#### NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - UNAUDITED

(Expressed in United States dollars)

#### 1. Basis of Preparation of Financial Statements and Nature of Operations

Golden Minerals Company (the Company ), a Delaware corporation, has prepared these unaudited interim condensed consolidated financial statements in accordance with the rules and regulations of the Securities and Exchange Commission (SEC). Such rules and regulations allow the omission of certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States (GAAP), so long as such omissions do not render the financial statements misleading. The year-end balance sheet data was derived from audited financial statements, but does not include all disclosures normally required by GAAP.

In the opinion of management, these financial statements reflect all adjustments that are necessary for a fair presentation of the financial results for the periods presented. These interim financial statements should be read in conjunction with the annual financial statements included in the Company s Annual Report on Form 10-K for the fiscal year ended December 31, 2013, and filed with the SEC on February 28, 2014.

In June 2013 the Company suspended mining and processing at its Velardeña and Chicago precious metals mining properties (the Velardeña Properties ) in Mexico in order to conserve the asset until the Company was able to create new mining and processing plans that, at then current prices for silver and gold, indicated a sustainable cash margin. On July 14, 2014 the Company announced that it had restarted mining at its Velardeña Properties on July 1, 2014, and on November 3, 2014 the Company began processing material from the mine. The Company is primarily focused on the mining and the restart of processing at the Velardeña Properties and continued exploration of properties in Mexico. The Company also continues to review strategic opportunities, focusing primarily on development or operating properties in North America, including Mexico.

The Company is considered an exploration stage company under the criteria set forth by the SEC as the Company has not yet demonstrated the existence of proven or probable reserves, as defined by the SEC Industry Guide 7, at any of the Company s properties. As a result, and in accordance with GAAP for exploration stage companies, all expenditures for exploration and evaluation of the Company s properties are expensed as incurred. As such the Company s financial statements may not be comparable to the financial statements of mining companies that do have proven and probable reserves.

The financial statements have been prepared on a going concern basis under which an entity is considered to be able to realize its assets and satisfy its liabilities in the normal course of business. However, the continuing operations of the Company are dependent upon its ability to secure sufficient funding and to generate future profitable operations. The underlying value and recoverability of the amounts shown as mineral properties in Note 7 are dependent on the ability of the Company to generate positive cash flows from operations and to continue to fund exploration and development activities that would lead to profitable mining activities or to generate proceeds from the disposition of the mineral properties. There can be no assurance that the Company will be successful in generating future profitable operations or securing additional funding in the future on terms acceptable to the Company or at all.

#### 2. New Accounting Pronouncements

On August 27, 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-15, Presentation of Financial Statements - Going Concern (Subtopic 205-40), Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern (ASU No. 2014-15). ASU No. 2014-15 will require management to evaluate whether there are conditions and events that raise substantial doubt about the Company's ability to continue as a going concern within one year after the financial statements are issued on both an interim and annual basis. Management will be required to provide certain footnote disclosures if it concludes that substantial doubt exists or when its plans alleviate substantial doubt about the Company's ability to continue as a going concern. ASU No. 2014-15 becomes effective for annual periods beginning in 2016 and for interim reporting periods starting in the first quarter of 2017. The Company does not expect the adoption of this amendment to have a material impact on its consolidated financial position or results of operations.

On May 28, 2014, FASB and the International Accounting Standards Board issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606) ( ASU 2014-09 ). ASU 2014-09 outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. In addition, the guidance requires improved disclosures to help users of financial statements better understand the nature, amount, timing and uncertainty of revenue that is recognized and the related cash flows. ASU 2014-09 is effective for interim and annual periods beginning after December 15, 2016; early application is not permitted. The Company is evaluating the financial statement implications of adopting ASU 2014-09 but does not believe adoption of ASU 2014-09 will have a material impact on its consolidated financial position or results of operations.

In April 2014 the FASB issued Accounting Standards Update No. 2014-08 Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity (ASU 2014-08). ASU 2014-08 changes the criteria for reporting discontinued operations while enhancing disclosures in this area. Under ASU 2014-08, only disposals representing a strategic shift in operations will be presented as discontinued operations. Additionally, ASU 2014-08 requires expanded disclosures about discontinued operations that will provide financial statement users with more information about the assets, liabilities, income, and expenses of discontinued operations. ASU 2014-08 will become effective for the Company January 1, 2015. The Company does not believe the adoption of ASU 2014-08 will have a material impact on the Company s consolidated financial position or results of operations.

In July 2013 the FASB issued Accounting Standards Update No. 2013-11 Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (ASU 2013-11), which requires an unrecognized tax benefit to be presented as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss or a tax credit carryforward that the entity intends to use and is available for settlement at the reporting date. ASU 2013-11 became effective for the Company January 1, 2014. The adoption of ASU 2013-11 has not had a material impact on the Company s consolidated financial position or results of operations.

#### 3. Cash and Cash Equivalents and Short-Term Investments

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. Short-term investments include investments with maturities greater than three months, but not exceeding 12 months, or highly liquid investments with maturities greater than 12 months that the Company intends to liquidate during the next 12 months for working capital needs.

The Company determines the appropriate classification of its investments in equity securities at the time of purchase and re-evaluates those classifications at each balance sheet date. Available for sale investments are marked to market at each reporting period with changes in fair value recorded as a component of other comprehensive income (loss). If declines in fair value are deemed other than temporary, a charge is made to net income (loss) for the period.

The Company had no short-term investments or investments in equity securities as of September 30, 2014 or December 31, 2013.

Prepaid expenses and other current assets consist of the following:

	September 30, 2014		Ι	December 31, 2013
		(in thous	ands)	
Prepaid insurance	\$	250	\$	687
Prepaid contractor fees and vendor advances		104		193
Taxes receivable		70		96
Recoupable deposits and other		190		115
	\$	614	\$	1,091

The prepaid contractor fees and vendor advances consist of advance payments made to equipment manufacturers, contractors and suppliers primarily at the Company s Velardeña Properties in Mexico.

In addition, included in non-current assets at December 31, 2013 is approximately \$30,000 of prepaid insurance, which was fully amortized at September 30, 2014.

#### 5. Inventories

Inventories at the Velardeña Properties at September 30, 2014 and December 31, 2013 consist of the following:

	Ser	September 30, 2014		December 31, 2013	
	(in thousands)				
Material and supplies	\$	662	\$	449	
	\$	662	\$	449	

The Company had no metals or in process inventories at either period as the result of the suspension of mining and processing at the Velardeña Properties in June 2013.

#### 6. Value Added Tax Receivable, Net

The Company has recorded value added tax (VAT) paid in Mexico and related to the Velardeña Properties as a recoverable asset. Mexican tax law allows for certain VAT payments to be recovered through ongoing applications for refunds. The Company expects that the current amounts will be recovered within a one year period.

The Company has also paid VAT related to exploration activities in Mexico and other countries which has been charged to expense as incurred because of the uncertainty of recovery.

#### 7. Property, Plant and Equipment, Net

The components of property, plant and equipment are as follows:

	S	September 30, 2014		ecember 31, 2013
		(in thou	isands)	
Mineral properties	\$	22,397	\$	22,397
Exploration properties		2,743		2,993
Royalty properties		200		200
Buildings		2,357		2,349
Mining equipment and machinery		19,683		19,441
Other furniture and equipment		841		1,054
Asset retirement cost		2,002		2,087
		50,223		50,521
Less: Accumulated depreciation and				
amortization		(20,217)		(18,146)
		30,006		32,375

During the quarter ended September 30, 2014 the Company sold 45 mining concessions totaling 770 hectares located in the Zacatecas District, Zacatecas State, Mexico, to Capstone Mining Group for \$700,000 and recorded a \$0.5 million gain on the sale. Also in the quarter, the Company entered into an option agreement with a private party to sell its 1,100 hectare Otuzco property in Peru for \$450,000. At September 30, 2014 the Company had received \$150,000 under the option agreement, with the remainder payable in 2015 if the option is maintained and exercised. In addition, the Company sold miscellaneous surplus equipment located in Argentina during the quarter for \$130,000 and recorded a nominal gain. The net gains for the above sales are reflected in other operating income, net on the accompanying Condensed Consolidated Statement of Operations.

The asset retirement cost ( ARC ) is all related to the Company s Velardeña Properties. The decrease in the ARC during the period is related to an adjustment to the asset retirement obligation ( ARO ) (see Note 9).

#### 8. Accounts Payable and Other Accrued Liabilities

The Company s accounts payable and other accrued liabilities consist of the following:

	September 30, 2014		]	December 31, 2013
Accounts payable and accruals	\$	1,159	\$	717
Accrued employee compensation and benefits		716		648
	\$	1,875	\$	1,365

#### September 30, 2014

Accounts payable and accruals at September 30, 2014 are primarily related to amounts due to contractors and suppliers in the amounts of approximately \$0.7 million and \$0.5 million related to the Company s Velardeña Properties and corporate administrative activities, respectively.

Accrued employee compensation and benefits at September 30, 2014 consist of \$0.2 million of accrued vacation and \$0.5 million related to withholding taxes and benefits payable, of which \$0.2 million is related to the Velardeña Properties.

#### December 31, 2013

Accounts payable and accruals at December 31, 2013 are primarily related to amounts due to contractors and suppliers in the amounts of \$0.4 million, \$0.2 million and \$0.1 million related to the Company s Velardeña Properties, corporate administrative activities and exploration, respectively.

Accrued employee compensation and benefits at December 31, 2013 consist of \$0.1 million of accrued vacation payable and \$0.5 million related to withholding taxes and benefits payable, of which \$0.3 million is related to activities at the Velardeña Properties.

Key Employee Long-Term Incentive Plan

On December 13, 2013, the board of directors of the Company approved and the Company adopted the 2013 Key Employee Long-Term Incentive Plan (the KELTIP), which became effective immediately. The KELTIP provides for the grant of units (KELTIP Units) to certain

officers and key employees of the Company, which units will, once vested, entitle such officers and employees to receive an amount, in cash or in Company common stock issued pursuant to the Company s Amended and Restated 2009 Equity Incentive Plan, measured generally by the price of the Company s common stock on the settlement date. KELTIP Units are not an actual equity interest in the Company and are solely unfunded and unsecured obligations of the Company that are not transferable and do not provide the holder with any stockholder rights. Payment of the settlement amount of vested KELTIP Units is deferred generally until the earlier of a change of control of the Company or the date the grantee ceases to serve as an officer or employee of the Company.

The KELTIP Units are marked to market at each reporting period. At September 30, 2014 and December 31, 2013 the Company had recorded liabilities of \$110,000 and \$81,000, respectively related to KELTIP Unit grants which are included in accrued employee compensation and benefits in the table above.

#### 9. Asset Retirement Obligations

The Company retained the services of a mining engineering firm to prepare a detailed closure plan for the Velardeña Properties. The plan was completed during the second quarter 2012 and indicated that the Company had an ARO and offsetting ARC of approximately \$1.9 million. The estimated \$3.5 million ARO and ARC that was recorded at the time of the acquisition of the Velardeña Properties was adjusted accordingly.

The Company will continue to accrue additional estimated ARO amounts based on an asset retirement plan as activities requiring future reclamation and remediation occur. During the first nine months of 2014 the Company recognized

approximately \$0.2 million of accretion expense and approximately \$0.2 million of amortization expense related to the ARC.

The following table summarizes activity in the Velardeña Properties ARO:

	Nine Mon Septem 2014		d 2013
	(in thou	isands)	
Beginning balance	\$ 2,467	\$	2,080
Changes in estimates, and other	(85)		203
Accretion expense	149		135
Ending balance	\$ 2,531	\$	2,418

The decrease in the ARO recorded during the nine months ended September 30, 2014 is the result of changes in assumptions related to inflation factors and discount rates used in the determination of future cash flows.

The increase in ARO recorded during the nine months ended September 30, 2013 relates to a change in assumption related to inflation factors used in the determination of future cash flows. The corresponding increase in ARO was discounted using the Company s current credit-adjusted risk-free interest rate.

The ARO set forth on the accompanying Condensed Consolidated Balance Sheets at September 30, 2014 and December 31, 2013 include approximately \$0.1 million of reclamation liabilities related to activities at the El Quevar project in Argentina.

#### 10. Other Current Liabilities

The Company recorded other current liabilities of approximately \$2.8 million and \$4.4 million at September 30, 2014 and December 31, 2013, respectively. The amounts are primarily related to a loss contingency on foreign withholding taxes that the government could assert are owed by the Company, acting as withholding agent, on certain interest payments made to a third party. The amounts include estimated interest, penalties and other adjustments.

The September 30, 2014 amount also includes a net liability of approximately \$0.2 million related to the Argentina tax on equity due for years 2009 through 2012 stemming from a tax audit of those years. The amount includes interest and penalties and is net of certain VAT credits due the Company. The tax authorities have agreed in principle to offset a portion of the \$0.9 million in tax, interest and penalties with approximately \$0.7 million of VAT credits due the Company. Should the Argentina tax authorities ultimately not allow a portion or all of the VAT credits as an offset the liability could increase by as much as \$0.7 million (see Note 16).

#### 11. Fair Value Measurements

The Company follows the guidance of Accounting Standards Codification (ASC) Topic 820 Fair Value Measurements and Disclosures (ASC 820) for financial assets and liabilities and nonfinancial assets and liabilities which are measured at fair value on a recurring basis. ASC 820 establishes a framework for measuring fair value in the form of a fair value hierarchy which prioritizes the inputs into valuation techniques used to measure fair value into three broad levels. This hierarchy gives the highest priority to quoted prices (unadjusted) in active markets and the lowest priority to unobservable inputs. Further, financial assets and liabilities should be classified by level in their entirety based upon the lowest level of input that was significant to the fair value measurement. The three levels of the fair value hierarchy per ASC 820 are as follows:

Level 1: Unadjusted quoted market prices in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2: Quoted prices in inactive markets for identical assets or liabilities, quoted prices for similar assets or liabilities in active markets, or other observable inputs either directly related to the asset or liability or derived principally from corroborated observable market data.

Level 3: Unobservable inputs due to the fact that there is little or no market activity. This entails using assumptions in models which estimate what market participants would use in pricing the asset or liability.

The following table summarizes the Company s financial assets and liabilities at fair value at September 30, 2014 and December 31, 2013, by respective level of the fair value hierarchy:

	I	evel 1	I	Level 2 (in thousa	Level 3	Total
At September 30, 2014				(in thouse		
Assets:						
Cash equivalents	\$	14,955	\$		\$	\$ 14,955
Liabilities:						
KELTIP payable		110				110
	\$	14,845	\$		\$	\$ 14,845
At December 31, 2013						
Assets:						
Cash equivalents	\$	19,146	\$		\$	\$ 19,146
Trade Accounts Receivable		25				25
Liabilities:						
KELTIP payable		81				81
	\$	19,090	\$		\$	\$ 19,090

The Company s cash equivalents, comprised principally of U.S. treasury securities, are classified within Level 1 of the fair value hierarchy.

The KELTIP payable is related to employee and officer compensation as discussed in Note 8 and are marked to market at the end of each period based on the closing price of the Company s common stock resulting in a classification of Level 1 within the fair value hierarchy.

During the nine months ended September 30, 2014 and for the year ended December 31, 2013 there were no amounts transferred between levels and there were no changes in fair value measurement techniques. The Company did not have any Level 2 or Level 3 financial assets or liabilities at September 30, 2014 or December 31, 2013.

Credit Risk

Credit risk is the risk that a third party might fail to fulfill its performance obligations under the terms of a financial instrument. For cash and cash equivalents and investments, the Company s maximum exposure to credit risk represents the carrying amount on the balance sheet. The Company attempts to mitigate credit risk for cash and cash equivalents by placing its funds with high credit-quality financial institutions, limiting the amount of exposure to each financial institution, monitoring the financial condition of the financial institutions and investing only in government and corporate securities rated investment grade or better. The Company invests with financial institutions that maintain a net worth

of not less than \$1.0 billion and are members in good standing of the Securities Investor Protection Corporation.

#### 12. Income Taxes

The Company accounts for income taxes in accordance with the provisions of ASC 740, Income Taxes (ASC 740), on a tax jurisdictional basis. For the nine months ended September 30, 2014, the Company had no income tax benefit or expense. The Company operates in jurisdictions that have generated ordinary losses on a year-to-date basis and no benefit can be recognized on those losses, thus an estimated effective tax rate is not used to report the year-to-date results. For the nine months ended September 30, 2013, the Company recorded a \$47.6 million income tax benefit related primarily to the impairment of long lived assets of the Velardeña Properties and Mexico net operating losses, resulting in an elimination of the net deferred tax liability in existence at that time.

In accordance with ASC 740, the Company presents deferred tax assets net of its deferred tax liabilities on a tax jurisdictional basis on its Consolidated Balance Sheets. As of September 30, 2014 and as of December 31, 2013, the Company had no net deferred tax assets or net deferred tax liabilities reported on its balance sheet.

The Company, a Delaware corporation, and its subsidiaries file tax returns in the United States and in various foreign jurisdictions. The tax rules and regulations in these countries are highly complex and subject to interpretation. The Company s income tax returns are subject to examination by the relevant taxing authorities and in connection with such examinations, disputes can arise with the taxing authorities over the interpretation or application of certain tax rules within the country involved. In accordance with ASC 740, the Company identifies and evaluates uncertain tax positions, and recognizes the impact of uncertain tax positions for which there is less than a more-likely-than-not probability of the position being upheld upon review by the relevant taxing authority. Such positions are deemed to be unrecognized tax benefits which require additional disclosure and recognition of a liability within the financial statements. The Company had no unrecognized tax benefits as of September 30, 2014 and as of December 31, 2013.

#### 13. Equity

## Registered offering

On September 10, 2014, the Company completed a registered public offering (the Offering ) of 3,692,000 shares (the Shares ) of the Company s common stock, par value \$0.01 per share, and warrants (the Warrants ) to purchase 1,846,000 shares of the Company s common stock. The Shares and Warrants were sold in units (Units) at a price of \$0.86 per Unit, before discount to the underwriters, with each Unit consisting of one Share of the Company s common stock and a Warrant to purchase 0.50 of a share of the Company s common stock. The Warrants become exercisable on March 11, 2015 at an exercise price of \$1.21 per share and will expire on September 10, 2019, five years from the date of issuance. The Shares and the Warrants are immediately separable and were issued separately. The Company received net proceeds from the Offering of approximately \$2.7 million after the underwriter commissions and expenses of approximately \$0.5 million. In arriving at the relative value of the Shares and Warrants the Company used the Black-Scholes option pricing model with a risk-free interest rate of 1.79%; a stock price of \$1.01, the closing price of the Company s common stock the day prior to the announcement of the offering; volatility of 83%; and terms equal to the terms of the Warrants. The fair value of the Shares was approximately \$2.1 million and the fair value of the Warrants was approximately \$0.6 million both of which were recorded to additional paid in capital net of the \$0.01 par value of the Shares.

#### Private placement

On September 10, 2014 the Company also completed a private placement (the Private Placement ) with The Sentient Group (Sentient), the Company's largest stockholder, pursuant to which Sentient purchased, pursuant to Regulation S under the U.S. Securities Act of 1933, a total of 5,800,000 Units, with each Unit consisting of one share of the Company's common stock and a warrant to purchase 0.50 of a share of the Company's common stock. The warrants become exercisable on March 11, 2015 at an exercise price of \$1.21 per share and will expire on September 10, 2019, five years from the date of issuance. Each Unit was priced at \$0.817 the same discounted price paid by the underwriters in the Offering. The Company received net proceeds from the Private Placement of approximately \$4.7 million after the discount and expenses of approximately \$0.3 million. In arriving at the relative value of the Shares and Warrants the Company's common stock the day prior to the announcement of the offering; volatility of 83%; and terms equal to the terms of the Warrants. The fair value of the Shares was approximately \$3.6 million and the fair value of the Warrants was approximately \$1.1 million both of which were recorded to additional paid in capital net of the \$0.01 par value of the Shares. Following the completion of the Private Placement and the Offering, Sentient holds approximately 27.2% of the Company's outstanding common stock (excluding restricted common stock held by the Company's employees).

In May 2014, the Company s stockholders approved amendments to the Company s 2009 Equity Incentive Plan, adopting the Amended and Restated 2009 Equity Incentive Plan (the Equity Plan), pursuant to which awards of the Company s common stock may be made to officers, directors, employees, consultants and agents of the Company and its subsidiaries. The Company recognizes stock-based compensation costs using a graded vesting attribution method whereby costs are recognized over the requisite service period for each separately vesting portion of the award.

The following table summarizes the status of the Company s restricted stock grants issued under the Equity Plan at September 30, 2014 and changes during the nine months then ended:

Restricted Stock Grants	Number of Shares	Weighted Average Grant Date Fair Value Per Share
Outstanding at December 31, 2013	915,971	\$ 2.47
Granted during the period		
Restrictions lifted during the period	(165,634)	4.72
Forfeited during the period		
Outstanding at September 30, 2014	750,337	\$ 1.97

Restrictions were lifted on 155,134 shares during the period on the anniversaries of grants made to officers and employees in prior years. The restrictions were lifted on an additional 10,500 shares in connection with to the termination of employment of two employees.

For the nine months ended September 30, 2014 the Company recognized approximately \$0.4 million of compensation expense related to outstanding restricted stock grants. The Company expects to recognize additional compensation expense related to these awards of approximately \$0.3 million over the next 21 months.

The following table summarizes the status of the Company s stock option grants issued under the Equity Plan at September 30, 2014 and changes during the nine months then ended:

Equity Plan Options	Number of Shares	Weighted Average Exercise Price Per Share	
Outstanding at December 31, 2013	110,810	\$	8.02
Granted during period			
Forfeited or expired during period	(15,000)		8.02
Exercised during period			
Outstanding at September 30, 2014	95,810		8.02
Exercisable at end of period	95,810		8.02
Granted and vested	95,810		8.02

At September 30, 2014, in addition to the Equity Plan options outstanding, the Company had outstanding 126,000 options to purchase shares of the Company s common stock at an exercise price of \$16.00. The options were related to the merger with ECU Silver Mining Inc. (ECU) on September 2, 2011 and were issued to former ECU stock option holders to replace options previously issued to them by ECU. The options expired on October 22, 2014.

Also, pursuant to the Equity Plan, the Company s board of directors adopted the Non-Employee Director s Deferred Compensation and Equity Award Plan (the Deferred Compensation Plan ). Pursuant to the Deferred Compensation Plan the non-employee directors receive a portion of their compensation in the form of Restricted Stock Units (RSUs) issued under the Equity Plan. The RSUs vest on the first anniversary of the grant date and each vested RSU entitles the director to receive one unrestricted share of common stock upon the termination of the director s board service.

The following table summarizes the status of the RSU grants issued under the Deferred Compensation Plan at September 30, 2014 and changes during the nine months then ended:

Restricted Stock Units	Number of Shares	Weighted . Grant Da Value Per	te Fair
Outstanding at December 31, 2013	585,285	\$	2.97
Granted during the period	350,000		0.58
Restrictions lifted during the period			
Forfeited during the period			
Outstanding at September 30, 2014	935,285	\$	2.08

For the nine months ended September 30, 2014 the Company recognized approximately \$0.3 million of compensation expense related to the RSU grants. The Company expects to recognize additional compensation expense related to these awards of approximately \$0.1 million over the next nine months.

Pursuant to the KELTIP (see Note 8) KELTIP Units may be granted to certain officers and key employees of the Company, which units will, once vested, entitle such officers and employees to receive an amount in cash or in Company common stock measured generally by the price of the Company s common stock on the settlement date. The KELTIP Units are recorded as a liability as discussed in detail in Note 8.

#### Common stock warrants

The following table summarizes the status of the Company s common stock warrants at September 30, 2014 and changes during the nine months then ended:

Common Stock Warrants	Number of Underlying Shares	ghted Average rcise Price Per Share
Outstanding at December 31, 2013	5,263,578	\$ 12.10
Granted during period	4,746,000	1.21
Dilution adjustment	599,760	7.17
Expired during period	(1,831,929)	19.00
Exercised during period		
Outstanding at September 30, 2014	8,777,409	\$ 3.95

The warrants granted during the period are related to the Offering and Private Placement of the Company s securities completed on September 10, 2014 as discussed above.

In September 2012, the Company closed on a registered offering and concurrent private placement with Sentient in which it sold units, consisting of one share of common stock and a five-year warrant to acquire one half of a share of common stock at an exercise price of \$8.42 per share (the September 2012 Warrants ). Pursuant to certain dilution adjustment provisions in the warrant agreement governing the September 2012 Warrants, the number of shares of common stock issuable upon exercise of the September 2012 Warrants was increased from 3,431,649 shares to 4,031,409 shares (599,760 share increase) and the exercise price was reduced from \$8.42 per share to \$7.17 per share pursuant to a weighted average dilution calculation based on the pricing of the Offering and the Private Placement.

The warrants that expired were warrants related to the merger with ECU on September 2, 2011 and were issued to former ECU warrant holders to replace warrants previously issued to them by ECU. The warrants expired on February 20, 2014.

Prior to the suspension of mining and processing in June 2013 (see Note 1) the Company sold marketable products including concentrates and precipitates at its Velardeña Properties. During the nine months ended September 30, 2014 the Company did not sell any product or incur any related costs as the result of the suspension of mining and processing.

During the nine months ended September 30, 2013 the Company sold marketable products to five customers. Under the terms of the Company s agreements with one precipitate customer, title did not pass to the purchaser until the product was received by the refinery, at which point revenue was recognized. For the Company s other customers, title generally passed when a provisional payment was made, which occurred after the product was shipped and customary sales documents were completed. Costs related to the sale of metals products include direct and indirect costs incurred to mine, process and market the products. At September 30, 2013 the Company had written down its metals inventory to net realizable value including a charge to the cost of metals sold of approximately \$2.0 million and a charge to depreciation expense of approximately \$0.6 million. Also included in cost of metals sold at September 30, 2013 was a \$0.6 million charge related to workforce reduction severance costs.

#### 15. Supplemental Cash Flow Information

The following table reconciles net loss for the period to cash used in operations:

	Nine Months Ended September 30, 2014					
	(in the	usands)				
Cash flows from operating activities:						
Net loss	\$ (14,313)	\$	(230,276)			
Adjustments to reconcile net loss to net cash used in operating						
activities:						
Amortization and depreciation	2,375		6,180			
Accretion of asset retirement obligation	149		135			
Foreign currency gain on loss contingency	(74)		(383)			
Foreign currency loss on deferred tax liability			527			
Impairment of goodwill			11,180			
Impairment of long lived assets			237,838			
Asset write off	129		(66)			
Write off of loss contingencies	(1,719)		(522)			
Realized loss on marketable securities			133			
Gain on sale of assets, net	(681)		(3,519)			
Income tax provision			(47,599)			
Stock compensation	768		1,284			
Changes in operating assets and liabilities:						
Decrease in trade accounts receivable	25		1,047			
Decrease in prepaid expenses and other assets	507		328			
(Increase) decrease in inventories	(213)		2,074			
Decrease in value added tax recoverable, net	371		2,684			
Decrease in reclamation liability	(115)		(27)			
Increase (decrease) in accounts payable and accrued liabilities	623		(4,337)			
Increase (decrease) in deferred leasehold payments	21		(116)			
Net cash used in operating activities	\$ (12,147)	\$	(23,435)			

#### 16. Commitments and Contingencies

The Company has recorded loss contingencies of approximately \$2.6 million and \$4.2 million at September 30, 2014 and December 31, 2013, respectively as discussed in Note 10. In addition to the amounts recorded, the Company could be liable for up to an additional \$0.7 million stemming from a tax audit of the Argentina equity tax for years 2009 through 2012 subject to the Argentina tax authorities acceptance of VAT credits to partially offset the tax liability (see Note 10).

#### 17. Segment Information

The Company s sole activity is the mining, construction and exploration of mineral properties containing precious metals. The Company s reportable segments are based upon the Company s revenue producing activities and cash consuming activities. The Company reports two segments, one for its Velardeña Properties in Mexico and the other comprised of non-revenue producing activities including exploration, construction and general and administrative activities. Intercompany revenue and expense amounts have been eliminated within each segment in order to report on the basis that management uses internally for evaluating segment performance.

The financial information relating to the Company s segments is as follows:

Three Months Ended September 30, 2014		evenue	Арј	Costs plicable to Sales	Dej	preciation, pletion and nortization		Exploratio Quevar, Vel nd Adminis Expens	ardeña strative	P	re-7	fax loss	Та	otal Assets		Capital penditures

#### Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

#### General

Golden Minerals is a mining company with its Velardeña precious metals mining properties in the State of Durango, Mexico (the Velardeña Properties ), the El Quevar advanced exploration property in the province of Salta, Argentina, and a diversified portfolio of precious metals and other mineral exploration properties located in or near historical precious metals producing regions of Mexico and Argentina.

We are considered an exploration stage company under SEC criteria since we have not demonstrated the existence of proven or probable reserves at any of our properties. Prior to suspending mining and processing at the Velardeña Properties in June 2013, we had revenues from the sale of gold, silver, lead and zinc products from the Velardeña and Chicago mines. Even though we have recommenced mining at the Velardeña Properties, until such time, if ever, that we demonstrate the existence of proven or probable reserves pursuant to SEC Industry Guide 7 we expect to remain as an exploration stage company.

This discussion should be read in conjunction with Management s Discussion and Analysis included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013, filed with the SEC on February 28, 2014.

#### 2014 Highlights

We recommenced mining activities at the Velardeña Properties in July 2014 and we plan to begin processing material from the mine in the fourth quarter 2014. Our decision to restart mining activities followed an extensive evaluation period, which began after the shutdown of the Velardeña Properties in June 2013 and included a 9,000-meter drill program that concluded in June 2014. During the first nine months of 2014 we also continued efforts to actively solicit a partner to advance our El Quevar project and continued to review strategic opportunities, focusing on development or operating properties in North America, including Mexico.

Financing Activity

On September 10, 2014, the Company completed an underwritten registered public offering and concurrent private placement for total net proceeds, after underwriter commissions and expenses, of \$7.4 million. The Company sold 3,692,000 units in the registered offering, priced at \$0.86 per unit, before discount to the underwriters, with each unit consisting of one share of the Company s common stock and a five year warrant to purchase 0.50 of a share of the Company s common stock at an exercise price of \$1.21 per share. The Company sold an additional 5,800,000 units in a concurrent private placement to The Sentient Group (Sentient), the Company s largest stockholder, at a price of \$0.817 per unit, the same discounted price paid by the underwriter in the registered offering. Following the completion of the Private Placement and the Offering, Sentient holds approximately 27.2% of the Company s outstanding common stock (excluding restricted common stock held by the Company s employees).

#### Sale of Assets

٠

During the quarter ended September 30, 2014 we sold 45 mining concessions totaling 770 hectares located in the Zacatecas District, Zacatecas State, Mexico, to Capstone Mining Group for the sum of US \$700,000 and recorded a \$0.5 million gain on the sale. We also entered into an option agreement with a private party to sell our 1,100 hectare Peruvian Otuzco property for US \$450,000. At September 30, 2014 we had received \$150,000 under this agreement, with the remainder payable in 2015 if the option is maintained and exercised. In addition, we sold miscellaneous surplus equipment located in Argentina for \$130,000 and recorded a nominal gain. The net gains for the above sales are reflected in other operating income, net on the accompanying Condensed Consolidated Statement of Operations.

#### Restart of Mining at the Velardeña Properties

Following the shutdown of the Velardeña Properties in June 2013, we continued to develop and evaluate plans to restart mining. We completed this evaluation and new mine plans in the second quarter 2014 and on July 1, 2014 we restarted mining at the Velardeña Properties and began processing material from the mine on November 3, 2014. Once mining and processing are ramped up to approximately an average of 285 tonnes per day (tpd) of sulfide material, we expect output of approximately 1.0 to 1.2 million silver equivalent ounces per annum (including silver and gold but excluding lead and zinc and calculated at a ratio of 60 silver ounces to 1 gold ounce), with cash costs between \$12 and \$15 per payable silver ounce net of by-product gold, lead and zinc credits, assuming a price for gold of \$1,250 per ounce. Cash costs per payable silver ounce, net of by-product credits is a non-GAAP financial measure defined below in Non-GAAP Financial Measures .

We completed the evaluation of a 9,000-meter drill program at the Velardeña Properties during June 2014 in vein systems located largely outside the boundaries of our 2012 mineralized material estimate. This drill program represents the first known drilling of the Terneras and Roca Negra vein sulfides in the area below the historic Terneras mine workings. Our drilling, mine planning and analysis indicate that positive net cash flow may be achieved at the Velardeña Properties at silver and gold prices of \$20.00 and \$1,250, respectively by the end of the second quarter 2015. An independent engineering firm participated in the preparation of the mining plan.

We expect the incremental 2014 net cash outlay to resume mining to total approximately \$3.0 million. This is comprised of approximately \$1.0 million in re-start costs for mill improvements and slusher equipment plus \$3.0 million of negative gross margin (revenue less cost of sales) in 2014, offset by approximately \$1.0 million of avoided care and maintenance costs. We sold non strategic mineral properties in Mexico and Peru and miscellaneous equipment in Argentina for \$1.0 million to partially offset the \$3.0 million net cash outlay. We also continue to search for oxide feed from outside sources, which could enable us to restart the Velardeña oxide plant during the restart plan of the sulfide mill.

#### Lower Cost Mining

We have reopened Velardeña as a leaner and lower cost mine, with new management throughout the operation. We have hired 90 new employees under a new labor union agreement and are mining two ten-hour shifts per day. By year-end 2014, we expect to employ approximately 200 people, with approximately 130 employees under the new labor union agreement. This is less than half of the employees prior to the June 2013 shutdown when we were running both sulfide and oxide plants and processing approximately 500 tonnes per day (tpd).

Under our new mine plan, we are using an overhand cut and fill mining method and slusher mucking in the stopes. This mining method should allow us to mine vein widths as narrow as 0.5 meters, which should significantly decrease dilution and allow higher grade material to be hauled to the mill. For conservative planning purposes, we have assumed dilution of the veins to one meter widths. We are removing material from the mine using the new 1.9 kilometer production-sized San Mateo access ramp, which we completed prior to suspending mining in June 2013. This ramp is providing more efficient and lower cost removal of mined material compared to pre-suspension haulage primarily from a low capacity internal shaft.

Going forward, we expect mining to focus on the San Mateo, Terneras, and Roca Negra veins. Drilling results and metallurgical studies indicate that these sulfide veins, mined minimally in the past, contain higher grade material over more consistent widths in the 0.5 to 1.0 meter range, with significantly lower arsenic levels than those in the Santa Juana vein system that was the focus of our previous mining activity. We expect

that the lower arsenic will allow for improved payment terms and metallurgical recovery of the metals. The Roca Negra vein, not considered in the initial restart plan, should add greater flexibility in achieving the objectives of the mine plan, providing an additional vein for mining.

The mining plan calls for the processing of mined material to make gold and silver bearing lead, zinc and pyrite concentrates. The mining plan is based on favorable results of preliminary metallurgical testing and our expectation, based on the results of the 2014 drill program, that processed material will contain an average of approximately 4 grams per tonne gold and 200 to 250 grams per tonne silver. As noted above, other than portions of the San Mateo vein, this material is not included in our reported mineralized material.

Ramp-up Schedule

We began mining on July 1, 2014, focused primarily on mining material from the San Mateo and Roca Negra veins and development of access to the Terneras vein. We stockpiled mined material until we began processing material through the sulfide mill on November 3, 2014. During November we will be testing new equipment in the mill including a revamped electrical system, concentrate filters for our concentrate products, refurbished flotation cells and other equipment. We have mined and stockpiled low grade material for this testing phase of the mill ramp up. In December we expect to have the mill operating at full capacity of an average of 285 tonnes per day and continuing at the rate. Grade of the feed material will gradually increase through the second quarter of 2015 as new stopes in the mine are developed and particularly as access to the Teneras vein expands. We plan to mine from the San Mateo, Terneras and Roca Negra veins during the fourth quarter 2014, with mining in the Terneras vein ramping up in the second quarter 2015. Upon completion of the ramp up we expect to produce approximately 250,000 to 300,000 ounces of silver equivalents per quarter. We project cash costs per payable silver ounce, net of by-product credits between \$12 and \$15 by mid-2015, assuming a price for by-product gold of \$1,250 per ounce. Cash costs per payable silver ounce, net of by-product credits is a non-GAAP
