Anticipated Change in Results of Operations

Georgia Gulf Corporation reported net sales of \$758.0 million for the third quarter of 2010, 36 percent higher than the net sales of \$556.3 million reported in the third quarter of 2009. The sales increase is primarily due to higher sales prices in vinyl resins and caustic soda, as well as higher volumes in all of the Company's aromatics products.

The Company reported operating income of \$53.2 million for the third quarter of 2010 compared to operating income of \$38.6 million for the third quarter of 2009. The third quarter of 2009 includes a pre-tax net benefit of \$1.8 million resulting from a net restructuring gain. The increase in operating income was primarily driven by higher ECU values and higher chlorovinyls and aromatics volumes, partially offset by higher raw materials costs and lower sales volumes in the Company's building products segment.

As of September 30, 2010, the Company had \$38.7 million of cash on hand as well as \$217.5 million of borrowing capacity available under its asset based loan facility. During the third quarter of 2010 liquidity improved \$22.7 million when compared to the end of the second quarter of 2010. As of June 30, 2010, the Company had \$35.2 million of cash on hand and \$198.3 million of borrowing capacity available under its asset based loan facility.
