Geovic Mining Corp.

(an exploration stage company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(dollars in thousands, except per share amounts or as otherwise stated)

1. NATURE OF BUSINESS AND CONTINUANCE OF OPERATIONS

Geovic Mining Corp. (the Company) is incorporated under the laws of the state of Delaware. The Company owns 100% of the shares of Geovic, Ltd. (Geovic), a company that has been in the mining exploratory stage since its inception on November 16, 1994. The Company is an exploration stage company in the process of planning to develop its mineral properties through its subsidiaries. As an exploration stage entity, we require further technical analysis and financing in order to bring our properties into development.

Geovic is engaged in the business of exploring for cobalt, nickel and related minerals through its majority-owned (60.5%) subsidiary, Geovic Cameroon, PLC (GeoCam), a financially dependent public limited company duly organized and incorporated under the laws of the Republic of Cameroon.

The Company is also engaged in the worldwide exploration of energy and mineral resources directly or indirectly through its ownership of Geovic Energy Corp. and Geovic Mineral Sands Corp., formed in 2007 and 2009 respectively under the laws of the State of Colorado, Geovic France SAS, formed in December 2008 under the laws of France, and Geovic Nouvelle-Calédonie SAS, formed in March 2009 under the laws of New Caledonia.

2. BASIS OF PRESENTATION

The accompanying interim unaudited consolidated financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States (GAAP) for interim financial statements and the instructions to Form 10-Q and Article 10 of Regulation S-X and accordingly do not include all disclosures required for annual financial statements.

These interim consolidated financial statements follow the same significant accounting policies and methods of application as the Company's audited annual consolidated financial statements as included in the Company's annual report on Form 10-K for the year ended December 31, 2010 (the Annual Financial Statements). The interim consolidated financial statements should be read in conjunction with the Annual Financial Statements.

In the opinion of management, all adjustments (including normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for this interim period is not necessarily indicative of the result that may be expected for the full year ending December 31, 2011.

3. LOSS PER SHARE

Basic loss per share has been computed by dividing the net loss applicable to the Company's common shareholders by the weighted average number of shares of common stock outstanding during each period. Diluted loss per share is computed by including the dilutive effect of common stock that would be issued assuming exercise of the outstanding stock options and stock purchase warrants. Shares underlying all outstanding options and warrants are excluded from the computation of diluted loss per share for the three months ended March 31, 2011 and 2010 because the effect would have been anti-dilutive.

4. EXPLORATION COSTS

GeoCam gained exclusive rights to exploitation of the cobalt and nickel deposits with the granting of a Mining Convention by the government of Cameroon on August 1, 2002. The Mining Convention grants GeoCam the exclusive rights to mine, process, and export cobalt, nickel and related substances from lands subject to a Mining Permit, which was granted by decree on April 11, 2003. The Mining Convention, which has a primary term of 25 years, sets forth all legal and fiscal provisions governing the mining operation. It is renewable under certain conditions in 10-year increments for the life of the resource.

Table of Contents

The following is a summary of the exploration costs incurred by the Company:

	Three Months Ended		Unaudited
	2011	2010	period from Nov. 16, 1994 (inception) to March. 31, 2011
Cameroon, Africa:			
Property evaluation	\$ 1,405	\$ 1,391	\$ 50,011
Office costs	781	858	26,065
	2,186	2,249	76,076

New Caledonia	160	92	1,182
Other projects	83	1	406
	504	264	4,773
Total Exploration Costs	\$ 2,690	\$ 2,513	\$ 80,849

5. PROPERTY, PLANT AND EQUIPMENT, NET

As of March 31, 2011 and December 31, 2010 property, plant and equipment consisted of the following:

	March 31, 2011	December 31, 2010
Machinery and equipment	\$ 3,157	\$ 3,157
Vehicles	696	989
Buildings	412	412
Furniture and equipment	1,212	1,217
Other	73	73
Equipment in transit	66	66
Buildings & installations under construction		
	5,616	5,914
Less accumulated depreciation	(2,126)	(2,084)
	\$ 3,490	\$ 3,830

Table of Contents**6. STOCK BASED COMPENSATION****Stock options**

The Company adopted a stock option plan which was amended in June 2007, 2008 and 2009 (the "Company Option Plan"), under which 18,700,000 Company shares were reserved for issuance upon exercise of options granted under the Company Option Plan. The Company Option Plan is intended to provide a means whereby the Company and its subsidiaries can attract, motivate and retain key employees, consultants, and service providers who can contribute materially to the Company's growth and success, and to facilitate the acquisition of shares of the Company's common stock. The Company Option Plan provides for incentive stock options meeting the requirements of Section 422 of the Internal Revenue Code and nonqualified stock options that do not meet the requirements for incentive stock options. The Company Option Plan requires the option exercise price per share purchasable under the option to be equal to the greater of the closing price of the Company's common shares on the Toronto Stock Exchange the day before or date of grant for all nonqualified stock options and incentive stock options. The Company has historically issued new shares when share-based awards are exercised.

The following table and related information summarizes the Company's stock options and the stock option activity for the three months ended March 31, 2011:

	Options Outstanding		Weighted Average Exercise Price per Share*	Weighted	Intrinsic Value (000 \$)
	Options Available for Grant	Number Outstanding		Average	
Available and outstanding at December 31, 2010	2,995,048	15,704,952	0.80		
Granted	(1,630,000)	1,630,000	0.71		
Exercised	75,100	(75,100)	0.05		
Forfeited	207,000	(207,000)	0.89		
Expired	350,000	(350,000)	0.77		
Available and outstanding at March 31, 2011	1,997,148	16,702,852	\$ 0.75	5.60	\$ 2,969
Exercisable at March 31, 2011		15,011,185	\$ 0.78	5.56	\$ 2,968
Vested or expected to vest at March 31, 2011		14,961,846	\$ 0.80	5.89	\$ 2,968

* Some of the options are granted with Canadian dollar exercise prices, and the weighted average prices reflect the U.S. dollar equivalent prices.

The following stock option grants were issued by the Company during the three months ended March 31, 2011 and 2010 respectively:

The Company granted 1,630,000 options under the Company Option Plan [2010 1,525,000]. The Company recorded compensation expense of \$301 relating to vesting of the grants [2010 \$437]. Included in the 2011 grants are 500,000 options issued to an executive of the Company which are scheduled to vest upon the successful completion of financing of the Nkamouna project or certain other events and, if not vested, are scheduled to expire January 21, 2012. The remaining options vest 40% upon grant and 30% on each of the first and second anniversaries of the date of grant. As of March 31, 2011, there was \$482 of total unrecognized compensation expense related to non-vested stock based compensation granted under the Company Option Plan which is expected to be recognized over a weighted average period of 1.0 year.

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

The weighted-average fair value per share of options granted under the Company's Options Plan during 2011 was \$0.39 [2010 \$0.50]. The total intrinsic value of share options exercised was \$46 [2010 \$491]. The total cash received from the exercise of stock options was \$4 [2010 \$44].

The fair value of all stock options granted during the three months ended March 31, 2011 and 2010 was estimated at the date of grant using a Black-Scholes option pricing model with the following assumptions:

	2011	2010
Expected dividend	0.0%	0.0%
Risk-free interest rate	2.1%	2.6%
Expected volatility*	67.5% -67.7%	69.74%
Expected life (in years)	5.5	5.5

* For the three months ended March 31, 2011, volatility was estimated based on combining the Company's historical volatility with the historical volatilities of certain other comparable exploration stage mining companies.

Table of Contents

The Company estimates expected forfeitures at the grant date and compensation expense is recorded only for those awards expected to vest. The estimate of expected forfeitures is reevaluated at the balance sheet date.

Option pricing models require the input of highly subjective assumptions, particularly as to the expected price volatility of the market value of the underlying stock. Changes in these assumptions can materially affect the fair value estimate and therefore it is management's view that the existing models do not necessarily provide a single reliable measure of the fair value of the Company's equity instruments.

Stock awards

The Company adopted the 2010 Company Stock Award Plan (the "Stock Award Plan") that was approved by the Board of Directors in June 2010. The Common Stock that may be issued pursuant to Stock Awards shall not exceed 2,000,000 shares of Common Stock. The Common Stock subject to the Stock Award Plan shall be authorized and unissued stock. Stock Awards may be granted to Employees, Directors, Officers and Consultants. Stock Awards may be granted as Restricted Stock Awards or Restricted Stock Units. During the three months ended March 31, 2011, we granted 210,000 Restricted Stock Awards to certain members of the executive management team and the Board of Directors. The Restricted Stock Awards vest 40% on the grant date (January 21, 2011), 30% on the 1st anniversary of the grant date, and 30% on the 2nd anniversary of the grant date. For the three months ended March 31, 2011, the Company recognized compensation expense of \$71 related to the Restricted Stock Awards. Also during the three months ended March 31, 2011, we issued 180,000 Restricted Stock Units to certain members of the Board of Directors. The Restricted Stock Units will vest on the first anniversary of the grant date. The shares will be issued to the recipient on the earlier of their termination date or on the third anniversary of the grant date. For the three months ended March 31, 2011, the Company recognized compensation expense of \$24 related to the Restricted Stock Units.

7. STOCKHOLDERS' EQUITY**Preferred stock**

The Company is authorized to issue 50 million shares of preferred stock, with a par value of \$0.0001, of which 6 million are designated as Series A convertible preferred stock. There are no shares of Series A preferred stock or other preferred stock outstanding as of March 31, 2011.

Stock Purchase Warrants

The Company adjusts the share-based payment liability to the fair value each reporting period. The fair value adjustment for the stock purchase warrants did not materially affect net loss or loss per share in the consolidated statement of operations for the three months ended March 31, 2011.

The following table and related information summarizes the Company's stock purchase warrants at March 31, 2011 and the stock purchase warrant activity for the three months ended March 31, 2011:

	Number Outstanding	Weighted-Average Exercise Price per Share
Warrants outstanding at December 31, 2010	18,892,096	\$ 2.99
Expired		
Warrants outstanding at March 31, 2011	18,892,096	\$ 2.99

All outstanding warrants were fully amortized in 2009 thus the Company recorded no compensation expense relating to vesting of grants [2010 \$0]. The Company also recorded \$(127) in 2011 [2010 \$(272)] for the change in the fair value of the warrants that have exercise prices that are denominated in Canadian dollars.

The warrants outstanding at March 31, 2011 expire as follows: 300,000 June 2011, 2,999,996 November 2011; 10,800,000 March 2012 and 4,792,100 April 2012.

8. DERIVATIVE INSTRUMENTS

Derivative Liabilities

The Company currently does not hold derivative instruments to manage its exposure to commodity prices. The Company evaluates all of its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. All derivative financial instruments are recognized in the balance sheet at fair value. Changes in fair value are recognized in earnings if they are not eligible for hedge accounting or other comprehensive income if they qualify for cash flow hedge accounting.

Table of Contents

A Black-Scholes option-pricing model was used to obtain the fair value of the Company's stock purchase warrants. The fair value of outstanding derivative instruments not designed as hedging instruments on the accompanying Consolidated Balance Sheet were as follows:

Derivative Instruments	Balance Sheet Location	March 31, 2011	December 31, 2010
Stock purchase warrants	Share-based payment liabilities	\$ 2	\$ 129

The effect of derivative instruments not designed as hedging instruments on the accompanying consolidated statements of operations was \$127 for the three months ended March 31, 2011.

9. FAIR VALUE MEASUREMENTS

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy, as defined below, gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

Level 1, defined as observable inputs such as quoted prices in active markets for identical assets.

Level 2, defined as observable inputs other than Level 1 prices. These include quoted prices for similar assets or liabilities in an active market, quoted prices for identical assets and liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The fair value of the share-based payment liability, as described in note 8, is based on unobservable inputs in which little or no market data exists, therefore, it is classified as Level 3. The following table summarizes the change in the fair value of the share-based payment liability categorized as Level 3:

Balance as of December 31, 2010	\$ 129
Change in fair value 2011	(127)
Ending balance	\$ 2

At March 31, 2011 and December 31, 2010, the carrying amounts of cash and cash equivalents and trade payables represented fair value because of the short-term nature of these instruments.

10. NONCONTROLLING INTEREST

On September 2, 2008, GeoCam shareholders approved a GeoCam capital increase for 2008 of CFA francs 30.34 billion, equivalent to approximately \$67 million, to be issued in multiple cash calls made by the GeoCam Board of Directors. The capital increase was based on GeoCam's 2008 budget and Geovic's pre-2007 capital advances made for GeoCam. At March 31, 2010 all of the 2008 capital increase had been paid by or for the accounts of the shareholders of GeoCam, including Geovic, in their respective ownership interests prior to the capital increase.

In May 2010 GeoCam shareholders approved a capital increase equivalent to approximately \$11 million for 2010. In December they approved an additional \$13 million for the remainder of 2010 and part of 2011.

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

During the three months ended March 31, 2011 GeoCam completed 1 cash call, equivalent to approximately \$5.1 million. In the cash call Geovic paid approximately \$3.1 million, representing 60.5% of the cash calls and the noncontrolling interest paid cash of approximately \$2.0 million.

At March 31, 2011 the remaining cash call for the 2011 capital increase at current exchange rates is anticipated to be equivalent to approximately \$3.0 million and is expected to be completed in first half of 2011. Geovic's 60.5% share of the remaining cash call is expected to be equivalent to approximately \$1.8 million.

The noncontrolling interest balance of approximately \$11.6 million at March 31, 2011 [2010 - \$10.7 million] represents the balance from the capital increases contributed by the noncontrolling interest as described above. The difference between the original amounts contributed and the balance at March 31, 2011 represents the noncontrolling interest share of the actual expenditures from January 1, 2007 through March 31, 2011.

Table of Contents

11. INCOME TAXES

The Company had no unrecognized tax benefit as of March 31, 2011 or change in unrecognized tax benefits that would impact the effective rate. The Company does not anticipate a significant change to the total amount of unrecognized tax benefits over the next three months.

The Company files income tax returns in the U.S. federal jurisdiction, Cameroon, France, New Caledonia and Colorado. The Company has open tax years for the U.S. federal return from 2000 forward with respect to its net operating loss (NOL) carryforwards, where the IRS may not raise tax for these years, but can reduce NOLs. Otherwise, with few exceptions, the Company is no longer subject to federal, state, or local income tax examinations for years prior to 2005. The Company has incurred losses since inception. Due to the full valuation allowance against its net deferred tax asset, management would expect that any adjustment resulting from the audit would not result in an adjustment to the Company's financial statements.

The Company recognizes potential accrued interest and penalties related to unrecognized tax benefits in income tax expense. For the three months ended March 31, 2011, the Company recognized no potential interest or penalties with respect to unrecognized tax benefits.

There was no benefit from income taxes in the three months ended March 31, 2011 and during the same period in 2010. The effective tax rate was 0% for the first three months of 2011 and for the same period in 2010. Our effective rates differ from the statutory federal rate of 35% for certain items, such as state and local taxes, non-deductible expenses, change in valuation allowance offsetting foreign and domestic operating losses and foreign taxes at rates other than 35%.

12. RELATED PARTY TRANSACTIONS

- [a] On June 15, 2009, Geovic, Ltd., entered into an agreement with Mineral Services, LLC which was amended effective December 31, 2009 and June 15, 2010, related to project development, technical, financing, and marketing services. Mineral Services, LLC is owned by Michael Mason, a director of the Company. Total fees paid to Mineral Services, LLC under the agreement during 2011 were \$6 [2010 \$28]. Michael Mason became Chief Executive Officer of the Company on January 21, 2011. As a result the consulting agreement was cancelled at that time.
- [b] Geovic held an option granted in 2006 to acquire the 0.5% ownership interest in GeoCam held by William A. Buckovic, an officer and director of the Company and Geovic. Under the option agreement, Geovic was obligated to pay all GeoCam capital increases on behalf of Mr. Buckovic to maintain his ownership interest in GeoCam. Effective September 2010, the Company exercised its right to acquire the 0.5% ownership interest in GeoCam by issuing 139,000 shares of the Company with an estimated fair value of approximately \$85 to Mr. Buckovic. As the shares were issued for no cash proceeds nor generated any change in noncontrolling interest, no change in equity is reflected in the financial statements. As a result of exercising the right to purchase the 0.5% ownership interest in 2010, the Company fully owned the 60.5% and in 2011 paid no amounts on behalf of a related party [2010 \$15].
- [c] GeoCam entered into a professional and management services contract with Société Nationale d Investissement du Cameroun (S.N.I.), the holder of 20% and representative of other holders of an additional 19.5% of the outstanding shares of GeoCam. The services are for government relations and administrative matters related to project development. GeoCam has expensed \$82 during 2011 for these services [2010 \$82].

13. COMMITMENTS AND CONTINGENCIES

- [a] In April 2010, GeoCam engaged an industrial research and development contractor to perform laboratory testing, construct a pilot plant and generate design data. The study commenced in April 2010 and was completed in early 2011. From the start of the contract to completion, the Company incurred approximately \$3.6 million.
- [b] In December 2009, GeoCam engaged an engineering contractor to complete a feasibility study for the Nkamouna Project. The study commenced in January 2010. The Company expects to incur approximately \$3.7 million to complete this study, however, the contract can

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

be terminated with appropriate notice. From the start of the contract to March 31, 2011 the Company has incurred approximately \$3.5 million.

- [c] In December 2009 the Company engaged a financial advisor in connection with the financing of the Nkamouna project. The Company agreed to pay a fixed retainer fee of \$50 per month and a \$0.8 million success fee upon completion. The terms of the agreement were based on the assumption that the completion would occur by December 2010. A replacement agreement with GeoCam was entered into August 2010 with substantially the same terms except the new agreement is based on the assumption that completion will occur by July 2011.

- [d] In November 2009, five management level consultants or employees of GeoCam filed litigation in Cameroon, claiming approximately \$2.2 million as compensation and damages as a result of termination of their services by GeoCam in connection with a reduction in workforce in February and March 2009. In April 2010 the litigation was dismissed. In July 2010 the litigation was brought before another jurisdiction and remains outstanding. However, the Company believes all contractual and other obligations to the individuals have been satisfied and the current claims have no basis.

Table of Contents

- [e] GeoCam is obligated under its mining permit to provide persons living in the region of the permitted area with social, sports, education and health infra-structure to promote their well being. This obligation was met by contracting with GeoAid International Inc. and/or its affiliate GeoAid Cameroon (GeoAid), non-profit international humanitarian organizations. During the three months ended March 31, 2011 the Company contributed \$89 [2010 \$45] to GeoAid. While the Company is not legally obligated to contribute a specific amount, the Company in 2011 and 2010 was a primary financial contributor to GeoAid.
- [f] GeoCam, entered into purchase orders for mining equipment in 2008 for obligations totaling 615 and deposited 99 toward the purchases. In 2009, GeoCam requested delay of the delivery of the equipment to 2010 or thereafter. The sellers agreed to accept the delay and GeoCam would pay 6% per annum on a portion of the unpaid purchase price of the equipment delayed for delivery. No formal agreement to delay delivery has been completed. No liabilities were accrued in 2010 or 2011 for these commitments. In 2010, GeoCam utilized 55 of the deposits toward vehicle purchases.
- [g] GeoCam received a letter from the Minister of Industry, Mines and Technological Development of the Republic of Cameroon on March 20, 2006 requesting payment of surface area taxes of approximately \$500 and a penalty of the same amount for the period from 2003 to 2005. GeoCam has disputed this amount based on its interpretation of the Mining Convention signed on July 31, 2002 that GeoCam is only committed to pay this surface area tax once commercial exploitation begins. GeoCam has further disputed the amount of surface area subject to tax which would reduce the estimated liability to approximately \$470.

GeoCam deposited with the Cameroon tax authority approximately \$100 on September 30, 2006 corresponding to the surface area tax for 2003. On November 30, 2006, GeoCam deposited with the Cameroon tax authority a further \$300 corresponding to the surface area tax for 2004, 2005 and 2006.

14. SUBSEQUENT EVENTS

The Company has evaluated all events occurring after the March 31, 2011 balance sheet date through the date of issuance of these consolidated financial statements for necessary subsequent event disclosures. No items meet the requirements for subsequent event disclosures.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2010 as well as with the financial and related notes and the other information appearing elsewhere in this report. As used in this report, unless the context otherwise indicates, references to we, our, ours and us refer to Geovic Mining Corp. and its subsidiaries collectively.

Overview

This Management's Discussion and Analysis (MD&A) is intended to provide an analysis of our capital resources and liquidity at March 31, 2011, and financial results for the three months ended March 31, 2011 compared to the prior period. All amounts are presented in United States dollars unless indicated otherwise. Reference should also be made to the financial statements filed with this report and the Company's other disclosure materials filed from time to time on www.sec.gov or the Company's website at www.geovic.net.

Business

We are engaged in the business of exploring and planning to develop a cobalt, nickel, and manganese mining project in Cameroon through our majority-owned (60.5%) subsidiary, GeoCam, incorporated under the laws of the Republic of Cameroon. We also engage in exploration in the United States and elsewhere for other minerals that we believe would provide high-quality diversification opportunities.

Our future success will be largely dependent on our ability to finalize, and secure financing for, a development plan to mine and process the reserves in the Nkamouna Project, the first of several mineralized deposits within the mine permit area held by GeoCam. A feasibility study we initiated for the Nkamouna Project in December 2009 was completed in April 2011. The feasibility study estimates approximately \$617 million of initial capital costs, including contingencies, to construct and start-up the Project. The GeoCam financial advisor estimates that the total of capital, financing, working capital, contingency and start-up costs, will be approximately \$698 million, based on estimates included in the feasibility study. Additionally, cost overrun requirements of lenders are estimated to be approximately \$100 million.

Spending activity in the last 18 months for the Nkamouna Project was mostly limited to expenditures expected to confirm the feasibility of the Project, to enhance the likely development of the Nkamouna Project and to reduce process risk. We plan to continue this approach until we are reasonably satisfied that Nkamouna Project debt and equity financing in required amounts can be completed.

Financing to develop the Nkamouna Project will be dependent on numerous additional factors, including:

Our success in raising our portion of required equity for Project financing;

Availability and cost of Project debt;

Concurrence by lenders that mineral processing and the cash flows forecast in the feasibility study will be achievable;

Market conditions and demand for the cobalt, nickel and manganese products to be produced;

Terms of available metal sales agreements;

Cost trends and availability of mining and processing equipment, operating materials and services necessary to develop and operate the Project;

Edgar Filing: GEOVIC MINING CORP. - Form 10-Q

Environmental and reclamation commitments;

Compliance with any additional government requirements or approvals associated with Project development and operation;

Geopolitical developments and national elections in Cameroon; and

The relative competitive position of existing and prospective cobalt and nickel projects worldwide.

Other significant factors affecting development include operating the Nkamouna Project through GeoCam as an autonomous Cameroonian entity, GeoCam's ability to recruit, train and retain a qualified and stable local workforce and mining professionals to manage mine development, construction and operation, and the logistical challenges of operating the Project in a relatively undeveloped, remote area in Cameroon.

We are the majority shareholder of GeoCam; however, as a matter of policy, we generally do not take major strategic actions at GeoCam without general concurrence by the other shareholders. We view a good working relationship with the other shareholders of GeoCam as fundamental to the future success of the Nkamouna Project. Two of five GeoCam directors are selected by the other shareholders, and GeoCam is operated as an autonomous entity.

Table of Contents

We also explore for economic deposits of other minerals. We hold the following early stage exploration prospects: exploration licenses in New Caledonia (chromite); exploration permits and mining claims in Arizona (gold); leases, mining claims and exploration permits in Colorado and Wyoming (uranium); and mining claims in New Mexico (rare earth and other specialty metals).

Capital Resources and Liquidity

Until we begin to receive operating revenue, our cash resources and ability to access additional financing will be critical to our financial condition. At March 31, 2011 we had approximately \$28.1 million of cash and cash equivalents on a consolidated basis, a decrease of approximately \$4.3 million from December 31, 2010. Our cash is invested in U.S. dollar deposits and highly liquid money market funds, and GeoCam's funds are held in the Cameroon branch of a large international bank.

With our assistance, GeoCam engaged a large international bank as its financial advisor in August 2010. During 2010 we met with various large international businesses that have indicated an interest in the purchase of future off-take from, and possible investment in, the Nkamouna Project.

In early 2011 we engaged a large multi-national investment banking firm as financial advisor to advise and assist the Company in discussions with strategic partners for the Nkamouna Project and to review financing alternatives and our equity requirements in connection with the Project financing.

New mining projects such as the Nkamouna Project are typically financed using a combination of debt and equity. We plan to attempt to finance all capital costs, start up expenses and financing costs of the Project in such manner. GeoCam will be required to furnish, as equity, more than 40% of the total estimated costs for the Nkamouna Project. The GeoCam financial advisor has estimated that our share of future GeoCam equity to complete debt financing for the Project will be approximately \$225 million. We will seek to access debt and equity capital markets during the balance of 2011. These figures reflect the amount and timing of equity capital we will be required to contribute to GeoCam as a condition to Project financing. These efforts to raise capital may be unsuccessful. We are also considering other alternatives as outlined below.

Based on the estimated capital and start-up costs of the Nkamouna Project, we presently do not have sufficient capital resources available to meet expected equity requirements. Our ability to raise required additional capital for this purpose will depend on a number of factors, many of which are partly or wholly outside of our control, including the state of world-wide financial, commodity and other markets. These factors must be addressed for the GeoCam shareholders to obtain the required equity. Terms of any equity financing by the Company, if available, are expected to be dilutive to our present stockholders. We are seeking stockholder approval for an amendment to our Certificate of Incorporation to increase our authorized common stock by 400,000,000 shares, which may be needed to raise significant additional equity.

The GeoCam shareholders, including the Company, are considering strategic partners for GeoCam who might acquire an equity interest in GeoCam either directly or by acquiring part or all of the shareholders' interests and who could obtain a priority in purchases of products produced. If we are unable to raise our share of equity required as a condition to Project debt financing, construction of the Nkamouna Project would be delayed. We are investigating all strategic alternatives including selling some or all of our interest in the Project.

We do not anticipate generating revenue until operations at the Nkamouna Project begin, which could be late 2014 or thereafter. We believe that our cash resources will satisfy our capital and liquidity requirements for pre-construction operations through mid-2012, depending on GeoCam's level of activity. The GeoCam pre-construction 2011 expenditures are presently expected to be approximately \$15 million. GeoCam's operating expenses are provided through capital increases approved by the shareholders of GeoCam and funded in accordance with the respective ownership interests prior to the capital increase. We will be obligated to fund 60.5% of all future GeoCam capital increases. We anticipate that at least \$9 million of our available cash will be used to meet our share of anticipated ongoing operating pre-construction expenses in Cameroon in 2011. We expect our 2011 general and administrative expenses in the United States to total approximately \$6 million, and that we will also expend up to \$3.5 million for exploration of mineral properties, or investment in other resource entities, in the United States and elsewhere. We expect that a significant portion of our cash resources will be expended or committed for these purposes through 2011 or later and that our cash balances will continue to decrease from quarter to quarter. Based on our current planned 2011 expenditures, we anticipate that our 2011 year end consolidated cash and cash equivalents will be approximately \$14 to \$15 million.

Neither the Company, nor GeoCam, has any material debt or other similar obligations or commitments. We believe that our present capital resources will be sufficient to satisfy the Company's existing capital and liquidity requirements described above through at least the middle of 2012, not including our anticipated equity requirements in connection with the Project debt financing by GeoCam. We have no standby financing arrangements currently in place. We plan to explore the availability of Company debt or equity capital during the remainder of 2011.

Table of Contents

Results of Operations

Three Months Ended March 31, 2011 Compared to Three Months Ended March 31, 2010:

The Company had no revenue and incurred losses from operations during the first quarters of 2011 and 2010, and has had no revenue from operations since inception. The net loss attributed to the Company increased approximately \$0.5 million in the first quarter of 2011 compared to the first quarter 2010. Exploration expenses increased by \$0.2 million in the quarter compared to the year earlier period, of which \$0.1 million represents a decrease in exploration costs in Cameroon and an increase of \$0.3 million in exploration expense in other Company projects in New Mexico and New Caledonia. Exploration office costs of GeoCam decreased \$0.1 million in 2011, reflecting the scaling back of activities. Property evaluation expenses remained constant from 2010 to 2011.

Stock compensation expense decreased approximately \$0.1 million. During the first quarter of 2011 we made the annual grants of options under the Stock Option Plan to officers, directors and employees as well as stock award grants under the Stock Award Plan. Stock compensation expense was higher in 2010 primarily due to a higher stock price on the grant date resulting in higher stock compensation expense under the Black-Scholes option pricing model. Change in fair value of warrants for the first quarter of 2011 was (\$0.1) million compared to (\$0.3) million for the same period in 2010. The decrease is due to lower volatility in the current quarter as the warrants are getting closer to their expiration date.

General and administrative expenses in the United States increased \$0.1 million in the quarter, when compared to the first quarter of 2010 as general and administrative activities remained constant.

As an exploration stage company, we have charged our exploration and pre-construction expenses incurred for GeoCam to operations in the periods incurred and no such expenditures have been capitalized. We expect to continue this practice until a final development and mining plan is adopted and project financing is committed. Once we begin to capitalize expenditures at the Nkamouna Project, our results of operations for financial reporting purposes during periods before mining and processing activities begin may be affected.

Off-Balance Sheet Arrangements

We have no off balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

Safe Harbor Statement

Certain statements contained in this report (including information incorporated by reference) are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are intended to be covered by the safe harbor provided for under these sections. Our forward-looking statements include, without limitation statements with respect to the feasibility study for the Nkamouna Project; our expectations regarding capital required at the Nkamouna Project; requirements for additional capital; anticipated terms and requirements under future Project debt financing arrangements; anticipated expenditures in 2011; our anticipated cash position at the end of 2011; and our plans with respect to future debt and equity financing.

Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to risks, uncertainties, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by those forward-looking statements. Important factors that could cause actual results to differ materially from such forward-looking statements (cautionary statements) are disclosed under Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2010 and include the results of the feasibility study update; the availability of financing on acceptable terms or at all; actual results of current exploration activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of metals; possible variations in ore reserves, grades, or recovery rates; labor disputes, delays in obtaining governmental approvals or changes in governmental laws and regulations; delays in the completion of development or construction activities and other factors as described herein. Many of these factors are beyond our ability to control or predict. Given these uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements.

All subsequent written and oral forward-looking statements attributable to us or to persons acting on our behalf are expressly qualified in their entirety by the cautionary statements. We disclaim any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not required.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Geovic maintains disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management is responsible for establishing and maintaining our disclosure controls and procedures. Our Chief Executive Officer and Chief Financial Officer participated with our management in evaluating the effectiveness of our disclosure controls and procedures as of March 31, 2011.

Based on our management's evaluation (with the participation of our Chief Executive Officer and Chief Financial Officer), our Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2011 our disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

Management has evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, whether any changes in our internal control over financial reporting occurred during our last fiscal quarter which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. During the quarter ended March 31, 2011, management concluded that there were no such changes to our internal control over financial reporting.
