant Accounting Policies, Note 9. Accumulated Other Comprehensive Loss, and Note 10. Derivative Financial Instruments of Notes to Consolidated Financial Statements for a further discussion.

Note 15. Litigation

The Company is a party to various legal proceedings and claims arising from the normal course of its business activities, including proceedings and claims related to patents and other intellectual property related matters. The Company reviews the status of each matter and records a provision for a liability when it is considered both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed quarterly and adjusted as additional information becomes available. If both of the criteria are not met, the Company assesses whether there is at least a reasonable possibility that a loss, or additional losses, may be incurred. If there is a reasonable possibility that a material loss may be incurred, the Company discloses the estimate of the possible loss, range of loss, or a statement that such an estimate cannot be made.

Litigation is subject to inherent uncertainties. Were an unfavorable outcome to occur, there exists the possibility of a material adverse impact on the Company's financial position and results of operation for the period in which the unfavorable outcome occurred, and potentially in future periods.

Note 16. Related Party Transaction

Mark A. Bertelsen, a director of the Company since September 2002, serves as a member of Wilson Sonsini Goodrich & Rosati (“WSGR”), our principal outside legal counsel. Fees paid by the Company to WSGR for legal services rendered for the years ended December 31, 2013, 2012, and 2011 were \$1.9 million, \$1.0 million, and \$0.9 million, respectively. The Company believes that the services rendered by WSGR were provided on terms no more or less favorable than those with unrelated parties.

Note 17. Significant Customer Information and Segment Information

The Company is organized and operates in a single segment: the design, development, marketing, and sales of software solutions. The Company's chief operating decision maker is its Chief Executive Officer, who reviews financial information presented on a consolidated basis for purposes of making operating decisions and assessing financial performance. The Company markets its products and services in the United States and in foreign countries through its direct sales force and indirect distribution channels.

No customer accounted for more than 10% of revenue in 2013, 2012, and 2011. At December 31, 2013 and 2012, no customer accounted for more than 10% of the accounts receivable balance. North America revenues include the United States and Canada. Revenue from international customers (defined as those customers outside of North America) accounted for 32%, 35% and 34% of total revenues in 2013, 2012, and 2011, respectively.

Total revenue by geographic region is summarized as follows (in thousands):

	Years Ended December 31,		
	2013	2012	2011
Revenues:			
North America	\$642,707	\$524,191	\$516,348

Note 19. Acquisitions

Acquisition in 2013:

In February 2013, the Company acquired Active Endpoints, a privately-held company, for approximately \$10.0 million in cash. Active Endpoints designs, markets, and supports on-premise and cloud based process automation software solutions. Total assets acquired and liabilities assumed was approximately \$10.0 million of which approximately \$7.1 million was allocated to goodwill, \$3.8 million was allocated to identifiable intangible assets, and \$0.9 million to net liabilities assumed. The goodwill is not deductible for tax purposes.

Approximately \$1.5 million of the consideration otherwise payable to former Active Endpoints stockholders was placed into an escrow and held as partial security for certain indemnification obligations. The escrow fund will remain in place until May 2014.

Acquisition in 2012:

Heiler Software AG

In November 2012, the Company acquired a majority interest in the shares of Heiler Software, a publicly-traded German company at the end of the initial acceptance period of the takeover offer. The Company purchased the majority interest at a price of 7.04 Euro per share in cash, or approximately \$101.9 million. Heiler Software provides enterprise product information management, MDM and procurement solutions that enable retailers, distributors and manufacturers to manage product information across channels and data sources. As of December 31, 2012, the Company held approximately 97.7 percent of the outstanding shares of Heiler Software. During December 2012 and the first half of 2013, the Company acquired other shareholders' interest in Heiler Software for approximately \$6.8 million, for total cash consideration of approximately \$108.7 million. The squeeze-out of the remaining shareholders was effective in the second quarter of 2013, increasing the Company's ownership of Heiler Software to 100 percent. The fair value of the noncontrolling interest in Heiler at the acquisition date was \$2.9 million. The valuation techniques and significant inputs used to measure the fair value of the noncontrolling interest included quoted market prices.

Table of Contents

INFORMATICA CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table summarizes the fair value of assets acquired and liabilities assumed at the acquisition date (in thousands):

Net tangible assets	\$ 16,400	
Identifiable intangible assets:		
Developed and core technology	16,586	
Customer relationships	5,339	
Contract backlog	648	
Trade names	298	
In-process research and development	3,784	
Noncontrolling interest	(2,861)
Total identifiable net assets	40,194	
Goodwill	61,660	
Total cash consideration	\$ 101,854	

During the first quarter of 2013, the Company recorded \$2.8 million of additional accrued liabilities during the measurement period. The goodwill is not deductible for tax purposes.

Other Acquisitions in 2012

In addition, during 2012 the Company acquired Data Scout Solutions Group Limited and TierData, Inc., both of which were privately-held companies, for an aggregate consideration of approximately \$12.0 million in cash. Total assets acquired and liabilities assumed was approximately \$15.0 million of which approximately \$3.9 million was allocated to identifiable intangible assets, \$3.9 million to net liabilities assumed, and \$15.0 million was allocated to goodwill, which is partially deductible for tax purposes. Total acquiree transaction related costs and other liabilities was approximately \$1.9 million, and include legal, accounting, and consulting fees as of the date of the acquisitions. Approximately \$2.1 million of the consideration otherwise payable to former shareholders was held as partial security for certain indemnification obligations, and will be held back for payment until March 2014.

At the time of these two acquisitions, the Company was obligated to pay up to an additional \$6.0 million for certain variable and deferred earn-out payments based upon the achievement of certain performance targets. The Company determined the fair market value of these earn-outs based on probability analysis. The fair market value and gross amount of these earn-out payments were \$4.9 million and \$6.0 million, respectively. The fair value measurement is based on significant inputs not observed in the market and thus represents a Level 3 measurement, which reflects the Company's own assumptions in measuring fair value. The Company paid \$1.8 million and \$0.2 million in earn-out payments during the years ended December 31, 2013 and 2012, respectively. The fair value of the contingent consideration liability associated with these earn-outs was \$3.1 million as of December 31, 2013.

The Company's business combinations completed in 2013 and 2012 did not have a material impact on the Company's consolidated financial statements, and therefore pro forma disclosures have not been presented.

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures. Our management evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Report. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, were effective at the reasonable assurance level to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 (1) is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and (2) is accumulated and communicated to Informatica's management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Our disclosure controls and procedures are designed to provide reasonable assurance that such information is accumulated and communicated to our management. Our disclosure controls and procedures include components of our internal control over financial reporting. Management's assessment of the effectiveness of our internal control over financial reporting is expressed at the level of reasonable assurance because a control system, no matter how well designed and operated, can provide only reasonable, but not absolute, assurance that the control system's objectives will be met.

(b) Management's annual report on internal control over financial reporting. Management of Informatica is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Informatica's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements due to human error, or the improper circumvention or overriding of internal controls. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions and that the degree of compliance with the policies or procedures may change over time.

Management assessed the effectiveness of Informatica's internal control over financial reporting as of December 31, 2013. In making this assessment, management used the criteria set forth in the 1992 Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on its assessment of internal control over financial reporting, management has concluded that, as of December 31, 2013, Informatica's internal control over financial reporting was effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Informatica's independent registered public accounting firm, Ernst & Young LLP, has issued an attestation report on the effectiveness of Informatica's internal control over financial reporting, included in Part II, Item 8 of this Report.

(c) Change in internal control over financial reporting. There were no changes in our internal controls over financial reporting that occurred during the fourth quarter of 2013 that have materially affected, or are reasonably likely to

materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

Executive Officers of the Registrant

The following table sets forth certain information concerning our executive officers as of January 31, 2014:

Name	Age	Position(s)
Sohaib Abbasi	57	Chairman of the Board, Chief Executive Officer and President
Earl Fry	55	Chief Financial Officer, Chief Administrative Officer, Executive Vice President, Global Customer Support and Services, and Secretary
Margaret Brea	52	Executive Vice President and Chief Marketing Officer
Anil Chakravarthy	46	Executive Vice President and Chief Product Officer
Ivan Chong	46	Executive Vice President and Chief Strategy Officer
John McGee	50	Executive Vice President, Worldwide Field Operations

Our executive officers are appointed by, and serve at the discretion of, the Board of Directors. There is no family relationship between any of our executive officers or directors.

Sohaib Abbasi has been our President and Chief Executive Officer since July 2004 and a member of our Board of Directors since February 2004. From 2001 to 2003, Mr. Abbasi was Senior Vice President, Oracle Tools Division and Oracle Education at Oracle Corporation, which he joined in 1982. From 1994 to 2000, he was Senior Vice President Oracle Tools Product Division at Oracle Corporation. Mr. Abbasi graduated with honors from the University of Illinois at Urbana-Champaign in 1980, where he earned both a B.S. and an M.S. degree in computer science. Mr. Abbasi serves on the board of directors of Red Hat, Inc.

Earl Fry joined us as the Chief Financial Officer and Senior Vice President in December 1999. In July 2002, Mr. Fry became Secretary. In August 2003, Mr. Fry was promoted to Executive Vice President. In January 2010, Mr. Fry was promoted to Chief Administrative Officer and Executive Vice President, Global Customer Support. Prior to joining Informatica, Mr. Fry served as Vice President and Chief Financial Officer at Omnicell Technologies, Inc. and as Vice President and Chief Financial Officer at C*ATS Software, Inc. Mr. Fry holds a B.B.A. degree in accounting from the University of Hawaii and an M.B.A. degree from Stanford University. Mr. Fry serves on the Board of Directors of Central Pacific Financial Corporation.

Margaret Brea joined Informatica in December 2012 as our Executive Vice President and Chief Marketing Officer. Prior to joining Informatica, Ms. Brea held various positions at Hewlett-Packard from November 2010 to December 2012, most recently as Senior Vice President of Marketing Services. Ms. Brea also served as Executive Vice President and General Manager at SAP from January 2008 to November 2010. In addition, Ms. Brea served as Executive Vice President, General Manager and Chief Marketing Officer at Business Objects, Chief Marketing Officer and Chief Strategy Officer at BEA Systems, and in various positions at Sun Microsystems, including as Senior Vice President of Marketing. Ms. Brea holds a B.S. degree in electrical engineering from the University of Illinois and a M.B.A. degree from the University of Oregon. Ms. Brea serves on the board of directors of Jive Software, Inc.

Anil Chakravarthy joined Informatica in September 2013 as our Executive Vice President and Chief Product Officer. Prior to joining Informatica, Mr. Chakravarthy held various positions at Symantec Corporation from May 2004 to September 2013, most recently as Executive Vice President of Information Security. Prior to Symantec, Mr. Chakravarthy also led product management for enterprise security services at VeriSign from December 2001 to May 2004. Mr. Chakravarthy received a Bachelor of Technology in Computer Science and Engineering from the Institute of Technology, Varanasi, India, and received his M.S. and Ph.D. from the Massachusetts Institute of Technology.

Ivan Chong joined Informatica in October 1997 with responsibilities overseeing product management for Informatica's flagship product PowerCenter. In February 2005, Mr. Chong became Vice President of Product Marketing. In January 2007, Mr. Chong was promoted to Senior Vice President and General Manager for Informatica

Data Quality. In January 2010, Mr. Chong was promoted to Executive Vice President. Mr. Chong became our Chief Strategy Officer in October 2013. Prior to joining Informatica, Mr. Chong worked at NetGravity, an Internet advertising startup and had various product management roles at Oracle Corporation

Table of Contents

within the Oracle Tools Division. Mr. Chong holds both an M.S. degree and a B.S. degree from MIT's Department of Electrical Engineering and Computer Science.

John McGee joined Informatica in July 2012 as our Executive Vice President, Worldwide Field Operations. Prior to joining Informatica, Mr. McGee was President and Chief Operating Officer at Thunderhead Ltd. from September 2010 to December 2012. Prior to joining Thunderhead, Mr. McGee was Vice President of Americas Field Operations at Adobe Systems Incorporated from May 2007 to August 2010. Mr. McGee also served as Vice President of Americas Sales at EMC, and held previous sales roles at Documentum and Dun & Bradstreet. Mr. McGee holds a B.S. degree in finance from Pennsylvania State University and a M.B.A degree from Columbia University. Information with respect to our Directors, our Code of Business Conduct, and corporate governance matters is included under the caption "Proposal One - Election of Directors" in the Proxy Statement for the 2014 Annual Meeting of Stockholders, which proxy statement will be filed within 120 days of our fiscal year ended December 31, 2013 (the "2014 Proxy Statement"), and is incorporated herein by reference. Information regarding delinquent filers pursuant to Item 405 of Regulation S-K is included under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" in the 2014 Proxy Statement and is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is included under the captions, "Election of Directors - Director Compensation," "Compensation Committee Interlocks and Insider Participation," and "Executive Officer Compensation" in the 2014 Proxy Statement and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item is included under the captions "Security Ownership of Principal Stockholders and Management" and "Equity Compensation Plan Information" in the 2014 Proxy Statement and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item is included under the captions "Transactions with Management" and "Election of Directors" in the 2014 Proxy Statement and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item is included under the caption "Ratification of Appointment of Independent Registered Public Accounting Firm" in the 2014 Proxy Statement and is incorporated herein by reference.
