⁽a) Pre-Refunded bonds are escrowed with government obligations and/or government agency securities and are considered by the Manager to be triple-A rated even if issuer has not applied for new ratings.

Abbreviations used in this schedule:

AMBAC - Ambac Assurance Corporation

DFA - Development Finance Agency

EDA - Economic Development Authority

EFA - Educational Facilities Authority

FGIC - Financial Guaranty Insurance Company

FSA - Financial Security Assurance

GO - General Obligation

HEFA - Health & Educational Facilities Authority

HFA - Housing Finance Authority

ISD - Independent School District

LOC - Letter of Credit

MBIA - Municipal Bond Investors Assurance Corporation

MWRA - Massachusetts Water Resources Authority

PCR - Pollution Control Revenue

PSF - Permanent School Fund

PSFG - Permanent School Fund Guaranty

SPA - Standby Bond Purchase Agreement

TFA - Transitional Finance Authority

Summary of Investments by Industry * (unaudited)

⁽b) Variable rate security. Interest rate disclosed is that which is in effect at September 30, 2007.

⁽c) Security is exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions that are exempt from registration, normally to qualified institutional buyers. This security has been deemed liquid pursuant to guidelines approved by the Board of Directors, unless otherwise noted.

⁽d) Income from this issue is considered a preference item for purposes of calculating the alternative minimum tax (AMT).

⁽e) Bonds are escrowed to maturity by government securities and/or U.S. government agency securities and are considered by the Manager to be triple-A rated even if issuer has not applied for new ratings.

⁽f) Variable rate demand obligations have a demand feature under which the Fund can tender them back to the issuer on no more than 7 days notice. Date shown is the date of the next interest rate change.

[#] Aggregate cost for federal income tax purposes is substantially the same.

Bond Ratings (unaudited)

The definitions of the applicable rating symbols are set forth below:

Standard & Poor s Ratings Service (Standard & Poor s) Ratings from AA to CCC may be modified by the addition of a plus (or minus () sign to show relative standings within the major rating categories.

AAA

AA

A

BBB

BB, B, CCC, CC and C

D

Bonds rated AAA have the highest rating assigned by Standard & Poor s. Capacity to pay interest and repay principal is extremely strong.

Bonds rated AA have a very strong capacity to pay interest and repay principal and differ from the highest rated issues only in a small degree.

Bonds rated A have a strong capacity to pay interest and repay principal although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.

Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for bonds in this category than in higher rated categories.

Bonds rated BB, B, CCC, CC and C are regarded, on balance, as predominan speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. BB represents the lowest degree of speculation and C the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.

Bonds rated D are in default and payment of interest and/or repayment of principal is in arrears.

Moody s Investors Service (*Moody s*) Numerical modifiers 1, 2 and 3 may be applied to each generic rating from Aa to Caa, where 1 is the highest and 3 the lowest ranking within its generic category.

Aaa

Aa

A

Baa

Bonds rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as gilt edge. Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Bonds rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in Aaa securities.

Bonds rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment some time in the future.

Bonds rated Baa are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Bonds rated Ba are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and therefore

7

Ba

Bond Ratings (unaudited)(continued)

not well safeguarded during both good and bad times over the future. Uncertainty

of position characterizes bonds in this class.

Bonds rated B generally lack characteristics of desirable investments. Assurance of interest and principal payments or of maintenance of other terms of the contract

over any long period of time may be small.

Bonds rated Caa are of poor standing. These may be in default, or present elements

of danger may exist with respect to principal or interest.

Bonds rated Ca represent obligations which are speculative in a high degree. Such

issues are often in default or have other marked short-comings.

Bonds rated C are the lowest class of bonds and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Fitch Ratings Service (Fitch) Ratings from AA to CCC may be modified by the addition of a plus (+) or minus () sign to show relative standings within the major rating categories.

Bonds rated AAA have the highest rating assigned by Fitch. Capacity to pay AAA interest and repay principal is extremely strong.

Bonds rated AA have a very strong capacity to pay interest and repay principal and

differ from the highest rated issues only in a small degree.

Bonds rated A have a strong capacity to pay interest and repay principal although

they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.

Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for bonds in this category

than in higher rated categories.

Bonds rated BB, B, CCC and CC are regarded, on balance, as predominantly and CC speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. BB represents a lower degree of speculation than B, and CC the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed

by large uncertainties or major risk exposures to adverse conditions.

Indicates that the bond is not rated by Standard & Poor s, Moody s or Fitch.
