HICKORY TECH CORPORATION

MARCH 31, 2002

PART 1. FINANCIAL INFORMATION

ITEM 1. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS.

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information necessary for a fair presentation of results of operations, financial position, and cash flows in conformity with accounting principles generally accepted in the United States of America. In the opinion of management, the condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation of Hickory Tech Corporation s (HickoryTech) results for the periods presented. Operating results for interim periods are not necessarily indicative of results that may be expected for the fiscal year as a whole. The preparation of financial statements in conformity with accounting principles generally accepted account of financial statements and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures at the date of the financial statements and during the reporting period. Actual results could differ from these estimates. These unaudited interim condensed consolidated financial statements should be read in conjunction with HickoryTech s Annual Report on Form 10-K for the year ended December 31, 2001.

The consolidated financial statements of HickoryTech include Hickory Tech Corporation and its subsidiaries in the following three business segments: (i) Telecom Sector, (ii) Information Solutions Sector and (iii) Enterprise Solutions Sector. An investment in an unconsolidated partnership for the Information Solutions Sector is accounted for using the equity method. All intercompany transactions have been eliminated from the consolidated financial statements.

Beginning in the first quarter 2002, HickoryTech reports its previously reported business segments of Telephone, Communications Services and Wireless Services as a single segment referred to as the Telecom Sector. This new basis of segment reporting reflects the integration of HickoryTech s management, sales, service and support functions in these three areas, as well as reflecting the level at which management now reviews and makes resource allocation and other management decisions regarding the operations of the company. All segment information reported in 2001 has been reclassified to conform to this new presentation.

In addition to the change in business segments, certain reclassifications were made to the financial statements as of and for the three months ended March 31, 2001 to conform to the 2002 presentation. These reclassifications had no impact on previously reported operating income, net income or shareholders equity.

Operating expenses include all costs related to delivery of HickoryTech s communications services and products. These costs include all selling, general and administrative costs and all costs of performing services and providing related products, except for costs associated with the depreciation and amortization of property, plant and equipment and intangible assets.

NOTE 2. EARNINGS AND CASH DIVIDENDS PER COMMON SHARE

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the quarter. Shares used in the earnings per share assuming dilution calculation are based on the weighted average number of shares of common stock outstanding during the quarter increased by potentially dilutive common shares. Potentially dilutive common shares include stock options and stock subscribed under the employee stock purchase plan (ESPP).

	For Three months Ended			
	3/31/02	3/31/01		
Weighted Average Shares Outstanding	12 0/0 709	12 995 452		
Stock Options (dilutive only)	13,960,708 92,553	13,885,453 101,765		
Weighted Average Stock Subscribed (ESPP)	9,542	9,261		
Weighted Average Dilutive Shares Outstanding	14,062,803	13,996,479		

Options to purchase 76,650 shares and 38,750 shares for the three months ended March 31, 2002 and 2001, respectively, were not included in the computation of earnings per share assuming dilution because their effect on earnings per share would have been antidilutive.

Cash dividends are based on the number of common shares outstanding at the respective record dates. Listed below are the number of shares outstanding as of the record date for the first quarter of 2002 and 2001.

Shares Outstanding on Record Date	2002	2001
First Quarter (Feb. 15)	13,971,484	13,886,669

Dividends per share is based on the quarterly dividend per share as declared by the HickoryTech Board of Directors.

During the first three months of 2002 and 2001, shareholders have elected to reinvest \$60,000 and \$62,000, respectively, of dividends into HickoryTech common stock pursuant to the HickoryTech Dividend Reinvestment Plan.

NOTE 3. COMPREHENSIVE INCOME

For the three months ended March 31, 2002 and 2001, comprehensive income was comprised solely of net income.

NOTE 4. INVENTORIES

Inventories, which consist of equipment for resale, materials and supplies, are stated at the lower of average cost or market.

NOTE 5. INTANGIBLE ASSETS

HickoryTech adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets, effective January 1, 2002. SFAS No. 142 required that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead tested for impairment at least annually. Accordingly, at January 1, 2002, HickoryTech ceased amortizing its goodwill (net carrying value as of March 31, 2002 of \$25,086,000) and FCC licenses (net carrying value as of March 31, 2002 of \$75,635,000). HickoryTech also tested these intangible assets for impairment at January 1, 2002 pursuant to the method prescribed by SFAS No. 142 and determined that these assets carrying values are not impaired.

The following table adjusts previously reported net income to exclude amortization expense recognized from goodwill and FCC licenses as if SFAS No. 142 had taken effect in 2001:

(Dollars in Thousands, except Fer Share Amounts and shown Net of Income Tax)	For Three Months Ended				
		3/31/02		3/31/01	
Reported Net Income	\$	2,090	\$	1,963	
Goodwill Amortization				113	
FCC License Amortization				259	
Adjusted Net Income	\$	2,090	\$	2,335	
Basic and Diluted Earnings Per Share:					
Reported Net Income	\$	0.15	\$	0.14	
Goodwill Amortization				0.01	
FCC License Amortization				0.02	
Adjusted Net Income	\$	0.15	\$	0.17	

Upon adoption at January 1, 2002, SFAS No. 142 also required HickoryTech to reassess the useful lives over which its other intangible assets are amortized. These useful lives were not changed as a result of this reassessment and, accordingly, these assets continue to be amortized over periods ranging from two to eight years.

The components of HickoryTech s intangible assets are shown in the following table:

(Dollars in Thousands areant Par Share Amounts

	As of Mar Gross Carrying Amount	rch 31, 2002	Accumulated Amortization	
Amortized Intangible Assets				
Customers	\$ 1,701	\$		850
Other Intangibles	538			137
Total	\$ 2,239	\$		987
Unamortized Intangible Assets				
FCC Licenses	\$ 75,635			

Amortization expense related to the amortized intangible assets for the three months ended March 31, 2002 amounted to \$104,000. Total estimated amortization expense for 2002 and the five years subsequent to 2002 is as follows: 2002 - \$407,000; 2003 - \$248,000; 2004 - \$190,000; 2005 - \$190,000; 2006 - \$146,000 and 2007 - \$102,000.

NOTE 6. RECENT ACCOUNTING DEVELOPMENTS

HickoryTech adopted the provisions of SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets, as of January 1, 2002. SFAS No. 144 requires that long-lived assets that are to be disposed of by sale be measured at the lower of book value or fair value less cost to sell and also sets forth requirements for recognizing and measuring impairment losses on certain long-lived assets to be held or used. The adoption of SFAS No. 144 had no impact on HickoryTech s financial position or its results of operations.

In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, Accounting for Asset Retirement Obligations, which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets that result from the acquisition, construction, development or normal use of the asset. SFAS No. 143 is effective January 1, 2003. HickoryTech is currently evaluating the provisions of SFAS No. 143 and does not expect that adoption will have a material impact on its financial position or its results of operations.

NOTE 7. QUARTERLY SECTOR FINANCIAL SUMMARY

NOTE 8. CONTINGENCIES

HickoryTech is involved in certain contractual disputes in the ordinary course of business. HickoryTech does not believe the ultimate resolution of any of these existing matters will have a material adverse effect on its financial position, results of operations or cash flows.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

FORWARD-LOOKING STATEMENTS

This Form 10-Q contains forward-looking statements that are based on management s current expectations, estimates and projections about the industry in which HickoryTech operates and management s beliefs and assumptions. Such forward-looking statements are subject to important risks and uncertainties that could cause HickoryTech s future actual results to differ materially from such statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and probabilities, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements, whether as a result of new information, future events or otherwise. Factors that might cause such a difference include, but are not limited to, those contained in this Management s Discussion and Analysis (Item 2) and Exhibit 99 (Cautionary Statement for Purposes of the Safe Harbor Provision of the Private Securities Litigation Reform Act of 1995) to HickoryTech s Annual Report on Form 10-K for the year ended December 31, 2001, which is incorporated herein by reference. You are cautioned not to place undue raliance on these forward looking statements, which search only as of the

incorporated herein by reference. You are cautioned not to place undue reliance on these forward looking statements, which speak only as of the date on which they were made. Except as otherwise required by law, HickoryTech undertakes no obligation to update any of its forward-looking statements for any reason.

BUSINESSES

The business segments of HickoryTech are:

TELECOM SECTOR

HickoryTech s Telecom Sector (formerly the individual Telephone Sector, Communications Services Sector and Wireless Services Sector) provides local exchange wireline and wireless telephone service, long distance, dial-up internet access and owns and operates fiber optic cable facilities. This sector includes three incumbent local exchange carriers (ILECs). Two ILECs provide telephone service in south central Minnesota, specifically Mankato (a small urban city) and eleven rural communities surrounding Mankato. The third ILEC provides telephone service for eleven rural communities in northwest Iowa. This sector also includes HickoryTech s competitive local exchange carrier (CLEC), which provides local telephone service, long distance and dial-up internet access on a competitive basis to customers in eight rural communities in Minnesota and six rural communities in Iowa not in HickoryTech s ILEC service areas. The Telecom Sector also owns and operates a wireless telephone business in south central Minnesota. The wireless telephone business consists of the A-side FCC cellular license to operate in Minnesota s Rural Service Area (RSA) 10, the Minneapolis/St. Paul Metro A-2 cellular license and two digital personal communications services (PCS) licenses covering the Minnesota Basic Trading Areas (BTAs) of Mankato-Fairmont and Rochester-Austin-Albert Lea. HickoryTech also owns and operates fiber optic cable facilities in Minnesota, which are used to transport interexchange communications as a service to telephone industry customers. HickoryTech s Minnesota ILECs and its CLEC are the primary users of the fiber optic cable facilities.

INFORMATION SOLUTIONS SECTOR

HickoryTech s Information Solutions Sector provides data processing and related services, principally for HickoryTech, other ILECs, CLECs, interexchange network carriers, wireless companies, municipalities and utilities. HickoryTech s Information Solutions Sector s principal activity

is the provision of monthly batch processing of computerized data. This sector has developed a new integrated billing and management system called SuiteSolution. For internal use, SuiteSolution enables HickoryTech to become a full-service billing provider for all aspects of the telecommunications industry on a fully integrated basis. For external use, SuiteSolution can provide wireline and wireless carriers the individual benefits of a billing platform, or to integrated service providers, such as HickoryTech, a total system. The Information Solutions Sector also has many popular legacy systems, such as its carrier access billing products.

⁹

ENTERPRISE SOLUTIONS SECTOR

The Enterprise Solutions Sector s activities are focused on the sale, installation and service of business telephone systems and data communications equipment to companies based in metropolitan Minneapolis/St. Paul, Minnesota. This sector also supports the business telephone system service for HickoryTech ILEC and CLEC operations in Minnesota and Iowa.

RESULTS OF OPERATIONS

CONSOLIDATED OPERATING RESULTS

The following is a summarized discussion of consolidated results of operations. More detailed discussion of operating results by segment follows this discussion.

<u>OPERATING REVENUES</u> - Consolidated operating revenues were \$2,119,000 or 7.8% lower for the three months ended March 31, 2002 than for the three months ended March 31, 2001. The revenue decrease was primarily attributable to a lower volume of business in the Enterprise Solutions Sector and a continuing decline in roaming revenue in the Telecom Sector. These decreases were partially offset by a 5.2% increase in HickoryTech s total customer base in its Telecom Sector, in addition to the impact of local rate increases by HickoryTech s ILECs, also in the Telecom Sector.

<u>OPERATING EXPENSES (excluding Depreciation and Amortization)</u> - Operating expenses for the three months ended March 31, 2002 decreased \$1,856,000 or 10.7% compared with the same period in 2001. Included in operating expenses were cost of sales of HickoryTech s Enterprise Solutions Sector of \$2,184,000 and \$3,401,000 for the three months ended March 31, 2002 and 2001, respectively. The decrease in operating expenses was primarily due to lower cost of sales at the Enterprise Solutions Sector as a result of lower sales volumes in 2002 compared to 2001. In addition, operating expenses are lower in the Telecom Sector due to continued management actions aimed at reducing costs.

<u>DEPRECIATION AND AMORTIZATION</u> - Depreciation expense for the three months ended March 31, 2002 was \$867,000 or 29.4% higher than for the same period in 2001. The buildout of HickoryTech s CLEC and fiber optic networks primarily account for the increase in depreciation expense. Amortization expense for the three months ended March 31, 2002 was \$428,000 or 54.2% lower than for the same period in 2001. If SFAS No. 142 had taken effect in 2001, amortization expense for the first quarter 2002 would have increased \$202,000 over the first quarter 2001 due to amortization of capitalized software development costs related to the Information Solutions Sector s SuiteSolution billing software.

<u>OPERATING INCOME</u> - Operating income was 11.4% lower for the three months ended March 31, 2002 than for the three months ended March 31, 2001. The decrease in operating income primarily reflects the impact of the decrease in operating revenues for this period and the increase in depreciation expense related to building out the infrastructure of the CLEC business in the Telecom Sector. These impacts were partially offset by the effect of management actions aimed at reducing operating expenses and lower amortization expense due to the adoption of SFAS No. 142.

INTEREST EXPENSE - Interest expense decreased \$916,000 or 31.9% for the three months ended March 31, 2002, compared to the same period in 2001. The decrease in interest expense was due to a decrease in the weighted average interest rate on HickoryTech s revolving credit facility from 8.02% on March 31, 2001 to 5.16% on March 31, 2002, partially offset by an increase in long-term obligations of \$13,393,000 as of March 31, 2002, compared to March 31, 2001. The outstanding balance of the revolving credit facility was \$165,750,000 on March 31, 2002.

<u>NET INCOME</u> - Consolidated net income for the three months ended March 31, 2002 was \$127,000 or 6.5% higher than the comparable period in 2001. If SFAS No. 142 had taken effect in 2001, net income for the first quarter 2002 would have decreased \$245,000 or 10.5% compared to the first quarter 2001. The primary reasons for this decrease in net income for HickoryTech were the decrease in operating revenues and the increase in depreciation expense due to the building out of the CLEC infrastructure.

SECTOR RESULTS OF OPERATIONS

<u>TELECOM</u> The following table provides a breakdown of the Telecom Sector operating results for the first quarter 2002 and 2001.

TELECOM

(Dollars in Thousands)		For Three Months Ended

Edgar Filing: HICKORY	TECH CORP - Form 10-Q
-----------------------	-----------------------

Capital Expenditures	\$ 2,787	\$ 5,331
ILEC Access Lines	66,212	67,305
CLEC Access Lines		
Overbuild	6,241	2,293
UNE	1,188	1,786
TSR	4,304	5,348
Total	11,733	9,427
Long Distance Customers	25,436	19,901
Internet Customers	13,517	12,869
Wireless Customers	26,091	26,470
Total Telecom Customers	142,989	135,972

Operating revenues before intersegment eliminations for the three months ended March 31, 2002 decreased \$372,000 or 1.8% compared with the same period in 2001. Amana Colonies Telephone Company (ACTC), which was sold on August 6, 2001, contributed \$341,000 of revenues to this sector during the first three months of 2001. Local service rates were increased in HickoryTech s Iowa ILEC in May 2001 and in the Minnesota ILECs in December 2001, which contributed \$281,000 of revenue in the first three months of 2002. Without the local service rate increases and excluding the revenues from ACTC, Telecom revenues would have decreased \$312,000 or 1.5% for the first three months of 2002 compared to the same period in 2001. The primary reason for the decrease in operating revenues was a decline of \$893,000 in roaming revenue. Roaming minutes from other wireless carriers customers travelling into HickoryTech s cellular service territory have continued to erode, particularly due to technological changes among other wireless providers which re-route the roaming minutes from HickoryTech s wireless service towers to other providers. In addition, other PCS wireless carriers have continued to build-out PCS licenses in RSA 10. The resultant decline in roaming revenue associated with this volume decrease was partially offset by an increase of \$206,000 in local service revenue from HickoryTech s growing CLEC customer base.

Operating expenses excluding depreciation and amortization decreased \$1,071,000 or 9.1% for the three months ended March 31, 2002 compared to the same period in 2001. One reason for the decrease in operating expenses was the improved efficiencies achieved in the design and operation of HickoryTech s network as it pertains to its CLEC and internet operations. In addition, management actions aimed at reducing operating costs, which began in the first quarter of 2001, and the combination of certain business office functions aided in reducing operating expenses for this sector. HickoryTech has also performed specific cost reduction initiatives such as using its PCS network to reduce roaming expense for its wireless product, closely auditing the interconnection fees paid to other carriers for its CLEC product and reducing the plant installation and engineering workforce of its Network Design and Operations Division. The employment levels in this sector are 10% lower than in 2001, mostly due to re-arrangements and attrition.

Depreciation and amortization for the three months ended March 31, 2002 increased \$50,000 or 1.4% compared with the same period in 2001. Depreciation expense for the three months ended March 31, 2002 increased \$651,000 or 23.1% compared with the same period in 2001. The buildout of HickoryTech s CLEC and fiber optic networks primarily account for the increase in depreciation expense. For the three months ended March 31, 2002 compared to the same period in 2001, depreciation expense increased \$233,000 or 11.9% for the networks associated with its ILEC product and \$463,000 or 161.3% for the networks associated with its CLEC product. Amortization expense for the three months ended March 31, 2002 decreased \$601,000 or 90.1% compared with the same period in 2001. If SFAS No. 142 had taken effect in 2001, amortization expense for the first quarter 2002 would have increased \$19,000 over the first quarter 2001

Operating income increased \$649,000 or 11.1% for the three months ended March 31, 2002 compared with the same period in 2001. Net income increased \$440,000 or 13.0% for the three months ended March 31, 2002 compared with the same period in 2001. If SFAS No. 142 had taken effect in 2001, operating income and net income for the first quarter 2002 would have increased \$29,000 or 0.5% and \$89,000 or 2.4%, respectively, compared with the same period in 2001.

EBITDA(1) increased \$699,000 or 7.5% for the three months ended March 31, 2002 compared to the same period in 2001. The EBITDA(1) margin for this sector was 48.3% for the three months ended March 31, 2002 compared to 44.2% for the same period in 2001. The increase in EBITDA and EBITDA margin was primarily because of the management actions taken to reduce operating expenses.

INFORMATION SOLUTIONS The following table provides a breakdown of the Information Solutions Sector operating results for the first quarter 2002 and 2001.

INFORMATION SOLUTIONS

(Dollars in Thousands)	For Three Months Ended				
		3/31/02		3/31/01	
Revenues Before Intersegment Eliminations					
Unaffiliated Customers	\$	1,034	\$	978	
Intersegment		915		1,303	
		1,949		2,281	
Operating Expenses, excluding Depr. and					
Amort.		1,964		1,619	
Depreciation and Amortization		510		100	
Operating Income/(Loss)	\$	(525)	\$	562	
Net Income/(Loss)	\$	(352)	\$	322	
Earnings Before Interest, Taxes,					
Depreciation and Amortization (EBITDA) (1)	\$	(15)	\$	662	
		. ,			
Capital Expenditures	\$	522	\$	31	

Operating revenues from unaffiliated customers for the three months ended March 31, 2002 increased \$56,000 or 5.7% compared with the same period in 2001. The increase in operating revenues was the result of new customer relationships for monthly batch processing utilizing this sector s legacy software systems, as well as the implementation of the predecessor to SuiteSolution called WRITE2K by a new customer.

Operating expenses excluding depreciation and amortization increased \$345,000 or 21.3% for the three months ended March 31, 2002 compared with the same period in 2001. This sector capitalized internal development costs associated with SuiteSolution during the first quarter of 2001. The capitalization of these costs ended during the third quarter of 2001 as the development of SuiteSolution had reached the point where the product was available for release to customers. As a result of development costs no longer being capitalized, operating expenses for this sector were higher in the first quarter of 2002 as development personnel were deployed on routine operating and implementation duties.

Depreciation and amortization for the three months ended March 31, 2002 increased \$410,000 or 410.0% compared with the same period in 2001. Depreciation expense for the three months ended March 31, 2002 was \$199,000 higher than the three months ended March 31, 2001. The increase was due to depreciation expense recorded on capitalized leases for new computer equipment and other capital expenditures related to the development and implementation of SuiteSolution. Amortization expense for the three months ended March 31, 2001. The increase was due to the amortization of capitalized SuiteSolution development costs, which began in the third quarter of 2001.

Operating income decreased \$1,087,000 or 193.5% for the three months ended March 31, 2002 as compared to the same period in 2001. Net income decreased \$674,000 or 209.3% for the three months ended March 31, 2002 compared to the same period in 2001. The decrease in operating income and net income was attributable to the increase in operating expenses, including depreciation and amortization.

EBITDA(1) decreased \$677,000 or 102.3% for the quarter ended March 31, 2002 compared to the same period in 2001. The EBITDA(1) margin for this sector was (0.8%) for the quarter ended March 31, 2002 compared to 29.0% for the same quarter in 2001. The decrease in EBITDA and the EBITDA margin was primarily due to increased operating expenses, and the fact that this sector has finished development of its next key software platform, and external revenue for the new product is being delayed while HickoryTech applies the software for its internal use.

¹³

<u>ENTERPRISE SOLUTIONS</u> The following table provides a breakdown of the Enterprise Solutions Sector operating results for the first quarter 2002 and 2001.

(Dollars in Thousands)	For Three M	onths I	Inded

ENTERPRISE SOLUTIONS

Operating revenues for the three months ended March 31, 2002 decreased \$1,804,000 or 34.9% compared with the same period in 2001. Sales volumes in the first quarter 2002 are down in this sector compared to the first quarter 2001. Installation revenue for the three months ended March 31, 2002 was 44.9% lower compared to the same period in 2001, primarily a result of a 70.3% decrease in sales and installations of PBX and small business systems. Service revenue for the three months ended March 31, 2002 was 25.4% lower compared to the same period in 2001. This sector has encountered across the board reductions in demand in all of its major products and services. The reduction occurred in early 2002, and is believed to be associated with the economy s effect on customers of this sector, and due to the crossroads of technology (i.e. voice vs. data protocol) in the communications products which this sector provides. These factors appear to be affecting the industry and not merely this sector in any unique way. It is unknown when the factors will revert and allow customer demand to return to normal levels.

Operating expenses excluding depreciation and amortization decreased \$1,271,000 or 27.0% for the three months ended March 31, 2002 compared to the same period in 2001. The primary reason for the decrease in operating expenses was a \$1,217,000 or 35.8% decline in cost of sales, which correlates to the decrease in sales volumes. Other operating expenses have also been reduced through proactive management steps, such as workforce reduction.

Depreciation and amortization for the three months ended March 31, 2002 decreased \$15,000 or 17.6% compared with the same period in 2001. Depreciation expense for the three months ended March 31, 2002 increased \$8,000 compared with the same period in 2001. Due to the implementation of SFAS No. 142, there was no amortization expense for the first three months of 2002. If SFAS No. 142 had taken effect in 2001, then no amortization expense would have been recorded in 2001.

Operating income decreased \$518,000 to a loss of \$151,000 for the three months ended March 31, 2002 compared to income of \$367,000 for the three months ended March 31, 2001. Net income decreased \$304,000 or 148.3% for the three months ended March 31, 2002 compared to the same period in 2001. If SFAS No.142 had taken effect in 2001, operating income and net income would have decreased \$541,000 and \$318,000, respectively, for the three months ended March 31, 2002 compared with the same period in 2001. The decrease in operating income and net income was attributable to the decrease in sales volumes.

EBITDA (1) decreased \$533,000 or 117.9% for the three months ended March 31, 2002 compared to the same period in 2001. The EBITDA (1) margin for this sector was (2.4%) for the quarter ended March 31, 2002 compared to 8.8% for the same quarter in 2001. The decline in EBITDA and the EBITDA margin was primarily due to the decrease in operating revenues, combined with a slower reduction in operating expenses.

LIQUIDITY AND CAPITAL RESOURCES

<u>CAPITAL STRUCTURE</u> The total long-term capital structure (long-term obligations plus shareholders equity) for HickoryTech was \$246,995,000 at March 31, 2002, reflecting 33.0% equity and 67.0% debt. This compares to a capital structure of \$250,424,000 at December 31, 2001, reflecting 32.3% equity and 67.7% debt. Management believes adequate internal and external resources are available to finance ongoing operating requirements, including capital expenditures, business development, debt service and the payment of dividends for at least the next twelve months.

<u>CASH FLOWS</u> Cash provided by operations was \$7,908,000 for the three-month period ended March 31, 2002 compared to \$3,398,000 for the three-month period ended March 31, 2001. Cash flows from operations for the three months ended March 31, 2002 and 2001 were primarily attributable to net income plus non-cash expenses for depreciation and a mortization and a decrease in receivables, partially offset by decreases in accounts payable related to timing of payments. The increase in cash flows from operations in the first quarter of 2002 relative to the same period in 2001 was primarily due to a \$3,127,000 reduction in receivables during the first quarter of 2002.

Cash flows used in investing activities were \$3,216,000 for the three months ended March 31, 2002 compared to \$6,912,000 for the same period in 2001. Capital expenditures relating to ongoing businesses were \$3,488,000 during the first three months of 2002 as compared to \$5,400,000 for the same period in 2001. Capital expenditures were incurred primarily to construct additional network facilities to provide CLEC services and continued buildout of the PCS network in the Telecom Sector. Also included in cash flows used in investing activities for the three months ended March 31, 2001 were additions to capitalized software development costs for the Information Solutions Sector s SuiteSolution billing product of \$1,513,000.

Cash flows used in financing activities was \$5,682,000 for the three-month period ended March 31, 2002 compared to cash flows provided by financing activities of \$3,238,000 for the three-month period ended March 31, 2001. Included in cash flows from financing activities are debt borrowings, debt repayments, and dividend payments. During the first three months of 2002, HickoryTech made payments on its revolving credit facility of \$4,250,000. During the first three months of 2001, HickoryTech borrowed \$5,000,000 under its revolving credit facility to cover cash requirements, primarily for capital expenditures. Dividend payments for the first three months of 2002 were \$1,537,000 compared to \$1,527,000 for the same period in 2001.

WORKING CAPITAL Working capital was \$10,850,000 as of March 31, 2002, compared to working capital of \$13,737,000 as of December 31, 2001. The decrease is primarily due to the decreases in cash, accounts receivable and income taxes receivable. The ratio of current assets to current liabilities was 1.9:1.0 as of March 31, 2002 and 2.0:1.0 as of December 31, 2001.

<u>LONG-TERM OBLIGATIONS</u> - HickoryTech s long-term obligations as of March 31, 2002 was \$165,521,000, excluding current maturities of \$1,362,000. As of March 31, 2002, HickoryTech had a \$223,750,000 credit facility with a syndicate of banks. The credit facility is comprised of a \$125,000,000 revolving credit component and a \$98,750,000

term loan component. The available line of credit on the \$125,000,000 revolving credit component decreases in increments beginning in March 2004 with a final maturity date in September 2008. The term loan component requires equal quarterly principal payments of \$250,000 during the period March 2001 to December 2008, and \$23,000,000 of principal payments per quarter in 2009. The weighted average interest rate associated with this credit facility varies with LIBOR and certain other rates and was 5.16% at March 31, 2002. As of March 31, 2002, HickoryTech had drawn \$165,750,000 on this credit facility and had \$58,000,000 of available credit. In April 2002, HickoryTech reduced its revolving credit facility by \$40,000,000 to \$183,750,000. Management believes the remaining available credit is sufficient to cover future cash requirements and expects reductions in interest expense for the remainder of 2002 as a result of the lower credit facility.

HickoryTech s Information Solutions Sector leases certain computer equipment under capital lease arrangements. During the first quarter 2002, this sector recorded additions to property, plant and equipment of \$337,000 related to these capital lease arrangements.

The following table sets forth HickoryTech s contractual obligations, along with the cash payments due each period (long-term debt and capital lease payments do not include associated interest):

(Dollars in Thousands)		I	Remainder	Paym	ents Due by Year 2003 to	2006 to	2008 and
	Total		of 2002		2005	2007	after
Contractual Obligations							
Long-term Debt	\$ 165,750	\$	750	\$	3,000	\$ 40,875	\$ 121,125
Capital Lease Obligations	1,133		264		869		
Operating Leases	3,529		801		1,749	298	681
Total Contractual Cash Obligations	\$ 170.412	\$	1.815	\$	5.618	\$ 41.173	\$ 121,806

The total commitment to HickoryTech on its revolving credit facility expires as follows:

(Dollars in Thousands)	Amount of Commitment Expiration per Year								
			Remainder		2003 to	_	2006 to		2008 and
	Total		of 2002		2005		2007		after
Revolving Credit Component	\$ 125,000	\$		\$	37,500	\$	59,375	\$	28,125

<u>OTHER</u> - HickoryTech operates with original equity capital, retained earnings and recent additions to indebtedness in the form of bank term and revolving lines of credit. HickoryTech believes its current level of debt to total capital is acceptable for ongoing operations.

HickoryTech primarily uses variable interest rate financial instruments as of March 31, 2002. HickoryTech continually monitors the interest rates on its bank loans. A lower level of interest expense is likely to occur because of more limited use of the revolving credit facility for capital expenditures and potentially lower weighted average interest rates.

RECENT ACCOUNTING DEVELOPMENTS

HickoryTech adopted the provisions of SFAS No. 142, Goodwill and Other Intangible Assets, effective January 1, 2002. SFAS No. 142 required that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead tested for impairment at least annually. Accordingly, at January 1, 2002, HickoryTech ceased amortizing its goodwill (net carrying value as of March 31, 2002 of \$25,086,000) and FCC licenses (net carrying value as of March 31, 2002 of \$75,635,000). HickoryTech also tested these intangible assets for impairment at January 1, 2002 pursuant to the method prescribed by SFAS No. 142 and determined that these assets carrying values are not impaired.

The following table adjusts previously reported net income to exclude amortization expense recognized from goodwill and FCC licenses as if SFAS No. 142 had taken effect in 2001:

(Dollars in Thousands, except Per Share Amounts and shown Net of Income Tax)	For Three Months Ended					
		3/31/02		3/31/01		
Reported Net Income	\$	2,090	\$	1,963		
Goodwill Amortization				113		
FCC License Amortization				259		
Adjusted Net Income	\$	2,090	\$	2,335		
Basic and Diluted Earnings Per Share:						
Reported Net Income	\$	0.15	\$	0.14		
Goodwill Amortization				0.01		
FCC License Amortization				0.02		
Adjusted Net Income	\$	0.15	\$	0.17		

Upon adoption at January 1, 2002, SFAS No. 142 also required HickoryTech to reassess the useful lives over which its other intangible assets are amortized. These useful lives were not changed as a result of this reassessment and, accordingly, these assets continue to be amortized over periods ranging from two to eight years.

HickoryTech also adopted the provisions of SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets. SFAS No. 144 requires that long-lived assets that are to be disposed of by sale be measured at the lower of book value or fair value less cost to sell and also sets forth requirements for recognizing and measuring impairment losses on certain long-lived assets to be held or used. The adoption of SFAS No. 144 had no impact on HickoryTech s financial position or its results of operations.

In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, Accounting for Asset Retirement Obligations, which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets that result from the acquisition, construction, development or normal use of the asset. SFAS No. 143 is effective January 1, 2003. HickoryTech is currently evaluating the provisions of SFAS No. 143 and does not expect that adoption will have a material impact on its financial position or its results of operations.

⁽¹⁾ EBITDA represents operating income plus depreciation and amortization expense. EBITDA margin represents EBITDA divided by total operating revenues before eliminations. EBITDA, which is not a measure of financial performance or liquidity under generally accepted accounting principles, is provided because such information is used by certain investors when analyzing the financial position and performance of HickoryTech. Because of the variety of methods used by companies and analysts to calculate EBITDA, and the fact that EBITDA calculations may not accurately measure a company s ability to meet debt service requirements, caution should be used in relying on any EBITDA presentation. HickoryTech sees value in disclosing its calculation of EBITDA for the financial community and in displaying the change in EBITDA. HickoryTech believes an increasing EBITDA depicts increased ability to attract financing and increased valuation of HickoryTech s business.

¹⁷

ITEM 3. QUANTATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

HickoryTech does not have operations subject to risks of foreign currency fluctuations, or does HickoryTech use derivative financial instruments in its operations or investment portfolio. HickoryTech s earnings are affected by changes in interest rates as a portion of its long-term debt has variable interest rates based on LIBOR. If interest rates for the portion of HickoryTech s long-term debt based on variable rates had averaged 10% more for the entire quarter ended March 31, 2002, HickoryTech s interest expense would have increased \$218,000 for the three months ended March 31, 2002. In case of a change of such magnitude, management would likely act to mitigate its exposure to the change by converting a portion of its variable-rate debt.

PART II. OTHER INFORMATION

Item 1.	Legal Proceedings.					
	None					
Item 2.	Changes in Securities. None					
Item 3.	Default Upon Senior Securities. None					
Item 4.	Submission of Matters to a Vote of Security Holders. None					
Item 5.	Other Information. None.					
Item 6.	Exhibits and Reports of Form 8-K.					
	(a)	Exhibits None.				
	(b)	No reports on Form 8-K were filed during the quarter ended March 31, 2002.
