PART I

Item 1. Description of Business.

Plastron Acquisition Corp. II (“we”, “us”, “our”, the "Company") was incorporated in the State of Delaware on January 24, 2006 and maintains its principal executive office at c/o Michael Rapp, 712 Fifth Avenue, New York, NY 10019. The Company was formed as a vehicle to pursue a business combination through the acquisition of, or merger with, an operating business. The Company filed a Registration Statement on Form 10-SB with the U.S. Securities and Exchange Commission (the “SEC”) on May 15, 2007, and since its effectiveness, the Company has focused its efforts to identify a possible business combination. The business purpose of the Company is to seek the acquisition of, or merger with, an existing company. The Company selected December 31 as its fiscal year end.

The Company is currently considered to be a "blank check" company. The U.S. Securities and Exchange Commission (the “SEC”) defines those companies as "any development stage company that is issuing a penny stock, within the meaning of Section 3 (a)(51) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and that has no specific business plan or purpose, or has indicated that its business plan is to merge with an unidentified company or companies." Under SEC Rule 12b-2 under the Exchange Act, the Company also qualifies as a “shell company,” because it has no or nominal assets (other than cash) and no or nominal operations. Many states have enacted statutes, rules and regulations limiting the sale of securities of "blank check" companies in their respective jurisdictions. Management does not intend to undertake any efforts to cause a market to develop in our securities, either debt or equity, until we have successfully concluded a business combination. The Company intends to comply with the periodic reporting requirements of the Exchange Act for so long as it is subject to those requirements.

The Company was organized as a vehicle to investigate and, if such investigation warrants, acquire a target company or business seeking the perceived advantages of being a publicly held corporation. The Company’s principal business objective for the next 12 months and beyond such time will be to achieve long-term growth potential through a combination with a business rather than immediate, short-term earnings. The Company will not restrict its potential candidate target companies to any specific business, industry or geographical location and, thus, may acquire any type of business.

The analysis of new business opportunities will be undertaken by or under the supervision of the sole officers and director of the Company. As of this date, the Company has not entered into any definitive agreement with any party, nor have there been any specific discussions with any potential business combination candidate regarding business opportunities for the Company. The Company has unrestricted flexibility in seeking, analyzing and participating in potential business opportunities. In its efforts to analyze potential acquisition targets, the Company will consider the following kinds of factors:

- (a) Potential for growth, indicated by new technology, anticipated market expansion or new products;
- (b) Competitive position as compared to other firms of similar size and experience within the industry segment as well as within the industry as a whole;
- (c) Strength and diversity of management, either in place or scheduled for recruitment;
- (d) Capital requirements and anticipated availability of required funds, to be provided by the Company or from operations, through the sale of additional securities, through joint ventures or similar arrangements or from other sources;

- (e) The cost of participation by the Company as compared to the perceived tangible and intangible values and potentials;
- (f) The extent to which the business opportunity can be advanced;
- (g) The accessibility of required management expertise, personnel, raw materials, services, professional assistance and other required items; and
- (h) Other relevant factors.

In applying the foregoing criteria, no one of which will be controlling, management will attempt to analyze all factors and circumstances and make a determination based upon reasonable investigative measures and available data. Potentially available business opportunities may occur in many different industries, and at various stages of development, all of which will make the task of comparative investigation and analysis of such business opportunities extremely difficult and complex. Due to the Company's limited capital available for investigation, the Company may not discover or adequately evaluate adverse facts about the opportunity to be acquired.

FORM OF ACQUISITION

The manner in which the Company participates in an opportunity will depend upon the nature of the opportunity, the respective needs and desires of the Company and the promoters of the opportunity, and the relative negotiating strength of the Company and such promoters.

It is likely that the Company will acquire its participation in a business opportunity through the issuance of common stock or other securities of the Company. Although the terms of any such transaction cannot be predicted, it should be noted that in certain circumstances the criteria for determining whether or not an acquisition is a so-called "tax free" reorganization under Section 368(a)(1) of the Internal Revenue Code of 1986, as amended (the "Code") depends upon whether the owners of the acquired business own 80% or more of the voting stock of the surviving entity. If a transaction were structured to take advantage of these provisions rather than other "tax free" provisions provided under the Code, all prior stockholders would in such circumstances retain 20% or less of the total issued and outstanding shares of the surviving entity. Under other circumstances, depending upon the relative negotiating strength of the parties, prior stockholders may retain substantially less than 20% of the total issued and outstanding shares of the surviving entity. This could result in substantial additional dilution to the equity of those who were stockholders of the Company prior to such reorganization.

The present stockholders of the Company will likely not have control of a majority of the voting securities of the Company following a reorganization transaction. As part of such a transaction, all or a majority of the Company's directors may resign and one or more new directors may be appointed without any vote by stockholders.

In the case of an acquisition, the transaction may be accomplished upon the sole determination of management without any vote or approval by stockholders. In the case of a statutory merger or consolidation directly involving the Company, it will likely be necessary to call a stockholders' meeting and obtain the approval of the holders of a majority of the outstanding securities. The necessity to obtain such stockholder approval may result in delay and additional expense in the consummation of any proposed transaction and will also give rise to certain appraisal rights to dissenting stockholders. Most likely, management will seek to structure any such transaction so as not to require stockholder approval.

It is anticipated that the investigation of specific business opportunities and the negotiation, drafting and execution of relevant agreements, disclosure documents and other instruments will require substantial management time and attention and substantial cost for accountants, attorneys and others. If a decision is made not to participate in a specific business opportunity, the costs theretofore incurred in the related investigation might not be recoverable. Furthermore, even if an agreement is reached for the participation in a specific business opportunity, the failure to consummate that transaction may result in the loss to the Registrant of the related costs incurred.

We presently have no employees apart from our sole officer and director. Our sole officer and director is engaged in outside business activities and anticipate that they will devote to our business very limited time until the acquisition of a successful business opportunity has been identified. We expect no significant changes in the number of our employees other than such changes, if any, incident to a business combination.

Item 6. Selected Financial Data.

As a "smaller reporting company" as defined by Item 10 of Regulation S-K, the Company is not required to provide this information.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

The Company was organized as a vehicle to investigate and, if such investigation warrants, acquire a target company or business seeking the perceived advantages of being a publicly held corporation. Our principal business objective for the next 12 months and beyond such time will be to achieve long-term growth potential through a combination with a business rather than immediate, short-term earnings. The Company will not restrict our potential candidate target companies to any specific business, industry or geographical location and, thus, may acquire any type of business.

The Company currently does not engage in any business activities that provide cash flow. During the next twelve months we anticipate incurring costs related to:

- (i) filing Exchange Act reports, and
- (ii) investigating, analyzing and consummating an acquisition.

We believe we will be able to meet these costs through use of funds in our treasury, through deferral of fees by certain service providers and additional amounts, as necessary, to be loaned to or invested in us by our stockholders, management or other investors.

The Company may consider acquiring a business which has recently commenced operations, is a developing company in need of additional funds for expansion into new products or markets, is seeking to develop a new product or service, or is an established business which may be experiencing financial or operating difficulties and is in need of additional capital. In the alternative, a business combination may involve the acquisition of, or merger with, a company which does not need substantial additional capital but which desires to establish a public trading market for its shares while avoiding, among other things, the time delays, significant expense, and loss of voting control which may occur in a public offering.

Any target business that is selected may be a financially unstable company or an entity in its early stages of development or growth, including entities without established records of sales or earnings. In that event, we will be subject to numerous risks inherent in the business and operations of financially unstable and early stage or potential emerging growth companies. In addition, we may effect a business combination with an entity in an industry characterized by a high level of risk, and, although our management will endeavor to evaluate the risks inherent in a particular target business, there can be no assurance that we will properly ascertain or assess all significant risks.

The Company anticipates that the selection of a business combination will be complex and extremely risky. Because of general economic conditions, rapid technological advances being made in some industries and shortages of available capital, our management believes that there are numerous firms seeking even the limited additional capital which we will have and/or the perceived benefits of becoming a publicly traded corporation. Such perceived benefits of becoming a publicly traded corporation include, among other things, facilitating or improving the terms on which additional equity financing may be obtained, providing liquidity for the principals of and investors in a business, creating a means for providing incentive stock options or similar benefits to key employees, and offering greater flexibility in structuring acquisitions, joint ventures and the like through the issuance of stock. Potentially available business combinations may occur in many different industries and at various stages of development, all of which will make the task of comparative investigation and analysis of such business opportunities extremely difficult and complex.

Liquidity and Capital Resources

As of December 31, 2009, the Company had assets equal to \$6,559, comprised exclusively of cash and cash equivalents. This compares with assets of \$582, comprised exclusively of cash and cash equivalents, as of December 31, 2008. The Company's current liabilities as of December 31, 2009 totaled \$55,412, comprised exclusively of notes payable, accrued interest and accounts payable. This compares with current liabilities equal to \$25,390, comprised exclusively of notes payable, accrued interest and accounts payable as of December 31, 2008. The Company can provide no assurance that it can continue to satisfy its cash requirements for at least the next twelve months.

The following is a summary of the Company's cash flows provided by (used in) operating, investing, and financing activities for the years ended December 31, 2009 and 2008 and for the cumulative period from January 24, 2006 (Inception) to December 31, 2009.

	Fiscal Year Ended December 31, 2009	Fiscal Year Ended December 31, 2008	For the Cumulative Period from Inception (January 24, 2006) to December 31, 2009
Net Cash (Used in) Operating Activities	\$ (21,451)	\$ (11,262)	\$ (73,369)
Net Cash (Used in) Investing Activities	-	-	-
Net Cash Provided by Financing Activities	\$ 27,428	\$ 10,000	\$ 79,928
Net Increase (Decrease) in Cash and Cash Equivalents	\$ 5,977	\$ (1,262)	\$ 6,559

The Company has nominal assets and has generated no revenues since inception. The Company is also dependent upon the receipt of capital investment or other financing to fund its ongoing operations and to execute its business plan of seeking a combination with a private operating company. In addition, the Company is dependent upon certain related parties to provide continued funding and capital resources. If continued funding and capital resources are unavailable at reasonable terms, the Company may not be able to implement its plan of operations.

Results of Operations

The Company has not conducted any active operations since inception, except for its efforts to locate suitable acquisition candidates. No revenue has been generated by the Company from Inception (January 24, 2006) to December 31, 2009. It is unlikely the Company will have any revenues unless it is able to effect an acquisition or merger with an operating company, of which there can be no assurance. It is management's assertion that these circumstances may hinder the Company's ability to continue as a going concern. The Company's plan of operation for the next twelve months shall be to continue its efforts to locate suitable acquisition candidates.

For the fiscal years ended December 31, 2009 and 2008, the Company had a net loss of \$24,973 and \$13,201 consisting of legal, accounting, audit, and other professional service fees incurred in relation to the preparation and filing of the Company's periodic reports.

For the cumulative period from Inception (January 24, 2006) to December 31, 2009, the Company had a net loss of \$79,781 comprised exclusively of legal, accounting, audit, and other professional service fees incurred in relation to the formation of the Company, the filing of the Company's Registration Statement on Form 10-SB in May of 2007, and the filing of the Company's periodic reports.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Contractual Obligations

As a “smaller reporting company” as defined by Item 10 of Regulation S-K, the Company is not required to provide this information.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
Plastron Acquisition Corp II
New York, New York

We have audited the accompanying balance sheets of Plastron Acquisition Corp II (A Development Stage Company) as of December 31, 2009 and 2008, and the related statements of operations, stockholders' deficit, and cash flows for the years then ended and from inception (January 24, 2006) through December 31, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, based on our audit, the financial statements referred to above present fairly, in all material respects, the financial position of Plastron Acquisition Corp II (A Development Stage Company) as of December 31, 2009 and 2008, and the results of its operations and cash flows for the years then ended and from inception (January 24, 2006) through December 31, 2009 in conformity with accounting principles generally accepted in the United States.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has suffered losses from operations and current liabilities exceed current assets, all of which raise substantial doubt about its ability to continue as a going concern. Management's plans in regards to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

The Company is currently in the development stage as defined in ASC Topic 915. All activities of the Company to date relate to its organization, initial funding and share issuances.

Going Concern

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate continuation of the Company as a going concern. The Company has not begun generating revenue, is considered a development stage company, has experienced recurring net operating losses, had an accumulated deficit of (\$79,781) and had a working capital deficiency of (\$48,853) as of December 31, 2009. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management plans to issue more shares of common stock in order to raise funds. These financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts, or amounts and classification of liabilities that might result from this uncertainty.

(b) Basis of Presentation:

The accompanying unaudited financial statements have been prepared in accordance with Securities and Exchange Commission requirements for financial statements.

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States.

(c) Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 1 - ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued):

(d) Cash and cash equivalents:

For purposes of the statement of cash flows, the Company considers highly liquid financial instruments purchased with a maturity of three months or less to be cash equivalents.

(e) Income taxes:

The Company follows ASC Topic 740 for recording the provision for income taxes. Deferred tax assets and liabilities are computed based upon the difference between the financial statement and income tax basis of assets and liabilities using the enacted marginal tax rate applicable when the related asset or liability is expected to be realized or settled. Deferred income tax expenses or benefits are based on the changes in the asset or liability each period. If available evidence suggests that it is more likely than not that some portion or all of the deferred tax assets will not be realized, a valuation allowance is required to reduce the deferred tax assets to the amount that is more likely than not to be realized. Future changes in such valuation allowance are included in the provision for deferred income taxes in the period of change.

Deferred income taxes may arise from temporary differences resulting from income and expense items reported for financial accounting and tax purposes in different periods. Deferred taxes are classified as current or non-current, depending on the classification of assets and liabilities to which they relate. Deferred taxes arising from temporary differences that are not related to an asset or liability are classified as current or non-current depending on the periods in which the temporary differences are expected to reverse.

The Company applies a more-likely-than-not recognition threshold for all tax uncertainties. ASC Topic 740 only allows the recognition of those tax benefits that have a greater than fifty percent likelihood of being sustained upon examination by the taxing authorities. As of December 31, 2009, the Company reviewed its tax positions and determined there were no outstanding, or retroactive tax positions with less than a 50% likelihood of being sustained upon examination by the taxing authorities, therefore this standard has not had a material effect on the Company.

The Company does not anticipate any significant changes to its total unrecognized tax benefits within the next 12 months.

The Company classifies tax-related penalties and net interest as income tax expense. As of December 31, 2009 and 2008, no income tax expense has been incurred.

(f) Loss per common share:

Basic loss per share is calculated using the weighted-average number of common shares outstanding during each reporting period. Diluted loss per share includes potentially dilutive securities such as outstanding options and warrants, using various methods such as the treasury stock or modified treasury stock method in the determination of dilutive shares outstanding during each reporting period. The Company does not have any potentially dilutive instruments.

(g) Fair value of financial instruments:

The carrying value of cash equivalents and accrued expenses approximates fair value due to the short period of time to maturity.

(h) New accounting pronouncements:

In February 2010, the FASB (Financial Accounting Standards Board) issued Accounting Standards Update 2010-08 (ASU 2010-08), Technical Corrections to Various Topics. This amendment eliminated inconsistencies and outdated provisions and provided the needed clarifications to various topics within Topic 815. The amendments are effective for the first reporting period (including interim periods) beginning after issuance (February 2, 2010), except for certain amendments. The amendments to the guidance on accounting for income taxes in a reorganization (Subtopic 852-740) should be applied to reorganizations for which the date of the reorganization is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. For those reorganizations reflected in interim financial statements issued before the amendments in this Update are effective, retrospective application is required. The clarifications of the guidance on the embedded derivatives and hedging (Subtopic 815-15) are effective for fiscal years beginning after December 15, 2009, and should be applied to existing contracts (hybrid instruments) containing embedded derivative features at the date of adoption. The Company does not expect the provisions of ASU 2010-08 to have a material effect on the financial position, results of operations or cash flows of the Company.

In January 2010, the FASB (Financial Accounting Standards Board) issued Accounting Standards Update 2010-07 (ASU 2010-07), Not-for-Profit Entities (Topic 958): Not-for-Profit Entities: Mergers and Acquisitions. This amendment to Topic 958 has occurred as a result of the issuance of FAS 164. The Company does not expect the provisions of ASU 2010-07 to have a material effect on the financial position, results of operations or cash flows of the Company.

In January 2010, the FASB (Financial Accounting Standards Board) issued Accounting Standards Update 2010-06 (ASU 2010-06), Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements. This amendment to Topic 820 has improved disclosures about fair value measurements on the basis of input received from the users of financial statements. This is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. Early adoption is permitted. The Company does not expect the provisions of ASU 2010-06 to have a material effect on the financial position, results of operations or cash flows of the Company.

In January 2010, the FASB (Financial Accounting Standards Board) issued Accounting Standards Update 2010-05 (ASU 2010-05), Compensation – Stock Compensation (Topic 718). This standard codifies EITF Topic D-110 Escrowed Share Arrangements and the Presumption of Compensation.

In January 2010, the FASB (Financial Accounting Standards Board) issued Accounting Standards Update 2010-03 (ASU 2010-03), Extractive Activities—Oil and Gas (Topic 932): Oil and Gas Reserve Estimation and Disclosures. This amendment to Topic 932 has improved the reserve estimation and disclosure requirements by (1) updating the reserve estimation requirements for changes in practice and technology that have occurred over the last several decades and (2) expanding the disclosure requirements for equity method investments. This is effective for annual reporting periods ending on or after December 31, 2009. However, an entity that becomes subject to the disclosures because of the change to the definition oil- and gas- producing activities may elect to provide those disclosures in annual periods beginning after December 31, 2009. Early adoption is not permitted. The Company does not expect the provisions of ASU 2010-03 to have a material effect on the financial position, results of operations or cash flows of the Company.

In January 2010, the FASB issued Accounting Standards Update 2010-02, Consolidation (Topic 810): Accounting and Reporting for Decreases in Ownership of a Subsidiary. This amendment to Topic 810 clarifies, but does not change, the scope of current US GAAP. It clarifies the decrease in ownership provisions of Subtopic 810-10 and removes the potential conflict between guidance in that Subtopic and asset derecognition and gain or loss recognition guidance that may exist in other US GAAP. An entity will be required to follow the amended guidance beginning in the period that it first adopts FAS 160 (now included in Subtopic 810-10). For those entities that have already adopted FAS 160, the amendments are effective at the beginning of the first interim or annual reporting period ending on or after December 15, 2009. The amendments should be applied retrospectively to the first period that an entity adopted FAS 160. The Company does not expect the provisions of ASU 2010-02 to have a material effect on the financial position, results of operations or cash flows of the Company.

In January 2010, the FASB issued Accounting Standards Update 2010-01, Equity (Topic 505): Accounting for Distributions to Shareholders with Components of Stock and Cash (A Consensus of the FASB Emerging Issues Task Force). This amendment to Topic 505 clarifies the stock portion of a distribution to shareholders that allows them to elect to receive cash or stock with a limit on the amount of cash that will be distributed is not a stock dividend for purposes of applying Topics 505 and 260. Effective for interim and annual periods ending on or after December 15, 2009, and would be applied on a retrospective basis. The Company does not expect the provisions of ASU 2010-01 to have a material effect on the financial position, results of operations or cash flows of the Company.

The provisions of EITF 09-1, clarifies the accounting treatment and disclosure of share-lending arrangements that are classified as equity in the financial statements of the share lender. An example of a share-lending arrangement is an agreement between the Company (share lender) and an investment bank (share borrower) which allows the investment bank to use the loaned shares to enter into equity derivative contracts with investors. EITF 09-1 is effective for fiscal years that beginning on or after December 15, 2009 and requires retrospective application for all arrangements outstanding as of the beginning of fiscal years beginning on or after December 15, 2009. Share-lending arrangements that have been terminated as a result of counterparty default prior to December 15, 2009, but for which the entity has not reached a final settlement as of December 15, 2009 are within the scope. Effective for share-lending arrangements entered into on or after the beginning of the first reporting period that begins on or after June 15, 2009. NOTE 4 - INCOME TAXES:

At December 31, 2009 and 2008, the Company had a federal operating loss carryforward of approximately \$79,781 and \$54,808 respectively, which begins to expire between 2026 and 2029.

Components of net deferred tax assets, including a valuation allowance, are as follows at December 31:

	2009	2008
Deferred tax assets:		
Net operating loss carryforward	\$ 79,781	\$ 54,808
Total deferred tax assets	27,923	19,183
Less: Valuation Allowance	(27,923)	(19,183)
Net Deferred Tax Assets	\$ —	—

The valuation allowance for deferred tax assets as of December 31, 2009 and 2008 was \$27,923 and \$19,183, respectively. In assessing the recovery of the deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income in the periods in which those temporary differences become deductible. Management considers the scheduled reversals of future deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. As a result, management determined it was more likely than not the deferred tax assets would not be realized as of December 31, 2009 and 2008, and recorded a full valuation allowance.

Reconciliation between the statutory rate and the effective tax rate is as follows for the years ended December 31:

	2009	2008
Federal statutory tax rate	(35.0)%	(35.0)%
Change in valuation allowance	35.0%	35.0%
Effective tax rate	0.0%	0.0%

Based on our evaluation, our management concluded that our internal control over financial reporting was effective as of December 31, 2009.

This annual report does not include an attestation by the Company's registered public accounting firm regarding internal controls over financial reporting. Management's report was not subject to attestation pursuant to the temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in the annual report.

Changes in Internal Controls over Financial Reporting

Compliance with Section 16(a) of the Exchange Act

Section 16(a) of the Exchange Act requires the Company's directors and officers, and persons who beneficially own more than 10% of a registered class of the Company's equity securities, to file reports of beneficial ownership and changes in beneficial ownership of the Company's securities with the SEC on Forms 3, 4 and 5. Officers, directors and greater than 10% stockholders are required by SEC regulation to furnish the Company with copies of all Section 16(a) forms they file.

Based solely on the Company's review of the copies of the forms received by it during the fiscal year ended December 31, 2009 and written representations that no other reports were required, the Company believes that no person who, at any time during such fiscal year, was a director, officer or beneficial owner of more than 10% of the Company's common stock failed to comply with all Section 16(a) filing requirements during such fiscal years.

Code of Ethics

On December 31, 2007, the Company adopted a formal code of ethics statement for senior officers and directors (the “Code of Ethics”) that is designed to deter wrongdoing and to promote ethical conduct and full, fair, accurate, timely and understandable reports that the Company files or submits to the Securities and Exchange Commission and others.

A form of the Code of Ethics is attached as Exhibit 14.1 to the Company’s Form 10-KSB filed with the Securities Exchange Commission on February 25, 2008. Requests for copies of the Code of Ethics should be sent in writing to Plastron Acquisition Corp. II, Attention: President, 712 Fifth Avenue, New York, NY 10019.
