NOTE A Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six month periods ended June 30, 2009, are not necessarily indicative of the results that may be expected for the year ending December 31, 2009. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

The Company has evaluated subsequent events through the date the financial statements were issued on August 10, 2009.

NOTE B Investments in Marketable Securities

The Company's investments in marketable securities are classified as available-for-sale. These investments are stated at fair value with any unrealized gains or losses, net of tax, included as a component of accumulated other comprehensive loss. The proceeds from sales of marketable securities for the six months ended June 30, 2009 were \$114.6. Gross realized gains and losses for the six months ended June 30, 2009 were insignificant.

The cost of marketable debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. Amortization, accretion, interest, dividend income and realized gains and losses are included in investment income. The cost of securities sold is based on the specific identification method.

Marketable debt securities consisted of the following:

At June 30, 2009	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
U.S. tax-exempt securities	\$ 149.9	\$ 1.7		\$ 151.6
Non U.S. corporate securities	2.8		\$.1	2.7
Other debt securities	10.7	.1		10.8
	\$ 163.4	\$ 1.8	\$.1	\$ 165.1

Table of Contents**FORM 10-Q****PACCAR Inc AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Unaudited)**

(Millions, Except Share Amounts)

At December 31, 2008	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
U.S. tax-exempt securities	\$ 167.2	\$ 1.7	\$.4	\$ 168.5
Non U.S. corporate securities	4.3		.3	4.0
Other debt securities	2.9			2.9
	\$ 174.4	\$ 1.7	\$.7	\$ 175.4

The fair value of marketable debt securities that have been in a continuous unrealized loss position for 12 months or greater at June 30, 2009 and December 31, 2008 and their unrealized amounts were insignificant.

Contractual maturities at June 30, 2009, were as follows:

Maturities:	Amortized Cost	Fair Value
2009	\$ 12.6	\$ 12.6
2010 through 2014	124.6	126.3
After 2020	26.2	26.2
	\$ 163.4	\$ 165.1

Marketable debt securities included \$26.2 and \$65.9 of variable rate demand obligations (VRDOs) at June 30, 2009 and December 31, 2008, respectively. VRDOs are debt instruments with long-term scheduled maturities which have interest rates that reset periodically.

NOTE C Inventories

Inventories include the following:

	June 30 2009	December 31 2008
Finished products	\$ 362.0	\$ 394.3
Work in process and raw materials	443.6	421.7
	805.6	816.0
Less LIFO reserve	(161.0)	(157.9)

Inventories are stated at the lower of cost or market. Cost of inventories in the United States is determined principally by the last in, first out (LIFO) method. Cost of all other inventories is determined principally by the first in, first out (FIFO) method.

Under the LIFO method of accounting (used for approximately 50% of June 30, 2009 inventories), an actual valuation can be made only at the end of each year based on year-end inventory levels and costs. Accordingly, interim valuations are based on management's estimates of those year-end amounts.

NOTE D Finance Receivables

Loans represent fixed- or floating-rate loans to customers collateralized by the vehicles purchased. Retail direct financing and sales-type finance leases are contracts leasing equipment to retail customers and dealers, respectively. These leases are reported as the sum of minimum lease payments receivable and estimated residual value of the property subject to the contracts, reduced by unearned interest on finance leases which is shown separately. Dealer wholesale financing represents floating-rate wholesale loans to PACCAR dealers for new and used trucks. The loans are collateralized principally by the trucks being financed. Interest and other receivables are interest due on loans and leases and other amounts due in the normal course of business. The allowance for losses for loans, leases and other are evaluated together as a group since they relate to a similar customer base and their contractual terms require regular payment of principal and interest primarily over 36 to 60 months and are secured by the same type of collateral. The Company specifically evaluates large accounts with past due balances or that otherwise are deemed to be at a higher risk of credit loss.

Finance and other receivables include the following:

	June 30 2009	December 31 2008
Loans	\$ 3,094.8	\$ 3,506.7
Retail direct financing leases	2,370.6	2,558.4
Sales-type finance leases	749.5	817.9
Dealer wholesale financing	1,207.4	1,635.0
Interest and other receivables	131.9	127.3
Unearned interest:		
Finance leases	(383.3)	(430.6)
	7,170.9	8,214.7
Less allowance for losses:		
Loans, leases and other	(165.4)	(167.1)
Dealer wholesale financing	(9.9)	(11.2)
	\$ 6,995.6	\$ 8,036.4

NOTE E Product Support Liabilities

Product support liabilities consist of amounts accrued to meet product warranty obligations and accrued costs associated with optional extended warranty and repair and maintenance contracts. Warranty expenses and reserves are estimated and recorded at the time products or contracts are sold based on historical data regarding the source, frequency and cost of claims. PACCAR periodically assesses the adequacy of its recorded liabilities and adjusts them as appropriate to reflect actual experience.

Changes in product support liabilities are summarized as follows:

	2009	2008
Beginning balance, January 1	\$ 450.4	\$ 483.3
Cost accruals and revenue deferrals	116.1	168.9
Payments and revenue recognized	(162.7)	(153.5)
Currency translation	5.5	23.7
Ending balance, June 30	\$ 409.3	\$ 522.4

(Millions, Except Share Amounts)

NOTE F Stockholders Equity**Comprehensive Income**

The components of comprehensive income, net of any related tax, were as follows:

	Three Months Ended		Six Months Ended	
	2009	2008	2009	2008
Net income	\$ 26.5	\$ 313.5	\$ 52.8	\$ 605.8
Other comprehensive income (OCI):				
Currency translation gains	214.8	15.6	114.5	109.6
Derivative contracts increase	6.2	40.8	15.9	6.1
Marketable securities (decrease) increase		(5.5)	.4	(2.8)
Employee benefit plans amortization	(1.4)	.9	2.6	1.4
Net other comprehensive income	219.6	51.8	133.4	114.3
Comprehensive income	\$ 246.1	\$ 365.3	\$ 186.2	\$ 720.1

The currency translation gains in 2009 are due to the strengthening of the U.S. dollar compared to the Canadian dollar, the British pound, and the Australian dollar. The currency translation gains in 2008 are primarily attributable to changes in the value of the U.S. dollar compared to the euro.

Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss was comprised of the following:

	June 30 2009	December 31 2008
Currency translation adjustment	\$ 274.7	\$ 160.2
Net unrealized loss on derivative contracts	(66.4)	(82.3)
Net unrealized investment gains	1.0	.6
Employee benefit plans	(345.7)	(348.3)
Total accumulated other comprehensive loss	\$ (136.4)	\$ (269.8)

Stock Compensation Plans

Edgar Filing: PACCAR INC - Form 10-Q

Stock-based compensation expense was \$5.4 and \$5.0 for the first six months of 2009 and 2008, respectively. Realized tax benefits related to the excess of deductible amounts over expense recognized amounted to \$2.1 and \$3.4 for the first six months of 2009 and 2008, respectively, and have been classified as a financing cash flow.

The Company issued 553,413 additional common shares under deferred and stock compensation arrangements in the six months ended June 30, 2009.

Other Capital Stock Changes

No share repurchases were completed during the six months ended June 30, 2009.

Table of Contents**FORM 10-Q****PACCAR Inc AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Unaudited)**

(Millions, Except Share and Per Share Amounts)

NOTE G Net Income Per Share

The following table shows the additional amounts added to the weighted average basic shares outstanding to calculate diluted earnings per share. These amounts primarily represent the dilutive effect of stock options. Antidilutive options are excluded from the diluted earnings per share calculation and are shown separately in the table below.

	Three Months Ended June 30		Six Months Ended June 30	
	2009	2008	2009	2008
Additional shares	939,500	1,789,000	926,000	1,793,000
Antidilutive options	3,914,000	714,200	3,914,000	1,458,400

Certain restricted stock awards granted to employees are considered participating securities as these awards contain rights to dividends prior to vesting. As a result of the adoption of FSP EITF 03-6-1, prior period net income per share and dilutive shares are restated. Basic earnings per share is allocated between distributed and undistributed income per share as follows:

	Three Months Ended June 30		Six Months Ended June 30	
	2009	2008	2009	2008
Distributed net income per share	\$.18	\$.18	\$.36	\$.36
Undistributed net (loss) income per share	(.11)	.68	(.21)	1.30
Basic earnings per share	\$.07	\$.86	\$.15	\$ 1.66

PACCAR's regular quarterly dividend will be reduced from \$.18 to \$.09 per share, payable September 8, 2009, to stockholders of record at the close of business on August 18, 2009.

NOTE H Income Taxes

The effective tax rate was 5.0% and 18.1% for the second quarter and first half of 2009 compared to 29.7% and 30.3% for the second quarter and first half of 2008. The lower effective tax rate in 2009 reflects a larger percentage benefit from permanent differences such as the R&D tax credit and favorable provision to return adjustments in the second quarter which reduced taxes by \$5.7 million and the tax rate by 20% in the second quarter of 2009.

NOTE J Derivative Financial Instruments

The Company adopted Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities* effective January 1, 2009. Derivative financial instruments are used as hedges to manage exposures to fluctuations in interest rates and foreign currency exchange rates. Certain derivative instruments designated as either cash flow hedges or fair value hedges are subject to hedge accounting. Derivative instruments that are not subject to hedge accounting are held as economic hedges. The Company's policies prohibit the use of derivatives for speculation or trading. At inception of each hedge relationship, the Company documents its risk management objectives, procedures and accounting treatment. Exposure limits and minimum credit ratings are used to minimize the risks of counterparty default. The Company had no material exposures to default at June 30, 2009.

Interest-Rate Contracts: The Company enters into various interest-rate contracts, including interest-rate swaps and cross currency interest-rate swaps. Interest-rate swaps involve the exchange of fixed for floating rate or floating for fixed rate interest payments based on the contractual notional amounts in a single currency. Cross currency interest-rate swaps involve the exchange of notional amounts and interest payments in different currencies. These contracts are used to manage exposures to fluctuations in interest rates and foreign currency exchange rates. Net amounts paid or received are reflected as adjustments to interest expense.

At June 30, 2009, the notional amount of the Company's interest-rate contracts was \$4,127.1. Notional maturities for all interest-rate contracts in the future are \$751.7 for the remainder of 2009, \$1,384.9 for 2010, \$1,307.9 for 2011, \$511.4 for 2012, \$32.8 for 2013 and \$138.4 for 2014. The majority of these contracts are floating to fixed swaps that effectively convert an equivalent amount of commercial paper and other variable rate debt to fixed rates.

Foreign-Exchange Contracts: The Company enters into foreign-exchange contracts to hedge certain anticipated transactions, assets and liabilities denominated in foreign currencies, particularly the Canadian dollar, the euro, the British pound, the Australian dollar and the Mexican peso. At June 30, 2009, the notional amount of the outstanding foreign-exchange contracts was \$233.9. Foreign-exchange contracts mature within one year.

Substantially all of the Company's interest-rate contracts and foreign-exchange contracts have been designated as cash flow hedges. The Company uses regression analysis to assess and measure effectiveness of interest-rate contracts. For foreign-exchange contracts, the Company performs quarterly assessments to ensure that critical terms continue to match. Gains or losses on the ineffective portion of cash flow hedges are recognized currently in earnings and were immaterial for the first and second quarters of 2009.

Hedge accounting is discontinued prospectively when the Company determines that a derivative financial instrument has ceased to be a highly effective hedge.

Fair Value Hedges

Changes in the fair value of derivatives designated as fair value hedges are recorded in earnings together with the changes in fair value of the hedged item attributable to the risk being hedged. The (income) or expense recognized in earnings related to fair value hedges was all in the Financial Services segment as follows:

	Three Months Ended June 30, 2009	Six Months Ended June 30, 2009
Interest and other borrowing expenses - interest-rate swaps	\$ (0.1)	\$ (5.7)
Interest and other borrowing expenses - term notes		6.2

In addition, the net interest accruals from interest rate swap settlements are also reported in interest and other borrowing expenses.

Cash Flow Hedges

Changes in the fair value of derivatives designated as cash flow hedges are recorded in accumulated other comprehensive income to the extent such hedges are considered effective.

Amounts in accumulated other comprehensive income are reclassified into net income in the same period in which the hedged transaction affects earnings. Net realized gains and losses from interest-rate contracts are recognized as an adjustment to interest expense. Net realized gains and losses from foreign exchange contracts are recognized as an adjustment to cost of sales or to financial services interest expense, consistent with the hedged transaction.

Of the \$66.4 accumulated net loss on derivative contracts included in accumulated other comprehensive loss as of June 30, 2009, \$42.3, net of taxes, is expected to be reclassified to interest expense or cost of sales in the following 12 months. The fixed interest earned on finance receivables will offset the amount recognized in interest expense, resulting in a stable interest margin consistent with the Company's risk management strategy.

Economic Hedges

Changes in the fair value of economic hedges are recorded in earnings in the period in which the change occurs.

NOTE K - Fair Value Measurements

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The hierarchy of fair value measurements is described below.

Level 1 Valuations are based on quoted prices that the Company has the ability to obtain in actively traded markets for identical assets or liabilities. Since valuations are based on quoted prices that are readily and regularly available in an active market or exchange traded market, valuation of these instruments does not require a significant degree of judgment.

Level 2 Valuations are based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 Valuations are based on model-based techniques for which some or all of the assumptions are obtained from indirect market information that is significant to the overall fair value measurement and which require a significant degree of management judgment. The Company has no financial instruments requiring Level 3 valuation.

The Company uses the following methods and assumptions to measure fair value for assets and liabilities subject to recurring fair value measurements.

Marketable Securities: The Company's marketable debt securities consist of municipal bonds, government obligations and investment-grade corporate bonds.

The fair value of government obligations and corporate bonds is based on quoted prices in active markets. These are categorized as Level 1.

The fair value of municipal bonds is estimated using recent transactions, market price quotations, and pricing models that consider, where applicable, interest rates and other observable market information. These bonds are categorized as Level 2.

Derivative Financial Instruments: The Company's derivative contracts consist of interest-rate contracts and foreign currency exchange contracts.

These derivative contracts are over the counter and their fair value is determined using modeling techniques that include market inputs such as interest rates, yield curves, currency exchange rates and credit default swap spreads. These contracts are categorized as Level 2.

A portion of the Company's fixed-rate term notes has been converted to variable-rate term notes using fair value hedges for interest-rate risk. Fair value is determined using modeling techniques that include market inputs for interest rates.

PACCAR's financial assets and liabilities subject to recurring fair value measurements are either Level 1 or Level 2 as follows:

At June 30, 2009	Level 1	Level 2	Total
Assets:			
Marketable debt securities	\$ 13.5	\$ 151.6	\$ 165.1
Derivative contracts		21.3	21.3

Derivative contracts		60.4	60.4
Liabilities:			
Term notes		541.4	541.4
Derivative contracts		173.0	173.0

Other nonfinancial assets that are measured at fair value on a nonrecurring basis are as follows:

	June 30, 2009 Level 2	December 31, 2008 Level 2
Used Trucks Held for Sale		
Truck and Other	\$ 31.6	\$ 27.9
Financial Services	143.9	96.6
	\$ 175.5	\$ 124.5

The carrying amount of used trucks held for sale is written down when appropriate to reflect their fair value. The fair value of used trucks is determined based on management's evaluation of factors such as recent sales prices of comparable units, the condition of the vehicles and the number of similar units to be sold. The cost of used truck write-downs during the quarter and six months ended June 30, 2009 was \$6.7 and \$15.9, respectively. Of the \$15.9 year-to-date cost, \$4.1 was recorded in cost of sales in the truck segment and \$11.8 was recorded in the financial services segment (credit losses of \$5.1 and as operating lease depreciation expense of \$6.7). The amount of used truck write downs was \$23.5 for the year ended December 31, 2008 of which amount \$12.1 was recorded in cost of sales in the truck segment and \$11.4 was recorded in the financial services segment (credit losses of \$9.2 and as operating lease depreciation expense of \$2.2).

(Millions, Except Share Amounts)

The Company used the following methods and assumptions to determine the fair value of financial instruments that are not recognized at fair value as described below.

Cash and Cash Equivalents: Carrying amounts approximate fair value.

Trade Receivables and Payables: Carrying amounts approximate fair value.

Financial Services Net Receivable: For floating-rate loans, wholesale financings, and interest and other receivables, fair values approximate carrying values. For fixed-rate loans, fair values are estimated using discounted cash flow analysis based on current rates for comparable loans. Finance lease receivables and related loss provisions have been excluded from the accompanying table.

Debt: The carrying amounts of commercial paper, variable-rate banks loans, and variable-rate term notes approximate fair value. For fixed-rate debt, fair values are estimated using discounted cash flow analysis based on current rates for comparable debt.

The carrying amount and fair value of Financial Services fixed-rate loans and fixed-rate debt at June 30, 2009 and December 31, 2008 were as follows:

	June 30, 2009		December 31, 2008

Overview:

PACCAR recorded lower sales and net income in the second quarter and first half of 2009 compared to year-earlier levels. Second quarter 2009 total net sales and revenues decreased 55% from the prior year to \$1.85 billion. Second quarter 2009 net income was \$26.5 million (\$.07 per diluted share) compared to \$313.5 million (\$.86 per diluted share) in the second quarter of 2008. First half total net sales and revenues were \$3.83 billion, 52% lower compared to the first half of 2008. First half net income was \$52.8 million (\$.14 per diluted share) compared to \$605.8 million (\$1.65 per diluted share) in the year-earlier period. During the second quarter of 2009, PACCAR discontinued certain subsidies for postretirement health care plans and recorded a one time pretax benefit of \$47.7 million (\$30.0 million net of tax or \$.08 per diluted share).

Compared to 2008, second quarter and first half 2009 total net sales and revenues and income before income taxes were negatively affected by the translation of weaker foreign currencies, primarily the euro and British pound. The translation effect decreased second quarter 2009 sales and revenues by \$155.1 million and income before income taxes by \$7.8 million compared to the second quarter of 2008. For the first half, the translation effect decreased sales and revenues by \$358.7 million and income before income taxes by \$26.0 million compared to 2008.

PACCAR Inc AND SUBSIDIARIES

Net sales and revenues in the Truck and Other businesses of \$1.60 billion in the second quarter of 2009 were 58% lower than the \$3.78 billion in the second quarter of 2008. For the first half of 2009, Truck and Other net sales and revenues decreased 55% to \$3.33 billion. The decrease in second quarter and year-to-date for 2009 primarily reflect decreased truck unit and part sales in all markets due to lower demand for the Company's products from the global recession.

Truck and Other Cost of sales and revenues were \$1.49 billion in the second quarter of 2009, down 53% compared to \$3.20 billion in the second quarter of 2008. Cost of sales and revenues were \$3.05 billion in the first half of 2009, down 51% compared to \$6.28 billion in the first half of 2008. Cost of sales and revenues declined in both periods primarily due to the approximately 60% decline in world wide truck deliveries. This decline due to volume was slightly offset by higher costs primarily due to lower fixed cost coverage caused by lower factory production volumes. Also included in cost of sales are severance costs of \$6.4 million for the second quarter of 2009 compared to severance costs of \$0.9 million in the second quarter of 2008 and \$14.5 million in the first half of 2009 compared to \$1.1 million in the first half of 2008.

Research and development (R&D) expenditures decreased to \$52.8 million in the second quarter of 2009 from \$90.7 million in the second quarter of 2008 and to \$105.1 million for the first half of 2009 compared to \$173.6 million in the first half of 2008 primarily due to lower spending on engine development programs. R&D is expected to continue to decline in the second half of 2009 compared to the prior year.

Selling, general and administrative (SG&A) expense for Truck and Other of \$79.2 million in the second quarter declined by \$48.3 million and \$167.6 million year-to-date declined by \$86.0 million. Lower spending is a result of focused efforts to reduce costs in response to the continued decline in global economic conditions and consist primarily of lower staffing costs, lower sales and marketing spending and lower travel costs. In addition foreign currency translation effects reduced SG&A by \$6.7 million and \$13.3 million for the quarter and six month periods. Severance costs included in SG&A were \$4.1 million in the second quarter of 2009 and \$5.6 million in the first half of 2009 compared to \$0.1 million in both the second quarter and first half of 2008. As a percentage of sales, SG&A increased in the second quarter to 4.9% in 2009 from 3.4% in 2008 and increased to 5.0% in the first half of 2009 from 3.4% in 2008 due to lower sales volumes.

Financial Services segment revenues for the second quarter of 2009 decreased to \$243.5 million from \$330.5 million in the second quarter of 2008. Revenues were \$498.3 million in the first half of 2009, compared to \$647.9 million in the first half of 2008. The decreased revenues in both the second quarter and first half of 2009 resulted from lower earning asset balances and lower yields in all markets. Second quarter Financial Services income before income taxes was \$15.6 million compared to \$58.7 million in 2008 and first half income before income taxes was \$30.9 million compared to \$126.0 million. The decrease in both time periods was primarily due to lower finance margins resulting from the lower average earning asset balances, higher credit losses and lower yields, slightly offset by lower operating expenses.

Investment income declined to \$4.9 million and \$12.9 million for the second quarter and first half of 2009 compared to \$22.6 million and \$47.3 million for the second quarter and first half of 2008 due to lower invested balances and lower market interest rates.

Table of Contents**FORM 10-Q****PACCAR Inc AND SUBSIDIARIES**

The effective tax rate was 5.0% and 18.1% for the second quarter and first half of 2009 compared to 29.7% and 30.3% for the second quarter and first half of 2008. The lower effective tax rate in 2009 reflects a larger percentage benefit from permanent differences such as the R&D tax credit and favorable provision to return adjustments in the second quarter which reduced taxes by \$5.7 million and the tax rate by 20% in the second quarter of 2009.

The Company's return on revenues was 1.4% and 7.6% for the second quarter of 2009 and 2008, respectively and was 1.4% and 7.5% for the first half of 2009 and 2008, respectively.

Truck

PACCAR's truck segment, which includes the manufacture and distribution of trucks and related aftermarket parts, accounted for 86% of revenues in both the second quarter and the first half of 2009 compared to 91% in the second quarter and the first half of 2008. In North America, trucks are sold under the Kenworth and Peterbilt nameplates and, in Europe, under the DAF nameplate.

2009 Compared to 2008:

PACCAR's worldwide truck sales and revenues of \$1.58 billion in the second quarter of 2009 was down by 58% compared to the second quarter of 2008 due to lower demand for the Company's trucks and, to a lesser extent, aftermarket parts in all markets reflecting worldwide recessionary economic conditions. In the first half of 2009 PACCAR's worldwide truck sales and revenues of \$3.29 billion was down by 55% compared to \$7.33 billion in the first half of 2008 also due to lower demand for the Company's trucks.

FORM 10-Q

PACCAR Inc AND SUBSIDIARIES

Sales and revenues in the U.S. and Canada during the three- and six-month periods ended June 30, 2009 decreased compared to the prior periods in 2008 due to lower new truck deliveries which reflected a lower market size and lower market share. Industry retail sales in the heavy duty market in U.S. and Canada were 31% lower in the first six months of 2009 compared to the first half of 2008. PACCAR's heavy duty market share was 21.9% compared to 27.6% in the first half of 2009 and 2008, respectively.

In the second quarter and first half of 2009 European truck segment net sales and revenues decreased to \$575.7 million and \$1,276.5 million, respectively, from 2008. Lower net sales and revenues primarily resulted from the decline in DAF truck deliveries during the second quarter and first half of 2009 due to lower truck market demand, lower truck selling prices and lower parts sales. DAF's 2009 market share of the 15 tonne and above market for the first half of 2009 was 13.8% compared to 14.1% in 2008.

Net Sales and Revenues in Mexico, Australia and other countries outside the Company's primary markets declined 67% to \$193.3 million in the second quarter of 2009 due to lower new truck deliveries. Truck unit deliveries in Mexico, Australia and other countries outside the Company's primary markets decreased 74% in the second quarter of 2009 compared to 2008. Net Sales and Revenues in Mexico, Australia and other countries outside the Company's primary markets declined 67% to \$371.4 million for the first half of 2009 due to lower new truck deliveries. Truck unit deliveries in Mexico, Australia and other countries outside the Company's primary markets decreased 75% in the first half of 2009 compared to 2008 due to lower overall market demand.

Truck segment income before income taxes decreased to a loss of \$36.5 million in the second quarter of 2009 from \$365.8 million of income in the second quarter of 2008. During the first half of 2009 the Truck segment recorded a pretax loss of \$11.1 million compared to income of \$701.1 million in 2008. The loss in both periods was due to lower truck sales and margins in all markets somewhat offset by lower research and development spending as well as lower sales, general and administrative spending.

Total Truck segment gross margins for the second quarter of 2009 decreased to 6.8% from 15.3% in the second quarter of 2008. Gross margins for the first half of 2009 were 8.2% compared to 15.1% in the same period of 2008. Gross Margins were negatively impacted primarily by lower gross margins on trucks. Gross margins on trucks declined to negative 3.9% and 1.6% for the three and six month periods primarily due to lower selling prices from competitive market conditions driven by lower industry demand and lower absorption of fixed costs resulting from lower truck production. 2009 Parts gross margins declined from the prior year due to a sales mix shift to lower margin replacement parts.

Truck Outlook

Worldwide recessionary economic conditions are currently forecast to continue to dampen demand for heavy-duty trucks for the remainder of 2009 which will result in continued low truck segment revenues and income for the Company compared to 2008. 2009 research and development spending will be reduced to \$180-\$200 million from \$341.8 million in 2008 and will continue to focus on engine development and new product programs. The Company expects the decline in selling, general and administrative expenses compared to 2008 to continue as it reduces costs throughout the organization to align with lower demand during the economic downturn. Western and Central European heavy-duty registrations for 2009 are projected to decline 50% from 2008 levels to be 170,000-180,000 units. While it is difficult to estimate given the current economic uncertainty, truck sales in these European markets in 2010 could be in the range of 150,000 - 180,000 units. In North America customers continue to adjust their freight capacity due to the continued declining economy and the Company expects industry Class 8 retail sales to be in the range of 100,000 -110,000 trucks in 2009. Industry retail sales in 2010 are expected to improve slightly and be in a range of 110,000 -140,000 units. International markets are also expected to continue to be weak in 2009. See the Forward Looking Statement section of Management's Discussion and Analysis for factors that may affect this outlook.

2009 Compared to 2008:

PACCAR Financial Services (PFS) income before taxes in 2009 of \$15.6 million and \$30.9 million declined from the \$58.7 million and \$126.0 million earned in 2008. Income before taxes was negatively impacted by lower earning assets in all markets and lower yields on earning assets partially offset by lower interest costs. In addition, the lower income before taxes reflects a higher provision for losses on receivables, somewhat offset by lower selling, general and administrative expenses.

Revenues:

PFS revenues for the second quarter of 2009 decreased 26% to \$243.5 million from \$330.5 million in the second quarter of 2008 and 23% in the first half of 2009 to \$498.3 million compared to \$647.9 million in the first half of 2008. The decreased revenues in both the second quarter and first half of 2009 resulted from lower earning asset balances and lower yields in all markets. Average earning assets declined 20% in the three months ended June 30, 2009 to \$8.62 billion compared to \$10.79 billion for the second quarter last year and 17% year to date to \$8.89 billion compared to \$10.67 billion in 2008. The lower average earning assets reflected the effects of lower new loan and lease volume in all markets and a reduction in dealer wholesale financing of new trucks. New loan and lease volume was \$388.5 million in the second quarter of 2009 compared to \$1,040.6 million in 2008 and \$671.7 million year to date in 2009 down from \$1,822.4 million last year. The decrease in new loan and lease volume reflects both the lower truck markets due to the economic recession and lower finance market share. PFS market share on new PACCAR trucks delivered in the second quarter of 2009 was 21.5% and year to date was 19.8%, down from 29.2% and 28.0% in the corresponding periods in 2008 from an emphasis on credit quality and higher margins mainly in the U.S., Canada and Europe.

At June 30,	2009	2008
Percentage of retail loan and lease accounts 30+ days past-due:		
U.S. and Canada	2.8%	2.9%
Europe	5.3%	1.3%
Mexico and Australia	10.0%	3.8%
Total	4.7%	2.7%

Worldwide PFS accounts 30+ days past-due at June 30, 2009 increased to 4.7% of portfolio balances, an increase from 2.7% at June 30, 2008 due to a decline in freight tonnage, freight rates and customer cash flows most significantly in Europe and Mexico.

Table of Contents**FORM 10-Q****PACCAR Inc AND SUBSIDIARIES**

Interest income and other revenue in the second quarter and first half of 2009 declined from the corresponding periods in the prior year due to lower average earning assets as well as lower asset yields summarized as follows:

	Three Months Ended June 30	Six Months Ended June 30
Interest and fees - 2008	\$ 178.8	\$ 350.8
Lower average asset balances	(36.6)	(61.8)
Decrease in yield	(16.5)	(32.2)
Interest and fees - 2009	\$ 125.7	\$ 256.8

The average earning assets decline was in loans and finance leases from lower new business volume as well as lower dealer wholesale financing due to a decline in dealer inventory levels in all markets. Yield declined primarily due to lower market interest rates.

Operating lease, rental and other income in the second quarter and first half of 2009 declined from the corresponding periods in the prior year from lower average assets, lower rental utilization, and a decrease in yields. The decline in average operating lease and other assets was due to lower new business volume. The lower rental utilization reflects the weaker economic environment and the decline in yields was due to competitive market conditions.

Expenses

Interest and other borrowing expenses decreased in the second quarter and year to date from the comparable periods in the prior year due to lower average debt balances and lower borrowing rates as summarized below:

	Three Months Ended June 30	Six Months Ended June 30
Interest and other borrowing expenses - 2008	\$ 104.9	\$ 200.6
Lower average debt balances	(19.0)	(29.8)
Lower borrowing rates	(12.9)	(6.5)
Interest and other borrowing expenses - 2009	\$ 73.0	\$ 164.3

Average debt balances decreased due to the lower level of funding needed from the decline in the financial services portfolio. Lower borrowing rates, were primarily related to lower commercial paper rates. Included in the \$6.5 million effect of lower borrowing rates in 2009 year to date was \$11.0 million of higher expense from mark to market adjustments for economic hedges and foreign currency balances.

Table of Contents**FORM 10-Q****PACCAR Inc AND SUBSIDIARIES**

In the second quarter and year to date 2009, depreciation and other expenses were \$104.5 million and \$206.4 million, respectively, compared to the \$112.5 million and \$220.4 million amounts in the same periods in 2008. The lower amounts in 2009 reflect lower operating expenses from a lower asset base, partially offset by higher depreciation. 2009 depreciation was \$81.9 million in the second quarter and \$160.2 million year to date compared to \$74.9 million and \$144.9 million, respectively, in the prior year. The higher depreciation results from both impairments on existing operating lease assets of \$5.4 million and \$7.4 million in the second quarter and first half, respectively, as well as losses on the sale of returned operating lease assets of \$4.1 million in the second quarter and \$6.7 million in the first half reflecting the impact of lower used truck prices.

Selling, general and administrative (SG&A) expense of \$21.3 million in the second quarter declined by \$8.7 million and SG&A expense of \$42.6 million year-to-date declined by \$16.5 million. Lower spending is a result of focused efforts to reduce costs in response to the continued decline in global economic conditions and consists primarily of lower staffing and travel costs.

The provision for losses on receivables for the second quarter and year to date is summarized as follows:

	Three Months Ended June 30, 2009			Six Months Ended June 30, 2009		
	Net Charge-offs	Increase (decrease) in allowance	Provision for losses on receivables	Net Charge-offs	Increase (decrease) in allowance	Provision for losses on receivables
U.S. and Canada	\$ 16.9	\$ (2.0)	\$ 14.9	\$ 32.5	\$ (8.1)	\$ 24.4

	Net Charge-offs	Increase (decrease) in allowance	Provision for losses on receivables	Net Charge-offs	Increase (decrease) in allowance	Provision for losses on receivables
U.S. and Canada	\$ 21.1	\$.1	\$ 21.2	\$ 35.5	\$.5	\$ 36.0
Europe	.8	.2	1.0	1.3	1.3	2.6
Mexico and Australia	1.2	1.0	2.2	1.6	1.6	3.2
	\$ 23.1	\$ 1.3	\$ 24.4	\$ 38.4	\$ 3.4	\$ 41.8

The provision for losses on receivables in 2009 increased to \$29.1 in the second quarter and \$54.1 million year to date from \$24.4 million and \$41.8 million in the corresponding period in the prior year. The increases reflect higher net portfolio charge-offs in all markets from difficult economic conditions worldwide, with the largest increases in Europe, somewhat offset by decreases in the allowance for losses due to a declining asset base.

Financial Services Outlook

Financial Services segment results are principally dependent on the generation of loans and leases and the related spread between the yields on loans and leases and borrowing costs, access to liquidity to generate new business and the level of credit losses. A reduction in average earning assets is expected in 2009 as continued lower PACCAR truck sales in all markets will likely result in lower new business volume and reduced dealer wholesale financing in the third and fourth quarters of 2009 compared to the prior year. Recessionary economic conditions are expected to continue to exert pressure on the profit margins and cash flow of truck operators in the second half of 2009 and lead to continued higher levels of past-due accounts, truck repossessions and voluntary truck returns. These factors are also expected to contribute to lower average earning assets and result in lower 2009 revenue and income compared to the prior year. See the Forward Looking Statement section of Management's Discussion and Analysis for factors that may affect this outlook.

Other Business

Included in Truck and Other is the Company's winch manufacturing business. Sales from this business represent approximately 1% of net sales for 2009 and 2008.

Marketable debt securities	165.1	175.4
	\$ 2,034.8	\$ 2,130.6

The Company's total cash and marketable debt securities decreased \$95.8 million in 2009 to \$2,034.8 million. The Company's total cash and cash equivalents decreased \$85.5 million to \$1,869.7 million for the six months ended June 30, 2009. This was primarily the result of \$410.0 million of cash provided by operating activities and \$489.8 million of cash provided by investing activities, offset by \$1,013.8 million of cash used in financing activities as summarized below.

Six Months Ended June 30:	2009	2008
Operating activities:		
Net Income	\$ 52.8	\$ 605.8
Net income items not affecting cash	309.8	362.3
Changes in operating assets and liabilities	47.4	(214.5)
Net cash provided by operating activities	410.0	753.6
Net cash provided by (used in) investing activities	489.8	(335.8)
Net cash used in financing activities	(1,013.8)	(664.0)
Effect of exchange rate changes on cash	28.5	76.1

Cash and cash equivalents at beginning of the period	1,955.2	1,858.1
Cash and cash equivalents at end of the period	\$ 1,869.7	\$ 1,688.0

Cash provided by operations declined to \$410.0 million in the first half of 2009 compared to \$753.6 million in the same period of 2008, primarily due to lower net income of \$553.0 million, higher pension contributions of \$148.4 and an increase in working capital requirements, partially offset by higher collections from dealer inventory financing of \$477.5 million.

Cash provided by investing activities increased by \$825.6 million to \$489.8 million in the six months ended June 30, 2009 compared to the prior year. Investments in capital equipment decreased \$353.5 million, proceeds on asset disposals increased \$129.3 million, and the Financial Services segment experienced net liquidations from lower new loan and lease originations of \$505.0 million due to lower demand for truck financing. These cash inflows were partially offset by fewer liquidations of marketable debt securities of \$180.2 million in the current period.

The cash outflow from financing activities in the first half of 2009 of \$1,013.8 million was \$349.8 million higher than the same period in 2008 primarily due to lower net borrowings of \$870.8 million from a declining financial services asset base, offset by lower cash dividends paid in 2009 of \$331.9 million as a result of a lower special dividend, and no treasury stock repurchases in 2009. PACCAR reduced its regular quarterly dividend from \$.18 cents to \$.09 cents per share, effective in the third quarter 2009.

PACCAR Inc AND SUBSIDIARIES

The Company has line of credit arrangements of \$3.66 billion, of which \$3.41 billion was unused at the end of June 2009. Included in these arrangements are \$3.0 billion of syndicated bank facilities. Of the \$3.0 billion bank facilities, \$2.0 billion matures in June 2010 and \$1.0 billion matures in June 2012. The Company intends to replace these credit facilities as they expire with facilities of similar amounts and duration. These credit facilities are maintained primarily to provide backup liquidity for commercial paper borrowings and maturing medium-term notes.

At June 30, 2009, PACCAR's European finance subsidiary, PACCAR Financial Europe, had \$680 million available for issuance under a \$1.5 billion medium-term note program registered with the London Stock Exchange. The program is renewable annually.

The Company believes its strong liquidity position and AA- investment grade credit rating will continue to provide financial stability and access to capital markets at competitive interest rates.

The Company provides funding for working capital, capital expenditures, research and development, dividends, stock repurchases and other business initiatives and commitments primarily from cash provided by operations. Management expects this method of funding to continue in the future.

Expenditures for property, plant and equipment in the first half of 2009 totaled \$30.2 million compared to \$201.0 million in 2008. The Company has reduced its planned capital expenditures to reflect current economic conditions. As a result, capital spending in 2009 is expected to be approximately \$100 million to \$140 million down from \$463 million in 2008. Research and development spending is expected to be reduced to \$180 million to \$200 million from \$342 million in 2008. PACCAR's 2009 capital and research and development spending will continue to focus on manufacturing efficiency improvements, engine development and new product programs.

Other information on liquidity and capital resources as presented in the 2008 Annual Report to Stockholders continues to be relevant.

FORWARD-LOOKING STATEMENTS:

Certain information presented in this report contains forward-looking statements made pursuant to the Private Securities Litigation Reform Act of 1995, which are subject to risks and uncertainties that may affect actual results. Risks and uncertainties include, but are not limited to: a significant decline in industry sales; competitive pressures; reduced market share; reduced availability of or higher prices for fuel; increased safety, emissions, or other regulations resulting in higher costs and/or sales restrictions; currency or commodity price fluctuations; lower used truck prices; insufficient or under-utilization of manufacturing capacity; supplier interruptions; insufficient liquidity in the capital markets; fluctuations in interest rates; changes in the levels of the Financial Services segment new business volume due to unit fluctuations in new PACCAR truck sales; changes affecting the profitability of truck owners and operators; price changes impacting equipment costs and residual values; insufficient supplier capacity or access to raw materials; labor disruptions; shortages of commercial truck drivers; increased warranty costs or litigation; or legislative and governmental regulations. A more detailed description of these and other risks is included under the heading Part 1, Item 1A, "Risk Factors" in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.
