#### **Table of Contents**

Unless otherwise indicated, references to "we," "us," "our," "Company," or "TD Ameritrade" mean TD Ameritrade Holding Corporation and its subsidiaries, and references to "fiscal" mean the Company's fiscal year ended September 30. References to the "parent company" mean TD Ameritrade Holding Corporation.

PART I

Item 1. Business

Form of Organization

The Company was established in 1971 as a local investment banking firm and began operations as a retail discount securities brokerage firm in 1975. The parent company is a Delaware corporation.

#### Operations

We are a leading provider of securities brokerage services and related technology-based financial services to retail investors, traders and independent registered investment advisors ("RIAs"). We provide our services predominantly through the Internet, a national branch network and relationships with RIAs. We believe that our services appeal to a broad market of independent, value-conscious retail investors, traders and investment advisors. We use our platform to offer brokerage services to retail investors and investment advisors under a simple, low-cost commission structure. We have been an innovator in electronic brokerage services since entering the retail securities brokerage business in 1975. We believe that we were the first brokerage firm to offer the following products and services to retail clients: touch-tone trading; trading over the Internet; unlimited, streaming, free real-time quotes; extended trading hours; direct access to market destinations; and commitment on the speed of order execution. Since initiating online trading, we have substantially increased our number of brokerage accounts, number of RIA relationships, average daily trading volume and total assets in client accounts. We have also built, and continue to invest in, a proprietary trade processing platform that is both cost-efficient and highly scalable, significantly lowering our operating costs per trade. In addition, we have made significant investments in building the TD Ameritrade brand.

We intend to capitalize on the growth and consolidation of the retail brokerage industry in the United States and leverage our low-cost infrastructure to grow our market share and profitability. Our long-term growth strategy is to increase our market share of total assets in client accounts, while maintaining a leadership position in client trading, by providing superior offerings to long-term investors, RIAs and active traders. We strive to enhance the client experience by providing asset management products and services, enhanced trading tools and capabilities and a superior, proprietary, single-platform system to support RIAs. The key elements of our strategy are as follows: Focus on brokerage services. We continue to focus on attracting active traders, long-term investors and RIAs to our brokerage services. This focused strategy is designed to enable us to maintain our low operating cost structure while offering our clients outstanding products and services. We primarily route for execution of client trades on an agency, rather than a principal, basis. We maintain only a small inventory of fixed income securities to meet client requirements.

Provide a comprehensive long-term investor solution. We continue to expand our suite of diversified investment products and services to best serve investors' needs. We help clients make investment decisions by providing simple-to-use investment tools, guidance, education and objective third-party research.

Maintain industry leadership and market share with active traders. We help active traders make better-informed investment decisions by offering fast access to markets, insight into market trends and innovative tools such as strategy back-testing and comprehensive options research and trading capabilities.

Continue to be a leader in the RIA industry. We provide RIAs with comprehensive brokerage and custody services supported by our robust integrated technology platform, customized personal service and practice management solutions.

#### **Table of Contents**

Leverage our infrastructure to add incremental revenue. Through our proprietary technology, we are able to provide a robust online experience for long-term investors and active traders. Our low-cost, scalable systems provide speed, reliability and quality trade execution services for clients. The scalable capacity of our trading system allows us to add a significant number of transactions while incurring minimal additional fixed costs.

Continue to be a low-cost provider of quality services. We achieve low operating costs per trade by creating economies of scale, utilizing our proprietary transaction-processing systems, continuing to automate processes and locating much of our operations in low-cost geographical areas. This low fixed-cost infrastructure provides us with significant financial flexibility. In addition, our insured deposit account arrangement with The Toronto-Dominion Bank ("TD") enables our clients to invest in an FDIC-insured deposit product without the need for the Company to establish the significant levels of capital that would be required to maintain our own bank charter.

Continue to differentiate our offerings through innovative technologies and service enhancements. We have been an innovator in our industry for over 40 years. We continually strive to provide our clients with the ability to customize their trading experience. We provide our clients greater choice by offering features and functionality to meet their specific needs.

We continue to see increased demand for advice, particularly as our clients approach retirement. To address this need we are building out a full continuum of advice products ranging from an automated investing product to a customized portfolio advice solution.

Leverage the TD Ameritrade brand. We believe that we have a superior brand identity and that our advertising has established TD Ameritrade as a leading brand in the retail brokerage market.

Continue to evaluate opportunities for growth through acquisitions. When evaluating potential acquisitions,
we look for transactions that will give us operational leverage, technological leverage, increased market share or other strategic opportunities.

Planned Acquisition of Scottrade Financial Services, Inc.

On October 24, 2016, we entered into an Agreement and Plan of Merger with Scottrade Financial Services, Inc. ("Scottrade"), a Delaware corporation, Rodger O. Riney, as Voting Trustee of the Rodger O. Riney Family Voting Trust U/A/D 12/31/2012, and Alto Acquisition Corp., a Delaware corporation and a wholly-owned subsidiary of the Company, pursuant to which we agreed to acquire Scottrade in a cash and equity transaction valued at \$4 billion. The transaction will take place in two, consecutive steps. First, and as a condition precedent to our acquisition of Scottrade, TD will purchase Scottrade Bank from Scottrade for \$1.3 billion in cash, subject to closing adjustments. Under the terms of the planned acquisition, Scottrade Bank will merge with and into TD Bank, N.A., an indirect wholly-owned subsidiary of TD. Additionally, we expect TD to purchase \$400 million in new common equity, or approximately 11 million shares, from us in connection with the planned transaction. Immediately following TD's acquisition of Scottrade Bank, we will acquire Scottrade for \$4 billion less the proceeds from the sale of Scottrade Bank, which is subject to closing adjustments. We intend to fund the acquisition of Scottrade with \$1 billion in new common equity, or approximately 28 million shares, issued to Scottrade shareholders, cash on hand, proceeds from the sale of our common stock to TD, as described above, and debt financing. The transaction is subject to regulatory approvals and customary closing conditions and is expected to close by September 30, 2017. Following the transaction's close, Scottrade Founder and CEO, Rodger Riney, will be appointed to our board of directors. Client Offerings

We deliver products and services aimed at providing a comprehensive, personalized experience for active traders, long-term investors and independent RIAs. Our client offerings are described below:

Trading and Investing Platforms

tdameritrade.com Web Platform is our core offering for self-directed retail investors. We offer a broad array of tools and services, including alerts, screeners, conditional orders and free fundamental third-party research. The Dock is an ever-present dashboard of streaming content that makes it easy for clients to stay on top of current market activities relevant to their investment positions. Modules such as streaming news, stock

#### **Table of Contents**

events, and account balances ensure clients stay well informed. Free planning tools are also provided, such as Portfolio Planner to efficiently create a bundle of securities to trade, invest and rebalance and Retirement Planner to assess retirement needs. Social Signals is a one of a kind trading resource that pulls insights from Twitter and compiles them in one place.

Trade Architect® is a powerful and intuitive web-based platform that helps active investors and traders identify opportunities and stay informed. It includes advanced features such as complex options, Level II equity and option quotes, streaming news from CNBC, free research reports from sources such as S&P Capital IQ, visual position profit/loss analysis and Trade Finder, a tool that simplifies the process of identifying and making option trades based on the client's strategy.

thinkorswim<sup>®</sup> is a downloadable desktop platform designed for advanced traders, featuring easy-to-use interfaces, elite-level trading and analytical tools, and fast and efficient order routing for complex trading strategies. thinkorswim clients trade a broad range of products including stock and stock options, index options, futures and futures options, foreign exchange and exchange-traded funds ("ETFs").

TD Ameritrade Mobile allows on-the-go investors and traders to trade and monitor accounts from web-enabled mobile devices with features such as alerts, research, streaming market commentary and the ability to deposit a check directly from a smartphone or tablet. With a mobile device, a client can snap a picture of a bar code on any item, and if the company is publicly traded, Snapstock™an return the company name, ticker symbol and a stock quote along with company-related news and charts. Access is available through the TD Ameritrade Mobile App, the more advanced TD Ameritrade Mobile Trader App or via a mobile browser at the TD Ameritrade Mobile Site.

TD Ameritrade Institutional is a leading provider of comprehensive brokerage and custody services to more than 5,000 independent RIAs and their clients. Our advanced technology platform, coupled with personal support from our dedicated service teams, allows RIAs to grow and manage their practices more effectively and efficiently while optimizing time with clients. Additionally, TD Ameritrade Institutional provides a robust offering of products, programs and services. These services are all designed to help advisors build their businesses and do the best possible job they can to help their clients with their financial goals.

#### Other Offerings

Investools® offers a comprehensive suite of investor education products and services for stock, option, foreign exchange, futures, mutual fund and fixed-income investors. Our education subsidiary, Investools, Inc., offers educational products and services primarily built around an investing method that is designed to teach both experienced and beginning investors how to approach the selection process for investment securities and actively manage their investment portfolios. Course offerings are generally combined with web-based tools, personalized instruction techniques and ongoing service and support and are offered in a variety of learning formats. Designed for the advanced student, continuing education programs offer students comprehensive access to education products and services priced either individually or on a bundled basis. Typically included in the continuing education bundles are additional curriculum, online courses, live workshops and coaching services.

TD Ameritrade's Goal Planning sessions are a complimentary service where clients meet with an investment consultant and develop an investment plan, based on a variety of factors including personal goals, time to achieve goal, risk tolerance, assets and net worth. Clients learn how likely they are to achieve their goals and how hypothetical changes to their decisions could influence their plan.

Amerivest® is an advisory service that develops portfolios of ETFs or mutual funds, along with cash and cash alternatives, to help long-term investors pursue their financial goals. Our subsidiary, Amerivest Investment Management, LLC, recommends an investment portfolio based on an investor's objective, time horizon and risk tolerance.

AdvisorDirect® is a national referral service for investors who wish to engage the services of an independent RIA. AdvisorDirect refers interested investors to one or more independent RIAs that are unaffiliated with TD Ameritrade and that offer investment management and/or financial planning services to investors served by TD Ameritrade's branch offices. We strive to have all RIAs participating in AdvisorDirect meet or exceed TD Ameritrade's professional eligibility requirements.

#### **Table of Contents**

TD Ameritrade Corporate Services provides self-directed brokerage services to employees of corporations, either directly in partnership with the employer or through joint marketing relationships with third-party administrators, such as 401(k) providers and employee benefit consultants. Trust and custody services are also offered to a wide range of plan types through our TD Ameritrade Trust Company subsidiary.

**Products and Services** 

We strive to provide the best value of retail brokerage services to our clients. The products and services available to our clients include:

Common and preferred stock. Clients can purchase common and preferred stocks, American Depository Receipts and closed-end funds traded on any United States exchange or quotation system.

Exchange-Traded Funds. ETFs are baskets of securities (stocks or bonds) that typically track recognized indices. They are similar to mutual funds, except that they trade on an exchange like stocks. Our ETF Market Center offers our clients over 100 commission-free ETFs, each of which has been selected by independent experts at Morningstar Associates, LLC. Trades in these ETFs are commission-free, provided the funds are held for 30 days or longer. Our website includes an ETF screener, along with independent research and commentary to assist investors in their decision-making.

Options. We offer a full range of option trades, including complex and multi-leg option strategies.

Futures. We offer futures trades, as well as options on futures, in a wide variety of commodities, stock indices and currencies.

Foreign exchange. We offer access to trading in over 75 different currency pairs.

Mutual funds. Clients can compare and select from a portfolio of over 13,000 mutual funds from leading fund families, including a broad range of no-transaction-fee ("NTF") funds. Clients can also easily exchange funds within the same mutual fund family.

Fixed income. We offer our clients access to a variety of Treasury, corporate, government agency and municipal bonds, as well as certificates of deposit.

New and secondary issue securities. We offer primary and secondary offerings of fixed income securities, closed-end funds, common stock and preferred stock.

Margin lending. We extend credit to clients that maintain margin accounts. Portfolio margin, which bases margin requirements on the net exposure of all positions in an account rather than just on individual positions, is also available for accounts with net liquidating values of at least \$125,000.

Cash management services. Through third-party banking relationships, we offer FDIC-insured deposit accounts and money market mutual funds to our clients as cash sweep alternatives. Through these relationships, we also offer free standard checking, free online bill pay and ATM services with unlimited ATM fee reimbursements at any machine nationwide.

Annuities. We offer access to a full range of competitively priced fixed and variable annuities provided by highly-rated insurance carriers.

#### **Table of Contents**

We earn commissions and transaction fees on client trades in common and preferred stock, ETFs, closed-end funds, options, futures, foreign exchange, mutual funds and fixed income securities. Margin lending and the related securities lending business generate net interest revenue. Cash management services and fee-based mutual funds generate insured deposit account fees and investment product fee revenues. Other revenues include revenue from education services, miscellaneous securities brokerage fees and annuities. The following table presents the percentage of net revenues contributed by each class of similar services during the last three fiscal years:

	Percentage of Net Revenues					
	Fiscal	Yea	r Ended	Sep	otember	30,
Class of Service	2016		2015		2014	
Commissions and transaction fees	41.2	%	43.1	%	43.2	%
Insured deposit account fees	27.8	%	25.8	%	26.3	%
Net interest revenue	17.9	%	19.2	%	18.6	%
Investment product fees	11.3	%	10.3	%	9.9	%
Other revenues	1.8	%	1.6	%	2.0	%
Net revenues	100.0	%	100.0	%	100.0	%

We provide our clients with an array of channels to access our products and services. These include the Internet, our network of retail branches, mobile trading applications, interactive voice response and registered representatives via telephone.

## Client Service and Support

We strive to provide the best client service in the industry as measured by: (1) speed of response time to telephone calls, (2) turnaround time responding to client inquiries and (3) client satisfaction with the account relationship. We endeavor to optimize our client service by:

Ensuring prompt response to client service calls through adequate staffing with properly trained and motivated personnel in our client service departments, a majority of whom hold the Series 7 license;

•Tailoring client service to the particular expectations of the clients of each of our client segments; and Expanding our use of technology to provide automated responses to the most typical inquiries generated in the course of clients' securities trading and related activities.

We provide access to client service and support through the following means:

Websites. Our websites provide basic information on how to use our services, as well as an in-depth education center that includes a selection of online investing courses. "Ted," our Virtual Investment Consultant, is a web tool that allows retail clients to interact with a virtual representative to ask about our products, tools and services.

Branches. We offer a nationwide network of over 100 retail branches, located primarily in large metropolitan areas. Email. Clients are encouraged to use email to contact our client service representatives. Our operating standards require a response within 24 hours of receipt of the email; however, we strive to respond within four hours after receiving the original message.

Telephone. For clients who choose to call or whose inquiries necessitate calling one of our client service representatives, we provide a toll-free number that connects to advanced call handling systems. These systems provide automated answering and directing of calls to the proper department. Our systems also allow linkage between caller identification and the client database to give the client service representative immediate access to the client's account data when the call is received. Client service representatives are available 24 hours a day, seven days a week.

#### **Table of Contents**

• Mobile app. Support on our TD Ameritrade Mobile Trader App allows clients to text with a trading specialist for immediate answers to their questions or share their screen for help with navigating the app.

Technology and Information Systems

Our technological capabilities and systems are central to our business and are critical to our goal of providing the best execution at the best value to our clients. Our operations require reliable, scalable systems that can handle complex financial transactions for our clients with speed and accuracy. We maintain sophisticated and proprietary technology that automates traditionally labor-intensive securities transactions. Our ability to effectively leverage and adopt new technology to improve our services is a key component of our success.

We continue to make investments in technology and information systems. We have spent a significant amount of resources to increase capacity and improve speed, reliability and security. To provide for system continuity during potential power outages, we have equipped our data centers with uninterruptible power supply units and back-up generators.

Advertising and Marketing

We intend to continue to grow and increase our market share by advertising online, on television, in print and email and on our own websites, and utilizing various forms of social media. We invest heavily in advertising programs designed to bring greater brand recognition to our services. We intend to continue to aggressively advertise our services. From time to time, we may choose to increase our advertising to target specific groups of investors or to decrease advertising in response to market conditions.

Advertising for retail clients is generally conducted through websites, social media, financial news networks and other television and cable networks. We also place print advertisements in a broad range of business publications and use email advertising. Advertising for institutional clients is significantly less than for retail clients and is generally conducted through highly-targeted media.

To monitor the success of our various marketing efforts, we utilize a media mix model that uses robust data sets to analyze our marketing channels and identify high value client segments. This model also supports decisions on spending levels and helps us determine the point at which we begin to experience diminishing returns. Additionally, our advanced data and analytics capabilities enable a more targeted, personalized experience for prospective clients. How we share client information is disclosed in our privacy statement.

All of our securities brokerage-related communications with the public are regulated by the Financial Industry Regulatory Authority ("FINRA"). All of our futures and foreign exchange brokerage-related communications with the public are regulated by the National Futures Association ("NFA").

**Clearing Operations** 

Our subsidiary, TD Ameritrade Clearing, Inc. ("TDAC"), provides clearing and execution services to our introducing broker-dealer subsidiary. Clearing services include the confirmation, receipt, settlement, delivery and record-keeping functions involved in processing securities transactions. Our clearing broker-dealer subsidiary provides the following back office functions:

Maintaining client accounts;

- Extending credit in a margin account to the
- client:

Engaging in securities lending and borrowing transactions;

Settling securities transactions with clearinghouses such as The Depository Trust & Clearing Corporation and The Options Clearing Corporation;

Settling commissions and transaction fees;

Preparing client trade confirmations and statements;

Performing designated cashiering functions, including the delivery and receipt of funds and securities to or from the client;

#### **Table of Contents**

Possession, control and safeguarding of funds and securities in client accounts;

Processing cash sweep transactions to and from insured deposit accounts and money market mutual funds;

Transmitting tax accounting information to the client and to the applicable tax authority; and

Forwarding prospectuses, proxy materials and other shareholder information to clients.

We contract with external providers for futures clearing. We also contract with an external provider to facilitate foreign exchange trading for our clients.

## Competition

We believe that the principal determinants of success in the retail brokerage market are brand recognition, size of client base and client assets, ability to attract new clients and client assets, client trading activity, efficiency of operations, technology infrastructure and access to financial resources. We also believe that the principal factors considered by clients in choosing a brokerage firm are reputation, client service quality, price, convenience, product offerings, quality of trade execution, platform capabilities, innovation and overall value. Based on our experience, focus group research and the success we have enjoyed to date, we believe that we presently compete successfully in each of these categories.

The market for brokerage services, particularly electronic brokerage services, continues to evolve and is highly competitive. We experience significant competition and expect this competitive environment to continue. We encounter direct competition from numerous other brokerage firms, many of which provide online brokerage services. These competitors include E\*TRADE Financial Corporation, The Charles Schwab Corporation and Fidelity Investments. Scottrade is also a competitor, but we have agreed to acquire Scottrade. For further information about the Scottrade acquisition, please see "Planned Acquisition of Scottrade Financial Services, Inc." above. We also encounter competition from established full-commission brokerage firms such as Merrill Lynch and Morgan Stanley, as well as financial institutions, mutual fund sponsors, online wealth management services and other organizations, some of which provide online brokerage services.

#### Regulation

The securities, futures and foreign exchange industries are subject to extensive regulation under federal and state law. Broker-dealers are required to register with the U.S. Securities and Exchange Commission ("SEC") and to be members of FINRA. Our futures commission merchant ("FCM") and forex dealer member ("FDM") subsidiary, TD Ameritrade Futures & Forex LLC ("TDAFF"), is registered with the Commodity Futures Trading Commission ("CFTC") and is a member of, and the corresponding services functions are regulated by, the NFA. Our broker-dealer subsidiaries are subject to the requirements of the Securities Exchange Act of 1934 (the "Exchange Act") relating to broker-dealers, including, among other things, minimum net capital requirements under the SEC Uniform Net Capital Rule (Rule 15c3-1), "best execution" requirements for client trades under SEC guidelines and FINRA rules and segregation of client funds under the SEC Customer Protection Rule (Rule 15c3-3), administered by the SEC and FINRA. TDAFF is subject to regulations under the Commodity Exchange Act, administered by the CFTC and NFA, including CFTC Regulations 1.17 and 5.7, which require the maintenance of minimum adjusted net capital, and CFTC Regulation 1.20, which requires segregation of client funds.

Net capital rules are designed to protect clients, counterparties and creditors by requiring a broker-dealer, an FCM or an FDM to have sufficient liquid resources available to satisfy its financial obligations. Net capital is a measure of a broker-dealer's, an FCM's or an FDM's readily available liquid assets, reduced by its total liabilities other than approved subordinated debt. Under the Uniform Net Capital Rule, a broker-dealer may not repay any subordinated borrowings, pay cash dividends or make any unsecured advances or loans to its parent company or employees if such payment would result in a net capital amount below required levels. An FCM and FDM, such as TDAFF, must provide notice to the CFTC if its adjusted net capital amounts are below required levels.

As explained in SEC guidelines and FINRA rules, brokers are required to seek the "best execution" reasonably available for their clients' orders. In part, this requires brokers to use reasonable diligence so that the price to the client is as favorable as possible under prevailing market conditions. We send client orders to a number of market centers, including market makers and exchanges, which encourages competition and ensures redundancy. We utilize a committee structure to conduct regular reviews of the securities trade execution quality we obtain from these

#### **Table of Contents**

Risk Management

market centers. For non-directed client orders, it is our policy to route orders to market centers based on a number of factors that are more fully discussed in the Supplemental Materials of FINRA Rule 5310, including, where applicable, but not necessarily limited to, speed of execution, price improvement opportunities, differences in price disimprovement, likelihood of executions, the marketability of the order, size guarantees, service levels and support, the reliability of order handling systems, client needs and expectations, transaction costs and whether the firm will receive remuneration for routing order flow to such market centers. Price improvement is available under certain market conditions and for certain order types and we regularly monitor executions to test for such improvement if available. Each quarter we also publicly disclose on SEC Rule 606 Reports information about the market centers we use and the related order routing revenue we received. Our SEC Rule 606 Reports can be found at www.tdameritrade.com.

Certain of our subsidiaries are also registered as investment advisors under the Investment Advisers Act of 1940. We are also subject to regulation in all 50 states and the District of Columbia, including registration requirements. TD Ameritrade Trust Company is chartered in the state of Maine as a state-regulated non-depository trust company. In its capacity as a securities clearing firm, TDAC is a member of The Depository Trust & Clearing Corporation ("DTCC") and The Options Clearing Corporation ("OCC"), each of which is registered as a clearing agency with the SEC. As a member of these clearing agencies, TDAC is required to comply with the rules of such clearing agencies, including rules relating to possession or control of client funds and securities, margin lending and execution and settlement of transactions.

Margin lending activities are subject to limitations imposed by regulations of the Federal Reserve System and FINRA. In general, these regulations provide that, in the event of a significant decline in the value of securities collateralizing a margin account, we are required to obtain additional collateral from the borrower or liquidate security positions. We are subject to a number of state and federal laws applicable to companies conducting business on the Internet that address client privacy, system security and safeguarding practices and the use of client information. For additional, important information relating to government regulation, please review the information set forth under the heading "Risk Factors Relating to the Regulatory and Legislative Environment" in Item 1A — Risk Factors.

Our business activities expose us to various risks. Identifying and measuring our risks is critical to our ability to manage risk within acceptable tolerance levels in order to minimize the effect on our business, results of operations and financial condition.

Our management team is responsible for managing risk, and it is overseen by our board of directors, primarily through the board's Risk Committee. We use risk management processes and have policies and procedures for identifying, measuring and managing risks, including establishing threshold levels for our most significant risks. Our risk management, compliance, internal audit, and legal departments assist management in identifying and managing risks. Our management team's Enterprise Risk Committee ("ERC") is responsible for reviewing risk exposures and risk mitigation. Subcommittees of the ERC have been established to assist in identifying and managing specific areas of risk.

Our business exposes us to the following broad categories of risk:

Operational Risk — Operational risk is the risk of loss resulting from inadequate or failed internal processes or controls, human error or misconduct, systems and technology problems or from external events. It also involves compliance with regulatory and legal requirements. Operational risk is the most prevalent form of risk in our risk profile. We manage operational risk by establishing policies and procedures to accomplish timely and efficient processing, obtaining periodic internal control attestations from management and conducting internal audit reviews to evaluate the effectiveness of internal controls.

Market Risk — Market risk is the risk of loss resulting from adverse movements in market factors, such as asset prices, foreign exchange rates and interest rates. Our market risk related to asset prices is mitigated by our routing for execution of client trades primarily on an agency, rather than a principal, basis and our maintenance of

#### **Table of Contents**

only a small inventory of fixed-income securities to meet client requirements. Interest rate risk is our most prevalent form of market risk. For more information about our interest rate risk and how we manage it, see Item 7A — Ouantitative and Oualitative Disclosures About Market Risk.

Credit Risk — Credit risk is the risk of loss resulting from failure of obligors to honor their payments. Our exposure to credit risk mainly arises from client margin lending and leverage activities, securities lending activities and other counterparty credit risks. For more information about our credit risk and how we manage it, see Item 7A – Quantitative and Qualitative Disclosures About Market Risk.

Liquidity Risk — Liquidity risk is the risk of loss resulting from the inability to meet current and future cash flow needs. We actively monitor our liquidity position at the holding company and at the broker-dealer and FCM/FDM subsidiary levels. For more information, see Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources.

Strategic Risk — Strategic risk is the risk of loss arising from ineffective business strategies, improper implementation of business strategies, or lack of responsiveness to changes in the business and competitive environment. Our executive management is responsible for establishing an appropriate corporate strategy intended to create value for stockholders, clients and employees, with oversight by our board of directors. Our management is responsible for defining the priorities, initiatives and resources necessary to execute the strategic plan, the success of which is regularly evaluated by the board of directors.

Reputational Risk — Reputational risk is the risk arising from possible negative perceptions, whether true or not, of the Company among our clients, counterparties, stockholders, suppliers, employees and regulators. The potential for either enhancing or damaging our reputation is inherent in almost all aspects of business activity. We manage this risk through our commitment to a set of core values that emphasize and reward high standards of ethical behavior, maintaining a culture of compliance and by being responsive to client and regulatory requirements.

Risk is inherent in our business, and therefore, despite our efforts to manage risk, there can be no assurance that we will not sustain unexpected losses. For a discussion of the factors that could materially affect our business, financial condition or future results of operations, see Item 1A — Risk Factors.

#### **Intellectual Property Rights**

Our success and ability to compete are significantly dependent on our intellectual property. We rely on copyright, trade secret, trademark, domain name, patent and contract laws to protect our intellectual property and have utilized the various methods available to us, including filing applications for patents and trademark registrations with the United States Patent and Trademark Office and entering into written licenses and other technology agreements with third parties. Our patented and patent pending technologies include stock indexing and investor education technologies, as well as innovative trading and analysis tools. Our trademarks include both our primary brand, TD Ameritrade, as well as brands for other products and services. A substantial portion of our intellectual property is protected by trade secrets. The source and object code for our proprietary software is also protected using applicable methods of intellectual property protection and general protections afforded to confidential information. In addition, it is our policy to enter into confidentiality and intellectual property ownership agreements with our employees and confidentiality and noncompetition agreements with our independent contractors and business partners and to control access to and distribution of our intellectual property.

## **Employees**

As of September 30, 2016, we had 6,010 full-time equivalent employees. None of our employees is covered by a collective bargaining agreement. We believe that our relations with our employees are good. In fiscal 2016, we surveyed our employees and found that 87% responded favorably to questions designed to measure sustainable employee engagement. This score placed us in the "best in class" companies benchmark as measured by Willis Towers Watson for the fifth year in a row.

Financial Information about Segments and Geographic Areas

We primarily operate in the securities brokerage industry and have no other reportable segments. Substantially all of our revenues from external clients for the fiscal years ended September 30, 2016, 2015 and 2014 were derived from our operations in the United States.

#### Websites and Social Media Disclosure

From time to time, the Company may use its website and/or Twitter as distribution channels of material information. The Company's Code of Business Conduct and Ethics, financial data and other important information regarding the Company is routinely accessible through and posted on the Company's website at www.amtd.com and its Twitter account @TDAmeritradePR. We ask that interested parties visit or subscribe to newsfeeds at www.amtd.com/newsroom to automatically receive email alerts and other information, including the most up-to-date corporate financial information, presentation announcements, transcripts and archives. The website to access the Company's Twitter account is https://twitter.com/TDAmeritradePR. Website links provided in this report, although correct when published, may change in the future. We make available free of charge on our website at www.amtd.com/investor-relations/sec-filings/ our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports, as soon as reasonably practicable after we electronically file such material with or furnish it to the SEC. Our SEC filings are also available on the SEC's website at http://www.sec.gov/.

#### Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the following factors which could materially affect our business, financial condition or future results of operations. Although the risks described below are those that management believes are the most significant, these are not the only risks facing our company. Additional risks and uncertainties not currently known to us or that we currently do not deem to be material also may materially affect our business, financial condition or future results of operations.

## Risk Factors Relating to Our Business Operations

Economic conditions and other securities industry risks could adversely affect our business.

Substantially all of our revenues are derived from our securities brokerage business. Like other securities brokerage businesses, we are directly affected by economic and political conditions, broad trends in business and finance and changes in volume and price levels of securities transactions. Events in global financial markets in recent years resulted in substantial market volatility and increased client trading volume. However, any sustained downturn in general economic conditions or U.S. equity markets could result in reduced client trading volume and net revenues. For example, events such as the terrorist attacks in the United States on September 11, 2001 and the invasion of Iraq in 2003 resulted in periods of substantial market volatility and reductions in trading volume and net revenues. Severe market fluctuations or weak economic conditions could reduce our trading volume and net revenues and have a material adverse effect on our profitability.

We have exposure to interest rate risk.

As a fundamental part of our brokerage business, we invest in interest-earning assets and are obligated on interest-bearing liabilities. In addition, we earn fees on our FDIC-insured deposit account arrangement with TD Bank USA, N.A. and TD Bank N.A., which are subject to interest rate risk. During fiscal 2009, the Federal Open Market Committee reduced the federal funds target range to between 0% and 0.25%, where it remained until December 2015 when it was increased to between 0.25% and 0.50%. In addition, medium- to long-term interest rates have also decreased substantially since fiscal 2009. This lower interest rate environment has compressed our net interest spread and reduced our spread-based revenues. It has also resulted in us voluntarily waiving fees on certain money market mutual funds in order to prevent our clients' yields on such funds from becoming negative.

Changes in interest rates could affect the interest earned on assets differently than interest paid on liabilities. A rising interest rate environment generally results in our earning a larger net interest spread. Conversely, a falling interest rate environment generally results in our earning a smaller net interest spread. Our most prevalent form of interest rate risk is referred to as "gap" risk. This risk occurs when the interest rates we earn on our assets change at a different frequency or amount than the interest rates we pay on our liabilities. For example, in the current low interest rate environment, sharp increases in short-term interest rates could result in net interest spread compression if the yields paid on interest-bearing client balances were to increase faster than our earnings on interest-earning assets. If we are unable to effectively manage our interest rate risk, changes in interest rates could have a material adverse effect on our profitability.

#### **Table of Contents**

Our brokerage operations have exposure to liquidity risk.

Maintaining adequate liquidity is crucial to our brokerage operations, including key functions such as transaction settlement and margin lending. We are subject to cash deposit and collateral requirements with clearinghouses such as the DTCC and the OCC, which may fluctuate significantly from time to time based on the nature and size of our clients' trading activity. Our liquidity needs to support interest-earning assets are primarily met by client cash balances or financing created from our securities lending activities. A reduction of funds available from these sources may require us to seek other potentially more expensive forms of financing, such as borrowings on our revolving credit facilities. Our liquidity could be constrained if we are unable to obtain financing on acceptable terms, or at all, due to a variety of unforeseen market disruptions. Inability to meet our funding needs on a timely basis would have a material adverse effect on our business.

We are exposed to credit risk with clients and counterparties.

We extend margin credit and leverage to clients, which are collateralized by client cash and securities. We also borrow and lend securities in connection with our broker-dealer business. A significant portion of our net revenues is derived from interest on margin loans. By permitting clients to purchase securities on margin and exercise leverage with options and futures positions, we are subject to risks inherent in extending credit, especially during periods of rapidly declining markets in which the value of the collateral held by us could fall below the amount of a client's indebtedness. In addition, in accordance with regulatory guidelines, we collateralize borrowings of securities by depositing cash or securities with lenders. Sharp changes in market values of substantial amounts of securities and the failure by parties to the borrowing transactions to honor their commitments could have a material adverse effect on our revenues and profitability.

Our clearing operations expose us to liability for errors in clearing functions.

Our broker-dealer subsidiary, TDAC, provides clearing and execution services to our introducing broker-dealer subsidiary. Clearing and execution services include the confirmation, receipt, settlement and delivery functions involved in securities transactions. Clearing brokers also assume direct responsibility for the possession or control of client securities and other assets and the clearing of client securities transactions. However, clearing brokers also must rely on third-party clearing organizations, such as the DTCC and the OCC, in settling client securities transactions. Clearing securities firms, such as TDAC, are subject to substantially more regulatory control and examination than introducing brokers that rely on others to perform clearing functions. Errors in performing clearing functions, including clerical and other errors related to the handling of funds and securities held by us on behalf of clients, could lead to regulatory fines and civil penalties as well as losses and liability in related legal proceedings brought by clients and others.

Systems failures, delays and capacity constraints could harm our business.

We receive and process trade orders through a variety of electronic channels, including the Internet, mobile trading applications and our interactive voice response system. These methods of trading are heavily dependent on the integrity of the electronic systems supporting them. Our systems and operations are vulnerable to damage or interruption from human error, natural disasters, power loss, computer viruses, distributed denial of service ("DDOS") attacks, spurious spam attacks, intentional acts of vandalism and similar events. It could take several hours or more to restore full functionality following any of these events. Extraordinary trading volumes could cause our computer systems to operate at an unacceptably slow speed or even fail. Extraordinary Internet traffic caused by DDOS, spam attacks or extreme market volatility could cause our website or other trading applications to be unavailable or slow to respond. While we have made significant investments to upgrade the reliability and scalability of our systems and added hardware to address extraordinary Internet traffic, there can be no assurance that our systems will be sufficient to handle such extraordinary circumstances. Slowness or unavailability may not impact all trading channels evenly, and some trading channels may be impacted while others are not. Social media and media reports may conflate one channel being unavailable with all channels being unavailable. We may not be able to project accurately the rate, timing or cost of any increases in our business or to expand and upgrade our systems and infrastructure to accommodate any increases in a timely manner. Systems failures and delays could occur and could cause, among other things, unanticipated disruptions in service to our clients, slower system response time resulting in transactions not being processed as quickly as our clients desire, decreased levels of client service and

#### **Table of Contents**

client satisfaction and harm to our reputation. The occurrence of any of these events could have a material adverse effect on our business, results of operations and financial condition.

Failure to protect client data or prevent breaches of our information systems could expose us to liability or reputational damage.

We are dependent on information technology networks and systems to securely process, transmit and store electronic information and to communicate among our locations and with our clients and vendors. As the breadth and complexity of this infrastructure continue to grow, the potential risk of security breaches and cyber-attacks increases. As a financial services company, we are continuously subject to cyber-attacks by third parties. Such breaches could lead to shutdowns or disruptions of our systems and potential unauthorized disclosure of confidential information. In addition, vulnerabilities of our external service providers and other third parties could pose security risks to client information. The secure transmission of confidential information over public networks is also a critical element of our operations.

We, along with the financial services industry in general, have experienced losses related to clients' login and password information being compromised, generally caused by attacks capturing credentials directly from clients themselves, through phishing attacks, clients' use of non-secure public computers or vulnerabilities of clients' private computers and mobile devices. In 2007, we discovered and eliminated unauthorized code from our computer systems that had allowed an unauthorized third party to retrieve client email addresses, names, addresses and phone numbers from an internal database. Following the incident, the Company incurred significant remediation costs. We are aware of subsequent attempts by other attackers to penetrate our systems using similar techniques and similar attacks against other financial institutions. If a similar incident were to occur, we could suffer damage to our reputation and incur significant remediation costs and losses.

In providing services to clients, we manage, utilize and store sensitive and confidential client data, including personal data. As a result, we are subject to numerous laws and regulations designed to protect this information, such as U.S. federal and state laws and foreign regulations governing the protection of personally identifiable information. These laws and regulations are increasing in complexity and number, change frequently and sometimes conflict. If any person, including any of our employees, negligently disregards or intentionally breaches our established controls with respect to client data, or otherwise mismanages or misappropriates that data, we could be subject to significant monetary damages, regulatory enforcement actions, fines and/or criminal prosecution in one or more jurisdictions. Unauthorized disclosure of sensitive or confidential client data, whether through systems failure, employee negligence, fraud or misappropriation, could damage our reputation and cause us to lose clients. Similarly, unauthorized access to or through our information systems, whether by our employees or third parties, including a cyber-attack by third parties who may deploy viruses, worms or other malicious software programs, could result in negative publicity, significant remediation costs, legal liability, financial responsibility under our security guarantee to reimburse clients for losses resulting from unauthorized activity in their accounts and damage to our reputation and could have a material adverse effect on our results of operations. In addition, our liability insurance might not be sufficient in type or amount to cover us against claims related to security breaches, cyber-attacks and other related breaches.

Aggressive competition could reduce our market share and harm our financial performance.

The market for electronic brokerage services is continually evolving and is intensely competitive. The retail brokerage industry has experienced significant consolidation, which may continue in the future, and which may increase competitive pressures in the industry. Consolidation could enable other firms to offer a broader range of products and services than we do, or offer them at lower prices. There has been aggressive price competition in the industry, including various free trade offers. We expect this competitive environment to continue in the future. We face direct competition from numerous retail brokerage firms, including E\*TRADE Financial Corporation, The Charles Schwab Corporation and Fidelity Investments. Scottrade is also a competitor, but we have agreed to acquire Scottrade. We also encounter competition from the broker-dealer affiliates of established full-commission brokerage firms, such as Merrill Lynch and Morgan Stanley, as well as from financial institutions, mutual fund sponsors, online wealth management services and other organizations, some of which provide online brokerage services. Some of our competitors have greater financial, technical, marketing and other resources, offer a wider range of services and

financial products, and have greater name recognition and a more extensive client base than we do. We believe that the general financial success of companies within the retail securities industry will continue to attract new competitors

#### **Table of Contents**

to the industry, such as banks, software development companies, insurance companies, providers of online financial information and others. These companies may provide a more comprehensive suite of services than we do or offer services at lower prices. Increased competition, including pricing pressure, could have a material adverse effect on our results of operations and financial condition.

We will need to introduce new products and services and enhance existing products and services to remain competitive.

Our future success depends in part on our ability to develop and enhance our products and services. In addition, the adoption of new Internet, networking or telecommunications technologies or other technological changes could require us to incur substantial expenditures to enhance or adapt our services or infrastructure.

There are significant technical and financial costs and risks in the development of new or enhanced products and services, including the risk that we might be unable to effectively use new technologies, adapt our services to emerging industry standards or develop, introduce and market enhanced or new products and services. An inability to develop new products and services, or enhance existing offerings, could have a material adverse effect on our profitability.

Advisory services subject us to additional risks.

We provide investment advisory services to investors through our SEC-registered investment advisors, TD Ameritrade, Inc., Amerivest Investment Management, LLC ("Amerivest") and TradeWise Advisors, Inc. ("TradeWise"). TD Ameritrade, Inc. offers AdvisorDirect,® a service that refers a client to an independent RIA. Amerivest® is an online advisory service that develops portfolios of ETFs or mutual funds, along with cash and cash alternatives, to help long-term investors pursue their financial goals. TradeWise provides an option advisory service for self-directed investors. The risks associated with these investment advisory activities include those arising from possible conflicts of interest, unsuitable investment recommendations, inadequate due diligence, inadequate disclosure and fraud. Realization of these risks could lead to liability for client losses, regulatory fines, civil penalties and harm to our reputation and business.

We rely on external service providers to perform certain key functions.

We rely on a number of external service providers for certain key technology, processing, service and support functions. These include the services of other broker-dealers, market makers, exchanges and clearinghouses to execute and settle client orders. We contract with external providers for futures and foreign exchange clearing. External content providers provide us with financial information, market news, charts, option and stock quotes, research reports and other fundamental data that we offer to clients. These service providers face technological, operational and security risks of their own. Any significant failures by them, including improper use or disclosure of our confidential client, employee or company information, could interrupt our business, cause us to incur losses and harm our reputation.

We cannot assure that any external service providers will be able to continue to provide these services to meet our current needs in an efficient, cost-effective manner or that they will be able to adequately expand their services to meet our needs in the future. Some external service providers have assets that are important to the services they provide us located outside the United States, and their ability to provide these services is subject to risks from unfavorable political, economic, legal or other developments, such as social or political instability, changes in governmental policies or changes in laws and regulations.

An interruption in or the cessation of service by any external service provider as a result of systems failures, capacity constraints, financial constraints or problems, unanticipated trading market closures or for any other reason, and our inability to make alternative arrangements in a smooth and timely manner, if at all, could have a material adverse effect on our business, results of operations and financial condition.

#### **Table of Contents**

Risk Factors Relating to the Regulatory and Legislative Environment

Legislation has and may continue to result in changes to rules and regulations applicable to our business, which may negatively impact our business and financial results.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), enacted in 2010, requires many federal agencies to adopt new rules and regulations applicable to the financial services industry and also calls for many studies regarding various industry practices. In particular, the Dodd-Frank Act gives the SEC discretion to adopt rules regarding standards of conduct for broker-dealers providing investment advice to retail customers. The U.S. Department of Labor ("DOL") has enacted regulations changing the definition of who is an investment advice fiduciary under the Employee Retirement Income Security Act of 1974 (ERISA) and how such advice can be provided to account holders in retirement accounts such as 401(k) plans and Individual Retirement Arrangements (IRAs). The DOL regulations will deem many of the investment, rollover and asset management recommendations from us to our clients regarding their retirement accounts fiduciary "investment advice" under ERISA. One of the most significant impacts on our business from the DOL regulations and related prohibited transaction exemptions will be the impact on our fee and compensation practices. For example, the regulations make investment advisors to retirement account clients subject to an ERISA fiduciary duty standard and the exemptions seek to reduce conflicts of interest stemming from fee differentials and compensation incentives that could lead to a misalignment of the interests of advisors and their retirement investor clients. The exemptions, when used, will also require certain new client contracts, adherence to "impartial conduct standards" (including a requirement to act in the "best interest" of retirement clients when providing investment advice), the adoption of related policies and procedures and the making of extensive website and other disclosures to retirement investors and the DOL. One way to comply is to use the best interest contract exemption in connection with certain advice activities, which will subject us to an increased risk of class actions and other litigation and regulatory risks. Additional rulemaking or legislative action could negatively impact our business and financial results. While we have not yet been required to make other material changes to our business or operations as a result of the Dodd-Frank Act or other rulemaking or legislative action, it is not certain what the scope of future rulemaking or interpretive guidance from the SEC, FINRA, DOL, banking regulators and other regulatory agencies may be, how the courts and regulators might interpret these rules and what impact this will have on our compliance costs, business, operations and profitability.

Our profitability could also be affected by new or modified laws that impact the business and financial communities generally, including changes to the laws governing banking, the securities market, fiduciary duties, conflicts of interest, taxation, electronic commerce, client privacy and security of client data.

Failure to comply with net capital requirements could adversely affect our business.

The SEC, FINRA, CFTC, NFA and various other regulatory agencies have stringent rules with respect to the maintenance of specific levels of net capital by securities broker-dealers, FCMs and FDMs. Net capital is a measure of a broker-dealer's, an FCM's or an FDM's readily available liquid assets, reduced by its total liabilities other than approved subordinated debt. Our broker-dealer and FCM/FDM subsidiaries are required to comply with net capital requirements. If we fail to maintain the required net capital, the SEC or the CFTC could suspend or revoke our registration, and FINRA or the NFA could expel us from membership, which could ultimately lead to our liquidation, or they could impose censures, fines or other sanctions. If the net capital rules are changed or expanded, or if there is an unusually large charge against net capital, then our operations that require capital could be limited. A large operating loss or charge against net capital could have a material adverse effect on our ability to maintain or expand our business.

Extensive regulation and regulatory uncertainties could harm our business.

The securities industry is subject to extensive regulation by federal, state, international government and self-regulatory agencies, and financial services companies are subject to regulations covering all aspects of the securities business. Regulations are intended to ensure the integrity of financial markets, appropriate capitalization of broker-dealers, FCMs and FDMs and the protection of clients and their assets. These regulations often serve to limit our business activities through capital, client protection and market conduct requirements, as well as restrictions on the activities that we are authorized to conduct. Federal, state, self-regulatory organizations and foreign regulators can, among other things, censure, fine, issue cease-and-desist orders to, suspend or expel a regulated entity or any of its

#### **Table of Contents**

officers or employees. We could fail to establish and enforce procedures to comply with applicable regulations, which could have a material adverse effect on our business.

Past turmoil in the financial markets has contributed to changes in laws and regulations, heightened scrutiny of the conduct of financial services firms and increasing penalties for violations of applicable laws and regulations. We may be adversely affected by new laws or regulations, changes in the interpretation of existing laws or regulations or more rigorous enforcement. The new laws and regulations may be complex, and we may not have the benefit of regulatory or federal interpretations to guide us in compliance. Changes in laws and regulations or new interpretations of existing laws and regulations also can have adverse effects on our methods and costs of doing business. We also may be adversely affected by other regulatory changes related to suitability of financial products, supervision, sales practices, application of fiduciary standards, best execution and market structure, which could limit the Company's business. Because TD, among other things, owns more than 25% of our common stock, we are considered a non-bank subsidiary of TD under the Bank Holding Company Act of 1956 (the "BHC Act"). As a result, under the BHC Act, we are subject to the supervision and regulation of the Federal Reserve. These banking regulations limit the activities and the types of businesses that we may conduct and the types of companies we may acquire, and under these regulations the Federal Reserve could impose significant limitations on our current business and operations. TD is currently regulated as a "financial holding company" under the BHC Act, which allows TD and us to engage in a much broader set of activities than would otherwise be permitted under the BHC Act. Any failure of TD to maintain its status as a financial holding company could result in substantial limitations on certain of our activities. Financial services firms are subject to numerous conflicts of interest or perceived conflicts of interest, over which federal and state regulators and self-regulatory organizations have increased their scrutiny. Addressing conflicts of interest is a complex and difficult undertaking. Our business and reputation could be harmed if we were to fail, or appear to fail, to address conflicts appropriately.

In addition, we use the Internet as a major distribution channel to provide services to our clients. A number of regulatory agencies have adopted regulations regarding client privacy, system security and safeguarding practices and the use of client information by service providers. Additional laws and regulations relating to the Internet and safeguarding practices could be adopted in the future, including laws related to access, identity theft and regulations regarding the pricing, taxation, content and quality of products and services delivered over the Internet. Complying with these laws and regulations may be expensive and time-consuming and could limit our ability to use the Internet as a distribution channel, which would have a material adverse effect on our business and profitability. We are subject to litigation and regulatory investigations and proceedings and may not always be successful in defending against such claims and proceedings.

The financial services industry faces substantial litigation and regulatory risks. We are subject to arbitration claims and lawsuits in the ordinary course of our business, as well as class actions and other significant litigation. We also are the subject of inquiries, investigations and proceedings by regulatory and other governmental agencies. Actions brought against us may result in settlements, awards, injunctions, fines, penalties and other results adverse to us. Predicting the outcome of such matters is inherently difficult, particularly where claims are brought on behalf of various classes of claimants or by a large number of claimants, when claimants seek substantial or unspecified damages or when investigations or legal proceedings are at an early stage. A substantial judgment, settlement, fine or penalty could be material to our operating results or cash flows for a particular period, depending on our results for that period, or could cause us significant reputational harm, which could harm our business prospects. In market downturns, the volume of legal claims and amount of damages sought in litigation and regulatory proceedings against financial services companies have historically increased. We are also subject to litigation claims from third parties alleging infringement of their intellectual property rights. Such litigation can require the expenditure of significant resources, regardless of whether the claims have merit. If we were found to have infringed a third-party patent or other intellectual property right, then we could incur substantial liability and in some circumstances could be enjoined from using the relevant technology or providing related products and services, which could have a material adverse effect on our business and results of operations.

#### **Table of Contents**

Risk Factors Relating to the Scottrade Acquisition

The planned acquisition of Scottrade presents many risks that we may not realize the financial and strategic goals that were contemplated at the time we agreed to enter into the transaction.

Risks we face in connection with our acquisition and integration of Scottrade include that:

we may be unable to obtain required approvals from governmental authorities on a timely basis, if at all, which could, among other things, delay or prevent us from completing the transaction, otherwise restrict our ability to realize the expected financial or strategic goals of the acquisition or have other adverse effects on our business and results of operations;

TD Bank, N.A.'s acquisition of Scottrade Bank as provided in the definitive agreement may be delayed or not be completed due to regulatory or other reasons, which could delay or prevent the acquisition of Scottrade Financial Services, Inc.;

it is possible that other closing conditions to the Scottrade acquisition may not be satisfied or waived, preventing the consummation of the transaction, which could involve damages for failing to close the transaction; our ongoing business may be disrupted and our management's attention may be diverted by acquisition and integration

our ongoing business may be disrupted and our management's attention may be diverted by acquisition and integration activities:

the Scottrade acquisition might not further our business strategy as we expected, we might not integrate Scottrade's business or technology as successfully as we expected, or we might overpay for Scottrade or otherwise not realize the expected return on our investment to the extent or in the timeframe forecasted, which could adversely affect our business or results of operations;

we may not realize the benefits or cost savings anticipated to be derived from the Scottrade acquisition as initially predicted, if at all for a number of reasons, including if a larger than predicted number of customers decide not to continue to use Scottrade's or our services;

we face numerous risks and uncertainties combining and integrating our businesses and systems with Scottrade's, including the need to combine or separate business activities, accounting and data processing systems and management controls and to integrate relationships with customers and business counterparties;

we could fail to retain and integrate key Scottrade personnel who are critical to the successful operation and integration of the business;

our results of operations or financial condition could be adversely impacted by: claims or liabilities that we assume from Scottrade or that are otherwise related to the acquisition, including claims made by government agencies, terminated employees, current or former customers, former stockholders or other third parties; contractual relationships of Scottrade that we would not have entered into but for the merger, the termination or modification of which may be costly or disruptive to our business; unfavorable revenue recognition or other accounting treatment as a result of Scottrade's practices; and intellectual property claims or disputes;

we may have failed to identify or assess the magnitude of liabilities, shortcomings or other circumstances of Scottrade, which could result in unexpected litigation or regulatory exposure, unfavorable accounting treatment, unexpected increases in taxes, a loss of anticipated tax benefits or other adverse effects on our business, results of operations or financial condition;

we may have difficulty incorporating Scottrade's technologies with our existing technologies and product lines while maintaining uniform standards, architecture, controls, procedures and policies;

we could experience additional or unexpected changes in how we are required to account for the acquisition pursuant to U.S. generally accepted accounting principles;

we will incur transaction expenses, including legal, regulatory and other costs associated with consummating the transaction, as well as expenses related to formulating and implementing integration plans, including facilities and systems consolidation costs and employment-related costs;

#### **Table of Contents**

our use of cash to pay for the acquisition can be expected to limit other potential uses of our cash, including stock repurchases, dividend payments and retirement of outstanding indebtedness;

we expect to issue debt to finance the acquisition, which can be expected to increase our interest expense, leverage and debt service requirements; and

because we will be issuing common equity in connection with the acquisition, our existing stockholders will be diluted, earnings per share may decrease, and the market price of our common stock might decrease.

We will need to successfully manage the integration of Scottrade and future growth effectively. Integration and additional growth may place a significant strain upon our management, administrative, operational, financial reporting, internal control and compliance infrastructure. Managing future growth also may be difficult due to the expanded geographic locations acquired as part of the Scottrade transaction.

As a result of these risks and challenges, we may not realize the full benefits that we anticipate from the proposed transaction in a timely manner or at all. There can be no assurance that we will be able to successfully integrate the operations of Scottrade and accurately anticipate and respond to the changing demands we will face as part of the integration. We may not be able to manage growth effectively or to achieve growth at all. Failure to manage the integration of Scottrade and future growth effectively could have a material adverse effect on our business, financial condition, results of operations and prospects.

Acquisitions involve risks that could adversely affect our business.

We may pursue other acquisitions of businesses and technologies. Acquisitions entail numerous risks, including: difficulties in the integration of acquired operations, services and products;

failure to achieve expected synergies;

diversion of management's attention from other business concerns;

assumption of unknown material liabilities of acquired companies;

amortization of acquired intangible assets, which could reduce future reported earnings;

potential loss of clients or key employees of acquired companies; and

dilution to existing stockholders.

As part of our growth strategy, we regularly consider, and from time to time engage in, discussions and negotiations regarding transactions, such as acquisitions, mergers and combinations within our industry. The purchase price for possible acquisitions could be paid in cash, through the issuance of common stock or other securities, borrowings or a combination of these methods.

We cannot be certain that we will be able to identify, consummate and successfully integrate acquisitions, and no assurance can be given with respect to the timing, likelihood or business effect of any possible transaction. For example, we could begin negotiations that we subsequently decide to suspend or terminate for a variety of reasons. However, opportunities may arise from time to time that we will evaluate. Any transactions that we consummate would involve risks and uncertainties to us. These risks could cause the failure of any anticipated benefits of an acquisition to be realized, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

#### **Table of Contents**

Risk Factors Relating to Owning Our Stock

The market price of our common stock has experienced, and may continue to experience, substantial volatility. Our common stock, and the U.S. securities markets in general, can experience significant price fluctuations. The market prices of securities of financial services companies, in particular, have been especially volatile. The price of our common stock could decrease substantially. Among the factors that may affect our stock price are the following: speculation in the investment community or the press about, or actual changes in, our competitive position, organizational structure, executive team, operations, financial condition, financial reporting and results, effectiveness of cost reduction initiatives, or strategic transactions;

the announcement of new products, services, acquisitions, or dispositions by us or our competitors; sales of a substantial number of shares of our common stock by TD and J. Joe Ricketts, our founder, certain members of his family and trusts held for their benefit, who have registration rights covering approximately 223 million shares and 59 million shares, respectively, of our common stock; and

increases or decreases in revenue or earnings, changes in earnings estimates by the investment community, changes in the interest rate environment or in market expectations regarding the interest rate environment and variations between estimated financial results and actual financial results.

Changes in the stock market generally or as it concerns our industry, as well as geopolitical, economic, and business factors unrelated to us, may also affect our stock price.

Because the market price of our common stock can fluctuate significantly, we could become the object of securities class action litigation, which could result in substantial costs and a diversion of management's attention and resources and could have a material adverse effect on our business and the price of our common stock.

We are restricted by the terms of our revolving credit facilities and senior notes.

Our senior unsecured revolving credit facilities contain various negative covenants and restrictions that may limit our ability to:

incur additional indebtedness;

create liens;

sell all or substantially all of our assets;

change the nature of our business;

merge or consolidate with another entity; and

conduct transactions with affiliates.

Under our revolving credit facilities, we are also required to maintain compliance with a maximum consolidated leverage ratio covenant (not to exceed 3.00:1.00) and a minimum consolidated interest coverage ratio covenant (not less than 4.00:1:00). TDAC is required to maintain compliance with a minimum consolidated tangible net worth covenant and our broker-dealer and FCM/FDM subsidiaries are required to maintain compliance with minimum regulatory net capital covenants. As a result of the covenants and restrictions contained in the revolving credit facilities and our senior unsecured notes, we are limited in how we conduct our business. We cannot guarantee that we will be able to remain in compliance with these covenants or be able to obtain waivers for noncompliance in the future. A failure to comply with these covenants could have a material adverse effect on our financial condition by impairing our ability to secure and maintain financing.

Our corporate debt level may limit our ability to obtain additional financing.

As of September 30, 2016, we had approximately \$1.75 billion of long-term debt, consisting of:

\$500 million of 5.600% Senior Notes with principal due in full on December 1, 2019;

#### **Table of Contents**

\$750 million of 2.950% Senior Notes with principal due in full on April 1, 2022; and \$500 million of 3.625% Senior Notes with principal due in full on April 1, 2025.

Our ability to meet our cash requirements, including our debt repayment obligations, is dependent upon our future performance, which will be subject to financial, business and other factors affecting our operations, many of which are or may be beyond our control. We cannot provide assurance that our business will generate sufficient cash flows from operations to fund our cash requirements. If we are unable to meet our cash requirements from operations, we would be required to obtain alternative financing. The degree to which we may be leveraged as a result of the indebtedness we have incurred could materially and adversely affect our ability to obtain financing for working capital, acquisitions or other purposes, could make us more vulnerable to industry downturns and competitive pressures or could limit our flexibility in planning for, or reacting to, changes and opportunities in our industry, which may place us at a competitive disadvantage. There can be no assurance that we would be able to obtain alternative financing, that any such financing would be on acceptable terms or that we would be permitted to do so under the terms of existing financing arrangements. In the absence of such financing, our ability to respond to changing business and economic conditions, make future acquisitions, react to adverse operating results, meet our debt repayment obligations or fund required capital expenditures could be materially and adversely affected.

Our business, financial position, and results of operations could be harmed by adverse rating actions by credit rating agencies.

If our counterparty credit rating or the credit ratings of our outstanding indebtedness are downgraded, or if rating agencies indicate that a downgrade may occur, our business, financial position, and results of operations could be adversely affected and perceptions of our financial strength could be damaged. A downgrade would have the effect of increasing our incremental borrowing costs and could decrease the availability of funds for borrowing. In addition, a downgrade could adversely affect our relationships with our clients.

TD exercises significant influence over TD Ameritrade.

As of October 1, 2016, TD owned approximately 42% of our outstanding common stock. As a result, TD will generally have the ability to significantly influence the outcome of any matter submitted to a vote of our stockholders and as a result of its significant share ownership in TD Ameritrade, TD may have the power, subject to applicable law, to significantly influence actions that might be favorable to TD, but not necessarily favorable to our other stockholders.

The stockholders agreement provides that TD may designate five of the twelve members of our board of directors, subject to adjustment based on TD's ownership positions in TD Ameritrade. As of October 1, 2016, based on its ownership positions, TD has the right to designate five members of our board of directors. Accordingly, TD is able to significantly influence the outcome of all matters that come before our board.

TD is permitted under the stockholders agreement to exercise voting rights on up to 45% of our outstanding shares of common stock until termination of the stockholders agreement (which will occur no later than January 24, 2021). If our stock repurchases cause TD's ownership percentage to exceed 45%, TD is required to use reasonable efforts to sell or dispose of such excess stock, subject to TD's commercial judgment as to the optimal timing, amount and method of sales with a view to maximizing proceeds from such sales. TD has no absolute obligation to reduce its ownership percentage to 45% by the termination of the stockholders agreement. However, prior to and following the termination of the stockholders agreement, TD is required to vote any such excess stock on any matter in the same proportions as all the outstanding shares of stock held by holders other than TD and its affiliates are voted. In no event may TD Ameritrade repurchase shares of its common stock that would result in TD's ownership percentage exceeding 47%. There is no restriction on the number of shares TD may own following the termination of the stockholders agreement. The ownership position and governance rights of TD could also discourage a third party from proposing a change of control or other strategic transaction concerning TD Ameritrade. As a result, our common stock could trade at prices that do not reflect a "takeover premium" to the same extent as do the stocks of similarly situated companies that do not have a stockholder with an ownership interest as large as TD's ownership interest.

#### **Table of Contents**

We have extensive relationships and business transactions with TD and some of its affiliates, which if terminated or adversely modified could have a material adverse effect on our business, financial condition and results of operations. We have extensive relationships and business transactions with TD and certain of its affiliates. The insured deposit account agreement between us and affiliates of TD provides a significant portion of our revenue. This agreement enables our clients to invest in an FDIC-insured deposit product without the need for the Company to establish the significant levels of capital that would be required to maintain our own bank charter. During fiscal 2016, net revenues related to this agreement accounted for approximately 28% of our net revenues. For fiscal year 2016, the average balance of client cash swept to our insured deposit account offering was \$84 billion. The average yield earned on the insured deposit account balances was 89 basis points higher than the average net yield earned on segregated cash balances during fiscal 2016. The termination or adverse modification of this agreement without replacing it on comparable terms with a different counterparty, which may not be available, could have a material adverse effect on our business, financial condition and results of operations. If this agreement was terminated or adversely modified and we were permitted to establish our own bank charter for purposes of offering an FDIC-insured deposit product, we would be required to establish and maintain significant levels of capital within a bank subsidiary. We would also be subject to various other risks associated with banking, including credit risk on loans and investments, liquidity risk associated with bank balance sheet management, operational risks associated with banking systems and infrastructure and additional regulatory requirements and supervision.

Conflicts of interest may arise between TD Ameritrade and TD, which may be resolved in a manner that adversely affects our business, financial condition or results of operations.

Conflicts of interest may arise between us and TD in areas relating to past, ongoing and future relationships, including corporate opportunities, potential acquisitions or financing transactions, sales or other dispositions by TD of its interests in TD Ameritrade and the exercise by TD of its influence over our management and affairs. Some of the directors on our board are persons who are also officers or directors of TD or its subsidiaries. Service as a director or officer of both TD Ameritrade and TD or its other subsidiaries could create conflicts of interest if such directors or officers are faced with decisions that could have materially different implications for us and for TD. Our amended and restated certificate of incorporation contains provisions relating to the avoidance of direct competition between us and TD. In addition, a committee of our board consisting of outside independent directors reviews and approves or ratifies transactions with TD and its affiliates. There can be no assurance that any of the foregoing potential conflicts would be resolved in a manner that does not adversely affect our business, financial condition or results of operations. In addition, the provisions of the stockholders agreement related to non-competition are subject to numerous exceptions and qualifications and may not prevent us and TD from competing with each other to some degree in the future. The terms of the stockholders agreement, our charter documents and Delaware law could inhibit a takeover that stockholders may consider favorable.

Provisions in the stockholders agreement between TD and the Company, our certificate of incorporation and bylaws and Delaware law will make it difficult for any party to acquire control of us in a transaction not approved by the requisite number of directors. These provisions include:

- the presence of a classified board of directors;
- the ability of the board of directors to issue and determine the terms of preferred stock;
- advance notice requirements for inclusion of stockholder proposals at stockholder meetings; and
- the anti-takeover provisions of Delaware law.

These provisions could delay or prevent a change of control or change in management that might provide stockholders with a premium to the market price of their common stock.

#### **Table of Contents**

Our future ability to pay regular dividends to holders of our common stock is subject to the discretion of our board of directors and will be limited by our ability to generate sufficient earnings and cash flows.

Payment of future cash dividends on our common stock will depend on our ability to generate earnings and cash flows. However, sufficient cash may not be available to pay such dividends. Payment of future dividends, if any, will be at the discretion of our board of directors and will depend upon a number of factors that the board of directors deems relevant, including future earnings, the success of our business activities, capital requirements, the general financial condition and future prospects of our business and general business conditions. If we are unable to generate sufficient earnings and cash flows from our business, we may not be able to pay dividends on our common stock. Our ability to pay cash dividends on our common stock is also dependent on the ability of our subsidiaries to pay dividends to the parent company. Some of our subsidiaries are subject to requirements of the SEC, FINRA, the CFTC, the NFA and other regulators relating to liquidity, capital standards and the use of client funds and securities, which may limit funds available for the payment of dividends to the parent company.

Item 1B. Unresolved Staff Comments

None.

## Item 2. Properties

Our Company-owned corporate headquarters facility is located in Omaha, Nebraska and provides more than 500,000 square feet of building space. Our headquarters facility has earned Leadership in Energy and Environmental Design (LEED) Platinum Certification, the highest level of distinction awarded by the U.S. Green Building Council. We also lease approximately 80,000 square feet of building space on property adjacent to the headquarters for administrative and operational facilities. These leases expire in 2020.

We lease approximately 195,000 and 140,000 square feet of building space for additional operations centers in Jersey City, New Jersey and Fort Worth, Texas, respectively. The Jersey City and Fort Worth leases expire in 2020. During October 2015, we purchased land in Southlake, Texas, on which we are currently constructing a new operations center. We intend to transition our Fort Worth operations to Southlake once construction of the new facility is completed, which is scheduled for 2017. We lease smaller administrative and operational facilities in California, Colorado, Illinois, Maryland, Michigan, Texas and Utah, and we own a data center facility in Richardson, Texas. We also lease over 100 branch offices located in large metropolitan areas in 33 states and the District of Columbia. We believe that our facilities are suitable and adequate to meet our needs.

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Price Range of Common Stock

Prior to December 12, 2015, our common stock traded on the New York Stock Exchange ("NYSE") under the symbol "AMTD." On December 12, 2015, our common stock began trading on the Nasdaq Global Select Market under the symbol "AMTD." The following table shows the high and low sales prices for our common stock for the periods indicated, as reported by the NYSE through December 11, 2015 and the Nasdaq Global Select Market thereafter. The prices reflect inter-dealer prices and do not include retail markups, markdowns or commissions.

#### Common Stock Price

For the Fiscal Year Ended September 30,

	2016		2015	
	High	Low	High	Low
First Quarter	\$ 37.90	\$ 29.69	\$ 37.08	\$ 28.34
Second Quarter	\$ 33.93	\$ 24.88	\$ 38.74	\$ 32.07
Third Quarter	\$ 32.93	\$ 26.47	\$ 39.05	\$ 34.72
Fourth Quarter	\$ 35.39	\$ 26.37	\$ 38.72	\$ 30.22

The closing sale price of our common stock as reported on the Nasdaq Global Select Market on November 3, 2016 was \$33.84 per share. As of that date there were 655 holders of record of our common stock based on information provided by our transfer agent. The number of stockholders of record does not reflect the number of individual or institutional stockholders that beneficially own our stock because most stock is held in the name of nominees. Based on information available to us, we believe there are approximately 68,000 beneficial holders of our common stock. Dividends

We declared and paid a \$0.17 per share and a \$0.15 per share quarterly cash dividend on our common stock during each quarter of fiscal years 2016 and 2015, respectively. On October 24, 2016, we declared an \$0.18 per share quarterly cash dividend for the first quarter of fiscal 2017. We are scheduled to pay the quarterly cash dividend on November 22, 2016 to all holders of record of our common stock as of November 8, 2016. The payment of any future dividends will be at the discretion of our board of directors and will depend upon a number of factors that the board of directors deems relevant, including future earnings, the success of our business activities, capital requirements, the general financial condition and future prospects of our business and general business conditions.

Our ability to pay cash dividends on our common stock is also dependent on the ability of our subsidiaries to pay dividends to the parent company. Some of our subsidiaries are subject to requirements of the SEC, FINRA, the CFTC, the NFA and other regulators relating to liquidity, capital standards and the use of client funds and securities, which may limit funds available for the payment of dividends to the parent company. See Item 7, Management's Discussion and Analysis of Results of Operations and Financial Condition — "Liquidity and Capital Resources" for further information.

Securities Authorized for Issuance Under Equity Compensation Plans

Information about securities authorized for issuance under the Company's equity compensation plans is contained in Item 12 — Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

On November 20, 2015, our board of directors authorized the repurchase of up to 30 million shares of our common stock. We disclosed this authorization on November 20, 2015 in our annual report on Form 10-K. This program was the only stock repurchase program in effect and no programs expired during the fourth quarter of fiscal 2016. During the quarter ended September 30, 2016, 12,886 shares were repurchased from employees for income tax withholding in connection with distributions of stock-based compensation.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations
This discussion contains forward-looking statements within the meaning of the U.S. Private Securities Litigation
Reform Act of 1995. Statements that are not historical facts, including statements about our beliefs and expectations,
are forward-looking statements. Forward-looking statements include statements preceded by, followed by or that
include the words "may," "could," "would," "should," "believe," "expect," "anticipate," "plan," "estimate," "target,"
"project," "intend" and similar words or expressions. In particular, forward-looking statements contained in this
discussion include our expectations regarding: the effect of client trading activity on our results of operations; the
effect of changes in interest rates on our net interest spread; diluted earnings per share; average commissions and
transaction fees per trade; amounts of commissions and transaction fees, asset-based revenues, insured deposit account
fees, net interest revenue and investment product fees; net interest margin; the average yield earned on insured deposit
account assets; the effect of the FDIC surcharge on our insured deposit account fees; growth in spread-based and
fee-based asset balances; amounts of total operating expenses; our effective income tax rate; our capital and liquidity
needs and our plans to finance such needs; and our clearinghouse deposit requirements.

The Company's actual results could differ materially from those anticipated in such forward-looking statements. Important factors that may cause such differences include, but are not limited to: general economic and political conditions and other securities industry risks; fluctuations in interest rates; stock market fluctuations and changes in client trading activity; credit risk with clients and counterparties; increased competition; systems failures, delays and capacity constraints; network security risks; liquidity risk; new laws and regulations affecting our business; regulatory and legal matters and uncertainties, inability to obtain regulatory approval for our planned acquisition of Scottrade Financial Services, Inc. ("Scottrade"), including the completion of the merger between Scottrade Bank and TD Bank, N.A., delay or failure to close such transaction or meet other closing conditions and the other risks and uncertainties set forth under Item 1A — Risk Factors of this Form 10-K. The forward-looking statements contained in this report speak only as of the date on which the statements were made and do not include information related to the planned acquisition of Scottrade, except where Scottrade is referred to. We undertake no obligation to publicly update or revise these statements, whether as a result of new information, future events or otherwise, except to the extent required by the federal securities laws.

### Glossary of Terms

In discussing and analyzing our business, we utilize several metrics and other terms that are defined in the following Glossary of Terms. Italics indicate other defined terms that appear elsewhere in the Glossary. The term "GAAP" refers to U.S. generally accepted accounting principles.

Asset-based revenues — Revenues consisting of (1) insured deposit account fees, (2) net interest revenue and (3) investment product fees. The primary factors driving our asset-based revenues are average balances and average rates. Average balances consist primarily of average client insured deposit account balances, average client margin balances, average segregated cash balances, average client credit balances, average fee-based investment balances and average securities borrowing and securities lending balances. Average rates consist of the average interest rates and fees earned and paid on such balances.

Average client trades per day — Total trades divided by the number of trading days in the period. This metric is also known as daily average revenue trades ("DARTs").

Average commissions and transaction fees per trade — Total commissions and transaction fee revenues as reported on the Company's Consolidated Statements of Income divided by total trades for the period. Commissions and transaction fee revenues primarily consist of trading commissions, order routing revenue and markups on riskless principal transactions in fixed-income securities.

Basis point — When referring to interest rates, one basis point represents one one-hundredth of one percent. Beneficiary accounts — Brokerage accounts managed by a custodian, guardian, conservator or trustee on behalf of one or more beneficiaries. Examples include accounts maintained under the Uniform Gift to Minors Act (UGMA) or Uniform Transfer to Minors Act (UTMA), guardianship, conservatorship and trust arrangements and pension or profit plan for small business accounts.

Brokerage accounts — Accounts maintained by the Company on behalf of clients for securities brokerage activities. The primary types of brokerage accounts are cash accounts, margin accounts, IRA accounts and

#### **Table of Contents**

beneficiary accounts. Futures accounts are sub-accounts associated with a brokerage account for clients who wish to trade futures and/or options on futures.

Cash accounts — Brokerage accounts that do not have margin account approval.

Client assets — The total value of cash and securities in brokerage accounts.

Client cash and money market assets — The sum of all client cash balances, including client credit balances and client cash balances swept into insured deposit accounts or money market mutual funds.

Client credit balances — Client cash held in brokerage accounts, excluding balances generated by client short sales on which no interest is paid. Interest paid on client credit balances is a reduction of net interest revenue. Client credit balances are included in "payable to clients" on our Consolidated Balance Sheets.

Client margin balances — The total amount of cash loaned to clients in margin accounts. Such loans are secured by client assets. Interest earned on client margin balances is a component of net interest revenue. Client margin balances are included in "receivable from clients, net" on our Consolidated Balance Sheets.

Consolidated duration — The weighted average remaining years until maturity of our spread-based assets. For purposes of this calculation, floating rate balances are treated as having a one-month duration. Consolidated duration is used in analyzing our aggregate interest rate sensitivity.

Daily average revenue trades ("DARTs") — Total trades divided by the number of trading days in the period. This metric is also known as average client trades per day.

EBITDA — EBITDA (earnings before interest, taxes, depreciation and amortization) is a non-GAAP financial measure. We consider EBITDA to be an important measure of our financial performance and of our ability to generate cash flows to service debt, fund capital expenditures and fund other corporate investing and financing activities. EBITDA is used as the denominator in the consolidated leverage ratio calculation for covenant purposes under our senior revolving credit facility. EBITDA eliminates the non-cash effect of tangible asset depreciation and amortization and intangible asset amortization. EBITDA should be considered in addition to, rather than as a substitute for, pre-tax income, net income and cash flows from operating activities.

EPS excluding amortization of intangible assets — Earnings per share ("EPS") excluding amortization of intangible assets is a non-GAAP financial measure. We define EPS excluding amortization of intangible assets as earnings (loss) per share, adjusted to remove the after-tax effect of amortization of acquired intangible assets. We consider EPS excluding amortization of intangible assets an important measure of our financial performance. Amortization of acquired intangible assets is excluded because we believe it is not indicative of underlying business performance. EPS excluding amortization of intangible assets should be considered in addition to, rather than as a substitute for, GAAP earnings per share.

EPS from ongoing operations — EPS from ongoing operations is a non-GAAP financial measure. We define EPS from ongoing operations as earnings (loss) per share, adjusted to remove any significant unusual gains or charges. We consider EPS from ongoing operations an important measure of the financial performance of our ongoing business. Unusual gains and charges are excluded because we believe they are not likely to be indicative of the ongoing operations of our business. EPS from ongoing operations should be considered in addition to, rather than as a substitute for, GAAP earnings per share.

Fee-based investment balances — Client assets invested in money market mutual funds, other mutual funds and Company programs such as AdvisorDirect® and Amerivest,® on which we earn fee revenues. Fee revenues earned on these balances are included in investment product fees on our Consolidated Statements of Income.

Funded accounts — All open client accounts with a total liquidation value greater than zero.

Futures accounts — Sub-accounts maintained by the Company on behalf of clients for trading in futures and/or options on futures. Each futures account must be associated with a brokerage account. Futures accounts are not counted separately for purposes of the Company's client account metrics.

Insured deposit account — The Company is party to an Insured Deposit Account ("IDA") agreement with TD Bank USA, N.A. ("TD Bank USA"), TD Bank, N.A. and The Toronto-Dominion Bank ("TD"). Under the IDA agreement, TD Bank USA and TD Bank, N.A. (together, the "TD Depository Institutions") make available to clients of the Company FDIC-insured money market deposit accounts as either designated sweep vehicles or as non-sweep

#### **Table of Contents**

deposit accounts. The Company provides marketing, recordkeeping and support services for the TD Depository Institutions with respect to the money market deposit accounts. In exchange for providing these services, the TD Depository Institutions pay the Company an aggregate marketing fee based on the weighted average yield earned on the client IDA assets, less the actual interest paid to clients, a servicing fee to the TD Depository Institutions and the cost of FDIC insurance premiums.

Interest-earning assets — Consist of client margin balances, segregated cash, deposits paid on securities borrowing and other cash and interest-earning investment balances.

Interest rate-sensitive assets — Consist of spread-based assets and client cash invested in money market mutual funds. Investment product fees — Revenues earned on fee-based investment balances. Investment product fees include fees earned on money market mutual funds, other mutual funds and through Company programs such as AdvisorDirect® and Amerivest®.

IRA accounts (Individual Retirement Arrangements) — A personal trust account for the exclusive benefit of a U.S. individual (or his or her beneficiaries) that provides tax advantages in accumulating funds to save for retirement or other qualified purposes. These accounts are subject to numerous restrictions on additions to and withdrawals from the account, as well as prohibitions against certain investments or transactions conducted within the account. The Company offers traditional, Roth, Savings Incentive Match Plan for Employees (SIMPLE) and Simplified Employee Pension (SEP) IRA accounts.

Liquid assets available for corporate investing and financing activities — Liquid assets available for corporate investing and financing activities is a non-GAAP financial measure. We consider liquid assets available for corporate investing and financing activities to be an important measure of our liquidity. We define liquid assets available for corporate investing and financing activities as the sum of (a) corporate cash and cash equivalents and investments, excluding amounts being maintained to provide liquidity for operational contingencies, including lending to our broker-dealer and futures commission merchant ("FCM")/forex dealer member ("FDM") subsidiaries under intercompany credit agreements and (b) regulatory net capital of (i) our clearing broker-dealer subsidiary in excess of 10% of aggregate debit items and (ii) our introducing broker-dealer subsidiary in excess of a minimum operational target established by management (\$50 million in the case of our introducing broker-dealer, TD Ameritrade, Inc.). We include the excess capital of our broker-dealer subsidiaries in the calculation of liquid assets available for corporate investing and financing activities, rather than simply including broker-dealer cash and cash equivalents, because capital requirements may limit the amount of cash available for dividend from the broker-dealer subsidiaries to the parent company. Excess capital, as defined under clause (b) above, is generally available for dividend from the broker-dealer subsidiaries to the parent company. Liquid assets available for corporate investing and financing activities is based on more conservative measures of broker-dealer net capital than regulatory requirements because we generally manage to higher levels of net capital at the broker-dealer subsidiaries than the regulatory thresholds require. Liquid assets available for corporate investing and financing activities should be considered as a supplemental measure of liquidity, rather than as a substitute for cash and cash equivalents.

Liquidation value — The net value of a client's account holdings as of the close of a regular trading session. Liquidation value includes client cash and the value of long security positions, less margin balances and the cost to buy back short security positions. It also includes the value of open futures, foreign exchange and options positions.

Margin accounts — Brokerage accounts in which clients may borrow from the Company to buy securities or for any other purpose, subject to regulatory and Company-imposed limitations.

Market fee-based investment balances — Client assets invested in mutual funds (except money market funds) and Company programs such as AdvisorDirect® and Amerivest,® on which we earn fee revenues that are largely based on a percentage of the market value of the investment. Market fee-based investment balances are a component of fee-based investment balances. Fee revenues earned on these balances are included in investment product fees on our Consolidated Statements of Income.

Net income excluding amortization of intangible assets — Net income excluding amortization of intangible assets is a non-GAAP financial measure. We define net income excluding amortization of intangible assets as net income (loss), adjusted to remove the after-tax effect of amortization of acquired intangible assets. We consider net income excluding amortization of intangible assets an important measure of our financial performance.

#### **Table of Contents**

Amortization of acquired intangible assets is excluded because we believe it is not indicative of underlying business performance. Net income excluding amortization of intangible assets should be considered in addition to, rather than as a substitute for, GAAP net income.

Net interest margin ("NIM") — A measure of the net yield on our average spread-based assets. Net interest margin is calculated for a given period by dividing the annualized sum of insured deposit account fees and net interest revenue by average spread-based assets.

Net interest revenue — Net interest revenue is interest revenues less brokerage interest expense. Interest revenues are generated by charges to clients on margin balances maintained in margin accounts, the investment of cash from operations and segregated cash and interest earned on securities borrowing/securities lending. Brokerage interest expense consists of amounts paid or payable to clients based on credit balances maintained in brokerage accounts and interest incurred on securities borrowing/securities lending. Brokerage interest expense does not include interest on Company non-brokerage borrowings.

Net new assets — Consists of total client asset inflows, less total client asset outflows, excluding activity from business combinations. Client asset inflows include interest and dividend payments and exclude changes in client assets due to market fluctuations. Net new assets are measured based on the market value of the assets as of the date of the inflows and outflows.

Net new asset growth rate (annualized) — Annualized net new assets as a percentage of client assets as of the beginning of the period.

Operating expenses excluding advertising — Operating expenses excluding advertising is a non-GAAP financial measure. Operating expenses excluding advertising consists of total operating expenses, adjusted to remove advertising expense. We consider operating expenses excluding advertising an important measure of the financial performance of our ongoing business. Advertising spending is excluded because it is largely at the discretion of the Company, can vary significantly from period to period based on market conditions and generally relates to the acquisition of future revenues through new accounts rather than current revenues from existing accounts. Operating expenses excluding advertising should be considered in addition to, rather than as a substitute for, total operating expenses.

Order routing revenue — Revenues generated from revenue-sharing arrangements with market destinations (also referred to as "payment for order flow"). Order routing revenue is a component of transaction-based revenues. Securities borrowing — We borrow securities temporarily from other broker-dealers in connection with our broker-dealer business. We deposit cash as collateral for the securities borrowed, and generally earn interest revenue on the cash deposited with the counterparty. We also incur interest expense for borrowing certain securities. Securities lending — We loan securities temporarily to other broker-dealers in connection with our broker-dealer business. We receive cash as collateral for the securities loaned, and generally incur interest expense on the cash deposited with us. We also earn revenue for lending certain securities.

Segregated cash — Client cash and investments segregated in compliance with Rule 15c3-3 of the Securities Exchange Act of 1934 (the Customer Protection Rule) and other regulations. Interest earned on segregated cash is a component of net interest revenue.

Spread-based assets — Client and brokerage-related asset balances, consisting of insured deposit account balances and interest-earning assets. Spread-based assets is used in the calculation of our net interest margin and our consolidated duration.

Total trades — Revenue-generating client securities trades, which are executed by the Company's broker-dealer and FCM/FDM subsidiaries. Total trades are a significant source of the Company's revenues. Such trades include, but are not limited to, trades in equities, options, futures, foreign exchange, mutual funds and debt instruments. Trades generate revenue from commissions, markups on riskless principal transactions in fixed income securities, transaction fees and/or order routing revenue.

Trading days — Days in which the U.S. equity markets are open for a full trading session. Reduced exchange trading sessions are treated as half trading days.

#### **Table of Contents**

Transaction-based revenues — Revenues generated from client trade execution, consisting primarily of commissions, markups on riskless principal transactions in fixed income securities, transaction clearing fees and order routing revenue.

#### Financial Statement Overview

We provide securities brokerage and clearing services to our clients through our introducing and clearing broker-dealer subsidiaries. We also provide futures and foreign exchange trade execution services to our clients through our futures commission merchant ("FCM") and forex dealer member ("FDM") subsidiary. Substantially all of our net revenues are derived from our brokerage activities and clearing and execution services. Our primary focus is serving retail clients and independent registered investment advisors by providing services with straightforward, affordable pricing.

Our largest sources of revenues are asset-based revenues and transaction-based revenues. The primary factors driving our asset-based revenues are average balances and average rates. Average balances consist primarily of average client insured deposit account balances, average client margin balances, average segregated cash balances, average client credit balances, average fee-based investment balances and average securities borrowing and lending balances. Average rates consist of the average interest rates and fees earned and paid on such balances. The primary factors driving our transaction-based revenues are total client trades and average commissions and transaction fees per trade. We also receive order routing revenue, which results from arrangements we have with many execution agents to receive cash payments in exchange for routing trade orders to these firms for execution. Order routing revenue is included in commissions and transaction fees on our Consolidated Statements of Income.

Our largest operating expense generally is employee compensation and benefits. Employee compensation and benefits expense includes salaries, bonuses, stock-based compensation, group insurance, contributions to benefit programs, recruitment, severance and other related employee costs.

Clearing and execution costs include incremental third-party expenses that tend to fluctuate as a result of fluctuations in client accounts or trades. Examples of expenses included in this category are outsourced clearing services, statement and confirmation processing and postage costs and clearing expenses paid to the National Securities Clearing Corporation, option exchanges and other market centers. Communications expense includes telecommunications, other postage, news and quote costs. Occupancy and equipment costs include the costs of leasing and maintaining our office spaces, software licensing and maintenance costs and maintenance expenses on computer hardware and other equipment. Depreciation and amortization includes depreciation on property and equipment and amortization of leasehold improvements. Amortization of acquired intangible assets consists of amortization of amounts allocated to the value of intangible assets acquired in business combinations.

Professional services expense includes costs paid to outside firms for assistance with legal, accounting, technology, regulatory, marketing and general management issues. Advertising costs include production and placement of advertisements in various media, including online, television, print and email, as well as client promotion and development costs. Advertising expenses may fluctuate significantly from period to period. Other operating expenses include provision for bad debt losses, fraud and error losses, gains or losses on disposal of property, insurance expenses, travel expenses and other miscellaneous expenses.

Interest on borrowings consists of interest expense on our long-term debt and other borrowings. Gain on sale of investments represents gains realized on corporate (non broker-dealer) investments.

#### Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements requires us to make judgments and estimates that may have a significant impact upon our financial results. Note 1, under Item 8, Financial Statements and Supplementary Data — Notes to Consolidated Financial Statements, of this Form 10-K contains a summary of our significant accounting policies, many of which require the use of estimates and assumptions. We believe that the following areas are particularly subject to management's judgments and estimates and could materially affect our results of operations and financial position.

#### **Table of Contents**

Valuation of goodwill and acquired intangible assets

We test goodwill and our indefinite-lived acquired intangible asset for impairment on at least an annual basis, or whenever events occur or changes in circumstances indicate that the carrying values may not be recoverable. In the fourth quarter of fiscal 2016, we elected to prospectively change the date of our annual goodwill and indefinite-lived acquired intangible asset impairment tests from September 30 to July 1 of each year, commencing on July 1, 2016. The change in the impairment testing date is preferable as it provides us with additional time to complete our annual impairment testing in advance of our year-end reporting. In performing the goodwill impairment tests, we utilize quoted market prices of our common stock to estimate the fair value of the Company as a whole. The estimated fair value is then allocated to our reporting units based on operating revenues, and is compared with the carrying value of the reporting units. No impairment charges have resulted from our annual goodwill impairment tests.

To determine if the indefinite-lived intangible asset is impaired, we first assess certain qualitative factors. Based on this assessment, if it is determined that more likely than not the fair value of the indefinite-lived intangible asset is less than its carrying amount, we perform a quantitative impairment test. No impairment charges have resulted from the annual indefinite-lived intangible asset impairment tests.

We review our finite-lived acquired intangible assets for impairment whenever events occur or changes in circumstances indicate that the carrying amount of such asset may not be recoverable. We evaluate recoverability by comparing the undiscounted cash flows associated with the asset to the asset's carrying amount. We also evaluate the remaining useful lives of intangible assets each reporting period to determine if events or trends warrant a revision to the remaining period of amortization. We have had no events or trends that have warranted a material revision to the originally estimated useful lives.

Estimates of effective income tax rates, uncertain tax positions, deferred income taxes and related valuation allowances

We estimate our income tax expense based on the various jurisdictions where we conduct business. This requires us to estimate our current income tax obligations and to assess temporary differences between the financial statement carrying amounts and tax bases of assets and liabilities. Temporary differences result in deferred income tax assets and liabilities. We must evaluate the likelihood that deferred income tax assets will be realized. To the extent we determine that realization is not "more likely than not," we establish a valuation allowance. Establishing or increasing a valuation allowance results in a corresponding increase to income tax expense in our Consolidated Statements of Income. Conversely, to the extent circumstances indicate that a valuation allowance can be reduced or is no longer necessary, that portion of the valuation allowance is reversed, reducing income tax expense.

We must make significant judgments to calculate our provision for income taxes, our deferred income tax assets and liabilities and any valuation allowance against our deferred income tax assets. We must also exercise judgment in determining the need for, and amount of, any accruals for uncertain tax positions. Because the application of tax laws and regulations to many types of transactions is subject to varying interpretations, amounts reported in our consolidated financial statements could be significantly changed at a later date upon final determinations by taxing authorities.

### Accruals for contingent liabilities

Accruals for contingent liabilities, such as legal and regulatory claims and proceedings, reflect an estimate of probable losses for each matter. In making such estimates, we consider many factors, including the progress of the matter, prior experience and the experience of others in similar matters, available defenses, insurance coverage, indemnification provisions and the advice of legal counsel and other experts. In many matters, such as those in which substantial or indeterminate damages or fines are sought, or where cases or proceedings are in the early stages, it is not possible to determine whether a loss will be incurred, or to estimate the range of that loss, until the matter is close to resolution, in which case no accrual is made until that time. Because matters may be resolved over long periods of time, accruals are adjusted as more information becomes available or when an event occurs requiring a change. Significant judgment is required in making these estimates, and the actual cost of resolving a matter may ultimately differ materially from the amount accrued.

#### **Table of Contents**

#### Valuation of guarantees

We enter into guarantees in the ordinary course of business, primarily to meet the needs of our clients and to manage our asset-based revenues. We record a liability for the estimated fair value of the guarantee at its inception. If actual results differ significantly from these estimates, our results of operations could be materially affected. For further details regarding our guarantees, see the following sections under Item 8, Financial Statements and Supplementary Data — Notes to Consolidated Financial Statements: "Guarantees" under Note 13 — Commitments and Contingencies and "Insured Deposit Account Agreement" under Note 19 — Related Party Transactions.

# **Results of Operations**

Conditions in the U.S. equity markets significantly impact the volume of our clients' trading activity. There is a strong relationship between the volume of our clients' trading activity and our results of operations. We cannot predict future trading volumes in the U.S. equity markets. If client trading activity increases, we generally expect that it would have a positive impact on our results of operations. If client trading activity declines, we expect that it would have a negative impact on our results of operations.

Changes in average balances, especially client insured deposit account, margin, credit and mutual fund balances, may significantly impact our results of operations. Changes in interest rates also significantly impact our results of operations. We seek to mitigate interest rate risk by aligning the average duration of our interest-earning assets with that of our interest-bearing liabilities. We cannot predict the direction of interest rates or the levels of client balances. If interest rates rise, we generally expect to earn a larger net interest spread. Conversely, a falling interest rate environment generally would result in our earning a smaller net interest spread.

### Financial Performance Metrics

Net income, diluted earnings per share and EBITDA are key metrics we use in evaluating our financial performance. Net income and diluted earnings per share are GAAP financial measures and EBITDA is a non-GAAP financial measure.

We consider EBITDA to be an important measure of our financial performance and of our ability to generate cash flows to service debt, fund capital expenditures and fund other corporate investing and financing activities. EBITDA is used as the denominator in the consolidated leverage ratio calculation for covenant purposes under our senior revolving credit facility. EBITDA eliminates the non-cash effect of tangible asset depreciation and amortization and intangible asset amortization. EBITDA should be considered in addition to, rather than as a substitute for, pre-tax income, net income and cash flows from operating activities.

The following table sets forth net income in dollars and as a percentage of net revenues for the periods indicated, and provides reconciliations to EBITDA (dollars in millions):

	Fiscal Year Ended September 30,								
	2016			2015			2014		
	\$ % of Net \$		<b>\</b>			\$	% of Net Revenues		
		Revenues							
Net income	\$842	25.3	%	\$813	25.0	%	\$787	25.2	%
Add:									
Depreciation and amortization	92	2.8	%	91	2.8	%	95	3.0	%
Amortization of acquired intangible assets	86	2.6	%	90	2.8	%	90	2.9	%
Interest on borrowings	53	1.6	%	43	1.3	%	25	0.8	%
Provision for income taxes	423	12.7	%	475	14.6	%	483	15.5	%
EBITDA	\$1,496	45.0	%	\$1,512	46.6	%	\$1,480	47.4	%

Fiscal Year Ended September 30, 2016 Compared to Fiscal Year Ended September 30, 2015

Our net income increased 4% for fiscal 2016 compared to fiscal 2015, primarily due to an increase in net revenues and a lower effective tax rate, partially offset by an increase in operating expenses and interest on borrowings

#### **Table of Contents**

during fiscal 2016 and a \$7 million gain on sale of investments during the prior year. Detailed analysis of net revenues and expenses is presented later in this discussion.

Our EBITDA decreased 1% for fiscal 2016 compared to fiscal 2015, primarily due to an increase in operating expenses excluding depreciation and amortization during fiscal 2016 and a \$7 million gain on sale of investments during the prior year, partially offset by an increase in net revenues.

Our diluted earnings per share increased 6% to \$1.58 for fiscal 2016 compared to \$1.49 for fiscal 2015, primarily due to higher net income and a 2% decrease in average diluted shares outstanding as a result of our stock repurchase programs. Based on our expectations for net revenues and expenses, we expect diluted earnings per share to range from \$1.50 to \$1.80 for fiscal year 2017, depending largely on the level of client trading activity, client asset growth and the level of interest rates. Details regarding our fiscal year 2017 expectations for net revenues and expenses are presented later in this discussion.

Fiscal Year Ended September 30, 2015 Compared to Fiscal Year Ended September 30, 2014

Our net income increased 3% for fiscal 2015 compared to fiscal 2014, primarily due to an increase in net revenues and a lower effective tax rate, partially offset by an increase in operating expenses and interest on borrowings.

Our EBITDA increased 2% for fiscal 2015 compared to fiscal 2014, primarily due to an increase in net revenues, partially offset by an increase in operating expenses excluding depreciation and amortization.

Our diluted earnings per share increased 5% to \$1.49 for fiscal 2015 compared to \$1.42 for fiscal 2014, primarily due to higher net income and a 1% decrease in average diluted shares outstanding as a result of our stock repurchase programs.

#### **Operating Metrics**

Our largest sources of revenues are asset-based revenues and transaction-based revenues. For fiscal 2016, asset-based revenues and transaction-based revenues accounted for 57% and 41% of our net revenues, respectively. Asset-based revenues consist of (1) insured deposit account fees, (2) net interest revenue and (3) investment product fees. The primary factors driving our asset-based revenues are average balances and average rates. Average balances consist primarily of average client insured deposit account balances, average client margin balances, average segregated cash balances, average client credit balances, average fee-based investment balances and average securities borrowing and lending balances. Average rates consist of the average interest rates and fees earned and paid on such balances. The primary factors driving our transaction-based revenues are total client trades and average commissions and transaction fees per trade. We also consider client account and client asset metrics, although we believe they are generally of less significance to our results of operations for any particular period than our metrics for asset-based and transaction-based revenues.

### **Table of Contents**

#### Asset-Based Revenue Metrics

We calculate the return on our insured deposit account balances and our interest-earning assets using a measure we refer to as net interest margin. Net interest margin is calculated for a given period by dividing the annualized sum of insured deposit account fees and net interest revenue by average spread-based assets. Spread-based assets consist of client and brokerage-related asset balances, including insured deposit account balances, client margin balances, segregated cash, deposits paid on securities borrowing and other cash and interest-earning investment balances. The following table sets forth net interest margin and average spread-based assets (dollars in millions):

	Fiscal Ye	ar					'16 vs.	15	'15 vs.	'14
	2016		2015		2014		Increa	se/	Increa	se/
	2010		2013		2014		(Decre	ase)	(Decre	ease)
Average insured deposit account balances	\$83,706		\$75,737	7	\$72,933	,	\$7,969	)	\$2,804	4
Average interest-earning assets	22,652		20,223		18,541		2,429		1,682

#### **Table of Contents**

Fiscal Year Ended September 30, 2016 Compared to Fiscal Year Ended September 30, 2015 Net Revenues

Commissions and transaction fees decreased 2% to \$1.37 billion, primarily due to lower average commissions and transaction fees per trade, slightly offset by increased client trading activity. Average commissions and transaction fees per trade decreased to \$11.76 from \$12.09, primarily due to lower average contracts per trade on option and futures trades and a slightly higher percentage of our clients' trades receiving reduced commission rates as a result of continued price competition in the industry. Total trades increased 1% as average client trades per day increased slightly to 462,918 for fiscal 2016 compared to 461,541 for fiscal 2015, and there was one more trading day during fiscal 2016 compared to fiscal 2015. We expect average commissions and transaction fees to decrease to between \$11.50 and \$11.75 per trade during fiscal 2017, depending on the mix of client trading activity, level of order routing revenue and other factors. We expect revenues from commissions and transaction fees to range from \$1.37 billion to \$1.49 billion for fiscal 2017, depending on the volume of client trading activity, average commissions and transaction fees per trade and other factors.

Asset-based revenues, which consist of insured deposit account fees, net interest revenue and investment product fees, increased 6% to \$1.90 billion primarily due to an 11% increase in average spread-based assets, an increase of 2 basis points in the average yield earned on total fee-based investment balances and the deferral of \$10 million of revenue during fiscal 2015 related to an Amerivest® fee rebate offer, as described below. These increases were partially offset by a decrease of 9 basis points in net interest margin to 1.41%, as the benefit realized on the December 2015 federal funds rate increase was more than offset by a decrease in net interest revenue from our securities borrowing/lending program and the impact of lower average client margin balances, which earn a larger net interest spread, as well as higher average cash balances, which earn a lower net interest spread. On December 16, 2015, the Federal Open Market Committee increased the target range for the federal funds rate by 0.25% to between 0.25% and 0.50%. We expect net interest margin to decrease to between 1.27% and 1.38% for fiscal 2017, depending largely on the interest rate environment. We expect asset-based revenues to range between \$1.86 billion and \$2.10 billion for fiscal 2017, as we expect growth in spread-based and fee-based asset balances to be partially offset by a decrease in net interest margin. The low end of this estimated range assumes no change in the federal funds rate and a flattening of interest rates across the LIBOR yield curve for fiscal 2017. The high end of the estimated range assumes an increase in the federal funds rate and in interest rates across the LIBOR yield curve for fiscal 2017.

Insured deposit account fees increased 10% to \$926 million, primarily due to an 11% increase in average client IDA balances. The average yield earned on the IDA assets was unchanged at 1.09% for fiscal year 2016, as the benefit realized on the December 2015 federal funds rate increase was partially offset by an increase in the IDA servicing fee due to more balances being kept in floating-rate investments and due to a \$5 million FDIC surcharge during the fourth quarter of fiscal 2016. On March 15, 2016, the FDIC announced its final rule to increase the deposit insurance fund to a statutorily required minimum level by imposing a surcharge on quarterly assessments. We expect the FDIC surcharge to decrease our insured deposit account fees by approximately \$5 million per quarter, reducing the average yield earned on the IDA assets by approximately 2.5 basis points. We expect insured deposit account fees to range between \$870 million and \$955 million for fiscal 2017, as we expect growth in the average IDA balances to be offset by a decrease in the expected average yield earned on IDA assets. We expect the average yield earned on IDA assets will decrease to between 0.95% and 1.00%, primarily due to balance growth and maturities of investments within the IDA portfolio being invested at lower rates and due to the impact of the FDIC surcharge. For more information about the IDA agreement, please see Note 19 — Related Party Transactions under Item 8, Financial Statements and Supplementary Data — Notes to Consolidated Financial Statements.

Net interest revenue decreased 4% to \$595 million, primarily due to a \$33 million decrease in net interest revenue from our securities borrowing/lending program and a 3% decrease in average client margin balances, partially offset by increases in the average yields earned on segregated cash, client margin and other cash and interest-earning investment balances as a result of the December 2015 federal funds rate increase. We expect net interest revenue to range from \$585 million to \$710 million for fiscal 2017, depending on the extent of balance growth, demand for stock lending and the nature of the interest rate environment.

Investment product fees increased 12% to \$374 million, primarily due to an increase of 2 basis points in the average yield earned on total fee-based investment balances, which includes the impact of the December 2015 federal funds rate increase, a 3% increase in average market fee-based investment balances and a \$10 million revenue

### **Table of Contents**

deferral during the prior year related to an Amerivest® fee rebate offer. For client assets subject to the Amerivest® fee rebate offer, if the model portfolio in which the client is invested experiences two consecutive quarters of negative performance (before advisory fees), the Company will refund the advisory fees for both quarters to the client. Several of the portfolios experienced negative performance for the last two quarters of fiscal 2015, therefore recognition of the revenue for the related advisory fees was deferred. Approximately \$7 million of the deferred advisory fee revenue during fiscal 2015 represented rebate obligations that were paid during early fiscal 2016. The Amerivest® fee rebate offer concluded on October 5, 2016, therefore the quarter ending September 30, 2017 will be the last period subject to the rebate offer. We expect investment product fees to increase to between \$405 million and \$430 million for fiscal 2017, primarily due to expected growth in average fee-based investment balances.

Other revenues increased 18% to \$60 million, primarily due to increased fees from processing corporate securities reorganizations during fiscal 2016 and unfavorable fair market value adjustments to U.S. government debt securities held for investment purposes by our broker-dealer subsidiaries during the prior year.

## **Operating Expenses**

Total operating expenses increased 5% to \$2.01 billion during fiscal 2016. We expect total operating expenses to range from \$1.98 billion to \$2.06 billion for fiscal 2017.

Employee compensation and benefits expense increased 4% to \$839 million, primarily due to annual merit increases, additional costs of \$10 million related to organizational changes and higher health insurance costs. The average number of full-time equivalent employees increased to 5,858 for fiscal 2016 compared to 5,826 for fiscal 2015. Clearing and execution costs decreased 8% to \$136 million, primarily due to lower option trade execution costs resulting from decreased option trading activity and fee reductions by the Options Clearing Corporation during fiscal 2016, including a \$5 million benefit from a retroactive fee decrease during the first quarter of fiscal 2016. Communications expense increased 10% to \$137 million, primarily due to increased costs for quotes and market information.

Occupancy and equipment costs increased 5% to \$171 million, primarily due to increased software maintenance and facilities expenses.

Professional services expense increased 12% to \$178 million, primarily due to increased consulting and contract services in connection with operational, technology and acquisition-related initiatives.

Advertising expense increased 5% to \$260 million primarily due to increased advertising in connection with our sponsorship of the Summer Olympics.

Other operating expenses increased 21% to \$110 million, primarily due to \$11 million of service contract termination costs, the impact of an \$8 million insurance recovery during the prior year, higher losses on the disposal of property of \$7 million and a \$3 million recovery of money market funds from the final distribution of The Reserve Primary Fund during the prior year. These increases were partially offset by a decrease in bad debt expense and lower litigation, arbitration and regulatory losses.

# Other Expense and Income Taxes

Interest on borrowings increased 23% to \$53 million, primarily due to a 12% increase in average debt outstanding and an increase of 30 basis points in the average effective interest rate incurred on our debt. The increase in average debt outstanding was primarily due to our issuance, on March 4, 2015, of \$750 million of 2.950% Senior Notes due April 1, 2022 for general corporate purposes, including liquidity for operational contingencies.

Our effective income tax rate was 33.4% for fiscal 2016, compared to 36.9% for fiscal 2015. The effective tax rate for fiscal 2016 was impacted by \$39 million of net favorable adjustments to uncertain tax positions and related deferred income tax assets, which included a favorable \$33 million tax liability remeasurement related to a state court decision. The effective income tax rate was also impacted by an \$18 million favorable tax benefit claimed during fiscal year 2016 for federal deductions and tax credits related to calendar tax year 2012 through September 30, 2016 and \$5 million of net favorable deferred income tax adjustments due to the remeasurement of deferred tax assets and liabilities and the cumulative impact of the decline in the state tax rate. These items had a net favorable

#### **Table of Contents**

impact on our earnings of approximately twelve cents per share. The effective tax rate for fiscal 2015 included \$22 million of favorable resolutions of state income tax matters. This favorably impacted our earnings for fiscal 2015 by approximately four cents per share. We expect our effective income tax rate to range from 37% to 38% for fiscal 2017, excluding the effect of any adjustments related to remeasurement or resolution of uncertain tax positions and federal incentives. However, we expect to experience some volatility in our quarterly and annual effective income tax rate because current accounting rules for uncertain tax positions require that any change in measurement of a tax position taken in a prior tax year be recognized as a discrete event in the period in which the change occurs. Fiscal Year Ended September 30, 2015 Compared to Fiscal Year Ended September 30, 2014 Net Revenues

Commissions and transaction fees increased 4% to \$1.40 billion, primarily due to increased client trading activity, partially offset by lower average commissions and transaction fees per trade. Average client trades per day increased 8% to 461,541 for fiscal 2015 compared to 426,888 for fiscal 2014. Average commissions and transaction fees per trade decreased to \$12.09 for fiscal 2015 compared to \$12.62 for fiscal 2014, primarily due to a 9% decrease in average order routing revenue per trade, a higher percentage of reduced commission trades, including negotiated rates for our active trader clients, and a higher percentage of futures trades, which earn somewhat lower average commissions and transaction fees per trade and do not generate order routing revenue.

Asset-based revenues increased 5% to \$1.80 billion, primarily due to a 5% increase in average spread-based assets and a 15% increase in average market fee-based investment balances, partially offset by a decrease of 1 basis point in the net interest margin earned on spread-based assets and the deferral of \$10 million of revenue during fiscal 2015 related to an Amerivest® fee rebate offer, as described below. Our net interest margin was 1.50% for fiscal 2015, compared to 1.51% for the prior year, primarily due to lower average yields earned on client margin and insured deposit account balances.

Insured deposit account fees increased 2% to \$839 million, primarily due to a 4% increase in average client IDA balances, partially offset by a decrease of 2 basis points in the average yield earned on the IDA assets. IDA balances have grown more slowly than our net new client asset annualized growth rate, which was 10% for fiscal 2015, as client participation in the market has resulted in a relatively low percentage of total client assets being held in cash. Net interest revenue increased 7% to \$622 million, primarily due to a 15% increase in average client margin balances and a \$5 million increase in net interest revenue from our securities borrowing/lending program, partially offset by a decrease of 21 basis points in the average yield earned on client margin balances. Most of the growth in average client margin balances has come from clients with larger margin balances and lower negotiated rates.

Investment product fees increased 8% to \$334 million, primarily due to a 15% increase in average market fee-based investment balances, partially offset by the deferral of \$10 million of revenue during fiscal 2015 related to an Amerivest® fee rebate offer. Approximately \$7 million of the deferred advisory fee revenue during fiscal 2015 represented rebate obligations that were paid during early fiscal 2016.

Other revenues decreased 18% to \$51 million, primarily due to lower client education revenue and unfavorable fair market value adjustments to U.S. government debt securities held for investment purposes by our broker-dealer subsidiaries.

# **Operating Expenses**

Total operating expenses increased 5% to \$1.92 billion during fiscal 2015 compared to fiscal 2014.

Employee compensation and benefits expense increased 6% to \$807 million, primarily due to an increase in average headcount related to strategic growth initiatives and higher incentive-based compensation related to Company and individual performance. The average number of full-time equivalent employees increased to 5,826 for fiscal 2015 compared to 5,578 for fiscal 2014.

Clearing and execution costs increased 10% to \$148 million, primarily due to a higher percentage of futures trades, which cost more than equity trades to execute, fee increases by the Options Clearing Corporation that became effective April 1, 2014 and higher overall client trading volumes.

#### **Table of Contents**

Communications expense increased 8% to \$125 million, primarily due to increased costs for quotes and market information.

Occupancy and equipment costs increased 4% to \$163 million, primarily due to upgrades to our technology infrastructure.

Other operating expenses increased 11% to \$91 million, primarily due to increased litigation, arbitration and other losses and bad debt expense. These increases were partially offset by a \$3 million recovery of money market funds from the final distribution of The Reserve Primary Fund and approximately \$8 million of insurance recoveries related to previous losses during fiscal 2015.

Other Expense and Income Taxes

Interest on borrowings increased 72% to \$43 million, primarily due to a 41% increase in average debt outstanding and an increase of 53 basis points in the average effective interest rate incurred on our debt. On October 17, 2014, we issued \$500 million of 3.625% Senior Notes due April 1, 2025, for purposes of refinancing our \$500 million of 4.150% Senior Notes due December 1, 2014. In addition, on March 4, 2015, we issued \$750 million of 2.950% Senior Notes due April 1, 2022 for general corporate purposes, including liquidity for operational contingencies. The timing of the issuance and maturity dates related to the debt refinancing, along with the issuance of the 2.950% Senior Notes, contributed to the increase in average debt outstanding during fiscal 2015.

Our effective income tax rate was 36.9% for fiscal 2015, compared to 38.0% for fiscal 2014. The effective tax rate for fiscal 2015 included \$22 million of favorable resolutions of state income tax matters. This favorably impacted our earnings for fiscal 2015 by approximately four cents per share. The effective tax rate for fiscal 2014 included \$10 million of favorable resolutions of state income tax matters, partially offset by \$2 million of unfavorable deferred income tax adjustments resulting from state income tax law changes. These items had a net favorable impact on our earnings for fiscal 2014 of approximately one cent per share.

Liquidity and Capital Resources

As a holding company, TD Ameritrade Holding Corporation conducts substantially all of its business through its operating subsidiaries, principally its broker-dealer and futures commission merchant ("FCM")/forex dealer member ("FDM") subsidiaries.

We have historically financed our liquidity and capital needs primarily through the use of funds generated from subsidiary operations and from borrowings under our credit agreements. We have also issued common stock and long-term debt to finance mergers and acquisitions and for other corporate purposes. Our liquidity needs during fiscal 2016 were financed primarily from our subsidiaries' earnings and cash on hand. We plan to finance our ordinary capital and liquidity needs in fiscal 2017 primarily from our subsidiaries' earnings, cash on hand and borrowings. During fiscal 2017, we plan to return approximately 40% of our net income excluding amortization of intangible assets to our stockholders through cash dividends. For more information about our dividends, see "Cash Dividends" later in this section.

We intend to fund the acquisition of Scottrade with new common equity, cash on hand and debt financing. The Scottrade acquisition is expected to close by September 30, 2017. For further information about the Scottrade acquisition, please see Note 22 — Subsequent Event under Item 8, Financial Statements and Supplementary Information — Notes to Consolidated Financial Statements.

On March 4, 2015, we sold, through a public offering, \$750 million aggregate principal amount of unsecured 2.950% Senior Notes due April 1, 2022. We issued the 2.950% Senior Notes for general corporate purposes, including liquidity for operational contingencies. Liquidity for operational contingencies could be used to fund increases in our deposit requirements with clearinghouses, and to provide operating liquidity for client trading and investing activity in the normal course of business and during times of market volatility.

Dividends from our subsidiaries are an important source of liquidity for the parent company. Some of our subsidiaries are subject to requirements of the Securities and Exchange Commission ("SEC"), the Financial Industry Regulatory Authority ("FINRA"), the Commodity Futures Trading Commission ("CFTC"), the National Futures Association ("NFA") and other regulators relating to liquidity, capital standards and the use of client funds and securities, which may limit funds available for the payment of dividends to the parent company.

#### **Table of Contents**

Broker-dealer and Futures Commission Merchant/Forex Dealer Member Subsidiaries

Our broker-dealer and FCM/FDM subsidiaries are subject to regulatory requirements that are intended to ensure their liquidity and general financial soundness. Under the SEC's Uniform Net Capital Rule (Rule 15c3-1 under the Securities Exchange Act of 1934, or the "Exchange Act"), our broker-dealer subsidiaries are required to maintain, at all times, at least the minimum level of net capital required under Rule 15c3-1. For our clearing broker-dealer subsidiary, this minimum net capital level is determined by a calculation described in Rule 15c3-1 that is primarily based on the broker-dealer's "aggregate debits," which primarily are a function of client margin balances at the clearing broker-dealer. Since our aggregate debits may fluctuate significantly, our minimum net capital requirements may also fluctuate significantly from period to period. The parent company may make cash capital contributions to our broker-dealer and FCM/FDM subsidiaries, if necessary, to meet minimum net capital requirements. Each of our broker-dealer subsidiaries may not repay any subordinated borrowings, pay cash dividends or make any unsecured advances or loans to its parent company or employees if such payment would result in a net capital amount of less than (a) 5% of aggregate debit balances or (b) 120% of its minimum dollar requirement. TD Ameritrade Futures & Forex LLC ("TDAFF"), our FCM and FDM subsidiary, must provide notice to the CFTC if its adjusted net capital amounts to less than (a) 110% of its risk-based capital requirement under CFTC Regulation 1.17, (b) 150% of its \$1.0 million minimum dollar requirement, or (c) 110% of \$20.0 million plus 5% of all liabilities owed to forex clients in excess of \$10.0 million. These broker-dealer, FCM and FDM net capital thresholds, which are specified in Rule 17a-11 under the Exchange Act and CFTC Regulations 1.12 and 5.6, are typically referred to as "early warning" net capital thresholds.

The following tables summarize our broker-dealer and FCM/FDM subsidiaries net capital and adjusted net capital, respectively, as of September 30, 2016 (dollars in millions):

Capital in Early Net Excess of Warning Capital Early Threshold Warning Threshold \$ 999 TD Ameritrade Clearing, Inc. \$1,719 \$ 720 TD Ameritrade, Inc. \$139 \$ 0.3 \$ 138 Adjusted Net Capital in Adjusted Early Net Warning Excess of Threshold Early Capital Warning Threshold

TD Ameritrade Futures & Forex LLC \$ 117

Our clearing broker-dealer subsidiary, TD Ameritrade Clearing, Inc. ("TDAC"), engages in activities such as settling client securities transactions with clearinghouses, extending credit to clients through margin lending, securities lending and borrowing transactions and processing client cash sweep transactions to and from insured deposit accounts and money market mutual funds. These types of broker-dealer activities require active daily liquidity management.

\$ 93

\$ 24

Most of TDAC's assets are readily convertible to cash, consisting primarily of cash and investments segregated for the exclusive benefit of clients, receivables from clients and receivables from brokers, dealers and clearing organizations. Cash and investments segregated for the exclusive benefit of clients may be held in cash, reverse repurchase agreements (collateralized by U.S. Treasury securities), U.S. Treasury securities and other qualified securities. Receivables from clients consist of margin loans, which are demand loan obligations secured by readily marketable securities. Receivables from brokers, dealers and clearing organizations primarily arise from current open transactions, which usually settle or can be settled within a few business days.

TDAC is subject to cash deposit and collateral requirements with clearinghouses such as the Depository Trust & Clearing Corporation ("DTCC") and the OCC, which may fluctuate significantly from time to time based on the nature and size of our clients' trading activity. TDAC had \$335 million and \$540 million of cash and investments deposited with clearing organizations for the clearing of client equity and option trades as of

#### **Table of Contents**

September 30, 2016 and 2015, respectively. The largest amount of TDAC cash and investments ever deposited with clearing organizations was approximately \$714 million, which occurred in October 2015.

TDAC's liquidity needs relating to client trading and margin borrowing are met primarily through cash balances in client brokerage accounts and lending of client margin securities. Cash balances in client brokerage accounts were \$18.7 billion and \$15.7 billion as of September 30, 2016 and 2015, respectively. Cash balances in client brokerage accounts not used for client trading and margin borrowing activity are not generally available for other liquidity purposes and must be segregated for the exclusive benefit of clients under Rule 15c3-3 of the Exchange Act. TDAC had \$8.4 billion and \$6.0 billion of cash and investments segregated in special reserve bank accounts for the exclusive benefit of clients under Rule 15c3-3 as of September 30, 2016 and 2015, respectively.

For general liquidity needs, TDAC also maintains a senior unsecured revolving credit facility in an aggregate principal amount of \$300 million. This facility is described under Loan Facilities – TD Ameritrade Clearing, Inc. Credit Agreement later in this section. There were no borrowings outstanding on this facility as of September 30, 2016. In addition, we have established intercompany credit agreements under which the broker-dealer and FCM/FDM subsidiaries may borrow from the parent company. The intercompany credit agreement with TDAC provides for a committed revolving loan facility of \$700 million and an uncommitted revolving loan facility of \$300 million. The intercompany credit agreements are described under Loan Facilities – Intercompany Credit Agreements later in this section. There were no borrowings outstanding under any of the intercompany credit agreements as of September 30, 2016.

Liquid Assets Available for Corporate Investing and Financing Activities

We consider "liquid assets available for corporate investing and financing activities" to be an important measure of our liquidity. Liquid assets available for corporate investing and financing activities is considered a non-GAAP financial measure. We include the excess capital of our broker-dealer subsidiaries in the calculation of liquid assets available for corporate investing and financing activities, rather than simply including broker-dealer cash and cash equivalents, because capital requirements may limit the amount of cash available for dividend from the broker-dealer subsidiaries to the parent company. Excess capital, as defined below, is generally available for dividend from the broker-dealer subsidiaries to the parent company. Liquid assets available for corporate investing and financing activities should be considered as a supplemental measure of liquidity, rather than as a substitute for cash and cash equivalents.

We define liquid assets available for corporate investing and financing activities as the sum of (a) corporate cash and cash equivalents and investments, excluding amounts being maintained to provide liquidity for operational contingencies, including lending to our broker-dealer and FCM/FDM subsidiaries under intercompany credit agreements and (b) regulatory net capital of (i) our clearing broker-dealer subsidiary in excess of 10% of aggregate debit items and (ii) our introducing broker-dealer subsidiary in excess of a minimum operational target established by management (\$50 million in the case of our introducing broker-dealer, TD Ameritrade, Inc.). Liquid assets available for corporate investing and financing activities is based on more conservative measures of broker-dealer net capital than regulatory requirements because we generally manage to higher levels of net capital at the broker-dealer subsidiaries than the regulatory thresholds require.

# **Table of Contents**

The following table sets forth a reconciliation of cash and cash equivalents, which is the most directly comparable GAAP measure, to liquid assets available for corporate investing and financing activities (dollars in millions):

	Septemb	Changa	
	2016	2015	Change
Cash and cash equivalents	\$1,855	\$1,978	\$(123)
Less: Non-corporate cash and cash equivalents	(1,395)	(909)	(486)
Corporate cash and cash equivalents	460	1,069	(609)
Corporate investments	757		757
Less: Corporate liquidity maintained for operational contingencies	(773)	(750)	(23)
Excess corporate cash and cash equivalents and investments	444	319	125
Excess broker-dealer regulatory net capital	369	211	158
Liquid assets available for corporate investing and financing activities	\$813	\$530	\$283

The changes in liquid assets available for corporate investing and financing activities are summarized as follows (dollars in millions):

#### **Table of Contents**

#### Loan Facilities

The following is a summary of our long-term debt and credit facilities. For additional details, please see Note 8 — Long-term Debt under Item 8, Financial Statements and Supplementary Information — Notes to Consolidated Financial Statements.

Senior Notes - Our unsecured, fixed-rate Senior Notes were each sold through a public offering and pay interest semi-annually in arrears. Key information about the Senior Notes outstanding is summarized in the following table (dollars in millions):

Description	Date Issued	Maturity Date	Aggregate Principal	Interest		
Description	Date Issued	Maturity Date	Aggregate i inicipai	Rate		
2019 Notes	November 25, 2009	December 1, 2019	\$500	5.600%		
2022 Notes	March 4, 2015	April 1, 2022	\$750	2.950%		
2025 Notes	October 17, 2014	April 1, 2025	\$500	3.625%		

Fair Value Hedging - We are exposed to changes in the fair value of our fixed-rate Senior Notes resulting from interest rate fluctuations. To hedge a portion of this exposure, we entered into fixed-for-variable interest rate swaps on the 2019 Notes and the 2025 Notes. Each fixed-for-variable interest rate swap has a notional amount of \$500 million and a maturity date matching the maturity date of the respective Senior Notes.

The interest rate swaps effectively change the fixed-rate interest on the 2019 Notes and 2025 Notes to variable-rate interest. Under the terms of the interest rate swap agreements, we receive semi-annual fixed-rate interest payments based on the same rates applicable to the Senior Notes, and make quarterly variable-rate interest payments based on three-month LIBOR plus (a) 2.3745% for the swap on the 2019 Notes and (b) 1.1022% for the swap on the 2025 Notes. As of September 30, 2016, the weighted average effective interest rate on the aggregate principal balance of the 2019 Notes and 2025 Notes was 2.48%

TD Ameritrade Holding Corporation Credit Agreement - TD Ameritrade Holding Corporation (the "Parent") has access to a senior unsecured revolving credit facility in the aggregate principal amount of \$300 million (the "Parent Revolving Facility"). The maturity date of the Parent Revolving Facility is June 11, 2019. There were no borrowings outstanding under the Parent Revolving Facility as of September 30, 2016.

TD Ameritrade Clearing, Inc. Credit Agreement - TDAC has access to a senior unsecured revolving credit facility in the aggregate principal amount of \$300 million (the "TDAC Revolving Facility"). The maturity date of the TDAC Revolving Facility is June 11, 2019. There were no borrowings outstanding under the TDAC Revolving Facility as of September 30, 2016.

Intercompany Credit Agreements - The Parent has entered into credit agreements with each of its primary broker-dealer and FCM/FDM subsidiaries, under which the Parent may make loans of cash or securities under committed and uncommitted lines of credit as summarized in the table below (dollars in millions):

Borrower Subsidiary	Committed Facility	Uncommitted Facility (1)	Termination Date
TD Ameritrade Clearing, Inc.	\$700	\$300	March 1, 2022
TD Ameritrade, Inc.	\$50	\$300	March 1, 2022
TD Ameritrade Futures & Forex LLC	\$22.5	N/A	August 11, 2021

(1) The Parent is permitted, but under no obligation, to make loans under uncommitted facilities. There were no borrowings outstanding under any of the intercompany credit agreements as of September 30, 2016.

#### **Table of Contents**

#### Stock Repurchase Programs

On October 20, 2011, our board of directors authorized the repurchase of up to 30 million shares of our common stock. During the first half of fiscal 2016, we completed the October 20, 2011 stock repurchase authorization by repurchasing the remaining 7.9 million shares at a weighted average purchase price of \$29.42 per share. From the inception of this stock repurchase authorization through its completion in March 2016, we repurchased a total of 30 million shares at a weighted average purchase price of \$29.19 per share.

On November 20, 2015, our board of directors authorized the repurchase of up to an additional 30 million shares of our common stock. During fiscal 2016, we repurchased approximately 4 million shares under this authorization at a weighted average purchase price of \$29.37 per share. As of September 30, 2016, we had approximately 26 million shares remaining under the November 20, 2015 stock repurchase authorization. We plan to suspend further repurchases under our current stock repurchase authorization until after the completion of the Scottrade acquisition. Cash Dividends

We declared \$0.17 per share, \$0.15 per share and \$0.12 per share quarterly cash dividends on our common stock during each quarter of fiscal years 2016, 2015 and 2014, respectively. We also declared and paid a \$0.50 per share special cash dividend on our common stock during the first quarter of fiscal 2014. We paid \$362 million, \$326 million and \$540 million to fund the dividends for fiscal years 2016, 2015 and 2014, respectively.

On October 24, 2016, we declared an \$0.18 per share quarterly cash dividend on our common stock for the first quarter of fiscal 2017. We expect to pay approximately \$95 million on November 22, 2016 to fund the quarterly cash dividend.

#### Off-Balance Sheet Arrangements

We enter into guarantees and other off-balance sheet arrangements in the ordinary course of business, primarily to meet the needs of our clients and to manage our asset-based revenues. For information on these arrangements, see the following sections under Item 8, Financial Statements and Supplementary Data — Notes to Consolidated Financial Statements: "General Contingencies" and "Guarantees" under Note 13 — Commitments and Contingencies and "Insured Deposit Account Agreement" under Note 19 — Related Party Transactions. The IDA agreement accounts for a significant percentage of our net revenues (28% of our net revenues for the fiscal year ended September 30, 2016) and enables our clients to invest in an FDIC-insured deposit product without the need for the Company to establish the significant levels of capital that would be required to maintain our own bank charter.

# **Contractual Obligations**

The following table summarizes our contractual obligations as of September 30, 2016 (dollars in millions):

		Payments Due by Period (Fiscal						
		Years	s):					
	Total	Less t		3-5 years	More than 5 years			
		year			3 years			
Contractual Obligations		2017	2018-19	2020-21	After 2021			
Long-term debt obligations <sup>(1)</sup>	\$2,024	\$49	\$ 96	\$ 571	\$ 1,308			
Operating lease obligations	342	58	109	71	104			
Purchase obligations <sup>(2)</sup>	283	239	31	4	9			
Income taxes payable <sup>(3)</sup>	98	98			_			
Total	\$2,747	\$444	\$ 236	\$ 646	\$ 1,421			

Represents scheduled principal payments, estimated interest payments and commitment fees pursuant to the Senior (1)Notes, the interest rate swaps and the revolving credit facilities. Actual amounts of interest may vary depending on changes in variable interest rates associated with the interest rate swaps.

#### **Table of Contents**

Purchase obligations primarily relate to agreements for goods and services such as building construction costs,

- (2) property and equipment, software, telecommunications, market information, advertising and marketing, professional services, and employee compensation and benefits.
- A significant portion of our income taxes payable as of September 30, 2016 consists of liabilities for uncertain tax (3) positions and related interest and penalties. The timing of payments, if any, on liabilities for uncertain tax positions cannot be predicted with reasonable accuracy.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk generally represents the risk of loss that may result from the potential change in the value of a financial instrument as a result of fluctuations in interest rates and market prices. We have established policies, procedures and internal processes governing our management of market risks in the normal course of our business operations. Market-related Credit Risk

Two primary sources of credit risk inherent in our business are (1) client credit risk related to margin lending and leverage and (2) counterparty credit risk related to securities lending and borrowing. We manage risk on client margin lending and leverage by requiring clients to maintain margin collateral in compliance with regulatory and internal guidelines. The risks associated with margin lending and leverage increase during periods of rapid market movements, or in cases where leverage or collateral is concentrated and market movements occur. We monitor required margin levels daily and, pursuant to such guidelines, require our clients to deposit additional collateral, or to reduce positions, when necessary. We continuously monitor client accounts to detect excessive concentration, large orders or positions, patterns of day trading and other activities that indicate increased risk to us. We manage risks associated with our securities lending and borrowing activities by requiring credit approvals for counterparties, by monitoring the market value of securities loaned and collateral values for securities borrowed on a daily basis and requiring additional cash as collateral for securities loaned or return of collateral for securities borrowed when necessary, and by participating in a risk-sharing program offered through the Options Clearing Corporation.

We are party to interest rate swaps related to our long-term debt, which are subject to counterparty credit risk. Credit risk on derivative financial instruments is managed by limiting activity to approved counterparties that meet a minimum credit rating threshold and by entering into credit support agreements, or by utilizing approved central clearing counterparties registered with the Commodity Futures Trading Commission. Our interest rate swaps require daily collateral coverage, in the form of cash or U.S. Treasury securities, for the aggregate fair value of the interest rate swaps.

#### Interest Rate Risk

As a fundamental part of our brokerage business, we invest in interest-earning assets and are obligated on interest-bearing liabilities. In addition, we earn fees on our insured deposit account ("IDA") arrangement with TD Bank USA, N.A. and TD Bank, N.A. and on money market mutual funds, which are subject to interest rate risk. Changes in interest rates could affect the interest earned on assets differently than interest paid on liabilities. A rising interest rate environment generally results in our earning a larger net interest spread. Conversely, a falling interest rate environment generally results in our earning a smaller net interest spread.

Our most prevalent form of interest rate risk is referred to as "gap" risk. This risk occurs when the interest rates we earn on our assets change at a different frequency or amount than the interest rates we pay on our liabilities. For example, in the current low interest rate environment, sharp increases in short-term interest rates could result in net interest spread compression if the yields paid on interest-bearing client balances were to increase faster than our earnings on interest-earning assets. We seek to mitigate interest rate risk by aligning the average duration of our interest-earning assets with that of our interest-bearing liabilities. As of September 30, 2016, our consolidated duration was 1.85 years. We have an Asset/Liability Committee as the governance body with the responsibility of managing interest rate risk, including gap risk.

We use net interest simulation modeling techniques to evaluate the effect that changes in interest rates might have on pre-tax income. Our model includes all interest-sensitive assets and liabilities of the Company and interest-sensitive assets and liabilities associated with the IDA arrangement. The simulations involve assumptions that are

#### **Table of Contents**

inherently uncertain and, as a result, cannot precisely predict the impact that changes in interest rates will have on pre-tax income. Actual results may differ from simulated results due to differences in timing and frequency of rate changes, changes in market conditions and changes in management strategy that lead to changes in the mix of interest-sensitive assets and liabilities.

The simulations assume that the asset and liability structure of our Consolidated Balance Sheet and the IDA arrangement would not be changed as a result of a simulated change in interest rates. The results of the simulations based on our financial position as of September 30, 2016 indicate that a gradual 1% (100 basis points) increase in interest rates over a 12-month period would result in a range of approximately \$100 million to \$200 million higher pre-tax income and a gradual 1% (100 basis points) decrease in interest rates over a 12-month period would result in a range of approximately \$50 million to \$70 million lower pre-tax income, depending largely on the extent and timing of possible increases in payment rates on client cash balances and interest rates charged on client margin balances. The results of the simulations reflect the fact that short-term interest rates remain at historically low levels despite the increase in the federal funds target range to 0.25% to 0.50% as directed by the Federal Open Market Committee in December 2015.

#### Other Market Risks

Substantially all of our revenues and financial instruments are denominated in U.S. dollars. We generally do not enter into derivative transactions, except for hedging purposes.

Item 8. Financial Statements and Supplementary Data REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

TD Ameritrade Holding Corporation

We have audited the accompanying consolidated balance sheets of TD Ameritrade Holding Corporation (the "Company") as of September 30, 2016 and 2015, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended September 30, 2016. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of TD Ameritrade Holding Corporation at September 30, 2016 and 2015, and the consolidated results of its operations and its cash flows for each of the three years in the period ended September 30, 2016, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), TD Ameritrade Holding Corporation's internal control over financial reporting as of September 30, 2016, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated November 18, 2016 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP Chicago, Illinois November 18, 2016
