(I.R.S. Employer

Identification No.)

45 Fremont Street

San Francisco, California 94105

Attn: Product Management Team

Intermediary Investor and Exchange-Traded Products Group

(Address of principal executive offices)

(415) 597-2000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Edgar Filing: ISHARES COMEX GOLD TRUST - Form 10-K

iShares
(Title of class)

American Stock Exchange
(Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one)

Large accelerated filer ☒

Accelerated filer ☐

Non-accelerated filer ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes ☐ No ☒

As of June 30, 2006, the registrant had 13,300,000 shares outstanding. The aggregate market value of the shares held by non-affiliates was approximately \$814,359,000.

DOCUMENTS INCORPORATED BY REFERENCE:

None.

Part I

Item 1. Business.

The purpose of the trust is to own gold transferred to the trust in exchange for shares issued by the trust (iShares). Each iShare represents a fractional undivided beneficial interest in the net assets of the trust. The assets of the trust consist primarily of gold held by the custodian on behalf of the trust. However, there may be situations where the trust will unexpectedly hold cash. For example, a claim may arise against a third party, which is settled in cash. In situations where the trust unexpectedly receives cash or other assets, no new iShares will be issued until after the record date for the distribution of such cash or other property has passed.

The trust was formed on January 21, 2005 when an initial deposit of gold was made in exchange for the issuance of three Baskets (a Basket consists of 50,000 iShares).

Effective February 26, 2007 the sponsor of the trust is Barclays Global Investors International Inc. The initial sponsor of the trust was Barclays Global Investors, N.A. (the initial sponsor). The trustee of the trust is The Bank of New York and the custodian is The Bank of Nova Scotia.

The trust's net assets grew from \$368,339,392 at December 31, 2005 to \$907,668,832 by December 31, 2006, the trust's fiscal year-end. Outstanding shares in the trust grew from 7,150,000 shares at December 31, 2005 to 14,400,000 shares outstanding at December 31, 2006.

The activities of the trust are limited to (1) issuing Baskets of iShares in exchange for the gold deposited with the custodian as consideration, (2) selling gold as necessary to cover the sponsor's fee, trust expenses not assumed by the sponsor and other liabilities and (3) delivering gold in exchange for Baskets of iShares surrendered for redemption. The trust is not actively managed. It does not engage in any activities designed to obtain a profit from, or to ameliorate losses caused by, changes in the price of gold.

The sponsor of the registrant maintains an Internet website at www.ishares.com, through which certain information about the registrant can be accessed. Additional information regarding the trust may also be found on the SEC's EDGAR database at www.SEC.gov. The sponsor is in the process of implementing changes to its website so that the registrant's annual report on Form 10-K, quarterly reports on Form 10-Q, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, will be made available free of charge after they have been filed or furnished to the Securities and Exchange Commission.

Trust Objective

The objective of the trust is for the value of the iShares to reflect, at any given time, the price of gold owned by the trust at that time less the trust's expenses and liabilities. The iShares are intended to constitute a simple and cost-effective means of making an investment similar to an investment in gold. An investment in physical gold requires expensive and sometimes complicated arrangements in connection with the assay, transportation, warehousing and insurance of the metal. Traditionally, such expense and complications have resulted in investments in physical gold being efficient only in amounts beyond the reach of many investors. The iShares have been designed to remove the obstacles represented by the expense and complications involved in an investment in physical gold, while at the same time having an intrinsic value that reflects, at any given time, the price of the gold owned by the trust at such

Table of Contents

time less the trust expenses and liabilities. Although the iShares are not the exact equivalent of an investment in gold, they provide investors with an alternative that allows a level of participation in the gold market through the securities market.

An investment in iShares is:

Backed by gold held by the custodian on behalf of the trust.

The iShares are backed by the assets of the trust. The trustee's arrangements with the custodian contemplate that at the end of each business day there can be in the trust account no more than 430 ounces of gold in an unallocated form. Accordingly, the bulk of the trust's gold holdings is represented by physical gold, identified on the custodian's books as the property of the trust and held by the custodian in the vicinity of New York, Toronto, Montreal, London and other locations that may be authorized in the future.

As accessible and easy to handle as any other investment in shares.

Retail investors may purchase and sell iShares through traditional brokerage accounts. Because the intrinsic value of each iShare is a function of the price of only a fraction of an ounce of gold held by the trust, the cash outlay necessary for an investment in iShares should be less than the amount required for currently existing means of investing in physical gold. iShares are eligible for margin accounts.

Listed.

The iShares are listed and trade on the AMEX under the symbol IAU.

Relatively cost efficient.

Because the expenses involved in an investment in physical gold will be dispersed among all holders of iShares, an investment in iShares may represent a cost-efficient alternative to investments in gold for investors not otherwise in a position to participate directly in the market for physical gold.

Secondary Market Trading

While the objective of the trust is for the value of the iShares to reflect, at any given time, the price of gold owned by the trust at that time less the trust's expenses and liabilities, iShares may trade at, above or below their net asset value per iShare or NAV. The NAV of iShares will fluctuate with changes in the market value of the trust's assets. The trading prices of iShares will fluctuate in accordance with changes in their NAV as well as market supply and demand. The amount of the discount or premium in the trading price relative to the NAV may be influenced by non-concurrent trading hours between the major gold markets and the AMEX. While the iShares trade on the AMEX until 4:15 P.M. New York time, liquidity in the market for gold may be reduced after the close of the major world gold markets, including London, Zurich and COMEX (which usually closes from 1:30 P.M. until 2:00 P.M. New York time). As a result, during this time, trading spreads, and the resulting premium or discount, on iShares may widen. However, given that Baskets of iShares can be created and redeemed in exchange for the underlying amount of gold, the sponsor believes that the arbitrage opportunities may provide a mechanism to mitigate the effect of such premium or discount.

Table of Contents

Valuation of Gold; Computation of Net Asset Value

On each business day, as soon as practicable after 4:00 p.m. (New York time), the trustee evaluates the gold held by the trust and determines the net asset value of the trust. For purposes of making these calculations, a business day means any day other than a day when the AMEX is closed for regular trading.

The trustee values the trust's gold on the basis of that day's announced COMEX settlement price for the spot month gold futures contract. At any point in time, the spot month contract is the futures contract then closest to maturity. If there is no announced COMEX settlement price for spot month gold futures on a business day, the trustee is authorized to use the most recently announced COMEX settlement price for spot month gold futures contracts unless the trustee, in consultation with the sponsor, determines that such price is inappropriate as a basis for evaluation.

The COMEX daily settlement price for each gold futures contract is established by a subcommittee of COMEX members shortly after the close of trading in New York. The daily settlement price for each contract (delivery month) is derived from the daily settlement price for the most active futures contract month, which is not necessarily the spot month. That settlement price for the most active futures contract month is the average, rounded off to the nearest multiple of ten cents, of the highest and lowest price of the trades for that contract month reported during the last one minute of trading prior to the close of the market.

For all other gold futures contract months, which may include the spot month, the settlement prices are determined by COMEX based upon the differentials reflected in spread trades between adjacent months, such differentials being directly or indirectly related to the most active month. These differentials are determined by the average of the highest and lowest spread trades (trades based upon the differential between the price for two contract months) reported during the last fifteen minutes of trading prior to the close of the market. In the case that there were no such spread trades, the average of the bids and offers for spread transactions during that last fifteen-minute period are used. In the case that there were no such bids and offers during that time, the contracts are settled at prices consistent with the differentials for other contract months that were settled by the first or second method. If the third method is used, the subcommittee of the COMEX members establishing those settlement prices provides a record of the differentials from other contract months which formed the basis for those settlements.

If the COMEX establishes, with the approval of, or after regulatory notification to, the CFTC, rules for regularly determining a gold price that is different from that described above, the trustee, in consultation with the sponsor, may decide to evaluate the gold held by the trust using such other COMEX gold price, and the new price will become effective 60 days after notice of the trustee's decision is sent to the holders of iShares.

Once the value of the gold has been determined, the trustee subtracts all accrued fees (other than the fees to be computed by reference to the value of the trust or its assets), expenses and other liabilities of the trust from the total value of the gold and all other assets of the trust. The resulting figure is the adjusted net asset value of the trust, which is used to compute all fees (including the trustee's and the sponsor's fees) which are calculated from the value of the trust's assets.

To determine the net asset value of the trust, the trustee subtracts from the adjusted net asset value of the trust the amount of accrued fees computed from the value of the trust's assets. The trustee also determines the NAV by dividing the net asset value of the trust by the number of the iShares outstanding at the time the computation is made.

Table of Contents

Trust Expenses

The trust's only ordinary recurring expense is expected to be the sponsor's fee. In exchange for the sponsor's fee the sponsor has agreed to assume the following administrative and marketing expenses incurred by the trust: the trustee's monthly fee, the custodian's fee, AMEX listing fees, SEC registration fees, printing and mailing costs, audit fees and expenses and up to \$100,000 per annum in legal fees and expenses.

The sponsor's fee is accrued daily at an annualized rate equal to 0.40% of the adjusted net asset value of the trust and is payable monthly in arrears. The trustee will, when directed by the sponsor, and, in the absence of such direction, may, in its discretion, sell gold in such quantity and at such times as may be necessary to permit payment of the sponsor's fee and of trust expenses or liabilities not assumed by the sponsor. The trustee is authorized to sell gold at such times and in the smallest amounts required to permit such payments as they become due, it being the intention to avoid or minimize the trust's holdings of assets other than gold. Accordingly, the amount of gold to be sold will vary from time to time depending on the level of the trust's expenses and the market price of gold. The custodian has agreed to purchase from the trust, at the request of the trustee, gold needed to cover trust expenses at a price equal to the price used by the trustee to determine the value of the gold held by the trust on the date of the sale.

The initial sponsor was paid \$3,047,177 for acting as the sponsor during the period covered by this report.

Deposit of Gold; Issuance of Baskets of iShares

The trust creates and redeems iShares on a continuous basis but only in Baskets of 50,000 iShares. Only registered broker-dealers who have entered into written agreements with the sponsor and the trustee (each, an Authorized Participant) can deposit gold and receive Baskets of iShares in exchange. Upon the deposit of the corresponding amount of gold with the custodian, and the payment of the trustee's applicable fee and of any expenses, taxes or charges (such as stamp taxes or stock transfer taxes or fees), the trustee delivers the appropriate number of Baskets to the DTC account of the depositing Authorized Participant. The sponsor and the trustee maintain a current list of Authorized Participants. Gold deposited with the custodian must either (a) meet the requirements to be delivered in settlement of a COMEX gold futures contract pursuant to rules adopted by COMEX, or (b) meet the London Good Delivery Standards of the London Bullion Market Association.

Before making a deposit, the Authorized Participant must deliver to the trustee a written purchase order indicating the number of Baskets it intends to acquire and the location or locations where it expects to make the corresponding deposit of gold with the custodian. The date the trustee receives that order determines the amount of gold the Authorized Participant needs to deposit (such amount, the Basket Gold Amount). However, orders received by the trustee after 4:00 p.m. (New York time) on a business day are treated as received on the next following business day. Gold can be delivered to the custodian in the vicinity of New York, Toronto, Canada, Montreal, Canada, London, England, or at other locations that may be authorized in the future.

The Basket Gold Amount necessary for the creation of a Basket changes from day to day. The initial Basket Gold Amount (in effect at the time of the creation of the trust) was 5,000 fine ounces of gold. On each day that the AMEX is open for regular trading, the trustee adjusts the quantity of gold constituting the Basket Gold Amount as appropriate to reflect sales of gold, any

Table of Contents

loss of gold that may occur, and accrued expenses. The computation is made by the trustee as promptly as practicable after 4:00 p.m. (New York time). See Valuation of Gold; Computation of Net Asset Value for a description of how the COMEX determines settlement prices, including the settlement price for the spot month gold futures contract and how the trustee determines the NAV. The trustee determines the Basket Gold Amount for a given business day by multiplying the NAV by the number of iShares in each Basket (50,000) and dividing the resulting product by that day's COMEX settlement price for the spot month gold futures contract. Fractions of a fine ounce of gold smaller than 0.001 fine ounce are disregarded for purposes of the computation of the Basket Gold Amount. The Basket Gold Amount so determined is communicated by the sponsor to the market via its website for the iShares. The AMEX also publishes the Basket Gold Amount determined by the trustee as indicated above.

Because the sponsor has assumed what are expected to be most of the trust's expenses, and the sponsor's fee accrues daily at the same rate (*i.e.*, $\frac{1}{365}$ th of the net asset value of the trust multiplied by 0.40%), in the absence of any extraordinary expenses or liabilities the amount of gold by which the Basket Gold Amount decreases each day is predictable. The sponsor makes available on each business day, through the same website used to disseminate the actual Basket Gold Amount determined by the trustee as indicated above, an indicative Basket Gold Amount for the next business day. Authorized Participants may use that indicative Basket Gold Amount as guidance regarding the amount of gold that they may expect to have to deposit with the custodian in respect of purchase orders placed by them on such next business day and accepted by the trustee. The agreement entered with each Authorized Participant provides, however, that once a purchase order has been accepted by the trustee, the Authorized Participant will be required to deposit with the custodian the Basket Gold Amount determined by the trustee on the effective date of the purchase order.

No iShares are issued unless and until the custodian has informed the trustee that it has allocated to the trust's account (except that any amounts of less than 430 ounces may be held in the trust account on an unallocated basis) the corresponding amount of gold. In accordance with the procedures that the custodian has agreed to follow in connection with the creation of iShares, gold received by the custodian no later than 11:30 a.m. (local time at the place of delivery) is required to be allocated to the trust's account no later than 9:00 a.m. (New York time) on

(a) the same day, if it is delivered to the custodian's account at The Bank of England;

(b) the second business day thereafter, if it does not exceed

(i) 500,000 fine ounces, in the case of gold that, prior to the transaction, was already in the possession of the custodian (*e.g.* if the custodian held it for the account of the Authorized Participant party to the transaction), or

(ii) 50,000 fine ounces, in the case of gold which, prior to the transaction, was not in the possession of the custodian (*i.e.*, gold that is first delivered in physical form to the custodian in connection with the transaction); or

(c) the fourth business day thereafter, in the case of more than 50,000 fine ounces but less than 100,000 fine ounces of gold that, prior to the transaction, was not in the possession of the custodian.

In all other cases, the custodian's obligation is to allocate gold to the trust's account as soon as practicable after its receipt at the custodian's facilities.

Table of Contents

Redemption of Baskets of iShares; Withdrawal of Gold

Authorized Participants, acting on authority of the registered holder of iShares, may surrender Baskets of iShares in exchange for the corresponding Basket Gold Amount announced by the trustee. Upon the surrender of such iShares and the payment of the trustee's applicable fee and of any expenses, taxes or charges (such as stamp taxes or stock transfer taxes or fees), the trustee will deliver to the order of the redeeming Authorized Participant the amount of gold corresponding to the redeemed Baskets. iShares can only be surrendered for redemption in Baskets of 50,000 iShares each.

Before surrendering Baskets of iShares for redemption, an Authorized Participant must deliver to the trustee a written request indicating the number of Baskets it intends to redeem and the location where it would like to take delivery of the gold represented by such Baskets. The date the trustee receives that order determines the Basket Gold Amount to be received in exchange. However, orders received by the trustee after 4:00 p.m. (New York time) on a business day are treated as received on the next following business day.

The custodian may make the gold available for collection at its office or at the office of a sub-custodian if the gold is being held by a sub-custodian. Gold is delivered at the locations designated by the trustee, in consultation with the custodian. Redeeming Authorized Participants are entitled to express a preference as to where they would like to have gold delivered, but have no right to receive delivery at a specified location.

Unless otherwise agreed to by the Custodian, gold is delivered to the redeeming Authorized Participants in the form of physical bars only (except that any amount of less than 430 ounces may be transferred to an unallocated account of or as ordered by, the redeeming Authorized Participant).

Redemptions may be suspended only (i) during any period in which regular trading on the AMEX or the COMEX is suspended or restricted or one or both exchanges are closed (other than scheduled holiday or weekend closings), or (ii) during an emergency as a result of which delivery, disposal or evaluation of gold is not reasonably practicable.

Fees and Expenses of the Trustee

Each deposit of gold for the creation of Baskets of iShares and each surrender of Baskets of iShares for the purpose of withdrawing trust property (including if the Trust Agreement terminates) must be accompanied by a payment to the trustee of a fee of \$2,000.

The trustee will be entitled to reimburse itself from the assets of the trust for all expenses and disbursements incurred by it for extraordinary services it may provide to the trust or in connection with any discretionary action the trustee may take to protect the trust or the interests of the holders.

Trust Expenses and Gold Sales

In addition to the fee payable to the sponsor, the following expenses are paid out of the assets of the trust:

any expenses or liabilities of the trust that are not assumed by the sponsor;

Table of Contents

any taxes and other governmental charges that may fall on the trust or its property;

expenses and costs of any action taken by the trustee or the sponsor to protect the trust and the rights and interests of holders of iShares; and

any indemnification of the sponsor as described below.

The trustee sells the trust's gold from time to time as necessary to permit payment of the fees and expenses that the trust is required to pay. See Trust Expenses.

The trustee is not responsible for any depreciation or loss incurred by reason of sales of gold made in compliance with the Trust Agreement.

Payment of Taxes

The trustee may deduct the amount of any taxes owed from any distributions it makes. It may also sell trust assets, by public or private sale, to pay any taxes owed. Registered holders of iShares will remain liable if the proceeds of the sale are not enough to pay the taxes.

Item 1A. Risk Factors.

Because the iShares are created to reflect the price of the gold held by the trust, the market price of the iShares will be unpredictable. This creates the potential for losses, regardless of whether you hold iShares for a short-, mid-or long-term.

iShares are created to reflect, at any given time, the market price of gold owned by the trust at that time less the trust's expenses and liabilities. Because the value of iShares depends on the price of gold, it is subject to fluctuations similar to those affecting gold prices. The price of gold has fluctuated widely over the past several years. If gold markets continue to be characterized by the wide fluctuations that they have shown in the past several years, the price of the iShares will change suddenly and in an unpredictable manner. This exposes your investment in iShares to potential losses if you need to sell your iShares at a time when the price of gold is lower than it was when you made your investment in iShares. Even if you are able to hold iShares for the mid- or long-term you may never have a profit, because gold markets have historically experienced extended periods of flat or declining prices.

Following an investment in iShares, several factors may have the effect of causing a decline in the prices of gold and a corresponding decline in the price of iShares. Among them:

Large sales including those by the official sector. A significant portion of the aggregate world gold holdings is owned by governments, central banks and related institutions. If one or more of these institutions or other sellers decides to sell in amounts large enough to cause a decline in world gold prices, the price of the iShares will be adversely affected.

A significant increase in gold hedging activity by gold producers. Should there be an increase in the level of hedge activity of gold producing companies, it could cause a decline in world gold prices, adversely affecting the price of the iShares.

A significant change in the attitude of speculators and investors towards gold. Should the speculative community take a negative view towards gold, it could cause a decline in world gold prices, negatively impacting the price of the iShares.

Table of Contents

Conversely, several factors may trigger a temporary increase in the price of gold prior to your investment in the iShares. If that is the case, you will be buying iShares at prices affected by the temporarily high prices of gold, and you may incur losses when the causes for the temporary increase disappear.

The amount of gold represented by the iShares will continue to be reduced during the life of the trust due to the sales necessary to pay the sponsor's fee and trust expenses. Without increases in the price of gold sufficient to compensate for such reduction, the price of the iShares will also decline and you will lose money on your investment in iShares.

Although the sponsor has agreed to assume all organizational and certain ordinary administrative and marketing expenses incurred by the trust, not all trust expenses have been assumed by the sponsor. For example, any taxes and other governmental charges that may be imposed on the trust's property will not be paid by the sponsor. As part of its agreement to assume some of the trust's ordinary administrative expenses, the sponsor has agreed to pay legal fees and expenses of the trust not in excess of \$100,000 per annum. Any legal fees and expenses in excess of that amount will be the responsibility of the trust.

Because the trust does not have any income, it needs to sell gold to cover the sponsor's fee and expenses not assumed by the sponsor. The trust may also be subject to other liabilities (for example, as a result of litigation) which have also not been assumed by the sponsor. The only source of funds to cover those liabilities will be sales of gold held by the trust. Even if there are no expenses other than those assumed by the sponsor, and there are no other liabilities of the trust, the trustee will still need to sell gold to pay the sponsor's monthly fee. The result of these periodic sales is that the amount of gold represented by each iShare will decrease. New deposits of gold, received in exchange for new iShares issued by the trust, do not reverse this trend.

A decrease in the amount of gold represented by each iShare results in a decrease in its price even if the price of gold has not changed. To retain the iShare's original price, the price of gold has to increase. Without that increase, the lower amount of gold represented by the iShare will have a correspondingly lower price. If these increases do not occur, or are not sufficient to counter the lower amount of gold represented by each iShare, you will sustain losses on your investment in iShares.

An increase in the trust expenses not assumed by the sponsor, or the existence of unexpected liabilities affecting the trust, will force the trustee to sell larger amounts of gold, and will result in a more rapid decrease of the amount of gold represented by each iShare and a corresponding decrease in its value.

The trust is a passive investment vehicle. This means that the value of your iShares may be adversely affected by trust losses that, if the trust had been actively managed, might have been possible to avoid.

The trustee does not actively manage the gold held by the trust. This means that the trustee does not sell gold at times when its price is high, or acquire gold at low prices in the expectation of future price increases. It also means that the trustee does not make use of any of the hedging techniques available to professional gold investors to attempt to reduce the risks of losses resulting from price decreases. Any losses sustained by the trust will adversely affect the value of your iShares.

Table of Contents

The price received upon the sale of iShares may be less than the value of the gold represented by them.

The result obtained by subtracting the trust's expenses and liabilities on any day from the price of the gold owned by the trust on that day is the net asset value of the trust which, when divided by the number of iShares outstanding on that date, results in the net asset value per iShare (NAV).

iShares may trade at, above or below their NAV. The NAV of iShares will fluctuate with changes in the market value of the trust's assets. The trading prices of iShares will fluctuate in accordance with changes in their NAVs as well as market supply and demand. The amount of the discount or premium in the trading price relative to the NAV per iShare may be influenced by non-concurrent trading hours between the major gold markets and the AMEX. While the iShares will trade on the AMEX until 4:15 P.M. New York time, liquidity in the market for gold will be reduced after the close of the major world gold markets, including London, Zurich and COMEX (which usually closes from 1:30 P.M. until 2:00 P.M. New York time). As a result, during this time, trading spreads, and the resulting premium or discount on iShares, may widen.

The liquidation of the trust may occur at a time when the disposition of the trust's gold will result in losses to investors in iShares.

The trust will have limited duration. If certain events occur, at any time, the trustee will have to terminate the trust. Otherwise, the trust will terminate automatically after forty years.

Upon termination of the trust, the trustee will sell gold in the amount necessary to cover all expenses of liquidation, and to pay any outstanding liabilities of the trust. The remaining gold will be distributed among investors surrendering iShares. Any gold remaining in the possession of the trustee after 90 days may be sold by the trustee and the proceeds of the sale will be held by the trustee until claimed by any remaining holders of iShares. Sales of gold in connection with the liquidation of the trust at a time of low prices will likely result in losses, or adversely affect your gains, on your investment in iShares.

There may be situations where an Authorized Participant is unable to redeem a basket of shares. To the extent the value of gold decreases, these delays may result in a decrease in the value of the gold the Authorized Participant will receive when the redemption occurs, as well as a reduction in liquidity for all shareholders in the secondary market.

Although iShares surrendered by Authorized Participants in basket-size aggregations are redeemable in exchange for the underlying amount of gold, redemptions may be suspended during any period while regular trading on the AMEX or COMEX is suspended or restricted, or in which an emergency exists that makes it reasonably impracticable to deliver, dispose of, or evaluate gold. If any of these events occurs at a time when an Authorized Participant intends to redeem iShares, and the price of gold decreases before such Authorized Participant is able again to surrender for redemption baskets of iShares, such Authorized Participant will sustain a loss with respect to the amount that it would have been able to obtain in exchange for the gold received from the trust upon the redemption of its iShares, had the redemption taken place when such Authorized Participant originally intended it to occur. As a consequence, Authorized Participants may reduce their trading in iShares during periods of suspension, decreasing the number of potential buyers of iShares in the secondary market and, therefore, the price a shareholder may receive upon sale.

Table of Contents

The liquidity of the iShares may also be affected by the withdrawal from participation of Authorized Participants.

In the event that one of more Authorized Participants which have substantial interests in iShares withdraw from participation, the liquidity of the iShares will likely decrease, which could adversely affect the market price of the iShares and result in your incurring a loss on your investment.

Authorized Participants with large holdings may choose to terminate the trust.

Holders of 75% of the iShares have the power to terminate the trust. This power may be exercised by a relatively small number of holders. If it is so exercised, investors who wished to continue to invest in gold through the vehicle of the trust will have to find another vehicle, and may not be able to find another vehicle that offers the same features as the trust.

The lack of an active trading market for the iShares may result in losses on your investment at the time of disposition of your iShares.

Although iShares are listed for trading on the AMEX, you should not assume that an active trading market for the iShares will develop or be maintained. If you need to sell your iShares at a time when no active market for them exists, such lack of an active market will most likely adversely affect the price you receive for your iShares (assuming you are able to sell them).

If the process of creation and redemption of Baskets of iShares encounters any unanticipated difficulties, the possibility for arbitrage transactions intended to keep the price of the iShares closely linked to the price of gold may not exist and, as a result, the price of the iShares may fall.

If the processes of creation and redemption of shares (which depend on timely transfers of gold to and by the custodian) encounter any unanticipated difficulties, potential market participants who would otherwise be willing to purchase or redeem Baskets of iShares to take advantage of any arbitrage opportunity arising from discrepancies between the price of the iShares and the price of the underlying gold may not be able to realize the profit they expect. If this is the case, the liquidity of the iShares may decline and the price of the iShares may fluctuate independently of the price of gold and may fall.

As an owner of iShares, you will not have the rights normally associated with ownership of other types of shares.

iShares are not entitled to the same rights as shares issued by a corporation. By acquiring iShares, you are not acquiring the right to elect directors, to receive dividends, to vote on certain matters regarding the issuer of your iShares or to take other actions normally associated with the ownership of shares.

As an owner of iShares, you will not have the protections normally associated with ownership of shares in an investment company registered under the Investment Company Act of 1940, or the protections afforded by the Commodity Exchange Act of 1936.

The trust is not registered as an investment company for purposes of United States federal securities laws, and is not subject to regulation by the SEC as an investment company. Consequently, the owners of iShares do not have the regulatory protections provided to investors in investment companies. For example, the provisions of the Investment Company Act that limit

Table of Contents

transactions with affiliates, prohibit the suspension of redemptions (except under certain limited circumstances) or limit sales loads do not apply to the trust.

The trust does not hold or trade in commodity futures contracts regulated by the Commodity Exchange Act (CEA), as administered by the Commodity Futures Trading Commission (CFTC). Furthermore, the trust is not a commodity pool for purposes of the CEA, and its sponsor is not subject to regulation by the CFTC as a commodity pool operator, or a commodity trading advisor. Consequently, the owner of iShares does not have the regulatory protections provided to investors in CEA-regulated instruments or commodity pools. Consequently, the trustee is not subject to registration as a commodity pool operator and the owners of iShares do not receive the disclosure document and certified annual report required to be delivered by a commodity pool operator.

The value of the iShares will be adversely affected if gold owned by the trust is lost or damaged in circumstances in which the trust is not in a position to recover the corresponding loss.

The responsibility of the custodian for loss or damage to the trust's gold is not unlimited. The agreement with the custodian contemplates that under certain circumstances the custodian will not be responsible for loss or damage to the trust's gold in the custodian's possession. For example, losses due to nuclear accidents, terrorism, riots, acts of God, insurrections, strikes and similar causes beyond the control of the custodian will be sustained by the trust. Any loss of gold owned by the trust will result in a corresponding loss in the NAV and it is reasonable to expect that such loss will also result in a decrease in the value at which the iShares are traded on the AMEX.

Gold transferred to the trust in connection with the creation of Baskets of iShares may not be of the quality required under the Trust Agreement. The trust will sustain a loss if the trustee issues iShares in exchange for gold of inferior quality and that loss will adversely affect the value of all existing iShares.

The procedures agreed to with the custodian contemplate that the custodian must undertake certain tasks in connection with the inspection of gold delivered by Authorized Participants in exchange for Baskets of iShares. The custodian's inspection includes review of the corresponding bar list to ensure that it accurately describes the weight, fineness, refiner marks and bar numbers appearing on the gold bars, but does not include any chemical or other tests designed to verify that the gold received does, in fact, meet the purity requirements referred to in the Trust Agreement. Accordingly, such inspection procedures may not prevent the deposit of gold that fails to meet these purity standards. Each person that deposits gold in the trust is liable to the trust if that gold does not meet the requirements of the Trust Agreement. The custodian will not be responsible or liable to the trust or to any investor in the event any gold otherwise properly inspected by it does not meet the purity requirements contained in the Trust Agreement. To the extent that Baskets of iShares are issued in exchange for gold of inferior quality and the trust is not able to recover damages from the person that deposited that gold, the total value of the assets of the trust will be adversely affected and, with it, the NAV. In these circumstances, it is reasonable to expect that the value at which the iShares trade on the AMEX will also be adversely affected.

The value of the iShares will be adversely affected if the trust is required to indemnify the sponsor or the custodian as contemplated in the Trust Agreement and the custodian agreement.

Table of Contents

Under the Trust Agreement, the sponsor has a right to be indemnified from the trust for any liability or expense it incurs without negligence, bad faith or willful misconduct on its part. Similarly, the custodian agreement provides for indemnification of the custodian by the trust under certain circumstances. That means that it may be necessary to sell assets of the trust to cover losses or liability suffered by the sponsor or the custodian. Any sale of that kind would reduce the net asset value of the trust and the value of the iShares.

- a) The iShares have traded on the AMEX under the symbol IAU since their initial public offering on January 21, 2005. For each of the quarters during the fiscal years ended December 31, 2006 and 2005, the high and low sale prices of the iShares as reported for AMEX transactions were as follows:

Fiscal year ended December 31, 2006	High	Low
First Quarter	\$ 58.63	\$ 52.36
Second Quarter	\$ 71.27	\$ 55.60
Third Quarter	\$ 66.08	\$ 56.91
Fourth Quarter	\$ 64.42	\$ 56.37

Fiscal year ended December 31, 2005	High	Low
First Quarter (commencing January 21, 2005)	\$ 44.50	\$ 41.30
Second Quarter	\$ 44.08	\$ 41.55
Third Quarter	\$ 47.15	\$ 41.94
Fourth Quarter	\$ 52.66	\$ 45.58

The number of record holders of the shares of the registrant as of February 23, 2007 was approximately 157.

b) Not applicable.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation.

This information should be read in conjunction with the financial statements and notes to the financial statements included with this report. The discussion and analysis that follows may contain statements that relate to future events or future performance. In some cases, such forward-looking statements can be identified by terminology such as may, should, expect, plan, anticipate, believe, estimate, predict, potential or the negative of these terms or other comparable terminology. Neither the sponsor, nor any other person assumes responsibility for the accuracy or completeness of forward-looking statements. Neither the trust nor the sponsor is under a duty to update any of the forward-looking statements to conform such statements to actual results or to a change in the sponsor's expectations or predictions.

Introduction

The trust is a grantor trust formed under the laws of the State of New York. The trust does not have any officers, directors, or employees, and is administered by The Bank of New York acting as trustee pursuant to the trust's Amended and Restated Depositary Trust Agreement. The trust issues shares representing fractional undivided beneficial interests in its net assets. The assets of the trust consist primarily of gold bullion held by a custodian as an agent of the trust and responsible only to the trustee.

The trust is a passive investment vehicle, and the objective of the trust is merely for the value of each share approximately to reflect, at any given time, the price of the gold bullion owned by the trust less the trust's liabilities (anticipated to be principally for accrued operating expenses) divided

Table of Contents

by the number of outstanding shares. The trust does not engage in any activities designed to obtain a profit from, or ameliorate losses caused by, changes in the price of gold.

The trust issues and redeems shares only in exchange for gold, only in aggregations of 50,000 or integral multiples thereof, and only in transactions with registered broker-dealers that have previously entered into an agreement with the trust governing the terms and conditions of such issuance (such dealers, the Authorized Participants). A list of current Authorized Participants is available from the sponsor or the trustee.

Shares of the trust trade on the AMEX under the symbol IAU.

Liquidity

The trust is not aware of any trends, demands, conditions or events that are reasonably likely to result in material changes to its liquidity needs. In exchange for a fee, the sponsor has agreed to assume most of the expenses incurred by the trust. As a result, the only ordinary expense of the trust during the period covered by this report was the sponsor's fee. The trust's only source of liquidity is its sales of gold.

Critical Accounting Estimates

The financial statements and accompanying notes are prepared in accordance with generally accepted accounting principles in the United States of America. The preparation of these financial statements relies on estimates and assumptions that impact the trust's financial position and results of operations. These estimates and assumptions affect the trust's application of accounting policies. Below we describe the valuation of gold bullion, a critical accounting policy that we believe is important to understanding our results of operations and financial position. In addition, please refer to Note 1 to the consolidated financial statements for further discussion of our accounting policies.

Valuation of Gold Bullion

Gold bullion held by the trust is recorded at the lower of cost or market. For purposes of this calculation, market values are based on the COMEX Spot Settlement Price. Fair value of the gold bullion is based on the COMEX settlement price for the spot month gold futures contract, which at any time is the contract then closest to maturity (COMEX Spot Settlement Price). Should the market value of the gold bullion held be lower than its average cost, impairment to the carrying value of the gold will be recorded and the COMEX Spot Settlement Price will be used as the value for financial statement purposes. As indicated above, the COMEX Spot Settlement Price is also used to value gold bullion held for purposes of calculating the net asset value of the trust, which in turn is used for the calculation of the redemption value of outstanding trust shares.

There are other indicators of the value of gold bullion that are available that could be different than that chosen by the trust. Fair value of the gold bullion is based on the COMEX settlement price for the spot month gold futures contract, which at any time is the contract then closest to maturity (COMEX Spot Settlement Price). The COMEX Spot Settlement Price is used since it is commonly used by the U.S. gold market as an indicator of the value of gold, and is required by the trust's Amended and Restated Depositary Trust Agreement. The use of an indicator of value of gold bullion other than the COMEX Spot Settlement Price could result in materially different fair value pricing of the gold in the trust, and as such, could result in different lower of cost or market adjustments or in different redemption value adjustments of the outstanding redeemable capital shares.

Table of Contents

The following chart shows the daily COMEX Gold Spot Settlement Prices for the calendar years ended December 31, 2005 and 2006:

The year ended December 31, 2006

Cumulatively for the fiscal period, the trust's net assets grew from \$368,339,392 at December 31, 2005 to \$907,668,832 at December 31, 2006, a 146.42% increase. The increase in the trust's net assets resulted primarily from an increase in outstanding shares, which rose from 7,150,000 at December 31, 2005 to 14,400,000 at December 31, 2006 as a consequence of 7,650,000 shares (153 baskets, each basket consisting of 50,000 shares) being created and 400,000 shares (8 baskets, each basket consisting of 50,000 shares) being redeemed during the fiscal period.

A positive change in the COMEX Spot Settlement Price, which rose 22.84% from \$517.10 at December 31, 2005 to \$635.20 at December 31, 2006, directly relates to the 22.34% rise in the trust's net asset value per outstanding share from \$51.52 at December 31, 2005 to \$63.03 at December 31, 2006, which closely tracked the change in the COMEX Spot Settlement Price.

The trust's net asset value per share rose slightly less than the COMEX price of gold on a percentage basis due mainly to sponsor's fees, which were \$3,047,177 for the year, or 0.40% of the trust's average weighted assets of \$760,639,593 during the year. The net asset value per share of \$71.61 at May 11, 2006 was the highest during the year, compared with a low of \$52.43 at January 5, 2006. The net asset value of the trust is obtained by subtracting the trust's daily liability for expenses on any day from the value of the gold owned by the trust on that day; the net asset value per share is obtained by dividing the net asset value of the trust on a given day by the number of shares outstanding on that date.

Table of Contents

Net income for the year ended December 31, 2006 was \$2,348,531, resulting from a net gain of \$490,778 on the sale of gold to pay expenses and a net gain of \$4,904,419 on gold distributed for the redemption of shares, offset by sponsor's fees of \$3,047,177. Other than the Sponsor's fees, the Trust had no other ordinary or extraordinary expenses during the year ended December 31, 2006.

The Period January 21, 2005 (Date of Inception) through December 31, 2005

Cumulatively for the 2005 fiscal period, the trust's net assets grew from \$6,400,500 at January 21, 2005 to \$368,339,392 at December 31, 2005, a 5654.85% increase. The increase in the trust's net assets resulted primarily from an increase in outstanding shares, which rose from 150,000 at January 21, 2005 to 7,150,000 at December 31, 2005 as a consequence of 18,600,000 shares (372 baskets, each basket consisting of 50,000 shares) being created and 11,600,000 shares (232 baskets, each basket consisting of 50,000 shares) being redeemed during the 2005 fiscal period.

A positive change in the COMEX Spot Settlement Price, which rose 21.19% from \$426.70 at January 21, 2005 to \$517.10 at December 31, 2005, directly relates to the 20.74% rise in the trust's net asset value per outstanding share from \$42.67 at January 21, 2005 to \$51.52 at December 31, 2005, which closely tracked the change in the COMEX Spot Settlement Price.

The trust's net asset value per share rose slightly less than the COMEX price of gold on a percentage basis due mainly to sponsor's fees paid to the initial sponsor, which were \$988,058 for the 2005 fiscal period, or 0.38% of the trust's average weighted assets of \$262,920,683 during the 2005 fiscal period. The net asset value per share of \$52.65 at December 12, 2005 was the highest during the 2005 fiscal period, compared with a low of \$41.25 at February 8, 2005. The net asset value of the trust is obtained by subtracting the trust's daily liability for expenses on any day from the value of the gold owned by the trust on that day; the net asset value per share is obtained by dividing the net asset value of the trust on a given day by the number of shares outstanding on that date.

Net income for the period from January 21, 2005 through December 31, 2005 was \$7,309,434, resulting from a net gain of \$47,603 on the sale of gold to pay expenses and a net gain of \$8,249,889 on gold distributed for the redemption of shares, offset by sponsor's fees of \$988,058. Other than the sponsor's fees, the trust had no other ordinary or extraordinary expenses during the 2005 fiscal period.

Table of Contents

The financial statements required by Regulation S-X, together with the report of the trust's independent registered public accounting firm appear on page F-1 to F-11 of this filing.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

There have been no changes in accountants and no disagreements with accountants during the period from January 21, 2005 (date of inception) to December 31, 2006.

Item 9A. Controls and Procedures.

The principal executive officer and principal financial officer of the sponsor, with the participation of the trustee, have evaluated the effectiveness of the registrant's disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Exchange Act), and have concluded that the disclosure controls and procedures of the registrant were effective as of the end of the period covered by this annual report.

Management Report on Internal Control over Financial Reporting

The sponsor's management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined under Exchange Act 13a-15(f) and 15 d-15(f). The trust's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States. Internal control over financial reporting includes those policies and procedures that:

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the trust's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that the trust's receipts and expenditures are being made only in accordance with appropriate authorizations; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the trust's assets that could have a material effect on the financial statements.

Table of Contents

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become ineffective because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Principal Executive Officer and Principal Financial Officer of the sponsor assessed the effectiveness of the trust's internal control over financial reporting as of December 31, 2006. Their assessment included an evaluation of the design of the trust's internal control over financial reporting and testing of the operational effectiveness of its internal controls over financial reporting. Based on their assessment and those criteria, the Principal Executive Officer and Principal Financial Officer of the sponsor believe that the trust maintained effective internal control over financial reporting as of December 31, 2006.

The assessment by the Principal Executive Officer and Principal Financial Officer of the sponsor of the effectiveness of the trust's internal control over financial reporting as of December 31, 2006 has been audited by PricewaterhouseCoopers LLP, the independent registered public accounting firm that audited and reported on the financial statements included in this 10-K, as stated in their report which is included herein.

There were no changes in the registrant's internal control over financial reporting that occurred during the registrant's fourth fiscal quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 14. Principal Accounting Fees and Services.

(1) to (4). Fees for services performed by PricewaterhouseCoopers LLP for years ended December 31, 2006 and 2005 were:

	2006	2005
Audit fees	\$ 70,100	\$ 72,500
Audit-related fees	\$	\$
Tax fees	\$	\$
All other fees	\$	\$ 24,385
	\$ 70,100	\$ 96,885

Other fees include fees for services provided to assist in establishing a formula to be applied by a web tool for the benefit of shareholders of the trust to help them estimate their taxable income, expenses and gains or losses solely for U.S. federal income tax purposes.

(5) The Registrant has no board of directors, and as a result, has no audit committee and no pre-approval policies or procedures with respect to fees paid to PricewaterhouseCoopers LLP.

(6) None of the hours expended on PricewaterhouseCoopers LLP's engagement to audit the Registrant's financial statements for the fiscal year ended December 31, 2006 were attributable to work performed by persons other than the principal accountant's full-time, permanent employees.

Report of Independent Registered Public Accounting Firm

To the Sponsor, Trustee and Shareholders of

iShares COMEX Gold Trust:

We have completed an integrated audit of iShares COMEX Gold Trust's (the Trust) 2006 financial statements and of its internal control over financial reporting as of December 31, 2006 and audit of its December 31, 2005 financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our opinions, based on our audits, are presented below.

Financial statements and financial statement schedules

In our opinion, the financial statements listed in the accompanying index present fairly, in all material respects, the financial position of iShares COMEX Gold Trust as of December 31, 2006 and December 31, 2005, and the related statements of income for year the ended December 31, 2006 and the period from January 21, 2005 through December 31, 2005, the statements of changes in shareholders' equity (deficit) for the year ended December 31, 2006 and for the period from January 21, 2005 to December 31, 2005 and the statements of cash flows for the year ended December 31, 2006 and the period from January 21, 2005 through December 31, 2005 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules present fairly, in all material respects, the information set forth therein when read in conjunction with the related financial statements. These financial statements and financial statement schedules are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial statement schedules based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Internal control over financial reporting

Also, in our opinion, management's assessment, included in Management's Report of Internal Control over Financial Reporting appearing under Item 9A, that the Trust maintained effective internal control over financial reporting as of December 31, 2006 based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), is fairly stated, in all material respects, based on those criteria. Furthermore, in our opinion, the Trust maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. The Trust's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of the Trust's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

Table of Contents

A trust's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A trust's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the trust; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the trust are being made only in accordance with authorizations of management and directors of the trust; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the trust's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO THE FINANCIAL STATEMENTS

As of December 31, 2006

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

The iShares COMEX Gold Trust (the "trust") was organized on January 21, 2005 as a New York Trust. The Trustee is The Bank of New York (the "trustee") and is responsible for the day to day administration of the trust. The trust's sponsor is Barclays Global Investors International Inc. (the "sponsor"), a Delaware corporation wholly-owned by Barclays Bank PLC. On February 26, 2007, the sponsor replaced Barclays Global Investors, N.A. (the "initial sponsor") as sponsor of the trust. The trust is governed by the Amended and Restated Depositary Trust Agreement executed at the time of organization of the trust by the trustee and the sponsor (the "Trust Agreement").

The objective of the trust is for the value of its shares to reflect, at any given time, the price of gold owned by the trust at that time, less the trust's expenses and liabilities. The trust is designed to provide a vehicle for investors to own interests in gold bullion.

The following is a summary of significant accounting policies consistently followed by the trust in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America.

A. Gold Bullion

The Bank of Nova Scotia, the Custodian, is responsible for safekeeping the gold owned by the trust.

For financial statement purposes, the gold bullion is valued at the lower of cost or market, using the average cost method. Should the market value of the gold held be lower than its average cost during the interim periods of the same fiscal year, an adjustment of value below cost ("market value reserve") is recorded by the trust. Gain or loss on sales of gold bullion is calculated on a trade date basis. Fair value of the gold bullion is based on the COMEX settlement price for the spot month gold futures contract, which at any time is the contract then closest to maturity ("COMEX Spot Settlement Price").

Table of Contents

The following table summarizes activity in gold bullion during the years ended December 31, 2006 and 2005 (all balances in 000 s):

December 31, 2006	Ounces	Carrying Value	Market Value	Realized Gain (Loss)
Beginning balance	712.3	\$ 316,959	\$ 368,339	
Gold contributed	761.3	450,893	450,893	
Gold distributed (Avg. cost)	(39.8)	(20,364)	(25,268)	\$ 4,904
Gold sold (Avg. cost)	(4.4)	(2,259)	(2,750)	491
Adjustment for realized gain (loss)			5,395	
Adjustment for unrealized gain on gold bullion			111,357	
Ending balance	1,429.4	\$ 745,229	\$ 907,966	\$ 5,395

December 31, 2005	Ounces	Carrying Value	Market Value	Realized Gain (Loss)
Beginning balance	15.0	\$ 6,401	\$ 6,401	
Gold contributed	1,858.6	802,161	802,161	
Gold distributed (Avg. cost)	(1,159.2)	(490,662)	(498,912)	\$ 8,250
Gold sold (Avg. cost)	(2.1)	(941)	(988)	47
Adjustment for realized gain (loss)			8,297	
Adjustment for unrealized gain on gold bullion			51,380	
Ending balance	712.3	\$ 316,959	\$ 368,339	\$ 8,297

B. Redeemable Capital Shares

Shares of the trust are classified as redeemable for balance sheet purposes, since they are subject to redemption. Trust shares are issued and redeemed continuously in aggregations of 50,000 shares in exchange for gold bullion rather than cash. Individual investors cannot purchase or redeem shares in direct transactions with the trust. The trust only deals with registered broker-dealers eligible to settle securities transactions through the book-entry facilities of the Depository Trust Company and which have entered into a contractual arrangement with the trust and the sponsor governing, among other matters, the creation and redemption processes (such broker-dealers are the Authorized Participants). Holders of shares of the trust may redeem their shares at any time acting through an Authorized Participant and in the prescribed aggregations of 50,000 shares; *provided*, that redemptions of shares may be suspended during any period while regular trading on the AMEX or COMEX is suspended or restricted, or in which an emergency exists as a result of which delivery, disposal or evaluation of gold is not reasonably practicable.

The per-share amount of gold exchanged for a purchase or redemption is calculated daily by the trustee, using the daily COMEX Spot Settlement Price to calculate the gold amount in respect of any liabilities for which covering gold sales have not yet been made, and represents the per-share amount of gold held by the trust, after giving effect to its liabilities, sales to cover expenses and liabilities and any losses that may have occurred.

Table of Contents

When gold is exchanged in settlement of a redemption, it is considered a sale of gold for financial statement purposes.

Due to the expected continuing sales and redemption of capital stock and the three-day period for share settlement the trust reflects capital shares sold as a receivable, rather than as contra equity. Shares redeemed are reflected as a liability on the trade date. Outstanding trust shares are reflected at redemption value, which is the net asset value per share at the period ended date. Adjustments to redemption value are reflected in retained earnings.

Net asset value is computed by deducting all accrued fees, expenses and other liabilities of the trust, including the trustee's and sponsor's fees, from the fair value of the gold bullion held by the trust.

Activity in redeemable capital shares for the years ended December 31, 2006 and 2005, is as follows (all balances in 000's):

	December 31, 2006		December 31, 2005	
	Shares	Amount	Shares	Amount
Beginning balance	7,150	\$ 368,339	150	\$ 6,401
Shares Issued	7,650	450,893	18,600	802,161
Shares Redeemed	(400)	(25,268)	(11,600)	(498,912)
Redemption value adjustment		113,705		58,689
Ending balance	14,400	\$ 907,669	7,150	\$ 368,339

C. Federal Income Taxes

The trust is treated as a grantor trust for federal income tax purposes and, therefore, no provision for federal income taxes is required. Any interest and gains and losses are deemed passed through to the holders of shares of the trust.

D. Expenses

The trust will pay to the sponsor a sponsor's fee that will accrue daily at an annualized rate equal to 0.40% of the adjusted daily net asset value of the trust, paid in arrears. The sponsor has agreed to assume the following administrative and marketing expenses incurred by the trust: the trustee's monthly fee, the custodian's fee, AMEX listing fees, SEC registration fees, printing and mailing costs, audit fees and expenses, and up to \$100,000 per annum in legal fees and expenses. For the fiscal year ending December 31, 2006, the initial sponsor agreed to pay all legal fees and expenses over the \$100,000 per annum limit. The initial sponsor also paid the costs of the trust's organization and the initial sales of the shares, including applicable SEC registration fees.

E. Related Parties

The initial sponsor, sponsor and the trustee are considered to be related parties to the trust. The trustee's fee is paid by the sponsor and is not a separate expense of the trust.

Table of Contents

F. *Indemnifications*

Under the trust's organizational documents, the sponsor is indemnified against liabilities or expenses it incurs without negligence, bad faith or willful misconduct on its part. The trust's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the trust that have not yet occurred.

2. CONCENTRATION RISK

Substantially all of the trust's assets are holdings of gold bullion, which creates a concentration risk associated with fluctuations in the price of gold. Accordingly, a decline in the price of gold will have an adverse effect on the value of the shares of the trust. Factors that may have the effect of causing a decline in the price of gold include large sales by the official sector (governments, central banks and related institutions), an increase in the hedging activities of gold producers, and changes in the attitude towards gold of speculators and other market participants.
