Stock Exchange Announcement

5 November 2002

Novo Nordisk submits Marketing Authorisation Application for NN304 (insulin detemir), a new long-acting insulin analogue

Novo Nordisk A/S today announced that it has submitted a Marketing Authorisation Application (MAA) to the European Medicines Evaluation Agency (EMA) for the approval of NN304 (insulin detemir) for the treatment of diabetes mellitus.

NN304 (insulin detemir) is a long-acting basal insulin analogue with a unique mechanism of protraction that leads to a more predictable patient day-to-day profile of action compared to available basal insulin preparations. Insulin detemir has shown a lower risk of nocturnal hypoglycaemia and lower fasting plasma glucose compared to NPH insulin in long-term clinical trials, which is the expected clinical benefit of a more predictable insulin. In addition, HbA1c was overall comparable to NPH insulin, with superiority shown in a subset of the late development trials. NN304 (insulin detemir) also showed the added clinical benefit of no weight gain compared with NPH insulin.

Upon approval of NN304 (insulin detemir) by the regulatory authorities, Novo Nordisk will be the only diabetes company with a complete insulin analogue portfolio comprising rapid-acting, premixed, and long-acting insulin analogue products.

The filing of NN304 (insulin detemir) will not impact Novo Nordisk's expectations for the financial results for 2002.

Forward-looking statement

The above sections contain forward-looking statements as the term is defined in the US Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations or forecasts of events such as new product introductions, product approvals and financial performance.

Such forward-looking statements are subject to risks, uncertainties and inaccurate assumptions. This may cause actual results to differ materially from expectations. Factors that may affect future results include interest rate and currency exchange rate fluctuations, delay or failure of
