**Honda to Release the FORZA Z ABS, an ABS-equipped Version of
the FORZA Z 250cc Scooter**

March 14, 2005 Honda Motor Co., Ltd today announced that it will offer a special version of its high-tech FORZA Z 250cc scooter equipped with a front/rear-wheel-linked anti-lock braking system for enhanced braking performance and increased rider confidence. The new FORZA Z ABS will be released for sale Saturday, March 19th, 2005.

Popular since its release in July 2004, the FORZA Z features the Honda Smart Card system for effective theft deterrence, a Honda S-Matic transmission that allows riders to choose between automatic and six-speed manual modes, and other advanced Honda technologies.

The new front/rear-wheel-linked anti-lock braking system on the FORZA Z ABS offers both a Hydraulic Combined Brake System, which applies the brakes on the front and rear wheels simultaneously just by using the left brake lever, and ABS (Anti-lock Braking System) to prevent rear wheel lock-up when the brakes are over-applied.

In addition, Honda has redesigned the seat surface and increased seat cushioning for an even greater degree of riding comfort. Gold-colored front brake calipers and a meter panel cover in the same lustrous color as the body give the FORZA Z ABS a quality look. Honda has also emphasized the scooter's front/rear-wheel-linked anti-lock braking system by placing stickers marked "ABS" by the ABS indicator lamp on the instrument panel, and on the right and left sides of the front fender cover.

The FORZA Z ABS will be available in two colors: an intrepid Pearl Cyber Black and a vivid Pearl Milky White.

A nimble ride and sporty, original styling have won the FORZA a accolades since its release in 2000. The scooter underwent a full model change in 2004 that broadened its appeal, particularly among young people in their 20's, by offering greater comfort to both the rider and the passenger while maintaining its high level of quality.

	FORZA Z ABS
Annual sales target (Japan)	2,000 vehicles
Manufacturer's suggested retail price	
FORZA Z ABS	693,000 yen (660,000 yen excluding consumption tax)

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Note: The price (recycling fee included) does not include expenses such as insurance, tax (except for consumption tax), and registration.

Publicity materials relating to the FORZA Z ABS are available at the following URL:

**Honda Launches Super Motard-Style Mid-Size Sport Bike,
the XR400 Motard**

Tokyo, March 16, 2005 Honda Motor Co., Ltd. announced the introduction of the XR400 Motard, a Super Motard-style* sport bike equipped with an air-cooled, single-cylinder, 400 cc, OHC, 4-stroke engine and 17" on-road front and rear tires. The XR400 Motard goes on sale Tuesday, March 29.

The air-cooled, single-cylinder, 400 cc, OHC, 4-stroke engine of the XR400 Motard delivers ample power. The special-specification carburetor diameter and transmission gear ratios provide increased intake and exhaust efficiency, excellent acceleration, and highly responsive output at low and mid-range speeds.

The 17" on-road tires and light aluminum wheels make the XR400 very easy to drive in the city. The semi-double cradle frame is specially designed to complement the 17" tires. In addition, every part of the frame, including the head pipe area, has been strengthened for exceptional rigidity and highly stable turning.

The front suspension employs an inverted front fork for superior shock-absorption and high-performance steering, while the suspension stroke has been optimized for stable on-road cruising. The 276 mm diameter front and 220 mm diameter rear hydraulic disc brakes offer superior braking control performance.

The tank shroud and off-road front visor reflect the XR400's Super Motard stylistic origins. Two color schemes are available: a brilliant Los White and the Extreme Red used on the CRF series motocross racing bikes.

* Popular in Europe recently, Super Motard racing features off-road bikes with small-diameter wheels and on-road tires competing for speed over asphalt and dirt surfaces.

	XR400 Motard
Annual sales target (Japan):	1,500 units
Annual sales target (Japan):	
Manufacturer's suggested retail price	¥630,000 (¥600,000 excluding consumption tax)

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Price (recycling fee included) is for reference only and does not include insurance, taxes (except consumption tax), registration, or other fees.

Publicity information relevant to the XR400 is available at the following URL:

<http://www.honda.co.jp/PR/>

-1-

Table of Contents

=XR400 Main Features=

Powerful, responsive engine

The air-cooled, single-cylinder, 400 cc, OHC, 4-stroke engine employs a radial four-valve combustion chamber (RFVC) structure for excellent combustion efficiency. The 34 mm carburetor diameter and transmission gear ratios, both special-specification, improve intake and exhaust efficiency for superb acceleration at low- to mid-range speeds and powerful engine responsiveness. In addition, the reduced moment of inertia of the ACG rotor improves throttle response. These features add up to an engine not only ideal for city driving, but also powerful enough to endure tough Super Motard races.

Newly designed semi-double cradle frame

The special-specification semi-double cradle frame complements the 17" on-road tires and light aluminum wheels. Every part of the frame, including the head pipe and swing arm, has been strengthened for exceptional rigidity and highly stable turning performance.

Advanced suspension design

For excellent shock and vibration control, the front suspension employs a 43 mm diameter inverted fork. In combination with a low center of gravity, the front suspension stroke of 245 mm and rear suspension stroke of 210 mm help realize exceptional cruising stability. Hydraulic disc brake diameters for the front and rear are 276 mm and 220 mm, respectively, allowing for ample surface area, effective heat dissipation, and highly stable braking. In addition, the 140 mm wide rear tire features extra surface area for a firm grip on the road.

Super Motard styling

As distinctive off-road elements, the tank shroud, front visor, and two-tone seat emphasize the XR400's stylistic origins in Super Motard racing.

Exciting two-color exterior

The XR400 is available in two exciting color schemes. In the first, Los White, the fender, front visor, tank shroud, and side protectors are all a brilliant White. In the Extreme Red color scheme, which emulates that of the CRF series racing bikes, the fender and tank shroud are Extreme Red while the front visor and side protectors are White. In both of these color schemes, the Black of the engine, wheel rims, and front fork protectors also provides a striking accent.

Convenient Amenities

Non-slip rubber-padded step facilitates mounting.

One-touch side cover makes air cleaner maintenance easy.

Tail bag with wire lock is located above rear fender.

Anti-theft protection includes a strengthened handle lock, a sturdy combination lock ignition key cylinder, and pre-wiring for a separately sold alarm kit*.

* The alarm kit emits an alarm warning if the bike is rocked or moved.

Honda to Build New Automobile Plant in Vietnam

Hanoi, Vietnam, March 17, 2005 Honda Vietnam Co., Ltd. (HVN), Honda's motorcycle production and sales joint venture in Vietnam, today announced that it has been granted an additional license for automobile production and sales from the Government of Vietnam.

After receiving the official license, HVN will build a new automobile manufacturing facility within the current plant site to begin its automobile business. Annual production capacity at the new factory will be 10,000 units, with production targeted to begin by mid-2006. By 2010, the investment is expected to reach approximately US\$60 million. The Honda Civic will be the first model to be produced in Vietnam as this model is already very popular in Asia. HVN will also promote establishment of a new automobile dealer network.

The automobile market in Vietnam has been growing rapidly over the past few years, and reached 40,000 units in 2004. As the economy of Vietnam continues to grow, Honda expects further growth of the automobile market in Vietnam. At the same time, the motorcycle market in Vietnam has become the third largest in among ASEAN countries after Thailand and Indonesia. HVN began motorcycle production in December 1997, HVN's cumulative motorcycle sales has reached approximately 1.84 million units and last year's motorcycle sales in Vietnam reached 500,000 units. Local parts content of HVN-built motorcycles now exceeds 80%. By leveraging its existing supply base for motorcycle parts in Vietnam, HVN aims to realize a high local content for automobiles as well.

Honda Vietnam Co., Ltd.

Establishment:	March 1996

Honda Sets All-time February Record for Global Auto Production

March 28, 2005 Honda Motor Co., Ltd. today announced production, domestic sales, and export results for the month of February 2005. With domestic production up significantly and the Asia and North America regions setting all-time February production records, Honda established a new record for worldwide production for the month.

Domestic production in February increased 9.4% compared to the same month a year ago due primarily to increased production of popular new export models. It is the fourth consecutive month that domestic production exceeded the total from the same month a year ago. Overseas production increased 11.2% compared to the same month a year ago, exceeding the total from the previous year for the 13th consecutive month. Continuous growth in China contributed to a major production increase in Asia up 22.1% compared to the same month a year ago. Production in North America increased 10.3% compared to the same month last year due to increased output from the second line at the Alabama plant which became operational in April 2004. Honda achieved all-time records for production in Asia and North America as well as overseas production and worldwide production for the month of February.

Domestic sales for the month of February decreased 14.9% compared to the same month a year ago. The decline was due primarily to stabilizing demand for the all-new Life and the all-new Odyssey which were introduced in late 2003. The Honda Fit was Honda's best-selling car for the month and the industry's fourth best-selling model for the month on sales of 11,447 units. The Life and Odyssey, with sales of 9,534 and 6,309 units, respectively, were Honda's second and third best-selling models.

Total exports in February increased 21.3% compared to the same month a year ago, exceeding the previous year's record for the sixth consecutive month. Strong sales in North America of the all-new Acura RL (known as Legend in Japan) and the new Accord Hybrid, and continued strong sales of Jazz (known as Fit in Japan) in Europe contributed to the overall increase in exports.

Honda Provides Aid to March 28th Sumatra Earthquake Victims

Honda Motor Co., Ltd. would like to express its deepest sympathy and condolences to the victims of the March 28th earthquake which struck Sumatra, Indonesia.

In response to this tragedy, Honda will provide the following assistance to the affected area:

Honda's local operations will make a cash donation of IDR (Indonesia rupiah) 1 billion (approx. JPY (Japan yen) 11.4 million) in addition to providing 50 generators, 10 high-pressure washers and 25 backpack power sprayers with a net worth of approximately JPY 4 million.

Honda Motor Co., Ltd. will make a cash donation of JPY 10 million to the Japanese Red Cross Society (JRCS) to be designated for regional relief assistance.

Honda will continue a discount repair and assistance program for customers and dealers affected by the disaster. This program was introduced after last year's December earthquake in the region.

Notice of Record Date and Proposed Year End

Dividend for Period ending March 31, 2005

Dear Sirs or Mesdames,

Honda Motor Co., Ltd. (the "Company") intends to recommend, subject to resolution to be adopted by the Board of Directors' meeting which is scheduled to be held during the month of April 2005, to the Ordinary General Meeting of Shareholders for the annual fiscal period ending March 31, 2005, which is scheduled to be held during the month of June 2005, the distribution of a year-end cash dividend at the rate of 28.0 Japanese yen per share of the Company's Common Stock, the amount of the foregoing dividend per American Share will be 14.0 Japanese yen. Since at present the yen-dollar exchange rate is floating, the Company cannot predict any specific dollar amount, which would be obtained from the actual conversion of the yen amount of the dividend into U.S. dollar at the time of payment thereof.

This information is furnished to you in accordance to the provisions of the Company's Undertaking dated January 28, 1977 and Listing Agreement dated January 28, 1977 with your Exchange.

Yours sincerely,

HONDA MOTOR CO., LTD.

To Our Shareholders

n Third Quarter Results

Honda's consolidated net income for the fiscal third quarter ended December 31, 2004 totaled ¥150.7 billion (\$1,447 million), almost the same level as the corresponding period in 2003. Basic net income per common share for the quarter amounted to ¥161.78 (\$1.55), compared with ¥158.66 for the corresponding period in 2003. Two of Honda's American depositary shares represent one common share.

Consolidated net sales and other operating revenue (herein referred to as revenue) for the fiscal third quarter amounted to ¥2,133.8 billion (\$2,047.6 million), an increase of 7.1% from the corresponding period in 2003.

Revenue included currency translation effects, which had a negative impact on foreign currency denominated revenue from Honda's overseas subsidiaries translated into yen. Honda estimates that had the exchange rate of yen remained unchanged from the same period in 2003, revenue for the quarter would have increased approximately 8.5%.

Consolidated operating income for the fiscal third quarter totaled ¥157.6 billion (\$1,513 million), a decrease of 6.9% compared with the corresponding period in 2003.

This decrease in operating income was primarily due to the negative impacts of appreciation of the yen against the U.S. dollar, and to an increase in selling, general and administrative (SG&A) expenses, offsetting positive impacts of increased profit coming from higher revenue and Honda's ongoing cost reduction effects.

Consolidated income before income taxes for the fiscal third quarter totaled ¥187.9 billion (\$1,804 million), a decrease of 7.7% from the corresponding period in 2003.

With respect to Honda's sales in the fiscal third quarter by business category, motorcycle unit sales increased 4.9% from the corresponding period in 2003, to 2,483 thousand units. Of them, unit sales in Japan decreased 9.3%, to 78 thousand units, and overseas unit sales increased 5.4%, to 2,405 thousand units, due mainly to increased unit sales of parts for local production in Indonesia, and favorable sales in Europe and Other Regions, particularly Brazil. Revenue from sales to unaffiliated customers increased 6.8%, to ¥241.8 billion (\$2,321 million). Operating income decreased 28.6%, to ¥5.1 billion (\$49 million), due primarily to a decrease in unit sales in North America, offsetting increased profit from higher revenue in Asia and Europe.

Honda's unit sales of automobiles increased 9.4% from the corresponding period in 2003, to 817 thousand units. In Japan, unit sales of automobiles decreased 2.3%, to 173 thousand units. Overseas unit sales increased 13.0%, to 644 thousand units. Increased unit sales of parts for local production in China and continued favorable sales in Europe and Other Regions, particularly Brazil, were the major contributing factors for this increase in unit sales.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Revenue from sales to unaffiliated customers increased 7.0%, to ¥1,744.6 billion (\$16,741 million), during the quarter due to increased unit sales, offsetting negative currency translation effects. Operating income decreased 7.0%, to ¥126.0 billion (\$1,209 million), due mainly to negative currency effects caused by the appreciation of the yen against the U.S. dollar, which offset positive impacts of higher profit from increased revenue and ongoing cost reduction effects.

Revenue from sales to unaffiliated customers in financial services increased 15.0%, to ¥67.6 billion (\$649 million), due to the growth of the automobile business in North America. Operating income decreased 2.4%, to ¥23.9 billion (\$230 million), due primarily to negative currency translation effects caused by the appreciation of the yen against the U.S. dollar and an increase in interest rates.

Unit sales of power products in Japan totaled 95 thousand units, a decrease of 12.8%, and overseas unit sales was 949 thousand units, which was almost the same level as the third quarter in 2003. Total unit sales of power products were 1,044 thousand units, a decrease of 1.9% compared to the corresponding period in 2003, due primarily to decreased sales of general-purpose engines in Europe, offsetting increased sales of general-purpose engines for original equipment manufacturers (OEMs) and generators and water pumps in North America.

Revenue from sales to unaffiliated customers in power product & other businesses increased 4.1%, to ¥79.7 billion (\$765 million), due mainly to changes in the model mix. Operating income increased 22.1%, to ¥2.4 billion (\$24 million).

Table of Contents

n Nine-Month Results

Honda's consolidated net income for the fiscal nine months ended December 31, 2004 totaled ¥392.1 billion (\$3,763 million), an increase of 0.5% from the previous year. Basic net income per common share for the fiscal nine months amounted to ¥418.99 (\$4.02), compared with ¥407.87 for the corresponding period a year ago.

Revenue for the fiscal nine months amounted to ¥6,300.5 billion (\$60,460 million), an increase of 4.7% from last year.

Revenue included the negative effect of currency translation. Honda estimates that if the exchange rate of the yen had not changed from the previous year, revenue for the year would have increased approximately 8.1%.

Consolidated operating income for the fiscal nine months totaled ¥490.5 billion (\$4,707 million), an increase of 0.7% compared with the corresponding period last year. This increase in operating income was due primarily to increased profit from higher revenue and continuing cost reduction effects, offsetting such negative impacts as appreciation of the yen against the U.S. dollar and an increase in SG&A and research and development (R&D) expenses.

Consolidated income before income taxes for the fiscal nine months totaled ¥527.6 billion (\$5,063 million), a decrease of 1.5% compared with the previous year.

n Honda Ridgeline Truck Unveiled at 2005 North American International Auto Show

The Honda *Ridgeline* truck made its world debut at the 2005 North American International Auto Show as American Honda Motor Co., Inc., announced plans for the launch of its innovative new truck at Honda dealerships nationwide in March of this year as a 2006 model.

Developed as a next-generation truck, the *Ridgeline* takes advantage of an innovative new truck body construction and a steel-reinforced composite bed to deliver true truck capabilities, including half-ton hauling and 5,000-pound towing, along with next-generation truck styling, performance and packaging. The *Ridgeline* boasts the pickup truck segment's first four-wheel, fully independent suspension system combined with an advanced fully automatic four-wheel drive system to deliver superior handling and a smoother ride over traditional truck designs, as well as such exclusive new features as a Dual-Action tailgate and the industry's first In-Bed Trunk.

The truck market is evolving and we think *Ridgeline* is at the leading edge of the trend, said Dick Colliver, executive vice president of American Honda Motor. The Honda *Ridgeline* delivers all the capabilities of a truck with none of the traditional truck trade-offs. It combines Honda innovation, Honda engineering and Honda's commitment to environmental and safety leadership in a next-generation truck package.

Honda Ridgeline

n Acura RD-X Concept Debuts at 2005 North American International Auto Show

The Acura *RD-X Concept* sports utility vehicle (SUV) debuted at the 2005 North American International Auto Show. The *RD-X Concept* features Acura's new Super Handling All-Wheel Drive (SH-AWD) system and combines the performance of a sports sedan with the all-wheel drive capability and functional utility of an SUV. Acura displayed a previous design study of the *RD-X Concept* two years ago at the Detroit show, and this latest concept hints strongly at the production vehicle, which the division has announced will go on sale in 2006.

The *RD-X Concept*'s powertrain features the groundbreaking SH-AWD system that debuted on the 2005 Acura *RL* luxury performance sedan. This system distributes torque not only between the front and rear wheels but also between the left and right rear wheels. The result is superior traction on all surfaces and in all weather conditions, as well as increased cornering precision. The *RD-X Concept* highlights Acura's commitment to expanding its light truck lineup and will be assembled at Honda of America Manufacturing, Inc., in Marysville, Ohio.

Japan

n Honda FC Stack -Equipped FCX, Featuring Sub-Freezing Temperature Start-Up Capability, Leased to Hokkaido Prefectural Government

Honda Motor Co., Ltd., delivered a Honda *FC Stack*-equipped *FCX*, the world's first fuel cell vehicle capable of starting in sub-freezing temperatures, to the Hokkaido Prefectural Government. A ceremony held at the Hokkaido Prefectural Government Office was attended by Hokkaido Governor Harumi Takahashi and Honda Motor Senior Managing Director Satoshi Dobashi.

The lease is the first in Japan of a fuel cell vehicle in a region that experiences sub-freezing temperatures. In December 2004, Honda leased an *FCX* to the State of New York, also a cold-weather area. Since December 2002, Honda has delivered a total of five *FCX* vehicles in the Tokyo metropolitan area to the following organizations: the Japanese Cabinet Office; the Ministry of the Environment; the Ministry of Economy, Trade and Industry; Iwatani International Corporation; and Idemitsu Kosan Co., Ltd.

FCX delivery ceremony

n Guangzhou Honda to Build Second Auto Plant in China

Honda Motor Co., Ltd., announced that Guangzhou Honda Automobile Co., Ltd. (GHAC), an automobile production and sales joint venture with Honda and Guangzhou Auto Group Corp. in China, plans to build a second auto plant. The new plant will be located in the Zeng Cheng region in Guangzhou, to the east of the existing Guangzhou Honda plant, and will have an annual production capacity of 120,000 units. Total investment in this project is expected to be approximately R.M.B. 2.2 billion (\$266 million), with the new plant to be operational in the latter half of 2006.

GHAC's new plant will accommodate production processes, including stamping, welding, painting, assembly and final inspection. The new plant will pursue high quality and efficiency by utilizing the production know-how of the existing plant, as well as adopting the advanced production equipment of Honda's flexible New Manufacturing System to achieve Honda's global standard for advanced levels of quality, efficiency and flexibility. In addition, the new plant will reflect Honda's Green Factory concept to realize a more people- and environment-friendly factory.

n Dongfeng Honda to Quadruple Automobile Production Capacity in China

Dongfeng Honda Automobile (Wuhan) Co., Ltd. (WDHAC), the automobile production and sales joint venture of Honda and Dongfeng Motor Corp. in China, announced plans to expand its annual production capacity from the current 30,000 units to 120,000 units by early 2006. Construction to expand the existing plant is planned to begin within this year, with total investment expected to be approximately R.M.B. 2.8

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

billion (\$340 million). The plant will employ approximately 2,800 associates at full capacity.

Major construction activities to expand the annual capacity to 120,000 units will include more than tripling the size of plant buildings, major changes in facility layout, building a new painting facility and adding stamping, plastic injection molding and engine parts processing, in addition to upgrades of existing equipment and processes. Further, WDHAC will strengthen its R&D operations. Through this expansion, the WDHAC plant will adopt Honda's flexible New Manufacturing System.

Notes:

1. Segmentation of Business

Business segment is based on Honda's business organization and the similarity of the principal products included within each segment as well as the relevant markets for such products.

2. Principal products of each segment:

Business	Sales	Principal Products
Motorcycle Business	Motorcycles, all-terrain vehicles (ATVs), personal watercraft and relevant parts	Motor-driven cycles, mini- and small-sized motorcycles, ATVs, personal watercraft
Automobile Business	Automobiles and relevant parts	Compact cars, sub-compact cars, minivehicles
Financial Services	Financial and insurance services	N/A
Power Product & Other Businesses	Power products and relevant parts, and others	Power tillers, generators, general-purpose engines, lawn mowers, outboard engines
