NOTES TO FINANCIAL STATEMENTS

(Amounts in Millions of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL

Chunghwa Telecom Co., Ltd. (Chunghwa or the Company) was incorporated on July 1, 1996 in the Republic of China (ROC) pursuant to the Telecommunications Act No. 30. The Company is a company limited by shares and, prior to August 2000, was wholly owned by the Ministry of Transportation and Communications (MOTC). Prior to July 1, 1996, the current operations of Chunghwa were carried out under the Directorate General of Telecommunications (DGT). The DGT was established by the MOTC in June 1943 to take primary responsibility in the development of telecommunications infrastructure and to formulate policies related to telecommunications. On July 1, 1996, the telecom operations of the DGT were spun-off and Chunghwa continues to carry out the business and the DGT continues to be the industry regulator.

As a dominant telecommunications service provider of fixed-line and cellular telephone services, within the meaning of applicable telecommunications regulations of the ROC, the Company is subject to additional requirements imposed by the MOTC.

The MOTC is in the process of privatizing the Company by reducing the government ownership to below 50% in stages. Certain of the Company's common shares were sold, in connection with the foregoing privatization plan, in domestic public offerings at various dates from August 2000 to July 2003. Certain of the Company's common shares were also sold to its employees at various dates from October 2000 to April 2005. In July, 2003 the MOTC sold the Company's common shares in an international offering of securities in the form of American Depository Shares (ADS). The MOTC intends to continue to sell the Company's common shares in the ROC and throughout the process of privatization to the Company's employees. As of April 15, 2005 the MOTC owns 64.85% shares of the Company.

The Company's common shares were listed and traded on the Taiwan Stock Exchange and the New York Stock Exchange on October 27, 2000 and on July 17, 2003, respectively.

These foreign currency forward exchange contracts are denominated in the same currency in which the underlying foreign currency liabilities are denominated and bear a contract value and maturity date that approximate the value and expected settlement date, respectively, of the underlying transactions. For contracts that are designated and effective as hedges, unrealized gains and losses on open contracts at the end of each accounting period, resulting from changes in the fair value of these contracts, are recognized in earnings in the same period as gains and losses on the underlying foreign denominated receivables are recognized and generally offset. Gains and losses on forward contracts and foreign denominated liabilities are included in other income (expense), net. The Company does not enter into or hold derivatives for trading or speculative purposes and only enters into contracts with highly rated financial institutions

Derivatives are recognized at fair value and included in either other current liabilities or other current assets on the balance sheet.

Recent Accounting Pronouncements

In December 2004, the FASB issued SFAS No. 123(R) Share-Based Payment. As of March 31, 2005, the Company had unused letters of credit of NT\$7,206 million (unaudited).

The Company has a commitment to contribute NT\$2,500 million to a Fixed Line Fund administered by the Ministry of Interior Affairs and Taiwan Power Company, of which NT\$1,000 million was contributed by the Company on June 30, 1995. If the balance of the Fixed Line Fund is not sufficient for its purpose, the above three parties will determine when to raise additional funds and the contribution amounts from each party. In addition, the Company has a commitment to contribute NT\$2,000 million to a Piping Fund administered by the Taipei City Government, of which NT\$1,000 million was contributed by the Company on August 15, 1996.

11. LITIGATION

The Company is involved in various legal proceedings of a nature considered normal to its business. It is the Company's policy to accrue for amounts related to these legal matters when it is probable that a liability has been incurred and the amount is reasonably estimable.

The Company believes that the various asserted claims and litigation in which it is involved will not materially affect its financial position, future operating results or cash flows, although no assurance can be given with respect to the ultimate outcome of any such claim or litigation.

12. INFORMATION ON FINANCIAL INSTRUMENTS

a. The derivative financial instruments

The Company enters into forward contracts to reduce its exposure to foreign currency risk and variability in operating results due to fluctuations in exchange rates underlying the value of liabilities denominated in foreign currencies until such liabilities are paid. There were no foreign currency forward exchange contracts outstanding as of March 31, 2005. The net realized exchange loss for the three months ended March 31, 2004 was of NT\$22 million (unaudited).

b. The non-derivative financial instruments are as follows:

	December 31, 2004		March 31, 2005	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value

F-12

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

- 1) Cash and cash equivalents. The carrying amounts approximate fair values because of the short maturity of those instruments.
- 2) Short-term investments. The carrying amounts approximate fair values because of the short maturity of those instruments.
- 3) Investments in unconsolidated companies are accounted for using the equity method. The fair value is based on net asset values of the investments in unconsolidated companies if quoted market prices are not available.
- 4) Refundable deposits. The carrying amounts approximate fair values as the average lease term associated with these deposits is approximately one year.
- 5) Customers' deposits. The fair value is the discounted value based on projected cash flows. The projected cash flows were discounted using the average expected customer service periods.
- 6) Long-term loans (including current portion). The fair value is the discounted value based on projected cash flows. The projected cash flows were discounted using the maturity dates of long-term loans.

13. SEGMENT REPORTING

Operating segments are defined as components of an enterprise regarding which separate financial information is available for regular evaluation by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance.

The Company organizes its business segments based on the various types of telecommunications services provided to customers. The major business segments operated by the Company are classified as below:

Local operations - the provision of local telephone services;

DLD operations - the provision of domestic long distance call services;

ILD operations - the provision of international long distance call services;

Cellular operations - the provision of cellular and related services;

Paging operation - the provision of paging and related services;

Internet and data operation - the provision of Internet access, lease line, and related services;

Edgar Filing: CHUNGHWA TELECOM CO LTD - Form 6-K

All other operations - the services other than the above six categories, such as carrying out project research and providing training.

The operating segments are managed separately because each operating segment represents a strategic business unit that serves different markets. All the operating segments of the Company have been aggregated into the above reportable segments.

F-13

The Company evaluates performance based on several factors using information prepared on the ROC government regulations basis. The information below is provided on this basis with a summary of US GAAP adjustments to reconcile to the amounts presented in the statement of operations. The Company does not allocate interest and other income, interest expense or taxes to operating segments, nor does the Company's chief operating decision maker evaluate operating segments on these criteria. Except as discussed above, the accounting policies for segment reporting are the same as for the company as a whole. The Company's primary measure of segment profit is based on income or loss from operations.
