HICKORY TECH CORPORATION

MARCH 31, 2003

PART 1. FINANCIAL INFORMATION

ITEM 1. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information necessary for a fair presentation of results of operations, financial position, and cash flows in conformity with accounting principles generally accepted in the United States of America. In the opinion of management, the condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation of Hickory Tech Corporation's (HickoryTech) results for the periods presented. Operating results for interim periods are not necessarily indicative of results that may be expected for the fiscal year as a whole. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures at the date of the financial statements and during the reporting period. Actual results could differ from these estimates. These unaudited interim condensed consolidated financial statements should be read in conjunction with HickoryTech's Annual Report on Form 10-K for the year ended December 31, 2002.

The consolidated financial statements of HickoryTech include Hickory Tech Corporation and its subsidiaries in the following three business segments: (i) Telecom Sector, (ii) Information Solutions Sector and (iii) Enterprise Solutions Sector. An investment in an unconsolidated partnership for the Information Solutions Sector is accounted for using the equity method. All intercompany transactions have been eliminated from the consolidated financial statements.

Certain reclassifications were made to the financial statements as of and for the three months ended March 31, 2002 to conform to the 2003 presentation. These reclassifications had no impact on previously reported operating revenue, net income or shareholders' equity.

Operating expenses include all costs related to delivery of HickoryTech's communications services and products. These costs include all selling, general and administrative costs and all costs of performing services and providing related products, except for costs associated with the depreciation and amortization of property, plant and equipment and intangible assets.

NOTE 2. EARNINGS AND CASH DIVIDENDS PER COMMON SHARE

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the quarter. Shares used in the earnings per share assuming dilution calculation are based on the weighted average number of shares of common

Edgar Filing: HICKORY TECH CORP - Form 10-Q

stock outstanding during the quarter increased by potentially dilutive common shares. Potentially dilutive common shares include stock options and stock subscribed under the employee stock purchase plan (ESPP).

Edgar Filing: HICKORY TECH CORP - Form 10-Q

	For Three Months Ended	
	3/31/2003	3/31/2002
Weighted Average Shares Outstanding	13,993,696	13,960,708
Stock Options (dilutive only)	2,535	92,553
Weighted Average Stock Subscribed (ESPP)	11,095	9,542
Weighted Average Dilutive Shares Outstanding	14,007,326	14,062,803

Options to purchase 555,835 shares and 76,650 shares for the three months ended March 31, 2003 and 2002, respectively, were not included in the computation of earnings per share assuming dilution calculation because their effect on earnings per share would have been antidilutive.

Cash dividends are based on the number of common shares outstanding at the respective record dates. Listed below are the number of shares outstanding as of the record date for the first quarter of 2003 and 2002.

Shares Outstanding on Record Date	2003	2002
First Quarter (Feb. 15)	14,003,335	13,971,484

Dividends per share is based on the quarterly dividend per share as declared by the HickoryTech Board of Directors.

During the first three months of 2003 and 2002, shareholders have elected to reinvest \$66,000 and \$60,000, respectively, of dividends into HickoryTech common stock pursuant to the HickoryTech Dividend Reinvestment Plan.

NOTE 3. COMPREHENSIVE INCOME

For the three months ended March 31, 2003 and 2002, comprehensive income was comprised solely of net income.

NOTE 4. INVENTORIES

Inventories, which consist of equipment for resale, materials and supplies, are stated at the lower of average cost or market.

NOTE 5. INTANGIBLE ASSETS

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Effective January 1, 2002, HickoryTech adopted SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 142 established new standards related to how acquired goodwill and other intangible assets are to be recorded upon their acquisition as well as how they are to be accounted for after they have been initially recognized in the financial statements.

Effective with the adoption of this standard, HickoryTech is no longer amortizing acquired goodwill. Instead, SFAS No. 142 requires acquired goodwill to be evaluated for impairment using a two-step test based upon a fair value approach. The first step is used to identify potential impairment, while the second step calculates the amount of impairment, if any. Upon adoption of this standard, HickoryTech completed a transitional impairment test for its acquired goodwill, determining the fair value using primarily a discounted cash flow model. The determined fair value was sufficient to pass the first step impairment test, and therefore no impairment was recorded.

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Additionally, upon adoption of SFAS No. 142, HickoryTech was required to reassess the useful lives of its other intangible assets. HickoryTech's other intangible assets primarily consist of wireless FCC licenses (FCC licenses). HickoryTech's FCC licenses have terms of ten years, but are renewable. The renewal of FCC licenses is a routine matter involving a nominal fee and HickoryTech has determined that no legal, regulatory, contractual, competitive, economic or other factors currently exist that limit the useful life of its FCC licenses. As such, effective with the adoption of SFAS No. 142, HickoryTech is no longer amortizing FCC licenses as they are deemed to be intangible assets that have indefinite lives. Prospectively, HickoryTech will continue to periodically reevaluate its determination of an indefinite useful life with regards to FCC licenses. SFAS No. 142 requires that indefinite lived intangible assets be tested for impairment by comparing the fair value of the assets to their carrying amount. Upon adoption of this standard, HickoryTech completed a transitional impairment test for FCC licenses, calculating fair value using primarily a discounted cash flow model and corroborating marketplace transactions, and determined that there was no impairment to be recorded. The FCC licenses were tested for impairment on an aggregate basis, which is consistent with HickoryTech's management of the wireless business within the Telecom Sector. HickoryTech also re-assessed the useful life of its other intangible assets and concluded that the existing lives of up to eight years should be continued.

On a prospective basis, HickoryTech is required to test both acquired goodwill and FCC licenses for impairment on an annual basis based upon a fair value approach. Additionally, goodwill shall be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of an entity below its carrying value. Other indefinite-lived intangible assets will be tested between annual tests if events or changes in circumstances indicate that the asset might be impaired.

HickoryTech will test for impairment of acquired goodwill and FCC licenses at the end of the fourth quarter of 2003, unless events or occurrences deem it necessary to test for impairment in an interim period.

The carrying value of HickoryTech's goodwill is \$25,086,000 as of March 31, 2003 and December 31, 2002.

The components of HickoryTech's other intangible assets are shown in the following table:

(Dollars in Thousands)	As of March 31, 2003		As of December 31, 2002	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Definite-Lived Intangible Assets				
Customers	\$ 821	\$ 263	\$ 821	\$ 237
Other Intangibles	150	100	185	100
Total	\$ 971	\$ 363	\$ 1,006	\$ 337
Indefinite-Lived Intangible Assets				
FCC Licenses	\$ 34,000		\$ 34,000	

Amortization expense related to the definite-lived intangible assets for the three months ended March 31, 2003 amounted to \$26,000. Total estimated amortization expense for 2003 and the five years subsequent to 2003 is as follows: 2003 - \$102,000; 2004 - \$102,000; 2005 - \$102,000; 2006 - \$102,000; 2007 - \$102,000 and 2008 - \$74,000.

NOTE 6. RECENT ACCOUNTING DEVELOPMENTS

In June 2001, the FASB issued SFAS No. 143, *Accounting for Asset Retirement Obligations*. SFAS No. 143 requires entities to record the fair value of the liability for legal obligations associated with an asset retirement in the period in which the obligation is incurred. When the liability is initially recorded, the entity capitalizes the cost of the asset retirement obligation by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset.

HickoryTech's incumbent local exchange carrier companies (ILECs) follow the provisions of SFAS No. 71, and therefore conform to the accounting principles as prescribed by the respective state public utilities commissions and other federal agencies and, where applicable, accounting principles generally accepted in the United States of America. On December 20, 2002, the Federal Communications Commission (FCC) notified carriers that they would not adopt SFAS No. 143 for regulatory accounting purposes. At January 1, 2003, HickoryTech determined the amount of asset retirement obligations required to be recorded for its ILEC companies under the provisions of SFAS No. 143 were not significant, and therefore the implementation of SFAS No. 143 on January 1, 2003 did not impact HickoryTech's financial position or results of operations.

HickoryTech's competitive local telephone companies (CLEC) also adopted SFAS No. 143 effective January 1, 2003. HickoryTech has determined that its competitive local telephone companies do not have a material legal obligation to remove long-lived assets as described by SFAS No. 143, and accordingly, adoption of SFAS No. 143 did not impact HickoryTech's financial position or results of operations.

HickoryTech also adopted the provisions of SFAS No. 143 for its wireless operations as of January 1, 2003. HickoryTech performed an analysis to identify all potential Asset Retirement Obligations. The legal obligations identified consist of obligations to remediate leased property where cell sites are located. However, based upon HickoryTech's experience and expectations, there is significant uncertainty as to whether third parties that own these leased properties would enforce their remediation rights related to the sites. Therefore, pursuant to the provisions of SFAS No. 143, HickoryTech did not record this potential asset retirement obligation upon adoption and will not record an obligation until such time as the fair value of the obligation can be reasonably estimated.

In April 2002, the FASB issued SFAS No. 145, *Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections*. SFAS No. 145 rescinds FASB Statement No. 4, *Reporting Gains and Losses from Extinguishment of Debt*, and an amendment of that Statement, FASB Statement No. 64, *Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements*. SFAS No. 145 also rescinds FASB Statement No. 44, *Accounting for Intangible Assets of Motor Carriers*, and amends FASB Statement No. 13, *Accounting for Leases*. HickoryTech adopted the provisions of SFAS No. 145 on January 1, 2003. Adoption of this standard had no impact on the financial statements presented in this Form 10-Q.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, which replaces Emerging Issues Task Force (EITF) Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. SFAS No. 146 requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. HickoryTech has engaged in no activities in the first quarter of 2003 that are subject to the provisions of SFAS No. 146. Accordingly, the adoption of SFAS No. 146 did not impact HickoryTech's financial position or results of operations.

In December 2002, the FASB issued SFAS No. 148, *Accounting for Stock-Based Compensation - Transition Disclosure*, an amendment of SFAS No. 123 (SFAS No. 148). This Statement amends SFAS No. 123, *Accounting for Stock-Based Compensation*, to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The provisions of SFAS No. 148 are effective for financial statements for fiscal years ending after December 15, 2002, and disclosure requirements shall be effective for interim periods beginning after December 15, 2002. The Company will continue to account for stock-based compensation to its employees and directors using the intrinsic value method prescribed by APB Opinion No. 25, and related interpretations. The Company adopted the provisions of SFAS No. 148 and has made certain disclosures required by SFAS No. 148 in the consolidated financial statements presented in this report. The adoption of SFAS No. 148 did not impact HickoryTech's financial position or results of operations.

In November 2002, the FASB issued Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. This interpretation elaborates on the disclosures required in financial statements concerning obligations under certain guarantees. It also clarifies the requirements related to the recognition of liabilities by a guarantor at the inception of certain guarantees. The disclosure requirements of this interpretation were effective for HickoryTech on December 31, 2002 but did not require any additional disclosures. The recognition provisions of the interpretation are effective for HickoryTech in 2003 and are applicable only to guarantees issued or modified after December 31, 2002. The adoption of Interpretation No. 45 does not have a material impact on the financial position or results of operations of HickoryTech.

Edgar Filing: HICKORY TECH CORP - Form 10-Q

NOTE 7. QUARTERLY SECTOR FINANCIAL SUMMARY

Business segment information for the first quarter of 2003 and 2002 is as follows. Certain amounts in 2002 have been reclassified to conform to the 2003 presentation.

(In Thousands)	Telecom	Information Solutions	Enterprise Solutions	Corporate and Eliminations	HickoryTech Consolidated

Capital Expenditures	2,787	522	40	139	3,488

NOTE 8. CONTINGENCIES

HickoryTech is involved in certain contractual disputes in the ordinary course of business. HickoryTech does not believe the ultimate resolution of any of these existing matters will have a material adverse effect on its financial position, results of operations or cash flows.

NOTE 9. STOCK COMPENSATION

At March 31, 2003, HickoryTech has four stock-based employee compensation plans, which are described more fully in the HickoryTech Annual Report of Form 10-K for the year ended December 31, 2002. HickoryTech has elected to apply Accounting Principles Board Opinion No. 25 and related interpretations in accounting for its employee and directors' stock compensation plans.

Edgar Filing: HICKORY TECH CORP - Form 10-Q

In 2002, HickoryTech's Board of Directors modified the terms of the stock options of a retiring officer. The modification extended the period after retirement during which the officer can exercise options. This modification resulted in HickoryTech recognizing \$173,000 of compensation expense during the first quarter of 2003.

If HickoryTech had elected to recognize compensation cost based on the fair value of the options as prescribed by SFAS No. 123, the following operating results would have occurred using the Black-Scholes option-pricing model to determine the fair value of the options:

(Dollars in Thousands)	For Three Months Ended	
	3/31/2003	3/31/2002
Reported Net Income	\$ 2,347	\$ 2,090
Add: Stock-based employee compensation expense included in reported net income, net of related tax effects	257	172
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(398)	(369)
Pro Forma Net Income	\$ 2,206	\$ 1,893
Earnings per share:		
Basic - as reported	\$ 0.17	\$ 0.15
Basic - pro forma	\$ 0.16	\$ 0.14
Diluted - as reported	\$ 0.17	\$ 0.15
Diluted - pro forma	\$ 0.16	\$ 0.14

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

FORWARD-LOOKING STATEMENTS

Statements in this Form 10-Q that are not historical fact are forward-looking statements that are based on management's current expectations, estimates and projections about the industry in which HickoryTech operates and management's beliefs and assumptions. Such forward-looking statements are subject to important risks and uncertainties that could cause HickoryTech's future actual results to differ materially from such statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and probabilities, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements, whether as a result of new information, future events or otherwise. Factors that might cause such a difference include, but are not limited to, those contained in this Management's Discussion and Analysis (Item 2) and Exhibit 99 (Cautionary Statement for Purposes of the Safe Harbor Provision of the Private Securities Litigation Reform Act of 1995) to HickoryTech's Annual Report on Form 10-K for the year ended December 31, 2002, which is incorporated herein by reference. You are cautioned not to place undue reliance on these forward looking statements, which speak only as of the date on which they were made. Except as otherwise required by law, HickoryTech undertakes no obligation to update any of its forward-looking statements for any reason.

BUSINESSES

HickoryTech operates in three business segments: the Telecom, Information Solutions and Enterprise Solutions Sectors. Its largest and oldest business (since 1898) has been the operation of incumbent local exchange carriers (ILECs) or traditional wireline telephone service. The ILEC business is in HickoryTech's Telecom Sector. In 1998, HickoryTech began its competitive local exchange carrier (CLEC), competing for the telephone dial tone, data and long distance calling business in other ILECs' territories. CLEC is in HickoryTech's Telecom Sector. HickoryTech also began its wireless operations in 1998 by acquiring its first wholly-owned wireless service license, an additional wireless service license in 1999 and two PCS licenses in 2001. These wireless operations, combined with ILEC and CLEC, form HickoryTech's Telecom Sector. Since 1964, HickoryTech's Information Solutions Sector has provided computer data processing and software, predominantly for HickoryTech's Telecom Sector operations and also to other telecommunications companies. HickoryTech acquired its Enterprise Solutions Sector in 1990 and it has operated as a leading telecommunications and data equipment distributor from a base in Minneapolis/St. Paul, Minnesota.

THE COMPANY

The eight subsidiaries of HickoryTech, all of which publicly operate and conduct business as HickoryTech, and the business segments in which they operate are:

TELECOM SECTOR

Mankato Citizens Telephone Company (MCTC)

Mid-Communications, Inc. (Mid-Comm)

Heartland Telecommunications Company of Iowa, Inc. (Heartland)

Cable Network, Inc. (CNI)

Crystal Communications, Inc. (Crystal)

Minnesota Southern Wireless Company (MSWC)

INFORMATION SOLUTIONS SECTOR

National Independent Billing, Inc. (NIBI)

ENTERPRISE SOLUTIONS SECTOR

Collins Communications Systems Co. (Collins)

HickoryTech and its subsidiaries are engaged in businesses that provide services to their customers for a fee. Many of these services are repetitive and recurring, and, as a result, backlog orders and seasonality are not significant factors. Working capital requirements primarily involve the funding of the construction and maintenance of telephone wireline and wireless fixed assets, the payroll costs of highly skilled labor and the inventory to service its telephone equipment customers.

The materials and supplies that are necessary for the operation of the businesses of HickoryTech and its subsidiaries are available from a variety of sources, and no future supply problems are anticipated. All of HickoryTech's ILEC and CLEC central office switches and wireless switches, as well as a majority of HickoryTech's equipment sold in its Enterprise Solutions Sector, are supplied by Nortel. Nortel is a leading supplier of communications equipment, and HickoryTech's dependence on this brand is not viewed as a significant risk.

INDUSTRY SEGMENTS

TELECOM SECTOR

HickoryTech's Telecom Sector provides local exchange wireline and wireless telephone service, long distance, dial-up Internet access and owns and operates fiber optic cable facilities. This sector includes three incumbent local exchange carriers (ILECs), MCTC, Mid-Comm and Heartland. MCTC and Mid-Comm provide telephone service in south central Minnesota, specifically Mankato (a regional hub) and eleven rural communities surrounding Mankato. The third ILEC, Heartland, provides telephone service for eleven rural communities in northwest Iowa.

Edgar Filing: HICKORY TECH CORP - Form 10-Q

The Telecom Sector also includes Crystal, a competitive local exchange carrier (CLEC). Crystal provides local telephone service, long distance and dial-up Internet access on a competitive basis. Crystal has customers in eight rural communities in Minnesota and six rural communities in Iowa that are not in HickoryTech's ILEC service areas.

HickoryTech also owns and operates fiber optic cable facilities (CNI) in Minnesota, which are used to transport interexchange communications as a service to telephone industry customers. HickoryTech's Minnesota ILECs and its CLEC are the primary users of the fiber optic cable facilities.

The Telecom Sector also owns and operates a wireless telephone business in south central Minnesota. The wireless telephone business consists of the A-side FCC wireless license to operate in Minnesota's Rural Service Area 10 (RSA 10), the Minneapolis/St. Paul Metro A-2 (Metro A-2) wireless license and two digital personal communications services (PCS) licenses covering the Minnesota Basic Trading Areas (BTAs) of Mankato-Fairmont and Rochester-Austin-Albert Lea.

MCTC derives its principal revenues and income from local services charged to subscribers in its service area, access services charged to interexchange carriers and the operation of a toll tandem switching center in Mankato, Minnesota. Revenues and income for Mid-Comm are also derived from local service charges in its area of operation and by providing access to long distance services for its subscribers through the toll center in Mankato. Local and interexchange telephone access for the two companies is provided on an integrated basis. The local and interexchange telephone access for both telephone companies utilize the same facilities and equipment and is managed and maintained by a common work force. Heartland derives its principal revenues and income from local services charged to subscribers in its service area in Iowa, as well as from providing interexchange access for its subscribers. Interexchange telephone access is provided by all three of HickoryTech's telephone subsidiaries by connecting the communications networks of interexchange and wireless carriers with the equipment and facilities of end users through its switched networks or private lines.

MCTC and Mid-Comm are Minnesota public utilities operating pursuant to indeterminate permits issued by the Minnesota Public Utilities Commission. Heartland is also a public utility, which operates pursuant to a certificate of public convenience and necessity issued by the Iowa Utilities Board. These state agencies regulate the services provided by MCTC, Mid-Comm and Heartland. CNI's operations are not subject to regulation by the state regulatory authority. Neither the Minnesota Public Utilities Commission nor the Iowa Utilities Board regulates the rate of return or profits of each of HickoryTech's ILEC operations. However, the Minnesota Public Utilities Commission regulates the prices and service levels provided by MCTC and Mid-Comm because each company's operations fall below the 50,000 customer line minimum level for rate regulation in Minnesota. In Iowa, Heartland's operations are not rate regulated by the Iowa Utilities Board. MCTC, Mid-Comm and Heartland are each required to file local service rates as tariffs with the applicable state public utilities commission. MCTC's and Mid-Comm's local service rates are below those of most Minnesota ILECs. Regardless of whether a particular rate is subject to regulatory review, the ability of HickoryTech and its subsidiaries to change rates will be determined by various factors, including economic and competitive circumstances.

As local exchange telephone companies, MCTC, Mid-Comm and Heartland provide end office switching and dedicated circuits to long distance interexchange carriers. These relationships allow HickoryTech's telephone subscribers to place long distance telephone calls and gain access to the telephone network. HickoryTech provides long distance access for all of the individual customers who select an alternative long distance carrier. The long distance interexchange carriers are significant customers of HickoryTech, but no carrier represents more than ten percent of HickoryTech's consolidated revenues.

Alternatives to HickoryTech service include customers leasing private line switched voice and data services in or adjacent to the territories served by HickoryTech, which permits the bypassing of local telephone switching facilities. In addition, microwave transmission services, wireless communications, fiber optic and coaxial cable deployment and other services provided by other companies permit bypass of the local

exchange network. These alternatives to local exchange service represent a potential threat to HickoryTech's long-term ability to provide local exchange service at economical rates.

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Competition in HickoryTech's ILEC service area exists in one of Heartland's exchanges. In the city of Hawarden, Iowa, the municipal city government overbuilt the city's telephone service infrastructure and is providing an alternative to HickoryTech's telephone service. The Hawarden CLEC has acquired approximately 1,000 access lines of that community's telephone business from HickoryTech. HickoryTech management does not believe there will be significant further impact from competition in Hawarden. HickoryTech constantly responds to competitive changes with active programs to market products and to engineer its infrastructure for higher customer satisfaction.

Competition also exists for some of the services provided to interexchange carriers, such as customer billing services, dedicated private lines, and network switching. This competition comes primarily from the interexchange carriers themselves. The provision of these services is of a contractual nature and is primarily controlled by the interexchange carriers. Other services, such as directory advertising and wireless communications, are open to competition. Competition is based primarily on service and experience.

The passage of the 1996 Telecommunications Act created the opportunity for HickoryTech to offer communications service in territories served by other telephone companies, and Crystal began operations in January 1998 as a new competitive local exchange carrier (CLEC). Crystal offers local service, long distance and dial-up Internet access services on a competitive basis to customers in towns in southern Minnesota and Iowa, which are not served by HickoryTech's Telecom Sector's service area. These service offerings provide customers alternatives to the incumbent telephone carrier in various communities and are offered under the brand name HickoryTech wireline service. These services are currently being offered to customers in eight rural communities in Minnesota, as well as six rural communities in Iowa. Crystal's primary strategy is to provide service by overbuilding with new telecommunications switching networks and telephone lines. Crystal also provides the long distance service and dial-up Internet access services to HickoryTech's subscribers in both ILEC and CLEC markets.

Crystal is not subject to regulation by the public utilities commissions in the states it serves regarding rates and services. CLEC activities require Crystal to file for authority to operate with the appropriate public utilities commission in each state it serves. Crystal competes directly against existing ILECs in the areas in which Crystal operates.

Crystal is not dependent upon any single customer or small group of customers. No one customer in Crystal accounts for ten percent or more of HickoryTech's consolidated revenues.

HickoryTech, through its subsidiary MSWC, owns and operates wireless telephone businesses in south central Minnesota and in the Minneapolis/St. Paul area. In south central Minnesota, MSWC provides wireless service for Minnesota's Rural Service Area 10 (RSA 10), under the brand name of HickoryTech Wireless. This business is in HickoryTech's Telecom Sector. This sector owns 100% of the A-side FCC wireless license to operate in seven counties in south central Minnesota. The area overlaps and is larger than HickoryTech's Minnesota ILEC and CLEC service areas and serves a population of approximately 230,000. This sector also owns the Minneapolis/St. Paul Metro A-2 (Metro A-2) wireless license, which was acquired on June 1, 1999. The Metro A-2 property surrounds the metropolitan Minneapolis/St. Paul area and is located in five Minnesota counties and in one Wisconsin county. Metro A-2 provides service to an area with a population of approximately 170,000. In addition, this sector also owns the PCS licenses for the Minnesota BTAs of Mankato-Fairmont and Rochester-Austin-Albert Lea. The two BTAs are located in 16 Minnesota counties and one Iowa county and provide service to an area with a population of approximately 493,000, some of which coincide with the previously mentioned wireless RSA 10 population of 230,000.

MSWC, which owns all four of the Company's FCC wireless licenses, derives its principal revenues and income from providing wireless telephone service to the retail customers in seven counties in south central Minnesota and from wireless roaming traffic. MSWC also derives roaming revenue from the six counties surrounding the metropolitan Minneapolis/St. Paul Metro A-2 area and roaming revenues from the PCS service territory that is comprised of 17 counties. MSWC directly competes against local wireless and PCS companies in southern Minnesota and in the Minneapolis/St. Paul area.

INFORMATION SOLUTIONS SECTOR

Through NIBI, HickoryTech's Information Solutions Sector provides data processing and related services, principally for HickoryTech, other local exchange telephone companies, CLECs, interexchange network carriers, wireless companies, municipalities and utilities. The Information Solutions Sector's principal activity is the provision of monthly batch processing of computerized data for HickoryTech as well as non-affiliated companies. Services for telephone company customers include the processing of long distance telephone calls from data sources and telephone switches, the preparation of the subscriber telephone bills, customer record keeping, carrier access bills and general accounting and payroll services. NIBI, under the brand name HickoryTech Information Solutions, also provides certain billing clearinghouse functions for interexchange carriers.

There are a number of companies engaged in supplying data processing services comparable to those furnished by the Information Solutions Sector. Competition is based primarily on price and service. HickoryTech's Information Solutions Sector has developed an integrated billing and management system called SuiteSolution. For internal use, SuiteSolution enables HickoryTech to become a full-service billing provider for all aspects of the telecommunications industry on a fully integrated basis. For external use, SuiteSolution can provide wireline or wireless carriers the individual benefits of a billing platform, or to integrated service providers, such as HickoryTech, a total system solution. SuiteSolution was implemented in the Company's CLEC businesses in 2002 and will be implemented in the Company's wireless business in 2003. SuiteSolution is currently available to external customers.

ENTERPRISE SOLUTIONS SECTOR

Through Collins, HickoryTech's Enterprise Solutions Sector provides telephone and data equipment sales and services as well as the sale, installation and service of voice over Internet Protocol business systems to companies primarily based in metropolitan Minneapolis/St. Paul, Minnesota. This sector also supports the business telephone system service for HickoryTech ILEC and CLEC operations in southern Minnesota and in Iowa. The customers in the Enterprise Solutions Sector's market are the individual business end users of telecommunications service with ongoing service requirement offerings. Products consist of telecommunication platforms such as Nortel on the voice side of the Enterprise Solutions' business, and Cisco and Bay Networks (Nortel) equipment on the data side of its business. Enterprise Solutions specializes in the quality custom installation and maintenance of wide area networking, local networking and transport solutions in telecommunications for end user customers.

Revenues are primarily earned by the sales, installation and service of business telephone systems. Enterprise Solutions continues its commitment to service and support of its core product, Nortel, while identifying new opportunities such as call centers, computer telephone integration voice mail and interactive voice response systems.

HickoryTech's Enterprise Solutions Sector is not dependent upon any single customer or small group of customers. No one customer in the Enterprise Solutions Sector accounts for ten percent or more of HickoryTech's consolidated revenues.

There are companies competing in the equipment sales and service and voice over Internet Protocol communications products market in which Enterprise Solutions operates. Competition is based primarily on price and service. No one company is dominant in this field. Enterprise Solutions offers customer premises telephone and data equipment through well-trained and experienced market representatives with long-term customer relationships. The Enterprise Solutions Sector enjoys a very strong brand awareness and a reputation for quality service. Enterprise

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Solutions has built a strong base of solid customers with ongoing needs and Enterprise Solutions goal is to derive 60-70% of its recurring revenue from sales to its existing customer base. The Enterprise Solutions Sector's activities are focused on the sale, installation and service of business telephone systems and data communications equipment to companies based in metropolitan Minneapolis/St. Paul, Minnesota. This sector also supports the business telephone system service for HickoryTech's ILEC and CLEC operations in Minnesota and Iowa.

RESULTS OF OPERATIONS

CONSOLIDATED OPERATING RESULTS

The following is a summarized discussion of consolidated results of operations. More detailed discussion of operating results by segment follows this discussion.

OPERATING REVENUES - Consolidated operating revenues were \$1,858,000 or 7.4% higher in the first quarter of 2003 compared to the first quarter of 2002. The revenue increase in the first quarter of 2003 was primarily attributable to a higher volume of business in the Enterprise Solutions Sector and an increase in revenue in the Telecom Sector. The Enterprise Solutions increase is primarily the result of completing the final phase of work for a large specialty retailer. This project, which began in 2002, involved installing a voice over Internet Protocol network in a corporate office. The Telecom Sector increases can be primarily attributed to the increase in the CLEC customer base and the result of services provided under terms of a multi-year contract awarded to HickoryTech effective July 1, 2002 to provide Internet access and video conferencing to schools and libraries in south central Minnesota served by the Project SOCRATES distance-learning network.

COST OF SALES, ENTERPRISE SOLUTIONS - Cost of sales is related to the Enterprise Solutions Sector and was \$335,000 or 15.3% higher in the first quarter of 2003 compared to the first quarter of 2002. The change in cost of sales is primarily the result of the change in sales volume in the Enterprise Solutions Sector. The gross profit margin in the Enterprise Solutions Sector was 35.6% and 35.0% for the quarters ended March 31, 2003 and 2002, respectively.

OPERATING EXPENSES (excluding Depreciation and Amortization) - Operating expenses excluding depreciation and amortization would have increased \$1,150,000 or 8.7% in the first quarter of 2003 compared to the first quarter of 2002. Operating expenses in the first quarter of 2003 were higher largely due to increased expenses in the Telecom Sector related to the growth in CLEC customers and the costs associated with Project Socrates, a distance-learning network that provides Internet access and video conferencing to schools and libraries in south central Minnesota.

DEPRECIATION AND AMORTIZATION - Depreciation expense was \$349,000 or 9.2% higher in the first quarter of 2003 compared to the first quarter of 2002. Increases in the ILEC, CLEC and Wireless network assets primarily account for the increase in depreciation expense. Amortization expense was \$35,000 or 9.7% lower in the first quarter of 2003 compared to the first quarter of 2002.

OPERATING INCOME - Operating income was \$5,527,000 which is \$59,000 or 1.1% higher in the first quarter of 2003 compared to the first quarter of 2002. The increase in operating income was largely due to increased revenues in the

Enterprise Solutions Sector, and increased CLEC revenues in the Telecom Sector, which were offset by the increase in the cost of sales of the Enterprise Solutions Sector and the increase in operating expenses of the Telecom Sector.

INTEREST EXPENSE - Interest expense decreased \$391,000 or 20.0% in the first quarter of 2003 compared to the first quarter of 2002. The decrease in interest expense in the first quarter of 2003 was primarily due to a decrease in the weighted average interest rate on HickoryTech's revolving credit facility from 5.2% to 4.3% in the first quarter of the years 2002 and 2003, respectively, and a decrease in total debt outstanding. The outstanding balance of the revolving credit facility was \$148,250,000 at March 31, 2003 and \$165,750,000 at March 31, 2002.

NET INCOME - Consolidated net income was \$257,000 or 12.3% higher in the first quarter of 2003 compared to the first quarter of 2002. The increase in the operating revenues of the Telecom and Enterprise Solutions Sectors was partially offset by the increase in the Enterprise Solutions cost of sales and Telecom operating expenses.

SECTOR RESULTS OF OPERATIONS

TELECOM The following table provides a breakdown of the Telecom Sector operating results.

TELECOM SECTOR

(Dollars in Thousands)	For Three Months Ended	
	3/31/2003	3/31/2002
Revenues Before Intersegment Eliminations		
ILEC		
Local Service	\$ 3,799	\$ 3,802
Network Access	8,324	8,067
Intersegment	69	68
Other	2,262	2,327
Total ILEC	14,454	14,264
CLEC		
Local Service	908	699
Other	1,306	660
Total CLEC	2,214	1,359
Long Distance	1,028	913
Internet	941	847
Wireless		
Service	2,447	2,334
Home Roaming	174	194
Roaming	772	874
Total Wireless	3,393	3,402
Total Telecom Revenues	\$ 22,030	\$ 20,785
Total Telecom Revenues Before Intersegment Eliminations		
Unaffiliated Customers	\$ 21,961	\$ 20,717
Intersegment	69	68
	22,030	20,785
Operating Expenses, excluding Depr. and Amort.	11,741	10,737
Depreciation and Amortization	3,845	3,538
Operating Income	\$ 6,444	\$ 6,510

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Net Income	\$	3,773	\$	3,813
Operating Income/(Loss)	\$	6,444	\$	6,510
Depreciation and Amortization		3,845		3,538
Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA)	\$	10,289	\$	10,048
Capital Expenditures	\$	1,372	\$	2,787
ILEC Access Lines		64,495		66,212
CLEC Access Lines				
Overbuild		8,035		6,241
Unbundled Network Element (UNE)		1,361		1,188
Total Service Resale (TSR)		4,875		4,304
Total		14,271		11,733
Long Distance Customers		36,610		25,436
Internet Customers		14,988		13,517
Wireless Customers		26,349		26,091
Total Telecom Customers		156,713		142,989

Telecom Sector operating revenues before intersegment eliminations increased \$1,245,000 or 6% in first quarter of 2003 compared to the first quarter of 2002. The increase in the first quarter of 2003 compared to the first quarter of 2002 was primarily due to growth in the CLEC, Long Distance and Internet service revenues as well as increased ILEC network access, and increased wireless service revenue, partially offset by decreases in roaming revenue and ILEC local service revenue.

ILEC local service revenue decreased \$3,000 or 0.1% in the first quarter of 2003 compared to the first quarter of 2002. This decrease was due to a 1,717 or 2.6% decline in ILEC access lines between March 31, 2002 and March 31, 2003. The decline in access lines was offset by higher revenue from vertical services such as caller identification, call waiting and three-way calling in the first quarter of 2003 compared to the first quarter of 2002.

ILEC network access revenue increased \$257,000 or 3.2% in the first quarter of 2003 compared to the first quarter of 2002. The increase in network access revenue in the first quarter of 2003 compared to the first quarter of 2002 was driven by higher demand for dedicated lines and high-speed circuits.

CLEC local service revenue increased \$209,000 or 29.9% in the first quarter of 2003 compared to the first quarter of 2002. CLEC access lines increased 2,538 or 21.6% between March 31, 2002 and March 31, 2003, which was the primary reason for the increase.

Other CLEC revenue increased \$646,000 or 97.9% in the first quarter of 2003 compared to the first quarter of 2002. Other revenue included network access, high-speed data revenues and digital TV, which generally grew along with the increase in access lines in the first quarter of 2003 compared to the first quarter of 2002. Another reason for the increase in other revenue in the first quarter of 2003 was the additional \$370,000 of revenue recognized as a result of services provided under terms of a multi-year contract awarded to HickoryTech effective July 1, 2002 to provide Internet access and video conferencing to schools and libraries in south central Minnesota served by the Project SOCRATES distance-learning network.

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Long distance revenue increased \$115,000 or 12.6% in the first quarter of 2003 compared to the first quarter of 2002. HickoryTech experienced an 11,174 or 43.9% increase in its long distance customer base between March 31, 2002 and March 31, 2003. Although the customer base is increasing, revenue per customer is decreasing. The decrease in revenue per customer is primarily the result of optional long distance services available to customers, the increased use of Internet services and other alternatives to long distance services.

Internet revenue increased \$94,000 or 11.1% in the first quarter of 2003 compared to the first quarter of 2002. The increase in revenue was caused primarily by an increase in Internet customers of 1,471 between March 31, 2002 and March 31, 2003. In addition to the increase in customers, Internet revenue increased due to a migration of Internet customers from low-price introductory rate plans to mid-range full-service Internet packages.

Wireless service revenue increased \$113,000 or 4.8% in the first quarter of 2003 compared to the first quarter of 2002. Wireless customer counts increased 258 or 1% between March 31, 2002 and March 31, 2003. The increase in service revenue was largely a result of increased equipment revenue, offset by a decline in the average revenue per subscriber.

Wireless roaming revenue decreased \$102,000 or 11.7% in the first quarter of 2003 compared to the first quarter of 2002. Roaming minutes from other wireless carriers' customers traveling into HickoryTech's wireless service territory have declined from historical levels, particularly due to technological changes among other wireless providers, which re-route the roaming minutes from HickoryTech's wireless service towers to other providers. In addition, other PCS wireless carriers have continued to build-out PCS licenses to carry their own customers' traffic rather than pay roaming to HickoryTech.

Operating expenses excluding depreciation and amortization would have increased \$1,004,000 or 9.4% in the first quarter of 2003 compared to the first quarter of 2002. The increase in operating expenses was due primarily to the costs associated with the growth in CLEC customers and costs associated with Project SOCRATES, a distance-learning network that provides Internet access and video conferencing to schools and libraries in south central Minnesota.

Depreciation and amortization increased \$307,000 or 8.7% in the first quarter of 2003 compared to the first quarter of 2002. Depreciation expense increased \$113,000 or 5.1% for the first quarter of 2003 compared to the first quarter of 2002 for the increased network infrastructure associated with ILEC services. Depreciation expense increased \$136,000 or 18.1% in the first quarter of 2003 compared to the first quarter of 2002 for the increased network infrastructure associated with CLEC services. Depreciation expense increased \$124,000 or 23.3% in the first quarter of 2003 compared to the first quarter of 2002 for the networks associated with Wireless services. These increases were partially offset by a \$66,000 decrease in amortization expense.

Total operating expenses increased \$1,311,000 in the first quarter of 2003 compared to the first quarter of 2002 for the reasons described in the preceding two paragraphs.

Operating income decreased \$66,000 or 1.0% in the first quarter of 2003 compared to the first quarter of 2002. Net income decreased \$40,000 or 1.0% in the first quarter of 2003 compared to the first quarter of 2002. These decreases were for the reasons described above.

Earnings before Interest, Taxes, Depreciation and Amortization increased \$241,000 or 2.4% in the first quarter of 2003 compared to the first quarter of 2002. EBITDA margins (i.e. EBITDA divided by revenues) for this sector were 46.7% and 48.3% for the three months ended March 31, 2003 and 2002, respectively. Despite the \$1,245,000 increase in revenues, EBITDA increased only \$241,000 due to the increase in operating expenses, excluding depreciation and amortization, as discussed above. EBITDA represents a non-GAAP financial measure. A reconciliation of this measure to the appropriate GAAP measure is included in the table above. HickoryTech defines EBITDA as operating income/(loss) excluding depreciation and amortization expense. EBITDA, which is not a measure of financial performance or liquidity under generally accepted accounting principles, is provided because management believes that EBITDA is a useful supplement to operating income/(loss) and other statements of operations data in understanding HickoryTech's ability to service and/or incur indebtedness and is useful in measuring the performance and relative value of HickoryTech's business. Because of the variety of methods used by companies and analysts to calculate EBITDA, and the fact that EBITDA calculations may not accurately measure a company's profitability or its ability to meet debt service requirements, caution should be used in relying on any EBITDA presentation. EBITDA should not be considered as an indicator of operating performance or whether cash flows will be sufficient to fund cash needs.

INFORMATION SOLUTIONS The following table provides a breakdown of the Information Solutions Sector operating results.

INFORMATION SOLUTIONS SECTOR

(Dollars in Thousands)	For Three Months Ended	
	3/31/2003	3/31/2002
Revenues Before Eliminations		
Unaffiliated Customers	\$ 1,098	\$ 1,034
Intersegment	973	915
	2,071	1,949
Operating Expenses, excluding Depr. and Amort.	2,066	1,964
Depreciation and Amortization	544	510
Operating Loss	\$ (539)	\$ (525)
Net Loss	\$ (373)	\$ (352)
Operating Loss	\$ (539)	\$ (525)
Depreciation and Amortization	544	510
Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA)	\$ 5	\$ (15)
Capital Expenditures	\$ 144	\$ 522

Operating revenues from unaffiliated customers increased \$64,000 or 6.2% in the first quarter of 2003 compared to the first quarter of 2002. The increase in operating revenues in the first quarter of 2003 was primarily due to the impact of a new customer relationship for monthly batch processing services using the WRITE2K billing platform.

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Operating expenses excluding depreciation and amortization would have increased \$102,000 or 5.2% in the first quarter of 2003 compared to the first quarter of 2002. There were several small variances that contributed to this change between periods. Expenses for the remainder of the year are expected to be comparable to the first quarter of 2003.

Depreciation and amortization expense increased \$34,000 or 6.7% in the first quarter of 2003 compared to the first quarter of 2002. Depreciation expense in the first quarter of 2003 was \$10,000 lower compared to the first quarter of 2002. Amortization expense increased \$44,000 or 17.1% in the first quarter of 2003 compared to the first quarter of 2002.

Total operating expenses increased \$136,000 in the first quarter of 2003 compared to the first quarter of 2002 for the reasons described in the preceding two paragraphs.

Operating loss increased \$14,000 or 2.7% in the first quarter of 2003 compared to the first quarter of 2002. Net loss increased \$21,000 or 6.0% in the first quarter of 2003 compared to the first quarter of 2002. The increase in operating loss and net loss was primarily attributable to the increase in operating expenses, depreciation and amortization, partially offset by the increase in revenue, discussed above.

Earnings before Interest, Taxes, Depreciation and Amortization increased \$20,000 or 133.3% in the first quarter of 2003 compared to the first quarter of 2002. The EBITDA margin (i.e. EBITDA divided by revenues) for this sector was 0.2% in the first quarter 2003, compared to (0.8%) in the first quarter of 2002. The increase in EBITDA and the EBITDA margin was primarily due to increased operating revenues. EBITDA represents a non-GAAP financial measure. A reconciliation of this measure to the appropriate GAAP measure is included in the table above. HickoryTech defines EBITDA as operating income/(loss) excluding depreciation and amortization expense. EBITDA, which is not a measure of financial performance or liquidity under generally accepted accounting principles, is provided because management believes that EBITDA is a useful supplement to operating income/(loss) and other statements of operations data in understanding HickoryTech's ability to service and/or incur indebtedness and is useful in measuring the performance and relative value of HickoryTech's business. Because of the variety of methods used by companies and analysts to calculate EBITDA, and the fact that EBITDA calculations may not accurately measure a company's profitability or its ability to meet debt service requirements, caution should be used in relying on any EBITDA presentation. EBITDA should not be considered as an indicator of operating performance or whether cash flows will be sufficient to fund cash needs.

ENTERPRISE SOLUTIONS The following table provides a breakdown of the Enterprise Solutions Sector operating results.

ENTERPRISE SOLUTIONS SECTOR

(Dollars in Thousands)	For Three Months Ended	
	3/31/2003	3/31/2002
Revenues Before Intersegment Eliminations		
Installation	\$ 1,958	\$ 1,395
Service	1,953	1,966
	3,911	3,361
Cost of Sales	2,519	2,184
Operating Expenses, excluding Depr. and Amort.	1,257	1,258
Depreciation and Amortization	61	70
Operating Income (Loss)	\$ 74	\$ (151)
Net Income (Loss)	\$ 39	\$ (99)
Operating Income (Loss)	\$ 74	\$ (151)
Depreciation and Amortization	61	70
	\$ 135	\$ (81)

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Earnings Before Interest, Taxes, Depreciation and
Amortization (EBITDA)

Capital Expenditures	\$	92	\$	40
----------------------	----	----	----	----

Edgar Filing: HICKORY TECH CORP - Form 10-Q

Operating revenues increased \$550,000 or 16.4% in the first quarter of 2003 compared to the first quarter of 2002. Installation revenue was \$563,000 or 40.4% higher in the first quarter of 2003 compared to the first quarter of 2002. The increase in installation revenue in first quarter of 2003 compared to the first quarter of 2002 was primarily a result of an increase in sales and installations of PBX systems of \$272,000 and an increase in sales of data network equipment of \$219,000. The majority of the increase in installation revenue was the result of completing the final phase of work for a large specialty retailer. This project, which began in 2002, involved installing a voice over Internet Protocol network in a corporate office. Service revenue was \$13,000 or .7% lower in the first quarter of 2003 compared to the first quarter of 2002.

Cost of sales increased \$335,000 or 15.3% in the first quarter of 2003 compared to the first quarter of 2002. Gross profit margin for this sector in the first quarter of 2003 and 2002 was 35.6% and 35.0%, respectively. The increase in cost of sales was the result of the increased installation efforts described above.

Operating expenses excluding depreciation and amortization would have decreased \$1,000 or 0.1% in the first quarter of 2003 compared to the first quarter of 2002. Depreciation and amortization decreased \$9,000 or 12.9% in the first quarter of 2003 compared to the first quarter of 2002.

Total operating expenses decreased \$10,000 in the first quarter of 2003 compared to the first quarter of 2002 for the reasons described in the preceding two paragraphs.

Operating income was \$74,000 in the first quarter of 2003 compared to operating loss of \$151,000 in the first quarter of 2002. Net income in the first quarter of 2003 was \$39,000 compared to a net loss of \$99,000 in the first quarter of 2002. The income generated in the first quarter of 2003 as compared to the loss in the first quarter of 2002 resulted primarily from the changes in operating revenues described above.

Earnings before Interest, Taxes, Depreciation and Amortization increased \$216,000 or 266.7% in the first quarter of 2003 compared to the first quarter of 2002. The EBITDA margin (i.e. EBITDA divided by revenues) for this sector was 3.5% in the first quarter of 2003 compared to (2.4%) in the first quarter of 2002. The changes in EBITDA and the EBITDA margin were primarily due to the increase in operating revenues. EBITDA represents a non-GAAP financial measure. A reconciliation of this measure to the appropriate GAAP measure is included in the table above. HickoryTech defines EBITDA as operating income/(loss) excluding depreciation and amortization expense. EBITDA, which is not a measure of financial performance or liquidity under generally accepted accounting principles, is provided because management believes that EBITDA is a useful supplement to operating income/(loss) and other statements of operations data in understanding HickoryTech's ability to service and/or incur indebtedness and is useful in measuring the performance and relative value of HickoryTech's business. Because of the variety of methods used by companies and analysts to calculate EBITDA, and the fact that EBITDA calculations may not accurately measure a company's profitability or its ability to meet debt service requirements, caution should be used in relying on any EBITDA presentation. EBITDA should not be considered as an indicator of operating performance or whether cash flows will be sufficient to fund cash needs.

LIQUIDITY AND CAPITAL RESOURCES

CASH FLOWS Cash provided by operations was \$9,277,000 in the first quarter of 2003 compared to \$7,908,000 in the first quarter of 2002. Cash flows from operations in the first quarter of 2003 and 2002 were primarily attributable to net income plus non-cash expenses for depreciation and amortization and a decrease in receivables, partially offset by decreases in accounts payable related to timing of payments. The increase in cash flows from operations in the first

quarter of 2003 relative to the same period in 2002 was primarily due to a \$257,000 increase in net income and a \$1,787,000 reduction in accounts payable and accrued expenses during the first quarter of 2003, compared to a \$2,625,000 reduction during the first quarter of 2002.

Cash flows provided by investing activities were \$2,425,000 in the first quarter of 2003 compared to cash flows used of \$3,216,000 for the same period in 2002. Capital expenditures relating to ongoing businesses were \$1,735,000 during the first quarter of 2003 as compared to \$3,488,000 for the same period in 2002. Capital expenditures were incurred primarily to construct additional network facilities to provide CLEC services and continued buildout of the PCS network in the Telecom Sector in 2002. In addition, there was a \$4,100,000 redemption of investments in the first quarter of 2003, compared to \$100,000 in the first quarter of 2002. The first quarter of 2003 redemption reflects the amount by which HickoryTech was permitted to reduce its equity investment in one of its lenders.

Cash flows used in financing activities were \$11,465,000 for the first quarter of 2003 compared to \$5,682,000 for the first quarter of 2002. Included in cash flows from financing activities are debt repayments and dividend payments. HickoryTech made payments on its revolving credit facility of \$9,750,000 during the first quarter of 2003, and \$4,250,000 during the first quarter of 2002. Dividend payments for the first quarter of 2003 were \$1,540,000 compared to \$1,537,000 for the same period in 2002. During the first quarter of 2003, HickoryTech also repurchased 16,100 common shares for \$161,000.

WORKING CAPITAL Working capital (i.e. current assets minus current liabilities) was \$10,935,000 as of March 31, 2003, compared to working capital of \$13,073,000 as of December 31, 2002. The ratio of current assets to current liabilities was 1.9:1.0 as of March 31, 2003 and as of December 31, 2002. Management believes adequate internal and external resources are available to finance ongoing operating requirements, including capital expenditures, business development, debt service and the payment of dividends for at least the next twelve months.

LONG-TERM OBLIGATIONS - HickoryTech's long-term obligations as of March 31, 2003 were \$147,740,000, excluding current maturities of \$1,405,000. As of March 31, 2003, HickoryTech had a \$182,750,000 credit facility with a syndicate of banks. The credit facility is comprised of a \$125,000,000 revolving credit component and a \$57,750,000 term loan component. The available line of credit on the \$125,000,000 revolving credit component decreases in increments beginning in March 2004 with a final maturity date in September 2008. The term loan component requires equal quarterly principal payments of \$250,000 during the period of March 2001 to December 2008, and \$23,000,000 of principal payments per quarter for the first two quarters in 2009 and \$6,000,000 in the third quarter of 2009. The weighted average interest rate associated with this credit facility varies with LIBOR and certain other rates and was 4.3% at March 31, 2003. HickoryTech has implemented fixed interest terms on various portions of the overall debt outstanding for varying terms. The longest fixed interest term, on \$40,000,000 of the debt, is fixed until June 2003. As of March 31, 2003, HickoryTech had drawn \$148,250,000 on this credit facility and had \$34,500,000 of available credit. Management believes the remaining available credit is sufficient to cover future cash requirements.

HickoryTech's Information Solutions Sector leases certain computer equipment under capital lease arrangements. During the first quarter of 2003, this sector recorded no additions to property, plant and equipment related to these capital lease arrangements.

The following table sets forth HickoryTech's contractual obligations, along with the cash payments due each period:

(Dollars in Thousands)	Total	Payments Due by Year
------------------------	-------	----------------------

Edgar Filing: HICKORY TECH CORP - Form 10-Q

		Remainder of 2003		2004 to 2006		2007 to 2008		2009 and after		
Contractual Obligations										
Long-term Debt	\$	148,250	\$	750	\$	32,563	\$	62,937	\$	52,000
Interest on Long-term Debt		32,659		5,228		18,159		8,056		1,216
Capital Lease Obligations		895		296		599				
Interest on Capital Leases		64		33		31				
Operating Leases		3,862		861		1,810		465		726
Total Contractual Cash Obligations	\$	185,730	\$	7,168	\$	53,162	\$	71,458	\$	53,942

Interest on Long-term Debt is estimated using interest rate as of March 31, 2003.

Edgar Filing: HICKORY TECH CORP - Form 10-Q

The total commitment to HickoryTech on its revolving credit facility expires as follows:

(Dollars in Thousands)	Total	Amount of Commitment Expiration per Year			
		Remainder of 2003	2004 to 2006	2007 to 2008	2009 and after
Revolving Credit Component	\$ 125,000	\$ 64,063	\$ 60,937	\$	\$

OTHER - HickoryTech operates with original equity capital, retained earnings and recent additions to indebtedness in the form of bank term and revolving lines of credit. HickoryTech believes its current level of debt to total capital is acceptable for ongoing operations.

HickoryTech primarily uses variable interest rate financial instruments as of March 31, 2003. HickoryTech continually monitors the interest rates on its bank loans and has implemented fixed interest terms on various portions of the overall debt outstanding for varying terms. A lower level of interest expense is likely to occur because of a trend of reducing levels of debt and potentially lower weighted average interest rates.

In November 2002, HickoryTech began repurchasing its stock in over-the-counter trading under a previously announced repurchase plan. HickoryTech funds the repurchase of its stock from cash flows from operations. During the first quarter of 2003, HickoryTech purchased 16,100 common shares for \$161,000.

CRITICAL ACCOUNTING POLICIES

This Form 10-Q is based upon HickoryTech's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America and, where applicable, conform to the accounting principles as prescribed by federal and state telephone utility regulatory authorities. A description of the critical accounting policies adhered to by HickoryTech is contained in the Management's Discussion and Analysis of Financial Condition and Results of Operations in HickoryTech's Annual Report on Form 10-K for the year ended December 31, 2002. There were no significant changes to these critical accounting policies during the first three months of 2003.

RECENT ACCOUNTING DEVELOPMENTS

Effective January 1, 2002, HickoryTech adopted SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 142 established new standards related to how acquired goodwill and other intangible assets are to be recorded upon their acquisition as well as how they are to be accounted for after they have been initially recognized in the financial statements.

Effective with the adoption of this standard, HickoryTech is no longer amortizing acquired goodwill. Instead, SFAS No. 142 requires acquired goodwill to be evaluated for impairment using a two-step test based upon a fair value approach. The first step is used to identify potential

impairment, while the second step calculates the amount of impairment, if any. Upon adoption of this standard, HickoryTech completed a transitional impairment test for its acquired goodwill, determining the fair value using primarily a discounted cash flow model. The determined fair value was sufficient to pass the first step impairment test, and therefore no impairment was recorded.

Additionally, upon adoption of SFAS No. 142, HickoryTech was required to reassess the useful lives of its other intangible assets. HickoryTech's other intangible assets primarily consist of wireless FCC licenses (FCC licenses). HickoryTech's FCC licenses have terms of ten years, but are renewable. The renewal of FCC licenses is a routine matter involving a nominal fee and HickoryTech has determined that no legal, regulatory, contractual, competitive, economic or other factors currently exist that limit the useful life of its FCC licenses. As such, effective with the adoption of SFAS No. 142, HickoryTech is no longer amortizing FCC licenses as they are deemed to be intangible assets that have indefinite lives. Prospectively, HickoryTech will continue to periodically reevaluate its determination of an indefinite useful life with regards to FCC licenses. SFAS No. 142 requires that indefinite lived intangible assets be tested for impairment by comparing the fair value of the assets to their carrying amount. Upon adoption of this standard, HickoryTech completed a transitional impairment test for FCC licenses, calculating fair value using primarily a discounted cash flow model and corroborating marketplace transactions, and determined that there was no impairment to be recorded. The FCC licenses were tested for impairment on an aggregate basis, which is consistent with HickoryTech's management of the wireless business within the Telecom Sector. HickoryTech also re-assessed the useful life of its other intangible assets and concluded that the existing lives of up to eight years should be continued.

On a prospective basis, HickoryTech is required to test both acquired goodwill and FCC licenses for impairment on an annual basis based upon a fair value approach. Additionally, goodwill shall be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of an entity below its carrying value. Other indefinite-lived intangible assets will be tested between annual tests if events or changes in circumstances indicate that the asset might be impaired. During the fourth quarter of 2002, HickoryTech completed its annual impairment tests for both acquired goodwill and FCC licenses using methodologies consistent with those applied for its transitional impairment tests performed as of January 1, 2002. Such testing resulted in no impairment charge to goodwill as the determined fair value was again sufficient to pass the first step impairment test. The first annual reassessment of HickoryTech's FCC licenses, however, resulted in a total pre-tax impairment charge of \$41,635,000 in the fourth quarter of 2002 in the Telecom Sector.

HickoryTech will test for impairment of acquired goodwill and FCC licenses at the end of the fourth quarter of 2003, unless events or occurrences deem it necessary to test for impairment in an interim period.

In June 2001, the FASB issued SFAS No. 143, Accounting for Asset Retirement Obligations. SFAS No. 143 requires entities to record the fair value of the liability for legal obligations associated with an asset retirement in the period in which the obligation is incurred. When the liability is initially recorded, the entity capitalizes the cost of the asset retirement obligation by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset.

HickoryTech's incumbent local exchange carrier companies (ILECs) follow the provisions of SFAS No. 71, and therefore conform to the accounting principles as prescribed by the respective state public utilities commissions and other federal agencies and, where applicable, accounting principles generally accepted in the United States of America. On December 20, 2002, the Federal Communications Commission (FCC) notified carriers that they would not adopt SFAS No. 143 for regulatory accounting purposes. At January 1, 2003, HickoryTech determined the amount of asset retirement obligations required to be recorded for its ILEC companies under the provisions of SFAS No. 143 were not significant, and therefore the implementation of SFAS No. 143 on January 1, 2003 did not impact HickoryTech's financial position or results of operations.

HickoryTech's competitive local telephone companies (CLEC) also adopted SFAS No. 143 effective January 1, 2003. HickoryTech has determined that its competitive local telephone companies do not have a material legal obligation to remove long-lived assets as described by SFAS No. 143, and accordingly, adoption of SFAS No. 143 did not impact HickoryTech's financial position or results of operations.

HickoryTech also adopted the provisions of SFAS No. 143 for its wireless operations as of January 1, 2003. HickoryTech performed an analysis to identify all potential Asset Retirement Obligations. The legal obligations identified consist of obligations to remediate leased property where cell sites are located. However, based upon HickoryTech's experience and expectations, there is significant uncertainty as to whether third parties that own these leased properties would enforce their remediation rights related to the sites. Therefore, pursuant to the provisions of SFAS No. 143, HickoryTech did not record this potential asset retirement obligation upon adoption and will not record an obligation until such time as the fair value of the obligation can be reasonably estimated.

In April 2002, the FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections. SFAS No. 145 rescinds FASB Statement No. 4, Reporting Gains and Losses from Extinguishment of Debt, and an amendment of that Statement, FASB Statement No. 64, Extinguishments of Debt Made to Satisfy Sinking-Fund Requirements. SFAS No. 145 also rescinds FASB Statement No. 44, Accounting for Intangible Assets of Motor Carriers, and amends FASB Statement No. 13, Accounting for Leases. HickoryTech adopted the provisions of SFAS No. 145 on January 1, 2003. Adoption of this standard had no impact on the financial statements presented in this Form 10-Q.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities, which replaces Emerging Issues Task Force (EITF) Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). SFAS No. 146 requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. HickoryTech engaged in no activities in the first quarter of 2003 that are subject to the provisions of SFAS No. 146. Accordingly, the adoption of SFAS No. 146 did not impact HickoryTech's financial position or results of operations.

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation Transition Disclosure an amendment of SFAS No. 123 (SFAS No. 148). This Statement amends SFAS No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The provisions of SFAS No. 148 are effective for financial statements for fiscal years ending after December 15, 2002, and disclosure requirements shall be effective for interim periods beginning after December 15, 2002. The Company will continue to account for stock-based compensation to its employees and directors using the intrinsic value method prescribed by APB Opinion No. 25, and related interpretations. The Company adopted the provisions of SFAS No. 148 and has made certain disclosures required by SFAS No. 148 in the consolidated financial statements presented in this report. The adoption of SFAS No. 148 did not impact HickoryTech's financial position or results of operations.

In November 2002, the FASB issued Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. This interpretation elaborates on the disclosures required in financial statements concerning obligations under certain guarantees. It also clarifies the requirements related to the recognition of liabilities by a guarantor at the inception of certain guarantees. The disclosure requirements of this interpretation were effective for HickoryTech on December 31, 2002 but did not require any additional disclosures. The recognition provisions of the interpretation are effective for HickoryTech in 2003 and are applicable only to guarantees issued or modified after December 31, 2002. The adoption of Interpretation No. 45 does not have a material impact on the financial position or results of operations of HickoryTech.

ITEM 3. QUANTATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

HickoryTech does not have operations subject to risks of foreign currency fluctuations, nor does HickoryTech use derivative financial instruments in its operations or investment portfolio. HickoryTech's earnings are affected by changes in interest rates as a portion of its long-term debt has variable interest rates based on LIBOR. If interest rates for the portion of HickoryTech's long-term debt based on variable rates had averaged 10% more for the entire quarter ended March 31, 2003, HickoryTech's interest expense would have increased \$113,000 for the three months ended March 31, 2003. In case of a change of such magnitude, management would likely act to mitigate its exposure to the change by converting a portion of its variable-rate debt to fixed-rate debt.

ITEM 4. CONTROLS AND PROCEDURES

Within the 90-day period prior to the date of this report, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures. Disclosure controls and procedures are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, such as this Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Based on that evaluation, our CEO and CFO have concluded that our disclosure controls and procedures are effective to satisfy the objectives for which they are intended. Subsequent to the date of our management's evaluation, there were no significant changes in our internal controls or in other factors that could significantly affect these controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

Other than routine litigation incidental to HickoryTech's business, there are no material pending legal proceedings to which HickoryTech is a party or to which any of its property is subject.

Item 2. Changes in Securities.

None

Item 3. Default Upon Senior Securities.

None.

Item 4. Submission of Matters to a Vote of Security Holders.

None

Item 5. Other Information.

None.

Item 6. Exhibits and Reports of Form 8-K.

(a) Exhibits

10(a) Hickory Tech Corporation Executive Incentive Plan Amended and Restated December 4, 2002.

(b) HickoryTech filed a Form 8-K on March 3, 2003 containing a press release announcing its fourth quarter and full year 2002 consolidated operating results.

HickoryTech filed a Form 8-K on March 7, 2003 announcing the company's mailing of a communication to shareholders which contained the Chairman's and President's letters to the shareholders.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Dated: May 12, 2003

HICKORY TECH CORPORATION

CERTIFICATIONS

I, John E. Duffy, certify that:

1. I have reviewed this quarterly report on Form 10-Q of HickoryTech;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Hickory Tech Corporation (HickoryTech) on Form 10-Q for the period ending March 31, 2003 as filed with the Securities and Exchange Commission on the date hereof (the Report), I, John E. Duffy, Chief Executive Officer of HickoryTech, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of HickoryTech.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Hickory Tech Corporation (HickoryTech) on Form 10-Q for the period ending March 31, 2003 as filed with the Securities and Exchange Commission on the date hereof (the Report), I, David A. Christensen, Chief Financial Officer of HickoryTech, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of HickoryTech.
