1.Date of the investor/press conference: 2007/02/07

2.Location of the investor/press conference: 3rd Floor, Far Eastern Plaza Hotel, 201 Tunhwa South Rd., Sec. 3, Taipei

3.Financial and business related information:

United Microelectronics Corporation (NYSE: UMC; TSE: 2303) (UMC or the Company) today announced its unconsolidated operating results for the fourth quarter of 2006. Year-over-year revenue decreased by 4.9 % to NT\$26.11 billion from NT\$27.47 billion, and a 6.2% QoQ decrease from NT\$27.85 billion in 3Q06. The net income was NT\$5.69 billion, increased 86.9% from NT\$3.04 billion in 4Q05. The EPS for the fourth quarter in 2006 was NT\$0.33. The revenue was NT\$104.10 billion and the EPS was NT\$1.81 in 2006.

Wafer shipments in the fourth quarter were 783 thousand 8-inch equivalent wafers, decreased by 2% compared to last quarter. The utilization rate for the quarter was 76%. The percentage of revenue from 90nm and below business kept on 21% in 4Q06, and the percentage of revenue from 90nm and 65nm was 17% and 1% respectively in 2006.

We believe that foundry market will experience mild growth in 2007. The inventory correction is ongoing in 1Q07, but should come back smoothly in the second quarter. Most of our customers are expecting demand to be strong in the second half, said UMC Chairman and CEO, Dr. Jackson Hu.

Dr. Hu continued, The latest industry trend is the acceleration of IDMs adopting a Fab-lite and fabless strategy. We believe that this is a positive industry trend and a win-win situation for the both IDMs and foundries and a strong affirmation of foundry R&D capabilities. In recent years, UMC has successfully delivered 90nm and 65nm products through joint efforts between our R&D team and our IDM and Fabless partners, with 45nm development now progressing smoothly. We anticipate an even closer partnership with our IDM customers and partners for advanced technology development, and this will clearly contribute to our long-term growth prospects.

The capital reduction plan that we recently announced is another topic that has generated great interest. We decided to carry out this capital reduction after carefully evaluation. We have determined that cash flows generated from UMC's future operations will be sufficient for the continued expansion of advanced manufacturing capacity, including our second 300mm fab in Taiwan's Tainan Science Park

Over the past three years, we have concentrated our efforts on the development of advanced process technologies and the improvement of product yields. This enabled us to expand our customer portfolio and significantly increase our 300mm utilization, surpassing 90% utilization in Q3 2006. When demand picks up again later this year, we expect to experience similar positive results. The number one goal for everyone within UMC is to quickly increase capacity utilization to improve company profits. Continued

progress for advanced technology will also help further expand our customer base, and increase utilization rate. As long as we strategically time our capacity expansion, we will see the economic rewards. I believe that with our positive direction, income from our operations will account for the majority of our revenue in coming years.
