Form 10-Q

August 23, 2010

[Table of Contents](#)

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934

For the Quarterly Period Ended June 30, 2010

Commission File Number 000-32627

(Exact name of registrant as specified in its charter)

Georgia
(State or other jurisdiction of
incorporation or organization)

58-1423423
(IRS Employer
Identification No.)

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

P. O. Box 455, 1010 North Way, Darien, Georgia 31305

(Address of principal executive offices) (Zip Code)

(912) 437-4141

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company.)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of August 12, 2010, 3,129,388 shares of the Registrant's common stock, par value \$1.25 per share, were outstanding.

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements of Southeastern Banking Corporation and subsidiary (the Company) have been prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) for interim financial information and the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, these financial statements do not include all of the information and footnotes required by U.S. GAAP for complete financial statements and should be read in conjunction with the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2009.

The accounting and reporting policies followed in the presentation of the accompanying unaudited consolidated financial statements are consistent with those described in Note 1 of the Notes to the consolidated financial statements included in the Company's 2009 Form 10-K, as updated by the information contained in this Form 10-Q. In the opinion of management, these consolidated financial statements reflect all adjustments necessary to fairly present such information for the periods and dates indicated. Such adjustments, which include transactions typically determined or settled at year-end, are normal and recurring in nature. All significant intercompany accounts and transactions have been eliminated. The consolidated balance sheet as of December 31, 2009 has been extracted from the audited consolidated balance sheet included in the Company's 2009 Form 10-K. Certain reclassifications, with no effect on total assets or net operating results, have been made to prior period amounts to conform to the current period presentation.

The preparation of the consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Results of operations for interim periods are not necessarily indicative of trend or results to be expected for the full year, due in part to seasonal variations and unusual or infrequently occurring items.

Earnings Per Share

Basic earnings per share are computed by dividing net income by the weighted average number of common shares outstanding during each period. Diluted earnings per share are based on the weighted average number of common shares outstanding adjusted to include the effect of potentially dilutive common shares. Potentially dilutive common shares include incremental shares issuable upon exercise of outstanding stock options using the treasury stock method. In any periods of net loss, diluted earnings per share is calculated in the same manner as basic earnings per share. Since they were non-dilutive, 83,500 and 42,000 equivalent shares related to stock options were excluded from the computation of diluted earnings (loss) per share at June 30, 2010 and 2009.

2. NEW ACCOUNTING PRONOUNCEMENTS

In June 2009, the Financial Accounting Standards Board (FASB) issued a new pronouncement updating guidance on transfers of financial assets and servicing. This standard eliminates the concept of qualifying special purpose entities, provides guidance on when a portion of a transferred financial asset can be evaluated for sale accounting, provides additional guidance on accounting for transfers of financial assets, and requires additional disclosures. This guidance became effective for the Company as of January 1, 2010, with adoption applied prospectively for transfers that occur on or after the effective date. Adoption did not have a material impact on the consolidated financial statements.

Table of Contents

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

In January 2010, the FASB issued an accounting pronouncement requiring additional disclosures on transfers in and out of the fair value hierarchy and the activity within Level 3 financial instruments. This pronouncement also provides clarification on classification of financial instruments and the discussion of inputs and valuation techniques. The new disclosures and clarification are effective for interim and annual reporting periods ending after December 15, 2009, except for the disclosures related to the activity within Level 3 financial instruments. Those disclosures are effective for periods after December 15, 2010 and for interim periods within those years.

In July 2010, the FASB issued new accounting guidance that requires additional disclosures about the allowance for loan losses and the credit quality of the loan portfolio. The additional disclosures include a rollforward of the allowance for loan losses on a disaggregated basis and more information, by type of receivable, on credit quality indicators including aging and troubled debt restructurings as well as any significant purchases and sales. The new disclosures are effective December 31, 2010. The new guidance does not change the accounting model, and accordingly, will have no impact on the Company's consolidated results of operations or financial position.

3. INVESTMENT SECURITIES

The amortized cost and estimated fair value of investment securities are summarized below:

<i>June 30, 2010</i>	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available-for-sale:				
Debt securities:				
U. S. Government and federal agency securities	\$ 3,738,492	\$ 187,344	\$	\$ 3,925,836
U. S. Government-sponsored enterprise securities	18,382,528	331,489		18,714,017
Agency residential mortgage-backed securities	13,855,025	875,624		14,730,649
Obligations of states and political subdivisions	19,804,936	485,119	100,537	20,189,518
Corporate debt obligations	9,331,059		726,348	8,604,711
 Total investment securities	 \$ 65,112,040	 \$ 1,879,576	 \$ 826,885	 \$ 66,164,731

Table of Contents

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

<i>December 31, 2009</i>	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available-for-sale:				
Debt securities:				
U. S. Government and federal agency securities	\$ 4,242,856	\$ 161,450	\$	\$ 4,404,306
U. S. Government-sponsored enterprise securities	19,537,557	395,251	591	19,932,217
Agency residential mortgage-backed securities	16,872,230	693,503		17,565,733
Obligations of states and political subdivisions	22,263,080	509,739	125,853	22,646,966
Corporate debt obligations	13,341,193		3,264,285	10,076,908
 Total investment securities	 \$ 76,256,916	 \$ 1,759,943	 \$ 3,390,729	 \$ 74,626,130

The amortized cost and fair value of debt securities by contractual maturity at June 30, 2010 are shown in the table below. In some cases, issuers may have the right to call or prepay obligations without call or prepayment penalties prior to the contractual maturity date. Mortgage-backed securities are shown separately from other debt securities due to customary prepayment features which cause average lives to differ significantly from contractual maturities.

<i>June 30, 2010</i>	Available-for-Sale	
	Amortized Cost	Fair Value
Due within one year	\$ 19,212,397	\$ 19,441,762
Due from one to five years	9,960,630	10,206,956
Due from five to ten years	10,898,813	11,222,457
Due after ten years	11,185,175	10,562,907
	51,257,015	51,434,082
Agency residential mortgage-backed securities	13,855,025	14,730,649
 Total investment securities	 \$ 65,112,040	 \$ 66,164,731

Securities with carrying values of \$57,655,851 and \$62,797,149 at June 30, 2010 and December 31, 2009, respectively, were pledged to secure public deposits and other borrowings as required by law.

Gross realized gains and losses from sales of securities available-for-sale for the quarter and six months ended June 30, 2010 and 2009 are shown in the next table.

Net realized gain (loss)	\$ (143,408)	\$	\$ (143,408)	\$ 197,871
Tax provision (benefit)	\$ (48,759)	\$	\$ (48,759)	\$ 67,275
Proceeds from sale	\$ 4,146,930	\$	\$ 4,146,930	\$ 13,417,091

The cost of investment securities sold, and the resultant gain or loss, was based on the specific identification method. An other-than-temporary impairment loss recognized in the second quarter of 2010 is discussed in the narrative on page 13.

Securities with unrealized losses that were not deemed other-than-temporarily impaired at June 30, 2010 and December 31, 2009 are shown in the table on the next page.

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

On June 30, 2010, the Company held certain investment securities having unrealized loss positions. Market changes in interest rates and credit spreads will result in temporary unrealized losses as the market price of securities fluctuates. The turmoil and illiquidity in the financial markets during 2009 and 2010 year-to-date increased market yields on certain securities as a result of credit spreads widening. This shift in market yields resulted in unrealized losses on certain securities within the Company's portfolio.

Unrealized losses continued to be concentrated in corporate debt obligations at June 30, 2010. The unrealized loss of \$726,348 related to 7 corporate debt obligations was attributable exclusively to issues of banks or bank holding companies domiciled in the southeastern United States. At June 30, 2010, one corporate holding with a fair value of \$1,460,757 and unrealized loss of \$13,868 was rated Baa1 or BBB- by at least one nationally recognized rating agency; two other holdings, both pertaining to the same issuer, with fair values of \$3,056,224 and unrealized losses of \$385,495, were rated BB+, and a single holding of a separate issuer, with a fair value of \$892,500 and unrealized loss of \$42,559, was rated B+. In the second quarter of 2010, the Company sold three B+ holdings of this same issuer, recognizing a loss of \$141,088; a significant improvement in market value resulting from an exchange offer announced by the issuer in April 2010 precipitated the sale. Total proceeds from the sale aggregated \$3,829,250. Three non-rated trust preferred securities had an aggregate carrying value of \$3,195,230 and unrealized loss of \$284,426 at June 30, 2010. The total unrealized loss on these 7 corporate securities, including the trust preferred holdings, is largely reflective of the illiquidity and risk premiums reflected in the market for bank-issued securities due to pervasive capital, asset quality, and other issues which continue to affect the banking industry. Although a) major rating agencies have downgraded certain of these securities during 2010 and b) recent profitability and near-term profit forecasts by industry analysts reflect continuing pressure due to loan losses and other issues, the Company currently expects the issuers to settle the securities at par. In particular, the issuers of the BB+ and B+ rated securities were recipients of government capital and continue to meet their obligations. However, management's position regarding the impairment of these securities is subject to change as circumstances evolve.

Within the municipal portfolio, three or \$842,589 of total holdings had been in a continuous unrealized loss position for twelve months or more at June 30, 2010 and one or \$201,618 in a continuous loss position less than twelve months. The unrealized loss position resulted primarily from changes in market yields and withdrawn ratings on municipals that had received credit support from bond insurance. Ratings withdrawals have been widespread during the current economic crisis as many bond insurers faltered. As discussed further below, the Company does not rely solely on bond insurance in making investment decisions and did not consider these particular securities to be impaired at June 30, 2010. Except for seventeen non-rated issues with fair values aggregating \$4,350,346, these municipals were all rated, investment grade securities. The majority, or 81%, of the non-rated issues were based in Georgia. In analyzing non-rated municipals, management considers debt service coverage and whether the bonds support essential services such as water/sewer systems and education. One municipal holding with a cost basis of \$320,000 was sold at a \$2,320 loss in the second quarter due to concerns regarding the issuer's proximity to the Gulf Oil spill.

None of the Company's a) U.S. Government and federal agency securities, which comprise U.S. Small Business Administration participation certificates; b) U.S. Government-sponsored enterprise securities, which principally comprise Federal Farm Credit Bank and Federal Home Loan Bank

Table of Contents

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

(FHLB) obligations; or c) agency residential mortgage-backed securities, which comprise Fannie Mae, Freddie Mac, and Ginnie Mae issues, had an unrealized loss at June 30, 2010. The Company does not own any private label mortgage-backed securities.

Management evaluates investment securities for other-than-temporary impairment on a quarterly basis, and more frequently when conditions warrant. This analysis requires management to consider various factors, including the duration and magnitude of the decline in value; the financial condition of the issuer or issuers; structure of the security; and, notwithstanding classification of the portfolio as available-for-sale, the Company's intent to sell the security or whether it is more likely than not that the Company would be required to sell the security before the anticipated recovery in market value. At June 30, 2010, management reviewed securities with an unrealized loss and concluded that a corporate debt security with a carrying value of \$445,000 was other-than-temporarily impaired; the resultant \$45,059 impairment loss was recorded in the second quarter. This security was subsequently sold in July at no additional loss. The Company still holds a security from the same issuer; this residual holding, which the Company has no present intention of selling, had a carrying value of \$447,500 and unrealized loss of \$42,559 at June 30, 2010. Additional impairment charges could become necessary in the future if the economic crisis facing the banking industry does not abate and various issuers' financial condition continues to weaken.

The Company held stock in the FHLB of Atlanta totaling \$1,313,800 at June 30, 2010. The Company carries the stock, which is included in other assets, at cost and evaluates it for impairment based on ultimate recoverability of par value. The Company evaluated its holding in FHLB stock at June 30, 2010 and believes its holdings are recoverable at par. In addition, the Company does not have operational or liquidity needs that would require a redemption of the stock in the foreseeable future and therefore determined that the stock was not other-than-temporarily impaired.

Concentrations of credit risk pertaining to investment securities are discussed in other sections of this Form 10-Q.

4. FAIR VALUE
Determination of Fair Value

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and for disclosure purposes. Accounting guidance on fair value measurements and disclosures specifies that the fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best defined using quoted market prices, but in many instances, quoted market prices for the Company's various financial instruments may not be available. Under these circumstances, fair values are estimated using present value or other variation techniques. Those techniques are significantly affected by the underlying assumptions, including the discount rate and estimates of future cash flows; accordingly, the resulting fair value estimate may not be realized in an immediate settlement of the instrument.

Recent fair value guidance clarifies that exit prices based on orderly transactions between market participants under current market conditions, not forced liquidations or distressed sales, should be the basis for determining fair value. If the volume and level of activity for the asset or liability has declined significantly, a change in valuation technique or the use of multiple valuation techniques

Table of Contents

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

may be appropriate. In this instance, determining the price at which willing market participants would transact depends on the various facts and circumstances and requires significant judgment. The resulting fair value is a reasonable point within the determined range that best indicates fair value under current conditions.

Fair Value Hierarchy

In accordance with accounting guidance, the Company groups its financial assets and liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities trade and the reliability of the assumptions used to determine fair value:

Level 1 Valuation is based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Level 1 assets and liabilities generally include debt and equity securities that are traded on an active exchange. Valuations are obtained from readily available pricing sources for market transactions involving such assets or liabilities.

Level 2 Valuation is based on inputs other than level 1 prices that are observable for the asset or liability, either directly or indirectly. The valuation may be based on quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability. Level 2 inputs may incorporate interest rates and yield curves that are observable at commonly quoted intervals, volatilities, prepayment speeds, credit risks, and default rates.

Level 3 Valuation is based on unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments whose valuation requires significant management judgment or estimation. Level 3 valuation also includes observable inputs for single dealer nonbinding quotes not corroborated by observable market data.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Risk premiums that a market participant would require must be considered.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Fair value is the primary basis of accounting for investment securities available-for-sale. The Company does not currently measure any other assets or liabilities at fair value on a recurring basis. When quoted market prices for identical securities are available in an active market, these securities are classified within level 1 of the valuation hierarchy. Level 1 securities would include highly liquid government bonds, such as U.S. Treasury notes or exchange-traded equities. If quoted market prices for identical securities are not available, then fair values are estimated using matrix models, quoted prices of securities with similar characteristics, or discounted cash flows. Examples of such instruments, which would generally be classified within level 2, include U.S. Government-sponsored enterprise securities, agency mortgage-backed securities, obligations of states and political subdivisions, and certain corporate debt obligations. Due to limited activity and less transparency regarding input factors, certain corporate debt obligations were classified in level 3 at June 30, 2010 and December 31, 2009.

Securities measured at fair value on a recurring basis are presented in the next table.

Obligations of states and political subdivisions		20,189,518		20,189,518
Corporate debt obligations		8,104,711	500,000	8,604,711
Total investment securities	\$	\$ 65,664,731	\$ 500,000	\$ 66,164,731

	Fair Value Measurements Using			Total Carrying Value
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
<i>December 31, 2009</i>				
Investment securities available-for-sale:				
Debt securities:				
U. S. Government and federal agency securities	\$	\$ 4,404,306	\$	\$ 4,404,306
U. S. Government-sponsored enterprise securities		19,932,217		19,932,217
Agency residential mortgage-backed securities		17,565,733		17,565,733
Obligations of states and political subdivisions		22,646,966		22,646,966
Corporate debt obligations		3,916,694	6,160,214	10,076,908
Total investment securities	\$	\$ 68,465,916	\$ 6,160,214	\$ 74,626,130

The corporate debt obligations measured at fair value using Level 3 inputs at June 30, 2010 comprised one trust preferred security with a cost basis of \$500,000, for which there is currently no active market. Like the Company's other corporate debt holdings, this security is also an issue of a bank/bank holding company domiciled in the southeastern United States.

Table of Contents

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

The following is a reconciliation of activity for the corporate debt obligations measured at fair value based on significant unobservable inputs (level 3):

<i>Six Months Ended June 30,</i>	2010
Level 3 assets:	
Balance, December 31, 2009	\$ 6,160,214
Unrealized losses included in comprehensive income	
Obligations transferred from Level 3	5,660,214
Balance, June 30, 2010	\$ 500,000

The corporate debt obligations transferred from level 3 to level 2 during the six months ended June 30, 2010 were the B+ rated and trust preferred securities discussed in Note 3. The transfer, effective the beginning of the period, resulted from increased transparency in input factors provided by a third party pricing service; should this transparency diminish, these obligations could be reclassified as level 3 assets in the future. No other movements were made between levels 1, 2, or 3 during the first six months of 2010.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Certain instruments are measured at fair value on a nonrecurring basis; in other words, these instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances—for example, when evidence of impairment exists. Such instruments include impaired loans and other real estate. Loan impairment is reported when full payment under the original loan terms is not expected. Impaired loans are carried at the present value of estimated future cash flows using the loan's existing rate or the fair value of collateral if the loan is collateral-dependent. When management believes the uncollectibility of all or any portion of a loan is confirmed, a loss is charged against the allowance. Any necessary increase to the allowance resulting from impaired loans is recorded as a component of the provision for loan losses. During the first half of 2010, the Company recognized losses of \$7,438,805 on impaired loans outstanding through the allowance for loan losses. At June 30, 2010, impaired loans with an aggregate outstanding principal balance of \$49,327,558 were measured and reported net of specific allowance at a fair value of \$46,523,500. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the loan impairment as a level 2 instrument. When an appraised value is not available or management determines the fair value of the collateral is impaired beyond appraised value and no observable market price exists, the Company records the loan impairment in level 3. Given the current difficulties in obtaining comparable sales and other observable inputs due to high inventories and distressed sales prevalent in the market, particularly for certain real estate collateral, the Company classified all impaired loans in level 3 at June 30, 2010.

Other real estate is adjusted to the lower of cost or fair value upon transfer of the underlying loan to foreclosed balances. Fair value is based upon independent market prices, appraised values, or management's estimate of collateral value. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company classifies other real estate as

Table of Contents

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

level 2; otherwise, other real estate is classified as level 3. Any write-down to fair value at foreclosure is charged to the allowance for loan losses while subsequent devaluations are included in noninterest expense. During both the quarter and six months ended June 30, 2010, devaluations of other real estate currently outstanding totaled \$909,569. All foreclosed real estate balances were classified in level 3 at June 30, 2010.

Level 3 assets also include FHLB stock, which is only redeemable with the issuer at par and cannot be traded in the market; as such, no observable market data for this holding is available. The Company evaluated its holding in FHLB stock at June 30, 2010 and determined no impairment charge was necessary. Other assets are similarly evaluated under fair value accounting on a nonrecurring basis.

The table below presents the Company's outstanding assets for which a nonrecurring change in fair value was recorded during the six months ended June 30, 2010, aggregated by the level in the fair value hierarchy within which those measurements fall. Assets reviewed for impairment such as level 3 FHLB stock, but for which no corresponding impairment charge was recorded, are not included in these totals.

	Fair Value Measurements Using				
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Net Carrying Value	Total Gains (Losses) for the Six Months
<i>June 30, 2010</i>					
Assets:					
Impaired loans	\$	\$	\$ 46,523,500	\$ 46,523,500	\$ (7,438,805)
Other real estate			3,892,460	3,892,460	(909,569)
Total fair value of assets on a nonrecurring basis	\$	\$	\$ 50,415,960	\$ 50,415,960	\$ (8,348,374)

As disclosed on the prior page, the loss amount shown for impaired loans includes charge-offs as well as the allowance currently allocated for these loans at June 30, 2010. No transfers were made between levels 1, 2, and 3 assets evaluated under fair value accounting on a nonrecurring basis. Additionally, no nonrecurring change in fair value was recognized on any liabilities in 2010 year-to-date.

Fair Value of Financial Instruments

Methodologies for estimating the fair value of financial assets and liabilities that are measured at fair value on a recurring or nonrecurring basis are discussed above. For certain other financial assets and liabilities, fair value approximates carrying value due to the nature of the financial instrument. These instruments include cash and cash equivalents, demand and other non-maturity deposits, and overnight borrowings. The following methods and assumptions were used in estimating the fair value of other financial instruments:

Variable rate loans that reprice frequently and have no significant change in credit risk are fairly valued at their carrying amounts. For fixed rate loans, fair values are estimated based on discounted cash flow analyses, using interest rates currently being offered for

Table of Contents

Southeastern Banking Corporation
Notes to Consolidated Financial Statements
(Unaudited)

loans with similar terms to borrowers of similar credit quality. The Company did not use an incremental market risk and liquidity discount in deriving loan fair values as management has no present intention to sell any portion of the loan portfolio. Impaired loans are valued using discounted cash flow analyses or underlying collateral values, as discussed.

Fair values for certificates of deposit are estimated using a discounted cash flow calculation that applies current interest rates to a schedule of aggregated expected maturities. The intangible value of long-term relationships with depositors is not considered in estimating fair values.

The U. S. Treasury demand note and other variable rate borrowings are fairly valued at their carrying amounts. Fair values for other borrowings, including FHLB advances with fixed rates, are based on quoted market prices for similar instruments or estimated using discounted cash flow analysis and the Company's current incremental borrowing rate for similar instruments.

The carrying amount of accrued interest and other financial assets approximates their fair values.

The table below presents the fair value of financial assets and liabilities carried on the Company's consolidated balance sheet, including those financial assets and liabilities that are not measured and reported at fair value on a recurring or nonrecurring basis:

	June 30, 2010		December 31, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Cash and cash equivalents	\$ 89,833,788	\$ 89,833,788	\$ 42,632,459	\$ 42,632,459
Investment securities available-for-sale	66,164,731	66,164,731	74,626,130	74,626,130
Net loans	244,019,440	245,720,833	268,556,153	269,404,186
Accrued interest receivable	1,557,977	1,557,977	1,865,383	1,865,383
Other financial assets	1,313,800	1,313,800	1,313,800	1,313,800
Financial liabilities:				
Deposits	\$ 374,371,145	\$ 375,420,346	\$ 351,771,341	\$ 353,217,255
U.S. Treasury demand note	930,288	930,288	753,595	753,595
FHLB advances	5,000,000	5,202,922	10,000,000	10,099,933
Accrued interest payable	1,402,999	1,402,999	1,506,208	1,506,208

Bank premises and equipment, customer relationships, deposit base, and other information needed to compute the Company's aggregate fair value are not included in the table above. Accordingly, the fair values above are not intended to represent the underlying market value of the Company.

5. SUBSEQUENT EVENTS**Branch Closing**

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

The Company is closing its branch at 601 Palisade Drive in the Southport area of Brunswick, Georgia on December 10, 2010. The leased facility, which opened in January 2007, had nominal loan and deposit volume at June 30, 2010.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Analysis should be read in conjunction with the 2009 Annual Report on Form 10-K and the consolidated financial statements & related notes on pages 3 - 19 of this quarterly filing. The Company's accounting policies, which are described in detail in Form 10-K, are integral to understanding the results reported. The Company's accounting policies require management's judgment in valuing assets, liabilities, commitments, and contingencies. A variety of factors could affect the ultimate value that is obtained when earning income, recognizing an expense, recovering an asset, or relieving a liability. This Analysis contains forward-looking statements with respect to business and financial matters. Actual results may vary significantly from those contained in these forward-looking statements. See the sections entitled Critical Accounting Policies and Forward-Looking Statements within this Analysis.

Description of Business

Southeastern Banking Corporation, with assets exceeding \$437,049,000, is a financial services company with operations in southeast Georgia and northeast Florida. Southeastern Bank (SEB), the Company's wholly-owned commercial bank subsidiary chartered in 1888, offers a full line of commercial and retail services to meet the financial needs of its customer base through its seventeen branch locations and ATM network. Services offered include traditional deposit and credit services, long-term mortgage originations, and credit cards. SEB also offers 24-hour delivery channels, including internet and telephone banking.

On December 10, 2010, the Company is closing its branch at 601 Palisade Drive in the Southport area of Brunswick, Georgia. The leased facility, which opened in January 2007, had nominal loan and deposit volume at June 30, 2010.

Financial Condition

Consolidated assets totaled \$437,049,069 at June 30, 2010, up \$15,993,444 or 3.80% from year-end 2009. A substantial increase in cash & cash equivalents offset by a decline in net loans and investment securities was the primary factor in the six-month results. Specifically, cash & cash equivalents, which includes correspondent balances at the Federal Reserve and federal funds sold, increased \$47,201,329, while other real estate grew \$973,785; net loans declined \$24,536,713, and investment securities, \$8,461,399. A \$22,599,804 increase in deposits precipitated the asset rise. Loans comprised approximately 63%, investment securities, 17%, and interest-bearing deposits in other banks, 20%, of earning assets at June 30, 2010 versus 75%, 20%, and 5%, at December 31, 2009. Overall, earning assets approximated 91% of total assets at June 30, 2010. During the year-earlier period, total assets declined \$27,663,880 or 6.36%. A \$30,997,857 decline in investment securities was the primary factor in the 2009 results. Refer to the Liquidity section of this Analysis for details on deposits and other funding sources as well as the higher cash balances being maintained currently.

Investment Securities

Overall, investment securities declined \$8,461,399 or 11.34% since December 31, 2009. No securities were purchased during the six-month period ended June 30, 2010, as management sought to improve the Company's overall liquidity position by maintaining available cash in interest-bearing deposits in other banks; additionally, participation in the FDIC Temporary Liquidity Guarantee Program (TLGP) reduced the need for securities collateral for public funds deposits. Four securities were sold year-to-date. Specifically, a municipal holding with a cost basis of \$320,000 was sold at a \$2,320 loss, and three corporate holdings of the same issuer were sold at a \$141,088 loss. Proceeds from the corporate sale

Table of Contents

totaled \$3,829,250. The remaining redemptions year-to-date were mostly attributable to various issuers' exercise of call options and other prepayments in the normal course of business and also, the relatively low-rate interest environment. The effective repricing of redeemed securities impacts current and future earnings results; refer to the Interest Rate and Market Risk/Interest Rate Sensitivity and Operations sections of this Analysis for more details. At June 30, 2010, residential mortgage-backed securities, municipals, and corporates comprised 22%, 31%, and 13% of the portfolio. Overall, securities comprised 17% of earning assets at June 30, 2010, down from 20% at year-end 2009. The portfolio yield approximated 5.19% during the first half of 2010 versus 5.36% in 2009. Yields are expected to decline moderately during 2010 due largely to year-over-year reductions in corporate securities; on a weighted average basis, these corporate securities had higher yields than many of the other holdings in the portfolio.

Management believes the credit quality of the investment portfolio remains fundamentally sound, with 56.48% of the carrying value of debt securities, including mortgage-backed securities, being backed by U.S. Government agency and U.S. Government-sponsored enterprises at June 30, 2010. The Company does not own any collateralized debt obligations, widely known as CDOs, secured by subprime residential mortgage-backed securities. Additionally, the Company does not own any private label mortgage-backed securities. The Company held \$14,452,278 residential mortgage-backed securities issued by Fannie Mae (FNMA) and Freddie Mac (FHLMC) at June 30, 2010. Residential mortgage-backed securities issued by FNMA and FHLMC are collateralized foremost by the underlying mortgages and secondly, by FNMA and FHLMC themselves. In September 2008, the U.S. Government placed FNMA and FHLMC under regulatory conservatorship, easing credit concerns about these two entities. In early 2010, the U.S. Treasury again reiterated its support of FNMA and FHLMC. Besides FNMA and FHLMC, the Company also owned Ginnie Mae residential mortgage securities with a carrying value of \$278,371 at June 30, 2010. U.S. Government and federal agency holdings comprised U.S. Small Business Administration obligations, and U.S. Government-sponsored enterprise holdings comprised FHLB, FHLMC, and Federal Farm Credit Bank obligations at June 30, 2010. Credit concern surrounding the FHLB system continues to be widespread. The FHLB obligations owned by the Company carry the highest rating available from Moody's and Standard and Poor's. Nonetheless, the Company reviewed its holdings of FHLB debt securities and stock and concluded that its bond and stock holdings are recoverable at par. The Company's ownership of FHLB stock, which totaled \$1,313,800 at June 30, 2010, is included in other assets and recorded at cost.

At June 30, 2010 and also, year-end 2009, the entire corporate portfolio comprised issues of banks and bank holding companies domiciled in the southeastern United States. These corporate debt obligations were all rated B+ or higher by at least one nationally recognized rating agency at June 30, 2010 except for three non-rated trust preferred securities with an aggregate carrying value of \$3,195,230 and unrealized loss of \$284,426. The \$726,348 net unrealized loss on the total corporate portfolio, down \$2,537,937 or 77.75% from year-end 2009 and including the trust preferred holdings, is largely reflective of the illiquidity and risk premiums reflected in the market for bank-issued securities due to pervasive capital, asset quality, and other issues still affecting the banking industry. As discussed further above and also, in note 3 to the consolidated financial statements, the Company sold three B+ issues at a \$141,088 loss during the second quarter. Subsequent to June 30, the Company sold another B+ security of the same issuer recognizing a \$45,059 other-than-temporary impairment loss; the impairment loss, which is described in the next paragraph, was recorded in the second quarter. Except for seventeen non-rated issues with fair values aggregating \$4,350,346, all securities in the municipal portfolio were rated, investment grade securities. In analyzing non-rated municipals, management considers debt service coverage and whether the bonds support essential services such as water/sewer systems and education.

Management evaluates investment securities for other-than-temporary impairment on a quarterly basis, and more frequently when conditions warrant. This analysis requires management to consider various

Table of Contents

factors, including the duration and magnitude of the decline in value; the financial condition of the issuer or issuers; structure of the security; and, notwithstanding classification of the portfolio as available-for-sale, the Company's intent to sell the security or whether it is more likely than not that the Company would be required to sell the security before the anticipated recovery in market value. At June 30, 2010, management reviewed securities with an unrealized loss and concluded that a corporate debt security with a carrying value of \$445,000 was other-than-temporarily impaired; the resultant \$45,059 impairment loss was recognized in the second quarter. This security was subsequently sold in July at no additional loss. The Company still holds a security from the same issuer; this residual holding, which the Company has no present intention of selling, had a carrying value of \$447,500 and unrealized loss of \$42,559 at June 30, 2010. Additional impairment charges could become necessary in the future if the economic crisis facing the banking industry does not abate and various issuers' financial condition continues to weaken.

The weighted average life of the portfolio approximated 2.86 years at June 30, 2010; management does not expect any material extension in duration during 2010. The amortized cost and estimated fair value of investment securities, all available-for-sale, are delineated in the next table.

Investment Securities by Category

<i>June 30, 2010</i> <i>(In thousands)</i>	<i>Amortized Cost</i>	<i>Unrealized Gains</i>	<i>Unrealized Losses</i>	<i>Fair Value</i>
U. S. Government and federal agency securities	\$ 3,738	\$ 188	\$	\$ 3,926
U. S. Government-sponsored enterprise securities ¹	18,383	331		18,714
Agency residential mortgage-backed securities	13,855	876		14,731
Obligations of states and political subdivisions	19,805	485	101	20,189
Corporate debt obligations	9,331		726	8,605
Total investment securities	\$ 65,112	\$ 1,880	\$ 827	\$ 66,165

¹ Includes agency discount notes with original maturities of three months or less, as applicable.

At June 30, 2010, the market value of the investment portfolio reflected \$826,885 in gross unrealized losses, mainly in the corporate portfolio. Management continues to monitor these market values closely and hopes for an eventual recovery as issues facing banks and their affiliates are fully addressed. Initiatives enacted by the Treasury Department, including various capital and other programs, have been positive developments for these corporate holdings; nonetheless, ratings downgrades and additional losses have occurred and may continue. For more details on investment securities and related fair value, refer to the Capital Adequacy section of this Analysis.

The Company did not have a concentration in the obligations of any issuer at June 30, 2010 other than U.S. Government agencies, U.S. Government enterprises, and certain corporate holdings. At June 30, 2010, the Company held \$5,470,716 in corporate securities issued by two separate regional bank holding companies; these holdings comprised 8.27% of the total securities portfolio and 63.58% of the corporate portfolio.

Loans

Loans, net of unearned income, fell 8.68% or \$23,932,396 since year-end 2009. The net loans to deposits ratio aggregated 67.26% at June 30, 2010 versus 78.38% at December 31, 2009 and 83.05% a year ago. The loan categorization table on the next page reflects declines of \$11,818,197 in real estate construction balances, \$9,703,950 in the commercial portfolio; \$1,261,926 in consumer loans; and \$1,168,692 in real estate residential mortgage balances at June 30, 2010 compared to year-end 2009. The \$11,818,197 or 10.64% decline in real estate construction balances resulted from multiple factors, including pay-downs, and as further discussed in the next two subsections, significant charge-offs and foreclosures. These loans, widely known as acquisition and development loans, continued to be

Table of Contents

predominantly residential in nature and concentrated in the Company's coastal markets at June 30. These type loans are typically short-term and somewhat cyclical; swings in these account balances are normal and to be expected. Due to the current slowdown in real estate activity, overall duration of these particular loans increased during the last year and is expected to increase further throughout 2010. The escalation in nonperforming assets attributable to these loans is also expected to continue throughout 2010. With the exception of existing commitments, the Company is originating new acquisition and development loans only to customers with extraordinary equity injections, outside financial strength, or other performance metrics with low dependence on the underlying collateral. Although the Company, comparable to peer institutions of similar size, originates permanent mortgages for new construction, it historically has not held or serviced long-term mortgage loans of any volume in its own portfolio. Rather, permanent mortgages are typically brokered through a mortgage underwriter or government agency. The Company receives mortgage origination fees for its participation in these origination transactions; refer to the disclosures provided under Results of Operations for more details. Overall, the commercial portfolio declined 9.79% year-to-date. Nonfarm real estate loans within this portfolio declined \$4,327,475; agricultural loans, \$597,043; tax-free government loans, \$2,259,815; and other commercial/industrial loans, \$2,519,617. The tax-free loans serve as a bridge for local government bodies anticipating property tax collections and are intended to be short-term. Tighter credit policies and less demand throughout SEB's seventeen locations both contributed to the 9.36% and 2.24% declines in consumer and real estate residential mortgage loans in the first half of 2010.

Due to economic uncertainties within the Company's markets, particularly in the real estate sector, and resultant concerns regarding credit opportunities, management expects loan volumes to flatten or decline further in 2010. Additionally, as further discussed in the next subsection of this Analysis, management expects problem asset volumes to increase given the Company's significant real estate portfolio. During the same period in 2009, net loans grew 1.55% or \$4,348,652. Nonfarm real estate loans contributed most of the 2009 growth. Loans outstanding are presented by type in the following table.

<i>Loans by Category</i> <i>(In thousands)</i>	June 30, 2010	December 31, 2009	June 30, 2009
Commercial, financial, and agricultural ¹	\$ 89,369	\$ 99,073	\$ 101,582
Real estate - construction ³	99,285	111,103	119,095
Real estate - residential mortgage ^{2,3}	50,996	52,165	49,494
Consumer, including credit cards	12,226	13,488	14,053
Loans, gross	251,876	275,829	284,224
Unearned income	(83)	(103)	(119)
Loans, net	\$ 251,793	\$ 275,726	\$ 284,105

¹ Includes obligations of states and political subdivisions.

² Typically have final maturities of 15 years or less.

³ To comply with recent regulatory guidelines, certain loans that formerly would have been classified as real estate mortgage, are now being coded as real estate construction. Comparable loans from prior periods have not been reclassified to reflect this change. The majority of real estate loans are residential in nature.

The amount of commercial and real estate construction loans outstanding at June 30, 2010, based on remaining contractual repayments of principal, are shown by maturity and interest rate sensitivity in the following table. The maturities shown are not necessarily indicative of future principal reductions or cash flow since borrowers may prepay balances, and additionally, loans may be renewed in part or total at maturity.

Table of Contents**Loan Maturity and****Interest Rate Sensitivity - Selected Loans**

		Within One Year	One- Five Years	After Five Years
<i>June 30, 2010</i>	Total			
<i>(In thousands)</i>				
Loan maturity:				
Commercial, financial, and agricultural ¹	\$ 87,429	\$ 44,721	\$ 37,254	\$ 5,454
Real estate - construction ¹	72,437	58,028	13,896	513
Total	\$ 159,866	\$ 102,749	\$ 51,150	\$ 5,967
Interest rate sensitivity:				
Selected loans with:				
Predetermined interest rates ²			\$ 49,054	\$ 3,999
Floating or adjustable interest rates			2,096	1,968
Total			\$ 51,150	\$ 5,967

¹ Excludes nonaccrual loans totaling approximately \$1,940 in commercial, financial, and agricultural category and \$26,848 in real estate construction category.

² Includes loans with floating rates that have reached a contractual floor or ceiling.

Many commercial and real estate credits with floating rates have reached their contractual floors. Additionally, many recent originations and renewals have been priced at fixed rather than adjustable rates, unless floors applied. Loans with floating rates that had reached a contractual floor approximated \$104,000,000 at June 30, 2010 compared to \$134,500,000 at December 31, 2009 and \$125,000,000 at June 30, 2009. The average yield on these particular outstandings, which included all loan types, was 5.39%, or 214 basis points above New York prime, at June 30, 2010. In 2009 and also, the first half of 2010, management shortened maturity options on commercial credits, a move that should mitigate the Company's interest sensitivity position when prime adjusts upward.

Although the Company's loan portfolio is diversified, significant portions of its loans are collateralized by real estate. At June 30, 2010, approximately 84.98% of the loan portfolio was comprised of loans with real estate as the primary collateral, including land tracts and lots. As required by policy, real estate loans are collateralized based on certain loan-to-appraised value ratios. A geographic concentration in loans arises given the Company's operations within a regional area of northeast Florida and particularly, southeast Georgia. The Company continues to closely monitor real estate valuations in its markets and consider any implications on the allowance for loan losses and the related provision. On an aggregate basis, commitments to extend credit and standby letters of credit approximated \$41,698,000 at June 30, 2010, compared to \$34,374,000 year-end 2009 and \$40,685,000 at June 30, 2009. The increase in commitments at June 30, 2010 was largely attributable to governmental customers. The Company has not increased commitments to higher risk areas, including acquisition and development lending; rather, the Company has and continues to reduce these exposures. Because a substantial amount of these contracts expire without being drawn upon, total contractual amounts do not necessarily represent future credit exposure or liquidity requirements. The Company has not funded or incurred any losses on letters of credit in 2010 year-to-date.

Nonperforming Assets

Nonperforming assets, which consist of nonaccrual loans, restructured loans, foreclosed real estate, and other repossessions, totaled \$57,033,072 at June 30, 2010. The escalation in nonperforming assets continued, as balances jumped \$27,450,889 or 92.80% at June 30, 2010 from December 31, 2009 and \$15,569,082 from March 31, 2010. As a percent of total assets, nonperforming assets totaled 13.05% at June 30, 2010 versus 7.03% at December 31, 2009 and 3.93% at June 30, 2009. Nonperforming assets materially and adversely affected the Company's business, resources, and operating results during the first half of 2010. Acquisition and development loans were the primary factor in the nonperforming

Table of Contents

trends. Management expects continuing adverse effects the last half of 2010. Summary information about nonperforming assets and accruing loans past due 90 days or more is provided in the following table; narrative discussing each major category begins thereafter.

<i>Nonperforming Assets</i> (In thousands)	June 30, 2010	December 31, 2009	June 30, 2009
Nonaccrual loans:			
Commercial, financial, and agricultural	\$ 1,940	\$ 1,483	\$ 1,406

Nonperforming assets to net loans ³ plus foreclosed/repossessed assets	21.87%	10.43%	5.56%

¹ Does not include restructured loans that yield a market rate or loans reported as nonaccrual.

² Includes only other real estate acquired through foreclosure or in settlement of debts previously contracted.

³ Net of unearned income.

Nonaccrual Loans. Nonaccrual loans comprised \$33,806,834 or 59.28% of nonperforming asset balances at June 30, 2010. Approximately \$25,949,000 of loans were placed on nonaccrual status during the six-month period, \$5,422,000 charged-off, \$2,386,000 transferred out by foreclosure, and \$1,997,000 reduced by payments or other repossession. At June 30, 2010, real estate-secured loans comprised \$33,294,590 or 98.48% of total nonaccrual balances. Nonaccrual balances did not contain any other industry concentrations at June 30, 2010. The collateral underlying nonaccrual balances is presented in the next table.

<i>Nonaccrual Loans by Collateral Type</i> (In thousands)	June 30, 2010	December 31, 2009
Collateral type:		
Real estate:		
Land tracts	\$ 10,796	\$ 6,869
Lots within developments	13,221	5,005
Residential dwellings	7,631	3,993
Commercial buildings	1,647	965

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

Total real estate	\$ 33,295	\$ 16,832
Equipment	336	586
Other	176	246
Total nonaccrual loans	\$ 33,807	\$ 17,664

Approximately 84% of the real estate collateral underlying nonaccrual balances at June 30, 2010 was located in Georgia, predominantly coastal Georgia, with the balance in Florida. Nonaccrual balances included one purchased participation loan at June 30, 2010. This particular loan, with a balance of \$697,186, is the only purchased participation loan on the Company's books.

Table of Contents

Relationships above \$250,000 comprised 89.27% or \$30,179,163 of nonaccrual balances at June 30, 2010. Cumulative charge-offs recognized on these 14 large relationships, primarily acquisition and development relationships, totaled \$5,392,489 at June 30, 2010; \$1,283,248 of these charge-offs were recognized in 2009 and \$4,109,241 year-to-date. The specific allowance allocated to these 14 relationships totaled \$1,813,509 at June 30, 2010. Additional charge-offs recognized on these particular credits since June 30, 2010 totaled \$767,532. The table below presents nonaccrual loans by relationship tiers.

Nonaccrual Loans by Relationship Tiers

<i>June 30, 2010</i> <i>(In thousands)</i>	Number of Relationships	Balances	Percent of Total Balance	Average Balance within Tier
Relationship tier:				
≤ \$250,000	137	\$ 3,628	10.73%	\$ 26
> \$250,000 - \$750,000	4	1,938	5.73%	485
≥ \$750,000	10	28,241	83.54%	2,824
Total	151	\$ 33,807	100.00%	\$ 224

Nonaccrual Loans by Relationship Tiers

<i>December 31, 2009</i> <i>(In thousands)</i>	Number of Relationships	Balances	Percent of Total Balance	Average Balance within Tier
Relationship tier:				
≤ \$250,000	127	\$ 3,618	20.48%	\$ 28
> \$250,000 - \$750,000	4	1,844	10.44%	461
≥ \$750,000	6	12,202	69.08%	2,034
Total	137	\$ 17,664	100.00%	\$ 129

Management continues to evaluate collateral underlying nonaccrual loans and adjusts valuations based on appraisal and similar information available. Unfortunately, valuation estimates can change, resulting in additional charge-offs and provisioning for loan losses. Unless collected, higher nonaccrual balances also adversely affect interest income versus performing loans. The impact of nonaccrual loans on the Company's interest income and other operating results is further discussed in the Operations section of this Analysis.

Subsequent to June 30, loans with principal balances approximating \$248,000 were placed on nonaccrual status. The largest credit within this group, which is secured by a single family residence in northeast Florida, had a \$72,000 book balance. Management is currently reappraising the underlying real estate on this credit and reviewing legal remedies and other solutions prior to foreclosure. Unless pricing and demand in the real estate markets improve, management expects other borrowers, including borrowers with loan balances above \$250,000, to stop servicing their loans in 2010. As noted in the Operations section of this Analysis, management does not expect the Company to be profitable in 2010. The Company regularly stress tests its capital position to measure its ability to withstand deterioration in operating performance and asset quality. Nonaccrual and other impaired loans, including acquisition and development loans, figure prominently in these stress tests. Fortunately, the Company's capital levels remain able to withstand significant reductions before reaching regulatory minimums. At July 31, 2010, nonaccrual loans totaled \$31,781,767, down \$2,025,067 from June 30, 2010; the July reduction resulted mainly from foreclosure activity, as discussed further on the next page. Although nonaccrual levels are expected to increase in the near-term, management remains cautiously optimistic that charge-offs and the associated provision will peak this year.

Table of Contents

TDRs. The \$14,239,810 troubled debt restructurings (TDR) balance at June 30, 2010 comprised eight loan relationships for which payment concessions were granted. Five large relationships totaling \$13,470,151 and variously secured by commercial & residential real estate and accounts receivable, inventory, & equipment, comprised 94.60% of the quarter-end TDR balance. The remaining three relationships averaged \$256,553 each. The specific allowance allocated to the aggregate TDR balance totaled \$711,354 at June 30, 2010. TDR balances remained flat at July 31, 2010; nonetheless, the TDR balance is projected to increase further the next 3 - 9 months as various credits are reworked to boost payment capabilities.

The allowance for loan losses approximated 0.16X the nonperforming loans balance at June 30, 2010 versus 0.33X at year-end 2009 and 0.53X a year ago. As noted earlier, management expects overall credit conditions and the performance of the loan portfolio to continue deteriorating in the near term, resulting in additional charge-offs and more provisioning until the real estate markets stabilize.

Foreclosed Real Estate. Foreclosures, constructive sales, and subsequent devaluations within foreclosed real estate balances totaled \$2,386,049, \$496,983, and \$909,569 during 2010 year-to-date. One residential foreclosure comprised 63% of the year-to-date foreclosures; a \$265,450 charge-off was recognized on this property in 2009 and a \$156,870 devaluation subsequent to foreclosure. Charge-offs recognized on all underlying credits prior to their 2010 foreclosures approximated \$506,000. The next table details foreclosed real estate by real estate type.

<i>Foreclosed Real Estate by Type</i> (In thousands)	June 30, 2010	December 31, 2009
Real estate:		
Land tracts	\$ 3,789	\$ 3,598
Lots within developments	1,331	1,809
Residential dwellings	3,335	2,033
Commercial buildings	440	476
 Total foreclosed real estate	 \$ 8,895	 \$ 7,916

Except for two Florida properties valued at \$254,420, all holdings were located in Georgia at June 30, 2010. Aggregate holdings in a single established subdivision increased from \$1,330,000 at year-end 2009 to \$2,889,000 at June 30, 2010 due to foreclosure activity. The next largest holding in any established subdivision approximated \$303,000 at June 30, 2010.

The following table presents foreclosed real estate based on collateral values of individual properties.

<i>Foreclosed Real Estate by Collateral Values</i> June 30, 2010 (In thousands)	Number of Properties	Balances	Percent of Total Balance	Average Balance within Tier

Total	37	\$ 7,916	100.00%	\$ 214

As shown above, foreclosed real estate balances included seven material properties aggregating \$6,199,500 at June 30, 2010; individual values ranged from \$265,500 - \$1,350,000. Charge-offs recognized on these larger properties prior to foreclosure approximated \$1,318,000; except for a \$33,732 charge, these charge-offs were all recognized prior to 2010. Charge-offs recognized life-to-date on all active properties totaled \$2,057,899; devaluations recognized subsequent to foreclosure on these properties totaled \$1,266,148 life-to-date at June 30, 2010. Approximately 72% or \$909,569 of the devaluation charges were recorded in the first half of 2010.

Certain foreclosed real estate balances pertain to the same borrower. The next table presents foreclosed real estate aggregated by relationship tiers.

<i>Foreclosed Real Estate by Relationship Tiers</i>				Average Balance within Tier
<i>June 30, 2010</i> <i>(In thousands)</i>	Number of Relationships	Balances	Percent of Total Balance

Relationship tier:				
≤ \$250,000	16	\$ 1,216	15.36%	\$ 76
> \$250,000 - \$750,000	5	2,284	28.85%	457
≥ \$750,000	3	4,416	55.79%	1,472
Total	24	\$ 7,916	100.00%	\$ 330

Foreclosures subsequent to June 30 approximated \$1,600,000, and sales, all pertaining to smaller properties, \$28,000. One foreclosure relationship comprised \$1,278,000 or 80% of these subsequent foreclosures; a \$571,000 charge-off, to which a specific allowance applied at June 30, was recognized on this foreclosed property. Although foreclosed properties continue to be marketed aggressively, management expects to incur carrying costs for at least one year. Any additional devaluation will be charged to operations. The Company's foreclosed real estate holdings can be viewed via a link from its website at www.southeasternbank.com. No significant activity occurred within other repossessed assets during 2010 year-to-date.

Table of Contents

Accruing Loans Past Due. Loans past due 90 days or more and still accruing totaled \$58,836, or less than 1% of net loans, at June 30, 2010. Management is unaware of any material concentrations within these past due balances; the vast majority, or 94%, of these past due balances were secured by real estate and consumer property.

Other. Loans past due 30-89 days comprised 1.37% of net loans at June 30, 2010, totaling \$3,445,816. Approximately 84% of these past due loans were secured by real estate, predominantly 1-4 family residential properties with first liens and raw land. Only two loans in these past due balances exceeded \$250,000 at June 30, 2010. These particular loans, which totaled approximately \$704,000, were real estate-secured.

Accruing loans classified as individually impaired under accounting guidance to creditors on impairment of loans totaled \$1,222,078 at June 30, 2010, down \$15,560,905 or 92.72% from year-end 2009. The year-to-date decline resulted from transfers of certain loans classified as individually impaired to nonaccrual status. The June 30 balance pertained to four separate borrowers whose loan repayment was expected to come foremost from sales of underlying real estate collateral. Due to lagging sales and lingering distress in the real estate markets, payment of principal and interest on these loans has come from borrower reserves or other resources, constituting a change in the initial source of payment/terms of these loans. Management reviews all loans with total credit exposure of \$250,000 or more on a monthly basis and evaluates underlying collateral, assuming salvage values and estimating any allowance necessary to cover projected losses at worse case scenario liquidation. After adjustments for collateral value shortfalls, the allowance for loan losses allocated to these four classified credits approximated \$135,051 at June 30, 2010. The \$135,051 assumes a loss if the underlying collateral required liquidation currently. Management fully expects additional relationships to be identified as impaired throughout 2010, necessitating specific allowances for the underlying loans.

Fluctuations in nonperforming assets, charge-offs, and recoveries for earlier periods are discussed in the Form 10-Qs and 10-Ks filed for those periods. Simply put, variations in these nonperformings pale in comparison to 2009 and year-to-date 2010 results.

Allowance for Loan Losses

The Company continuously reviews its loan portfolio and maintains an allowance for loan losses available to absorb losses inherent in the portfolio. The six-month provision for loan losses at June 30, 2010 totaled \$6,120,000 and net charge-offs, \$5,515,683. The comparable provision and net charge-off amounts at June 30, 2009 were \$2,190,000 and \$718,987. Deterioration in the real estate portfolio, particularly land acquisition and development loans, was the overriding factor in the six-month provision; these and other loans will continue to be monitored, and the provision adjusted accordingly. Net charge-offs represented 2.12% of average loans at June 30, 2010, up significantly from 0.51% at June 30, 2009 and 0.02% in 2008. Charge-offs on acquisition and development credits, which were discussed in the nonaccrual section, comprised \$4,265,374 or 76.47% of total charge-offs at June 30, 2010. No material recoveries were recognized in the first half of 2010. Refer to the Nonperforming Assets subsection of this Analysis for references on charge-offs and recoveries recognized in earlier periods. As further mentioned in other sections of this Analysis, the Company is committed to the early recognition of problem loans and to an appropriate and adequate level of allowance. The adequacy of the allowance is further discussed in the next subsection of this Analysis. Activity in the allowance is presented in the table on the next page.

Table of Contents*Allowance for Loan Losses*

<i>Six Months Ended June 30,</i> <i>(In thousands)</i>	2010	2009	2008
Allowance for loan losses at beginning of year	\$ 7,170	\$ 4,929	\$ 4,510
Provision for loan losses	6,120	2,190	231
Charge-offs:

Recoveries to total charge-offs	1.11%	27.23%	67.33%

¹ Net of unearned income.

² Annualized.

The Company prepares a comprehensive analysis of the allowance for loan losses monthly. SEB's Board of Directors is responsible for affirming the allowance methodology and assessing the general and specific allowance factors in relation to estimated and actual net charge-off trends. Such evaluation considers numerous factors, including, but not limited to, net charge-off trends, internal risk ratings, loss forecasts, collateral values, geographic location, delinquency rates, nonperforming loans, underwriting practices, industry conditions, and economic trends. Specific allowances for loan losses are established for large impaired loans evaluated on an individual basis. The specific allowance established for these loans is based on a thorough analysis of the most probable source of repayment, including the present value of the loan's expected future cash flows, the loan's estimated market value, or the estimated fair value of the underlying collateral. General allowances are established for loans grouped into pools based on similar characteristics. In this process, general allowance factors are established based on an analysis of historical charge-off experience and expected loss-given-default derived from the Company's internal risk rating process. Other adjustments may be made to the allowance for the pools after an assessment of internal and external influences on credit quality that are not fully reflected in the historical loss or risk rating data. These influences typically include recent loss experience in specific portfolio segments, trends in loan quality, changes in market focus, and concentrations of credit. This element necessarily requires a high degree of managerial judgment to anticipate the impact that

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

economic trends, legislative or governmental actions, or other unique market and/or portfolio issues will have on credit losses. Unallocated allowances relate to inherent losses that are not included elsewhere in the allowance. The qualitative factors associated with unallocated allowances include the inherent imprecisions in models

Table of Contents

and lagging or incomplete data. Because of their subjective nature, these risk factors are carefully reviewed by management and revised as conditions indicate. Based on its analyses, management believes the allowance was adequate at June 30, 2010 but expects further provisioning throughout 2010. In July 2010, an additional \$800,000 was provisioned and \$795,025 charged-off, net of recoveries.

Other Commitments

The Company had no material plans or commitments for capital expenditures as of June 30, 2010.

Liquidity

Liquidity is managed to ensure sufficient cash flow to satisfy demands for credit, deposit withdrawals, and other corporate needs. Liquidity is vital to any financial institution and its importance cannot be overstated, particularly during periods of economic crisis. Overall liquidity position is determined by the types of assets, and their duration, on the balance sheet; encumbrances; borrowing capacity from customer deposits or other sources; and retained earnings. In short, assets, predominantly loans and investment securities, are funded by customer deposits, borrowed funds, and retained earnings. Recently, in an effort to become more liquid, the Company has increased its most liquid assets, namely cash and cash equivalents. Cash and cash equivalents, which variously comprise cash and due from banks, interest-bearing deposits in other banks, and federal funds sold, increased \$47,201,329 or 110.72% at June 30, 2010 compared to year-end 2009. Cash and cash equivalents represented 20.55% of total assets at June 30, 2010 versus 10.13% at December 31, 2009. The cost of the liquidity improvement has been a sacrifice of some earnings potential. Liquidity sources are discussed further in the next subsections of this Analysis.

Cash flows from the loan and securities portfolios represent important components of the Company's overall liquidity position. At June 30, 2010, loans¹ and investment securities with carrying values exceeding \$146,000,000 were scheduled to mature in one year or less. The investment portfolio has also been structured to meet liquidity needs prior to asset maturity when necessary. Refer to note 3 of the consolidated financial statements for pertinent information on contractual and other redemptions of these instruments. Of course, loans are subject to refinancing, and loans and particularly, securities, may be pledged to secure public funds and other borrowing arrangements. At June 30, 2010, 87.14% or \$57,655,851 of the Company's securities portfolio was pledged; when adjusted for over-pledging due to cyclical variations in public funds and contingency pledging to the Federal Reserve Bank discount window, approximately \$30,326,000 or 46% of the securities portfolio was unencumbered at June 30, 2010. The entities to which the excess collateral is pledged have no legal claim on such collateral unless amounts are owed under other obligations.

The Company has long benefited from a relatively large, stable deposit base. Customer-based core deposits, traditionally the Company's largest and most cost-effective source of funding, comprised 81% of the funding base at June 30, 2010, down 100 basis points from year-end 2009 levels. The variation in core deposits is largely attributable to an increase in time certificates with balances of \$100,000 or more at June 30, 2010 compared to year-end; these particular balances grew over \$6,548,000 in the first half of 2010. Funding sources primarily comprise customer-based core deposits but also include borrowed funds and cash flows from operations. Borrowed funds, which variously encompass U.S. Treasury demand notes, federal funds purchased, Federal Reserve discount window borrowings, and FHLB advances, totaled \$5,930,288 at June 30, 2010 versus \$10,753,595 at December 31, 2009. The \$4,823,307 or 44.85% drop in borrowed funds resulted mainly from the maturity of a \$5,000,000 FHLB advance. The maximum amount of U.S. Treasury demand notes available to the Company at June 30, 2010 totaled \$2,000,000, of which \$930,288 was outstanding. Unused borrowings under an unsecured federal funds line of credit with a correspondent bank totaled \$5,000,000 at June 30, 2010. Because of

Table of Contents

regulatory constraints or concerns about the banking industry, the overall economy, and/or the Company itself, this particular correspondent may be unwilling or unable to extend credit when needed; accordingly, the Company's actual access to this line may be less than \$5,000,000.

Under a credit facility with the FHLB, the Company can borrow up to 16% of SEB's total assets; at June 30, 2010, unused borrowings, which are subject to collateral requirements, approximated \$69,734,000. Refer to the subsection entitled FHLB Advances for details on the Company's outstanding balance with the FHLB. At June 30, 2010, the Company also had \$6,918,586 of borrowing capacity at the Federal Reserve Bank discount window; no amounts were outstanding against this capacity at June 30, 2010, and except for periodic testing of availability, the Company intends to use this capacity on a limited basis. Net cash from operations is derived primarily from net income adjusted for noncash items such as depreciation and amortization, accretion, and the provision for loan losses. The statements of cash flows within this Form 10-Q provide a comprehensive breakdown of cash flows provided by or used in operating, investing, and financing activities.

In the third quarter of 2009, the FDIC announced its plan to restore DIF balances as a result of recent bank failures. The restoration plan required all FDIC-insured banks to prepay their risk-based assessments for the years 2010, 2011, and 2012. The assessments, usually due quarterly, were instead estimated for the three future years and paid prior to December 31, 2009. In conjunction with the adoption of this rule, the FDIC also approved a three basis points increase in assessment rates effective January 1, 2011. The Company paid the required assessment on December 29, 2009 and concurrently recorded a prepaid asset within other assets on the consolidated balance sheets. This prepaid asset totaled \$1,412,691 at June 30, 2010. Any differences between the prepaid and actual amounts due each quarter will be funded using existing available liquidity.

Management believes the Company has the funding capacity, from operating activities or otherwise, to meet its financial commitments in 2010. Refer to the Capital Adequacy section of this Analysis for details on dividend policy and the Financial Condition section for details on unfunded loan commitments.

¹ No cash flow assumptions other than final contractual maturities have been made for installment loans. Nonaccrual loans are excluded.
Deposits

Deposits increased 6.42% or \$22,599,804 since year-end 2009. Interest-bearing deposits grew \$21,613,972 or 7.29% while noninterest-bearing deposits increased \$985,832 or 1.78%. Within interest-bearing deposits, NOW, money market, savings, and time certificate balances grew \$5,578,307, \$5,347,255, \$1,114,324, and \$9,574,086. The growth in NOW balances occurred chiefly in local government balances. Conversely, the growth in money market balances resulted from non-personal, or commercial accounts, predominantly Florida-based. The modest increase in savings deposits was due to customers seeking FDIC-insured investments in this low rate environment. Time certificate balances of \$100,000 or more increased \$6,548,937 year-to-date and represented 49.85% of certificate totals at June 30, 2010. Lower balance certificate totals grew \$3,025,149 or 4.47% since December 31, 2009. The Company has focused certificate pricing on customers who also have non-certificate deposit and/or loan balances. Funding costs associated with deposits declined 18.35% overall at June 30, 2010 versus June 30, 2009 due to moderate reductions in cost of funds; see the Results of Operations section of this Analysis for more details. Renewed effort by branch personnel to attract new customers precipitated the 1.78% increase in noninterest-bearing deposits since year-end; these balances tend to be somewhat cyclical. To provide reassurance to customers and also, to reduce pledging requirements, the Company is participating in the TLGP that provides full deposit insurance for noninterest-bearing transaction accounts, regardless of dollar amount until December 31, 2012; NOW accounts with rates of 0.25% or less are included in the program until December 31, 2010. The Company will incur a surcharge,

Table of Contents

currently estimated to be less than \$25,000 for 2010, on its deposit insurance for accounts not otherwise covered by the existing deposit insurance limit of \$250,000. Overall, interest-bearing deposits comprised 84.96%, and noninterest-bearing deposits, 15.04%, of total deposits at June 30, 2010. Approximately 83% of quarter-end deposits were based in Georgia and the residual 17% in Florida. The distribution of interest-bearing balances at June 30, 2010 and certain comparable quarter-end dates is shown in the next table.

<i>Deposits</i> (In thousands)	June 30, 2010		December 31, 2009		June 30, 2009	
	<i>Balances</i>	<i>Percent of Total</i>	<i>Balances</i>	<i>Percent of Total</i>	<i>Balances</i>	<i>Percent of Total</i>

¹ NOW and money market accounts.

Deposits of one local governmental body comprised approximately \$14,685,000 and \$22,109,000 of the overall deposit base at June 30, 2010 and December 31, 2009. On an aggregate basis, public funds comprised approximately 18% of the deposit base at both June 30, 2010 and December 31, 2009. The Company had no brokered deposits at June 30, 2010 and year-end 2009.

As shown in the next table, approximately 87% of time certificates at June 30, 2010 were scheduled to mature within the next twelve months.

<i>Maturities of Time Certificates</i> <i>June 30, 2010</i> (In thousands)	Balances		
	<\$100,000	>=\$100,000	Total
Months to maturity:			
3 or less	\$ 17,367	\$ 16,737	\$ 34,104
Over 3 through 12	43,642	46,016	89,658
Over 12 through 36	8,758	7,356	16,114
Over 36	872	100	972
Total	\$ 70,639	\$ 70,209	\$ 140,848

The composition of average deposits and the fluctuations therein at June 30 for the last two years is shown in the Average Balances table included in the Operations section of this Analysis.

FHLB Advances

Advances outstanding with the FHLB totaled \$5,000,000 at June 30, 2010, down 50% from December 31, 2009. One \$5,000,000 advance that accrued interest at an effective rate of 6.00% was not renewed upon its March 17 maturity. Additional advances outstanding at June 30, 2010 included a \$2,500,000 fixed rate advance due July 30, 2012 with an effective rate of 2.35% and another \$2,500,000 fixed rate advance due July 29, 2013 with an effective rate of 2.89%. Both advances are used to provide temporary liquidity on a cost-effective basis. At June 30, 2010, these two advances were collateralized by cash balances at the FHLB. The loan collateral previously pledged against these advances has been released. The FHLB is expected to continue tightening its credit policies given current conditions in the real estate markets, which would reduce the Company's overall borrowing capacity. The Company does not currently plan to obtain additional funding from the FHLB.

Table of Contents**Interest Rate and Market Risk/Interest Rate Sensitivity**

The normal course of business activity exposes the Company to interest rate risk. Fluctuations in interest rates may result in changes in the fair market value of the Company's financial instruments, cash flows, and net interest income. The asset/liability committee periodically reviews the Company's exposure to interest rate risk and formulates strategy based on acceptable levels of interest rate risk. The overall objective of this process is to optimize the Company's financial position, liquidity, and net interest income, while limiting volatility to net interest income from changes in interest rates.

The Company uses simulation modeling to test the interest rate sensitivity of net interest income and the balance sheet. Contractual maturity and repricing characteristics of loans are incorporated into the model, as are prepayment assumptions, maturity data, and call options within the investment portfolio. Non-maturity deposit accounts are modeled based on past experience. Simulation results quantify interest rate risks under various interest rate scenarios over a twelve-month period. Based on the latest analysis, the Company continues to be asset sensitive and exposed to declining earnings if interest rates fall. The simulation model estimates changes in net interest income based on various gradual and shocked/instantaneous scenarios, as shown in the table below. The model projects that the Company's earnings will increase as rates rise and decrease if rates drop. The base fed funds rate used in the model assumes a 0.00% - 0.25% range.

<i>Market Rate Change</i>	Effect on Net Interest Income	
	Gradual	Immediate Shock
+300 basis points	21.10%	37.51%
+200 basis points	14.09%	25.16%
+100 basis points	7.07%	12.62%
-100 basis points	-5.37%	-8.82%

The Company's asset sensitivity has increased since year-end 2009 and also, March 31, 2010, due to the significant growth in interest-bearing balances in other banks; the increase in these balances is further discussed in the Liquidity section of this Analysis.

Limitations inherent with simulation modeling include: a) In a down rate environment, competitive and other factors constrain timing of rate cuts on other deposit products whereas loans tied to prime and other variable indexes reprice instantaneously and securities with call or other prepayment features are likely to be redeemed prior to stated maturity and replaced at lower rates (lag effect); and b) changes in balance sheet mix, for example, unscheduled pay-offs of large commercial loans and significant increases in nonaccrual loans, are oftentimes difficult to forecast.

The Company has not in the past, but may in the future, utilize interest rate swaps, financial options, financial futures contracts, or other rate protection instruments to reduce interest rate and market risks.

Impact of Inflation

The effects of inflation on the local economy and the Company's operating results have been relatively modest the last several years. Because substantially all the Company's assets and liabilities, including cash, securities, loans, and deposits, are monetary in nature, their values are less sensitive to the effects of inflation than to changing interest rates. As discussed in the preceding section, the Company attempts to control the impact of interest rate fluctuations by managing the relationship between its interest sensitive assets and liabilities.

Table of Contents**Capital Adequacy**

Federal banking regulators have established certain capital adequacy standards required to be maintained by banks and bank holding companies. These regulations define capital as either Tier 1 (primarily realized shareholders' equity) or Tier 2 (for the Company, a portion of the allowance for loan losses). The Company and SEB are subject to a minimum Tier 1 capital ratio (Tier 1 capital to risk-weighted assets) of 4%, total capital ratio (Tier 1 plus Tier 2 to risk-weighted assets) of 8%, and Tier 1 leverage ratio (Tier 1 to average quarterly assets) of 4%. To be considered a well-capitalized institution, the Tier 1 capital, total capital, and Tier 1 leverage ratios must equal or exceed 6%, 10%, and 5%, respectively. Banks and bank holding companies are prohibited from including unrealized gains and losses on debt securities in the calculation of risk-based capital but are permitted to include up to 45 percent of net unrealized pre-tax holding gains on equity securities in Tier 2 capital. The Company did not have any unrealized gains on equity securities includible in the risk-based capital calculations for any of the periods presented. At June 30, 2010, the Company's Tier 1, total capital, and Tier 1 leverage ratios totaled 18.73%, 19.99%, and 12.49%. On a stand-alone basis, SEB's same ratios totaled 17.32%, 18.59%, and 11.53%. Regulators have expressed the need for increased capital requirements for bank holding companies and their subsidiaries; management expects minimum required capital levels to rise in the future. The Company is committed to maintaining its well-capitalized status and stress tests its capital position on a regular basis to gauge its ability to withstand deterioration in asset quality and operating performance.

Capital ratios for the most recent periods are presented in the next table.

<i>Capital Ratios</i> <i>(Dollars in thousands)</i>	June 30, 2010	December 31, 2009	June 30, 2009
Tier 1 capital:			
Total shareholders' equity	\$ 54,630	\$ 56,559	\$ 56,503
Accumulated other comprehensive (income) loss	(695)	1,076	1,750
Intangible assets and other adjustments			(104)
Total Tier 1 capital	53,935	57,635	58,149
Tier 2 capital:			
Portion of allowance for loan losses	3,652	4,063	4,066
Total risk-based capital	\$ 57,587	\$ 61,698	\$ 62,215
Risk-weighted assets	\$ 288,032	\$ 321,904	\$ 322,908
Risk-based ratios:			
Tier 1 capital ¹	18.73%	17.90%	18.01%
Total risk-based capital	19.99%	19.17%	19.27%
Tier 1 leverage ratio	12.49%	14.00%	13.98%
Shareholders' equity to assets	12.50%	13.43%	13.87%

¹ The Company's tier 1 common equity ratio is the same as its tier 1 capital ratio.

Book value per share declined 3.11% or \$0.56 to \$17.46 during the first half of 2010 due mainly to the year-to-date net loss. Dividends declared and paid totaled \$0.13 at June 30, 2010, down \$0.04 or 23.52% from 2009. The Company has suspended future dividend payments and treasury stock purchases until operating performance improves and credit losses abate. Regulatory approval will be required prior to payment of a future dividend or treasury stock purchases. For more specifics on equity matters, refer to Part II, Item 2, of this Form 10-Q.

Table of Contents

The Company has granted various employees options to purchase shares of common stock; refer to the 2009 Form 10-K previously filed for details on the number of options outstanding and the range of exercise prices.

Accumulated other comprehensive loss, which measures net fluctuations in the fair values of investment securities, improved \$1,771,096 since year-end 2009. Further details on investment securities, including corporates, and their associated fair values are contained in the Financial Condition section of this analysis.

Refer to the Financial Condition and Liquidity sections of this Analysis for details on planned capital expenditures.

Results of Operations

A \$2,052,010 net loss was recognized in the 2010 second quarter compared to net income of \$104,223 in the 2009 second quarter. On a per share basis, the quarterly loss totaled \$0.66 at June 30, 2010, a \$0.69 drop from \$0.03 net income at June 30, 2009. Major variances in the 2010 2009 quarterly results included:

\$1,885,000 increase in the provision for loan losses to address loan quality issues;

\$604,392 reduction in net interest income due to an increase in nonaccrual loans and lower average balances on higher-yielding earning assets, specifically loans and investment securities, offset by a reduction in interest expense on deposits and other borrowed funds;

\$188,467 net loss on sales (\$143,408) and other-than-temporary impairment (\$45,059) of investment securities available-for-sale during the second quarter of 2010 versus \$0 in 2009;

\$911,884 net loss on sales (\$2,315) and write-downs (\$909,569) on foreclosed real estate in 2010 versus \$95,518 net loss in 2009; and

\$1,299,453 increase in income tax benefit.

Year-to-date, the Company recognized a \$3,224,419 net loss at June 30, 2010, compared to net income of \$742,095 at June 30, 2009. On a per share basis, the net loss totaled \$1.03 in 2010, a \$1.26 decline from \$0.23 net income in 2009. Following the quarterly trend, variances in the 2010 2009 year-to-date results included:

\$3,930,000 increase in the provision for loan losses;

\$1,163,643 reduction in net interest income;

\$188,467 net loss on sales and other-than-temporary impairment of investment securities available-for-sale during 2010 year-to-date versus a \$197,871 net gain on sales in 2009;

\$908,064 net loss on sales and write-downs on foreclosed real estate in 2010 versus \$82,264 in 2009; and

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

\$2,332,329 reduction in income tax expense.

Variations in net interest income and noninterest income/expense are further discussed in the next two subsections of this Analysis; the provision for loan losses is separately discussed within the Financial Condition section.

Table of Contents

Net Interest Income

Due to margin compression resulting largely from increased nonaccrual loans and high cash equivalent balances, net interest income declined \$1,163,643 or 15.20% during the first half of 2010 compared to 2009. Additionally, reducing cost of funds in the current economic cycle to mitigate earnings pressure on assets has been particularly difficult since liquidity constraints have compelled regional and other banks to rely more heavily on deposits, particularly time certificates, for funding; this reliance has kept deposit rates higher and lowered margins and spreads for competitor banks attempting to maintain market share. Although many variable rate loans have reached a contractual floor, reducing asset sensitivity, asset rates remain exceedingly low and deposit costs high on a relative basis. Net interest income and resultant margins and spreads are projected to decline further in 2010 due to a) yield reductions on a year-over-year basis, due largely to higher cash equivalent balances; b) overall lower average balances on loans and also, investment securities due to sales; and c) significant increases in nonperforming assets, particularly nonaccrual loans and foreclosed real estate, but also including TDRs. As discussed earlier, unless collected, nonaccrual balances adversely affect interest income two ways - interest reversals and nonearning status. To recap, the net interest margin approximated 3.49% at June 30, 2010 versus 4.11% in 2009; the interest rate spread, 3.18% versus 3.64%. Interest earnings on loans and investment securities fell \$1,086,885 and \$726,046 in the first half of 2010 compared to 2009 while interest income on other assets, which includes cash equivalent balances, increased \$52,808. Asset yields averaged 4.76% at June 30, 2010, down 94 basis points from 5.70% in 2009; see the interest differential table on the next page for more details on changes in interest income attributable to volume and rates at June 30, 2010 versus 2009. Interest expense on deposits and other borrowed funds declined \$596,480 or 19.35% during the first six months of 2010 versus 2009. Cost of funds fell 48 basis points from 2009 levels, totaling 1.58% at June 30, 2010 versus 2.06% at June 30, 2009. The reduced funding costs resulted from lower rates on deposits at June 30, 2010 compared to 2009. Although interest expense on time certificates declined 25.00% in the first half of 2010 compared to 2009, higher average balances, competitive pressure, and the aforementioned lag effect have constrained desired rate reductions in this product. Nonetheless, rate pressure on certificates continued to ease year-to-date and is expected to drop further during the last half of 2010. Refer to the Liquidity and Interest Sensitivity sections of this Analysis for more details on deposit/funding fluctuations and the Company's asset/liability sensitivity position.

The intense competition for deposits and certain loans continues in 2010 and shows no sign of abating. The high number of financial institutions in the Company's market areas essentially guarantees downward pressure on net interest spreads and margins as all participants struggle to amass, grow, and/or maintain market share. Volume of assets and deposits become even more important as margins decline. Long-term strategies implemented by management to increase average loans outstanding emphasize competitive pricing on loan products and development of additional loan relationships, all without compromising portfolio quality. Management's strategy for deposits is to closely manage anticipated market increases and maintain a competitive position with respect to pricing and products. Comparative details about average balances, income/expense, and average yields earned and rates paid on interest-earning assets and liabilities for the last two years are provided in the table on the next page.

¹ Average loans are shown net of unearned income. Nonperforming loans are included. Income on nonaccrual loans, if recognized, is recorded on a cash basis.

² Includes loan fees and late charges.

³ Securities are presented on an amortized cost basis. Investment securities with original maturities of three months or less are included, as applicable.

⁴ Interest income on tax-exempt loans and securities is presented on a taxable-equivalent basis, using a federal income tax rate of 34%. No adjustments have been made for any state tax benefits or the nondeductible portion of interest expense.

⁵ NOW and money market accounts.

⁶ Averages presented generally represent average daily balances.

Analysis of Changes in Net Interest Income

The average balance table above provides detailed information about average balances, income/expense, and average yields earned and rates paid on interest-earning assets and interest-bearing liabilities for the six months ended June 30, 2010 and 2009. The table on the next page

summarizes the changes in interest income and interest expense attributable to volume and rates during this period.

Table of Contents

Interest Differential ¹ <i>Six Months Ended June 30,</i> <i>(In thousands)</i>	2010 Compared to 2009 Increase (Decrease) Due to

Total interest expense	53	(649)	(596)
Net change in net interest income	\$ (1,309)	\$ 134	\$ (1,175)

¹ Changes in net interest income are attributed to either changes in average balances (volume change) or changes in average rates (rate change) for earning assets and sources of funds on which interest is received or paid. Volume change is calculated as change in volume times the previous rate while rate change is change in rate times the previous volume. The rate/volume change, change in rate times change in volume, is allocated between volume change and rate change at the ratio each component bears to the absolute value of their total.

² Includes loan fees. See the average balances table on the previous page for more details.

³ Interest income on tax-exempt loans and securities is presented on a taxable-equivalent basis, using a federal income tax rate of 34%. No adjustments have been made for any state tax benefits or the nondeductible portion of interest expense.

⁴ Now and money market accounts.

Noninterest Income and Expense

Noninterest income declined \$369,640 or 16.34% during the first six months of 2010 compared to 2009. Key elements in the year-to-date results included:

- a) Net gain (loss) on sales of investment securities available-for-sale: The Company recognized a net loss of \$143,408 on the sale of one municipal and three corporate bonds in the first half of 2010 versus a \$197,871 net gain in 2009. The Financial Condition section of this Analysis contains additional details on securities transactions.
- b) Service charges on deposit accounts: Service charges on deposit accounts declined a modest \$8,939 or 0.66% at June 30, 2010 compared to 2009. Declines in service charges on club and other accounts were primary factors in the year-to-date results.
- c) Other operating income: The other operating portion of noninterest income declined \$19,422 or 2.74% at June 30, 2010 compared to 2009. A \$71,618 increase in surcharge income from ATM transactions largely offset a \$78,549 decline in mortgage origination fees

Edgar Filing: SOUTHEASTERN BANKING CORP - Form 10-Q

during the first half of 2010 compared to 2009. By type and amount, the chief components of other operating income at June 30, 2010 were surcharge fees - ATM, \$288,554; mortgage origination fees, \$19,697; income on bank-owned life insurance, with a resultant yield exceeding 6.25% on a federal taxable-equivalent basis, \$118,282; income on sale of check

Table of Contents

products, \$49,112; safe deposit box rentals, \$47,913; and commissions on the sale of credit life insurance, \$41,477. Together, these six income items comprised 81.97% of other operating income. In 2009, these same six income components comprised 86.09% of other operating income.

Noninterest expense increased \$835,560 in 2010 year-to-date. The chief factors impacting year-to-date results comprised:

- a) Salaries and employee benefits: Personnel costs fell 4.35% or \$164,416 year-to-date. Declines in salaries and profit-sharing accruals, which includes 401-K matching contributions under the Company's safe harbor plan, accounted for virtually all the 2010 variation. Specifically, salaries declined \$65,447 overall and profit-sharing accruals, \$99,834, in 2010 year-to-date compared to 2009. The vast majority, or 83%, of employee expenses remained concentrated in salaries and other direct compensation, including related payroll taxes, at June 30, 2010. Profit-sharing accruals and other fringe benefits constituted the remaining 3% and 14% of employee expenses. The division of employee expenses between compensation, profit-sharing, and other fringe benefits remained consistent with historical norms in 2010.
- b) Occupancy and equipment, net: Net occupancy and equipment expense fell \$22,036 or 1.60% during the first six months of 2010 compared to 2009. Savings of \$25,511 and \$19,132 related to janitorial expense and other maintenance were partially offset by a \$27,471 increase in data line expense. The janitorial savings resulted from a reduction in the number of days the bank facilities are cleaned each week. The maintenance reduction is directly related to past remodeling efforts at various branch locations. No renovations are planned for the second half of 2010. The increase in data line expense resulted from a one-time charge related to new bandwidth over the Company's network system; the telecommunications upgrade will reduce comparative expense in future periods.
- c) Write-downs on other real estate: Write-downs on foreclosed real estate increased \$812,741 in the first six months of 2010 compared to 2009. These write-downs correlate with updated appraisals of property held for sale. As further discussed in the Financial Condition section of this Analysis, real estate values in coastal Georgia and northeast Florida remain depressed.
- d) Other noninterest expense: Other noninterest expense increased \$151,153 or 9.02% at June 30, 2010 compared to 2009. A \$70,688 jump in repossessed asset costs; a \$51,719 increase in legal expenses, mostly pertaining to collection efforts; and an \$83,164 increase in fraud and other losses on deposit accounts were primary variables in the 2010 results. A single scam perpetrated in one office accounted for most of the fraud loss; law enforcement and other authorities are investigating the incident, but any recovery from the third parties responsible is highly unlikely. Besides FDIC expense, which totaled \$441,000 in 2010 & \$420,000 in 2009 and accounting, consulting, & legal fees, which approximated \$222,000 in 2010 and \$171,000 in 2009, no individual component of noninterest expense aggregated or exceeded 10% of the total in 2010.

As noted above, FDIC assessment charges increased in 2010 year-to-date, with additional increases expected the remainder of 2010. These assessment expenses will materially and adversely impact the Company's operating results in 2010 and beyond. Recent revisions to assessment rules and their impact on the Company are further discussed in the Liquidity section of this Analysis. Management anticipates that losses and other costs associated with foreclosed real estate will remain elevated unless the Company's coastal real estate markets stabilize and demand for properties - at reasonable prices - improves. Due to problem asset resolutions and continued margin compression, the Company does not expect to make a profit in 2010.

Table of Contents

Critical Accounting Policies

The Company's consolidated financial statements are prepared applying certain critical accounting policies. Critical accounting policies require numerous estimates and strategic or economic assumptions that may prove inaccurate or subject to variations and may significantly affect the Company's reported results and financial position for the period or in future periods. Changes in underlying factors, assumptions, or estimates in any of these areas could have a material impact on the Company's future financial condition and results of operations. The Company's financial statements are prepared in accordance with U.S. GAAP, and they conform to general practices in the banking industry. The Company applies its critical accounting policies consistently from period to period and intends that any change in methodology occur in an appropriate manner. Accounting policies currently deemed critical, including the a) allowance for loan losses; b) estimates of fair value pertinent to investment securities, other real estate, loans, and other assets; and c) income taxes are further discussed in the 2009 Form 10-K. There have been no material changes in the Company's critical accounting policies since December 31, 2009.

Recent Accounting Pronouncements

The provisions of recent pronouncements and the related impact on the Company's consolidated financial statements, if any, are discussed in note 2.

Various other accounting proposals affecting the banking industry are pending with the FASB and other regulatory authorities. Given the inherent uncertainty of the proposal process, the Company cannot assess the impact of any such proposals on its financial condition or results of operations.

Forward-Looking Statements

Certain statements set forth in this Quarterly Report on Form 10-Q or incorporated herein by reference, including, without limitation, matters discussed under the caption Management's Discussion and Analysis of Financial Condition and Results of Operations, are forward-looking statements within the meaning of federal securities laws, including, without limitation, statements regarding the Company's outlook on earnings, stock performance, asset quality, economic conditions, real estate markets, and projected growth, and are based upon management's beliefs as well as assumptions based on data currently available. When words like anticipate, believe, intend, plan, may, continue, project, would, estimate, could, should, will, and similar expressions are used, they should be considered forward-looking statements. Forward-looking statements are subject to significant risks and uncertainties. Investors are cautioned against placing undue reliance on such statements. Actual results may differ materially from those set forth in forward-looking statements. Factors that could cause actual results to differ materially from those described in the forward-looking statements include: (1) economic conditions, both generally and in local markets, may continue to be less favorable than expected, resulting in, among other things, further deterioration in credit quality, a reduction in demand for credit, or additional declines in real estate values; (2) the general decline in the real estate and lending market, particularly in the Company's coastal markets, may continue to negatively affect financial results; (3) the allowance for loan losses may not be adequate to cover eventual loss; (4) future losses will be realized if proceeds received upon liquidation of nonperforming assets are less than carrying values of such assets; (5) restrictions or conditions imposed by regulators on the Company's operations may make it more difficult for the Company to achieve its goals; (6) the Company's ability to raise any needed capital in a prolonged economic downturn may be impaired if market disruption and volatility continue or worsen; (7) legislative or regulatory changes, including changes in accounting standards and compliance requirements, may adversely affect the Company's business, revenue, and profit margins; (8) poor financial results may negatively affect liquidity; (9) competitive pressures among

Table of Contents

depository and other financial institutions may increase significantly, resulting in lost business relationships or reduced margins; (10) changes in the interest rate environment may reduce margins or the volumes or values of loans made; (11) competitors may have greater financial resources and develop products that enable them to compete more successfully; (12) the Company's ability to attract and retain key personnel can be affected by increased competition for experienced employees in the banking industry; (13) adverse changes may occur in the bond markets, affecting portfolio valuation and causing impairment; (14) war or terrorist activities may cause further deterioration in the economy or cause instability in credit markets; (15) economic, governmental, or other factors may prevent growth in the Company's markets; (16) changes in consumer spending and savings habits could impede the Company's ability to grow its loan and deposit portfolios; (17) the Company may be unfavorably impacted by litigation, which depends on judicial interpretations of law and findings of juries; (18) the Company may be unable to pay dividends on common stock; (19) third party vendors who provide key components of the Company's business infrastructure may have system failures or other difficulties which could materially affect operations; and (20) the risk factors discussed from time to time in the Company's periodic reports filed with the SEC, including but not limited to, this Report. The Company undertakes no obligation to, and does not intend to, update or revise these statements following the date of this filing, whether as a result of new information, future events or otherwise, except as may be required by law.

As noted, the foregoing list of factors is not exclusive. This Analysis should be read in conjunction with the consolidated financial statements and related notes.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The discussion on market risk is included in the Interest Rate and Market Risk/Interest Rate Sensitivity section of Part I, Item 2.

Item 4. Controls and Procedures.

An evaluation of the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Act") was carried out under the supervision and with the participation of the Company's Chief Executive Officer (CEO), Chief Financial Officer (CFO), and other members of management as of June 30, 2010. The CEO and CFO concluded that, as of June 30, 2010, the Company's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is: (i) accumulated and communicated to the Company's management, including the CEO and the CFO, and (ii) recorded, processed, summarized, and reported in accordance with the SEC's rules and forms. There were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Act) that occurred during the quarter ended June 30, 2010 that has materially affected, or is likely to materially affect, such internal controls.

The Company does not expect that its disclosure controls and procedures will prevent all error and fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The

Table of Contents

design of any control procedure is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies and procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

The Company intends to continually review and evaluate the design and effectiveness of its disclosure controls and procedures, to improve its controls and procedures over time, and to correct any deficiencies it may discover in the future. The goal is to ensure that management has timely access to all material financial and non-financial information concerning the Company's business. While the Company believes the present design of its disclosure controls and procedures is effective to achieve its goal, future events affecting its business may cause the Company to modify its disclosure controls and procedures. The Company continues to use the widely accepted Committee of Sponsoring Organization of the Treadway Commission (COSO) framework for its evaluation of such internal controls.

Item 1A. Risk Factors.

There were no material changes to the Company's risk factors during the first half of 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On July 21, 2010, the Registrant's Board of Directors voted to suspend dividends until operating performance improves and credit losses abate. Regulatory approval will be required prior to payment of a future dividend.

The Company has also suspended its treasury program. Treasury purchases made prior to the suspension are summarized in the table below:

Share Repurchases		Total Number of Shares Purchased	Average Price Paid per Share	Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that May Yet be Purchased under the Plans or Programs
