IMA EXPLORATION INC  
Form 6-K  
May 03, 2005

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, DC 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16 UNDER  
THE SECURITIES EXCHANGE ACT OF 1934

For the month of APRIL, 2005.

Commission File Number: 0-30464

IMA EXPLORATION INC.

-----  
(Translation of registrant's name into English)

#709 - 837 West Hastings Street, Vancouver, British Columbia, V6C 3N6, Canada  
-----

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports  
under cover of Form 20-F or Form 40-F: FORM 20-F  FORM 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as  
permitted by Regulation S-T Rule 101(b)(1): \_\_\_\_\_

Indicate by check mark if the registrant is submitting the Form 6-K in paper as  
permitted by Regulation S-T Rule 101(b)(7): \_\_\_\_\_

Indicate by check mark whether the registrant by furnishing the information  
contained in this Form, is also thereby furnishing the information to the  
Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.  
YES  NO

If "Yes" is marked, indicate below the file number assigned to the registrant in  
connection with Rule 12g3-2(b): 82-\_\_\_\_\_

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the  
registrant has duly caused this report to be signed on its behalf of the  
undersigned, thereunto duly authorized.

NEWS RELEASE

APRIL 19, 2005

## DRILLING CONTINUES TO EXPAND CALCITE HILL MINERALIZATION AT IMA'S NAVIDAD SILVER DISCOVERY

IMA EXPLORATION INC (IMR-TSX.V, IMXPF-OTC.BB) is pleased to report results from diamond drill holes 162 to 174 at the Calcite Hill zone on it's 100% owned Navidad silver project in Patagonia, Argentina. Highlights of the current results include 29.6M OF 236 G/T SILVER AND 5.38% LEAD IN HOLE 167, AND 51.0M OF 168 G/T SILVER IN HOLE 168. Mineralization at Calcite Hill has now been defined over a strike length of 500m and varies in horizontal width from approximately 50 to 150 metres and vertical thickness from 10 to 110 metres (see attached map). To date, IMA has defined an Indicated Resource of 268 million ounces of silver and 1.1 million tonnes of lead (80.8 million tonnes at 103 g/t silver and 1.45% lead using a 50 g/t silver equivalent cut-off) at Navidad Hill, Galena Hill and the Connector Zone.

A new resource estimate at Calcite Hill is planned to begin shortly and will be conducted by Snowden Mining Industry Consultants based on the 36 drill holes completed at Calcite Hill during Phase III (as of April 18, 2005). To date, IMA has completed 27,981m of core drilling in 174 holes taking the Navidad Project from an undrilled prospect to one of the world's largest silver resources in just 17 months. The Calcite Hill mineralization is expected to add significantly to the existing resource base.

In addition, the company reports that Connors Argentina S.A. is now on site at Navidad to begin the additional 10,000m that were added to the Phase III drill program. The primary focus of this program will be to continue to expand the high-grade silver-lead mineralization at Calcite Hill.

The Calcite Hill zone is open along strike to the northwest where a silver-in-soil anomaly extends for a further 1.4 km beyond the present limit of drilling, and also to the northeast in the area nearest Navidad Hill. Complete results from drill holes 162 to 174 are shown in Table 1, significant intercepts to date from Calcite Hill include the following:

DRILL HOLE	INTERCEPT (M)	SILVER (G/T)	LEAD (%)
NV04-88*	72.3	202	3.45
NV04-124*	122.6	195	0.74

PAGE 2

Silver mineralization at Calcite Hill is predominantly hosted within the same trachyandesite volcanic rock and overlying mudstone which hosts mineralization at Galena Hill. Mineralization consists of two distinct styles, one consisting of calcite-barite veinlets and breccias with argentite-acanthite, native silver and lesser galena and chalcopyrite, the other consisting of veins and breccias containing medium-grained galena and rare native silver.

Dr. Paul Lhotka is IMA's Qualified Person for the Navidad project under National Instrument 43-101 regulations and has overseen all aspects of the current exploration program. IMA has implemented a rigorous program of quality assurance and quality control at the Navidad project, for complete details of this and for more maps depicting the work described herein please visit IMA's web site at <http://www.imaexploration.com/>.

IMA Exploration Inc. is a member of The Grosso Group of companies. The Grosso Group is a management team that puts their combined experience, financial network and dedication behind every company that makes up the group. It is the human and financial resources that the Group provides that are the cornerstones to building successful companies and outperforming their peers in the market place.

ON BEHALF OF THE BOARD

/s/ Joseph Grosso

Mr. Joseph Grosso, President & CEO
