Forward-Looking Statements

This Quarterly Report on Form 10-Q, other periodic reports filed by Regions Financial Corporation (Regions) under the Securities Exchange Act of 1934, as amended, and any other written or oral statements made by or on behalf of Regions may include forward-looking statements. The Private Securities Litigation Reform Act of 1995 (the Act) provides a safe harbor for forward-looking statements which are identified as such and are accompanied by the identification of important factors that could cause actual results to differ materially from the forward-looking statements. For these statements, we, together with our subsidiaries, unless the context implies otherwise, claim the protection afforded by the safe harbor in the Act. Forward-looking statements are not based on historical information, but rather are related to future operations, strategies, financial results or other developments. Forward-looking statements are based on management s expectations as well as certain assumptions and estimates made by, and information available to, management at the time the statements are made. Those statements are based on general assumptions and are subject to various risks, uncertainties and other factors that may cause actual results to differ materially from the views, beliefs and projections expressed in such statements. These risks, uncertainties and other factors include, but are not limited to, those described below:

The Dodd-Frank Wall Street Reform and Consumer Protection Act became law on July 21, 2010, and a number of legislative, regulatory and tax proposals remain pending. Additionally, the U.S. Treasury and federal banking regulators continue to implement, but are also beginning to wind down, a number of programs to address capital and liquidity in the banking system. Proposed rules, including those that are part of the Basel III process, could require banking institutions to increase levels of capital. All of the foregoing may have significant effects on Regions and the financial services industry, the exact nature and extent of which cannot be determined at this time.

The impact of compensation and other restrictions imposed under the Troubled Asset Relief Program (TARP) until Regions repays the outstanding preferred stock and warrant issued under the TARP, including restrictions on Regions ability to attract and retain talented executives and associates.

Possible additional loan losses, impairment of goodwill and other intangibles, and adjustment of valuation allowances on deferred tax assets and the impact on earnings and capital.

Possible changes in interest rates may increase funding costs and reduce earning asset yields, thus reducing margins. Increases in benchmark interest rates would also increase debt service requirements for customers whose terms include a variable interest rate, which may negatively impact the ability of borrowers to pay as contractually obligated.

Possible changes in general economic and business conditions in the United States in general and in the communities Regions serves in particular, including any prolonging or worsening of the current unfavorable economic conditions, including unemployment levels.

Possible changes in the creditworthiness of customers and the possible impairment of the collectability of loans.

Possible changes in trade, monetary and fiscal policies, laws and regulations, and other activities of governments, agencies, and similar organizations, may have an adverse effect on business.

The current stresses in the financial and real estate markets, including possible continued deterioration in property values.

Regions ability to manage fluctuations in the value of assets and liabilities and off-balance sheet exposure so as to maintain sufficient capital and liquidity to support Regions business.

Regions ability to expand into new markets and to maintain profit margins in the face of competitive pressures.

Regions ability to develop competitive new products and services in a timely manner and the acceptance of such products and services by Regions customers and potential customers.

Table of Contents

Regions ability to keep pace with technological changes.

Regions ability to effectively manage credit risk, interest rate risk, market risk, operational risk, legal risk, liquidity risk, and regulatory and compliance risk.

Regions ability to ensure adequate capitalization which is impacted by inherent uncertainties in forecasting credit losses.

The cost and other effects of material contingencies, including litigation contingencies, and any adverse judicial, administrative, or arbitral rulings or proceedings.

The effects of increased competition from both banks and non-banks.

The effects of geopolitical instability and risks such as terrorist attacks.

Possible changes in consumer and business spending and saving habits could affect Regions ability to increase assets and to attract deposits.

The effects of weather and natural disasters such as floods, droughts, wind, tornadoes and hurricanes, and the effects of man-made disasters.

Possible downgrades in ratings issued by rating agencies.

Potential dilution of holders of shares of Regions common stock resulting from the U.S. Treasury s investment in TARP.

Possible changes in the speed of loan prepayments by Regions customers and loan origination or sales volumes.

Possible acceleration of prepayments on mortgage-backed securities due to low interest rates, and the related acceleration of premium amortization on those securities.

The effects of problems encountered by larger or similar financial institutions that adversely affect Regions or the banking industry generally.

Regions ability to receive dividends from its subsidiaries.

The effects of the failure of any component of Regions business infrastructure which is provided by a third party.

Changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or other regulatory agencies.

The effects of any damage to Regions reputation resulting from developments related to any of the items identified above.

The words believe, expect, anticipate, project, and similar expressions often signify forward-looking statements. You should not place undu reliance on any forward-looking statements, which speak only as of the date made. We assume no obligation to update or revise any forward-looking statements that are made from time to time.

See also the Forward-Looking Statements and Risk Factors sections of Regions Annual Report on Form 10-K for the year ended December 31, 2010 and the Forward-Looking Statements section of Regions Quarterly Report on Form 10-Q for the quarter ended March 31, 2011, as filed with the Securities and Exchange Commission.

REGIONS FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Three and Six Months Ended June 30, 2011 and 2010

NOTE 1 Basis of Presentation

Regions Financial Corporation (Regions or the Company) provides a full range of banking and bank-related services to individual and corporate customers through its subsidiaries and branch offices located primarily in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. The Company is subject to competition from other financial institutions, is subject to the regulations of certain government agencies and undergoes periodic examinations by those regulatory authorities.

The accounting and reporting policies of Regions and the methods of applying those policies that materially affect the consolidated financial statements conform with accounting principles generally accepted in the United States (GAAP) and with general financial services industry practices. The accompanying interim financial statements have been prepared in accordance with the instructions for Form 10-Q and, therefore, do not include all information and notes to the consolidated financial statements necessary for a complete presentation of financial position, results of operations and cash flows in conformity with GAAP. In the opinion of management, all adjustments, consisting of normal and recurring items, necessary for the fair presentation of the consolidated financial statements have been included. These interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto in Regions Form 10-K for the year ended December 31, 2010.

Regions has evaluated all subsequent events for potential recognition and disclosure through the filing date of this Form 10-Q.

Certain amounts in prior period financial statements have been reclassified to conform to the current period presentation. These reclassifications are immaterial and have no effect on net income, total assets or stockholders equity.

Table of Contents

NOTE 2 Securities

The amortized cost, gross unrealized gains and losses, and estimated fair value of securities available for sale and securities held to maturity are as follows:

	June 30, 2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(In millions)			
Securities available for sale:				
U.S. Treasury securities	$ 85	$ 2	$	$ 87

Table of Contents

Equity securities in the tables above included the following amortized cost related to Federal Reserve bank stock and Federal Home Loan Bank (FHLB) stock. Shares in the Federal Reserve Bank and FHLB are accounted for at amortized cost, which approximates fair value.

	June 30 2011	December 31 2010
	(In millions)	
Federal Reserve Bank	$ 460	$ 471
Federal Home Loan Bank	340	419

Securities with carrying values of $13.4 billion and $15.4 billion at June 30, 2011 and December 31, 2010, respectively, were pledged to secure public funds, trust deposits and certain borrowing arrangements.

The cost and estimated fair value of securities available for sale and securities held to maturity at June 30, 2011, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Estimated Fair Value
	(In millions)	
Securities available for sale:		
Due in one year or less	$ 64	$ 64
Due after one year through five years	800	803
Due after five years through ten years	15	15
Due after ten years	28	34
Mortgage-backed securities:		
Residential agency	21,297	21,526
Residential non-agency	16	17
Commercial agency	155	156
Commercial non-agency	253	252
Equity securities	961	961
	$ 23,589	$ 23,828
Securities held to maturity:		
Due in one year or less	$ 2	$ 2
Due after one year through five years	6	6
Due after five years through ten years	2	2
Due after ten years		
Mortgage-backed securities:		
Residential agency	11	11
	$ 21	$ 21

Table of Contents

The following tables present unrealized loss and estimated fair value of securities available for sale at June 30, 2011 and December 31, 2010. These securities are segregated between investments that have been in a continuous unrealized loss position for less than twelve months and twelve months or more.

	Less Than Twelve Months		Twelve Months or More		Total

There was no gross unrealized loss on debt securities held to maturity at either June 30, 2011 and December 31, 2010.

For the securities included in the tables above, management does not believe any individual unrealized loss, which was comprised of 253 securities and 292 securities at June 30, 2011 and December 31, 2010, respectively, represented an other-than-temporary impairment as of those dates. The unrealized losses are related primarily to the impact of higher interest rates and their impact on mortgage-backed securities. The Company does not intend to sell, and it is not likely that the Company will be required to sell, the securities before the recovery of their amortized cost basis, which may be at maturity.

Proceeds from sale, gross gains and gross losses on sales of securities available for sale are shown in the table below. The cost of securities sold is based on the specific identification method.

Total consumer	31,927	31,900	33,405
	$ 81,176	$ 82,864	$ 85,945

The allowance for credit losses represents management s estimate of credit losses inherent in the loan and credit commitment portfolios as of period-end. The allowance for credit losses consists of two components: the allowance for loan and lease losses and the reserve for unfunded credit commitments. Management s assessment of the appropriateness of the allowance for credit losses is based on a combination of both of these components. Regions determines its allowance for credit losses in accordance with applicable accounting literature as well as regulatory guidance related to receivables and contingencies. Binding unfunded credit commitments include items such as letters of credit, financial guarantees and binding unfunded loan commitments.

Prior to 2011, the allowance for accruing commercial and investor real estate loans, as well as non-accrual loans in those portfolio segments below $2.5 million, was determined using categories of pools of loans with similar risk characteristics (i.e., pass, special mention, substandard accrual, and nonaccrual, as defined below). These categories were utilized to develop the associated allowance for loan losses using historical losses adjusted for current economic conditions. Beginning in 2011, these pools of loans were compiled at a more granular level. A probability of default and a loss given default were statistically calculated for each pool. These parameters, in combination with other account data and assumptions, were used to calculate the estimate of incurred loss. The Company made the change to provide enhanced segmentation, process controls, transparency, governance and information technology controls. The change did not have a material impact on the overall allowance for credit losses. The credit quality indicators for commercial and investor real estate loans disclosed in the tables below provide additional information regarding the underlying credit quality of Regions portfolio segments and classes, and the corresponding impact on the allowance for credit losses.

Table of Contents

The components of the calculation of the allowance for credit losses related to non-accrual commercial and investor real estate loans over $2.5 million, troubled debt restructurings (TDRs), unfunded commitments, and all consumer loans were calculated in 2011 in the same manner as before. Except for the changes to the calculation of the allowance for loan losses for accruing commercial and investor real estate loans and non-accrual loans in these portfolio segments below $2.5 million as described above, there were no changes to Regions allowance process or accounting policies related to the allowance for credit losses from those described in the Annual Report on Form 10-K for the year ended December 31, 2010.

Management considers the current level of allowance for credit losses appropriate to absorb losses inherent in the loan portfolio and unfunded commitments. Management s determination of the appropriateness of the allowance for credit losses, which is based on the factors and risk identification procedures previously discussed, requires the use of judgments and estimations that may change in the future. Changes in the factors used by management to determine the appropriateness of the allowance or the availability of new information could cause the allowance for credit losses to be adjusted in future periods.

The following tables present an analysis of the allowance for credit losses by portfolio segment for the three and six months ended June 30, 2011. The total allowance for credit losses is then disaggregated to show the amounts derived through individual evaluation and the amounts calculated through collective evaluation. The allowance for credit losses related to individually evaluated loans includes reserves for non-accrual loans and leases, as well as TDRs, equal to or greater than $2.5 million. The allowance for credit losses related to collectively evaluated loans includes reserves for pools of loans with common risk characteristics.

The following describe the risk characteristics relevant to each of the portfolio segments.

Commercial The commercial loan portfolio segment includes commercial and industrial, representing loans to commercial customers for use in normal business operations to finance working capital needs, equipment purchases or other expansion projects. Commercial also includes owner-occupied commercial real estate loans to operating businesses, which are loans for long-term financing of land and buildings, and are repaid by cash flow generated by business operations. Owner-occupied construction loans are made to commercial businesses for the development of land or construction of a building where the repayment is derived from revenues generated from the business of the borrower. Collection risk in this portfolio is driven by the creditworthiness of underlying borrowers, particularly cash flow from customers business operations.

Investor Real Estate Loans for real estate development are repaid through cash flow related to the operation, sale or refinance of the property. This portfolio segment includes extensions of credit to real estate developers or investors where repayment is dependent on the sale of real estate or income generated from the real estate collateral. A portion of Regions investor real estate portfolio segment is comprised of loans secured by residential product types (land, single-family and condominium loans) within Regions markets. Additionally, these loans are made to finance income-producing properties such as apartment buildings, office and industrial buildings, and retail shopping centers. Loans in this portfolio segment are particularly sensitive to valuation of real estate.

Consumer The consumer loan portfolio segment includes residential first mortgage, home equity, indirect, consumer credit card, and other consumer loans. Residential first mortgage loans represent loans to consumers to finance a residence. These loans are typically financed over a 15 to 30 year term and, in most cases, are extended

to borrowers to finance their primary residence. Home equity lending includes both home equity loans and lines of credit. This type of lending, which is secured by a first or second mortgage on the borrower s residence, allows customers to borrow against the equity in their home. Real estate market values as of the time the loan or line is secured directly affect the amount of credit extended and, in addition, changes in these values impact the depth of potential losses. Indirect lending, which is lending initiated through third-party business partners, is largely comprised of loans made through automotive dealerships. Consumer credit card includes approximately 500,000 Regions branded consumer credit card accounts purchased late in the second quarter of 2011 from FIA Card Services. Other consumer loans include direct consumer installment loans, overdrafts and educational loans. Loans in this portfolio segment are sensitive to unemployment and other key consumer economic measures.

The following tables present credit quality indicators for the loan portfolio segments and classes, excluding loans held for sale, as of June 30, 2011, December 31, 2010 and June 30, 2010. Commercial and investor real estate loan classes are detailed by categories related to underlying credit quality and probability of default. These categories are utilized to develop the associated allowance for credit losses.

Pass includes obligations where the probability of default is considered low;

Special Mention includes obligations that have potential weakness which may, if not reversed or corrected, weaken the credit or inadequately protect the Company s position at some future date. Obligations in this category may also be subject to economic or market conditions which may, in the future, have an adverse affect on debt service ability;

Substandard Accrual includes obligations that exhibit a well-defined weakness which presently jeopardizes debt repayment, even though they are currently performing. These obligations are characterized by the distinct possibility that the Company may incur a loss in the future if these weaknesses are not corrected;

Non-accrual includes obligations where management has determined that full payment of principal and interest is in doubt.

Substandard accrual and non-accrual loans are often collectively referred to as classified. Special mention, substandard accrual, and non-accrual loans are often collectively referred to as criticized and classified.

Classes in the consumer portfolio segment are disaggregated by accrual status. The associated allowance for credit losses is generally based on historical losses of the various classes adjusted for current economic conditions.

Table of Contents

The following tables present details related to the Company s impaired loans as of June 30, 2011 and December 31, 2010. Loans deemed to be impaired include non-accrual commercial and investor real estate loans, excluding leasing, and all TDRs (including accruing commercial, investor real estate, and consumer TDRs). Loans which have been fully charged-off do not appear in the tables below. The related allowance represents the following components which correspond to impaired loans:

Individually evaluated impaired loans (non-accrual commercial and investor real estate loans equal to or greater than $2.5 million),

Collectively evaluated impaired loans (non-accrual commercial and investor real estate loans less than $2.5 million, which are evaluated based on pools of loans with similar risk characteristics),

Accruing and non-accruing TDRs equal to or greater than $2.5 million, which are individually evaluated like any other impaired loan over the quantitative scope. Accruing and non-accruing TDRs less than $2.5 million are included with pools of loans with similar risk characteristics and evaluated collectively.

Total consumer	1,635	77	1,558		1,558	207	17.4	1,548	17	1,527	32
Total impaired loans	$ 4,916	$ 646	$ 4,270	$ 384	$ 3,886	$ 935	32.2%	$ 4,396	$ 21	$ 4,469	$ 39

(1) Unpaid principal balance represents the contractual obligation due from the customer and includes the net book value plus charge-offs and payments applied.
(2) Charge-offs and payments applied represents cumulative partial charge-offs taken, as well as interest payments received that have been applied against the outstanding principal balance.
(3) Book value represents the unpaid principal balance less charge-offs and payments applied; it is shown before any allowance for loan losses.
(4) Coverage % represents charge-offs and payments applied plus the related allowance as a percent of the unpaid principal balance.
(5) Represents interest income on loans modified in a TDR, and are therefore considered impaired, which are on accruing status.

Table of Contents

	Impaired Loans As of December 31, 2010				
	Unpaid Principal Balance (1)	Charge-offs and Payments Applied (2)	Book Value (3)	Related Allowance for Loan Losses	Coverage % (4)
	(Dollars in millions)				
Commercial and industrial	$ 545	$ 124	$ 421	$ 102	41.5%
Commercial real estate mortgage owner occupied	746	96	650	167	35.3
Commercial real estate construction owner occupied	47	16	31	10	55.3
Total commercial	1,338	236	1,102	279	38.5
Commercial investor real estate mortgage	1,693	273	1,420	319	35.0
Commercial investor real estate construction	638	150	488	154	47.6
Total investor real estate	2,331	423	1,908	473	38.4
Residential first mortgage	1,113	60	1,053	126	16.7
Home equity	378	13	365	46	15.6
Indirect	2		2		
Other consumer	65		65	1	1.5
Total consumer	1,558	73	1,485	173	15.8
Total impaired loans	$ 5,227	$ 732	$ 4,495	$ 925	31.7%

(1) Unpaid principal balance represents the contractual obligation due from the customer and includes the net book value plus charge-offs and payments applied.
(2) Charge-offs and payments applied represents cumulative partial charge-offs taken, as well as interest payments received that have been applied against the outstanding principal balance.
(3) Book value represents the unpaid principal balance less charge-offs and payments applied; it is shown before any allowance for loan losses.
(4) Coverage % represents charge-offs and payments applied plus the related allowance as a percent of the unpaid principal balance.

A significant majority of residential first mortgage, home equity, and indirect and other consumer loans in the table above are considered impaired due to their status as a TDR. Approximately 94 percent of consumer TDRs were accruing at June 30, 2011.

In addition to the impaired loans detailed in the tables above, there were approximately $381 million in non-performing loans classified as held for sale at June 30, 2011, compared to $304 million at December 31, 2010. The loans are larger balance credits, primarily investor real estate, where management does not have the intent to hold these loans for the foreseeable future. The loans are carried at an amount approximating a price which will be recoverable through the loan sale market. During the three months ended June 30, 2011, approximately $176 million in non-performing loans were transferred to held for sale; this amount is net of charge-offs of $114 million recorded upon transfer. During the six months ended June 30, 2011, approximately $364 million in non-performing loans were transferred to held for sale; this amount is net of charge-offs of $219 million recorded upon transfer. At June 30, 2011 and December 31, 2010, non-accrual loans including loans held for sale totaled $3.2 billion and $3.5 billion, respectively.

Table of Contents

In June 2011, Regions completed the purchase of approximately $1.2 billion of Regions-branded credit card accounts from FIA Card Services. The purchase included approximately $1.1 billion in consumer credit card accounts and approximately $0.1 billion in small business credit card accounts, which are included in the commercial and industrial portfolio class. Approximately $86 million of the purchase price was allocated to purchase credit card relationship intangibles and approximately $84 million was allocated to the allowance for loan losses.

During the three and six months ended June 30, 2011, Regions purchased approximately $174 million and $336 million, respectively, in indirect loans from a third party.

NOTE 4 Loan Servicing

The fair value of mortgage servicing rights is calculated using various assumptions including future cash flows, market discount rates, expected prepayment rates, servicing costs and other factors. A significant change in prepayments of mortgages in the servicing portfolio could result in significant changes in the valuation adjustments, thus creating potential volatility in the carrying amount of mortgage servicing rights.

The tables below present an analysis of mortgage servicing rights for the three and six months ended June 30, 2011 and 2010, under the fair value measurement method:

	Three Months Ended June 30		Six Months Ended June 30	
	2011	2010	2011	2010
	(In millions)			
Carrying value, beginning of period	$ 282	$ 270	$ 267	$ 247
Additions	19	13	35	30
Increase (decrease) in fair value:				
Due to change in valuation inputs or assumptions	(28)	(57)	(23)	(46)
Other changes (1)	(5)	(6)	(11)	(11)
Carrying value, end of period	$ 268	$ 220	$ 268	$ 220

(1) Represents economic amortization associated with borrower repayments.

Data and assumptions used in the fair value calculation related to mortgage servicing rights (excluding related derivative instruments) as of June 30, 2011 and 2010 are as follows (dollars in millions):

	June 30	
	2011	2010
Unpaid principal balance	$ 26,421	$ 23,502
Weighted-average prepayment speed (CPR; percentage)	13.6%	17.8%
Estimated impact on fair value of a 10% increase	$ (15)	$ (15)
Estimated impact on fair value of a 20% increase	$ (29)	$ (28)
Option-adjusted spread (basis points)	714.4	580.2
Estimated impact on fair value of a 10% increase	$ (7)	$ (4)
Estimated impact on fair value of a 20% increase	$ (14)	$ (9)
Weighted-average coupon interest rate	5.33%	5.69%
Weighted-average remaining maturity (months)	283	289
Weighted-average servicing fee (basis points)	28.6	29.1

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. Changes in fair value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the

22

Table of Contents

effect of an adverse variation in a particular assumption on the fair value of the mortgage servicing rights is calculated without changing any other assumption, while in reality changes in one factor may result in changes in another which may either magnify or counteract the effect of the change. The derivative instruments utilized by Regions would serve to reduce the estimated impacts to fair value included in the table above.

Regions uses various derivative instruments and/or trading securities to mitigate the effect of changes in the fair value of its mortgage servicing rights in the statements of operations. The table below presents the impact on the statements of operations associated with changes in mortgage servicing rights and related derivative and/or trading securities for the three and six months ended June 30, 2011 and 2010.

	Three Months Ended June 30		Six Months Ended June 30	
	2011	2010	2011	2010
	(In millions)			
Net interest income	$	$	$	$ 3
Brokerage, investment banking and capital markets income				4
Mortgage income	(2)	12	(13)	28
Total	$ (2)	$ 12	$ (13)	$ 35

The following table presents servicing-related fees, which includes contractually specified servicing fees, late fees and other ancillary income resulting from the servicing of mortgage loans for the three and six months ended June 30, 2011 and 2010.

	Three Months Ended June 30		Six Months Ended June 30	
	2011	2010	2011	2010
	(In millions)			
Servicing related fees	$ 21	$ 20	$ 42	$ 40

Loans are sold in the secondary market with standard representations and warranties regarding certain characteristics such as the quality of the loan, the absence of fraud, the eligibility of the loan for sale and the future servicing associated on the loan. Regions may be required to repurchase these loans at par or make-whole, or indemnify the purchasers for losses incurred when representations and warranties are breached.

Regions maintains a repurchase liability related to mortgage loans sold with representations and warranty provisions. This repurchase liability reflects management s estimate of losses based on historical repurchase and loss trends, as well as other factors that may result in anticipated losses different from historical loss trends. The table below presents an analysis of Regions repurchase liability, related to mortgage loans sold with representations and warranty provisions, for the three and six months ended June 30, 2011 and 2010:

	Three Months Ended June 30		Six Months Ended June 30	
	2011	2010	2011	2010
	(In millions)			
Balance, beginning of period	$ 32	$ 28	$ 32	$ 29
Additions/(Reductions), Net	5	6	13	9
Losses	(5)	(4)	(13)	(8)
Balance, end of period	32	$ 30	$ 32	$ 30

During 2011, settled repurchase claims were related to one of the following alleged breaches: 1) underwriting guideline violations; 2) misrepresentation of income, assets or employment; or 3) property evaluation not supported. These claims stem primarily from the 2006 2008 vintages.

23

Table of Contents

NOTE 5 Goodwill

Goodwill allocated to each reportable segment is presented as follows:

	June 30 2011	December 31 2010 (In millions)	June 30 2010
Banking/Treasury	$ 4,691	$ 4,691	$ 4,691
Investment Banking/Brokerage/Trust	745	745	745
Insurance	125	125	125
	$ 5,561	$ 5,561	$ 5,561

Regions evaluates each reporting unit s goodwill for impairment on an annual basis in the fourth quarter, or more often if events or circumstances indicate that there may be impairment. Adverse changes in the economic environment, declining operations, or other factors could result in a decline in the implied fair value of goodwill. A goodwill impairment test includes two steps. Step One, used to identify potential impairment, compares the estimated fair value of a reporting unit with its carrying amount, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired. If the carrying amount of a reporting unit exceeds its estimated fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. Step Two of the goodwill impairment test compares the implied estimated fair value of reporting unit goodwill with the carrying amount of that goodwill. If the carrying amount of goodwill for that reporting unit exceeds the implied fair value of that unit s goodwill, an impairment loss is recognized in an amount equal to that excess.

During the second quarter of 2011, Regions assessed the indicators of goodwill impairment as of May 31, 2011, and through the date of the filing of the Quarterly Report on Form 10-Q for the quarter ended June 30, 2011. The indicators assessed included:

Recent operating performance,

Changes in market capitalization,

Regulatory actions and assessments,

Changes in the business climate (including legislation, legal factors and competition),

Company-specific factors (including changes in key personnel, asset impairments, and business dispositions), and

Trends in the banking industry.

Based on the assessment of the indicators above, quantitative testing of goodwill was required for all of Regions reporting units for the June 30, 2011 interim period.

For purposes of performing Step One of the goodwill impairment test, Regions uses both the income and market approaches to value its reporting units. The income approach, which is the primary valuation approach, consists of discounting projected long-term future cash flows, which are derived from internal forecasts and economic expectations for the respective reporting units. The significant inputs to the income approach include expected future cash flows, the long-term target tangible equity to tangible assets ratio, and the discount rate.

Regions uses the public company method and the transaction method as the two market approaches. The public company method applies a value multiplier derived from each reporting unit s peer group to a financial metric of the reporting unit (e.g. last twelve months of earnings before interest, taxes and deprecation, tangible book value, etc.) and an implied control premium to the respective reporting unit. The control premium is evaluated and compared to similar financial services transactions. The transaction method applies a value multiplier to a financial metric of the reporting unit based on comparable observed purchase transactions in the financial services industry for the reporting unit (where available).

Table of Contents

Regions uses the output from these approaches to determine the estimated fair value of each reporting unit. Listed below are tables of assumptions used in estimating the fair value of each reporting unit for the June 30, 2011, December 31, 2010 and June 30, 2010 interim periods. The tables include the discount rate used in the income approach, the market multiplier used in the market approaches, and the public company method control premium applied to all reporting units.

As of Second Quarter 2011	Banking/ Treasury	Investment Banking/ Brokerage/Trust	Insurance
Discount rate used in income approach	15%	14%	12%
Public company method market multiplier (1)	1.0x	2.1x	16.9x
Transaction method market multiplier (2)	1.2x	2.1x	n/a

(1) For the Banking/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value. For the Insurance reporting unit, this multiplier is applied to the last twelve months of net income. In addition to the multipliers, a 30 percent control premium is assumed for each reporting unit.
(2) For the Banking/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value.

As of Fourth Quarter 2010	Banking/ Treasury	Investment Banking/ Brokerage/Trust	Insurance
Discount rate used in income approach	15%	14%	11%
Public company method market multiplier (1)	1.0x	1.6x	17.3x
Transaction method market multiplier (2)	1.3x	2.1x	n/a

(1) For the Banking/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value. For the Insurance reporting unit, this multiplier is applied to the last twelve months of net income. In addition to the multipliers, a 30 percent control premium is assumed for each reporting unit.
(2) For the Banking/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value.

As of Second Quarter 2010	Banking/ Treasury	Investment Banking/ Brokerage/Trust	Insurance
Discount rate used in income approach	16%	13%	12%
Public company method market multiplier (1)	0.9x	1.6x	19.8x
Transaction method market multiplier (2)	1.0x	2.1x	n/a

(1) For the Banking/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value. For the Insurance reporting unit, this multiplier is applied to the last twelve months of net income. In addition to the multipliers, a 30 percent control premium is assumed for each reporting unit.
(2) For the Banking/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value.

Regions utilizes the capital asset pricing model (CAPM) in order to derive the base discount rate. The inputs to the CAPM include the 20-year risk-free rate, 5-year beta for a select peer set, and the market risk premium based on published data. Once the output of the CAPM is determined, a size premium is added (also based on a published source) as well as a company-specific risk premium, which is an estimate determined by the Company and meant to compensate for the risk inherent in the future cash flow projections and inherent differences (such as business model and market perception of risk) between Regions and the peer set. The table below summarizes the discount rate used in the goodwill impairment tests of the Banking/Treasury reporting unit for the reporting periods indicated:

	2nd Quarter 2011	1st Quarter 2011	4th Quarter 2010	3rd Quarter 2010	2nd Quarter 2010
Discount Rate	15%	15%	15%	16%	16%

Table of Contents

In estimating future cash flows, a balance sheet as of the test date and an income statement for the last twelve months of activity for the reporting unit are compiled. From that point, future balance sheets and income statements are projected based on the inputs discussed below. Cash flows are based on expected future capitalization requirements due to balance sheet growth and anticipated changes in regulatory capital requirements. The baseline cash flows utilized in all models correspond to the most recent internal forecasts and/or budgets that range from 1 to 5 years. These internal forecasts are based on inputs developed in the Company s capital planning process.

Specific factors as of the date of filing the financial statements that could negatively impact the assumptions used in assessing goodwill for impairment include: disparities in the level of fair value changes in net assets compared to equity; adverse business trends resulting from litigation and/or regulatory actions; higher loan losses; lengthened forecasts of higher unemployment relative to pre-crisis levels beyond 2012; future increased minimum regulatory capital requirements above current thresholds (refer to Note 13 Regulatory Capital Requirements and Restrictions to the 2010 consolidated financial statements filed on Form 10-K for the year ended December 31, 2010 for a discussion of current minimum regulatory requirements); future federal rules and regulations resulting from the Dodd-Frank Act; and/or a protraction in the current low level of interest rates beyond 2012.

The Step One analyses performed for the Investment Banking/Brokerage/Trust and Insurance reporting units during the second quarter of 2011 indicated that their estimated fair values exceeded their carrying values (including goodwill). Therefore, a Step Two analysis was not required for these reporting units.

The Step One analysis performed for the Banking/Treasury reporting unit during the second quarter of 2011 indicated that the carrying value (including goodwill) of the reporting unit exceeded its estimated fair value. Therefore, Step Two was performed for the Banking/Treasury reporting unit. For purposes of performing Step Two of the goodwill impairment test, Regions compared the implied estimated fair value of the Banking/Treasury reporting unit goodwill with the carrying amount of that goodwill. In order to determine the implied estimated fair value, a full purchase price allocation was performed in the same manner as if a business combination had occurred. As part of the Step Two analysis, Regions estimated the fair value of all of the assets and liabilities of the reporting unit, including unrecognized assets and liabilities. The fair values of certain material financial assets and liabilities and the valuation methodologies are discussed in Note 11 Fair Value Measurements. Based on the results of the Step Two analysis performed, Regions concluded the Banking/Treasury reporting unit s goodwill was not impaired for the June 30, 2011 interim period.

NOTE 6 Stockholders Equity and Comprehensive Income (Loss)

On November 14, 2008, Regions completed the sale of 3.5 million shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series A, to the U.S. Treasury as part of the Capital Purchase Program (CPP). Regions will pay the U.S. Treasury on a quarterly basis a 5 percent dividend, or $175 million annually, for each of the first five years of the investment, and 9 percent thereafter unless Regions redeems the shares. As part of its purchase of the preferred securities, the U.S. Treasury also received a warrant to purchase 48.3 million shares of Regions common stock at an exercise price of $10.88 per share, subject to anti-dilution and other adjustments. Regions received $3.5 billion from issuance of the Series A preferred shares and the warrant. The fair value allocation of the $3.5 billion between the preferred shares and the warrant resulted in $3.304 billion allocated to the preferred shares and $196 million allocated to the warrant. Accrued dividends on the preferred shares reduced retained earnings by $87 million during the first six months of 2011 and $88 million during the first six months of 2010. The unamortized discount on the preferred shares was $101 million at June 30, 2011, $120 million at December 31, 2010 and $140 million at June 30, 2010. Discount accretion on the preferred shares reduced retained earnings by $19 million and $17 million during the first six months of 2011 and 2010, respectively. Both the preferred securities and the warrant are accounted for as components of Regions regulatory Tier 1 capital.

On May 20, 2009, the Company issued 287,500 shares of mandatorily convertible preferred stock, Series B (Series B shares), generating net proceeds of approximately $278 million. By June 2010, all Series B shares had been converted to common shares as allowed by their terms. Accrued dividends on the Series B shares reduced retained earnings by $12 million for the first six months of 2010.

Table of Contents

At June 30, 2011, Regions had 23.1 million common shares available for repurchase through open market transactions under an existing share repurchase authorization. There were no treasury stock purchases through open market transactions during the first six months of 2011. The Company s ability to repurchase its common stock is limited by the terms of the CPP mentioned above.

The Board of Directors declared a $0.01 cash dividend for the second quarter of both 2011 and 2010. Regions does not expect to increase its quarterly dividend above $0.01 for the foreseeable future.

Comprehensive income (loss) is the total of net income (loss) and all other non-owner changes in equity. Items are recognized as components of comprehensive income (loss) and are displayed in the consolidated statements of changes in stockholders equity. In the calculation of comprehensive income (loss), certain reclassification adjustments are made to avoid double-counting items that are displayed as part of net income (loss) for a period that also had been displayed as part of other comprehensive income (loss) in that period or earlier periods.

The following disclosure reflects the components of comprehensive income (loss) and any associated reclassification amounts:

	Three Months Ended June 30, 2011		
	Before Tax	Tax Effect	Net of Tax
		(In millions)	
Net income	$ 49	$ 60	$ 109
Net unrealized holding gains and losses on securities available for sale arising during the period	306	(114)	192
Less: reclassification adjustments for net securities gains realized in net income	24	(8)	16
Net change in unrealized gains and losses on securities available for sale	282	(106)	176
Net unrealized holding gains and losses on derivatives arising during the period	90	(35)	55
Less: reclassification adjustments for net gains realized in net income	47	(18)	29
Net change in unrealized gains and losses on derivative instruments	43	(17)	26
Net actuarial gains and losses arising during the period	23	(8)	15
Less: amortization of actuarial loss and prior service credit realized in net income	11	(4)	7
Net change from defined benefit plans	12	(4)	8
Comprehensive income	$ 386	$ (67)	$ 319

Table of Contents

	Three Months Ended June 30, 2010		
	Before Tax	Tax Effect (In millions)	Net of Tax
Net income (loss)	$ (365)	$ 88	$ (277)
Net unrealized holding gains and losses on securities available for sale arising during the period	331	(126)	205
Less: reclassification adjustments for net securities gains realized in net income (loss)			
Net change in unrealized gains and losses on securities available for sale	331	(126)	205

Comprehensive income	$ 239	$ 22	$ 261

	Six Months Ended June 30, 2010		
	Before Tax	Tax Effect (In millions)	Net of Tax
Net income (loss)	$ (722)	$ 249	$ (473)
Net unrealized holding gains and losses on securities available for sale arising during the period	437	(165)	272
Less: reclassification adjustments for net securities gains realized in net income (loss)	59	(21)	38
Net change in unrealized gains and losses on securities available for sale	378	(144)	234
Net unrealized holding gains and losses on derivatives arising during the period	18	(7)	11
Less: reclassification adjustments for net gains realized in net income (loss)	126	(48)	78
Net change in unrealized gains and losses on derivative instruments	(108)	41	(67)
Net actuarial gains and losses arising during the period	39	(16)	23
Less: amortization of actuarial loss and prior service credit realized in net income (loss)	22	(8)	14
Net change from defined benefit plans	17	(8)	9
Comprehensive income (loss)	$ (435)	$ 138	$ (297)

NOTE 7 Earnings (Loss) per Common Share

The following table sets forth the computation of basic earnings (loss) per common share and diluted earnings (loss) per common share:

	Three Months Ended June 30		Six Months Ended June 30	
	2011	2010	2011	2010
	(In millions, except per share amounts)			
Numerator:				
Net income (loss)	$ 109	$ (277)	$ 178	$ (473)
Preferred stock dividends and accretion	(54)	(58)	(106)	(117)
Net income (loss) available to common shareholders	$ 55	$ (335)	$ 72	$ (590)
Denominator:				
Weighted-average common shares outstanding basic	1,258	1,200	1,257	1,197
Potential common shares	2		2	
Weighted-average common shares outstanding diluted	1,260	1,200	1,259	1,197
Earnings (loss) per common share:				
Basic	$ 0.04	$ (0.28)	$ 0.06	$ (0.49)
Diluted	0.04	(0.28)	0.06	(0.49)

The effect from the assumed exercise of 41 million and 42 million stock options for the three months and six months ended June 30, 2011, respectively, was not included in the above computations of diluted earnings per common share because such amounts would have had an antidilutive effect on earnings per common share.

Basic and diluted weighted-average common shares outstanding are the same for the three and six months ended June 30, 2010 due to the net loss.

As discussed in Note 6, common shares were issued in June of 2010 in connection with the conversion of the remaining Series B mandatorily convertible preferred shares, which were originally issued in May 2009.

Table of Contents

Under applicable accounting literature, such shares should be included in the denominator in arriving at diluted earnings per share as if they were issued at the beginning of the reporting period or as of the date issued, if later. Prior to conversion, these shares were not included in the computation above as such amounts would have had an antidilutive effect on earnings (loss) per common share.

NOTE 8 Share-Based Payments

Regions has long-term incentive compensation plans that permit the granting of incentive awards in the form of stock options, restricted stock, restricted stock awards and units, and/or stock appreciation rights. While Regions has the ability to issue stock appreciation rights, none have been issued to date. The terms of all awards issued under these plans are determined by the Compensation Committee of the Board of Directors; however, no awards may be granted after the tenth anniversary from the date the plans were initially approved by shareholders. Options and restricted stock usually vest based on employee service, generally within three years from the date of the grant. The contractual lives of options granted under these plans range from seven to ten years from the date of grant.

On May 13, 2010, the shareholders of the Company approved the Regions Financial Corporation 2010 Long-Term Incentive Plan (2010 LTIP), which permits the Company to grant to employees and directors various forms of incentive compensation. These forms of incentive compensation are similar to the types of compensation approved in prior plans. The 2010 LTIP authorizes 100 million common share equivalents available for grant, where grants of options count as one share equivalent and grants of full value awards (e.g., shares of restricted stock and restricted stock units) count as 2.25 share equivalents. Unless otherwise determined by the Compensation Committee of the Board of Directors, grants of restricted stock and restricted stock units accrue dividends as they are declared by the Board of Directors, and the dividends are paid upon vesting of the award. The 2010 LTIP closed all prior long-term incentive plans to new grants, and, accordingly, prospective grants must be made under the 2010 LTIP or a successor plan. All existing grants under prior long-term incentive plans were unaffected by this amendment. The number of remaining share equivalents available for future issuance under the 2010 LTIP was approximately 84 million at June 30, 2011.

STOCK OPTIONS

During the first six months of 2011, Regions made stock option grants that vest based upon a service condition. The fair value of these stock options was estimated on the date of the grant using a Black-Scholes option pricing model and related assumptions. The stock options vest ratably over a 3-year term.

The following table summarizes the weighted-average assumptions used and the estimated fair values related to stock options granted during the six months ended June 30:

	June 30	
	2011	2010
Expected option life	5.8 yrs.	5.8 yrs.
Expected volatility	75.5%	74.0%
Expected dividend yield	2.3%	2.2%
Risk-free interest rate	1.9%	2.2%
Fair value	$ 3.67	$ 3.86

The following table details the activity during the first six months of 2011 and 2010 related to stock options:

	For the Six Months Ended June 30			
	2011		2010	
	Number of Options	Wtd. Avg. Exercise Price	Number of Options	Wtd. Avg. Exercise Price
Outstanding at beginning of period	54,999,626	$ 24.41	52,968,560	$ 26.34
Granted	1,316,677	6.62	7,173,667	7.00
Exercised	(18,442)	3.29	(24,589)	3.29
Canceled/Forfeited	(6,846,994)	24.10	(3,281,332)	19.85
Outstanding at end of period	49,450,867	$ 23.98	56,836,306	$ 24.29
Exercisable at end of period	42,977,407	$ 26.61	45,905,668	$ 27.77

RESTRICTED STOCK AWARDS

During the first six months of 2011 and 2010, Regions made restricted share grants that vest based upon a service condition. Dividend payments during the vesting period are deferred to the end of the vesting term. The fair value of these restricted shares was estimated based upon the fair value of the underlying shares on the date of the grant. The valuation was not adjusted for the deferral of dividends.

The following table details the activity during the first six months of 2011 and 2010 related to restricted share awards and units:

	For the Six Months Ended June 30			
	2011		2010	
	Number of Shares	Wtd. Avg. Grant Date Fair Value	Number of Shares	Wtd. Avg. Grant Date Fair Value
Non-vested at beginning of period	4,930,444	$ 12.13	5,964,594	$ 17.15
Granted	2,638,545	6.69	1,151,968	6.96
Vested	(1,110,945)	24.42	(844,787)	34.44
Forfeited	(24,384)	19.68	(1,024,271)	16.65
Non-vested at end of period	6,433,660	$ 7.75	5,247,504	$ 12.23

NOTE 9 Pension and Other Postretirement Benefits

Net periodic pension and other postretirement benefits cost included the following components:

NOTE 10 Derivative Financial Instruments and Hedging Activities

Regions enters into derivative financial instruments to manage interest rate risk, facilitate asset/liability management strategies and manage other exposures. These derivative instruments primarily include interest rate swaps, options on interest rate swaps, interest rate caps and floors, Eurodollar futures, forward rate contracts and forward sale commitments. All derivative financial instruments are recognized on the consolidated balance sheets as other assets or other liabilities at fair value. Regions enters into master netting agreements with counterparties and/or requires collateral to cover exposures. In at least some cases, counterparties post at a zero threshold regardless of rating.

Interest rate swaps are agreements to exchange interest payments based upon notional amounts. Interest rate swaps subject Regions to market risk associated with changes in interest rates, as well as the credit risk that the counterparty will fail to perform. Option contracts involve rights to buy or sell financial instruments on a specified date or over a period at a specified price. These rights do not have to be exercised. Some option contracts such as interest rate floors, involve the exchange of cash based on changes in specified indices. Interest rate floors are contracts to hedge interest rate declines based on a notional amount. Interest rate floors subject Regions to market risk associated with changes in interest rates, as well as the credit risk that the counterparty will fail to perform. Forward rate contracts are commitments to buy or sell financial instruments at a future date at a specified price or yield. Regions primarily enters into forward rate contracts on market instruments, which expose Regions to market risk associated with changes in the value of the underlying financial instrument, as well as the credit risk that the counterparty will fail to perform. Eurodollar futures are futures contracts on Eurodollar deposits. Eurodollar futures subject Regions to market risk associated with changes in interest rates. Because futures contracts are cash settled daily, there is minimal credit risk associated with Eurodollar futures.

Table of Contents

The following tables present the notional and fair value of derivative instruments on a gross basis:

June 30, 2011

		Asset Derivatives		Liability Derivatives

Table of Contents

HEDGING DERIVATIVES

Regions enters into interest rate swap agreements to manage overall cash flow changes related to interest rate risk exposure on LIBOR-based loans. The agreements effectively modify the Company s exposure to interest rate risk by utilizing receive fixed/pay LIBOR interest rate swaps.

Regions issues long-term fixed-rate debt for various funding needs. Regions enters into receive LIBOR/pay-fixed forward starting swaps to hedge risks of changes in the projected quarterly interest payments attributable to changes in the benchmark interest rate (LIBOR) during the time leading up to the probable issuance date of the new long term fixed-rate debt.

Regions enters into interest rate option contracts to protect cash flows through the maturity date of the hedging instrument on designated one-month LIBOR floating-rate loans from adverse extreme market interest rate changes. Regions purchases Eurodollar futures to hedge the variability in future cash flows based on forecasted resets of one-month LIBOR-based floating rate loans due to changes in the benchmark interest rate. Regions realized an after-tax expense of $31 million and an after-tax benefit of $17 million in accumulated other comprehensive income at June 30, 2011 and 2010, respectively, related to terminated cash flow hedges of loan and debt instruments which will be amortized into earnings in conjunction with the recognition of interest payments through 2017. Regions recognized pre-tax income of $16 million and $4 million during the three months ended June 30, 2011 and 2010, respectively, and $25 million and $13 million during the six months ended June 30, 2011 and 2010, respectively, related to the amortization of cash flow hedges of loan and debt instruments.

Regions expects to reclassify out of other comprehensive income and into earnings approximately $96 million in pre-tax income due to the receipt or payment of interest payments on all cash flow hedges within the next twelve months. Of this amount, $15 million relates to the amortization of discontinued cash flow hedges. The maximum length of time over which Regions is hedging its exposure to the variability in future cash flows for forecasted transactions is approximately six years as of June 30, 2011. The following tables present the effect of derivative instruments on the statements of operations for the periods indicated:

DERIVATIVES NOT DESIGNATED AS HEDGES

The Company maintains a derivatives trading portfolio of interest rate swaps, option contracts, and futures and forward commitments used to meet the needs of its customers. The portfolio is used to generate trading profit and to help clients manage market risk. The Company is subject to the credit risk that a counterparty will fail to perform. The Company is also subject to market risk, which is evaluated by the Company and monitored by the asset/liability management function. Separate derivative contracts are entered into to reduce overall market exposure to pre-defined limits. The contracts in this portfolio do not qualify for hedge accounting and are marked-to-market through earnings and included in other assets and other liabilities.

In the normal course of business, Morgan Keegan enters into underwriting and forward and future commitments on U.S. Government and municipal securities. As of June 30, 2011 and 2010, the total notional amount related to forward and future commitments was approximately $1.1 billion and $477 million, respectively. The brokerage subsidiary typically settles its position by entering into equal but opposite contracts and, as such, the contract amounts do not necessarily represent future cash requirements. Settlement of the transactions relating to such commitments is not expected to have a material effect on the subsidiary s financial position. Transactions involving future settlement give rise to market risk, which represents the potential loss that can be caused by a change in the market value of a particular financial instrument. The exposure to market risk is determined by a number of factors, including size, composition and diversification of positions held, the absolute and relative levels of interest rates, and market volatility.

Regions enters into interest rate lock commitments, which are commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding and the customers have locked into that interest rate. At June 30, 2011 and 2010, Regions had $488 million and $720 million, respectively, in total notional amount of interest rate lock commitments. Regions manages market risk on interest rate lock commitments and mortgage loans held for sale with corresponding forward sale commitments, which are recorded at fair value with changes in fair value recorded in mortgage income. As of June 30, 2011 and 2010, Regions had $1.0 billion and $1.3 billion, respectively, in total absolute notional amount related to these forward rate commitments.

The following tables present the location and amount of gain or (loss) recognized in income on derivatives not designated as hedging instruments in the statement of operations for the three and six months ended June 30, 2011 and 2010, respectively:

Derivatives Not Designated as Hedging Instruments	Three Months Ended June 30 2011	Three Months Ended June 30 2010	Six Months Ended June 30 2011	Six Months Ended June 30 2010
	(In millions)

Interest rate futures and forward commitments	16	59	18	83
Total mortgage income	32	57	1	63
	$ 37	$ 64	$ 12	$ 62

Credit risk, defined as all positive exposures not collateralized with cash or other assets, at June 30, 2011 and 2010, totaled approximately $772 million and $1.2 billion, respectively. This amount represents the net credit risk on all trading and other derivative positions held by Regions.

CREDIT DERIVATIVES

Regions has both bought and sold credit protection in the form of participations on interest rate swaps (swap participations). These swap participations, which meet the definition of credit derivatives, were entered into in the ordinary course of business to serve the credit needs of customers. Credit derivatives, whereby Regions has purchased credit protection, entitle Regions to receive a payment from the counterparty when the customer fails to make payment on any amounts due to Regions upon early termination of the swap transaction and have maturities between 2012 and 2026. Credit derivatives whereby Regions has sold credit protection have maturities between 2011 and 2016. For contracts where Regions sold credit protection, Regions would be required to make payment to the counterparty when the customer fails to make payment on any amounts due to the counterparty upon early termination of the swap transaction. Regions bases the current status of the prepayment/performance risk on bought and sold credit derivatives on recently issued internal risk ratings consistent with the risk management practices of unfunded commitments.

Regions maximum potential amount of future payments under these contracts is approximately $34 million. This scenario would only occur if variable interest rates were at zero percent and all counterparties defaulted with zero recovery. The fair value of sold protection at June 30, 2011 and 2010 was immaterial. In transactions where Regions has sold credit protection, recourse to collateral associated with the original swap transaction is available to offset some or all of Regions obligation.

CONTINGENT FEATURES

Certain of Regions derivative instrument contracts with broker-dealers contain provisions allowing those broker-dealers to terminate the contracts in the event that Regions and/or Regions Bank s credit ratings falls below specified ratings from certain major credit rating agencies. At June 30, 2011, Moody s and S&P s credit ratings for Regions Financial Corporation were below investment grade. For Regions Bank, Moody s credit ratings were

below investment grade. Regions Financial Corporation and Regions Bank remain on a credit watch with negative implications from Moody s. As a result of these downgrades, certain of Regions Bank s broker-dealer counterparties could have terminated these contracts at their discretion. In lieu of terminating the contracts, Regions Bank and certain of its broker-dealer counterparties amended the contracts such that Regions Bank was required to post additional collateral in the cumulative amount of $208 million to these counterparties.

Some of these contracts with broker-dealers still contain credit-related termination provisions and/or credit-related provisions regarding the posting of collateral. At June 30, 2011, the net fair value of such contracts containing credit-related termination provisions that were in a liability position was $372 million, for which Regions had posted collateral of $530 million. At June 30, 2011, the net fair value of contracts that do not contain credit-related termination provisions that were in a liability position was $237 million for which Regions had posted collateral of $238 million. Other derivative contracts with broker-dealers do not contain any credit-related provisions. These counterparties require complete overnight collateralization.

The aggregate fair value of all derivative instruments with any credit-risk-related contingent features that are in a liability position on June 30, 2011 and December 31, 2010, was $441 million and $508 million, respectively, for which Regions had posted collateral of $600 million and $652 million, respectively, in the normal course of business.

NOTE 11 Fair Value Measurements

Fair value guidance establishes a framework for using fair value to measure assets and liabilities and defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) as opposed to the price that would be paid to acquire the asset or received to assume the liability (an entry price). A fair value measure should reflect the assumptions that market participants would use in pricing the asset or liability, including the assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset and the risk of nonperformance. Required disclosures include stratification of balance sheet amounts measured at fair value based on inputs the Company uses to derive fair value measurements. These strata include:

- Level 1 valuations, where the valuation is based on quoted market prices for identical assets or liabilities traded in active markets (which include exchanges and over-the-counter markets with sufficient volume),

- Level 2 valuations, where the valuation is based on quoted market prices for similar instruments traded in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market, and

- Level 3 valuations, where the valuation is generated from model-based techniques that use significant assumptions not observable in the market, but observable based on Company-specific data. These unobservable assumptions reflect the Company s own estimates for assumptions that market participants would use in pricing the asset or liability. Valuation techniques typically include option pricing models, discounted cash flow models and similar techniques, but may also include the use of market prices of assets or liabilities that are not directly comparable to the subject asset or liability.

ITEMS MEASURED AT FAIR VALUE ON A RECURRING BASIS

Trading account assets, securities available for sale, mortgage loans held for sale, mortgage servicing rights, derivative assets, trading account liabilities and derivative liabilities were recorded at fair value on a recurring basis during 2011 and 2010. Below is a description of valuation methodologies for these assets and liabilities.

Trading account assets and liabilities and securities available for sale consist of U.S. Treasuries, obligations of states and political subdivisions, mortgage-backed securities (including agency securities), other securities and equity securities.

- U.S. Treasuries are valued based on quoted market prices of identical assets on active exchanges (Level 1 measurements as described above) and also using data from third-party pricing services for

similar securities as applicable. Pricing from these third party services is generally based on quoted market prices of similar instruments (including matrix pricing); these valuations are Level 2 measurements.

Mortgage-backed securities are valued primarily using data from third-party pricing services for similar securities as applicable. Pricing from these third party services is generally based on quoted market prices of similar instruments (including matrix pricing); these valuations are Level 2 measurements. Where such comparable data is not available, the Company develops valuations based on assumptions that are not readily observable in the market place; these valuations are Level 3 measurements.

Obligations of states and political subdivisions are generally based on data from third party pricing services for similar securities (Level 2 measurements as described above). Where such comparable data is not available, the Company develops valuations based on assumptions that are not readily observable in the market place; these valuations are Level 3 measurements. For example, auction-rate securities fall into this category. For these instruments, internal pricing models assume converting the securities into fixed-rate debt securities with similar credit ratings and maturity dates based on management s estimates of the term of the securities. Assumed terms generally fall within a range of one to four years.

Other securities are valued based on Level 1, 2 and 3 measurements, depending on pricing methodology selected.

Equity securities are valued based on quoted market prices of identical assets on active exchanges; these valuations are Level 1 measurements.

The majority of Regions trading account assets and liabilities and securities available for sale are valued using third-party pricing services. To validate pricing related to investment securities held in the trading account assets and liabilities portfolios, pricing received from third-party pricing services is compared to available market data for reasonableness and/or pricing information from other third-party pricing services. Insignificant pricing adjustments may be made by traders to individual securities based upon the trader s opinion of value. When such adjustments are made, Regions classifies the measurement as a Level 3 measurement.

To validate pricing related to liquid investment securities, which represent the vast majority of the available for sale portfolio (e.g. mortgage-backed securities), Regions compares price changes received from the pricing service to overall changes in market factors in order to validate the pricing received. To validate pricing received on less liquid investment securities in the available for sale portfolio, Regions receives pricing from third-party brokers/dealers on a sample of securities that are then compared to the pricing received.

Mortgage loans held for sale consist of residential first mortgage loans held for sale that are valued based on traded market prices of similar assets where available and/or discounted cash flows at market interest rates, adjusted for securitization activities that include servicing value and market conditions, a Level 2 measurement. Regions has elected to measure mortgage loans held for sale at fair value by applying the fair value option (see additional discussion under the Fair Value Option section below).

Mortgage servicing rights consist of residential mortgage servicing rights and are valued using an option-adjusted spread valuation approach, a Level 3 measurement. See Note 4 for information regarding the servicing of financial assets and additional details regarding the assumptions relevant to this valuation.

Derivative assets and liabilities, which primarily consist of interest rate contracts that include futures, options and swaps, are included in other assets and other liabilities (as applicable) on the consolidated balance sheets. Interest rate swaps are predominantly traded in over-the-counter markets and, as such, values are determined using widely accepted discounted cash flow models, or Level 2 measurements. These discounted cash flow models use projections of future cash payments/receipts that are discounted at mid-market rates. The assumed cash flows are sourced from an assumed yield curve, which is consistent with industry standards and conventions. These valuations are adjusted for the unsecured credit risk at the reporting date, which considers

Table of Contents

collateral posted and the impact of master netting agreements. For options and futures contracts traded in over-the-counter markets, values are determined using discounted cash flow analyses and option pricing models based on market rates and volatilities, or Level 2 measurements. Interest rate lock commitments on loans intended for sale, treasury locks and credit derivatives are valued using option pricing models that incorporate significant unobservable inputs, and therefore are Level 3 measurements.

Regions rarely transfers assets and liabilities measured at fair value between Level 1 and Level 2 measurements. There were no such transfers during the periods ended June 30, 2011 and 2010. Trading account assets are periodically transferred to or from Level 3 valuation based on management s conclusion regarding the best method of pricing for an individual security. Such transfers are accounted for as if they occur at the beginning of a reporting period.

Table of Contents

The following tables present assets and liabilities measured at fair value on a recurring basis as of June 30, 2011 and December 31, 2010:

	June 30, 2011				December 31, 2010

(1) Excludes Federal Reserve Bank and Federal Home Loan Bank Stock totaling $460 million and $340 million, respectively, at June 30, 2011 and $471 million and $419 million, respectively, at December 31, 2010.

(2) At June 30, 2011, derivatives include approximately $1.0 billion related to legally enforceable master netting agreements that allow the Company to settle positive and negative positions. Derivatives, net are also presented excluding cash collateral received of $52 million and cash collateral posted of $797 million with counterparties. At December 31, 2010, derivatives include approximately $1.0 billion related to legally

Table of Contents

enforceable master netting agreements that allow the Company to settle positive and negative positions. Derivatives, net are also presented excluding cash collateral received of $11 million and cash collateral posted of $810 million with counterparties.

Assets and liabilities in all levels could result in volatile and material price fluctuations. Realized and unrealized gains and losses on Level 3 assets represent only a portion of the risk to market fluctuations in Regions consolidated balance sheets. Further, net trading account assets and net derivatives included in Levels 1, 2 and 3 are used by the Asset and Liability Management Committee of the Company in a holistic approach to managing price fluctuation risks.

The following tables illustrate a rollforward for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three and six months ended June 30, 2011 and 2010, respectively. The tables do not reflect the change in fair value attributable to any related economic hedges the Company used to mitigate the interest rate risk associated with these assets and (liabilities).

ITEMS MEASURED AT FAIR VALUE ON A NON-RECURRING BASIS

From time to time, certain assets may be recorded at fair value on a non-recurring basis. These non-recurring fair value adjustments typically are a result of the application of lower of cost or fair value accounting or a write-down occurring during the period. For example, if the fair value of an asset in these categories falls below its cost basis, it is considered to be at fair value at the end of the period of the adjustment. In periods where there is no adjustment, the asset is generally not considered to be at fair value. The following is a description of the valuation methodologies used for certain assets that are recorded at fair value.

Foreclosed property and other real estate is carried in other assets at the lower of the recorded investment in the loan or fair value less estimated costs to sell the property. The fair value for foreclosed property that is based on either observable transactions of similar instruments or formally committed sale prices is classified as a Level 2 measurement. If no formally committed sale price is available, a professional valuation is obtained. Updated valuations are obtained on at least an annual basis. Foreclosed property exceeding established dollar thresholds are valued based on appraisals. Appraisals are performed by third parties with appropriate professional certifications and conform to generally accepted appraisal standards as evidenced by the Uniform Standards of Professional Appraisal Practice (USPAP). Regions policies related to appraisals conform to regulations established by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) and other regulatory guidance. Professional valuations are considered Level 2 measurements because they are based largely on observable inputs. Regions

has a centralized appraisal review function that is responsible for reviewing all appraisals for compliance with banking regulations and guidelines as well as appraisal standards. Based on these reviews, Regions may make adjustments to the market value conclusions determined in the appraisals of real estate (either as other real estate or loans held for sale) when our appraisal review function determines that the valuation is based on inappropriate

assumptions or where the conclusion is not sufficiently supported by the market data presented in the appraisal. In either event adjustments, if made, must be based on sufficient information available to support an alternate opinion of market value. Internally adjusted valuations are considered Level 3 measurements as management uses assumptions that may not be observable in the market.

Loans held for sale for which the fair value option has not been elected are recorded at the lower of cost or fair value and therefore are reported at fair value on a non-recurring basis. The fair values for loans held for sale that are based on formally committed loan sale prices or valuations performed using observable inputs are classified as a Level 2 measurement. If no formally committed sales price is available, a professional valuation is obtained, consistent with the process described above for foreclosed property and other real estate. Alternatively, management may base the estimate of fair value on knowledge of pricing that the note sale market will bear, considering sales of similar properties and experience with the potential buyer. Such estimates are considered Level 3 measurements.

The following tables present the carrying value of those assets measured at fair value on a non-recurring basis as of June 30, 2011 and 2010, as well as the corresponding fair value adjustments.

	June 30, 2011				Fair value adjustments for the three months ended June 30, 2011
	Level 1	Level 2	Level 3	Total	
		(In millions)			
Loans held for sale	$	$ 351	$ 10	$ 361	$ (198)

	June 30, 2010				Fair value adjustments for the three months ended June 30, 2010
	Level 1	Level 2	Level 3	Total	
		(In millions)			
Loans held for sale	$	$ 127	$	$ 127	$ (5)
Foreclosed property and other real estate		265		265	(55)

FAIR VALUE OPTION

Regions elected the fair value option for FNMA and FHLMC eligible thirty-year residential mortgage loans held for sale originated on or after January 1, 2008. Additionally, Regions elected the fair value option for FNMA and FHLMC eligible fifteen-year residential mortgage loans originated on or after November 22, 2010. These elections allow for a more effective offset of the changes in fair values of the loans and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting. Regions has not elected the fair value option for other loans held for sale primarily because they are not economically hedged using derivative instruments. Fair values of mortgage loans held for sale are based on traded market prices of similar assets where available and/or discounted cash flows at market interest rates, adjusted for securitization activities that include servicing values and market conditions, and were recorded in loans held for sale in the consolidated balance sheets.

The following table summarizes the difference between the aggregate fair value and the aggregate unpaid principal balance for mortgage loans held for sale measured at fair value:

	June 30, 2011			December 31, 2010		
	Aggregate Fair Value	Aggregate Unpaid Principal	Aggregate Fair Value Less Aggregate Unpaid Principal	Aggregate Fair Value	Aggregate Unpaid Principal	Aggregate Fair Value Less Aggregate Unpaid Principal
			(In millions)			
Mortgage loans held for sale, at fair value	$ 585	$ 569	$ 16	$ 1,174	$ 1,181	$ (7)

46

Table of Contents

Interest income on mortgage loans held for sale is recognized based on contractual rates and is reflected in interest income on loans held for sale in the consolidated statements of operations. The following table details net gains (losses) resulting from changes in fair value of these loans which were recorded in mortgage income in the consolidated statements of operations during the three and six months ended June 30, 2011 and 2010, respectively. These changes in fair value are mostly offset by economic hedging activities. An immaterial portion of these amounts was attributable to changes in instrument-specific credit risk.

	Mortgage loans held for sale, at fair value			
	Three Months Ended June 30		Six Months Ended June 30	
	2011	2010	2011	2010
	(In millions)			
Net gains resulting from changes in fair value	$ 5	$ 24	$ 23	$ 27

FAIR VALUE OF FINANCIAL INSTRUMENTS

The methods and assumptions used by the Company in estimating fair values of financial instruments are disclosed in Regions Form 10-K for the year ended December 31, 2010. The carrying amounts and estimated fair values of the Company s financial instruments as of June 30, 2011 and December 31, 2010 are as follows:

	June 30, 2011		December 31, 2010	
	Carrying Amount	Estimated Fair Value (1)	Carrying Amount	Estimated Fair Value (1)
	(In millions)			
Financial assets:				
Cash and cash equivalents	$ 7,974	$ 7,974	$ 6,919	$ 6,919
Trading account assets	1,223	1,223	1,116	1,116
Securities available for sale	23,828	23,828	23,289	23,289
Securities held to maturity	21	21	24	26
Loans held for sale	1,141	1,141	1,485	1,485
Loans (excluding leases), net of unearned income and allowance for loan losses (2), (3)	76,378	68,224	77,864	69,775
Other interest-earning assets	1,207	1,207	1,219	1,219
Derivatives, net	167	167	140	140
Financial liabilities:				
Deposits	96,331	96,544	94,614	94,883
Short-term borrowings	2,722	2,722	3,937	3,937
Long-term borrowings	11,646	11,792	13,190	13,115
Loan commitments and letters of credit	127	889	125	899

(1) Estimated fair values are consistent with an exit price concept. The assumptions used to estimate the fair values are intended to approximate those that a market participant would use in a hypothetical orderly transaction. In estimating fair value, the Company makes adjustments for interest rates, market liquidity and credit spreads as appropriate.

(2) The estimated fair value of portfolio loans assumes sale of the loans to a third-party financial investor. Accordingly, the value to the Company if the loans were held to maturity is not reflected in the fair value estimate. In the current whole loan market, financial investors are generally requiring a higher rate of return than the return inherent in loans if held to maturity. The fair value discount at June 30, 2011 was $8.2 billion or 10.7%.

(3) Excluded from this table is the lease carrying amount of $1.7 billion at June 30, 2011 and $1.8 billion at December 31, 2010.

Table of Contents

NOTE 12 Business Segment Information

Regions segment information is presented based on Regions key segments of business. Each segment is a strategic business unit that serves specific needs of Regions customers. The Company s primary segment is Banking/Treasury, which represents the Company s branch network, including consumer and commercial banking functions, and has separate management that is responsible for the operation of that business unit. This segment also includes the Company s Treasury function, including the Company s securities portfolio and other wholesale funding activities.

In addition to Banking/Treasury, Regions has designated as distinct reportable segments the activity of its Investment Banking/Brokerage/Trust and Insurance divisions. Investment Banking/Brokerage/Trust includes trust activities and all brokerage and investment activities associated with Morgan Keegan. Insurance includes all business associated with commercial insurance and credit life products sold to consumer customers.

During the third quarter of 2010 and again in the first quarter of 2011, minor reclassifications were made from the Banking/Treasury segment to the Insurance segment to more appropriately present management s current view of the segments. The amounts related to the three months and six months ended June 30, 2010 below have been adjusted to conform to the 2011 presentation.

The following tables present financial information for each reportable segment for the period indicated.

Three months ended June 30, 2011	**Banking/ Treasury**	**Investment Banking/ Brokerage/ Trust**	**Insurance**	**Total Company**

NOTE 13 Commitments and Contingencies

COMMERCIAL COMMITMENTS

Regions issues off-balance sheet financial instruments in connection with lending activities. The credit risk associated with these instruments is essentially the same as that involved in extending loans to customers and is subject to Regions normal credit approval policies and procedures. Regions measures inherent risk associated with these instruments by recording a reserve for unfunded commitments based on an assessment of the likelihood that the guarantee will be funded and the creditworthiness of the customer or counterparty. Collateral is obtained based on management s assessment of the creditworthiness of the customer.

Credit risk associated with these instruments is represented by the contractual amounts indicated in the following table:

	June 30 2011	December 31 2010	June 30 2010
		(In millions)	
Unused commitments to extend credit	$ 35,618	$ 30,828	$ 32,158
Standby letters of credit	2,656	3,014	4,548
Commercial letters of credit	47	49	34
Liabilities associated with standby letters of credit	42	54	95
Assets associated with standby letters of credit	40	51	93
Reserve for unfunded credit commitments	84	71	71

Unused commitments to extend credit To accommodate the financial needs of its customers, Regions makes commitments under various terms to lend funds to consumers, businesses and other entities. These commitments include (among others) credit card and other revolving credit agreements, term loan commitments and short-term borrowing agreements. Many of these loan commitments have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of these commitments are expected to expire without being funded, the total commitment amounts do not necessarily represent future liquidity requirements.

Standby letters of credit Standby letters of credit are also issued to customers which commit Regions to make payments on behalf of customers if certain specified future events occur. Regions has recourse against the customer for any amount required to be paid to a third party under a standby letter of credit. Historically, a large percentage of standby letters of credit expired without being funded. The contractual amount of standby letters of credit represents the maximum potential amount of future payments Regions could be required to make and represents Regions maximum credit risk.

Commercial letters of credit Commercial letters of credit are issued to facilitate foreign or domestic trade transactions for customers. As a general rule, drafts will be drawn when the goods underlying the transaction are in transit.

LEGAL

Regions and its affiliates are subject to loss contingencies related to litigation and claims arising in the ordinary course of business. Regions evaluates these contingencies based on information currently available, including advice of counsel and assessment of available insurance coverage. Regions establishes accruals for litigation and claims when a loss contingency is considered probable and the related amount is reasonably estimable. Any accruals are periodically reviewed and may be adjusted as circumstances change. For certain matters, when able to do so, Regions also estimates loss contingencies for possible litigation and claims, whether or not there is an accrued probable loss. Where Regions is able to estimate such possible losses, Regions estimates that it is reasonably possible it could incur losses, in excess of amounts accrued, in an aggregate amount up to approximately $300 million as of June 30, 2011, with it also being reasonably possible that Regions could incur no losses. The estimates included in this amount are based on analysis of currently available information and are subject to significant judgment and to change as new information becomes available. Due to the inherent unpredictability of outcomes of litigation and claims, any amounts accrued or included in this aggregate amount may not represent the ultimate loss to Regions and, therefore, ultimate losses may be significantly different than the amounts accrued or included in this aggregate amount.

Assessments of litigation and claims exposures are difficult due to many factors that involve inherent unpredictability. Those factors include the following: the varying stages of the proceedings, particularly in the early stages; unspecified damages; damages other than compensatory such as punitive damages; multiple defendants and jurisdictions; whether discovery has begun or not; and whether the claim involves a class-action. There are numerous factors that result in a greater degree of complexity in class-action lawsuits as compared to other types of litigation. Due to the many intricacies involved in class-action lawsuits at the early stages of these matters, obtaining clarity on a reasonable estimate is difficult which may call into question its reliability. As a result of some of these factors, Regions may be unable to estimate reasonably possible losses with respect to some of the matters disclosed below. The aggregated estimated amount provided above therefore may not include an estimate for every matter disclosed below.

While the final outcome of litigation and claims exposures is inherently unpredictable, management is currently of the opinion that the outcome of pending and threatened litigation would not have a material effect on Regions business, consolidated financial position, results of operations or cash flows as a whole. However, in the event of unexpected future developments, it is reasonably possible that an adverse outcome in any of the matters discussed below could be material to Regions business, consolidated financial position, results of operations or cash flows for any particular reporting period of occurrence.

Beginning in December 2007, Regions and certain of its affiliates have been named in class-action lawsuits filed in federal and state courts on behalf of investors who purchased shares of certain Regions Morgan Keegan Select Funds (the Funds) and shareholders of Regions. The Funds were formerly managed by Morgan Asset Management, Inc. (Morgan Asset Management). Morgan Asset Management no longer manages these Funds, which were transferred to Hyperion Brookfield Asset Management in 2008. Certain of the Funds have since been terminated by Hyperion. The complaints contain various allegations, including claims that the Funds and the

defendants misrepresented or failed to disclose material facts relating to the activities of the Funds. Plaintiffs have requested equitable relief and unspecified monetary damages. No classes have been certified. Certain of the shareholders in these Funds and other interested parties have entered into arbitration proceedings and individual civil claims, in lieu of participating in the class actions.

On April 7, 2010, the Securities and Exchange Commission (SEC), the Financial Industry Regulatory Authority (FINRA) and a joint state task force of state securities regulators announced that they were commencing administrative proceedings against Morgan Keegan and Company, Inc. (Morgan Keegan), Morgan Asset Management and certain of their employees for violations of federal and state securities laws and NASD rules relating to the Funds. The proceedings contain various allegations, including that the net asset values of the Funds were artificially inflated due to allegedly improper conduct related to the valuation of the securities held by the Funds, and that the defendants failed to disclose certain risks associated with the Funds. On June 22, 2011, Regions announced that Morgan Keegan and Morgan Asset Management entered into settlements with the SEC, FINRA and a group of state securities regulators regarding these matters. As part of the settlements, Morgan Keegan and Morgan Asset Management agreed to (i) pay $210 million ($200 million of which will be placed into two Fair Funds for the benefit of investors in the Funds and up to $10 million of which will be paid to participating states as a penalty), (ii) implement certain measures relating to valuation of securities for registered investment companies, (iii) a prohibition against creating, offering or selling a proprietary fund marketed and sold to investors (other than certain institutional and qualified investors) for a period of two years, and (iv) the imposition of certain injunctive relief. The full amount of these settlements had been previously reserved for in anticipation of resolution of these matters. These agreements are Exhibits 10.1 through 10.8 hereto.

On July 21, 2009, the SEC filed a complaint in U.S. District Court for the Northern District of Georgia against Morgan Keegan alleging violations of the federal securities laws in connection with auction rate securities (ARS) that Morgan Keegan underwrote, marketed and sold. The SEC sought an injunction against Morgan Keegan for violations of the antifraud provisions of the federal securities laws, as well as disgorgement, financial penalties and other equitable relief for customers, including repurchase by Morgan Keegan of all ARS that it sold prior to March 20, 2008. Beginning in February 2009, Morgan Keegan commenced a voluntary program to repurchase ARS that it underwrote and sold to the firm s customers, and extended that repurchase program on October 1, 2009 to include ARS that were sold by Morgan Keegan to its customers but were underwritten by other firms. On June 29, 2011, Morgan Keegan announced the final phase of the repurchase program to include ARS issued by Jefferson County, Alabama that were sold by Morgan Keegan to its customers. As of June 30, 2011, customers of Morgan Keegan owned approximately $43 million of Jefferson County ARS and approximately $3 million of other ARS, while Morgan Keegan held approximately $144 million of ARS on its balance sheet. On June 28, 2011, the Court issued a summary judgment in favor of Morgan Keegan in this case. Previously on July 21, 2009, the Alabama Securities Commission issued a Show Cause order to Morgan Keegan arising out of the ARS matter that is the subject of the SEC complaint described above. The order requires Morgan Keegan to show cause why its registration as a broker-dealer should not be suspended or revoked in the State of Alabama and also why it should not be subject to disgorgement, repurchasing all ARS sold to Alabama residents and payment of costs and penalties.

In April 2009, Regions, Regions Financing Trust III (the Trust) and certain of Regions current and former directors, were named in a purported class-action lawsuit filed in the U.S. District Court for the Southern District of New York on behalf of the purchasers of trust preferred securities offered by the Trust. The complaint alleges that defendants made statements in Regions registration statement, prospectus and year-end filings which were materially false and misleading, and seeks equitable relief and unspecified monetary damages. On May 10, 2010, the trial court dismissed all claims against all defendants in this case. The plaintiffs have appealed and the appeal has been argued but not yet decided.

In October 2010, a purported class-action lawsuit was filed by Regions stockholders in the U.S. District Court for the Northern District of Alabama against Regions and certain former officers of Regions. The lawsuit

alleges violations of the federal securities laws, including allegations that statements that were materially false and misleading were included in filings made with the SEC. The plaintiffs have requested equitable relief and unspecified monetary damages. On June 7, 2011, the trial court denied Regions motion to dismiss this lawsuit. This case is still early in its development and no class has been certified.

Regions has received inquiries and subpoenas from government authorities primarily concerning accounting matters from 2009 and earlier periods that also have been the subject of the civil litigation mentioned above. Regions is cooperating in providing responses to these inquiries and subpoenas. In addition, the Board of Directors is conducting investigations regarding certain of the matters raised in these inquiries and subpoenas.

In December 2009 and in November 2010, Regions and certain current and former directors and officers were named in a consolidated shareholder derivative action and in a separate derivative action, both of which were filed in Jefferson County, Alabama. The complaints allege mismanagement, waste of corporate assets, breach of fiduciary duty and unjust enrichment relating to bonuses and other benefits received by executive management. On June 6, 2011, the November 2010 action was dismissed. Plaintiffs in the remaining case have requested equitable relief and unspecified monetary damages.

In September 2009, Regions was named as a defendant in a purported class-action lawsuit filed by customers of Regions Bank in the U.S. District Court for the Northern District of Georgia challenging the manner in which non-sufficient funds (NSF) and overdraft fees were charged and the policies related to posting order. The case was transferred to multidistrict litigation in the U.S. District Court for the Southern District of Florida, and in May 2010 an order to compel arbitration was denied. Regions appealed the denial and on April 29, 2011, the Eleventh Circuit Court of Appeals vacated the denial and remanded the case to the district court for reconsideration of Regions motion to compel arbitration. On April 29, 2011 and July 19, 2011, separate class-actions involving this subject were filed in the U.S. District Courts for the Eastern District of Arkansas and the Middle District of Florida making claims under Arkansas and Florida s Deceptive Trade Practices Acts, breach of contract, unjust enrichment and conversion. Plaintiffs in these cases have requested equitable relief and unspecified monetary damages. No class has been certified.

NOTE 14 Recent Accounting Pronouncements

In January 2011, the FASB issued accounting guidance temporarily deferring the effective date for when public-entity creditors are required to provide new disclosures, which were addressed in previously issued guidance regarding receivables, for troubled debt restructurings (TDRs). The deferred effective date will coincide with the effective date for the clarified guidance about what constitutes a TDR for creditors, which was issued in April 2011 by the FASB. Regions will apply the clarified definition to all loans modified after January 1, 2011, and will begin reporting any newly identified TDRs with September 30, 2011 financial reporting. Any change to the allowance for loan losses arising from a modified loan being newly considered a TDR, and therefore impaired under applicable accounting literature, will be reported in the third quarter of 2011. The guidance also requires new disclosures for TDRs, which will be included with September 30, 2011 financial reporting. Regions is currently in the process of evaluating the impact of the clarified TDR definition on the allowance for loan losses and related disclosures.

For Regions, the focus of the evaluation of the clarified TDR definition is on renewals, forbearances, and short-term loan workout accommodations for criticized commercial and investor real estate loans. Through the first six months of 2011, Regions renewed a substantial number of these types of loans, including approximately $1.0 billion of substandard loans still on accrual status, and is currently evaluating these modifications under the clarified TDR definition. The renewals are a result of Regions business strategy to keep loan maturities short, particularly in the investor real estate segment, in order to maintain leverage in negotiating with customers. Regions often increases or at least maintains the same interest rate, and often receives consideration in exchange for such modifications. Under pre-existing accounting guidance, such modifications were not considered by

Regions to be concessionary, and were not considered TDRs. However, the new clarification places more emphasis on whether the terms of the modified loan are at a market rate. Under the revised definition, a modification is rebuttably considered by Regions to be a concession if the borrower could not access similar financing at market terms, even if the lender concludes that the borrower will ultimately pay all contractual amounts owed. Accordingly, Regions expects reported TDRs to increase as a result of the new clarification. Regions does not expect the overall level of the allowance for loan losses to materially change as a result of the increase in TDRs.

In April 2011, the FASB issued accounting guidance to reconsider effective control for repurchase agreements. The guidance will simplify the accounting for financial assets transferred under repurchase agreements and similar arrangements, and will increase the number of transfers to be accounted for as secured borrowings, as opposed to sales. The amended guidance is effective prospectively for new transfers and existing transactions modified as of the first interim or annual period beginning on or after December 15, 2011. Regions periodically accesses funding markets through sales of securities with agreements to repurchase. Repurchase agreements are also offered through a commercial banking sweep product as a short-term investment opportunity for customers. All such arrangements are considered typical of the banking and brokerage industries and are accounted for as borrowings. Regions is assessing the amended guidance and does not expect a material impact upon adoption.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations
INTRODUCTION

The following discussion and analysis is part of Regions Financial Corporation s (Regions or the Company) Quarterly Report on Form 10-Q to the Securities and Exchange Commission (SEC) and updates Regions Form 10-K for the year ended December 31, 2010, which was previously filed with the SEC. This financial information is presented to aid in understanding Regions financial position and results of operations and should be read together with the financial information contained in the Form 10-K. Certain prior period amounts presented in this discussion and analysis have been reclassified to conform to current period classifications, except as otherwise noted. The emphasis of this discussion will be on the three and six months ended June 30, 2011 compared to the three and six months ended June 30, 2010 for the statement of operations. For the balance sheet, the emphasis of this discussion will be the balances as of June 30, 2011 compared to December 31, 2010.

This discussion and analysis contains statements that may be considered forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. See pages 3 and 4 for additional information regarding forward-looking statements.

CORPORATE PROFILE

Regions is a financial holding company headquartered in Birmingham, Alabama, which operates throughout the South, Midwest and Texas. Regions provides traditional commercial, retail and mortgage banking services, as well as other financial services in the fields of investment banking, asset management, trust, mutual funds, securities brokerage, insurance and other specialty financing.

Regions conducts its banking operations through Regions Bank, an Alabama chartered commercial bank that is a member of the Federal Reserve System. At June 30, 2011, Regions operated 1,769 total branch outlets in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. Regions provides brokerage services and investment banking from 312 offices of Morgan Keegan & Company, Inc. (Morgan Keegan), a full-service regional brokerage and investment banking firm. Regions provides full-line insurance brokerage services primarily through Regions Insurance, Inc.

On June 22, 2011, Regions announced, as part of its ongoing capital planning process, plans to explore strategic alternatives for Morgan Keegan as the Company evaluates how best to manage its capital to increase shareholder value. Morgan Asset Management and Regions Morgan Keegan Trust are not included in this review.

Regions profitability, like that of many other financial institutions, is dependent on its ability to generate revenue from net interest income and non-interest income sources. Net interest income is the difference between the interest income Regions receives on interest-earning assets, such as loans and securities, and the interest expense Regions pays on interest-bearing liabilities, principally deposits and borrowings. Regions net interest income is impacted by the size and mix of its balance sheet components and the interest rate spread between interest earned on its assets and interest paid on its liabilities. Non-interest income includes fees from service charges on deposit accounts, brokerage, investment banking, capital markets, and trust activities, mortgage servicing and secondary marketing, insurance activities, and other customer services which Regions provides. Results of operations are also affected by the provision for loan losses and non-interest expenses, such as salaries and employee benefits, occupancy, professional fees, Federal Deposit Insurance Corporation (FDIC) insurance, other real estate owned and other operating expenses, as well as income taxes.

Economic conditions, competition, new legislation and related rules impacting regulation of the financial services industry, and the monetary and fiscal policies of the Federal government significantly affect most financial institutions, including Regions. Lending and deposit activities and fee income generation are influenced

by levels of business spending and investment, consumer income, consumer spending and savings, capital market activities, and competition among financial institutions, as well as customer preferences, interest rate conditions and prevailing market rates on competing products in Regions market areas.

Regions business strategy has been and continues to be focused on providing a competitive mix of products and services, delivering quality customer service and maintaining a branch distribution network with offices in convenient locations.

SECOND QUARTER HIGHLIGHTS

Regions reported net income available to common shareholders of $55 million, or $0.04 per diluted share in the second quarter of 2011, compared to a net loss available to common shareholders of $335 million, or $0.28 per diluted share in the second quarter of 2010. A decline in the provision for loan losses was the primary driver of the improvement in operations from the prior year period. During the second quarter of 2011, Regions recorded a provision for loan losses that was $253 million lower than the second quarter of 2010, reflecting improving credit trends. Additionally, Regions recorded a $200 million charge during the second quarter of 2010 related to Morgan Keegan regulatory proceedings.

Net charge-offs totaled $548 million, or an annualized 2.71 percent of average loans, in the second quarter of 2011, compared to $651 million, or an annualized 2.99 percent for the second quarter of 2010. Charge-offs were lower across most major categories when comparing the 2011 period to the prior year period, with the exception of investor real estate mortgage. Charge-offs in the investor real estate mortgage portfolio segment were higher due to the transfer of $545 million of classified loans to held for sale.

The provision for loan losses totaled $398 million in the second quarter of 2011 compared to $651 million during the second quarter of 2010. Charge-offs exceeded provision for loan losses for the current quarter, primarily resulting from the allowance associated with loans transferred to held for sale referred to above. Credit metrics, including non-accrual, criticized and classified loan balances, and delinquencies, showed continued improving trends.

The allowance for loan losses at June 30, 2011 was 3.84 percent of total loans, net of unearned income, which was flat relative to December 31, 2010 and compared to 3.71 percent at June 30, 2010. Total non-performing assets were $3.6 billion at June 30, 2011, compared to $3.9 million at December 31, 2010 and $4.3 billion at June 30, 2010.

For the second quarter of 2011, net interest income (taxable-equivalent basis) totaled $872 million compared to $863 million in the second quarter of 2010. The net interest margin (taxable-equivalent basis) was 3.05 percent in the first quarter of 2011, compared to 2.87 percent during the second quarter of 2010. Overall declines in loan balances and earning assets were more than offset by continued improvements in deposit costs, which were 53 basis points for the second quarter of 2011, as compared to 79 basis points for the second quarter of 2010.

Non-interest income for the second quarter of 2011 was $781 million, an increase of $25 million compared to the second quarter of 2010, driven primarily by securities gains. Total non-interest expense was $1.2 billion in the second quarter of 2011, a $128 million decrease from the second quarter of 2010. The decrease was driven by a $200 million accrual related to Morgan Keegan regulatory matters in the second quarter of 2010. The decrease was offset by $77 million in branch consolidation and property and equipment charges recorded in the second quarter of 2011, necessitated primarily by Regions decision to exit approximately 40 branches.

During the second quarter of 2011, Morgan Keegan agreed to a settlement with the Securities and Exchange Commission, the Financial Industry Regulatory Authority, and a group of state securities regulators related to the regulatory matters referred to above. A complete description of the regulatory matters and the settlement is

included in Note 13 to the consolidated financial statements. Upon finalization, Regions determined that a portion of the settlement will be deductible for income tax purposes, resulting in a $44 million income tax benefit during the second quarter of 2011.

During the second quarter of 2011, Regions completed the purchase of approximately 500,000 existing Regions-branded consumer credit card accounts and approximately 40,000 business credit card accounts from FIA Card Services. The total portfolio purchased was approximately $1.2 billion.

TOTAL ASSETS

Regions total assets at June 30, 2011 were $130.9 billion, compared to $132.4 billion at December 31, 2010. The decrease in total assets from year-end 2010 resulted primarily from decreases in the loan portfolio, primarily a product of strategic decisions to reduce the concentration in investor real estate loans. A decrease in other assets, primarily driven by settlements of securities sales, also drove the overall decrease in assets. These decreases were partially offset by increases in cash and due from banks, interest-bearing deposits in other banks, and securities available for sale.

LOANS

At June 30, 2011, loans represented 71 percent of Regions interest-earning assets compared to 72 percent at December 31, 2010. The following table presents the distribution by loan segment and class of Regions loan portfolio, net of unearned income:

Table 1 Loan Portfolio

	June 30 2011	December 31 2010	June 30 2010
	(In millions, net of unearned income)		
Commercial and industrial	$ 23,644	$ 22,540	$ 21,096
Commercial real estate mortgage owner occupied	11,797	12,046	11,967
Commercial real estate construction owner occupied	377	470	547
Total commercial	35,818	35,056	33,610
Commercial investor real estate mortgage	11,836	13,621	15,152
Commercial investor real estate construction	1,595	2,287	3,778
Total investor real estate	13,431	15,908	18,930
Residential first mortgage	14,306	14,898	15,567
Home equity	13,593	14,226	14,802
Indirect	1,704	1,592	1,900
Consumer credit card	1,134		
Other consumer	1,190	1,184	1,136
Total consumer	31,927	31,900	33,405
	$ 81,176	$ 82,864	$ 85,945

Loans, net of unearned income, totaled $81.2 billion at June 30, 2011, a decrease of $1.7 billion from year-end 2010 levels. Strategic decisions to reduce the concentration in investor real estate and, to a lesser extent, sales of residential mortgage loans were the primary contributors to the decrease. The decrease was partially offset by an increase in commercial and industrial loans and the purchase of approximately $1.2 billion in credit card loans.

Commercial The commercial category includes commercial and industrial, representing loans to commercial customers for use in normal business operations to finance working capital needs, equipment purchases and other expansion projects. Commercial also includes owner-occupied commercial real estate loans to operating businesses, which are loans for long-term financing of land and buildings, and are repaid by cash

flow generated by business operations. Owner-occupied construction loans are made to commercial businesses for the development of land or construction of a building where the repayment is derived from revenues generated from the business of the borrower.

Investor Real Estate Loans for real estate development are repaid through cash flow related to the operation, sale or refinance of the property. This portfolio segment includes extensions of credit to real estate developers or investors where repayment is dependent on the sale of real estate or income generated from the real estate collateral. A portion of Regions investor real estate portfolio segment is comprised of loans secured by residential product types (land, single-family and condominium loans) within Regions markets. Additionally, this category includes loans made to finance income-producing properties such as apartment buildings, office and industrial buildings, and retail shopping centers.

Residential First Mortgage Residential first mortgage loans represent loans to consumers to finance a residence. These loans are typically financed over a 15 to 30 year term and, in most cases, are extended to borrowers to finance their primary residence.

Home Equity Home equity lending includes both home equity loans and lines of credit. This type of lending, which is secured by a first or second mortgage on the borrower s residence, allows customers to borrow against the equity in their home. Substantially all of this portfolio was originated through Regions branch network.

Indirect Indirect lending, which is lending initiated through third-party business partners, is largely comprised of loans made through automotive dealerships. Beginning in late 2010, the Company re-entered the indirect auto lending business.

Consumer Credit Card During the second quarter of 2011, Regions completed the purchase of approximately 500,000 existing Regions-branded consumer credit card accounts from FIA Card Services. The products are primarily open-ended variable interest rate consumer credit card loans.

Other Consumer Other consumer loans include direct consumer installment loans, overdrafts and other revolving credit, and educational loans.

CREDIT QUALITY

Weak economic conditions, including declining property values and high levels of unemployment, impacted the credit quality of Regions loan portfolio. Investor real estate loans and home equity products (particularly Florida second lien see Table 4) carry a higher risk of non-collection than other loans.

The following chart presents details of Regions $13.4 billion investor real estate portfolio as of June 30, 2011 (dollars in billions):

LAND, SINGLE-FAMILY AND CONDOMINIUM

Credit quality of the investor real estate portfolio is sensitive to risks associated with construction loans such as cost overruns, project completion risk, general contractor credit risk, environmental and other hazard risks, and market risks associated with the sale or rental of completed properties. Certain components of the investor real estate portfolio segment carry a higher risk of non-collection. While losses within these loan types were influenced by conditions described above, the most significant drivers of losses were the continued decline in demand for residential real estate and in the value of property. The land, single-family and condominium components of the Investor Real Estate portfolio are particularly affected by these risks and conditions.

Table of Contents

The following table presents credit metrics for land, single-family and condominium loans:

Table 2 land, Single-Family and Condominium

	June 30 2011	December 31 2010	June 30 2010
	(Dollars in millions, net of unearned income)		
Land			
Loan balance	$ 1,231	$ 1,640	$ 2,320
Accruing loans 90 days past due	2	1	4
Non-accruing loans*	303	476	616
Non-accruing %	24.6%	29.0%	26.6%
Single-Family			
Loan balance	$ 1,048	$ 1,236	$ 1,616
Accruing loans 90 days past due	1	3	3
Non-accruing loans*	245	290	407
Non-accruing %	23.4%	23.5%	25.2%
Condominium			
Loan balance	$ 261	$ 308	$ 432
Accruing loans 90 days past due			
Non-accruing loans*	69	92	121
Non-accruing %	26.4%	29.9%	28.0%

* Excludes non-accruing loans held for sale.

Beginning in 2008 and continuing through 2011, Regions has reduced exposures in these product types through pro-active workouts, appropriate charge-offs, and asset dispositions.

MULTI-FAMILY AND RETAIL

Beginning in 2009, loans within the multi-family and retail components of the investor real estate portfolio segment experienced increased pressure and contributed to increases in non-accrual loans. Continued weak economic conditions impacted demand for products and services in these sectors. Lower demand impacted cash flows generated by these properties, leading to a higher rate of non-collection for these types of loans.

The following table presents credit metrics and geographic distribution for multi-family and retail loans:

Table 3 Multi-family and Retail

	June 30 2011	December 31 2010	June 30 2010
	(Dollars in millions, net of unearned income)		
Multi-family			
Loan balance	$ 3,596	$ 4,241	$ 4,753
Accruing loans 90 days past due		1	
Non-accruing loans*	116	239	168
Non-accruing %	3.2%	5.6%	3.5%
Retail			
Loan balance	$ 2,681	$ 3,099	$ 3,622

Accruing loans 90 days past due			22
Non-accruing loans*	133	177	315
Non-accruing %	5.0%	5.7%	8.7%

* Excludes non-accruing loans held for sale.

Table of Contents

Strategic reductions in investor real estate exposures as discussed above also drove the year-over-year decreases in multi-family and retail.

Opportunistic asset dispositions as referred to under the discussion of land, single-family and condominium, as well as multi-family and retail, may occur in several forms. Typical transactions are instances where a third party guarantor pays off a note at a discounted price or an actual sale of the note. Regions sells to strategic buyers (e.g., local developers or the note guarantor) interested in the underlying collateral who may be willing to pay more for a note or rights to collateral backing a note than other market participants. Regions has also sold loans to financial buyers such as distressed debt funds. In addition to note sales, Regions may also allow the borrower to sell the underlying collateral, apply the proceeds to the note, and charge-off the remaining balance. Regions does not sell loans, foreclosed properties or other problem assets to structured entities or other entities where Regions has an ownership interest. Regions rarely finances these sales and has no continuing involvement, other than put-backs for breach of normal representations and warranties, none of which impacts sale accounting conclusions.

HOME EQUITY PORTFOLIO

The home equity portfolio totaled $13.6 billion at June 30, 2011 as compared to $14.2 billion at December 31, 2010 and $14.8 billion at June 30, 2010. Substantially all of this portfolio was originated through Regions branch network. Losses in this portfolio generally track overall economic conditions. The main source of economic stress has been in Florida, where residential property values have declined significantly while unemployment rates have risen to historically high levels. Losses in Florida where Regions is in a second lien position are higher than first lien losses.

The following tables provide details related to the home equity portfolio as follows:

Table 4 Selected Home Equity Portfolio Information

	As of and for the Six Months Ended June 30, 2011								
	Florida			All Other States			Total		
	1st Lien	2nd Lien	Total	1st Lien	2nd Lien	Total	1st Lien	2nd Lien	Total
	(Dollars in millions)								
Balance	$ 2,015	$ 2,968	$ 4,983	$ 3,996	$ 4,614	$ 8,610	$ 6,011	$ 7,582	$ 13,593

Net Charge-off % (1)	3.05%	7.63%	5.87%	0.75%	1.78%	1.31%	1.51%	4.10%	2.99%

(1) Net charge-off percentages are calculated on an annualized basis as a percent of average balances.

Net charge-offs were an annualized 2.60 percent of home equity loans for the first six months of 2011 compared to an annualized 2.99 percent through the first six months of 2010. Losses in Florida-based credits remained at elevated levels, as unemployment levels remain high and property valuations in certain markets have continued to experience ongoing deterioration. As illustrated in Table 4 Selected Home Equity Portfolio Information, these loans and lines in Florida represent approximately $5.0 billion of Regions total home equity portfolio at June 30, 2011. Of that balance, approximately $2.0 billion represent first liens, while second liens, which total $3.0 billion, are the main source of losses. Florida second lien losses were 6.55 percent annualized through the first six months of 2011 as compared to 7.63 percent for the same period of 2010. Through the first

six months of 2011, total home equity losses in Florida amounted to an annualized 4.96 percent of loans and lines versus 1.23 percent across the remainder of Regions footprint. This compares to the first six months of 2010 losses of 5.87 percent and 1.31 percent, respectively.

The Company calculates an estimate of the current value of property secured as collateral for home equity lending products (current LTV). The estimate is based on home price indices compiled by the Federal Housing Finance Agency (FHFA). The FHFA data indicates trends for Metropolitan Statistical Areas (MSA). Regions uses the FHFA valuation trends from the MSA s in the Company s footprint in its estimate. The trend data is applied to the loan portfolios taking into account the age of the most recent valuation and geographic area. At June 30, 2011, the Company estimates that the number of home equity lending accounts where the current LTV exceeded 100 was approximately 10.1 percent, while approximately 17.3 percent of the outstanding balances of home equity had a current LTV greater than 100. If the home equity loan is in a second lien position, the first lien has also been considered in the analysis. If the first lien position is with another institution, the Company uses the first lien outstanding balance at the time the second lien was originated.

Using the same methodology described in the above discussion of home equity loans, at June 30, 2011, the Company estimates that the number of residential first mortgage loans where the current LTV exceeded 100 was approximately 6.4 percent, while approximately 13.3 percent of the outstanding balances of residential first mortgage loans had a current LTV greater than 100.

Of the $13.6 billion home equity portfolio at June 30, 2011, approximately $12.2 million were home equity lines of credit and $1.4 billion were closed-end home equity loans (primarily originated as amortizing loans). Beginning in May 2009, new home equity lines of credit have a 10 year draw period and a 10 year repayment period. Previously, the home equity lines of credit had a 20 year term with a balloon payment upon maturity or a 5 year draw with a balloon payment upon maturity.

ALLOWANCE FOR CREDIT LOSSES

The allowance for credit losses represents management s estimate of credit losses inherent in the portfolio. The allowance for credit losses consists of two components: the allowance for loan losses and the reserve for unfunded credit commitments. Management s assessment of the appropriateness of the allowance for credit losses is based on a combination of both of these components. Regions determines its allowance for credit losses in accordance with applicable accounting literature as well as regulatory guidance related to receivables and contingencies. Binding unfunded credit commitments include items such as letters of credit, financial guarantees and binding unfunded loan commitments.

Factors considered by management in determining the appropriateness of the allowance include, but are not limited to: (1) detailed reviews of individual loans; (2) historical and current trends in gross and net loan charge-offs for the various portfolio segments evaluated; (3) the Company s policies relating to delinquent loans and charge-offs; (4) the level of the allowance in relation to total loans and to historical loss levels; (5) levels and trends in non-performing and past due loans; (6) collateral values of properties securing loans; (7) the composition of the loan portfolio, including unfunded credit commitments; (8) management s analysis of current economic conditions; (9) migration of loans between risk rating categories; and (10) estimation of inherent credit losses in the portfolio. In support of collateral values, Regions obtains updated valuations for non-performing loans on at least an annual basis.

Commercial and Consumer Credit Risk Management and Problem Asset Management are all involved in the credit risk management process to assess the accuracy of risk ratings, the quality of the portfolio and the estimation of inherent credit losses in the loan portfolio. This comprehensive process also assists in the prompt identification of problem credits. The Company has taken a number of measures to manage the portfolios and reduce risk, particularly in the more problematic portfolios. In addition, a strong Customer Assistance Program is in place which educates customers about options and initiates early contact with customers to discuss solutions when a loan first becomes delinquent.

Table of Contents

For loans that are not specifically reviewed, management uses information from its ongoing review processes to stratify the loan portfolio into pools sharing common risk characteristics. Loans that share common risk characteristics are assigned a portion of the allowance for credit losses based on the assessment process described above. Credit exposures are categorized by type and assigned estimated amounts of inherent loss based on several factors, including current and historical loss experience for each pool and management s judgment of current economic conditions and their expected impact on credit performance. Beginning in 2011, for commercial and investor real estate loans subject to specific review, a probability of default and loss given default are statistically calculated for each pool. These parameters, in combination with other account data and assumptions, are used to calculate the estimate of incurred loss. Adjustments to the allowance for credit losses calculated using a pooled approach are recorded through the provision for loan losses or non-interest expense, as applicable.

As a matter of business practice, Regions may require some form of credit support, such as a guarantee. Guarantees are legally binding and simultaneous with the primary loan agreements. Regions underwrites the ability of each guarantor to perform under its guarantee in the same manner and to the same extent as would be required to underwrite the repayment plan of a direct obligor. This entails obtaining sufficient information on the guarantor, including financial and operating information, to sufficiently measure a guarantor s ability to perform, under the guarantee. Evaluation of guarantors ability and willingness to pay is considered as part of the risk rating process, which provides the basis for the allowance for loan losses for commercial and investor real estate portfolio segments. In some cases, the credit support provided by the guarantor is integral to the risk rating. In concluding that the risk rating is appropriate, Regions considers a number of factors including whether underlying cash flow is adequate to service the debt, payment history, and whether there is appropriate guarantor support. Accordingly, Regions has concluded that the impact of credit support provided by guarantors has been appropriately considered in the calculation and assessment of the allowance for loan losses.

The allowance for loan losses totaled $3.1 billion at June 30, 2011 and $3.2 billion at both December 31, 2010 and June 30, 2010. The allowance for loan losses as a percentage of net loans was 3.84 percent at June 30, 2011 and December 31, 2010, compared to 3.71 percent at June 30, 2010. The reserve for unfunded credit commitments was $84 million at June 30, 2011 compared to $71 million at both December 31, 2010 and June 30, 2010. Net charge-offs as a percentage of average loans (annualized) were 2.54 percent and 3.08 percent in the first six months of 2011 and 2010, respectively. Charge-off ratios were lower across most major categories, period over period. Investor real estate losses continue to be the largest contributor to charge-offs. In addition to lower levels of charge-offs, credit quality metrics have generally improved during 2011, including lower levels of non-accrual loans, criticized and classified loans as well as delinquencies. The provision for loan losses totaled $398 million in the second quarter of 2011 compared to $651 million during the second quarter of 2010. The provision for loan losses totaled $880 million for the six months ended June 30, 2011 compared to $1.4 billion for the first six months of 2010. Charge-offs exceeded the provision for loan losses for the second quarter of 2011, primarily resulting from the allowance associated with the transfer of $545 million of classified loans to held for sale. Regions added $84 million in allowance for loan losses related to the credit card portfolio purchased in the second quarter.

Management considers the current level of allowance for credit losses appropriate to absorb losses inherent in the loan portfolio and unfunded commitments. Management s determination of the appropriateness of the allowance for credit losses, which is based on the factors and risk identification procedures previously discussed, requires the use of judgments and estimations that may change in the future. Changes in the factors used by management to determine the appropriateness of the allowance or the availability of new information could cause the allowance for credit losses to be increased or decreased in future periods. In addition, bank regulatory agencies, as part of their examination process, may require changes in the level of the allowance based on their judgments and estimates.

Given current economic pressures, management expects that net loan charge-offs will continue at an elevated level during 2011. Economic trends such as real estate valuations, interest rates and unemployment will impact the future levels of net charge-offs and provision. Details regarding the allowance and net charge-offs, including an analysis of activity from the previous year s totals, are included in Table 5 Allowance for Credit Losses.

Table of Contents

Activity in the allowance for credit losses is summarized as follows:

Table 5 Allowance for Credit Losses

	Six Months Ended June 30	
	2011	2010
	(Dollars in millions)	
Allowance for loan losses at beginning of year	$ 3,185	$ 3,114
Loans charged-off:		
Commercial and industrial	137	193
Commercial real estate mortgage owner occupied	116	74
Commercial real estate construction owner occupied	5	17
Commercial investor real estate mortgage	388	416
Commercial investor real estate construction	99	291
Residential first mortgage	112	125
Home equity	189	230
Indirect	13	20
Other consumer	32	43
	1,091	1,409
Recoveries of loans previously charged-off:		
Commercial and industrial	16	14
Commercial real estate mortgage owner occupied	7	3
Commercial real estate construction owner occupied		
Commercial investor real estate mortgage	9	7
Commercial investor real estate construction	1	7
Residential first mortgage	1	1
Home equity	12	9
Indirect	6	9
Other consumer	10	9
	62	59
Net charge-offs:		
Commercial and industrial	121	179
Commercial real estate mortgage owner occupied	109	71
Commercial real estate construction owner occupied	5	17
Commercial investor real estate mortgage	379	409
Commercial investor real estate construction	98	284
Residential first mortgage	111	124
Home equity	177	221
Indirect	7	11
Other consumer	22	34
	1,029	1,350
Allowance allocated to purchased loans	84	
Provision for loan losses	880	1,421
Allowance for loan losses at June 30	3,120	3,185
Reserve for unfunded credit commitments at January 1	71	74
Provision for unfunded credit commitments	13	(3)
Reserve for unfunded credit commitments at June 30	84	71

Allowance for credit losses at end of period	$ 3,204	$ 3,256
Loans, net of unearned income, outstanding at end of period	$ 81,176	$ 85,945
Average loans, net of unearned income, outstanding for the period	$ 81,756	$ 88,488
Ratios:		
Allowance for loan losses at end of period to loans, net of unearned income	3.84%	3.71%
Allowance for loan losses at end of period to non-performing loans, excluding loans held for sale	1.12x	0.92x
Net charge-offs as percentage of:		
Average loans, net of unearned income	2.54%	3.08%
Provision for loan losses	116.93%	95.00%

Loans deemed to be impaired include troubled debt restructurings (TDRs), plus commercial and investor real estate non-accrual loans. For consumer TDRs, Regions measures the level of impairment based on pools of loans stratified by common risk characteristics. Commercial and investor real estate impaired loans with outstanding balances equal to or greater than $2.5 million are evaluated individually for impairment. For these loans, Regions measures the level of impairment based on the present value of the estimated projected cash flows, the estimated value of the collateral or, if available, observable market prices. If current valuations are lower than the current book balance of the credit, the negative differences are reviewed for possible charge-off. In instances where management determines that a charge-off is not appropriate, a specific reserve is established for the individual loan in question. This specific reserve is incorporated as a part of the overall allowance for credit losses. The recorded investment in impaired loans was approximately $4.3 billion at June 30, 2011 and $4.5 billion at December 31, 2010. Loans that were characterized as TDRs totaled $2.3 billion and $2.1 billion at June 30, 2011 and December 31, 2010, respectively. The allowance allocated to TDRs totaled $313 million at June 30, 2011 and $224 million at December 31, 2010.

Regions continues to work to meet the individual needs of consumer borrowers to stem foreclosure through the Customer Assistance Program (CAP). Regions designed the program to allow for customer-tailored modifications with the goal of keeping customers in their homes and avoiding foreclosure where possible. Modification may be offered to any borrower experiencing financial hardship regardless of the borrower s payment status. Under the CAP, Regions may offer a short-term deferral, a term extension, an interest rate reduction, a new loan product, or a combination of these options. For loans restructured under the CAP, Regions expects to collect the original contractually due principal. The gross original contractual interest may be collectible, depending on the terms modified. The length of the CAP modifications ranges from temporary payment deferrals of three months to term extensions for the life of the loan. All such modifications are considered TDRs regardless of the term if there is a concession to a borrower experiencing financial difficulty. Modified loans are subject to policies governing accrual/nonaccrual evaluation consistent with all other loans of the same product type. Consumer loans are subject to objective accrual/nonaccrual decisions. Under these policies, loans subject to the CAP are charged down to estimated value on or before the month in which the loan becomes 180 days past due. If a partial charge-off is necessary as a result of this evaluation, the loan is placed on nonaccrual at that time. Because the program was designed to evaluate potential CAP participants as early as possible in the life cycle of the troubled loan, many of the modifications are finalized without the borrower ever reaching 180 days past due, and with the loans having never been placed on nonaccrual. Accordingly, given the positive impact of the restructuring on the likelihood of recovery of cash flows due under the modified terms, accrual status continues to be appropriate for these loans. None of the modified consumer loans listed in the TDR disclosures were collateral-dependent at the time of modification. At June 30, 2011, approximately $132 million in residential first mortgage TDRs and approximately $11 million in home equity TDRs were in excess of 180 days past due and are considered collateral-dependent.

A recidivism rate is calculated to evaluate the success of the CAP. The recidivism rate is the 60-day and greater delinquency rate for all TDRs which were restructured at least six months prior to the reporting period. For CAP modifications, this rate is currently approximately 21%. Recidivism is a measure of delinquency, which is considered in both the allowance for loan loss calculation related to consumer TDRs and in the accrual status decisions of CAP modified loans after the modification, for which it is a key determinant along with collateral valuation.

If loans characterized as TDRs perform according to the restructured terms for a satisfactory period of time, the TDR designation may be removed in a new calendar year if the loan yields a market rate. A minimum of six months consecutive payments is required in order to demonstrate a performance history sufficient to remove the TDR designation. Under Regions current policy, the market rate assessment must be made at the date of the modification considering the terms that would be offered to a new borrower with a similar credit profile. Given the types of concessions currently being granted under the CAP as described above, Regions does not expect that the market rate condition will be widely achieved; accordingly, Regions expects loans modified through the CAP to remain identified as TDRs.

Residential first mortgage, home equity and other consumer TDRs are consumer loans modified under the CAP. Commercial and investor real estate loan modifications are not the result of a formal program, but represent situations where modification was offered as a workout alternative. The following table summarizes TDRs for the periods ending June 30, 2011 and December 31, 2010:

Table 6 Troubled Debt Restructurings

	June 30, 2011		December 31, 2010	
	Loan Balance	Allowance for Credit Losses	Loan Balance	Allowance for Credit Losses
	(In millions)			
Accruing:				
Commercial	$ 69	$ 9	$ 77	$ 5
Investor real estate	273	13	192	4
Residential first mortgage	876	123	813	97
Home equity	383	50	335	42
Other consumer	63	1	66	1
	1,664	196	1,483	149
Non-accrual status or 90 days past due:				
Commercial	164	43	105	23
Investor real estate	200	41	198	20
Residential first mortgage	207	29	240	28
Home equity	29	4	30	4
	600	117	573	75
	$ 2,264	$ 313	$ 2,056	$ 224

Note 1. All loans listed in the table above are considered impaired under applicable accounting literature.

Note 2. Net charge-offs on commercial TDRs were approximately $12 million and $5 million for the six months ended June 30, 2011 and 2010, respectively.

Net charge-offs on investor real estate TDRs were approximately $14 million and $20 million for the six months ended June 30, 2011 and 2010, respectively.

Net charge-offs on residential first mortgage TDRs were approximately $59 million and $49 million for the six months ended June 30, 2011 and 2010, respectively.

Net charge-offs on home equity TDRs were approximately $21 million for both the six months ended June 30, 2011 and 2010.

Net charge-offs on other consumer TDRs were approximately $3 million for both the six months ended June 30, 2011 and 2010.

In April 2011, the FASB issued accounting guidance clarifying the definition regarding what constitutes a TDR for creditors. Regions will apply the clarified definition to all loans modified after January 1, 2011, and will begin reporting any newly identified TDRs with September 30, 2011 financial reporting. For Regions, the focus of the evaluation of the clarified TDR definition is on renewals, forbearances, and short-term loan workout accommodations for criticized commercial and investor real estate loans. Through the first six months of 2011, Regions renewed a substantial number of these types of loans, including approximately $1.0 billion of substandard loans still on accrual status, and is currently evaluating these modifications under the clarified TDR definition. The renewals are a result of Regions business strategy to keep loan maturities short, particularly in the investor real estate segment, in order to maintain leverage in negotiating with customers. Regions often increases or at least maintains the same interest rate, and often receives consideration in exchange for such modifications. Under pre-existing accounting guidance, such modifications were not considered by Regions to be concessionary, and were not considered TDRs. However, the new clarification places more

emphasis on whether the terms of the modified loan are at a market rate. Under the revised definition, a modification is rebuttably considered by Regions to be a concession if the borrower could not access similar financing at market terms, even if the lender concludes that the borrower will ultimately pay all contractual amounts owed. Accordingly, Regions expects reported TDRs to increase as a result of the new clarification. Regions does not expect the overall level of the allowance for loan losses to materially change as a result of the increase in TDRs.

Table of Contents

NON-PERFORMING ASSETS

Non-performing assets are summarized as follows:

Table 7 Non-Performing Assets

	June 30 2011	December 31 2010	June 30 2010
		(Dollars in millions)	
Non-performing loans:			
Commercial and industrial	$ 525	$ 467	$ 479
Commercial real estate mortgage owner occupied	687	606	680
Commercial real estate construction owner occupied	28	29	37
Total commercial	1,240	1,102	1,196
Commercial investor real estate mortgage	820	1,265	1,286
Commercial investor real estate construction	371	452	754
Total investor real estate	1,191	1,717	2,040
Residential first mortgage	288	285	212
Home equity	65	56	25
Total non-performing loans, excluding loans held for sale	2,784	3,160	3,473
Non-performing loans held for sale	381	304	256
Total non-performing loans (1)	3,165	3,464	3,729
Foreclosed properties	437	454	546
Total non-performing assets (1)	$ 3,602	$ 3,918	$ 4,275
Accruing loans 90 days past due:			
Commercial and industrial	$ 7	$ 9	$ 7
Commercial real estate mortgage owner occupied	11	6	4
Commercial real estate construction owner occupied		1	
Total commercial	18	16	11
Commercial investor real estate mortgage	5	5	26
Commercial investor real estate construction		1	4
Total investor real estate	5	6	30
Residential first mortgage	296	359	349
Home equity	158	198	215
Indirect	2	2	3
Other consumer	4	4	4
	$ 483	$ 585	$ 612
Restructured loans not included in the categories above	$ 1,664	$ 1,483	$ 1,239
Non-performing loans (1) to loans and non-performing loans held for sale (2)	3.88%	4.17%	4.33%
Non-performing assets (1) to loans, foreclosed properties and non-performing loans held for sale (2)	4.39%	4.69%	4.93%

(1) Exclusive of accruing loans 90 days past due

(2) Beginning in the first quarter of 2011, non-performing loans and assets ratios include non-performing loans held for sale in the denominator, in addition to portfolio loans and foreclosed properties. Prior quarters have been revised to conform to current period presentation.

NOTE: At June 30, 2011 approximately $175 million of substandard accrual loans were classified as held for sale. These loans are not included in the table above due to their accrual status.

Table of Contents

Non-performing assets totaled $3.6 billion at June 30, 2011, compared to $3.9 billion at December 31, 2010, and $4.3 billion at June 30, 2010. Foreclosed properties, a subset of non-performing assets, totaled $437 million, $454 million and $546 million at June 30, 2011, December 31, 2010 and June 30, 2010, respectively. The decrease in non-performing assets and foreclosed properties during 2011 reflects the Company s efforts to work through problem assets and reduce the riskiest exposures.

Management expects non-performing assets to remain elevated as compared to historical levels. Economic trends such as real estate valuations, interest rates and unemployment, as well as the level of disposition activity, will impact the future level of non-performing assets.

Loans past due 90 days or more and still accruing were $483 million at June 30, 2011, a decrease from $585 million at December 31, 2010.

At June 30, 2011, Regions had approximately $600 million of potential problem commercial and investor real estate loans that were not included in non-accrual loans, but for which management had concerns as to the ability of such borrowers to comply with their present loan repayment terms. This is a likely estimate of the amount of loans that may migrate to non-accrual status in the next quarter.

In July 2011, Regions sold $206 million of non-accrual loans, which were included in held for sale at June 30, 2011.

The following table provides an analysis of non-accrual loans for the six months ended June 30, 2011:

Table 8 Analysis of Non-Accrual Loans

	Non-Accrual Loans, Excluding Loans Held for Sale Six Months Ended June 30, 2011			
	Commercial	Investor Real Estate	Consumer	Total
	(In millions)			
Balance at beginning of year	$ 1,102	$ 1,717	$ 341	$ 3,160
Additions	655	616	14	1,285
Net payments/other activity	(140)	(210)		(350)
Return to accrual	(30)	(44)		(74)
Gross charge-offs	(232)	(188)		(420)
Tranfers to held for sale	(54)	(529)		(583)
Transfers to real estate owned	(49)	(101)		(150)
Sales	(12)	(70)	(2)	(84)
Balance at end of period	$ 1,240	$ 1,191	$ 353	$ 2,784

Note: In the table above, all net activity within the consumer portfolio segment other than sales is included as a single net number within the additions line, due to the relative immateriality of consumer non-accrual loans.

Table of Contents

SECURITIES

The following table details the carrying values of securities:

Table 9 Securities

	June 30 2011	December 31 2010	June 30 2010
		(In millions)	
U.S. Treasury securities	$ 92	$ 96	$ 71
Federal agency securities	777	21	50
Obligations of states and political subdivisions	33	30	38
Mortgage-backed securities			
Residential agency	21,537	21,857	22,838
Residential non-agency	17	22	25
Commercial agency	156	112	21
Commercial non-agency	252	100	
Other debt securities	24	27	28
Equity securities	961	1,048	1,123
	$ 23,849	$ 23,313	$ 24,194

Securities totaled $23.8 billion at June 30, 2011, an increase of $536 million from year-end 2010 levels. As part of the Company s asset/liability management process, in the second quarter of 2011, Regions sold approximately $4.0 billion of agency securities available for sale and recognized a gain of approximately $24 million. The proceeds were reinvested predominantly into similar securities with shorter durations.

Securities available for sale, which comprise nearly all of the securities portfolio, are an important tool used to manage interest rate sensitivity and provide a primary source of liquidity for the Company (see MARKET RISK INTEREST RATE RISK and LIQUIDITY).

LOANS HELD FOR SALE

Loans held for sale totaled $1.1 billion at June 30, 2011, consisting of $585 million of residential real estate mortgage loans, $381 million of non-performing investor real estate loans, and $175 million of substandard accruing investor real estate loans. At December 31, 2010, loans held for sale totaled $1.5 billion, consisting of $1.2 billion of residential real estate mortgage loans and $304 million of non-performing investor real estate loans.

OTHER INTEREST-EARNING ASSETS

All other interest-earning assets, which are primarily comprised of interest-bearing deposits in other banks, trading account assets, and other interest-earning assets, increased approximately $522 million from year-end 2010 to June 30, 2011, primarily due to an increase in interest-bearing deposits in other banks.

GOODWILL

Goodwill totaled $5.6 billion at both June 30, 2011 and December 31, 2010 and is allocated to each of Regions reportable segments (each a reporting unit), at which level goodwill is tested for impairment on an annual basis or more often if events and circumstances indicate impairment may exist (refer to Note 1 Significant Accounting Policies to the 2010 consolidated financial statements filed on Form 10-K for the year ended December 31, 2010 for further discussion of when Regions tests goodwill for impairment). Adverse changes in the economic environment, declining operations of the reporting unit, or other factors could result in a decline in the estimated implied fair value of goodwill. If the estimated implied fair value is less than the carrying amount, a loss would be recognized to reduce the carrying amount to the estimated implied fair value.

Table of Contents

A test of goodwill for impairment consists of two steps. In Step One, the fair value of the reporting unit is compared to its carrying amount. To the extent that the fair value of the reporting unit exceeds the carrying value, impairment is not indicated and no further testing is required. Conversely, if the fair value of the reporting unit is below its carrying amount, Step Two must be performed. Step Two consists of determining the implied fair value of goodwill, which is the net difference between the after-tax valuation adjustments of assets and liabilities and the valuation adjustment to equity (from Step One) of the reporting unit.

The fair value of the reporting unit is determined using two approaches and several key assumptions. Regions utilizes the capital asset pricing model (CAPM) in order to derive the base discount rate. The inputs to the CAPM include the 20-year risk-free rate, 5-year beta for a select peer set, and the market risk premium based on published data. Once the output of the CAPM is determined, a size premium is added (also based on a published source) as well as a company-specific risk premium, which is an estimate determined by the Company and meant to compensate for the risk inherent in the future cash flow projections and inherent differences (such as business model and market perception of risk) between Regions and the peer set. The table below summarizes the discount rate used in the goodwill impairment tests of the Banking/Treasury reporting unit for the reporting periods indicated:

	2nd Quarter 2011	1st Quarter 2011	4th Quarter 2010	3rd Quarter 2010	2nd Quarter 2010
Discount Rate	15%	15%	15%	16%	16%

In the fourth quarter of 2010, Regions reduced the company-specific component of its discount rate to reflect several positive factors that occurred during the period, as well as factors which reduced the uncertainty of future cash flow projections. Specifically, the Company earned a profit and experienced improving credit metrics, including lower non-performing assets and lower gross inflows of non-performing loans than in the third quarter of 2010. Additionally, Regions experienced lower levels of criticized loans, a leading indicator of loan losses (see Note 5 Allowance for Credit Losses to the 2010 consolidated financial statements filed on Form 10-K for further details, including a definition of criticized loans). The Company also completed its three-year strategic plan, which reflected improving credit trends and included additional clarity around future cash flows that were driven by a proposed rule issued by the Federal Reserve governing debit interchange income and the announcements in the fourth quarter of 2010 and January of 2011 of pending non-distressed, orderly sales of financial institutions of comparable size and/or footprint to Regions. Additionally, the Basel Committee finalized its capital framework, which provided additional clarity on future equity requirements that impact the projections of future cash flows. In the judgment of management, these factors outweighed the downgrades of Regions debt to below investment grade during the fourth quarter of 2010, as well as new rules which impacted FDIC insurance premiums. In estimating future cash flows, a balance sheet as of the test date and a statement of operations for the last twelve months of activity for the reporting unit are compiled. From that point, future balance sheets and statements of operations are projected based on the inputs discussed below. Cash flows are based on expected future capitalization requirements due to balance sheet growth and anticipated changes in regulatory capital requirements. The baseline cash flows utilized in all models correspond to the most recent internal forecasts and/or budgets that range from 1 to 5 years. These internal forecasts are based on inputs developed in the Company s capital planning processes.

Refer to Note 5 Goodwill , for further discussion of these approaches and related assumptions. The fair values of assets and liabilities are determined using an exit price concept. Refer to the discussion of fair value in Note 11 Fair Value Measurements for discussions of the exit price concept and the determination of fair values of financial assets and liabilities.

In the fourth quarter of 2008, Regions performed its goodwill impairment tests for the Banking/Treasury reporting unit, which resulted in an implied fair value of goodwill of approximately $4.7 billion and a goodwill impairment charge of $6.0 billion. Throughout 2009 and continuing into the first half of 2010, in the Banking/Treasury reporting unit, the credit quality of Regions loan portfolio declined, which contributed to increased losses as well as elevated non-performing loan levels. Accordingly, Regions performed tests of goodwill for impairment

Table of Contents

during each quarter of 2010 and during the second, third and fourth quarters of 2009 in a manner consistent with the test conducted in the fourth quarter of 2008. Regions has continued to perform its goodwill impairment tests during the first two quarters of 2011 primarily due to the market capitalization remaining below book value. The long-term fair value of equity was determined using both income and market approaches (discussed in Note 5 Goodwill). The results of these calculations continued to indicate that the fair value of the Banking/Treasury reporting unit was less than its carrying amount. As of June 30, 2011, the carrying amount and fair value of the Banking/Treasury reporting unit were $11.8 billion and $8.1 billion, respectively, while the carrying amount of goodwill for the reporting unit was $4.7 billion. Therefore, Step Two of the goodwill impairment test was performed. In Step Two, the fair values of the reporting unit s assets and liabilities, including the loan portfolio, intangible assets, time deposits, debt, and other assets and liabilities were calculated. Once the fair values were determined, deferred tax adjustments were calculated as applicable. The after-tax effects of the Step Two adjustments, which were primarily write-downs of assets to fair value, exceeded any reductions in the value of common equity determined in Step One; accordingly the calculation of implied goodwill exceeded its carrying amount. Therefore, the results were no impairment for the Banking/Treasury reporting unit, whose implied fair value of goodwill exceeded its carrying amount by approximately 33 percent as of June 30, 2011. Since the second quarter of 2009, the fair values of net assets and liabilities of the Banking/Treasury reporting unit have increased faster than the fair value of equity of this reporting unit. Should the fair values of net assets continue to increase more rapidly than the fair value of this reporting unit, goodwill could be impaired in future periods.

Specific factors as of the date of filing the financial statements that could negatively impact the assumptions used in assessing goodwill for impairment include: disparities in the level of fair value changes in net assets compared to equity; adverse business trends resulting from litigation and/or regulatory actions; higher loan losses; lengthened forecasts of unemployment in excess of 10 percent beyond 2012; future increased minimum regulatory capital requirements above current thresholds (refer to Note 13 Regulatory Capital Requirements and Restrictions to the 2010 consolidated financial statements filed on Form 10-K for the year ended December 31, 2010 for a discussion of current minimum regulatory requirements); future federal rules and regulations resulting from the Dodd-Frank Act; and a protraction in the current low level of interest rates beyond 2012.

The following tables present an analysis of independent changes in market factors or significant assumptions that could adversely impact the carrying balance of goodwill in the Banking/Treasury reporting unit and the outcome of the Step One tests for the Investment Banking/Brokerage/Trust reporting units:

Impact to the Carrying Value of Goodwill

Banking/Treasury Reporting Unit

Change in Discount Rate		**Estimated Amount of Impairment (In millions)**
+ 2.9%	$	(a)
+ 4%		(504)
+ 5%		(773)
Change in Tangible Book Value Mulipliers (b)		
- 62%	$	(a)
Improvement in Loan Fair Values		
+ 3.1 Percentage Points	$	(a)
+ 4 Percentage Points		(435)
+ 5 Percentage Points		(932)

(a) Represents the point at which the implied fair value of goodwill would approximate its carrying value.

(b) Represents a 62 percent decline in both tangible book value multipliers of 1.0x and 1.2x for the public company method and the transaction method, respectively. The 1.0x multiplier for the public company method is before the 30 percent control premium utilized for this metric. See Note 5 for further details.

Table of Contents

Impact to Step One Conclusion

Investment Banking/Brokerage/Trust and Insurance Reporting Units

	Impact of Change	
Change in Discount Rate	**Investment Banking/ Brokerage/Trust**	**Insurance**
+ 1%	Pass	Pass
+ 2%	Pass	Pass
+ 3%	Pass	Pass
Change in Market Approach Mulipliers (c)(d)		
- 10%	Pass	Pass
- 20%	Pass	Pass
- 30%	Pass	Pass
- 40%	Pass	Pass

(c) For Investment Banking/Brokerage/Trust, represents the percent decline in both tangible book value multipliers of 2.1x and 2.1x for the public company method and the transaction method, respectively. The 2.1x multiplier for the public company method is before the 30 percent control premium utilized for this metric. See Note 5 for further details.

(d) For Insurance, represents the percent decline in the 16.9x multiplier for the last twelve months of net income and is before the 30 percent control premium utilized for this metric. See Note 5 for further details.

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. Changes in implied fair value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of an adverse variation in a particular assumption on the implied fair value of goodwill is calculated without changing any other assumption, while in reality changes in one factor may result in changes in another which may either magnify or counteract the effect of the change.

DEPOSITS

Regions competes with other banking and financial services companies for a share of the deposit market. Regions ability to compete in the deposit market depends heavily on the pricing of its deposits and how effectively the Company meets customers needs. Regions employs various means to meet those needs and enhance competitiveness, such as providing a high level of customer service, competitive pricing and providing convenient branch locations for its customers. Regions also serves customers through providing centralized, high-quality banking services and alternative product delivery channels such as internet banking.

Table of Contents

The following table summarizes deposits by category:

Table 10 Deposits

	June 30 2011	December 31 2010	June 30 2010
		(In millions)	
Non-interest-bearing demand	$ 28,148	$ 25,733	$ 22,993
Savings accounts	5,118	4,668	4,475
Interest-bearing transaction accounts	15,982	13,423	15,148
Money market accounts domestic	24,650	27,420	26,773
Money market accounts foreign	476	569	502
Low-cost deposits	74,374	71,813	69,891
Time deposits	21,947	22,784	26,298
Customer deposits	96,321	94,597	96,189
Corporate Treasury deposits			
Time deposits	10	17	61
Total deposits	$ 96,331	$ 94,614	$ 96,250

Total deposits at June 30, 2011 increased approximately $1.7 billion compared to year-end 2010 levels. The overall increase in deposits was primarily driven by an increase in non-interest-bearing demand accounts.

Regions elected to exit the FDIC s Transaction Account Guarantee (TAG) program on July 1, 2010. The TAG program is a component of the Temporary Liquidity Guarantee Program, whereby the FDIC guarantees all funds held at participating institutions beyond the $250,000 deposit insurance limit in qualifying transaction accounts. Regions decision to exit the program did not have a significant impact on liquidity. The Dodd-Frank Act permanently increased the FDIC coverage limit to $250,000. Also as a result of the Dodd-Frank Act, effective as of December 31, 2010, unlimited coverage for non-interest bearing demand transaction accounts will be provided until January 1, 2013.

SHORT-TERM BORROWINGS

The following is a summary of short-term borrowings:

Table 12 Short-Term Borrowings

	June 30 2011	December 31 2010	June 30 2010
		(In millions)	
Company funding sources:			
Federal funds purchased	$ 16	$ 19	$ 26
Securities sold under agreements to repurchase	198	763	367
Federal Home Loan Bank advances		500	
Treasury, tax and loan notes	95	118	146
Other short-term borrowings	34	95	62
	343	1,495	601
Customer-related borrowings:

Table of Contents

COMPANY FUNDING SOURCES

Federal funds purchased and securities sold under agreements to repurchase used for funding purposes totaled $214 million at June 30, 2011 compared to $782 million at December 31, 2010. The level of these borrowings can fluctuate significantly on a day-to-day basis, depending on funding needs and which sources of funds are used to satisfy those needs. All such arrangements are considered typical of the banking and brokerage industries and are accounted for as borrowings.

As another source of funding, the Company utilizes short-term borrowings through the issuance of Federal Home Loan Bank (FHLB) advances. FHLB borrowings are used to satisfy short-term borrowing requirements and can also fluctuate between periods. There were no short-term FHLB borrowings outstanding at June 30, 2011 compared to $500 million at December 31, 2010. See the Liquidity section for discussion of Regions borrowing capacity with the FHLB.

Treasury, tax and loan notes consist of borrowings from the Federal Reserve Bank. At June 30, 2011, Regions had $95 million outstanding under this program, compared to $118 million at December 31, 2010. See the Liquidity section for further detail of Regions borrowing capacity with the Federal Reserve.

Other short-term borrowings are related to Morgan Keegan and include borrowings under certain lines of credit that Morgan Keegan maintains with unaffiliated banks totaling $34 million and $95 million at June 30, 2011 and December 31, 2010, respectively. The lines of credit provide for maximum borrowings of $585 million as of June 30, 2011.

Selected data for short-term borrowings used for funding purposes for the quarter ended June 30, 2011 is presented below:

		(Dollars in millions)
Federal funds purchased:		
Balance at quarter-end	$	16
Average outstanding (based on average daily balances)		19
Maximum amount outstanding at any month-end during the quarter		20
Weighted-average interest rate at quarter-end		0.1%
Weighted-average interest rate on amounts outstanding during the quarter (based on average daily balances)		0.1%
Securities sold under agreements to repurchase:		
Balance at quarter-end	$	198
Average outstanding (based on average daily balances)		285
Maximum amount outstanding at any month-end during the quarter		331
Weighted-average interest rate at quarter-end		0.3%
Weighted-average interest rate on amounts outstanding during the quarter (based on average daily balances)		0.2%

CUSTOMER-RELATED BORROWINGS

Repurchase agreements are also offered as commercial banking products as short-term investment opportunities for customers. The balance totaled $1.5 billion at June 30, 2011 and $1.9 billion at December 31, 2010. The level of these borrowings can fluctuate significantly on a day-to-day basis.

Regions, through Morgan Keegan, maintains two types of liabilities for its brokerage customers that are classified as short-term borrowings since Morgan Keegan pays its customers interest related to these liabilities. The brokerage customer position liability represents liquid funds in customers brokerage accounts. The short-sale liability represents traditional obligations to deliver to customers securities at a predetermined date and

price. Balances due to brokerage customers totaled $479 million at June 30, 2011 compared to $324 million at December 31, 2010. The short-sale liability was $323 million at June 30, 2011 compared to $174 million at December 31, 2010. The balances of these liabilities fluctuate frequently based on customer activity.

Customer collateral increased $42 million to $52 million at June 30, 2011 from $10 million at December 31, 2010. This balance includes cash collateral posted by customers related to derivative transactions by swap customers of Morgan Keegan.

LONG-TERM BORROWINGS

Long-term borrowings are summarized as follows:

Table 12 Long-Term Borrowings

	June 30 2011	December 31 2010 (In millions)	June 30 2010
Regions Financial Corporation (Parent):			
4.375% senior notes due December 2010	$	$	$ 499
LIBOR floating rate senior notes due June 2012	350	350	350
4.875% senior notes due April 2013	249	249	249
7.75% senior notes due November 2014	693	692	691
5.75% senior notes due June 2015	496	495	494
7.75% subordinated notes due March 2011		502	507
7.00% subordinated notes due March 2011		500	500
6.375% subordinated notes due May 2012	599	599	599
7.75% subordinated notes due September 2024	100	100	100
6.75% subordinated debentures due November 2025	162	162	163
7.375% subordinated notes due December 2037	300	300	300
6.625% junior subordinated notes due May 2047	498	498	498
8.875% junior subordinated notes due June 2048	345	345	345
Other long-term debt	6	7	10
Valuation adjustments on hedged long-term debt	95	108	148
	3,893	4,907	5,453
Regions Bank:			
Federal Home Loan Bank structured advances		200	2,555
Other Federal Home Loan Bank advances	3,415	3,515	1,316
2.75% senior bank notes due December 2010			1,000
LIBOR floating rate senior bank notes due December 2010			500
3.25% senior bank notes due December 2011	2,000	2,000	2,000
4.85% subordinated notes due April 2013	496	494	493
5.20% subordinated notes due April 2015	347	347	346
7.50% subordinated notes due May 2018	749	750	750
6.45% subordinated notes due June 2037	497	497	497
Other long-term debt	176	376	378
Valuation adjustments on hedged long-term debt	73	104	127
	7,753	8,283	9,962
	$ 11,646	$ 13,190	$ 15,415

Long-term borrowings decreased approximately $1.5 billion since year-end 2010 due primarily to approximately $1.0 billion of subordinated notes at the parent level maturing during the first six months of 2011. Approximately $300 million of FHLB advances and $200 million of other

long-term debt at the bank level also

matured during the first six months of 2011. FHLB structured advances are convertible quarterly at the option of the FHLB. The convertible feature provides that after a specified date in the future, the advances will remain at a fixed rate, or Regions will have the option to either pay off the advance or convert from a fixed rate to a variable rate based on the LIBOR index. The FHLB structured advances had weighted-average interest rates of 2.5% at both December 31, 2010 and June 30, 2010. Other FHLB advances have a weighted-average interest rate of 0.7%, 1.0% and 3.5% at June 30, 2011, December 31, 2010 and June 30, 2010, respectively, with maturities ranging from one to twenty years.

STOCKHOLDERS EQUITY

Stockholders equity was $16.9 billion at June 30, 2011 compared to $16.7 billion at December 31, 2010. During the first six months of 2011, net income increased stockholders equity by $178 million, cash dividends declared reduced equity by $25 million for common stock. Preferred dividends and accretion reduced equity by $106 million and changes in accumulated other comprehensive income increased equity by $83 million.

Regions ratio of stockholders equity to total assets was 12.90 percent at June 30, 2011, compared to 12.64 percent at December 31, 2010. Regions ratio of tangible common stockholders equity to tangible assets was 6.18 percent at June 30, 2011, compared to 6.04 percent at December 31, 2010 (see Table 15 GAAP to Non-GAAP Reconciliation for further discussion).

See Note 6, Stockholders Equity and Comprehensive Income (Loss) for further information related to common shares available for repurchase and dividends.

REGULATORY CAPITAL REQUIREMENTS

Regions and Regions Bank are required to comply with regulatory capital requirements established by Federal banking agencies. These regulatory capital requirements involve quantitative measures of the Company s assets, liabilities and certain off-balance sheet items, and also qualitative judgments by the regulators. Failure to meet minimum capital requirements can subject the Company to a series of increasingly restrictive regulatory actions. Currently, there are two basic measures of capital adequacy: a risk-based measure and a leverage measure.

The risk-based capital requirements are designed to make regulatory capital requirements more sensitive to differences in credit and market risk profiles among banks and bank holding companies, to account for off-balance sheet exposure and interest rate risk, and to minimize disincentives for holding liquid assets. Assets and off-balance sheet items are assigned to broad risk categories, each with specified risk-weighting factors. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items. Banking organizations that are considered to have excessive interest rate risk exposure are required to maintain higher levels of capital.

The minimum standard for the ratio of total capital to risk-weighted assets is 8 percent. At least 50 percent of that capital level must consist of common equity, undivided profits and non-cumulative perpetual preferred stock, senior perpetual preferred stock issued to the U.S. Treasury under the Capital Purchase Program, minority interests relating to qualifying common or noncumulative perpetual preferred stock issued by a consolidated U.S. depository institution or foreign bank subsidiary, less goodwill, deferred tax assets and certain other intangibles (Tier 1 capital). The remainder (Tier 2 capital) may consist of a limited amount of other preferred stock, mandatorily convertible securities, subordinated debt, and a limited amount of the allowance for loan losses. The sum of Tier 1 capital and Tier 2 capital is total risk-based capital or total capital. However, under the Collins Amendment, which was passed as a section of the Dodd-Frank Act, trust preferred securities will be eliminated as an element of Tier 1 capital. This disallowance of trust preferred securities will be phased in from January 1, 2013 to January 1, 2016. Debt or equity instruments issued to the Federal government as part of the CPP are exempt from the Collins Amendment. As of June 30, 2011, Regions has $846 million of trust preferred securities that are subject to the Collins Amendment and $3.5 billion of preferred equity that is exempt from the Collins Amendment.

Table of Contents

The banking regulatory agencies also have adopted regulations that supplement the risk-based guidelines to include a minimum ratio of 3 percent of Tier 1 capital to average assets less goodwill and disallowed deferred tax assets (the Leverage ratio). Depending upon the risk profile of the institution and other factors, the regulatory agencies may require a Leverage ratio of 1 percent to 2 percent above the minimum 3 percent level.

In recent years, banking regulators began supplementing their assessment of the capital adequacy of a bank based on a variation of Tier 1 capital, known as Tier 1 common equity. While not codified, analysts and banking regulators have assessed Regions capital adequacy using the tangible common stockholders equity and/or the Tier 1 common equity measure. Because tangible common stockholders equity and Tier 1 common equity are not formally defined by GAAP or codified in the federal banking regulations, these measures are considered to be non-GAAP financial measures and other entities may calculate them differently than Regions disclosed calculations (see Table 15, GAAP to Non-GAAP Reconciliation for further details).

Regions is evaluating the anticipated impact of Basel III, which will begin in 2013 and is expected to be fully phased-in on January 1, 2019. The Company s estimated Tier 1 common and Tier 1 capital ratios as of June 30, 2011, based on Regions current understanding of the guidelines, are approximately 7.19 and 10.76 percent, respectively, above the Basel III minimums of 7 percent for Tier 1 common and 8.5 percent for Tier 1 capital. Based on Regions understanding of the calculation for the liquidity coverage ratio under Basel III, Regions currently meets the requirement due to the Company s current cash and investment positions. Should Regions cash position or investment mix change in the future, Regions ability to meet the liquidity coverage ratio may be impacted. Additionally, there is still need for clarification of the Basel III rules as well as interpretation and implementation by U.S. banking regulators, so the ultimate impact of Basel III on Regions is not completely known at this point. Because the Basel III capital calculations are not formally defined by GAAP and are not currently codified in the federal banking regulations, these measures are considered to be non-GAAP financial measures, and other entities may calculate them differently than Regions disclosed calculations (see Table 16, GAAP to Non-GAAP Reconciliation for further details).

See the Supervision and Regulation Capital Requirements subsection of the Business section and the Risk Factors section of Regions Annu Report on Form 10-K for the year ended December 31, 2010 for more information.

The following chart summarizes the applicable holding company and bank regulatory capital requirements. Regions capital ratios at June 30, 2011, December 31, 2010 and June 30, 2010 exceeded all regulatory requirements.

Table 13 Regulatory Capital Requirements

	June 30, 2011 Ratio	December 31, 2010 Ratio	June 30, 2010 Ratio	To Be Well Capitalized
Tier 1 common (non-GAAP):				
Regions Financial Corporation	7.95%	7.85%	7.68%	NA(1)
Tier 1 capital:				
Regions Financial Corporation	12.57%	12.40%	12.04%	6.00%
Regions Bank	12.06	11.68	11.27	6.00
Total capital:				
Regions Financial Corporation	16.22%	16.35%	15.90%	10.00%
Regions Bank	15.13	14.93	14.46	10.00
Leverage:				
Regions Financial Corporation	9.49%	9.30%	9.10%	5.00%
Regions Bank	9.20	8.85	8.58	5.00

(1) The Board of Governors of the Federal Reserve System has identified 4% as the level of Tier 1 common capital sufficient to withstand adverse economic scenarios.

Table of Contents

LIQUIDITY

GENERAL

Liquidity is an important factor in the financial condition of Regions and affects Regions ability to meet the borrowing needs and deposit withdrawal requirements of its customers. Regions intends to fund obligations primarily through cash generated from normal operations. In addition to these obligations, Regions has obligations related to potential litigation contingencies. See Note 13, Commitments and Contingencies to the consolidated financial statements for additional discussion of the Company s funding requirements.

Assets, consisting principally of loans and securities, are funded by customer deposits, purchased funds, borrowed funds and stockholders equity. Regions goal in liquidity management is to satisfy the cash flow requirements of depositors and borrowers, while at the same time meeting the Company s cash flow needs. The challenges of the current market environment demonstrate the importance of having and using various sources of liquidity to satisfy the Company s funding requirements.

In order to ensure an appropriate level of liquidity is maintained, Regions performs specific procedures including scenario analyses and stress testing at the bank, holding company, and affiliate levels. Regions policy is to maintain a sufficient level of funding to meet projected cash needs, including all debt service and maturities, for the subsequent two years at the parent company and acceptable periods for the bank and other affiliates. The Company s current non-investment grade credit ratings makes access to short-term unsecured funding markets unreliable; therefore, the Company s funding and contingency planning does not currently include any reliance on unsecured sources.

The securities portfolio is one of Regions primary sources of liquidity. Maturities of securities provide a constant flow of funds available for cash needs (see Note 2, Securities to the consolidated financial statements). The agency guaranteed mortgage portfolio is another source of liquidity in various secured borrowing capacities. In anticipation of regulatory changes proposed within the Basel III framework, in particular the Liquidity Coverage Ratio, Regions increased its holdings in securities backed by the Government National Mortgage Association (GNMA), which are explicitly backed by the U.S. Government.

Maturities in the loan portfolio also provide a steady flow of funds. Additional funds are provided from payments on consumer loans and one-to-four family residential first mortgage loans. In addition, liquidity needs can also be met by borrowing funds in state and national money markets. Historically, Regions liquidity has been enhanced by its relatively stable customer deposit base. During 2010, Regions customer base grew substantially in response to competitive offers and customers desire to lock-in rates in the falling rate environment, as well as the introduction of new consumer and business checking products.

Regions elected to exit the FDIC s TAG program on July 1, 2010. The TAG program is a component of the Temporary Liquidity Guarantee Program, whereby the FDIC guarantees all funds held at participating institutions beyond the $250,000 deposit insurance limit in qualifying transaction accounts. The decision to exit the program did not have a significant impact on liquidity. The Dodd-Frank Act permanently increased the FDIC coverage limit to $250,000. As a result of the Dodd-Frank Act, effective December 31, 2010, unlimited coverage for non-interest bearing demand transaction accounts will be provided until January 1, 2013.

Due to the potential for uncertainty and inconsistency in the unsecured funding markets, Regions has been maintaining higher levels of cash liquidity by depositing excess cash with the Federal Reserve Bank, which is the primary component of the balance sheet line item, interest-bearing deposits in other banks. At June 30, 2011, Regions had over $5.5 billion in excess cash on deposit with the Federal Reserve. Regions borrowing availability with the Federal Reserve Bank as of June 30, 2011, based on assets available for collateral at that date, was $19.7 billion.

Regions periodically accesses funding markets through sales of securities with agreements to repurchase. Repurchase agreements are also offered through a commercial banking sweep product as a short-term investment opportunity for customers. All such arrangements are considered typical of the banking and brokerage industries and are accounted for as borrowings.

Table of Contents

Regions financing arrangement with FHLB Atlanta adds additional flexibility in managing its liquidity position. As of June 30, 2011, Regions borrowing availability from FHLB Atlanta totaled $2.2 billion. FHLB borrowing capacity is contingent on the amount of collateral pledged to the FHLB. Regions Bank and its subsidiaries have pledged certain residential first mortgage loans on one-to-four family dwellings and home equity lines of credit as collateral for the FHLB advances outstanding. Additionally, investment in FHLB stock is required in relation to the level of outstanding borrowings. Regions held $340 million in FHLB stock at June 30, 2011. The FHLB has been and is expected to continue to be a reliable and economical source of funding.

In February 2010, Regions filed a shelf registration statement with the U.S. Securities and Exchange Commission. This shelf registration does not have a capacity limit and can be utilized by Regions to issue various debt and/or equity securities. The registration statement will expire in February 2013.

Regions Bank Note program allows Regions Bank to issue up to $20 billion aggregate principal amount of bank notes outstanding at any one time. No issuances have been made under this program as of June 30, 2011. Notes issued under the program may be senior notes with maturities from 30 days to 15 years and subordinated notes with maturities from 5 years to 30 years. These notes are not deposits and they are not insured or guaranteed by the FDIC. Regions may, from time to time, consider opportunistically retiring outstanding issued securities, including subordinated debt, trust preferred securities and preferred shares in privately negotiated or open market transactions for cash or common shares. Regulatory approval would be required for retirement of some instruments.

Regions may, from time to time, consider opportunistically retiring its outstanding issued securities, including subordinated debt, trust preferred securities and preferred shares in privately negotiated or open market transactions for cash or common shares.

Morgan Keegan maintains certain lines of credit with unaffiliated banks to manage liquidity in the ordinary course of business. See the Short-Term Borrowings section for further detail.

RATINGS

During the first and second quarters of 2011, Regions did not experience any rating actions; therefore, all debt ratings remained consistent with those disclosed in the Annual Report on Form 10-K for the year ended December 31, 2010. Throughout 2010, Regions experienced rating actions by Standard & Poor s Corporation (S&P), Moody s Investors Service, Fitch Ratings and Dominion Bond Rating Service (DBRS). The agencies downgraded obligations of Regions Financial Corporation and Regions Bank. In general, ratings agencies base their ratings on many quantitative and qualitative factors, including capital adequacy, liquidity, asset quality, business mix, probability of government support, and level and quality of earnings. Any downgrade in credit ratings by one or more ratings agencies may impact Regions in several ways, including, but not limited to, Regions access to the capital markets or short-term funding, borrowing cost and capacity, collateral requirements, acceptability of its letters of credit, funding of variable rate demand notes (VRDNs), as well as FDIC insurance costs, thereby potentially adversely impacting Regions financial condition and liquidity.

Table of Contents

Table 15 Credit Ratings reflects the debt ratings information of Regions Financial Corporation and Regions Bank by S&P, Moody s Investors Service, Fitch Ratings and DBRS.

Table 14 Credit Ratings

	As of June 30, 2011 and December 31, 2010			
	Standard & Poor s	Moody s	Fitch	DBRS
Regions Financial Corporation				
Senior notes	BB+	Ba3	BBB-	BBB
Subordinated notes	BB	B1	BB+	BBBL
Junior subordinated notes	B	B2	BB	BBBL
Regions Bank				
Short-term debt	A-3	NP*	F3	R-2H
Long-term bank deposits	BBB-	Ba1	BBB	BBBH
Long-term debt	BBB-	Ba2	BBB-	BBBH
Subordinated debt	BB+	Ba3	BB+	BBB

* Not Prime

At June 30, 2011, Moody s and S&P s credit ratings for Regions Financial Corporation were below investment grade. For Regions Bank, Moody s credit ratings were below investment grade. Regions Financial Corporation and Regions Bank remain on a credit watch with negative implications from Moody s. Additionally, many obligations of Regions Financial Corporation and Regions Bank remain on negative outlook by the agencies referred to above. See the Risk Factors section in the Annual Report on Form 10-K for the year ended December 31, 2010 for more information.

A security rating is not a recommendation to buy, sell or hold securities, and the ratings are subject to revision or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating.

OPERATING RESULTS

The table below presents computations of earnings and certain other financial measures including efficiency ratio , return on average tangible common stockholders equity , end of period tangible common stockholders equity , Tier 1 common equity , and Basel III ratios , all of which non-GAAP. Regions believes these financial measures provide a meaningful base for period-to-period comparisons and will assist investors in analyzing the operating results of the Company and predicting future performance. These non-GAAP financial measures are also used by management to assess the performance of Regions business. Management and the Board of Directors utilize these non-GAAP financial measures as follows:

- Preparation of Regions operating budgets
- Monthly financial performance reporting
- Monthly close-out flash reporting of consolidated results (management only)
- Presentations to investors of Company performance.

Regions believes that presenting these non-GAAP financial measures will permit investors to assess the performance of the Company on the same basis as that applied by management and the Board of Directors.

The efficiency ratio, which is a measure of productivity, is generally calculated as non-interest expense divided by total revenue on a fully tax equivalent basis. Management uses the efficiency ratio to monitor performance and believes this measure provides meaningful information to investors. Non-interest expense

Table of Contents

(GAAP) is presented excluding certain adjustments to arrive at adjusted non-interest expense (non-GAAP), which is the numerator for the efficiency ratio. Net interest income on a fully-taxable equivalent basis (GAAP) and non-interest income (GAAP) are added together to arrive at total revenue. Adjustments are made to arrive at adjusted total revenue (non-GAAP), which is the denominator for the efficiency ratio. Regions believes that the exclusion of these adjustments provides a meaningful base for period-to-period comparisons, which management believes will assist investors in analyzing the operating results of the Company and predicting future performance. These non-GAAP financial measures are also used by management to assess the performance of Regions business. It is possible that the activities related to the adjustments may recur; however, management does not consider the activities related to the adjustments to be indications of ongoing operations. Regions believes that presentation of these non-GAAP financial measures will permit investors to assess the performance of the Company on the same basis as that applied by management.

Tangible common stockholders equity ratios have become a focus of some investors in analyzing the capital position of the Company absent the effects of intangible assets and preferred stock. Traditionally, the Federal Reserve and other banking regulatory bodies have assessed a bank s capital adequacy based on Tier 1 capital, the calculation of which is codified in federal banking regulations. In connection with the Federal Reserve s Supervisory Capital Assessment Program, these regulators began supplementing their assessment of the capital adequacy of a bank based on a variation of Tier 1 capital, known as Tier 1 common equity. While not codified, analysts and banking regulators have assessed Regions capital adequacy using the tangible common stockholders equity and/or the Tier 1 common equity measure. Because tangible common stockholders equity and Tier 1 common equity are not formally defined by GAAP or codified in the federal banking regulations, these measures are considered to be non-GAAP financial measures and other entities may calculate them differently than Regions disclosed calculations. Since analysts and banking regulators may assess Regions capital adequacy using tangible common stockholders equity and Tier 1 common equity, Regions believes that it is useful to provide investors the ability to assess Regions capital adequacy on these same bases.

Tier 1 common equity is often expressed as a percentage of risk-weighted assets. Under the risk-based capital framework, a bank s balance sheet assets and credit equivalent amounts of off-balance sheet items are assigned to one of four broad risk categories. The aggregated dollar amount in each category is then multiplied by the risk weighting assigned to that category. The resulting weighted values from each of the four categories are added together and this sum is the risk-weighted assets total that, as adjusted, comprises the denominator of certain risk-based capital ratios. Tier 1 capital is then divided by this denominator (risk-weighted assets) to determine the Tier 1 capital ratio. Adjustments are made to Tier 1 capital to arrive at Tier 1 common equity (non-GAAP). Tier 1 common equity is also divided by the risk-weighted assets to determine the Tier 1 common equity ratio. The amounts disclosed as risk-weighted assets are calculated consistent with banking regulatory requirements.

Regions currently calculates its risk-based capital ratios under guidelines adopted by the Federal Reserve based on the 1988 Capital Accord (Basel I) of the Basel Committee on Banking Supervision (the Basel Committee). In December 2010, the Basel Committee released its final framework for Basel III, which will strengthen international capital and liquidity regulation. When implemented by U.S. bank regulatory agencies and fully phased-in, Basel III will change capital requirements and place greater emphasis on common equity. Implementation of Basel III will begin on January 1, 2013, and will be phased in over a multi-year period. The U.S. bank regulatory agencies have not yet finalized regulations governing the implementation of Basel III. Accordingly, the calculations provided below are estimates, based on Regions current understanding of the framework, including the Company s reading of the requirements, and informal feedback received through the regulatory process. Regions understanding of the framework is evolving and will likely change as the regulations are finalized. Because the Basel III implementation regulations are not formally defined by GAAP and have not yet been finalized and codified, these measures are considered to be non-GAAP financial measures, and other entities may calculate them differently from Regions disclosed calculations. Since analysts and banking regulators may assess Regions capital adequacy using the Basel III framework, Regions believes that it is useful to provide investors the ability to assess Regions capital adequacy on the same basis.

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. To mitigate these limitations, Regions has policies and procedures in place to identify and address expenses that qualify for non-GAAP presentation, including authorization and system controls to ensure accurate period to period comparisons. Although these non-GAAP financial measures are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation, or as a substitute for analyses of results as reported under GAAP.

The following tables provide: 1) a reconciliation of non-interest expense (GAAP) to adjusted non-interest expense (non-GAAP), 2) a reconciliation of non-interest income (GAAP) to adjusted non-interest income (non-GAAP), 3) a computation of adjusted total revenue (non-GAAP), 4) computation of the efficiency ratio (non-GAAP), 5) a reconciliation of average and ending stockholders equity (GAAP) to average and ending tangible common stockholders equity (non-GAAP), 6) a reconciliation of stockholders equity (GAAP) to Tier 1 capital (regulatory) and to Tier 1 common equity (non-GAAP) and 7) a reconciliation of stockholders equity (GAAP) to Basel III Tier 1 capital (non-GAAP), Basel III total capital (non-GAAP) and Basel III Tier 1 common (non-GAAP).

Table 15 GAAP to Non-GAAP Reconciliation

Total interest-bearing liabilities	82,879	222	1.07	92,942	324	1.40
Net interest spread			2.76			2.55
Non-interest-bearing deposits (3)	27,806			23,688		
Other liabilities	3,197			3,096		
Stockholders equity	16,796			17,559		
	$ 130,678			$ 137,285		
Net interest income/margin on a taxable-equivalent basis (4)		$ 872	3.05%		$ 863	2.87%

Notes:

(1) Loans, net of unearned income include non-accrual loans for all periods presented.
(2) Interest income includes net loan fees of $13 million and $11 million for the quarters ended June 30, 2011 and 2010, respectively.
(3) Total deposit costs may be calculated by dividing total interest expense on deposits by the sum of interest-bearing deposits and non-interest bearing deposits. The rates for total deposit costs equal 0.53% and 0.79% for the three months ended June 30, 2011 and 2010, respectively.
(4) The computation of taxable-equivalent net interest income is based on the stautory federal income tax rate of 35%, adjusted for applicable state income taxes net of the related federal tax benefit.

Table of Contents

Total interest-bearing liabilities	83,924	459	1.10	94,418	708	1.51
Net interest spread			2.77			2.49
Non-interest-bearing deposits (3)	27,109			23,255		
Other liabilities	3,171			3,068		
Stockholders equity	16,740			17,678		
	$ 130,944			$ 138,419		
Net interest income/margin on a taxable-equivalent basis (4)		$ 1,744	3.06%		$ 1,702	2.82%

Notes:

(1) Loans, net of unearned income include non-accrual loans for all periods presented.

(2) Interest income includes net loan fees of $28 million and $22 million for the six months ended June 30, 2011 and 2010, respectively.

(3) Total deposit costs may be calculated by dividing total interest expense on deposits by the sum of interest-bearing deposits and non-interest bearing deposits. The rates for total deposit costs equal 0.56% and 0.90% for the six months ended June 30, 2011 and 2010, respectively.

(4) The computation of taxable-equivalent net interest income is based on the stautory federal income tax rate of 35%, adjusted for applicable state income taxes net of the related federal tax benefit.

Table of Contents

For the second quarter of 2011, net interest income (taxable-equivalent basis) totaled $872 million compared to $863 million in the second quarter of 2010. The net interest margin (taxable-equivalent basis) was 3.05 percent in the first quarter of 2011, compared to 2.87 percent during the second quarter of 2010. For the first six months of both 2011 and 2010, net interest income (taxable equivalent basis) totaled $1.7 billion. The net interest margin (taxable-equivalent basis) was 3.06% for the first six months of 2011, compared to 2.82% for the first six months of 2010. Overall declines in loan balances and earning assets were more than offset by continued improvements in deposit costs, which declined 26 basis points from the second quarter of 2010 to the second quarter of 2011.

MARKET RISK INTEREST RATE RISK

Regions primary market risk is interest rate risk, including uncertainty with respect to absolute interest rate levels as well as uncertainty with respect to relative interest rate levels, which is impacted by both the shape and the slope of the various yield curves that affect the financial products and services that the Company offers. To quantify this risk, Regions measures the change in its net interest income in various interest rate scenarios compared to a base case scenario. Net interest income sensitivity is a useful short-term indicator of Regions interest rate risk.

Sensitivity Measurement Financial simulation models are Regions primary tools used to measure interest rate exposure. Using a wide range of sophisticated simulation techniques provides management with extensive information on the potential impact to net interest income caused by changes in interest rates. Models are structured to simulate cash flows and accrual characteristics of Regions balance sheet. Assumptions are made about the direction and volatility of interest rates, the slope of the yield curve, and the changing composition of the balance sheet that result from both strategic plans and from customer behavior. Among the assumptions are expectations of balance sheet growth and composition, the pricing and maturity characteristics of existing business and the characteristics of future business. Interest rate-related risks are expressly considered, such as pricing spreads, the lag time in pricing deposit accounts, prepayments and other option risks. Regions considers these factors, as well as the degree of certainty or uncertainty surrounding their future behavior.

Historically, Regions balance sheet has consisted of a relatively rate-sensitive deposit base that funds a predominantly floating rate commercial and consumer loan portfolio. This mix of Regions core business activities creates a naturally asset sensitive balance sheet, meaning that increases (decreases) in interest rates would likely have a positive (negative) cumulative impact on Regions net interest income. To manage the balance sheet s interest rate risk, Regions maintains a portfolio of largely fixed-rate discretionary investments, loans and derivatives. The market risk of these discretionary instruments attributable to variation in interest rates is fully incorporated into the simulation results in the same manner as all other balance sheet instruments.

The primary objective of asset/liability management at Regions is to coordinate balance sheet composition with interest rate risk management to sustain a reasonable and stable net interest income throughout various interest rate cycles. In computing interest rate sensitivity for measurement, Regions compares a set of alternative interest rate scenarios to the results of a base case scenario based on market forward rates. The standard set of interest rate scenarios includes the traditional instantaneous parallel rate shifts of plus 100 and 200 basis points. Regions also prepares a minus 100 basis points scenario; a minus 200 basis scenario is not considered realistic in the current rate environment. Up-rate scenarios of greater magnitude are also analyzed, and are of increased importance provided that current and historic low levels of interest rates increase the relative likelihood of a rapid and substantial increase in interest rates. Regions also includes simulations of gradual interest rate movements that may more realistically mimic potential interest rate movements. These gradual scenarios include curve steepening, flattening, and parallel movements of various magnitudes phased in over a six-month period, and include rate shifts of plus and minus 100 basis points and plus 200 basis points.

Exposure to Interest Rate Movements As of June 30, 2011, Regions was moderately asset sensitive to both gradual and instantaneous rate shifts as compared to the base case for the measurement horizon ending June

Table of Contents

2012. Regions continues to observe that the pace of economic recovery is at risk of being slow, which may result in a continuation of this period of low interest rates. To partially offset the adverse impact on net interest income and net interest margin attributable to an extended period of low interest rates, Regions entered into a series of receive-fixed interest rate swaps. These instruments have a final maturity in June 2012. Until maturity of these instruments, Regions net interest income sensitivity is relatively neutral to movements in short-term interest rates. Therefore, the exposure reflected in the minus 100 basis points scenario primarily reflects the risk of accelerating prepayment activity as spurred by a decrease in long-term interest rates. The table below summarizes Regions position, and the scenarios are inclusive of all interest-rate risk hedging activities. Note that where scenarios would indicate negative interest rates, a minimum of zero is applied.

Table 18 Interest Rate Sensitivity

Gradual Change in Interest Rates	**Estimated Annual Change in Net Interest Income June 30, 2011 (In millions)**	
+200 basis points	$	225
+100 basis points		114
-100 basis points		(201)
Instantaneous Change in Interest Rates		
+200 basis points	$	276
+100 basis points		162
-100 basis points		(234)

Interest rate movements may also have an impact on the value of Regions securities portfolio, which can directly impact the carrying value of shareholders equity. Regions from time to time may hedge these price movements with derivatives (as discussed below). However, at June 30, 2011, Regions had no designations of hedges to mitigate price movements of securities.

Derivatives Regions uses financial derivative instruments for management of interest rate sensitivity. The Asset and Liability Committee (ALCO), which consists of members of Regions senior management team, in its oversight role for the management of interest rate sensitivity, approves the use of derivatives in balance sheet hedging strategies. The most common derivatives Regions employs are forward rate contracts, Eurodollar futures contracts, interest rate swaps, options on interest rate swaps, interest rate caps and floors, and forward sale commitments. Derivatives are also used to offset the risks associated with customer derivatives, which include interest rate, credit and foreign exchange risks.

Forward rate contracts are commitments to buy or sell financial instruments at a future date at a specified price or yield. A Eurodollar futures contract is a future on a Eurodollar deposit. Eurodollar futures contracts subject Regions to market risk associated with changes in interest rates. Because futures contracts are cash settled daily, there is minimal credit risk associated with Eurodollar futures. Interest rate swaps are contractual agreements typically entered into to exchange fixed for variable (or vice versa) streams of interest payments. The notional principal is not exchanged but is used as a reference for the size of interest settlements. Interest rate options are contracts that allow the buyer to purchase or sell a financial instrument at a predetermined price and time. Forward sale commitments are contractual obligations to sell market instruments at a future date for an already agreed-upon price. Foreign currency contracts involve the exchange of one currency for another on a specified date and at a specified rate. The Company is subject to the credit risk that another party will fail to perform.

Regions has made use of interest rate swaps to effectively convert a portion of its fixed-rate funding position to a variable-rate position and, in some cases, to effectively convert a portion of its variable-rate loan portfolio to fixed-rate. Regions also uses derivatives to manage interest rate and pricing risk associated with its mortgage

origination business. In the period of time that elapses between the origination and sale of mortgage loans, changes in interest rates have the potential to cause a decline in the value of the loans in this held-for-sale portfolio. Futures contracts and forward sale commitments are used to protect the value of the loan pipeline and loans held for sale from changes in interest rates and pricing.

Regions manages the credit risk of these instruments in much the same way as it manages credit risk of the loan portfolios by establishing credit limits for each counterparty and through collateral agreements for dealer transactions. For non-dealer transactions, the need for collateral is evaluated on an individual transaction basis and is primarily dependent on the financial strength of the counterparty. Credit risk is also reduced significantly by entering into legally enforceable master netting agreements. When there is more than one transaction with a counterparty and there is a legally enforceable master netting agreement in place, the exposure represents the net of the gain and loss positions with and collateral received from and/or posted to that counterparty. The Credit Risk section in Regions Annual Report on Form 10-K for the year ended December 31, 2010 contains more information on the management of credit risk.

Regions also uses derivatives to meet the needs of its customers. Interest rate swaps, interest rate options and foreign exchange forwards are the most common derivatives sold to customers. Other derivatives instruments with similar characteristics are used to hedge market risk and minimize volatility associated with this portfolio. Instruments used to service customers are held in the trading account, with changes in value recorded in the consolidated statements of operations.

The primary objective of Regions hedging strategies is to mitigate the impact of interest rate changes, from an economic perspective, on net interest income and the net present value of its balance sheet. The overall effectiveness of these hedging strategies is subject to market conditions, the quality of Regions execution, the accuracy of its valuation assumptions, counterparty credit risk and changes in interest rates. See Note 10 Derivative Financial Instruments and Hedging Activities to the consolidated financial statements for a tabular summary of Regions quarter-end and year-end derivatives positions and further discussion.

MARKET RISK PREPAYMENT RISK

Regions, like most financial institutions, is subject to changing prepayment speeds on mortgage-related assets under different interest rate environments. Prepayment risk is a significant risk to earnings and specifically to net interest income. For example, mortgage loans and other financial assets may be prepaid by a debtor, so that the debtor may refinance its obligations at lower rates. As loans and other financial assets prepay in a falling rate environment, Regions must reinvest these funds in lower-yielding assets. Prepayments of assets carrying higher rates reduce Regions interest income and overall asset yields. Conversely, in a rising rate environment, these assets will prepay at a slower rate, resulting in opportunity cost by not having the cash flow to reinvest at higher rates. Prepayment risk can also impact the value of securities and the carrying value of equity. Regions greatest exposures to prepayment risks primarily rest in its mortgage-backed securities portfolio, the mortgage fixed-rate loan portfolio and the mortgage servicing asset, all of which tend to be sensitive to interest rate movements. Regions also has prepayment risk that would be reflected in non-interest income in the form of servicing income on loans sold. Regions actively monitors prepayment exposure as part of its overall net interest income forecasting and interest rate risk management. In particular, because interest rates are currently relatively low, Regions is actively managing exposure to declining prepayments that are expected to coincide with increasing interest rates in both the loan and securities portfolios.

MARKET RISK BROKERAGE AND OTHER MARKET ACTIVITY RISK

References below, and elsewhere in this Form 10-Q, to Morgan Keegan are intended to include not only Morgan Keegan & Company, Inc. but also certain of its affiliates and subsidiaries. It should not be assumed or inferred that any specific activity mentioned is carried on by any particular Morgan Keegan entity.

Table of Contents

Morgan Keegan s business activities, including its securities inventory positions and securities held for investment, expose it to market risk. Further, the Company is also exposed to market risk in its capital markets business, which includes derivatives, loan syndication and foreign exchange trading activities, and mortgage trading activity, which includes secondary marketing of loans to government-sponsored entities.

Morgan Keegan trades for its own account in corporate and tax-exempt securities and U.S. Government agency and Government-sponsored securities. Most of these transactions are entered into to facilitate the execution of customers orders to buy or sell these securities. In addition, it trades certain equity securities in order to make a market in these securities. Morgan Keegan s trading activities require the commitment of capital. All principal transactions place the subsidiary s capital at risk. Profits and losses are dependent upon the skills of employees and market fluctuations. In order to mitigate the risks of carrying inventory and as part of other normal brokerage activities, Morgan Keegan assumes short positions on securities.

In the normal course of business, Morgan Keegan enters into underwriting and forward commitments. As of June 30, 2011, the total notional amount of forward and future commitments was approximately $1.1 billion. Morgan Keegan typically settles its position by entering into equal but opposite contracts and, as such, the contract amounts do not necessarily represent future cash requirements. Settlement of the transactions relating to such commitments is not expected to have a material effect on Regions consolidated financial position. Transactions involving future settlement give rise to market risk, which represents the potential loss that can be caused by a change in the market value of a particular financial instrument. Regions exposure to market risk is determined by a number of factors, including the size, composition and diversification of positions held, the absolute and relative levels of interest rates, and market volatility.

Additionally, in the normal course of business, Morgan Keegan enters into transactions for delayed delivery, to-be-announced securities, which are recorded in trading account assets on the consolidated balance sheets at fair value. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from unfavorable changes in interest rates or the market values of the securities underlying the instruments. The credit risk associated with these contracts is typically limited to the cost of replacing all contracts on which Morgan Keegan has recorded an unrealized gain. For exchange-traded contracts, the clearing organization acts as the counterparty to specific transactions and, therefore, bears the risk of delivery to and from counterparties.

Interest rate risk at Morgan Keegan arises from the exposure of holding interest-sensitive financial instruments such as government, corporate and municipal bonds, and certain preferred equities. Morgan Keegan manages its exposure to interest rate risk by setting and monitoring limits and, where feasible, entering into offsetting positions in securities with similar interest rate risk characteristics. Securities inventories recorded in trading account assets on the consolidated balance sheets are marked to market, and, accordingly, there are no unrecorded gains or losses in value. While a significant portion of the securities inventories have contractual maturities in excess of five years, these inventories, on average, turn over in excess of twelve times per year. Accordingly, the exposure to interest rate risk inherent in Morgan Keegan s securities inventories is less than that of similar financial instruments held by firms in other industries. Morgan Keegan s equity securities inventories are exposed to risk of loss in the event of unfavorable price movements. Also, Morgan Keegan is subject to credit risk arising from non-performance by trading counterparties, customers and issuers of debt securities owned. This risk is managed by imposing and monitoring position limits, monitoring trading counterparties, reviewing security concentrations, holding and marking to market collateral, and conducting business through clearing organizations that guarantee performance. Morgan Keegan regularly participates in the trading of some derivative securities for its customers; however, this activity does not involve Morgan Keegan acquiring a position or commitment in these products and this trading is not a significant portion of Morgan Keegan s business.

Morgan Keegan has been an underwriter and dealer in auction rate securities. See Note 13 Commitments and Contingencies to the consolidated financial statements for more details regarding regulatory action related to Morgan Keegan auction rate securities. As of June 30, 2011, customers of Morgan Keegan owned approximately $46 million of auction rate securities, and Morgan Keegan held approximately $144 million of auction rate securities on its balance sheet.

Table of Contents

To manage trading risks arising from interest rate and equity price risks, Morgan Keegan uses a Value at Risk (VAR) model along with other risk management methods to measure the potential fair value the Company could lose on its trading positions given a specified statistical confidence level and time-to-liquidate time horizon. The end-of-period VAR was approximately $608 thousand at June 30, 2011 and approximately $805 thousand at December 31, 2010. Maximum daily VAR utilization during the first quarter of 2011 was approximately $1 million and average daily VAR during the same period was approximately $884 thousand.

PROVISION FOR LOAN LOSSES

The provision for loan losses is used to maintain the allowance for loan losses at a level that in management s judgment is appropriate to absorb probable losses inherent in the portfolio at the balance sheet date. The provision for loan losses totaled $398 million in the second quarter of 2011 compared to $651 million during the second quarter of 2010. The provision for loan losses totaled $880 million for the six months ended June 30, 2011 compared to $1.4 billion for the first six months of 2010. Net charge-offs as a percentage of average loans (annualized) were 2.54 percent and 3.08 percent in the first six months of 2011 and 2010, respectively. Charge-off ratios were lower across most major categories, period over period. Investor real estate losses continue to be the largest contributor to charge-offs. In addition to lower levels of charge-offs, credit quality metrics generally improved, including lower levels of non-accrual, criticized and classified loans as well as delinquencies. Charge-offs exceeded provision for loan losses for the second quarter of 2011, primarily resulting from the allowance associated with the transfer of $545 million of classified loans to held for sale.

CREDIT RISK

Regions objective regarding credit risk is to maintain a high-quality credit portfolio that provides for stable credit costs with acceptable volatility through an economic cycle. Regions has a diversified loan portfolio in terms of product type, collateral and geography. See Table 1 for further details of each loan portfolio segment. See the Credit Risk section of the Form 10-K for the year ended December 31, 2010 for a discussion of risk characteristics of each loan type.

NON-INTEREST INCOME

The following tables present a summary of non-interest income. For expanded discussion of certain significant non-interest income items, refer to the discussion of each component following the tables presented.

Table 19 - Non-Interest Income

	Three Months Ended June 30	
	2011	2010
	(In millions)	
Service charges on deposit accounts	$ 308	$ 302
Brokerage, investment banking and capital markets	248	254
Mortgage income	50	63
Trust department income	51	49
Securities gains, net	24	
Insurance commissions and fees	25	26
Bank owned life insurance	20	21
Commercial credit fee income	20	18
Other miscellaneous income	35	23
	$ 781	$ 756

	Six Months Ended June 30	
	2011	2010
	(In millions)	
Service charges on deposit accounts	$ 595	$ 590
Brokerage, investment banking and capital markets	515	490
Mortgage income	95	130
Trust department income	101	97
Securities gains, net	106	59
Insurance commissions and fees	53	53
Bank owned life insurance	41	41
Commercial credit fee income	40	33
Leveraged lease termination gains		19
Other miscellaneous income	78	56
	$ 1,624	$ 1,568

Service charges on deposit accounts Service charges on deposit accounts increased $6 million for the quarter ended June 30, 2011, as compared to the second quarter of 2010. For the first six months of 2011, service charges on deposit accounts increased $5 million when compared to the comparable 2010 period. Increases in interchange income more than offset declines in NSF fees resulting from implementation of Regulation E in 2010.

The Federal Reserve Board of Governors has announced its final rule on debit card interchange fees mandated by the Durbin Amendment to the Dodd-Frank Act effective October 1, 2011. Based on the final ruling, the company estimates that the impact on annual debit interchange revenue will be approximately $170 million before any mitigation efforts. However, the company believes it will be able to mitigate this impact over time through revenue enhancements and expense management.

Brokerage, investment banking and capital markets Regions primary source of brokerage, investment banking and capital markets revenue is its subsidiary, Morgan Keegan. Morgan Keegan s revenues are predominately recorded in the brokerage, investment banking and capital markets, as well as trust department income lines of the consolidated statements of operations, while a smaller portion is reported in other non-interest income categories. Total brokerage, investment banking and capital markets income decreased by $6 million for the second quarter of 2011 as compared to the second quarter of 2010. For the first six months of 2011, brokerage, investment banking and capital markets income increased $25 million when compared to the comparable 2010 period. The increase was driven by first quarter 2011 activity, primarily higher revenues from the equity capital markets, investment banking and private client brokerage services divisions. Also contributing to the year-to-date increase was higher revenues from the capital markets activities of the bank.

Table of Contents

The following table details the breakout of revenue by division contributed by Morgan Keegan:

Table 20 - Morgan Keegan

Breakout of Revenue by Division (1)

	Private Client	Fixed-Income Capital Markets	Equity Capital Markets	Investment Banking (Dollars in millions)	Regions MK Trust	Asset Management	Interest And Other
Three months ended June 30, 2011:							
Gross revenue	$ 117	$ 71	$ 14	$ 37	$ 61	$ 5	$ 9
Percent of gross revenue	37.3%	22.6%	4.5%	11.8%	19.4%	1.6%	2.8%
Three months ended June 30, 2010:							
Gross revenue	$ 119	$ 79	$ 15	$ 35	$ 52	$ 5	$ 5
Percent of gross revenue	38.4%	25.5%	4.8%	11.3%	16.8%	1.6%	1.6%
Six months ended June 30, 2011:							
Gross revenue	$ 242	$ 137	$ 30	$ 67	$ 117	$ 8	$ 46
Percent of gross revenue	37.4%	21.2%	4.6%	10.4%	18.1%	1.2%	7.1%
Six months ended June 30, 2010:							
Gross revenue	$ 233	$ 151	$ 27	$ 63	$ 101	$ 9	$ 40
Percent of gross revenue	37.3%	24.2%	4.4%	10.1%	16.2%	1.4%	6.4%

(1) Certain amounts in prior periods have been reclassified to reflect current period presentation

On June 22, 2011, Regions announced, as part of its ongoing capital planning process, plans to explore strategic alternatives for Morgan Keegan as the Company evaluates how best to manage its capital to increase shareholder value. Morgan Asset Management and Regions Morgan Keegan Trust are not included in this review.

Mortgage income Mortgage income decreased $13 million for the second quarter of 2011 when compared to the second quarter of 2010. For the six months ended June 30, 2011, mortgage income decreased $35 million when compared to the comparable 2010 period. The decline for both periods reflects market valuation adjustments for mortgage servicing rights and related derivatives, which were affected by the rate environment shifts in 2011 compared to 2010.

Securities gains Securities gains increased $24 million for the second quarter of 2011 when compared to the second quarter of 2010. For the six months ended June 30, 2011, securities gains increased $47 million when compared to the comparable 2010 period. In the second quarter of 2011, Regions sold approximately $4.0 billion in securities. For the first six months of 2011, Regions sold approximately $6.4 billion in securities. For both periods, the sales were primarily agency securities available for sale, and the proceeds were reinvested predominantly into similar securities with shorter durations.

Leveraged lease termination gains A 2008 settlement with the IRS negatively impacted the economics of Regions leveraged lease portfolio. In addition, there was a mutual desire with lessees to terminate certain leases within this portfolio. Therefore, Regions terminated certain leveraged leases during the first quarter of 2010 resulting in a $19 million gain. There were no such terminations in the second quarter of 2010 or during 2011.

Table of Contents

NON-INTEREST EXPENSE

The following tables present a summary of non-interest expense. For expanded discussion of certain significant non-interest expense items, refer to the discussion of each component following the tables presented.

Table 21 - Non-Interest Expense

	Three Months Ended June 30	
	2011	2010
	(In millions)	
Salaries and employee benefits	$ 561	$ 560
Net occupancy expense	107	110
Furniture and equipment expense	79	79
Professional and legal fees	61	75
Amortization of core deposit intangible	24	27
Other real estate owned expense	37	41
FDIC premiums	72	58
Branch consolidation and property and equipment charges	77	
Regulatory charge		200
Other miscellaneous expenses	180	176
	$ 1,198	$ 1,326

	Six Months Ended June 30	
	2011	2010
	(In millions)	
Salaries and employee benefits	$ 1,155	$ 1,135
Net occupancy expense	216	230
Furniture and equipment expense	156	153
Professional and legal fees	141	141
Amortization of core deposit intangible	49	55
Other real estate owned expense	76	83
FDIC premiums	125	117
Branch consolidation and property and equipment charges	77	
Regulatory charge		200
Loss on early extinguishment of debt		53
Other-than-temporary impairments, net		1
Other miscellaneous expenses	370	388
	$ 2,365	$ 2,556

Salaries and employee benefits Salaries and employee benefits were relatively flat for the second quarter of 2011 when compared to the second quarter of 2010. For the six months ended June 30, 2011, salaries and employee benefits increased $20 million when compared to the comparable 2010 period. The increase in year-to-date expense is primarily due to incentives and commissions including those related to brokerage, investment banking and capital markets income.

Net occupancy expense Net occupancy expense was relatively flat for the second quarter of 2011 when compared to the second quarter of 2010. For the six months ended June 30, 2011, net occupancy expense decreased $14 million when compared to the comparable 2010 period. This decrease is primarily due to branch consolidation charges of $8 million in the first quarter of 2010 primarily related to terminated leases on occupied facilities.

Professional and legal fees Professional and legal fees decreased $14 million for the second quarter of 2011 when compared to the second quarter of 2010, due to lower legal costs. Year-to-date expense was unchanged compared to last year.

Other real estate owned expense Other real estate owned (OREO) expense includes the cost of adjusting foreclosed properties to fair value after these assets have been classified as OREO, net gains and losses on sales of properties, as well as other costs to maintain the property such as property taxes, security, and grounds maintenance. OREO expense decreased $4 million for the second quarter of 2011 when compared to the second quarter of 2010. For the six months ended June 30, 2011, OREO expense decreased $7 million. OREO balances decreased to $437 million at June 30, 2011 from $454 million at December 31, 2010 and $546 million at June 30, 2010.

FDIC premiums FDIC premiums increased $14 million for the second quarter of 2011 when compared to the second quarter of 2010. For the six months ended June 30, 2011, FDIC premiums increased $8 million when compared to the comparable 2010 period. The increase in both the quarterly and year-to-date amounts was related to a new assessment rule, which revised the deposit insurance assessment system for large institutions. The new rule changed the assessment base from deposits as the basis and utilizes a risk-based approach which calculates the assessment using average consolidated assets minus average tangible equity. Implementation of the new rule was effective beginning in the second quarter of 2011.

Branch consolidation and property and equipment charges The Company recorded $77 million in valuation charges during the second quarter of 2011 related to lower of cost or market adjustments on owned branch property, terminated ground leases, and impairment of other equipment. The charges were driven primarily by the Company s second quarter decision to consolidate approximately 40 branches later in 2011.

Regulatory charge During the second quarter of 2010, the SEC, a joint state task force of state securities regulators and FINRA announced that they were commencing administrative proceedings against Morgan Keegan, Morgan Asset Management and certain of their employees for violations of federal and state securities laws and NASD rules relating to certain funds previously administered by Morgan Keegan and Morgan Asset Management. Based on the status of settlement negotiations, Regions concluded that a loss on the matter was probable and reasonably estimable. Accordingly, at June 30, 2010, Morgan Keegan recorded a $200 million charge representing the estimate of probable loss. The charges were settled during the second quarter of 2011. See further discussion in Note 13 to the consolidated financial statements.

Loss on early extinguishment of debt During the first quarter of 2010, Regions prepaid approximately $1.5 billion of FHLB advances, recognizing an expense of $53 million. There was no corresponding expense in 2011.

Other miscellaneous expenses Other miscellaneous expenses include communications, postage, supplies, credit-related costs and business development services. Other miscellaneous expenses decreased $18 million to $370 million in the first six months of 2011 when compared to the same period of 2010, and was essentially unchanged comparing second quarter 2011 to the same period of 2010.

INCOME TAXES

The Company s income tax benefit for the three months ended June 30, 2011 was $60 million compared to $88 million for the same period in 2010, resulting in an effective tax rate of (122.4) percent and 24.1 percent, respectively. Income tax benefit for the six months ended June 30, 2011 was $72 million compared to $249 million for the same period in 2010, resulting in an effective tax rate of (67.9) percent and 34.5 percent, respectively. The change in the income tax benefit primarily reflects the finalization of the Morgan Keegan regulatory matters. Upon settlement, the Company determined that a portion of the settlement charge is deductible for income tax purposes, resulting in a benefit to income taxes of $44 million for the second quarter. The impact of positive consolidated pre-tax earnings also drove the increase in the income tax benefit.

Table of Contents

The Company s effective tax rate is affected by recurring items such as affordable housing tax credits, bank-owned life insurance and other tax-exempt income, which are expected to be consistent in the near term. The effective tax rate is also affected by one-time items that may occur in any given period but are not consistent from period to period, such as the termination of leveraged leases. The effective tax rates for future periods in 2011 may not be comparable to the current period.

At June 30, 2011, the Company reported a net deferred tax asset of $1.4 billion, the same as for the period ended December 31, 2010. Of this amount, $0.9 billion was generated from differences between the financial statement carrying amounts and the corresponding tax bases of assets and liabilities, of which a significant portion relates to the allowance for loan losses. These net deferred tax assets have not yet reduced taxable income and therefore, do not have a set expiration date. The remaining net deferred tax asset balance relates to tax carryforwards that have defined expiration dates which are typically 15 or 20 years from the date of creation.

The Company s determination of the realization of the net deferred tax asset is based on its assessment of all available positive and negative evidence. The primary sources of positive and negative evidence impacting taxable income are summarized below.
