(“Artisan”), Food Innovations, Inc. (“FII”), Food New Media Group, Inc. (“FNM”), Gourmet Foodservice Group, Inc. (“GFG”), Gourmet Foodservice Warehouse, Inc. (“GFGW”), The Haley Group, Inc., (“Haley”), and 4 The Gourmet, Inc. (d/b/a For The Gourmet, Inc.) (“Gourmet” and collectively, the “Company, or “IVFH”), have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. FNM currently holds the Company’s intellectual property rights related to its private label brand. All material intercompany transactions have been eliminated upon consolidation of these entities.

The accompanying unaudited interim condensed consolidated financial statements have been prepared by the Company, in accordance with generally accepted accounting principles pursuant to Regulation S-X of the Securities and Exchange Commission and with the instructions to Form 10-Q. Certain information and footnote disclosures normally included in audited consolidated financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. Accordingly, these interim financial statements should be read in conjunction with the Company’s financial statements and related notes as contained in Form 10-K for the year ended December 31, 2012. In the opinion of management, the interim unaudited condensed consolidated financial statements reflect all adjustments, including normal recurring adjustments, necessary for fair presentation of the interim periods presented. The results of the operations for the three and nine months ended September 30, 2013 are not necessarily indicative of the results of operations to be expected for the full year.

2. NATURE OF ACTIVITIES AND SIGNIFICANT ACCOUNTING POLICIES

Business Activity

FII, Artisan and GFG are in the business of providing premium foodservice establishments, including white tablecloth restaurants with the freshest origin-specific perishables and specialty food products direct from its warehouses and from a network of vendors, to the end users (restaurants, hotels, country clubs, national chain accounts, casinos, and catering houses) across the United States within 24 - 72 hours. For The Gourmet Inc., through its website www.forthegourmet.com, and through additional sales channels, provides the highest quality gourmet food products to the direct to consumer market

We currently sell the majority of our products through a distributor relationship between FII and Next Day Gourmet, L.P., a subsidiary of U.S. Foods (“USF”), a \$20 Billion broad line distributor. On May 18, 2012, the Company executed a Stock Purchase Agreement to acquire all of the issued and outstanding shares of Artisan Specialty Foods, Inc., an Illinois corporation (“Artisan”). Artisan was previously a supplier to the Company. Artisan is a supplier of over 1,500 niche gourmet products to over 500 customers in the Greater Chicago area.

Use of Estimates

The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. These

estimates include certain assumptions related to doubtful accounts receivable, stock-based services, valuation of financial instruments, and income taxes. On an on-going basis, we evaluate these estimates, including those related to revenue recognition and concentration of credit risk. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. We believe our estimates have not been materially inaccurate in past years, and our assumptions are not likely to change in the foreseeable future.

Table of Contents

On August 25, 2005, we entered into contracts which obligated the company under certain circumstances to issue shares of common stock in excess of the number of shares of common stock authorized. Under accounting guidance provided by FASB ASC 815-40-05, from August 25, 2005 through December 27, 2012, we accounted for all derivative financial instruments, including warrants, conversion features embedded in notes payable, and stock options, via the liability method of accounting. Accordingly, all these instruments were valued at issuance utilizing the Black-Scholes valuation method, and were re-valued at each period ending date, also using the Black-Scholes valuation method. Any gain or loss from revaluation was charged to operations during the period. On December 27, 2012, we entered into agreements (the “2012 Notes Payable Extension Agreement”) with certain holders of our convertible notes which, among other things, created a minimum conversion price for the principal amount of the notes of \$0.05. Under accounting guidance provided by FASB ASC 815-40-05, this resulted in a change in accounting method for our derivative financial instruments to the equity method of accounting.

Significant Recent Accounting Pronouncements

Management does not believe that any recently issued, but not yet effective, accounting standards if currently adopted would have a material effect on the accompanying unaudited condensed consolidated financial statements.

The customer relationships acquired in the Artisan and Haley transactions are being amortized over a period of 60 and 36 months, respectively.

As detailed in ASC 350, the Company tests for goodwill impairment in the fourth quarter of each year and whenever events or changes in circumstances indicate that the carrying amount of the asset exceeds its fair value and may not be recoverable. As detailed in ASC 350-20-35-3A, in performing its testing for goodwill impairment, management has completed a qualitative analysis to determine whether it was more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. To complete this review, management followed the steps in ASC 350-20-35-3C to evaluate the fair value of goodwill and considered all known events and circumstances that might trigger an impairment of goodwill. The analysis completed in 2012, determined that there was no impairment to goodwill assets.

Pursuant to the Artisan acquisition, the Company may be obligated to pay up to another \$300,000 in the event certain financial milestones are met by April 30, 2014 (see note 3). This obligation had a fair value of \$131,000 at the time of the Artisan acquisition. During the nine months ended September 30, 2013, the Company made a payment in the amount of \$112,500 against this liability, and accrued an additional \$101,930. The amount ultimately payable to Mr. Vohaska pursuant to this obligation could increase in future periods to a maximum of an additional \$187,500.

13. INCOME TAXES

Deferred income taxes result from the temporary differences arising from the use of accelerated depreciation methods for income tax purposes and the straight-line method for financial statement purposes, and an accumulation of net operating loss carryforwards for income tax purposes with a valuation allowance against the carryforwards for book purposes.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. Included in deferred tax assets are Federal and State net operating loss carryforwards of approximately \$3.2 million, which will expire beginning in 2025 through 2029. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Due to significant changes in the Company's ownership, the Company's future use of its existing net operating losses may be limited.

Accounting for warrants and stock options

In August 2005, the Company's commitments to issue shares of common stock first exceeded its common stock authorized. At this time, the Company began to value its warrants and stock options via the liability method of accounting. Pursuant to guidance in ASC 718-40 the cost of these options was valued via the Black-Scholes valuation method when issued, and re-valued at each reporting period. The gain or loss from this revaluation was charged to compensation expense during the period. On December 27, 2012, the Company entered into the 2012 Notes Payable Extension Agreement with certain holders of its convertible notes which, among other things, created a minimum conversion price for the principal amount of the notes. Under accounting guidance provided by FASB ASC 815-40-05, this resulted in a change in accounting method for our derivative financial instruments to the equity method of accounting. We revalued our derivative liabilities at December 27, 2012, and charged the gain or loss from this revaluation to compensation expense during the period.

Critical Accounting Policy and Estimates

Use of Estimates in the Preparation of Financial Statements

The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. These estimates include certain assumptions related to doubtful accounts receivable, stock-based services, valuation of financial instruments, and income taxes. On an on-going basis, we evaluate these estimates, including those related to revenue recognition and concentration of credit risk. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. We believe our estimates have not been materially inaccurate in past years, and our assumptions are not likely to change in the foreseeable future.

On August 25, 2005, the Company entered into contracts which obligated the Company under certain circumstances to issue shares of common stock in excess of the number of shares of common stock authorized. Under accounting guidance provided by FASB ASC 815-40-05, effective August 25, 2005 the Company began to account for all derivative financial instruments, including warrants, conversion features embedded in notes payable, and stock options, via the liability method of accounting. Accordingly, all these instruments were valued at issuance utilizing the Black-Scholes valuation method, and were re-valued at each period ending date, also using the Black-Scholes valuation method. Any gain or loss from revaluation was charged to operations during the period.

On December 27, 2012, the Company entered into agreements (the “2012 Notes Payable Extension Agreement”) affecting the terms of certain of its convertible notes payable. One of these changes established a minimum conversion price for these notes of \$0.05. Under accounting guidance provided by FASB ASC 815-40-05, this resulted in a change in accounting method for these instruments from derivative accounting to equity accounting. The Company revalued these instruments at December 27, 2012 using the Black-Scholes valuation method. Any gain or loss in value was charged to operations.

Background

We were initially formed in June 1979 as Alpha Solarco Inc., a Colorado corporation. From June 1979 through February 2003, we were either inactive or involved in discontinued business ventures. In February 2003 we changed our name to Fiber Application Systems Technology, Ltd.

Table of Contents

In January 2004, we changed our state of incorporation by merging into Innovative Food Holdings, Inc. (“IVFH”), a Florida shell corporation. As a result of the merger we changed our name to that of Innovative Food Holdings, Inc. In February 2004 we also acquired Food Innovations, Inc. (“FII”) a Delaware corporation incorporated on January 9, 2002 and through FII and our other subsidiaries we are in the business of national food distribution and sales using third-party shippers.

On May 18, 2012, the Company executed a Stock Purchase Agreement to acquire all of the issued and outstanding shares of Artisan Specialty Foods, Inc., an Illinois corporation (“Artisan”), from its owner, Mr. David Vohaska. The purchase price was \$1.2 million, with up to another \$300,000 (with a fair value of \$131,000) payable in the event certain financial milestones are met by April 30, 2014. The purchase price was primarily financed via a loan from Alpha Capital in the principal amount of \$1,200,000. Prior to the acquisition, Artisan was a vendor and had sold products to the Company.

Transactions With a Major Customer

Transactions with a major customer and related economic dependence information is set forth (1) following our discussion of Liquidity and Capital Resources, (2) Concentrations of Credit Risk in Note 2 to the Condensed Consolidated Financial Statements, and (3) as the fourth item under Risk Factors.

Relationship with U.S. Foods

In February 2010, one of our subsidiaries, Food Innovations, signed a new contract with U.S. Foods (“USF”). This contract with USF expired on December 31, 2012. However, the contract provides that it automatically renews for an additional 12-month term unless either party notifies the other in writing 30 days prior to the end date of its intent not to renew. Inasmuch as neither party gave the requisite notice, the agreement was automatically extended through December 31, 2013. We believe that although a significant portion of our sales occurs through the USF sales force, the success of the program is less contingent on a contract than on the actual performance and quality of our products. Other than our business arrangements with USF, we are not affiliated with either USF or its subsidiary, Next Day Gourmet, L.P. During the three months ended September 30, 2013 and 2012, sales to USF accounted for 71.5% and 65.4% of total sales, respectively. During the nine months ended September 30, 2013 and 2012, sales to USF accounted for 70.8% and 76.4% of total sales, respectively.

RESULTS OF OPERATIONS

The following is a discussion of our financial condition and results of operations for the three and nine months ended September 30, 2013 and 2012.

This discussion may contain forward looking-statements that involve risks and uncertainties. Our future results could differ materially from the forward looking-statements discussed in this report. This discussion should be read in conjunction with our unaudited condensed consolidated financial statements, the notes thereto and other financial information included elsewhere in the report.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

Revenue

Revenue increased by \$874,673, or approximately 17%, to \$6,005,091 for the three months ended September 30, 2013 from \$5,130,418 in the prior year. The increase was attributable to year-over-year organic sales growth.

We continue to assess the potential of new revenue sources from the manufacture and sale of proprietary food products and additional sales channel opportunities and will implement that strategy if, based on our analysis, we deem it beneficial to us.

Any changes in the food distribution operating landscape that materially hinders our current ability and/or cost to deliver our products to our customers could potentially cause a material impact on our net revenue and gross margin and, therefore, our profitability and cash flows could be adversely affected.

Currently, a small portion of our revenues comes from imported products or international sales. Our current sales from such segments may be hampered and negatively impacted by any economic tariffs that may be imposed in the United States or in foreign countries.

See "Transactions with Major Customers" and the Securities and Exchange Commission's ("SEC") mandated FR-60 disclosures following the "Liquidity and Capital Resources" section for a further discussion of the significant customer concentrations, loss of significant customer, critical accounting policies and estimates, and other factors that could affect future results.

Table of Contents

Cost of goods sold

Our cost of goods sold for the three months ended September 30, 2013 was \$4,326,573, an increase of \$454,129 or approximately 12% compared to cost of goods sold of \$3,872,444 for the three months ended September 30, 2012. Cost of goods sold is primarily made up of the following expenses for the three months ended September 30, 2013: cost of goods of specialty, meat, game, cheese poultry and other sales categories in the amount of \$3,400,858; and shipping expenses in the amount of \$769,037. The cost of goods sold increase is mainly associated with the increase in sales. Total gross margin was approximately 28% of sales in 2013, compared to approximately 25% of sales in 2012.

In 2013, we continued to price our products in order to gain market share and increase the number of our end users. We were successful in both increasing sales and increasing market share. We currently expect, if market conditions and our product revenue mix remain constant, that our cost of goods sold will either remain stable or likely improve slightly.

Selling, general and administrative expenses

Selling, general, and administrative expenses increased by \$374,487 or approximately 29% to \$1,282,722 during the three months ended September 30, 2013 compared to \$908,235 for the three months ended September 30, 2012. Revenue

Revenue increased by \$4,362,765, or approximately 34%, to \$17,131,361 for the nine months ended September 30, 2013 from \$12,768,596 in the prior year. \$1,848,436, or approximately 42%, of the increase was attributable to the acquisition of Artisan, while \$2,514,329, or approximately 58%, of the increase was attributable to year-over-year organic growth.

We continue to assess the potential of new revenue sources from the manufacture and sale of proprietary food products and additional sales channel opportunities and will implement that strategy if, based on our analysis, we deem it beneficial to us.

Any changes in the food distribution operating landscape that materially hinders our current ability and/or cost to deliver our products to our customers could potentially cause a material impact on our net revenue and gross margin and, therefore, our profitability and cash flows could be adversely affected.

Currently, a small portion of our revenues comes from imported products or international sales. Our current sales from such segments may be hampered and negatively impacted by any economic tariffs that may be imposed in the United States or in foreign countries.

See "Transactions with Major Customers" and the Securities and Exchange Commission's ("SEC") mandated FR-60 disclosures following the "Liquidity and Capital Resources" section for a further discussion of the significant customer concentrations, loss of significant customer, critical accounting policies and estimates, and other factors that could affect future results.

Cost of goods sold

Our cost of goods sold for the nine months ended September 30, 2013 was \$12,391,963, an increase of \$2,746,923, or approximately 28%, compared to cost of goods sold of \$9,645,040 for the nine months ended September 30, 2012. Cost of goods sold is primarily made up of the following expenses for the nine months ended September 30, 2013: cost of goods of specialty, meat, game, cheese poultry and other sales categories in the amount of \$9,511,193; and shipping expenses in the amount of \$2,747,154. The cost of goods sold increase is mainly associated with the increase in sales. Total gross margin improved to approximately 28% of sales in 2013, compared to approximately 25% of sales in 2012.

In 2013, we continued to price our products in order to gain market share and increase the number of our end users. We were successful in both increasing sales and increasing market share. We currently expect, if market conditions and our product revenue mix remain constant, that our cost of goods sold will either remain stable or likely improve slightly.

Selling, general and administrative expenses

Selling, general, and administrative expenses increased by \$1,001,635 or approximately 37% to \$3,691,679 during the nine months ended September 30, 2013 compared to \$2,690,044 for the nine months ended September 30, 2012. Selling, general and administrative expenses were primarily made up of the following for the nine months ended September 30, 2013: payroll and related expenses, including employee benefits, in the amount of \$2,216,726; facilities expense in the amount of \$376,414; amortization and depreciation in the amount of \$196,057; insurance expense in the amount of \$197,901; consulting and professional fees in the amount of \$137,606; bad debt expense in

the amount of \$100,709; computer support expenses in the amount of \$93,912; banking and credit card fees in the amount of \$78,880; travel and entertainment expenses in the amount of \$75,005; share based compensation in the amount of \$35,662; and advertising expense in the amount of \$15,356. The increase in selling, general, and administrative expenses was primarily due to the acquisition of Artisan which has higher selling general and administrative expenses than Innovative Food Holdings' historical levels, costs associated with the Company's move into its new facility and improvements in the Company's Florida warehouse, and higher selling expenses and expansion expenses associated with Artisan and The Haley Group and Gourmet Foodservice Group. We expect our selling, general, and administrative expenses to remain steady for the remainder of 2013.

The Company cannot predict whether this additional financing will be in the form of equity or debt, or be in another form. The Company expects that any sale of additional equity securities or convertible debt will result in additional dilution to our stockholders.
