The exact stock prices and effective dates may not be set forth in the table above, in which case:

- if the stock price is between two stock prices in the table or the effective date is between two effective dates in the table, the number of additional shares will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, based on a 365-day year, as applicable;
- if the stock price is greater than \$80.00 per share (subject to adjustment), no additional shares will be issued upon conversion; and
- if the stock price is less than \$12.37 per share (subject to adjustment), no additional shares will be issued upon conversion.

Notwithstanding the foregoing, in no event will the total number of shares of Regis common stock issuable upon conversion of Notes exceed 80.8407 per \$1,000 principal amount of such Notes, subject to adjustments in the same manner as the applicable conversion rate as set forth under Description of Notes Conversion Rate Adjustments in the preliminary prospectus, dated July 6, 2009, relating to this offering.

Concurrent Offering of Common Stock:

Concurrently with this offering, Regis is offering 11,500,000 shares of its common stock (plus an underwriters' option to purchase up to an additional 1,725,000 shares to cover over-allotments) in a separate public offering. Neither offering is conditioned on the other.

Use of Proceeds:

The estimated net proceeds to Regis from this offering will be approximately \$145.5 million (\$167.325 million if the underwriters' over-allotment option is exercised in full), after deducting the underwriting discount but before taking into account offering expenses payable by Regis. The estimated net proceeds to Regis from the concurrent common stock offering will be approximately \$136.032 million (\$156.437 million if the underwriters' over-allotment option in that offering is exercised in full), after deducting the underwriting discount but before taking into account expenses payable by Regis.

Regis plans to use approximately \$277 million of the net proceeds from this offering, along with the net proceeds

from the concurrent common stock offering, to repay in the aggregate \$267 million principal amount of its outstanding fixed rate 7.20% Senior Notes, Series B, due 2012, 4.97% Senior Notes, Series 2005-A, Tranche 1, due 2013 and 5.20% Senior Notes, Series 2005-A, Tranche 2, due 2015 and its outstanding Floating Rate Senior Notes, Series 2005-B, Tranche 1, due 2015 (which currently bear interest at 1.12% per annum) and Floating Rate Senior Notes, Series 2005-B, Tranche 2, due 2013 (which currently bear interest at 1.15% per annum). The fixed rate notes are being repaid with a premium over the principal amount that is less than the current make-whole premium. In connection with the repayment of these notes, Regis expects to incur an expense of approximately \$3.6 million related to the settlement of certain interest rate swaps.

Regis intends to use the remaining proceeds, if any, to pay down outstanding borrowings under its revolving credit facility and for general corporate purposes.
