## 6. Net income per ordinary share

Basic net income per ordinary share has been computed by dividing net income available to ordinary shareholders by the weighted average number of ordinary shares outstanding during the period. Diluted net income per ordinary share is computed by adjusting the weighted average number of ordinary shares outstanding during the period for all potentially dilutive ordinary shares outstanding during the period and adjusting net income for any changes in income or loss that would result from the conversion of such potential ordinary shares. There is no difference in net income used for basic and diluted net income per ordinary share.

The reconciliation of the number of shares used in the computation of basic and diluted net income per ordinary share is as follows:

	Three Months Ended		Six Months Ended	
	June 30, 2014	June 30, 2013	June 30, 2014	June 30, 2013

On the same date, the Company also adopted the Consultants Share Option Plan 2008 (the “2008 Consultants Plan”), pursuant to which the Compensation and Organization Committee of the Company’s Board of Directors may grant options to any consultant, adviser or non-executive director retained by the Company or any Subsidiary for the purchase of ordinary shares.

The exercise price will be specified in each Stock Option Agreement, however option prices will not be less than 100% of the fair market value of an ordinary share on the date the option is granted.

An aggregate of 6.0 million ordinary shares have been reserved under the 2008 Employee Plan, as reduced by any shares issued or to be issued pursuant to options granted under the 2008 Consultants Plan, under which a limit of 400,000 shares applies. Further, the maximum number of ordinary shares with respect to which options may be granted under the 2008 Employee Option Plan, during any calendar year to any employee shall be 400,000 ordinary shares. Further, the maximum number of ordinary shares with respect to which options could be granted under the 2003 Share Option Plan during any calendar year to any employee was 400,000 ordinary shares. The 2003 Share Option Plan expired on January 17, 2013. No new options may be granted under this plan.

Share options typically vest over a period of five years from date of grant and expire eight years from date of grant. The maximum contractual term of options outstanding at June 30, 2014 is eight years.

#### Fair value of Stock Options Assumptions

The weighted average fair value of options granted during the three months ended June 30, 2014 and June 30, 2013 was calculated using the Black-Scholes option pricing model. The weighted average fair values and assumptions used were as follows:

	Three Months Ended			
	June 30, 2014		June 30, 2013	
Weighted average fair value	\$12.24		\$12.06	
<b>Assumptions:</b>				
Expected volatility	31	%	41	%
Dividend yield	0	%	0	%
Risk-free interest rate	1.55	%	0.87	%
Expected life	5 years		5 years	

Expected volatility is based on the historical volatility of our common stock over a period equal to the expected term of the options; the expected life represents the weighted average period of time that options granted are expected to be outstanding given consideration to vesting schedules and our historical experience of past vesting and termination patterns. The risk-free rate is based on the U.S. government zero-coupon bonds yield curve in effect at time of the grant for periods corresponding with the expected life of the option.

## 8. Share Capital

### Share Repurchase Program

At the Company's Annual General Meeting on July 22, 2013, the Company was given authority to repurchase (whether by way of redemption or otherwise) up to 10% of the outstanding shares in the Company. The authority allowed the Company to repurchase shares if the market conditions were favourable. Pursuant to this authority, on May 8, 2014, the Company entered into a share repurchase plan, to acquire shares by way of redemption, in accordance with Rule 10b-18 and Rule 10b5-1 of the Securities Exchange Act of 1934.

The repurchase plan gave a broker authority to acquire the Company's ordinary shares from time to time on the open market or in privately negotiated transactions in accordance with agreed terms and limitations. The acquisition of shares pursuant to the repurchase plan is to be effected by way of redemption and cancellation of those shares, in accordance with the Memorandum & Articles of the Company.

The plan was designed to allow acquisitions by the broker during periods when the Company would ordinarily not be permitted to do so because it may be in possession of material non-public or price-sensitive information, applicable insider trading laws or self-imposed trading blackout periods. The Company's prior instructions to the broker in respect of these periods are irrevocable and the trading decisions in respect of the repurchase plan are at the discretion of the broker and will be made independently of, and uninfluenced by, the Company. The Company confirms that on entering the repurchase plan it had no material non-public, price-sensitive or inside information regarding the Company or its securities. Furthermore, the Company will not enter into additional plans whilst in possession of such information. The timing and actual number of shares repurchased by way of the redemption will be dependent on market conditions, legal and regulatory requirements and the other terms and limitations contained in the plans. In addition, acquisitions under the repurchase plan may be suspended or discontinued in certain circumstances in accordance with the agreed terms. Therefore, there can be no assurance as to the timing or number of shares that may be acquired under the repurchase plan.

During the three months ended June 30, 2014, 291,190 ordinary shares were redeemed by the Company under the repurchase plan for a total consideration of \$11.5 million. All ordinary shares that were redeemed under the repurchase plan are cancelled in accordance with the Memorandum & Articles of the Company and the nominal value of these shares transferred to a capital redemption reserve fund as required under Irish Company Law.

Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with the unaudited Condensed Consolidated Financial Statements and accompanying notes included elsewhere herein and the Consolidated Financial Statements and related notes thereto included in our Form 20-F for the year ended December 31, 2013. The Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States.

#### Overview

We are a contract research organization ("CRO"), providing outsourced development services on a global basis to the pharmaceutical, biotechnology and medical device industries. We specialize in the strategic development, management and analysis of programs that support all stages of the clinical development process - from compound selection to Phase I-IV clinical studies. Our vision is to be the Global CRO partner of choice in drug development by delivering best in class information, solutions and performance in clinical and outcomes research.

We believe that we are one of a select group of CRO's with the expertise and capability to conduct clinical trials in most major therapeutic areas on a global basis and have the operational flexibility to provide development services on a stand-alone basis or as part of an integrated "full service" solution. At June 30, 2014, we employed approximately 11,000 employees, in 83 locations in 38 countries. During the six months ended June 30, 2014 we derived approximately 39.8%, 49.4% and 10.8% of our net revenue in the United States, Europe and Rest of World, respectively.

Revenue consists primarily of fees earned under contracts with third-party clients. In most cases, a portion of the contract fee is paid at the time the study or trial is started, with the balance of the contract fee generally payable in installments over the study or trial duration, based on the achievement of certain performance targets or "milestones". Revenue from contracts is recognized on a proportional performance method based on the relationship between time incurred and the total estimated duration of the trial or on a fee-for-service basis according to the particular circumstances of the contract. As is customary in the CRO industry, we contract with third party investigators in connection with clinical trials. All investigator fees and certain other costs, where reimbursed by clients, are, in accordance with industry practice, deducted from gross revenue to arrive at net revenue. As these costs vary from contract to contract, we view net revenue as our primary measure of revenue growth.

As the nature of our business involves the management of projects having a typical duration of one to four years, the commencement or completion of projects in a fiscal year can have a material impact on revenues earned with the relevant clients in such years. In addition, as we typically work with some, but not all, divisions of a client, fluctuations in the number and status of available projects within such divisions can also have a material impact on revenues earned from such clients from year to year.

Termination or delay in the performance of an individual contract may occur for various reasons, including, but not limited to, unexpected or undesired results, production problems resulting in shortages of the drug, adverse patient reactions to the drug, the client's decision to de-emphasize a particular trial or inadequate patient enrolment or investigator recruitment. In the event of termination the Company is usually entitled to all sums owed for work performed through the notice of termination and certain costs associated with the termination of the study. In addition, contracts generally contain provisions for renegotiation in the event of changes in the scope, nature, duration, or volume of services of the contract.

Our backlog consists of potential net revenue yet to be earned from projects awarded by clients. At June 30, 2014 we had a backlog of approximately \$3.4 billion, compared with approximately \$3.1 billion at December 31, 2013. We believe that our backlog as of any date is not necessarily a meaningful predictor of future results, due to the potential for cancellation or delay of the projects underlying the backlog, and no assurances can be given on the extent to which we will be able to realize this backlog as net revenue.

Although we are domiciled in Ireland, we report our results in U.S. dollars. As a consequence the results of our non-U.S. based operations, when translated into U.S. dollars, could be materially affected by fluctuations in exchange rates between the U.S. dollar and the currencies of those operations.

In addition to translation exposures, we are also subject to transaction exposures because the currency in which contracts are priced can be different from the currencies in which costs relating to those contracts are incurred. Our operations in the United States are not materially exposed to such currency differences as the majority of our revenues and costs are in U.S. dollars. However, outside the United States the multinational nature of our activities means that contracts are usually priced in a single currency, most often U.S. dollars or euro, while costs arise in a number of currencies, depending, among other things, on which of our offices provide staff for the contract and the location of investigator sites. Although many such contracts benefit from some degree of natural hedging, due to the matching of contract revenues and costs in the same currency, where costs are incurred in currencies other than those in which contracts are priced, fluctuations in the relative value of those currencies could have a material effect on our results of operations. We regularly review our currency exposures and usually negotiate currency fluctuation clauses in our contracts which allow for price negotiation if changes in the relative value of those currencies exceed predetermined tolerances.

As we conduct operations on a global basis, our effective tax rate has depended and will depend on the geographic distribution of our revenue and earnings among locations with varying tax rates. Our results therefore may be affected by changes in the tax rates of the various jurisdictions. In particular, as the geographic mix of our results of operations among various tax jurisdictions changes, our effective tax rate may vary significantly from period to period.

## Results of Operations

For the three months ended June 30, 2014 we derived approximately 39.2%, 49.7% and 11.1% of our net revenue in the United States, Europe and Rest of World, respectively.

Net revenue in Ireland increased from \$69.3 million for the three months ended June 30, 2013 to \$88.7 million for the three months ended June 30, 2014. Net revenue in Ireland is principally a function of the Company's global transfer pricing model.

Direct costs for the period increased by \$13.0 million, or 6.0%, from \$214.2 million for the three months ended June 30, 2013 to \$227.2 million for the three months ended June 30, 2014. Direct costs consist primarily of compensation, associated fringe benefits and share based compensation expense for project-related employees and other direct project driven costs. The increase in direct costs during the period arose from an increase in headcount and a corresponding increase in personnel related expenditure of \$8.2 million and an increase in other direct project related costs of \$4.8 million. As a percentage of net revenue, direct costs have decreased from 64.1% for the three months ended June 30, 2013 to 60.4% for the three months ended June 30, 2014.

Selling, general and administrative expenses comprise primarily of compensation, related fringe benefits and share based compensation expense for non-project-related employees, recruitment expenditure, professional service costs, advertising costs and all costs related to facilities and information systems. The increase in selling, general and administrative expenses for the period arose primarily from an increase in personnel related expenditure of \$5.0 million, an increase in facilities and related costs expenditure of \$3.7 million and an increase in general and administrative expenses of \$1.4 million. Depreciation expense for the period increased by \$0.7 million, or 7.1%, from \$9.7 million for the three months ended June 30, 2013 to \$10.4 million for three months ended June 30, 2014 and principally arises from an investment in facilities, information systems and equipment to support the Company's growth. As a percentage of net revenue, depreciation expense remained at 2.8% of net revenues for the three months ended June 30, 2013 and for the three months ended June 30, 2014. Amortization expense represents the amortization of intangible assets acquired on business combinations. The increase in the amortization expense for the period relates to the Aptiv acquisition and a deemed amortization amount for intangibles until the purchase price allocation is finalised. As a percentage of net revenue, amortization expense increased from 0.6% of net revenues for the three months ended June 30, 2013 to 0.7% for the three months ended June 30, 2014.

(see note 4 Restructuring and other items for further information).

As a result of the above, income from operations for the three months increased by \$22.0 million, or 83.6%, from \$26.3 million for the three months ended June 30, 2013 (\$30.9 million excluding restructuring charges) to \$48.3 million for the three months ended June 30, 2014. #### Liquidity and Capital Resources

The CRO industry is generally not capital intensive. The Group's principal operating cash needs are payment of salaries, office rents, travel expenditures and payments to investigators. Investing activities primarily reflect capital expenditures for facilities and information systems enhancements, the purchase and sale of short term investments and

acquisitions.

Our clinical research and development contracts are generally fixed price with some variable components and range in duration from a few weeks to several years. Revenue from contracts is generally recognized as income on the basis of the relationship between time incurred and the total estimated contract duration or on a fee-for-service basis. The cash flow from contracts typically consists of a small down payment at the time the contract is entered into, with the balance paid in installments over the contract's duration, in some cases on the achievement of certain milestones. Accordingly, cash receipts do not correspond to costs incurred and revenue recognized on contracts.

The Company's cash and short term investment balances at June 30, 2014 amounted to \$175.4 million compared with cash and short term investment balances of \$320.8 million at December 31, 2013. The Company's cash and short term investment balances at June 30, 2014 comprised cash and cash equivalents \$81.3 million and short-term investments \$94.1 million. The Company's cash and short-term investment balances at December 31, 2013 comprised cash and cash equivalents \$182.5 million and short-term investments \$138.3 million. During the three months ended June 30, 2014, ICON plc closed the acquisition of Aptiv resulting in a cash outflow totalling \$121.1 million.

On June 30, 2014 the Company entered into a five year committed multi currency revolving credit facility for \$100.0 million with Citibank, JP Morgan, Santander and Barclays Bank. Each bank subject to the agreement has committed \$25 million to the facility, with equal terms and conditions in place with all institutions. The facility bears interest at LIBOR plus a margin and includes certain composite guarantees, indemnities and pledges in favor of the banks. Amounts available to the Group under the facility amounted to \$100.0 million at June 30, 2014.

Net cash used in operating activities was \$16.3 million for the six months ended June 30, 2014 compared with cash provided by operating activities of \$80.2 million for the six months ended June 30, 2013. The most significant influence on our operating cash flow is revenue outstanding, which comprises accounts receivable and unbilled revenue, less payments on account which totalled \$61.0 million of the \$16.3 million cash used in operating activities. The dollar value of these balances and the related number of days revenue outstanding (i.e. revenue outstanding as a percentage of revenue for the period, multiplied by the number of days in the period) can vary over a study or trial duration. Contract fees are generally payable in installments based on the achievement of certain performance targets or “milestones” (e.g. target patient enrollment rates, clinical testing sites initiated or case report forms completed), such milestones being specific to the terms of each individual contract, while revenues on contracts are recognized as contractual obligations are performed. Days revenue outstanding can vary therefore due to, amongst others, the scheduling of contractual milestones over a study or trial duration, the achievement of a particular milestone during the period or the timing of cash receipts from customers. A decrease in the number of days revenue outstanding during a period will result in cash inflows to the Company while an increase in days revenue outstanding will lead to cash outflows. The number of days revenue outstanding at June 30, 2014 was 40 days compared to 32 days at December 31, 2013. The number of days revenue outstanding at June 30, 2013 was 33 days compared to 40 days at December 31, 2012. In addition, in line with company policy, bonuses were paid during the second quarter which also contributed to the cash outflow.

Net cash used in investing activities was \$86.0 million for the six months ended June 30, 2014 compared to net cash used in investing activities of \$104.5 million for the six months ended June 30, 2013. Net cash used in the six months ended June 30, 2014 arose principally from cash paid on the purchase of subsidiary undertakings.

Amounts payable at June 30, 2014 in relation to acquisitions include \$3.2 million payable contingent upon the results of BeijingWits Medical.

Capital expenditure for the six months ended June 30, 2014 amounted to \$13.0 million and comprised mainly of expenditure on global infrastructure and information technology systems to support the Company’s growth. Net cash provided by financing activities during the six months ended June 30, 2014 amounted to \$1.4 million compared with net cash provided by financing activities of \$10.7 million for the six months ended June 30, 2013. Net cash provided by financing activities during the six months ended June 30, 2014 arose primarily from the \$12.3 million received from the exercise of stock options. This was offset by cash paid amounting to \$11.5 million to repurchase shares under the Company’s share repurchase plans (see Note 8 Share Capital for further information). Net cash provided by financing activities during the six months ended June 30, 2013 arose primarily from the \$10.5 million received from the exercise of stock options.
