# UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

## FORM 10-Q

**x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

**For the quarterly period ended September 30, 2009**

**OR**

**o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

**Commission File Number 1-815**

**E. I. du Pont de Nemours and Company**

(Exact Name of Registrant as Specified in Its Charter)

**Delaware**

(State or other Jurisdiction of  
Incorporation or Organization)

**51-0014090**

(I.R.S. Employer  
Identification No.)

Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

1007 Market Street, Wilmington, Delaware 19898

(Address of Principal Executive Offices)

(302) 774-1000

(Registrant's Telephone Number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that registrant was required to submit and post such files.) Yes ☒ No ☐

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer ☒

Accelerated Filer ☐

Non-Accelerated Filer ☐

Smaller reporting company ☐

Indicate by check mark whether the Registrant is a shell company (as defined by Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The Registrant had 903,730,000 shares (excludes 87,041,000 shares of treasury stock) of common stock, \$0.30 par value, outstanding at October 15, 2009.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*(Dollars in millions, except per share)*

**Note 1. Summary of Significant Accounting Policies**

**Interim Financial Statements**

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) for interim financial information and the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair statement of the results for interim periods have been included. Results for interim periods should not be considered indicative of results for a full year. These interim Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and Notes thereto contained in the company's Annual Report on Form 10-K for the year ended December 31, 2008, collectively referred to as the 2008 Annual Report. The Consolidated Financial Statements include the accounts of the company and all of its subsidiaries in which a controlling interest is maintained, as well as variable interest entities in which DuPont is considered the primary beneficiary. Certain reclassifications of prior years' data have been made to conform to current year classifications.

**Subsequent Events**

The company's management has evaluated the period from October 1, 2009 through October 26, 2009, the date the financial statements herein were issued, for subsequent events requiring recognition or disclosure in the financial statements. Effective October 1, 2009, the company has redefined its external reporting to the following aggregated segments: Agriculture & Nutrition, Electronics & Communications, Performance Coatings, Performance Materials, Safety & Protection, Performance Chemicals and Pharmaceuticals. The company will begin reporting under the redefined structure in its 2009 Annual Report on Form 10-K. No additional material subsequent events were identified.

**Accounting Standards Issued Not Yet Adopted**

In December 2008, the Financial Accounting Standards Board (FASB) issued authoritative guidance on employer's disclosures about postretirement benefit plan assets, which is effective for fiscal years ending after December 15, 2009. The new requirement expands disclosures for assets held by employer pension and other postretirement benefit plans. This requirement will not affect the company's financial position or results of operations.

In June 2009, FASB issued authoritative guidance on accounting for transfers of financial assets, which is effective for reporting periods beginning after November 15, 2009. The new requirement limits the circumstances in which a financial asset may be de-recognized when the transferor has not transferred the entire financial asset or has continuing involvement with the transferred asset. The concept of a qualifying special-purpose entity, which had previously facilitated sale accounting for certain asset transfers, is removed by the new requirement. The

company expects that this will not have a material effect on its financial position or results of operations.

In June 2009, FASB issued authoritative guidance on accounting for variable interest entities, which is effective for reporting periods beginning after November 15, 2009. The amendments change the process for how an enterprise determines which party consolidates a variable interest entity (VIE) to a primarily qualitative analysis. The party that consolidates the VIE (the primary beneficiary) is defined as the party with (1) the power to direct activities of the VIE that most significantly affect the VIE's economic performance and (2) the obligation to absorb losses of the VIE or the right to receive benefits from the VIE. Upon adoption, reporting enterprises must reconsider their conclusions on whether an entity should be consolidated and should a change result, the effect on net assets will be recorded as a cumulative effect adjustment to retained earnings. The company expects that upon adoption this will not have a material effect on its financial position or results of operations.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)***Note 2. Reporting of Noncontrolling Interests**

Effective January 1, 2009, the company implemented the provisions for the reporting of noncontrolling interests in the company's Consolidated Financial Statements and accompanying notes. The provision changed the accounting and reporting of minority interests (now referred to as noncontrolling interests) in the company's Consolidated Financial Statements. The following tables illustrate the changes in equity for the three and nine months ended September 30, 2009 and 2008, respectively:

<b>Consolidated Changes in Equity for the Three Months Ended September 30, 2009</b>	<b>Total</b>	<b>Comprehensive Income</b>	<b>Preferred Stock</b>	<b>Common Stock</b>	<b>Additional Paid-in- Capital</b>	<b>Reinvested Earnings</b>	<b>Accumulated Other Comprehensive Loss</b>	<b>Treasury Stock</b>	<b>Noncontrolling Interests</b>

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

Total Equity as of September 30,  
2008

---

(1) Includes comprehensive income attributable to noncontrolling interests of \$12 and \$7 for the nine months ended September 30, 2009 and 2008, respectively.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)***Note 3. Fair Value Measurements**

In 2008, the company implemented the accounting requirements for financial assets and financial liabilities reported at fair value and related disclosures. Effective January 1, 2009, the company prospectively implemented the accounting requirements for non-financial assets and non-financial liabilities reported or disclosed at fair value, except for non-financial items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually).

The requirement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The disclosures focus on the inputs used to measure fair value.

The company has determined that its financial assets and liabilities are level 1 and level 2 in the fair value hierarchy. The company uses the following valuation techniques to measure fair value for its financial assets and financial liabilities:

Level 1 - Quoted market prices in active markets for identical assets or liabilities

Level 2 - Significant other observable inputs (e.g. quoted prices for similar items in active markets, quoted prices for identical or similar items in markets that are not active, inputs other than quoted prices that are observable such as interest rate and yield curves, and market-corroborated inputs)

At September 30, 2009, the following financial assets and financial liabilities were measured at fair value on a recurring basis using the type of inputs shown:

	September 30, 2009	Fair Value Measurements at September 30, 2009 Using	
		Level 1 Inputs	Level 2 Inputs
Financial assets			
Derivatives	\$ 83	\$	\$ 83
Available-for-sale securities	22	22	
	\$ 105	\$ 22	\$ 83
Financial liabilities			

# Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

Derivatives	\$	254	\$		\$	254
-------------	----	-----	----	--	----	-----

In accordance with the interim disclosure requirements for financial instruments, the estimated fair value of the company's outstanding debt, including interest rate financial instruments, based on quoted market prices for the same or similar issues or on current rates offered to the company for debt of the same remaining maturities, was \$11,700 at September 30, 2009, as compared to a carrying value of approximately \$11,100.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)***Note 4. Other Income, Net**

	<b>Three Months Ended September 30,</b>		<b>Nine Months Ended September 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>

Equity in earnings of affiliates	7	13	59	95
Net gains on sales of assets	2	1	43	15
Net exchange (losses) gains (1)	(120)	52	(212)	(127)
Miscellaneous income and expenses, net (2)		29	9	138
<b>Total</b>	<b>\$ 195</b>	<b>\$ 420</b>	<b>\$ 824</b>	<b>\$ 1,057</b>

(1) The company routinely uses forward exchange contracts to offset its net exposures, by currency, related to its foreign currency-denominated monetary assets and liabilities. The objective of this program is to maintain an approximately balanced position in foreign currencies in order to minimize, on an after-tax basis, the effects of exchange rate changes on net monetary asset positions. The net pre-tax exchange gains and losses are partially offset by the associated tax impact.

(2) Miscellaneous income and expenses, net, includes interest items, litigation settlements, and other items.

**Note 5. Employee Separation / Asset Related Charges, Net**

At September 30, 2009, total liabilities relating to current year and prior years restructuring activities were \$403.

**2009 Activities**

During the second quarter of 2009, in response to the protracted global economic recession, the company committed to an initiative to address the steep and extended downturn in motor vehicle and construction markets, and the extension of the downturn into industrial markets. The plan was designed to restructure asset and fixed cost bases in order to improve long-term competitiveness, simplify business processes, and maximize pre-tax operating income. Under the plan, the company will eliminate about 2,000 positions by severance principally located in the United States

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

of America. As a result, a charge of \$340 was recorded in employee separation / asset related charges, net which pertains to the following financial statement line items: cost of goods sold and other operating charges - 60%, selling, general and administrative expenses - 30%, and research and development expenses - 10%. This charge includes \$212 of severance and related benefits costs, \$24 of other non-personnel costs and \$104 of asset-related charges, including \$77 for asset shut downs and write-offs, \$11 for asset impairments and \$16 for accelerated depreciation. As of September 30, 2009, cash payments of \$13 related to separation costs have been made, and approximately 800 employees have been separated. The company expects this initiative and all related payments to be substantially complete in 2010.

The 2009 program charge reduced segment earnings for the nine-months ended September 30, 2009 as follows: Coatings & Color Technologies - \$70; Electronic & Communication Technologies - \$73; Performance Materials - \$110; Safety & Protection - \$86; and Other - \$1.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)*

Account balances and activity for the 2009 restructuring program are summarized below:

(1) Other non-personnel charges consist of contractual obligation costs.

**2008 Activities**

In the second quarter 2009, the company achieved work force reductions related to the 2008 program through non-severance programs and redeployments within the company. As a result, the company recorded a \$75 net reduction in the estimated costs associated with the 2008 program. The \$75 net reduction impacted segment earnings for the nine-months ended September 30, 2009 as follows: Agriculture & Nutrition - \$(1); Coatings & Color Technologies - \$43; Electronic & Communication Technologies - \$1; Performance Materials - \$28; Safety & Protection - \$2; and Other - \$2. A complete discussion of all restructuring initiatives is included in the company's 2008 Annual Report in Note 5, Restructuring Activities. The account balances and activity for the company's 2008 global restructuring program are as follows:

	<b>Employee Separation Costs</b>	<b>Other Non- personnel Charges (1)</b>	<b>Total</b>
Balance at December 31, 2008	\$ 309	\$ 17	\$ 326
Payments	(84)	(2)	(86)
Net translation adjustment	4	1	5
Net credits to income	(75)		(75)
Other			
Balance at September 30, 2009	\$ 154	\$ 16	\$ 170

---

(1) Other non-personnel charges consist of contractual obligation costs.

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

As of September 30, 2009, approximately 1,600 employees were separated relating to the 2008 global restructuring program.

### **Note 6. Provision for Income Taxes**

In the third quarter 2009, the company recorded a tax benefit of \$23, including \$117 of tax benefit primarily associated with the company's policy of hedging the foreign currency-denominated monetary assets and liabilities of its operations.

For year-to-date 2009, the tax provision is \$288, which includes \$117 of tax benefit primarily associated with the company's policy of hedging the foreign currency-denominated monetary assets and liabilities of its operations, \$91 net tax benefit related to 2008 and 2009 restructuring and \$17 net tax expense related to the hurricane adjustments.

In the third quarter 2008, the company recorded a tax provision of \$98, including \$85 of tax expense primarily associated with the company's policy of hedging the foreign currency-denominated monetary assets and liabilities of its operations, \$81 tax benefit related to the hurricane-related charge and \$18 tax benefit related to favorable tax settlements.

For year-to-date 2008, the tax provision was \$706, which includes \$81 tax benefit related to the hurricane-related charge, \$48 of tax benefit primarily related to exchange losses on foreign currency-

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)*

denominated monetary assets and liabilities of its operations and \$44 tax benefit related to favorable tax settlements.

Each year the company files hundreds of tax returns in the various national, state and local income taxing jurisdictions in which it operates. These tax returns are subject to examination and possible challenge by the taxing authorities. Positions challenged by the taxing authorities may be settled or appealed by the company. As a result, there is an uncertainty in income taxes recognized in the company's financial statements in accordance with accounting for income taxes and accounting for uncertainty in income taxes. It is reasonably possible that changes to the company's global unrecognized tax benefits could be significant, however, due to the uncertainty regarding the timing of completion of audits and possible outcomes, a current estimate of the range of increases or decreases that may occur within the next twelve months cannot be made.

**Note 7. Earnings Per Share of Common Stock**

Set forth below is a reconciliation of the numerator and denominator for basic and diluted earnings per share calculations for the periods indicated:

	<b>Three Months Ended September 30,</b>		<b>Nine Months Ended September 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
<b>Numerator:</b>				
Net income attributable to DuPont	\$ 409	\$ 367	\$ 1,314	\$ 2,636
Preferred dividends	(3)	(3)	(8)	(8)
Net income available to DuPont common stockholders	\$ 406	\$ 364	\$ 1,306	\$ 2,628
<b>Denominator:</b>				
Weighted-average number of common shares - Basic	904,615,000	903,134,000	904,350,000	902,131,000
Dilutive effect of the company's employee compensation plans	5,676,000	4,816,000	3,646,000	5,942,000
Weighted-average number of common shares - Diluted	910,291,000	907,950,000	907,996,000	908,073,000

The following average number of stock options were antidilutive, and therefore, were not included in the diluted earnings per share calculations:

Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Average Number of Stock Options	70,137,000	43,028,000	73,949,000	29,066,000

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)***Note 8. Inventories**

	September 30, 2009	December 31, 2008
Finished products	\$ 2,972	\$ 3,156
Semifinished products	1,319	2,234
Raw materials and supplies	811	1,199
	5,102	6,589
Adjustment of inventories to a last-in, first-out (LIFO) basis	(710)	(908)
Total	\$ 4,392	\$ 5,681

**Note 9. Goodwill and Other Intangible Assets**

There were no significant changes in goodwill for the nine-month period ended September 30, 2009.

The gross carrying amounts and accumulated amortization of other intangible assets by major class are as follows:

	Gross	September 30, 2009 Accumulated Amortization	Net	Gross	December 31, 2008 Accumulated Amortization	Net
Intangible assets subject to amortization (Definite-lived):						
Purchased and licensed technology	\$ 1,628	\$ (699)	\$ 929	\$ 2,420	\$ (1,356)	\$ 1,064
Patents	169	(54)	115	128	(45)	83
Trademarks	61	(21)	40	61	(19)	42
Other	635	(291)	344	627	(260)	367
	2,493	(1,065)	1,428	3,236	(1,680)	1,556
Intangible assets not subject to amortization (Indefinite-lived):						
Trademarks / tradenames	179		179	179		179
Pioneer germplasm	975		975	975		975
	1,154		1,154	1,154		1,154
Total	\$ 3,647	\$ (1,065)	\$ 2,582	\$ 4,390	\$ (1,680)	\$ 2,710

The aggregate amortization expense for definitive-lived intangible assets was \$52 and \$219 for the three- and nine-month periods ended September 30, 2009, respectively, and \$54 and \$226 for the three- and nine-month periods ended September 30, 2008, respectively. The estimated aggregate amortization expense for 2009 and each of the next five years is approximately \$250, \$180, \$190, \$190, \$190 and \$190.

Table of Contents

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*(Dollars in millions, except per share)*

**Note 10. Commitments and Contingent Liabilities**

**Guarantees**

*Product Warranty Liability*

The company warrants that its products meet standard specifications. The company's product warranty liability was \$22 and \$24 as of September 30, 2009 and December 31, 2008, respectively. Estimates for warranty costs are based on historical claims experience.

*Indemnifications*

In connection with acquisitions and divestitures, the company has indemnified respective parties against certain liabilities that may arise in connection with these transactions and business activities prior to the completion of the transaction. The term of these indemnifications, which typically pertain to environmental, tax and product liabilities, is generally indefinite. In addition, the company indemnifies its duly elected or appointed directors and officers to the fullest extent permitted by Delaware law, against liabilities incurred as a result of their activities for the company, such as adverse judgments relating to litigation matters. If the indemnified party were to incur a liability or have a liability increase as a result of a successful claim, pursuant to the terms of the indemnification, the company would be required to reimburse the indemnified party. The maximum amount of potential future payments is generally unlimited. The carrying amount recorded for all indemnifications as of September 30, 2009 and December 31, 2008 was \$97 and \$110, respectively. Although it is reasonably possible that future payments may exceed amounts accrued, due to the nature of indemnified items, it is not possible to make a reasonable estimate of the maximum potential loss or range of loss. No assets are held as collateral and no specific recourse provisions exist.

In connection with the 2004 sale of the majority of the net assets of Textiles and Interiors, the company indemnified the purchasers, subsidiaries of Koch Industries, Inc. (INVISTA), against certain liabilities primarily related to taxes, legal and environmental matters and other representations and warranties under the Purchase and Sale Agreement. The estimated fair value of the indemnity obligations under the Purchase and Sale Agreement was \$70 and was included in the indemnifications balance of \$97 at September 30, 2009. Under the Purchase and Sale Agreement, the company's total indemnification obligation for the majority of the representations and warranties cannot exceed \$1,400. The other indemnities are not subject to this limit. In March 2008, INVISTA filed suit in the Southern District of New York alleging that certain representations and warranties in the Purchase and Sale Agreement were breached and, therefore, DuPont is obligated to indemnify it. DuPont disagrees with the extent and value of INVISTA's claims. DuPont has not changed its estimate of its total indemnification obligation under the Purchase and Sale Agreement as a result of the lawsuit.

*Obligations for Equity Affiliates & Others*

The company has directly guaranteed various debt obligations under agreements with third parties related to equity affiliates, customers, suppliers and other affiliated and unaffiliated companies. At September 30, 2009, the company had directly guaranteed \$570 of such obligations, and \$121 relating to guarantees of historical obligations for divested subsidiaries. This represents the maximum potential amount of future (undiscounted) payments that the company could be required to make under the guarantees. The company would be required to perform on these guarantees in the event of default by the guaranteed party.

The company assesses the payment/performance risk by assigning default rates based on the duration of the guarantees. These default rates are assigned based on the external credit rating of the counterparty or through internal credit analysis and historical default history for counterparties that do not have published credit ratings. For counterparties without an external rating or available credit history, a cumulative average default rate is used.

At September 30, 2009 and December 31, 2008, a liability of \$149 and \$121, respectively, was recorded for these obligations, representing the amount of payment/performance risk for which the company deems probable. This liability is principally related to obligations of the company's polyester films joint venture, which are guaranteed by the company.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)*

In certain cases, the company has recourse to assets held as collateral, as well as personal guarantees from customers and suppliers. Assuming liquidation, these assets are estimated to cover approximately 36 percent of the \$245 of guaranteed obligations of customers and suppliers. Set forth below are the company's guaranteed obligations at September 30, 2009:

	Short- Term	Long- Term	Total
Obligations for customers, suppliers and other affiliated and unaffiliated companies(1), (2):			
Bank borrowings (terms up to 6 years)	\$ 372	\$ 152	\$ 524
Leases on equipment and facilities (terms less than 3 years)	12	1	13
Obligations for equity affiliates(2):			
Bank borrowings (terms up to 4 years)	8	21	29
Leases on equipment and facilities (terms up to 1 year)		4	4
Total obligations for customers, suppliers, other affiliated and unaffiliated companies and equity affiliates	\$ 392	\$ 178	\$ 570
Obligations for divested subsidiaries and affiliates(3):			
Conoco (terms up to 17 years)	2	16	18
Consolidation Coal Sales Company (terms up to 2 years)		103	103
Total obligations for divested subsidiaries and affiliates	2	119	121
	\$ 394	\$ 297	\$ 691

(1) Existing guarantees for customers, suppliers, and other unaffiliated companies arose as part of contractual agreements.

(2) Existing guarantees for equity affiliates and other affiliated companies arose for liquidity needs in normal operations.

(3) The company has guaranteed certain obligations and liabilities related to divested subsidiaries Conoco and Consolidation Coal Sales Company. Conoco and Consolidation Coal Sales Company have indemnified the company for any liabilities the company may incur pursuant to these guarantees.

Master Operating Leases

At September 30, 2009, the company has one master operating lease program relating to miscellaneous short-lived equipment with an unamortized value of approximately \$69. The leases under this program are considered operating leases and accordingly the related assets and liabilities are not recorded on the Consolidated Balance Sheets. Furthermore, the lease payments associated with this program vary based on one month USD LIBOR. In November 2008, the lessor notified the company that the program will terminate by November 2009. Prior to that time, the company may either purchase the assets for their unamortized value or arrange for the sale of the assets and remit the proceeds to the lessor. If the assets are sold and the proceeds are less than the unamortized value, the company must pay to the lessor the difference between the proceeds and the unamortized value, up to the residual value guarantee, which totaled \$60 at September 30, 2009.

**Litigation**

PFOA

***Regulatory and Environmental Actions***

*In January 2009, the U.S. Environmental Protection Agency (EPA) issued a national Provisional Health Advisory for PFOA of 0.4 parts per billion (ppb) in drinking water. In March 2009, EPA and DuPont entered an Order on Consent under the Safe Drinking Water Act (SDWA) reflecting an action level of 0.40 ppb. Under the terms of the 2009 consent order, DuPont will conduct surveys, sampling and analytical testing in the area around its Washington Works site located in Parkersburg, West Virginia. If tests indicate the presence of PFOA, (collectively, perfluorooctanoic acids and its salts, including the ammonium salt), in drinking water at 0.40 ppb or greater, the company will offer treatment or an alternative supply of drinking water. The 2009 consent order supersedes the November 2006 Order on Consent between DuPont and EPA which established a precautionary interim screening level for PFOA of 0.50 ppb in drinking water sources in the area around the Washington Works site. All of DuPont's remaining obligations under the 2006 consent order have been incorporated into the 2009 consent order.*

In late 2005 DuPont and the EPA entered into a Memorandum of Understanding (EPA MOU) that required DuPont to monitor PFOA in the soil, air, water and biota around the Washington Works site. The required third party peer review of the data generated in the monitoring process has been completed. The final report was issued in September 2009 and DuPont's response is due in the fourth quarter 2009.

As agreed with the New Jersey Department of Environmental Protection (NJDEP), DuPont began voluntarily sampling private wells within a two-mile radius of its Chambers Works site in Deepwater, New Jersey for the presence of PFOA in the second quarter 2009.

At September 30, 2009, DuPont has accruals of about \$0.6 to fund its activities under the 2009 consent order and EPA MOU and to fund its voluntary activities under the NJDEP agreement.

***EPA Administrative Complaints***

In July and December 2004, the EPA filed administrative complaints against DuPont alleging that the company failed to comply with the technical reporting requirements of the Toxic Substances Control Act (TSCA) and the Resource Conservation and Recovery Act (RCRA) regarding PFOA. Under a 2005 agreement settling the matter, the company paid civil fines of \$10.25 and will complete two Supplemental

Environmental Projects at a total cost of \$6.25.

***Actions: Drinking Water***

In August 2001, a class action, captioned Leach v. DuPont, was filed in West Virginia state court against DuPont and the Lubeck Public Service District. DuPont uses PFOA as a processing aid to manufacture fluoropolymer resins and dispersions at various sites around the world including its Washington Works plant in West Virginia. The complaint alleged that residents living near the Washington Works facility had suffered, or may suffer, deleterious health effects from exposure to PFOA in drinking water. The relief sought included damages for medical monitoring, diminution of property values and punitive damages plus injunctive relief to stop releases of PFOA. DuPont and attorneys for the class reached a settlement agreement in 2004 and as a result, the company established accruals of \$108 in 2004. The agreement was approved by the Wood County Circuit Court on February 28, 2005 after a fairness hearing. The settlement binds a class of approximately 80,000 residents. As defined by the court, the class includes those individuals who have consumed, for at least one year, water containing 0.05 ppb or greater of PFOA from any of six designated public water sources or from sole source private wells.

In July 2005, the company paid the plaintiffs' attorneys' fees and expenses of \$23 and made a payment of \$70, which class counsel has designated to fund a community health project. The company is also funding a series of health studies by an independent science panel of experts in the communities exposed to PFOA to evaluate available scientific evidence on whether any probable link exists between exposure to PFOA and human disease. The company expects the independent science panel to

Table of Contents

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*(Dollars in millions, except per share)*

complete these health studies between 2009 and year-end 2011 at a total estimated cost of \$26, of which \$5 was originally placed in an interest-bearing escrow account. In addition, the company is providing state-of-the art water treatment systems designed to reduce the level of PFOA in water to six area water districts, including the Little Hocking Water Association (LHWA), until the science panel determines that PFOA does not cause disease or until applicable water standards can be met without such treatment. All of the water treatment systems are operating. The estimated cost of constructing, operating and maintaining these systems is about \$22 of which \$10 was originally placed in an interest-bearing escrow account. At September 30, 2009, the accrual balance relating to the funding of the independent science panel health study and the water treatment systems was \$12, including \$6 in interest bearing escrow accounts.

The settlement resulted in the dismissal of all claims asserted in the lawsuit except for personal injury claims. If the independent science panel concludes that no probable link exists between exposure to PFOA and any diseases, then the settlement would also resolve personal injury claims. If it concludes that a probable link does exist between exposure to PFOA and any diseases, then DuPont would also fund up to \$235 for a medical monitoring program to pay for such medical testing. In this event, plaintiffs would retain their right to pursue personal injury claims. All other claims in the lawsuit would remain dismissed by the settlement. DuPont believes that it is remote that the panel will find a probable link. Therefore, at September 30, 2009, the company had not established any accruals related to medical monitoring or personal injury claims. However, there can be no assurance as to what the independent science panel will conclude.

In June 2007 and again in August 2009, the LHWA notified DuPont that it intends to file suit under RCRA alleging imminent and substantial endangerment to health and or the environment based on detection of PFOA in its wells. DuPont received in February 2009, two additional letters of intent to file suit under RCRA alleging imminent and substantial endangerment to health and or the environment based on detection of PFOA in public and private water wells in Parkersburg, West Virginia and Penns Grove, New Jersey. DuPont denies any such endangerment exists at any of these locations and intends to vigorously defend itself if a lawsuit is filed.

In September 2007, LHWA refiled the suit it originally filed in Ohio state court and voluntarily dismissed in 2006. The suit claims that perfluorinated compounds, including PFOA, allegedly released from the Washington Works plant contaminated LHWA's well fields and underlying aquifer. LHWA's complaint seeks a variety of relief including compensatory and punitive damages, and an injunction requiring DuPont to provide a new pristine well field and the infrastructure to deliver it.

In the third quarter 2009, Emerald Coast Utilities Authority, owner and operator of public drinking water systems in Pensacola, Florida and nearby areas, filed suit in state court against several defendants including the company alleging water contamination from PFOA and perfluorooctane sulfonate (PFOS). DuPont does not have any facilities in the water district served by the Emerald Coast Utilities Authority that manufacture or use PFOA. DuPont does not and has not manufactured PFOS and does not use the compound in its processes. The complaint seeks testing, treatment, remediation and monitoring.

In the second quarter 2006, three purported class actions were filed alleging that drinking water had been contaminated by PFOA in excess of 0.05 ppb due to alleged releases from certain DuPont plants. One of these cases was filed in West Virginia state court by three individual plaintiffs on behalf of customers of the Parkersburg City Water District, but was removed on DuPont's motion to the U.S. District Court for the Southern District of West Virginia. In September 2008, the U.S. District Court ruled that the case could not proceed as a class action. Plaintiffs' appeal of the ruling was denied. In the second quarter 2009, the plaintiffs added a claim based on public nuisance and again moved for class

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

certification. In the third quarter 2009, the Court granted summary judgment in DuPont's favor dismissing all claims brought by the three plaintiffs, including public nuisance and class certification, except for medical monitoring.

The other two purported class actions were filed in New Jersey. One was filed in federal court on behalf of individuals who allegedly drank water contaminated by releases from DuPont's Chambers Works plant in Deepwater, New Jersey. The second was filed in state court on behalf of customers serviced primarily by the Pennsville Township Water Department and was removed to New Jersey federal district court on

Table of Contents

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*(Dollars in millions, except per share)*

DuPont's motion. The New Jersey cases have been combined for purposes of discovery and the complaints have been amended to allege that drinking water had been contaminated by PFOA in excess of 0.04 ppb. In December 2008, the court denied class action status in both cases, but ordered additional briefing on certain issues. In October 2009, the court granted class certification for certain sub-classes regarding public and private nuisance claims, while denying class certification for all other claims. The court also certified a legal question related to strict liability.

The company is defending itself vigorously against these lawsuits alleging contamination of drinking water sources.

While DuPont believes that it is reasonably possible that it could incur losses related to PFOA matters in addition to those matters discussed above for which it has established accruals, a range of such losses, if any, cannot be reasonably estimated at this time.

In the second quarter 2009, plaintiffs' counsel dismissed all twenty-two purported class actions that were filed against DuPont on behalf of consumers who purchased cookware with Teflon® non-stick coating in federal district courts.

In December 2005, a motion was filed by a single named plaintiff in the Superior Court for the Province of Quebec, Canada seeking authorization to institute a class action on behalf of all Quebec consumers who have purchased or used kitchen items, household appliances or food-packaging containing Teflon® or Zonyl® non-stick coatings. This matter has been inactive since filing. In the third quarter 2009, the Court dismissed the motion.

**Elastomers Antitrust Matters**

Since 2002, the U.S., European Union (EU) and Canadian antitrust authorities have investigated the synthetic rubber markets for possible violations. These investigations included DuPont Dow Elastomers, LLC (DDE), as a result of its participation in the polychloroprene (PCP) and ethylene propylene diene monomer (EPDM) markets. DDE was a joint venture between The Dow Chemical Company (Dow) and DuPont.

In April 2004, DuPont and Dow entered into a series of agreements under which DuPont obtained complete control over directing DDE's response to these investigations and the related litigation and DuPont agreed to a disproportionate share of the venture's liabilities and costs related to these matters. Consequently, DuPont bears any potential liabilities and costs up to the initial \$150. Dow is obligated to indemnify DuPont for up to \$72.5 by paying 15 to 30 percent toward liabilities and costs in excess of \$150. On June 30, 2005, DDE became a wholly owned subsidiary of DuPont and was renamed DuPont Performance Elastomers, LLC (DPE).

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)*

In July 2007, DPE pled guilty to conspiring to fix prices and paid a fine of CDN \$4, approximately \$3.8 USD, resolving all criminal antitrust allegations against it related to PCP in Canada.

In late March 2007, the EU antitrust authorities issued a Statement of Objections that made antitrust allegations regarding the PCP market against DPE, relating to the joint venture's activities, and DuPont, to which both responded. In December 2007, the EU antitrust authorities issued their decision, including the imposition of fines against DPE, Dow and DuPont totaling EURO 59.25. In February 2008, DuPont appealed the decision to the EU's Court of First Instance which has jurisdiction to review the findings and adjust the fine. It is very unlikely that the fine would be increased as a result of the review. In March 2008, the company provisionally paid the fine of EURO 59.25 (\$90.9 USD); a portion of the payment may be refunded if the appeal is successful. While a decision on the February 2008 appeal has not been issued, the EU antitrust authorities revised the December 2007 decision by imposing an incremental fine on Dow of EURO 4.425 (\$6.5 USD). Dow provisionally paid the incremental fine in the third quarter of 2008 which DuPont reimbursed under the agreements between the companies.

DDE resolved all criminal antitrust allegations against it related to PCP in the U.S. through a plea agreement with the Department of Justice (DOJ) in January 2005 which was approved by the court on March 29, 2005. The agreement requires the subsidiary to pay a fine of \$84 which, at its election, is being paid in six equal, annual installments. The last remaining installment is due in 2010. The agreement also requires the subsidiary to provide ongoing cooperation with the DOJ's investigation.

At September 30, 2009, the company has accruals of approximately \$14 related to this matter and a receivable of \$1.7 for the remaining amount that it expects to be reimbursed by Dow.

**Benlate®**

In 1991, DuPont began receiving claims by growers that use of Benlate® 50 DF fungicide had caused crop damage. DuPont has since been served with thousands of lawsuits, most of which have been disposed of through trial, dismissal or settlement. The status of Benlate® cases is indicated in the table below:

	<b>Number of Cases</b>
Balance at December 31, 2008	11
Filed	1
Resolved	
Balance at March 31, 2009	12

Balance at June 30, 2009	12

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

Filed	1
Resolved	
Balance at September 30, 2009	13

At September 30, 2009, there were ten cases pending in Florida state court, involving allegations that Benlate® caused crop damage. One attorney represents the plaintiffs in 6 out of the 10 cases. Another attorney represents the plaintiffs in 3 of the 10 cases including 2 cases involving twenty-seven Costa Rican fern growers. During the second quarter 2006 trial of these 2 cases, the plaintiffs sought damages in the range of \$270 to \$400. A \$56 judgment was rendered against the company, but was reduced to \$24 on DuPont's motion. DuPont believes that the appeal will be resolved in its favor and, therefore, has not established an accrual relating to the judgment. In the third quarter 2009, a case alleging crop damage was filed for the third time having been dismissed twice before on DuPont's motion. It has been, and continues to be, the company's position that the plaintiff does not own the property allegedly damaged.

Table of Contents

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*(Dollars in millions, except per share)*

In two other cases pending in Florida, plaintiffs allege damage to shrimping operations. These cases had been decided in DuPont's favor, but in September 2007, the judge granted plaintiffs' motion for new trial thus reinstating the cases. Previously, these plaintiffs had been awarded unspecified attorneys' fees as sanctions for alleged discovery abuses by DuPont. In June 2009, the Judge issued an order striking DuPont's pleadings and entering a default judgment against the company as to liability and causation. DuPont will appeal the order after the trial on damages which is expected to occur in the first quarter of 2010.

In January 2009, a case was filed in Florida state court claiming that plaintiff's exposure to Benlate® allegedly contaminated with atrazine caused plaintiff's kidney and brain cancer. The case has been removed to federal court.

The company does not believe that Benlate® caused the damages alleged in each of these cases and denies the allegations of fraud and misconduct. The company continues to defend itself in ongoing matters. As of September 30, 2009, the company has incurred costs and expenses of approximately \$2,000 associated with these matters, but does not expect additional significant costs or expenses associated with the remaining 13 cases. The company has recovered approximately \$275 of its costs and expenses through insurance and does not expect additional insurance recoveries, if any, to be significant. At September 30, 2009, the company has accruals of \$0.1 related to Benlate®.

Spelter, West Virginia

In September 2006, a West Virginia state court certified a class action against DuPont that seeks relief including the provision of remediation services and property value diminution damages for 7,000 residential properties in the vicinity of a closed zinc smelter in Spelter, West Virginia. The action also seeks medical monitoring for an undetermined number of residents in the class area. The smelter was owned and operated by at least three companies between 1910 and 2001, including DuPont between 1928 and 1950. DuPont performed remedial measures at the request of the EPA in the late 1990s and in 2001 repurchased the site to facilitate and complete the remediation. The fall 2007 trial was conducted in four phases: liability, medical monitoring, property and punitive damages. The jury found against DuPont in all four phases awarding \$55.5 for property remediation and \$196.2 in punitive damages. In post trial motions, the court adopted the plaintiffs' forty-year medical monitoring plan estimated by plaintiffs to cost \$130 and granted plaintiffs' attorneys legal fees of \$127 plus \$8 in expenses based on and included in the total jury award. In June 2008, DuPont filed its petitions for appeal with the West Virginia Supreme Court seeking review of a number of issues associated with the trial court's decisions before, during and after the trial. On September 25, 2008, the Court decided to accept the case and consider the parties' appeal on the merits. The oral argument was heard on April 7, 2009. The Court recessed on June 25, 2009 without ruling on the appeal and reconvened in September 2009. A decision is expected in due course. Effective with DuPont posting a bond, the execution of judgment against the company is stayed pending final disposition of DuPont's appeal to the West Virginia Supreme Court of Appeals. As of September 30, 2009, the company had recorded accruals of \$55, although given the uncertainties inherent in litigation, there can be no assurance as to the final outcome.

*General*

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

The company is subject to various lawsuits and claims arising out of the normal course of its business. These lawsuits and claims include actions based on alleged exposures to products, intellectual property and environmental matters and contract and antitrust claims. Management has noted a nationwide trend in purported class actions against chemical manufacturers generally seeking relief such as medical monitoring, property damages, off-site remediation and punitive damages arising from alleged environmental torts without claiming present personal injuries. Such cases may allege contamination from unregulated substances or remediated sites. Although it is not possible to predict the outcome of these various lawsuits and claims, management does not anticipate they will have a materially adverse effect on the company's consolidated financial position or liquidity. However, the ultimate liabilities may be significant to results of operations in the period recognized. The company accrues for contingencies when the information available indicates that it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated.

Table of Contents

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*(Dollars in millions, except per share)*

*Environmental*

The company is also subject to contingencies pursuant to environmental laws and regulations that in the future may require the company to take further action to correct the effects on the environment of prior disposal practices or releases of chemical or petroleum substances by the company or other parties. The company accrues for environmental remediation activities consistent with the policy set forth in Note 1 in the company's 2008 Annual Report. Much of this liability results from the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, often referred to as Superfund), the Resource Conservation and Recovery Act (RCRA) and similar state laws. These laws require the company to undertake certain investigative and remedial activities at sites where the company conducts or once conducted operations or at sites where company-generated waste was disposed. The accrual also includes estimated costs related to a number of sites identified by the company for which it is probable that environmental remediation will be required, but which are not currently the subject of CERCLA, RCRA or state enforcement activities.

Remediation activities vary substantially in duration and cost from site to site. These activities, and their associated costs, depend on the mix of unique site characteristics, evolving remediation technologies, diverse regulatory agencies and enforcement policies, as well as the presence or absence of potentially responsible parties. At September 30, 2009, the Condensed Consolidated Balance Sheets included a liability of \$396, relating to these matters and, in management's opinion, is appropriate based on existing facts and circumstances. The average time frame, over which the accrued or presently unrecognized amounts may be paid, based on past history, is estimated to be 15-20 years. Considerable uncertainty exists with respect to these costs and, under adverse changes in circumstances, potential liability may range up to two to three times the amount accrued as of September 30, 2009.

*Other*

The company has various purchase commitments incident to the ordinary conduct of business. In the aggregate, such commitments are not at prices in excess of current market nor are they significantly different than amounts disclosed in the company's 2008 Annual Report.

**Note 11. Derivatives and Other Hedging Instruments**

Effective January 1, 2009, the company prospectively implemented the revised requirements for enhancing the disclosures of derivative and hedging instruments to provide users of financial statements with a better understanding of the objectives of a company's derivative use and the risks managed.

Objectives and Strategies for Holding Derivative Instruments

In the ordinary course of business, the company enters into contractual arrangements (derivatives) to reduce its exposure to foreign currency, interest rate and commodity price risks under established procedures and controls. The company has established a variety of approved derivative instruments to be utilized in each risk management program, as well as varying levels of exposure coverage and time horizons based on an assessment of risk factors related to each hedging program. Derivative instruments utilized during the period include forwards, options, futures and swaps. The company has not designated any nonderivatives as hedging instruments.

The corporate financial risk management policy establishes an oversight committee and risk management guidelines that authorize the use of specific derivative instruments and further establishes procedures for control and valuation, counterparty credit approval and routine monitoring and reporting. The counterparties to these contractual arrangements are major financial institutions and major commodity exchanges. The company is exposed to credit loss in the event of nonperformance by these counterparties. The company manages this exposure to credit loss through the aforementioned credit approvals, limits and monitoring procedures and, to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. The company anticipates performance by counterparties to these contracts and therefore no material loss is expected. Market and counterparty credit risks associated with these instruments are regularly reported to management.

Table of Contents

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*(Dollars in millions, except per share)*

The company hedges foreign currency denominated revenue and monetary assets and liabilities, certain business specific foreign currency exposures and certain energy feedstock purchases. In addition, the company enters into exchange traded agricultural commodity derivatives to hedge exposures relevant to agricultural feedstock purchases.

Foreign Currency Risk

The company's objective in managing exposure to foreign currency fluctuations is to reduce earnings and cash flow volatility associated with foreign currency rate changes. Accordingly, the company enters into various contracts that change in value as foreign exchange rates change to protect the value of its existing foreign currency-denominated assets, liabilities, commitments, and cash flows.

The company routinely uses forward exchange contracts to offset its net exposures, by currency, related to the foreign currency-denominated monetary assets and liabilities of its operations. The primary business objective of this hedging program is to maintain an approximately balanced position in foreign currencies so that exchange gains and losses resulting from exchange rate changes, net of related tax effects, are minimized.

Interest Rate Risk

The company uses interest rate swaps to manage the interest rate mix of the total debt portfolio and related overall cost of borrowing.

Interest rate swaps involve the exchange of fixed for floating rate interest payments to effectively convert fixed rate debt into floating rate debt based on USD LIBOR. Interest rate swaps allow the company to achieve a target range of floating rate debt.

Commodity Price Risk

Commodity price risk management programs serve to reduce exposure to price fluctuations on purchases of inventory such as natural gas, ethane, corn, soybeans and soybean meal.

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

The company enters into over-the-counter and exchange-traded derivative commodity instruments to hedge the commodity price risk associated with energy feedstock and agricultural commodity exposures.

### Fair Value Hedges

During the quarter ended September 30, 2009, the company maintained a number of interest rate swaps, implemented at the time the debt instruments were issued, that involve the exchange of fixed for floating rate interest payments which allows the company to achieve a target range of floating rate debt. All interest rate swaps qualify for the shortcut method of hedge accounting, thus there is no ineffectiveness related to these hedges. The company maintains no other significant fair value hedges. At September 30, 2009, the company had interest rate swap agreements with gross notional amounts of approximately \$1,150.

### Cash Flow Hedges

The company maintains a number of cash flow hedging programs to reduce risks related to foreign currency and commodity price risk. While each risk management program has a different time maturity period, most programs currently do not extend beyond the next two-year period.

The company uses foreign currency exchange contracts to offset a portion of the company's exposure to certain foreign currency denominated revenues so that gains and losses on these contracts offset changes in the U.S. Dollar value of the related foreign currency-denominated revenues. At September 30, 2009, the company had foreign currency exchange contracts with gross notional amounts of approximately \$764.

A portion of natural gas purchases are hedged to reduce price volatility using fixed price swaps and options. At September 30, 2009, the company had energy feedstock contracts with gross notional amounts of approximately \$307.

Table of Contents**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS***(Dollars in millions, except per share)*

The company contracts with independent growers to produce seed inventory. Under these contracts, growers are compensated with bushel equivalents that are sold to the company for the market price of grain for a period of time. Derivative instruments, such as commodity futures and options that have a high correlation to the underlying commodity, are used to hedge the commodity price risk involved in compensating growers.

The company utilizes agricultural commodity futures to manage the price volatility of soybean meal. These derivative instruments have a high correlation to the underlying commodity exposure and are deemed effective in offsetting soybean meal feedstock price risk.

At September 30, 2009, the company had agricultural commodity contracts with gross notional amounts of approximately \$251.

Cash flow hedge results are reclassified into earnings during the same period in which the related exposure impacts earnings. Reclassifications are made sooner if it appears that a forecasted transaction will not materialize. The following table summarizes the effect of cash flow hedges on accumulated other comprehensive income (loss) for the periods shown:

	<b>Three Months Ended September 30, 2009</b>			<b>Nine Months Ended September 30, 2009</b>		
	<b>Pre-tax</b>	<b>Tax</b>	<b>After- Tax</b>	<b>Pre-tax</b>	<b>Tax</b>	<b>After- Tax</b>

Balance at September 30, 2009	\$ (153)	\$ 55	\$ (98)	\$ (153)	\$ 55	\$ (98)
Amounts expected to be reclassified into earnings over the next twelve months	\$ (77)	\$ 28	\$ (49)	\$ (77)	\$ 28	\$ (49)

Hedges of Net Investment in a Foreign Operation

During the quarter ended September 30, 2009, the company did not maintain any hedges of net investment in a foreign operation.

Derivatives not Designated in Hedging Relationships

The company uses forward exchange contracts to reduce its net exposure, by currency, related to foreign currency-denominated monetary assets and liabilities. The netting of such exposures precludes the use of hedge accounting. However, the required revaluation of the forward contracts and the associated foreign currency-denominated monetary assets and liabilities results in a minimal earnings impact, after taxes. At September 30, 2009, the company had forward exchange contracts with gross notional amounts of approximately \$10,299.

In addition, the company has risk management programs for agricultural commodities that do not qualify for hedge accounting treatment. At September 30, 2009, the company had agricultural commodities contracts with gross notional amounts of approximately \$302.

Contingent Features

During the quarter ended September 30, 2009, the company did not maintain any derivative contracts with credit-risk-related contingent features.

Amortization of prior service cost	5	5	14	14
Net periodic benefit cost/(credit)	\$ 39	\$ (91)	\$ 114	\$ (271)

The company disclosed in its Consolidated Financial Statements for the year ended December 31, 2008, that it expected to contribute approximately \$300 to its pension plans, other than to the principal U.S. pension plan in 2009. As of September 30, 2009, contributions of \$243 have been made to these pension plans and the company anticipates additional contributions during the remainder of 2009 to total approximately \$52.

The following sets forth the components of the company's net periodic benefit cost for other long-term employee benefits:

	<b>Three Months Ended September 30,</b>		<b>Nine Months Ended September 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**Cautionary Statements About Forward-Looking Statements**

This report contains forward-looking statements which may be identified by their use of words like plans, expects, will, anticipates, intends, projects, estimates or other words of similar meaning. All statements that address expectations or projections about the future, including statements about the company's strategy for growth, product development, market position, expenditures and financial results, are forward-looking statements.

Forward-looking statements are based on certain assumptions and expectations of future events. The company cannot guarantee that these assumptions and expectations are accurate or will be realized. For some of the important factors that could cause the company's actual results to differ materially from those projected in any such forward-looking statements see the Risk Factors discussion set forth under Part II, Item 1A beginning on page 41. Additional risks and uncertainties not presently known to the company or that the company currently believes to be immaterial also could affect its businesses.

**Results of Operations**

Overview

The current quarter's overall business results continue to reflect global economic conditions considerably weaker than those of the prior year. However, the company's sales of non-agricultural products increased significantly from second quarter levels. This improving sales trend is expected to continue for the remainder of 2009. Total company sales of \$6.0 billion in the third quarter 2009 were 18 percent lower than 2008, principally reflecting 12 percent lower sales volumes and lower USD selling prices. Continued pricing actions, fixed cost reductions and improved productivity, along with the benefit of lower raw material, energy and freight costs, largely offset the impact on earnings from lower sales. Net income attributable to DuPont increased 11 percent versus third quarter 2008 to \$409 million. Third quarter 2008 net income of \$367 million included a \$146 million after-tax hurricane-related charge. The company continues to focus on cash generation via reductions in cost, working capital, and capital expenditures. Programs to support future growth of the company, targeted toward agricultural products, photovoltaics and applied bio-sciences, remain a strategic priority and continue to be funded at appropriate levels.

Net Sales

Net sales for the third quarter 2009 were \$6.0 billion versus \$7.3 billion in the prior year, down 18 percent, reflecting 12 percent lower sales volume, a 2 percent decrease in local selling prices, a 3 percent reduction from currency exchange and a 1 percent net reduction from portfolio changes. Lower local selling prices principally reflect pass-through of lower raw material costs, partly offset by higher prices for seeds and other value-in-use products. While year-over-year volume declines narrowed from those of second quarter, weakness in global industrial production continued to have a negative impact on the company's sales volumes in all regions. Sales volumes were lower across all operating segments with volumes declining 11 percent outside the United States and 15 percent in the United States.

# Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

## Table of Contents

The table below shows a regional breakdown of net sales based on location of customers and percentage variances from the prior year:

	<b>Three Months Ended September 30, 2009</b>		<b>Percent Change Due to:</b>			
	<b>2009 Net Sales (\$ Billions)</b>	<b>Percent Change vs. 2008</b>	<b>Local Price</b>	<b>Currency Effect</b>	<b>Volume</b>	<b>Portfolio</b>
U.S.	\$ 1.9	(21)	(4)		(15)	(2)
Europe, Middle East & Africa	1.6	(27)	(1)	(8)	(18)	
Asia Pacific	1.4	(5)	(3)		(2)	
Canada & Latin America	1.1	(14)	1	(5)	(9)	(1)
Total Consolidated Sales	\$ 6.0	(18)	(2)	(3)	(12)	(1)

Net sales for the nine months ended September 30, 2009 were \$19.7 billion versus \$24.7 billion in the prior year, down 20 percent, principally reflecting the lower demand for the company's products related to industries other than production agriculture. Sales volumes declined 17 percent and sales were further reduced by a net 1 percent impact from portfolio changes. A 2 percent increase in local selling prices was more than offset by a 4 percent reduction from currency exchange. Higher local selling prices principally reflect higher prices for seeds and other value-in-use products, partly offset by lower prices resulting from pass-through of lower raw material costs. Sales volumes were lower in all regions, particularly for products closely tied to industrial production. Volumes outside the United States were down 19 percent, while volumes in the United States were 14 percent lower reflecting higher Agriculture & Nutrition volumes that partially offset significantly lower volumes in the other segments.

	<b>Nine Months Ended September 30, 2009</b>		<b>Percent Change Due to:</b>			
	<b>2009 Net Sales (\$ Billions)</b>	<b>Percent Change vs. 2008</b>	<b>Local Price</b>	<b>Currency Effect</b>	<b>Volume</b>	<b>Portfolio</b>

Europe, Middle East & Africa	5.4	(31)	1	(10)	(22)	
Asia Pacific	3.6	(17)		(1)	(16)	
Canada & Latin America	2.8	(18)	5	(8)	(14)	(1)
Total Consolidated Sales	\$ 19.7	(20)	2	(4)	(17)	(1)

## Other Income, Net

Third quarter 2009 other income, net, totaled \$195 million as compared to \$420 million in the prior year, a decrease of \$225 million. The decrease is largely attributable to an increase of \$172 million in net pre-tax exchange losses.

For the nine months ended September 30, 2009, other income, net, was \$824 million as compared to \$1,057 million last year, a decrease of \$233 million. The decrease was primarily attributable to an increase in net pre-tax exchange losses of \$85 million and the absence of a \$51 million favorable litigation settlement in 2008.

Table of Contents

Additional information related to the company's other income, net, is included in Note 4 to the interim Consolidated Financial Statements.

Cost of Goods Sold and Other Operating Charges (COGS)

COGS totaled \$4.6 billion in the third quarter 2009 versus \$5.9 billion in the prior year, a decrease of 23 percent. COGS as a percent of net sales improved to 76 percent versus 81 percent for the third quarter 2008. Three percentage points of this improvement was due to the absence of a \$227 million charge for hurricane-related damages in 2008. The remainder of the improvement reflects the favorable impact of an estimated \$460 million decrease in raw material, energy and freight costs, partly offset by the adverse impact of lower operating rates and currency exchange rates.

COGS for the nine months ended September 30, 2009 was \$14.8 billion, a decrease of 19 percent versus \$18.3 billion in the prior year. COGS was 75 percent of net sales versus 74 percent of net sales for the prior year. The one percentage point increase principally reflects significantly lower capacity utilization resulting from lower production volumes and an unfavorable currency impact, largely offset by a decrease in raw material, energy and freight unit costs, benefits from hurricane-related insurance proceeds and lower write-offs, and the absence of a prior year \$227 million hurricane-related charge.

Selling, General and Administrative Expenses (SG&A)

SG&A totaled \$770 million for the third quarter 2009 versus \$873 million in the prior year. Year-to-date SG&A totaled \$2.6 billion versus \$2.8 billion in 2008. The decrease in SG&A was primarily due to strict cost controls in response to weak market conditions. The decrease was partially offset by increased global commissions and selling and marketing investments related to the company's seed products. SG&A was 13 percent of net sales for the three and nine month periods ended September 30, 2009. In 2008, SG&A was 12 percent and 11 percent of net sales for the three and nine month periods, respectively.

Research and Development Expense (R&D)

R&D totaled \$335 million and \$360 million for the third quarter 2009 and 2008, respectively. For the nine month period ended September 30, 2009, R&D was \$1 billion versus \$1.1 billion last year. R&D spend was down for the three and nine month periods versus prior year across all segments, excluding Agriculture & Nutrition, due to strict cost controls.

Interest Expense

Interest expense totaled \$100 million in the third quarter 2009 compared to \$98 million in 2008. For the nine month period ended September 30, 2009, interest expense increased from \$272 million in 2008 to \$312 million in 2009. The increase is mainly due to higher average borrowings

and higher average rates.

Employee Separation / Asset Related Charges, Net

For the nine months ended September 30, 2009, the company recorded a \$340 million restructuring charge comprised of severance and related benefit costs, asset write-offs, and impairment charges, partially offset by a \$75 million net reduction in the estimated costs related to the 2008 restructuring program. The \$75 million net reduction in the estimated costs for the 2008 program was primarily due to work force reductions through non-severance programs and redeployments within the company. The 2009 actions are expected to produce a pre-tax cost savings of about \$50 million for the remainder of 2009 and approximately \$250 million per year in subsequent years. Additional information related to the company's 2009 program and reduction to the 2008 program is located in Note 5 to the interim Consolidated Financial Statements.

Provision for Income Taxes

The company's effective tax rate for the third quarter 2009 was (5.9) percent as compared to 20.9 percent in 2008. The lower effective tax rate in 2009 versus 2008 principally relates to the tax impact associated

Table of Contents

with the company's policy of hedging the foreign currency-denominated monetary assets and liabilities of its operations.

The company's effective tax rate for year-to-date 2009 was 17.9 percent as compared to 21.1 percent in 2008. The lower effective tax rate principally relates to the tax impact associated with the company's policy of hedging the foreign currency-denominated monetary assets and liabilities of its operations. See Note 6 to the interim Consolidated Financial Statements for additional information.

Net Income Attributable to DuPont

Net income attributable to DuPont (earnings) for the third quarter of 2009 was \$409 million versus \$367 million in the third quarter 2008, an 11 percent increase. The increase in earnings principally results from the absence of a \$146 million charge associated with hurricane-related damage in 2008, benefits from fixed cost reductions, productivity improvement and lower raw material, energy and freight costs, partially offset by lower sales volume, unfavorable currency impacts, and higher pension costs.

For the nine months ended September 30, 2009, earnings were \$1.3 billion, compared to \$2.6 billion in the prior year, a 50 percent decrease. The decrease in earnings principally results from lower sales volume, unfavorable currency impacts, higher pension costs and net restructuring charges of \$174 million. Partly offsetting these factors were the benefit of higher selling prices, lower raw material, energy and freight costs, fixed cost reductions, and the absence of a \$146 million charge associated with hurricane-related damage in 2008.

Corporate Outlook

The company revised its full-year 2009 earnings outlook to a range of \$1.80 to \$1.90 per share. The revised outlook includes estimated full-year earnings impact of approximately \$.15 per share related to the 2009 restructuring charge, reduction in estimated costs associated with the 2008 restructuring program and the reserve for hurricane damage, and initial insurance recoveries related to damage sustained from Hurricane Ike in 2008. The outlook anticipates improving demand across key markets for the remainder of 2009. The company expects lower raw material costs and currency exchange rates will be a benefit to earnings in the fourth quarter versus the prior year. Aggressive actions to reduce costs and capital expenditures will continue as the company maintains an appropriate level of investment for high-growth, high-margin businesses.

**Accounting Standards Issued Not Yet Adopted**

See Note 1 to the interim Consolidated Financial Statements for a description of recent accounting pronouncements.

**Segment Reviews**

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

Effective October 1, 2009, the company has redefined its external reporting to the following aggregated segments: Agriculture & Nutrition, Electronics & Communications, Performance Coatings, Performance Materials, Safety & Protection, Performance Chemicals and Pharmaceuticals. The company will begin reporting under the redefined structure in its 2009 Annual Report on Form 10-K.

Summarized below are comments on individual segment sales and pre-tax operating income/loss (PTOI) for the three- and nine-month periods ended September 30, 2009 compared with the same period in 2008. Segment sales include transfers. Segment PTOI is defined as operating income/loss before income taxes, noncontrolling interests, exchange gains/losses, corporate expenses and net interest.

As described in Note 5 to the Consolidated Financial Statements, the company initiated a global restructuring program during the second quarter 2009 to reduce costs and improve profitability across its businesses. The program charge reduced year-to-date 2009 segment PTOI as follows: Coatings & Color Technologies - \$70 million; Electronic & Communication Technologies - \$73 million; Performance Materials - \$110 million; Safety & Protection - \$86 million; and Other - \$1 million. In addition, the company recorded a \$75 million net reduction in the estimated costs associated with the 2008 program. The \$75 million net reduction impacted segment earnings for the nine-months ended September 30, 2009

Table of Contents

as follows: Agriculture & Nutrition - \$(1) million; Coatings & Color Technologies - \$43 million; Electronic & Communication Technologies - \$1 million; Performance Materials - \$28 million; Safety & Protection - \$2 million; and Other - \$2 million.

**Agriculture & Nutrition** Third quarter 2009 sales of \$1.2 billion were 5 percent lower, reflecting 1 percent lower USD selling prices, and a 4 percent decline in volume. The decrease in USD selling prices reflect significantly higher local selling prices for seed products, partially offset by unfavorable currency impacts, mainly in Europe and Latin America. The volume decline was from lower demand for corn in Brazil and canola in Europe on decreased planted area, lower sales of crop protection products primarily due to unfavorable weather conditions in key agricultural markets, and lower overall sales of food and nutrition products due to changes in product mix and the impact of the global economic environment. The volume decline was partially offset by higher soybean seed sales in Brazil on increased planted area, and higher sales of corn and soybeans in North America from strong in-season sales. PTOI for the third quarter was a loss of \$113 million, compared to a loss of \$21 million in the third quarter 2008, primarily due to lower sales, and the absence of a \$49 million net gain from mark-to-market valuation of open soybean contracts in 2008.

Year-to-date sales were \$6.9 billion, a 3 percent increase versus the prior year, reflecting 5 percent higher USD selling prices, partially offset by a 2 percent decrease in volume. The higher USD selling prices are due to higher local selling prices for seed products, partially offset by unfavorable currency impacts across all regions. The decrease in volume was primarily due to lower sales of crop protection products and food and nutrition products, partially offset by higher corn and soybean seed sales in North America. Year-to-date PTOI for 2009 was \$1.3 billion, up 4 percent versus the same period last year, principally due to the higher sales and higher value product mix, partially offset by unfavorable currency impacts globally.

On May 4, 2009, Monsanto Company (Monsanto) filed a lawsuit against the company in federal court claiming that Pioneer Hi-Bred International, Inc. (Pioneer), a wholly owned subsidiary of the company, is violating its Roundup Ready® license agreements by stacking its Optimum® GAT® herbicide tolerance trait with Monsanto's Roundup Ready® herbicide tolerance trait. Monsanto also alleges that sales of Pioneer stacked seeds would infringe a Monsanto patent that expires in 2014. Monsanto seeks declaratory relief, unspecified damages and a permanent injunction to prevent sales of Optimum® GAT®/ Roundup Ready® seeds. The company has filed an answer and counterclaims, including patent misuse and antitrust claims, in response to the lawsuit. Management believes that the lawsuit is unlikely to adversely affect the company's commercial results for soybean and corn seed.

**Coatings & Color Technologies** Third quarter 2009 sales of \$1.5 billion were down 16 percent, reflecting 13 percent decrease in volume and 3 percent lower USD selling prices. The decline in volume reflects decreased demand for industrial, refinish and titanium dioxide products due to the current economic downturn, and lower sales of products to motor vehicle original equipment manufacturers (OEMs) due to fewer motor vehicle and industrial truck builds. The lower USD selling prices reflect unfavorable currency impacts, partially offset by higher local selling prices of coatings products. Third quarter 2009 PTOI was \$182 million, compared to \$190 million in the third quarter 2008. The decrease in PTOI was mainly due to effect of lower volumes, partially offset by lower raw material, energy and freight costs and lower fixed costs.

Year-to-date 2009 sales were \$4 billion, down 24 percent from the same period last year, reflecting 21 percent decline in volume and 3 percent lower USD selling prices. The decline in volume reflects the impact of fewer motor vehicle and industrial truck builds in sales to motor vehicle OEMs, and lower sales of industrial, refinish and titanium dioxide products in all regions. Year-to-date PTOI was \$269 million as compared to \$627 million during the same period last year. The decline in PTOI primarily reflects the impact of lower volumes, charges associated with low capacity utilization of production units and the \$70 million restructuring charge recorded in the second quarter of 2009, partially offset by lower fixed costs and the \$43 million reduction in estimated costs associated with the 2008 restructuring program.

Table of Contents

**Electronic & Communication Technologies** Sales in the third quarter of \$919 million decreased 13 percent, reflecting a 10 percent decline in volume and 3 percent lower USD selling prices. The decreased volume is primarily related to the residual effect of the global economic downturn which affected demand for products across all markets, partially offset by higher sales in Asia Pacific. The lower USD selling prices were mainly driven by unfavorable currency impacts, and lower local selling prices for some products due to contractual pass-through of lower precious metal prices. Third quarter 2009 PTOI of \$125 million, compared to \$137 million in the third quarter 2008 was driven by lower sales, partially offset by lower raw material, energy and freight costs and lower fixed costs.

Year-to-date sales of \$2.4 billion were down 24 percent, reflecting 3 percent lower USD selling prices and a 21 percent decline in volume. The lower volumes reflect the effect of the global economic recession which impacted sales for products across all key markets, and the effect of unseasonably cooler weather patterns in North America and Europe which significantly reduced sales of refrigerants. Year-to-date PTOI was \$36 million compared to \$482 million in prior year. The decline in PTOI was driven by decreased sales, charges associated with low capacity utilization of production units, and the impact of the 2009 restructuring charge.

**Performance Materials** Third quarter sales of \$1.3 billion were down 24 percent, reflecting a 14 percent decline in volume, 8 percent lower USD selling prices, and a 2 percent decrease related to portfolio changes. Volume declines were mostly due to the impact of the current economic environment which occurred in all major regions and market segments. The lower USD selling prices primarily reflect unfavorable currency impacts in Europe and a significantly weaker product sales mix driven by the economic downturn. Third quarter 2009 PTOI was \$230 million, compared to a loss of \$91 million in the third quarter 2008. The earnings improvement was primarily due to the absence of a \$216 million hurricane-related charge in 2008, lower raw material, energy and freight costs and lower fixed costs, and insurance recovery proceeds of \$24 million related to the 2008 hurricanes, partially offset by the effect of lower sales.

Year-to-date sales were \$3.3 billion versus \$5.2 billion in the prior year. The 36 percent decrease in sales reflects 6 percent lower USD prices, 27 percent decrease in volume, and a 3 percent reduction related to portfolio changes. The lower USD selling prices were a combination of significantly weaker product sales mix and unfavorable currency impacts. The decrease in volume mainly reflects the effect of the global economic recession. Year-to-date PTOI of \$89 million compared to \$351 million in prior year. The decline in PTOI was driven by decreased sales, charges associated with low capacity utilization of production units, and the impact of the \$110 million restructuring charge, partially offset by lower raw material, energy and freight costs and lower fixed costs, the absence of a \$216 million hurricane-related charge in 2008, and proceeds from hurricane-related insurance recoveries of \$56 million. The company continues to aggressively pursue additional insurance recoveries and expects to receive in the range of \$50 - \$100 million over the next six to nine months.

**Safety & Protection** Sales in the third quarter of \$1.0 billion decreased 32 percent, reflecting a 22 percent decline in volume and 10 percent lower USD selling prices. The lower volume reflects the impact of the global economic downturn which continued to affect demand for products in industrial, military, and residential construction markets. The lower USD selling prices were mainly driven by unfavorable currency impacts and lower local selling prices for some industrial chemicals products due to contractual pass-through of raw material price declines. Third quarter 2009 PTOI of \$93 million compared to \$251 million in the third quarter 2008, primarily due to the impact of lower sales, charges associated with low capacity utilization of production units and the impact of a \$26 million charge related to impairment of long-lived assets, partially offset by lower raw material costs and lower fixed costs.

Year-to-date sales of \$3.1 billion were 32 percent lower than last year, due to 8 percent lower USD selling prices and a 24 percent decline in volume. The lower volume reflects decreased demand for products across all markets and regions reflecting the impact of the current economic downturn. The lower USD selling prices were mainly due to lower local selling prices for some industrial chemicals products due to contractual pass-through of raw material price declines. Year-to-date PTOI was \$152 million compared to

Table of Contents

\$825 million in the prior year. The decrease in earnings was primarily due to the impact of lower volumes, charges associated with low capacity utilization of production units, and the impact of an \$86 million restructuring charge.

**Pharmaceuticals** Third quarter PTOI was \$266 million compared to \$260 million in the third quarter 2008. Year-to-date 2009 PTOI was \$790 million compared to \$760 million in the prior year.

**Other** The company includes embryonic businesses not included in growth platforms, such as Applied Biosciences and nonaligned businesses in Other. Sales in the third quarter of \$54 million increased 20 percent from the third quarter 2008 due to higher sales from the Applied BioSciences business. Third quarter PTOI was a loss of \$26 million, compared to a loss of \$44 million in the third quarter 2008, due to higher sales.

Year-to-date sales of \$113 million were lower as compared to \$129 million in 2008 due to the absence of sales of a discontinued business. Year-to-date pre-tax operating loss of \$113 million compared to pre-tax operating loss of \$69 million in 2008. The pre-tax loss for 2008 included a benefit of \$51 million from a litigation settlement.

**Liquidity & Capital Resources**

Despite the global economic recession and adverse conditions in the global capital markets, management believes the company's ability to generate cash from operations, coupled with cost reduction initiatives and access to capital markets, will be adequate to meet anticipated cash requirements to fund working capital, capital spending, dividend payments, debt maturities and other cash needs. The company's liquidity needs can be met through a variety of sources, including: cash provided by operating activities, cash and cash equivalents, marketable securities, commercial paper, syndicated credit lines, bilateral credit lines, equity and long-term debt markets and asset sales. The company's current strong financial position, liquidity and credit ratings have not been materially impacted by the current credit environment. In addition, cash generating actions have been implemented including spending reductions and restructuring to better align capital expenditures and costs with anticipated continuing lower global demand. However, there can be no assurance that the cost or availability of future borrowings will not be impacted by ongoing credit market instability. The company will continue to monitor the financial markets in order to respond to changing conditions.

Pursuant to its cash discipline policy, the company seeks first to maintain a strong balance sheet and second, to return excess cash to shareholders unless the opportunity to invest for growth is compelling. Cash and cash equivalents and marketable securities balances of \$3.2 billion as of September 30, 2009, provide primary liquidity to support all short-term obligations. The company has access to approximately \$2.8 billion in credit lines with several major financial institutions, as additional support to meet short term liquidity needs. These credit lines are primarily multi-year facilities.

The company continually reviews its debt portfolio and occasionally may rebalance it to ensure adequate liquidity and an optimum debt maturity schedule.

## Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-Q

Cash provided by operating activities was \$923 million for the nine months ended September 30, 2009 compared to \$494 million during the same period ended in 2008. The \$429 million increase is primarily due to reductions in working capital, driven by decreases in inventory levels, partially offset by lower earnings.

Cash used for investing activities was \$2.6 billion for the nine months ended September 30, 2009 compared to \$1.7 billion for the same period last year. The increase was mainly due to increased investments in short-term financial instruments and higher payments for forward exchange contract settlements, partially offset by lower capital expenditures. Purchases of property, plant and equipment (PP&E) for the nine months ended September 30, 2009 totaled \$990 million, a reduction of \$416 million compared to the prior year.

Table of Contents

Cash provided by financing activities was \$275 million for the nine months ended September 30, 2009 compared to \$1.9 billion in the prior year. The reduction was primarily due to a decrease in the net proceeds from borrowings.

Dividends paid to shareholders during the nine months ended September 30, 2009 totaled \$1.1 billion, including the third quarter 2009 dividend declared on July 28, 2009. In October 2009, the company's Board of Directors declared a fourth quarter common stock dividend of \$0.41 per share. The fourth quarter dividend was the company's 421st consecutive quarterly dividend since the company's first dividend in the fourth quarter 1904.

Cash and Cash Equivalents and Marketable Securities

Cash and cash equivalents and marketable securities were \$3.2 billion at September 30, 2009, a decrease of \$0.5 billion from \$3.7 billion at December 31, 2008. The reduction was due to funding working capital, capital projects and dividend needs.

Debt

Total debt at September 30, 2009 was \$11.1 billion, an increase of \$1.4 billion from the \$9.7 billion at December 31, 2008. The proceeds from the increased borrowings along with earnings and cash were primarily used to fund normal seasonal working capital needs, principally in the Agriculture & Nutrition segment as well as capital projects and dividends.

Guarantees and Off-Balance Sheet Arrangements

For detailed information related to Guarantees, Indemnifications, Obligations for Equity Affiliates and Others, Certain Derivative Instruments, and Master Operating Leases, see pages 36 - 37 of the company's 2008 Annual Report, and Note 10 to the interim Consolidated Financial Statements.

**Contractual Obligations**

Information related to the company's contractual obligations at December 31, 2008 can be found on page 38 of the company's 2008 Annual Report.

**PFOA**

DuPont manufactures fluoropolymer resins and dispersions as well as fluorotelomers, marketing many of them under the Teflon ® and Zonyl ® brands. The fluoropolymer resins and dispersions businesses are part of the Electronic & Communication Technologies segment; the fluorotelomers business is part of the Safety & Protection segment.

Fluoropolymer resins and dispersions are high-performance materials with many end uses including architectural fabrics, telecommunications and electronic wiring insulation, automotive fuel systems, computer chip processing equipment, weather-resistant/breathable apparel and non-stick cookware. Fluorotelomers are used to make soil, stain and grease repellants for paper, apparel, upholstery and carpets as well as firefighting foams and coatings.

A form of PFOA (collectively, perfluorooctanoic acid and its salts, including the ammonium salt) is used as a processing agent to manufacture fluoropolymer resins and dispersions. For over 50 years, DuPont purchased its PFOA needs from a third party, but beginning in the fall of 2002, it began producing PFOA to support the manufacture of fluoropolymer resins and dispersions. PFOA is not used in the manufacture of fluorotelomers; however, it is an unintended by-product present at trace levels in some fluorotelomer-based products.

DuPont Performance Elastomers, LLC (DPE) uses PFOA in the manufacture of raw materials to manufacture Kalrez ® perfluoroelastomer parts. PFOA is also used in the manufacture of some fluoroelastomers marketed by DPE under the Viton ® trademark. The wholly owned subsidiary is a part of the Performance Materials segment.

Table of Contents

PFOA is bio-persistent and has been detected at very low levels in the blood of the general population. As a result, the EPA initiated a process to enhance its understanding of the sources of PFOA in the environment and the pathways through which human exposure to PFOA is occurring. In 2005, the EPA issued a draft risk assessment on PFOA stating that the cancer data for PFOA may be best described as suggestive evidence of carcinogenicity, but not sufficient to assess human carcinogenic potential under the EPA's Guidelines for Carcinogen Risk Assessment. At EPA's request, the Science Advisory Board (SAB) reviewed and commented on the scientific soundness of this assessment. In its May 2006 report, the SAB set forth the view, based on laboratory studies in rats, that the human carcinogenic potential of PFOA is more consistent with the Guidelines' descriptor of likely to be carcinogenic. However, the report stated that additional data should be considered before the EPA finalizes its risk assessment of PFOA. The EPA has acknowledged that it will consider additional data, including new research and testing, and has indicated that another SAB review will be sought after the EPA makes its risk assessment. DuPont disputes the cancer classification recommended in the SAB report. Although the EPA has stated that there remains considerable scientific uncertainty regarding potential risks associated with PFOA, it also stated that it does not believe that there is any reason for consumers to stop using any products because of concerns about PFOA.

DuPont respects the EPA's position raising questions about exposure routes and the potential toxicity of PFOA and DuPont and other companies have outlined plans to continue research, emission reduction and product stewardship activities to help address the EPA's questions. In January 2006, DuPont pledged its commitment to the EPA's 2010/15 PFOA Stewardship Program. The EPA program asks participants (1) to commit to achieve, no later than 2010, a 95 percent reduction in both facility emissions and product content levels of PFOA, PFOA precursors and related higher homologue chemicals and (2) to commit to working toward the elimination of PFOA, PFOA precursors and related higher homologue chemicals from emissions and products by no later than 2015. In October 2008, (for the year 2007), DuPont reported to the EPA that it had achieved a 98 percent reduction of PFOA emissions in U.S. manufacturing facilities. The company achieved about a 97 percent reduction in global manufacturing emissions, exceeding the EPA's 2010 objective. DuPont will work individually and with others in the industry to inform EPA's regulatory counterparts in the European Union, Canada, China and Japan about these activities and PFOA in general, including emissions reductions from DuPont's facilities, reformulation of the company's fluoropolymer dispersions and new manufacturing processes for fluorotelomers products.

DuPont introduced in late 2006, Echelon™ technology which reduces the PFOA content 99 percent in aqueous fluoropolymer dispersion products. DuPont has converted customers representing over 95 percent of the sales volume for these product lines to newly formulated Echelon™ technology.

In February 2007, DuPont announced its commitment to no longer make, use or buy PFOA by 2015, or sooner if possible. DuPont has developed PFOA replacement technology and successfully used this technology in its global manufacturing facilities to produce test materials for all major fluoropolymer product lines. DuPont has begun to supply fluoropolymer products without PFOA to customers for testing in their processes, and is working to obtain appropriate regulatory approvals for this technology.

In the first quarter 2008, DuPont introduced its next generation fluorotelomer products. The products are marketed as DuPont Capstone products for use in home furnishings, stone and tile, fire fighting foam, fluorosurfactants, textiles and leather goods. The U.S. Food and Drug Administration (FDA) has authorized two new DuPont grease and oil repellents for use in paper packaging. Additional products will be introduced for paper packaging and other end use markets pending appropriate regulatory approvals.

In January 2009, the EPA issued a national Provisional Health Advisory for PFOA of 0.4 parts per billion (ppb) in drinking water. In March 2009, EPA and DuPont entered an Order on Consent under the Safe Drinking Water Act (SDWA) reflecting an action level of 0.40 ppb (see Note 10 to the interim Consolidated Financial Statements).

Table of Contents

In February 2007, the New Jersey Department of Environmental Protection (NJDEP) identified a preliminary drinking-water guidance level for PFOA of 0.04 ppb as part of the first phase of an ongoing process to establish a state drinking-water standard. During the first quarter 2009, the NJDEP began the process to establish a permanent Maximum Contaminant Level (MCL) for PFOA in drinking water. The process is estimated to take 1 to 2 years. While the NJDEP will continue sampling and evaluation of data from all sources, it has not recommended a change in consumption patterns.

Occupational exposure to PFOA has been associated with small increases in some lipids (e.g. cholesterol). These associations were also observed in a recent community study. It is not known whether these are causal associations. Based on health and toxicological studies, DuPont believes the weight of evidence indicates that PFOA exposure does not pose a health risk to the general public. To date, there are no human health effects known to be caused by PFOA, although study of the chemical continues.

There have not been any regulatory or government actions that prohibit the production or use of PFOA. However, there can be no assurance that the EPA or any other regulatory entity or government body will not choose to regulate or prohibit the production or use of PFOA in the future. Products currently manufactured by the company representing approximately \$1 billion of 2008 revenues could be affected by any such regulation or prohibition. DuPont has established reserves in connection with certain PFOA environmental and litigation matters (see Note 10 to the interim Consolidated Financial Statements).

**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Refer to Part II, Item 7A, Quantitative and Qualitative Disclosures About Market Risk, on pages 46 and 47 of the company's 2008 Annual Report for information on the company's utilization of financial instruments and an analysis of the sensitivity of these instruments.

Table of Contents

**Item 4. CONTROLS AND PROCEDURES**

a) Evaluation of Disclosure Controls and Procedures

The company maintains a system of disclosure controls and procedures for financial reporting to give reasonable assurance that information required to be disclosed in the company's reports submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. These controls and procedures also give reasonable assurance that information required to be disclosed in such reports is accumulated and communicated to management to allow timely decisions regarding required disclosures.

As of September 30, 2009, the company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), together with management, conducted an evaluation of the effectiveness of the company's disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on that evaluation, the CEO and CFO concluded that these disclosure controls and procedures are effective.

b) Changes in Internal Control over Financial Reporting

There has been no change in the company's internal control over financial reporting that occurred during the quarter ended September 30, 2009 that has materially affected or is reasonably likely to materially affect the company's internal control over financial reporting.

**PART II. OTHER INFORMATION**

**Item 1. LEGAL PROCEEDINGS**

PFOA: Environmental and Litigation Proceedings

Information related to this matter is included in Note 10 to the company's interim Consolidated Financial Statements under the heading PFOA.

Elastomers Antitrust Matters

Information related to this matter is included in Note 10 to the company's interim Consolidated Financial Statements under the heading Elastomers Antitrust Matters.

Environmental Proceedings

*Belle Plant, Charleston, West Virginia*

In September 2008, the U. S. Environmental Protection Agency (EPA) for Region III and the West Virginia Department of Environmental Protection (WVDEP) conducted an inspection of the Belle Plant under the Resource Conservation and Recovery Act (RCRA). In late second quarter 2009, DuPont received a notice of noncompliance from the EPA primarily related to documentation, inspection and container management requirements for the handling and storage of hazardous waste. In the third quarter 2009, DuPont and EPA agreed to settle the matter in a Consent and Final Order under which DuPont must pay a penalty of \$111,000.00.

*Chambers Works Plant, Deepwater, New Jersey*

In September 2009, the New Jersey Department of Environmental Protection (NJDEP) notified DuPont that it was seeking administrative penalties for past violations of the New Jersey Air Regulations governing Leak Detection and Reporting (LDAR) at the Chambers Works facility. These violations were self-reported by the company in March 2009. NJDEP is seeking \$444,000.00 in administrative penalties for alleged violations during calendar year 2006. DuPont plans to appeal the basis of the penalty assessment.

TSCA Voluntary Audit

DuPont voluntarily undertook a self-audit concerning reporting of inhalation studies pursuant to Toxic Substances Control Act (TSCA) section 8(e). DuPont voluntarily reported the results of that audit to the EPA. The EPA has reviewed the information submitted under this self-audit and has indicated potential violations exist with respect to some of the submitted studies. Based upon communications with the EPA, the company believes the EPA will seek a penalty.

Table of Contents

**Item 1A. RISK FACTORS**

The company's operations could be affected by various risks, many of which are beyond its control. Based on current information, the company believes that the following identifies the most significant risk factors that could affect its businesses. Past financial performance may not be a reliable indicator of future performance and historical trends should not be used to anticipate results or trends in future periods.

**Price increases for energy and raw materials could have a significant impact on the company's ability to sustain and grow earnings.**

The company's manufacturing processes consume significant amounts of energy and raw materials, the costs of which are subject to worldwide supply and demand as well as other factors beyond the control of the company. Significant variations in the cost of energy, which primarily reflect market prices for oil and natural gas and raw materials affect the company's operating results from period to period. When possible, the company purchases raw materials through negotiated long-term contracts to minimize the impact of price fluctuations. Additionally, the company enters into over-the-counter and exchange traded derivative commodity instruments to hedge its exposure to price fluctuations on certain raw material purchases. The company has taken actions to offset the effects of higher energy and raw material costs through selling price increases, productivity improvements and cost reduction programs. Success in offsetting higher raw material costs with price increases is largely influenced by competitive and economic conditions and could vary significantly depending on the market served. If the company is not able to fully offset the effects of higher energy and raw material costs, it could have a significant impact on the company's financial results.

**Failure to develop and market new products could impact the company's competitive position and have an adverse effect on the company's financial results.**

The company's operating results are largely dependent on its ability to renew its pipeline of new products and services and to bring those products and services to market. This ability could be adversely affected by difficulties or delays in product development such as the inability to identify viable new products, successfully complete research and development, obtain relevant regulatory approvals, obtain intellectual property protection, or gain market acceptance of new products and services. Because of the lengthy development process, technological challenges and intense competition, there can be no assurance that any of the products the company is currently developing, or could begin to develop in the future, will achieve substantial commercial success. Sales of the company's new products could replace sales of some of its current products, offsetting the benefit of even a successful product introduction.

**The company's results of operations could be adversely affected by litigation and other commitments and contingencies.**

The company faces risks arising from various unasserted and asserted litigation matters, including, but not limited to, product liability, patent infringement, antitrust claims, and claims for third party property damage or personal injury stemming from alleged environmental torts. The company has noted a nationwide trend in purported class actions against chemical manufacturers generally seeking relief such as medical monitoring, property damages, off-site remediation and punitive damages arising from alleged environmental torts without claiming present personal injuries. Various factors or developments can lead to changes in current estimates of liabilities such as a final adverse judgment, significant settlement or changes in applicable law. A future adverse ruling or unfavorable development could result in future charges that could have a material adverse effect on the company. An adverse outcome in any one or more of these matters could be material to the company's financial results.

In the ordinary course of business, the company may make certain commitments, including representations, warranties and indemnities relating to current and past operations, including those related to divested businesses and issue guarantees of third party obligations. If the company were required to make payments as a result, they could exceed the amounts accrued, thereby adversely affecting the company's results of operations.

Table of Contents

**As a result of the company's current and past operations, including operations related to divested businesses, the company could incur significant environmental liabilities.**

The company is subject to various laws and regulations around the world governing the environment, including the discharge of pollutants and the management and disposal of hazardous substances. As a result of its operations, including its past operations and operations of divested businesses, the company could incur substantial costs, including cleanup costs. The costs of complying with complex environmental laws and regulations, as well as internal voluntary programs, are significant and will continue to be so for the foreseeable future. The ultimate costs under environmental laws and the timing of these costs are difficult to predict. The company's accruals for such costs and liabilities may not be adequate because the estimates on which the accruals are based depend on a number of factors including the nature of the matter, the complexity of the site, site geology, the nature and extent of contamination, the type of remedy, the outcome of discussions with regulatory agencies and other Potentially Responsible Parties (PRPs) at multi-party sites and the number and financial viability of other PRPs.

**The company's ability to generate sales from genetically enhanced products, particularly seeds and other agricultural products, could be adversely affected by market acceptance, government policies, rules or regulations and competition.**

The company is using biotechnology to create and improve products, particularly in its Agriculture & Nutrition segment. Demand for these products could be affected by market acceptance of genetically modified products as well as governmental policies, laws and regulations that affect the development, manufacture and distribution of products, including the testing and planting of seeds containing biotechnology traits and the import of crops grown from those seeds.

The company competes with major global companies that have strong intellectual property estates supporting the use of biotechnology to enhance products, particularly in the agricultural products and production markets. Speed in discovering and protecting new technologies and bringing products based on them to market is a significant competitive advantage. Failure to predict and respond effectively to this competition could cause the company's existing or candidate products to become less competitive, adversely affecting sales.

**Changes in government policies and laws could adversely affect the company's financial results.**

Sales outside the U.S. constitute more than half of the company's revenue. The company anticipates that international sales will continue to represent a substantial portion of its total sales and that continued growth and profitability will require further international expansion, particularly in emerging markets. The company's financial results could be affected by changes in trade, monetary and fiscal policies, laws and regulations, or other activities of U.S. and non-U.S. governments, agencies and similar organizations. These conditions include but are not limited to changes in a country's or region's economic or political conditions, trade regulations affecting production, pricing and marketing of products, local labor conditions and regulations, reduced protection of intellectual property rights in some countries, changes in the regulatory or legal environment, restrictions on currency exchange activities, burdensome taxes and tariffs and other trade barriers. International risks and uncertainties, including changing social and economic conditions as well as terrorism, political hostilities and war, could lead to reduced international sales and reduced profitability associated with such sales.

**Economic factors, including inflation and fluctuations in currency exchange rates, interest rates and commodity prices could affect the company's financial results.**

The company is exposed to fluctuations in currency exchange rates, interest rates and commodity prices. Because the company has significant international operations, there are a large number of currency transactions that result from international sales, purchases, investments and borrowings. The company actively manages currency exposures that are associated with monetary asset positions, committed currency purchases and sales and other assets and liabilities created in the normal course of business. Failure to successfully manage these risks could have an adverse impact on the company's financial position, results of operations and cash flows.

Table of Contents

**Conditions in the global economy and global capital markets may adversely affect the company's results of operations, financial condition, and cash flows.**

The company's business and operating results have been and will continue to be affected by the global recession, including the credit market crisis, declining consumer and business confidence, fluctuating commodity prices, volatile exchange rates, and other challenges currently affecting the global economy. The company's customers may experience deterioration of their businesses, cash flow shortages, and difficulty obtaining financing. As a result, existing or potential customers may delay or cancel plans to purchase products and may not be able to fulfill their obligations in a timely fashion. Further, suppliers may be experiencing similar conditions, which could impact their ability to fulfill their obligations to the company. If the global recession continues for significant future periods or deteriorates significantly, the company's results of operations, financial condition and cash flows could be materially adversely affected.

**Business disruptions could seriously impact the company's future revenue and financial condition and increase costs and expenses.**

Business disruptions, including supply disruptions, increasing costs for energy, temporary plant and/or power outages and information technology system and network disruptions, could seriously harm the company's operations as well as the operations of its customers and suppliers. Although it is impossible to predict the occurrences or consequences of any such events, they could result in reduced demand for the company's products, make it difficult or impossible for the company to deliver products to its customers or to receive raw materials from suppliers, and create delays and inefficiencies in the supply chain. The company actively manages the risks within its control that could cause business disruptions to mitigate any potential impact from business disruptions regardless of cause including acts of terrorism or war, and natural disasters. Despite these efforts, the impact from business disruptions could significantly increase the cost of doing business or otherwise adversely impact the company's financial performance.

**Inability to protect and enforce the company's intellectual property rights could adversely affect the company's financial results.**

Intellectual property rights are important to the company's business. The company endeavors to protect its intellectual property rights in jurisdictions in which its products are produced or used and in jurisdictions into which its products are imported. However, the company may be unable to obtain protection for its intellectual property in key jurisdictions. Additionally, the company has designed and implemented internal controls to restrict access to and distribution of its intellectual property, including confidential information and trade secrets. Despite these precautions, it is possible that unauthorized parties may access and use such property. When misappropriation is discovered, the company reports such situations to the appropriate governmental authorities for investigation and takes measures to mitigate any potential impact.

## Table of Contents

### EXHIBIT INDEX

Exhibit Number	Description
3.1	Company's Restated Certificate of Incorporation (incorporated by reference to Exhibit 3.1 to the company's Annual Report on Form 10-K for the year ended December 31, 2007).
3.2	Company's Bylaws, as last amended effective March 4, 2009 (incorporated by reference to Exhibit 3.1 to the company's Quarterly Report on Form 10-Q for the period ended March 31, 2009).
4	The company agrees to provide the Commission, on request, copies of instruments defining the rights of holders of long-term debt of the company and its subsidiaries.
10.1*	The DuPont Stock Accumulation and Deferred Compensation Plan for Directors, as last amended effective January 1, 2009 (incorporated by reference to Exhibit 10.1 to the company's Annual Report on Form 10-K for the year ended December 31, 2008).
10.2*	Company's Supplemental Retirement Income Plan, as last amended effective June 4, 1996 (incorporated by reference to Exhibit 10.3 to the company's Annual Report on Form 10-K for the year ended December 31, 2006).
10.3*	Company's Pension Restoration Plan, as restated effective July 17, 2006 (incorporated by reference to Exhibit 99.1 to the company's Current Report on Form 8-K filed on July 20, 2006).
10.4*	Company's Rules for Lump Sum Payments adopted July 17, 2006 (incorporated by reference to Exhibit 99.2 to the company's Current Report on Form 8-K filed on July 20, 2006).
10.5*	Company's Stock Performance Plan, as last amended effective January 25, 2007 (incorporated by reference to Exhibit 10.7 to the company's Quarterly Report on Form 10-Q for the period ended March 31, 2007).
10.6*	Company's Equity and Incentive Plan as approved by the company's shareholders on April 25, 2007 (incorporated by reference to pages C1-C13 of the company's Annual Meeting Proxy Statement dated March 19, 2007).
10.7*	Terms and conditions of performance-based restricted stock units granted in 2007 under the company's Stock Performance Plan (incorporated by reference to Exhibit 10.12 to the company's Quarterly Report on Form 10-Q for the period ended March 31, 2007).
10.8*	Form of Award Terms under the company's Equity and Incentive Plan (incorporated by reference to Exhibit 10.8 to the company's Quarterly Report on Form 10-Q for the period ended March 31, 2009).
10.9*	Company's Retirement Savings Restoration Plan, as last amended effective January 1, 2009 (incorporated by reference to Exhibit 10.15 to the company's Quarterly Report on Form 10-Q for the period ended June 30, 2008).
10.10*	Company's Retirement Income Plan for Directors, as last amended August 1995 (incorporated by reference to Exhibit 10.17 to the company's Annual Report on Form 10-K for the year ended December 31, 2007).
10.11*	Letter Agreement and Employee Agreement, dated as of December 9, 2008, as amended, between the company and R.R. Goodmanson (incorporated by reference to Exhibit 10.12 to the company's Annual Report on Form 10-K for the year ended December 31, 2008).
