If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 1.01 Entry into a Material Definitive Agreement.

Amendment to Transaction Agreement

As previously reported, Rowan Companies plc, a public limited company organized under the laws of England and Wales (the “**Company**” or “**Rowan**”), is pursuing a transaction to effect a “merger-of-equals” with Ensco plc, a public limited company organized under the laws of England and Wales (“**Ensco**”). Pursuant to the Transaction Agreement, dated October 7, 2018, by and between the Company and Ensco (the “**Transaction Agreement**”) and by means of a court-sanctioned scheme of arrangement (the “**Scheme**”) under Part 26 of the U.K. Companies Act 2006, each of the issued and outstanding Class A ordinary shares of the Company (each, a “**Rowan Ordinary Share**”) will be exchanged (the “**Transaction**”) pursuant to the Scheme for a fixed number of Class A ordinary shares of Ensco each with a nominal value of \$0.10 per share (the “**New Ensco Shares**”).

On January 28, 2019, the Company and Ensco entered into a Deed of Amendment No. 1 to the Transaction Agreement (the “**Amendment**”) to amend the Transaction Agreement. The Amendment increases the number of New Ensco Shares holders of Rowan Ordinary Shares will receive for each Rowan Ordinary Share from 2.215 to 2.750.

Other than as expressly modified pursuant to the Amendment, the Transaction Agreement, which was previously filed as Exhibit 2.1 to the Current Report on Form 8-K filed with the Securities and Exchange Commission (“**SEC**”) by the Company on October 8, 2018, remains in full force and effect as originally executed on October 7, 2018. The foregoing description of the Amendment does not purport to be complete and is subject to, and qualified in its entirety by the full text of the Amendment attached hereto as Exhibit 2.1 to this Current Report on Form 8-K, which is incorporated herein by reference.

Item 7.01 Regulation FD Disclosure.

On January 29, 2019, the Company issued a press release (the “**Press Release**”) announcing the execution of the Amendment. A copy of the Press Release is attached hereto as Exhibit 99.1 and incorporated into this Item 7.01 by reference.

In accordance with General Instruction B.2 of Form 8-K, the information set forth in this Item 7.01 and the attached Exhibit 99.1 shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of that section, nor shall such information be deemed

incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits

Forward-Looking Statements

Statements included in this document regarding the proposed transaction between Enesco plc (“Enesco”) and Rowan, including benefits, expected synergies and other expense savings and operational and administrative efficiencies, opportunities, timing, expense and effects of the transaction, financial performance, accretion to cash flows, revenue growth, credit ratings or other attributes of Enesco plc following the completion of the transaction and other statements that are not historical facts, are forward-looking statements (including within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended (the “Securities Act”). Forward-looking statements include words or phrases such as “anticipate,” “believe,” “contemplate,” “estimate,” “expect,” “intend,” “plan,” “project,” “could,” “may,” “might,” “should,” “will” and words and phrases of similar import. Forward-looking statements involve risks and uncertainties including, but not limited to, actions by regulatory authorities, rating agencies or other third parties, actions by the respective companies’ security holders, costs and difficulties related to integration of Enesco and Rowan, delays, costs and difficulties related to the transaction, market conditions, and Enesco’s financial results and performance following the completion of the transaction, satisfaction of closing conditions, ability to repay debt and timing thereof, availability and terms of any financing and other factors detailed in the risk factors section and elsewhere in Enesco’s and Rowan’s Annual Report on Form 10-K for the year ended December 31, 2017 and their respective other filings with the Securities and Exchange Commission (the “SEC”), which are available on the SEC’s website at www.sec.gov. Should one or more of these risks or uncertainties materialize (or the other consequences of such a development worsen), or should underlying assumptions prove incorrect, actual outcomes may vary materially from those forecasted or expected. All information in this document is as of today. Except as required by law, both Enesco and Rowan disclaim any intention or obligation to update publicly or revise such statements, whether as a result of new information, future events or otherwise.

Additional Information and Where to Find It

In connection with the proposed transaction, Enesco and Rowan have filed a joint proxy statement on Schedule 14A with the SEC. Enesco and Rowan intend that the proposed transaction will be implemented by means of a court-sanctioned scheme of arrangement between Rowan and Rowan’s shareholders under the UK Companies Act 2006, as amended, in which case the issuance of Enesco’s ordinary shares in the proposed transaction would not be expected to require registration under the Securities Act, pursuant to an exemption provided by Section 3(a)(10) under the Securities Act. In the event that Enesco determines, with Rowan’s consent, to structure the transaction as an offer or otherwise in a manner that is not exempt from the registration requirements of the Securities Act, Enesco will file a registration statement with the SEC containing a prospectus with respect to Enesco’s ordinary shares that would be issued in the proposed transaction. INVESTORS AND SECURITY HOLDERS OF ENSCO AND ROWAN ARE ADVISED TO CAREFULLY READ THE JOINT PROXY STATEMENT (WHICH INCLUDES AN EXPLANATORY STATEMENT IN RESPECT OF ANY SCHEME OF ARRANGEMENT OF ROWAN, IN ACCORDANCE WITH THE REQUIREMENTS OF THE UK COMPANIES ACT 2006) AND ANY REGISTRATION STATEMENT/PROSPECTUS (INCLUDING ALL AMENDMENTS AND SUPPLEMENTS THERETO) WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE TRANSACTION, THE PARTIES TO THE TRANSACTION AND THE RISKS ASSOCIATED WITH THE TRANSACTION. A definitive joint proxy statement has been and any registration

statement/prospectus, as applicable, will be sent to security holders of EnSCO and Rowan in connection with the EnSCO and Rowan shareholder meetings. Investors and security holders may obtain a free copy of the joint proxy statement (when available), any registration statement/prospectus, and other relevant documents filed by EnSCO and Rowan with the SEC from the SEC's website at www.sec.gov. Security holders and other interested parties will also be able to obtain, without charge, a copy of the joint proxy statement, any registration statement/prospectus, and other relevant documents (when available) by directing a request by mail or telephone to either Investor Relations, EnSCO plc, 5847 San Felipe, Suite 3300, Houston, Texas 77057, telephone 713-789-1400, or Investor Relations, Rowan Companies plc, 2800 Post Oak Boulevard, Suite 5450, Houston, Texas 77056, telephone 713-621-7800. Copies of the documents filed by EnSCO with the SEC will be available free of charge on EnSCO's website at www.enscoplc.com under the tab "Investors." Copies of the documents filed by Rowan with the SEC will be available free of charge on Rowan's website at www.rowan.com/investor-relations.

Participants in Proxy Solicitation

EnSCO and Rowan and their respective directors, executive officers and certain other members of management may be deemed to be participants in the solicitation of proxies from their respective security holders with respect to the transaction. Information about these persons is set forth in the joint proxy statement filed by EnSCO and Rowan with the SEC on December 11, 2018, respectively, and subsequent statements of changes in beneficial ownership on file with the SEC. Security holders and investors may obtain additional information regarding the interests of such persons, which may be different than those of the respective companies' security holders generally, by reading the joint proxy statement, any registration statement and other relevant documents regarding the transaction, which will be filed with the SEC.

No Offer or Solicitation

This document is not intended to and does not constitute an offer to sell or the solicitation of an offer to subscribe for or buy or an invitation to purchase or subscribe for any securities or the solicitation of any vote in any jurisdiction pursuant to the proposed transaction or otherwise, nor shall there be any sale, issuance or transfer of securities in any jurisdiction in contravention of applicable law. Subject to certain exceptions to be approved by the relevant regulators or certain facts to be ascertained, the public offer will not be made directly or indirectly, in or into any jurisdiction where to do so would constitute a violation of the laws of such jurisdiction, or by use of the mails or by any means or instrumentality (including without limitation, facsimile transmission, telephone and the internet) of interstate or foreign commerce, or any facility of a national securities exchange, of any such jurisdiction.

Service of Process

EnSCO and Rowan are incorporated under the laws of England and Wales. In addition, some of their respective officers and directors reside outside the United States, and some or all of their respective assets are or may be located in jurisdictions outside the United States. Therefore, investors may have difficulty effecting service of process within the United States upon those persons or recovering against EnSCO, Rowan or their respective officers or directors on judgments of United States courts, including judgments based upon the civil liability provisions of the United States federal securities laws. It may not be possible to sue EnSCO, Rowan or their respective officers or directors in a non-U.S. court for violations of the U.S. securities laws.

Thomas P. Burke
President and Chief Executive Officer

Exhibit 2.1

DEED OF AMENDMENT NO. 1 TO TRANSACTION AGREEMENT

THIS DEED OF AMENDMENT NO. 1 TO TRANSACTION AGREEMENT, dated as of January 28, 2019 (this "Amendment"), is by and between Ensco plc, a public limited company organized under the Laws of England and Wales ("Ensco"), and Rowan Companies plc, a public limited company organized under the Laws of England and Wales ("Rowan"). Ensco and Rowan are each sometimes referred to herein as a "Party" and collectively as the "Parties".

WHEREAS, Ensco and Rowan entered into that certain Transaction Agreement dated as of October 7, 2018 (the "Transaction Agreement");

WHEREAS, Section 8.11 of the Transaction Agreement provides that any provision of the Transaction Agreement may be amended or waived, whether before or after receipt of the Rowan Shareholder Approval or the passing of the Ensco Shareholder Resolutions, as applicable, if such amendment or waiver is in writing and signed, in the case of an amendment, by Rowan and Ensco; and

WHEREAS, Ensco and Rowan now intend to amend certain provisions of the Transaction Agreement as set forth herein.

NOW, THEREFORE, Ensco and Rowan agree as follows:

SECTION 1. Defined Terms. Capitalized terms used herein that are not otherwise defined have the meanings set forth in the Transaction Agreement.

SECTION 2. Representations of the Parties.

2.1 Representations and Warranties of Rowan.

(a) Rowan has the requisite corporate power and authority to execute and deliver this Amendment. This Amendment has been duly and validly executed and delivered by Rowan and, assuming this Amendment constitutes the valid and binding agreement of Ensco, constitutes the valid and binding agreement of Rowan, enforceable against Rowan in accordance with its terms, except that such enforcement may be subject to the Remedies Exceptions.

(b) The Board of Directors of Rowan has received the opinion letter of Goldman, Sachs & Co. LLC to the effect that, as of the date hereof and subject to the assumptions, limitations, qualifications and other matters set forth therein, the Exchange Ratio pursuant to the Transaction Agreement, as amended by this Amendment, is fair from a financial point of view, to the holders (other than Ensco and its affiliates) of Rowan Ordinary Shares. Rowan shall, promptly following the execution of this Amendment by all Parties, furnish an accurate, complete and confidential copy of said opinion letter to Ensco solely for informational purposes.

2.2 Representations and Warranties of Ensco. Ensco has the requisite corporate power and authority to execute and deliver this Amendment. This Amendment has been duly and validly executed and delivered by Ensco and, assuming this Amendment constitutes the valid and binding agreement of Rowan, constitutes the valid and binding agreement of Ensco, enforceable against Ensco in accordance with its terms, except that such enforcement may be subject to the Remedies Exceptions.

SECTION 3. Amendments to Transaction Agreement. Section 2.2(a) of the Transaction Agreement is hereby amended with immediate effect by deleting “2.215” and replacing it with “2.750”.

SECTION 4. Effect on Transaction Agreement; Effect on Scheme of Arrangement.

4.1 Other than as specifically set forth herein, all other terms and provisions of the Transaction Agreement shall remain unaffected by the terms of this Amendment, and shall continue in full force and effect. The Transaction Agreement and this Amendment shall be read and construed as one document and references in the Transaction Agreement (i) to the “Agreement” shall be to the Transaction Agreement as amended by this Amendment; and (ii) to the “Scheme of Arrangement” and the “Transaction” shall be to the Scheme of Arrangement and the Transaction as amended as a consequence of this Amendment.

4.2 The Parties shall amend the Scheme of Arrangement to give effect to the amendment provided for by Section 3 of this Amendment.

4.3 Without prejudice to the provisions of the Transaction Agreement, the Parties agree that they shall each procure that the Proxy Statement, as supplemented to give effect to this Amendment, includes: (i) in the case of Ensco, the Ensco Board Recommendation (unless the Board of Directors of Ensco has effected an Ensco Adverse Recommendation Change pursuant to and in accordance with Section 5.4 of the Transaction Agreement); and (ii) in the case of Rowan, the Rowan Board Recommendation (unless the Board of Directors of Rowan has effected a Rowan Adverse Recommendation Change pursuant to and in accordance with Section 5.3 of the Transaction Agreement).

SECTION 5. Severability. Any term or provision of this Amendment which is invalid or unenforceable in any jurisdiction shall, as to that jurisdiction, be ineffective to the extent of such invalidity or unenforceability without rendering invalid or unenforceable the remaining terms and provisions of this Amendment in any other jurisdiction. If any provision of this Amendment is so broad as to be unenforceable, such provision shall be interpreted to be only so broad as is enforceable.

SECTION 6. Headings. Headings of the Sections of this Amendment are for convenience of the Parties only and shall be given no substantive or interpretive effect whatsoever.

SECTION 7. Counterparts; Effectiveness. This Amendment may be executed in two or more counterparts, each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument, and shall become effective when one or more counterparts have been signed by each of the Parties and delivered (by telecopy, electronic delivery or otherwise) to the other Parties. Signatures to this Amendment transmitted by facsimile transmission, by electronic mail in .pdf form, or by any other electronic means intended to preserve the original graphic and pictorial appearance of a document, will have the same effect as physical delivery of the paper document bearing the original signature.

SECTION 8. Assignment; Binding Effect. Neither this Amendment nor any of the rights, interests or obligations hereunder shall be assigned or delegated by a Party hereto without the prior written consent of the other Party. Subject to the first sentence of this Section 8, this Amendment shall be binding upon and shall inure to the benefit of the Parties hereto and their respective successors and assigns. Any purported assignment not permitted under this Section 8 shall be null and void.

SECTION 9. Governing Law; Jurisdiction.

9.1 This Amendment is to be governed by and construed in accordance with English law. Any matter, claim or dispute arising out of or in connection with this Amendment, whether contractual or non-contractual, is to be governed by and determined in accordance with English law.

9.2 The courts of England are to have exclusive jurisdiction to settle any dispute, whether contractual or non-contractual, arising out of or in connection with this Amendment. Any proceeding, suit or action arising out of or in connection with this Amendment or the negotiation, existence, validity or enforceability of this Amendment (“Proceedings”) shall be brought only in the courts of England. Each Party waives (and agrees not to raise) any objection, on the ground of forum non conveniens or on any other ground, to the taking of Proceedings in the courts of England. Each Party also agrees that a judgment against it in Proceedings brought in England shall be conclusive and binding upon it and may be enforced in any other jurisdiction. Each Party irrevocably submits and agrees to submit to the jurisdiction of the courts of England. No delay or omission by any Party in exercising any right, power or remedy provided by law or under this Amendment shall (i) affect that right, power or remedy; or (ii) operate as a waiver of it. The single or partial exercise of any right, power or remedy provided by law or under this Amendment shall not preclude any other or further exercise of it or the exercise of any other right, power or remedy. The rights, powers and remedies provided in this Amendment are cumulative and not exclusive of any rights, powers and remedies provided by law. Without prejudice to any other rights and remedies which either Party may have, each Party acknowledges and agrees that damages may not be an adequate remedy for any breach by either Party of the provisions of this

Amendment and either Party shall be entitled to seek the remedies of injunction, specific performance and other equitable remedies (and neither of the Parties shall contest the appropriateness or availability thereof), for any threatened or actual breach of any such provision of this Amendment by either Party and no proof or special damages shall be necessary for the enforcement by either Party of the rights under this Amendment.

SECTION 10. WAIVER OF JURY TRIAL. EACH OF THE PARTIES HERETO TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW IRREVOCABLY WAIVES ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY LEGAL PROCEEDING ARISING, DIRECTLY OR INDIRECTLY, OUT OF OR RELATING TO THIS AMENDMENT, THE TRANSACTION AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY OR THE ACTIONS OF ROWAN OR ENSCO IN THE NEGOTIATION, ADMINISTRATION, PERFORMANCE OR ENFORCEMENT THEREOF.

SECTION 11. Entire Agreement. This Amendment, the Transaction Agreement (including the exhibits and schedules thereto) and the Confidentiality Agreement, as amended, constitute the entire agreement, and supersede all other prior agreements and understandings, both written and oral, between the Parties, or any of them, with respect to the subject matter hereof and thereof, and this Amendment is not intended to grant standing to any person other than the Parties hereto.

FOR IMMEDIATE RELEASE

**Rowan Companies plc Amends Transaction Agreement with Ensco plc
to Increase Exchange Ratio to 2.750**

Agreement Represents 24.2% Increase from Previously Agreed Exchange Ratio

Reiterates Strategic and Financial Benefits of Combining with Ensco

Amended Agreement Supported by Major Rowan Shareholder Odey Asset Management LLP

HOUSTON, January 29, 2019 – Rowan Companies plc ("Rowan" or the "Company") (NYSE: RDC) today announced that it has entered into an amendment to the Transaction Agreement with Ensco plc (NYSE: ESV) ("Ensco") providing for the combination of the two companies in an all-stock transaction. Under the amended agreement, Rowan shareholders will receive 2.750 shares of Ensco for each share of Rowan they own. All other terms and conditions of the agreement entered into on October 7, 2018, remain the same.

Several Rowan shareholders have indicated their support for the transaction and the value creation opportunity that the pending combination presents to the Company's shareholders. In concert with the amended transaction agreement,

Odey Asset Management LLP, one of Rowan's largest shareholders as of the most recent regulatory filings, has pledged its support to Ensco by entering into an irrevocable voting agreement for the firm's holdings of approximately 11.4 million Rowan shares, or approximately 9% of Rowan's shares outstanding.

The Company issued the following statement:

Rowan's Board of Directors and management team have a long track record of engaging with shareholders to understand their perspectives and advance their best interests. Since Rowan announced an agreement to combine with Ensco on October 7, 2018, we have had extensive dialogue with shareholders, and we continue to receive significant positive feedback regarding the industrial logic and value creation opportunity of the pending combination from many of Rowan's shareholders.

We are pleased to have reached an amended agreement with Ensco at an exchange ratio of 2.750, which represents a 24.2% increase compared to the 2.215 exchange rate in the previously announced agreement between the companies. The Rowan Board and management team actively negotiated with Ensco to receive the significantly improved exchange ratio and, after careful review and consideration, the Board determined that the transaction continues to maximize value for all Rowan shareholders and represents the best path forward for the Company.

The Rowan Board and management team have acted decisively to position our company for long-term growth and success. As part of these efforts, Rowan's Board has undertaken a multi-year review, in consultation with its outside financial and legal advisors, of strategic alternatives including asset sales, internal restructurings, joint ventures and other business combinations. During this extensive review process, the Rowan Board evaluated a combination with Ensco and determined that no other alternatives were sufficiently compelling for Rowan shareholders, and unanimously approved a definitive transaction agreement to combine with Ensco in October 2018. As the Rowan team has worked with the Ensco team over the last several months to begin planning for the integration and realization of synergy opportunities, our conviction regarding the value creation opportunity has only grown stronger.

Shareholders of the pro forma entity will benefit from efficiencies including an expected \$165 million of annual run-rate expense synergies¹ that will drive \$1.1 billion of capitalized value creation, providing even greater upside as the industry recovery gains momentum. Should challenging market conditions persist, or even worsen, the enhanced scale, resiliency and efficiency of the combined company will be all that much more important and beneficial for shareholders. Moreover, the combination provides Rowan with enhanced protection in more challenging market conditions as it dramatically increases Rowan's contracted revenue backlog from approximately \$500 million to more than \$2.6 billion. The combined company will also have \$3.7 billion of total liquidity, including \$1.7 billion of cash and short-term investments, and a flexible capital structure with no secured debt that enhances our ability to navigate through industry cycles and generate greater shareholder value than Rowan could alone.

Rowan's Board and management team strongly recommend that all Rowan shareholders vote **"FOR"** the all-stock transaction with Ensco at the Company's Court and General Meetings.

Rowan expects the reconvened Court and General Meetings to occur during the week of February 18, 2019 and will announce the place, date and time of the meetings to approve resolutions relating to the transaction with Ensco in our proxy supplement to be issued promptly.

Goldman Sachs & Co. LLC is serving as financial advisor and Kirkland & Ellis LLP is serving as legal advisor to the Company.

Rowan shareholders who have questions or need assistance voting their shares should contact Rowan's proxy solicitor, MacKenzie Partners, Inc., by calling toll-free at (800) 322-2885 (from the U.S. and Canada) or (212) 929-5500 (call collect from other locations) or via email at proxy@mackenziepartners.com.

About Rowan

Rowan is a global provider of contract drilling services with a current fleet of 25 mobile offshore drilling units, composed of 21 self-elevating jack-up rigs and four ultra-deepwater drillships. The company's fleet operates worldwide, including the United States Gulf of Mexico, the United Kingdom and Norwegian sectors of the North Sea, the Middle East, the Mediterranean Sea, and Trinidad. Additionally, the company is a 50/50 partner in a joint venture with Saudi Aramco, entitled ARO Drilling that owns a fleet of seven self-elevating jack-up rigs that operate in the Arabian Gulf. The company's Class A Ordinary Shares are traded on the New York Stock Exchange under the symbol "RDC." For more information on the company, please visit www.rowan.com.

Forward-Looking Statements

Statements included in this document regarding the proposed transaction between Ensco plc (“Ensco”) and Rowan, including benefits, expected synergies and other expense savings and operational and administrative efficiencies, opportunities, timing, expense and effects of the transaction, financial performance, accretion to cash flows, revenue growth, credit ratings or other attributes of Ensco plc following the completion of the transaction and other statements that are not historical facts, are forward-looking statements (including within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended (the “Securities Act”). Forward-looking statements include words or phrases such as “anticipate,” “believe,” “contemplate,” “estimate,” “expect,” “intend,” “plan,” “project,” “could,” “may,” “might,” “should,” “will” and words and phrases of similar import. These statements involve risks and uncertainties including, but not limited to, actions by regulatory authorities, rating agencies or other third parties, actions by the respective companies’ security holders, costs and difficulties related to integration of Ensco and Rowan, delays, costs and difficulties related to the transaction, market conditions, and Ensco’s financial results and performance following the completion of the transaction, satisfaction of closing conditions, ability to repay debt and timing thereof, availability and terms of any financing and other factors detailed in the risk factors section and elsewhere in Ensco’s and Rowan’s Annual Report on Form 10-K for the year ended December 31, 2017 and their respective other filings with the Securities and Exchange Commission (the “SEC”), which are available on the SEC’s website at www.sec.gov. Should one or more of these risks or uncertainties materialize (or the other consequences of such a development worsen), or should underlying assumptions prove incorrect, actual outcomes may vary materially from those forecasted or expected. All information in this document is as of today. Except as required by law, both Ensco and Rowan disclaim any intention or obligation to update publicly or revise such statements, whether as a result of new information, future events or otherwise.

¹ Over 75% of targeted synergies are expected to be realized within one year of closing

Additional Information and Where to Find it

In connection with the proposed transaction, Ensco and Rowan have filed a joint proxy statement on Schedule 14A with the SEC. Ensco and Rowan intend that the proposed transaction will be implemented by means of a court-sanctioned scheme of arrangement between Rowan and Rowan's shareholders under the UK Companies Act 2006, as amended, in which case the issuance of Ensco's ordinary shares in the proposed transaction would not be expected to require registration under the Securities Act, pursuant to an exemption provided by Section 3(a)(10) under the Securities Act. In the event that Ensco determines, with Rowan's consent, to structure the transaction as an offer or otherwise in a manner that is not exempt from the registration requirements of the Securities Act, Ensco will file a registration statement with the SEC containing a prospectus with respect to Ensco's ordinary shares that would be issued in the proposed transaction. INVESTORS AND SECURITY HOLDERS OF ENSCO AND ROWAN ARE ADVISED TO CAREFULLY READ THE JOINT PROXY STATEMENT (WHICH INCLUDES AN EXPLANATORY STATEMENT IN RESPECT OF ANY SCHEME OF ARRANGEMENT OF ROWAN, IN ACCORDANCE WITH THE REQUIREMENTS OF THE UK COMPANIES ACT 2006) AND ANY REGISTRATION STATEMENT/PROSPECTUS (INCLUDING ALL AMENDMENTS AND SUPPLEMENTS THERETO) WHEN THEY BECOME AVAILABLE BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE TRANSACTION, THE PARTIES TO THE TRANSACTION AND THE RISKS ASSOCIATED WITH THE TRANSACTION. A definitive joint proxy statement has been and any registration statement/prospectus, as applicable, will be sent to security holders of Ensco and Rowan in connection with the Ensco and Rowan shareholder meetings. Investors and security holders may obtain a free copy of the joint proxy statement (when available), any registration statement/prospectus, and other relevant documents filed by Ensco and Rowan with the SEC from the SEC's website at www.sec.gov. Security holders and other interested parties will also be able to obtain, without charge, a copy of the joint proxy statement, any registration statement/prospectus, and other relevant documents (when available) by directing a request by mail or telephone to either Investor Relations, Ensco plc, 5847 San Felipe, Suite 3300, Houston, Texas 77057, telephone 713-789-1400, or Investor Relations, Rowan Companies plc, 2800 Post Oak Boulevard, Suite 5450, Houston, Texas 77056, telephone 713-621-7800. Copies of the documents filed by Ensco with the SEC will be available free of charge on Ensco's website at www.enscoplc.com under the tab "Investors." Copies of the documents filed by Rowan with the SEC will be available free of charge on Rowan's website at www.rowan.com/investor-relations.

Participants in the Solicitation

Ensco and Rowan and their respective directors, executive officers and certain other members of management may be deemed to be participants in the solicitation of proxies from their respective security holders with respect to the transaction. Information about these persons is set forth in the joint proxy statement filed by Ensco and Rowan with the SEC on December 11, 2018, respectively, and subsequent statements of changes in beneficial ownership on file with the SEC. Security holders and investors may obtain additional information regarding the interests of such persons, which may be different than those of the respective companies' security holders generally, by reading the joint proxy statement, any registration statement and other relevant documents regarding the transaction, which will be filed with the SEC.

No Offer or Solicitation

This document is not intended to and does not constitute an offer to sell or the solicitation of an offer to subscribe for or buy or an invitation to purchase or subscribe for any securities or the solicitation of any vote in any jurisdiction pursuant to the proposed transaction or otherwise, nor shall there be any sale, issuance or transfer of securities in any jurisdiction in contravention of applicable law. Subject to certain exceptions to be approved by the relevant regulators or certain facts to be ascertained, the public offer will not be made directly or indirectly, in or into any jurisdiction where to do so would constitute a violation of the laws of such jurisdiction, or by use of the mails or by any means or instrumentality (including without limitation, facsimile transmission, telephone and the internet) of interstate or foreign commerce, or any facility of a national securities exchange, of any such jurisdiction.

Service of Process

EnSCO and Rowan are incorporated under the laws of England and Wales. In addition, some of their respective officers and directors reside outside the United States, and some or all of their respective assets are or may be located in jurisdictions outside the United States. Therefore, investors may have difficulty effecting service of process within the United States upon those persons or recovering against EnSCO, Rowan or their respective officers or directors on judgments of United States courts, including judgments based upon the civil liability provisions of the United States federal securities laws. It may not be possible to sue EnSCO, Rowan or their respective officers or directors in a non-U.S. court for violations of the U.S. securities laws.

Allowance for loan losses to total loans held-for- investment at end of year

2.50 2.64 2.11 1.49 1.33

As of December 31, 2011, the Company did not provide any allowance for loan losses for PCI loans acquired in October 2011 as the estimated cash flows by loan pool remained consistent with those estimated at date of acquisition. Loans held-for-sale are excluded from the allowance for loan losses coverage ratios in the table above.

Table of Contents

Allocation of Allowance for Loan Losses. The following tables set forth the allowance for loan losses allocated by loan category and the percent of loans in each category to total loans at the dates indicated. The allowance for loan losses allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories.

Securities

We conduct investment transactions in accordance with our board approved investment policy which is reviewed at least annually by the risk committee, and any changes to the policy are subject to ratification by the full board of directors. This policy dictates that investment decisions give consideration to the safety of the investment, liquidity requirements, potential returns, the ability to provide collateral for pledging requirements, and consistency with our interest rate risk management strategy. Our Treasurer executes our securities portfolio transactions, within policy requirements, with the approval of either the Chief Executive Officer or the Chief Financial Officer. NSB Services Corp. and NSB Realty Trust's investment officers execute security portfolio transactions in accordance with investment policies that substantially mirror the Bank's investment policy. All purchase and sale transactions are reviewed by the risk committee at least quarterly.

Our current investment policy permits investments in mortgage-backed securities, including pass-through securities and real estate mortgage investment conduits (REMICs). The investment policy also permits, with certain limitations, investments in debt securities issued by the United States Government, agencies of the United States Government or United States Government-sponsored enterprises (GSEs), asset-backed securities, money market mutual funds, federal funds, investment grade corporate bonds, reverse repurchase agreements, and certificates of deposit.

The Bank's investment policy does not permit investment in municipal bonds, preferred and common stock of other entities including U.S. Government sponsored enterprises or equity securities other than our required investment in the common stock of the Federal Home Loan Bank of New York, or as permitted for community reinvestment purposes or for the purposes of funding the Bank's deferred compensation plan. Northfield Bancorp, Inc. may invest in equity securities of other financial institutions up to certain limitations. As of December 31, 2011, we held no asset-backed securities other than mortgage-backed securities. Our board of directors may change these limitations in the future.

Our current investment policy does not permit hedging through the use of such instruments as financial futures or interest rate options and swaps.

At the time of purchase, the Company designates a security as either held-to-maturity, available-for-sale, or trading, based upon our ability and intent to hold such securities. Trading securities and securities available-for-sale are reported at estimated fair value, and securities held-to-maturity are reported at amortized cost. A periodic review and evaluation of the available-for-sale and held-to-maturity securities portfolios is conducted to determine if the estimated fair value of any security has declined below its carrying value and whether such impairment is other-than-temporary. If such impairment is deemed to be other-than-temporary, the security is written down to a new cost basis and the resulting loss is charged against earnings. The estimated fair values of our securities are obtained from an independent nationally recognized pricing service (see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies for further discussion). At December 31, 2011, our investment portfolio consisted primarily of mortgage-backed securities guaranteed by GSEs and to a lesser extent private label mortgage-backed securities, mutual funds and corporate securities. The market for these securities primarily consists of other financial institutions, insurance companies, real estate investment trusts, and mutual funds.

We purchase mortgage-backed securities insured or guaranteed primarily by Fannie Mae, Freddie Mac, or Ginnie Mae, and to a lesser extent, securities issued by private companies (private label). We invest in mortgage-backed securities to achieve positive interest rate spreads with minimal administrative expense, and to lower our credit risk as a result of the guarantees provided by Fannie Mae, Freddie Mac, or Ginnie Mae as well as to provide liquidity to the Company to fund loan originations and deposit outflows. In September 2008, the Federal Housing Finance Agency placed Freddie Mac and Fannie Mae into conservatorship. The U.S. Treasury Department has established financing agreements to ensure that Freddie Mac and Fannie Mae meet their obligations to holders of mortgage-backed securities that they have issued or guaranteed.

Table of Contents

Mortgage-backed securities are securities sold in the secondary market that are collateralized by pools of mortgages. Certain types of mortgage-backed securities are commonly referred to as pass-through certificates because the principal and interest of the underlying loans is passed through pro rata to investors, net of certain costs, including servicing and guarantee fees, in proportion to an investor's ownership in the entire pool. The issuers of such securities pool mortgages and resell the participation interests in the form of securities to investors. The interest rate of the security is lower than the interest rates of the underlying loans to allow for payment of servicing and guaranty fees. Ginnie Mae, a United States Government agency, and GSEs, such as Fannie Mae and Freddie Mac, may guarantee the payments, or guarantee the timely payment of, principal and interest to investors.

Mortgage-backed securities are more liquid than individual mortgage loans since there is a more active market for such securities. In addition, mortgage-backed securities may be used to collateralize our specific liabilities and obligations. Investments in mortgage-backed securities issued or guaranteed by GSEs involve a risk that actual payments will be greater or less than estimated at the time of purchase, which may require adjustments to the amortization of any premium or accretion of any discount relating to such interests, thereby affecting the net yield on our securities. We periodically review current prepayment speeds to determine whether prepayment estimates require modification that could cause adjustment of amortization or accretion.

REMICs are a type of mortgage-backed security issued by special-purpose entities that aggregate pools of mortgages and mortgage-backed securities and create different classes of securities with varying maturities and amortization schedules, as well as a residual interest, with each class possessing different risk characteristics. The cash flows from the underlying collateral are generally divided into tranches or classes that have descending priorities with respect to the distribution of principal and interest cash flows.

The timely payment of principal and interest on these REMICs is generally supported (credit enhanced) in varying degrees by either insurance issued by a financial guarantee insurer, letters of credit, over collateralization, or subordination techniques. Substantially all of these securities are rated AAA by Standard & Poor's or Moody's at the time of purchase. Privately issued REMICs and pass-throughs can be subject to certain credit-related risks normally not associated with U.S. Government agency and U.S. Government-sponsored enterprise mortgage-backed securities. The loss protection generally provided by the various forms of credit enhancements is limited, and losses in excess of certain levels are not protected. Furthermore, the credit enhancement itself may be subject to the creditworthiness of the credit enhancer. Thus, in the event a credit enhancer does not fulfill its obligations, the holder could be subject to risk of loss similar to a purchaser of a whole loan pool. Management believes that the credit enhancements are adequate to protect us from material losses on our privately issued mortgage-backed securities.

At December 31, 2011, our corporate bond portfolio consisted of investment grade securities with maturities generally shorter than three years. Our investment policy provides that we may invest up to 15% of our tier-one risk-based capital in corporate bonds from individual issuers which, at the time of purchase, are within the three highest investment-grade ratings from Standard & Poor's or Moody's. The maturity of these bonds may not exceed 10 years, and there is no aggregate limit for this security type. Corporate bonds from individual issuers with investment-grade ratings, at the time of purchase, below the top three ratings are limited to the lesser of 1% of our total assets or 15% of our tier-one risk-based capital and must have a maturity of less than one year. Aggregate holdings of this security type cannot exceed 5% of our total assets. Bonds that subsequently experience a decline in credit rating below investment grade are monitored at least monthly.

Table of Contents

The following table sets forth the amortized cost and estimated fair value of our available-for-sale and held-to-maturity securities portfolios (excluding Federal Home Loan Bank of New York common stock) at the dates indicated. As of December 31, 2011, 2010, and 2009, we also had a trading portfolio with a market value of \$4.1 million, \$4.1 million, and \$3.4 million, respectively, consisting of mutual funds quoted in actively traded markets. These securities are utilized to fund non-qualified deferred compensation obligations.

Sources of Funds

General. Deposits traditionally have been our primary source of funds for our securities and lending activities. We also borrow from the Federal Home Loan Bank of New York and other financial institutions to supplement cash flow needs, to lengthen the maturities of liabilities for interest rate and investment risk management purposes, and to manage our cost of funds. Our additional sources of funds are the proceeds of loan sales, scheduled loan and investment payments, maturing investments, loan prepayments, and retained income on other earning assets.

Deposits. We accept deposits primarily from the areas in which our offices are located. We rely on our convenient locations, customer service, and competitive products and pricing to attract and retain deposits. We offer a variety of deposit accounts with a range of interest rates and terms. Our deposit accounts consist of transaction accounts (NOW and non-interest bearing checking accounts), savings accounts (money market, passbook, and statement savings), and certificates of deposit, including individual retirement accounts. We accept brokered deposits on a limited basis, when it is deemed cost effective. At December 31, 2011 and 2010, we had brokered certificates of deposits totaling \$3.4 million and \$68.4 million, respectively.

Interest rates offered generally are established weekly, while maturity terms, service fees, and withdrawal penalties are reviewed on a periodic basis. Deposit rates and terms are based primarily on current operating strategies and market interest rates, liquidity requirements, and our deposit growth goals.

Edgar Filing: ROWAN COMPANIES PLC - Form DEFA14A

At December 31, 2011, we had a total of \$480.1 million in certificates of deposit, of which \$356.4 million had remaining maturities of one year or less. Based on our experience and current pricing strategy, we believe we will retain a significant portion of these accounts at maturity.

Table of Contents

The following tables set forth the distribution of our average total deposit accounts, by account type, for the years indicated.

	2011		For the Year Ended December 31, 2010				2009		Weighted Average Rate
	Average Balance	Percent	Weighted Average Rate	Average Balance	Percent	Weighted Average Rate	Average Balance	Percent	
	(Dollars in thousands)

As of December 31, 2011, the aggregate amount of our outstanding certificates of deposit in amounts greater than or equal to \$100,000 was \$217.7 million. The following table sets forth the maturity of these certificates at December 31, 2011.

	At December 31, 2011 (In thousands)
Three months or less	\$ 38,391
Over three months through six months	20,800
Over six months through one year	90,989
Over one year to three years	35,979
Over three years	31,529
Total	\$ 217,688

Borrowings. Our borrowings consist primarily of securities sold under agreements to repurchase (repurchase agreements) with third party financial institutions, as well as advances from the Federal Home Loan Bank of New York and the Federal Reserve Bank. As of December 31, 2011, our repurchase agreements totaled \$276.0 million, or 13.8% of total liabilities, capitalized lease obligations totaled \$1.7 million, or 0.09% of total liabilities, floating rate advances totaled \$3.0 million, or 0.15% of total liabilities and our Federal Home Loan Bank advances totaled \$201.2 million, or 10.1% of total liabilities. At December 31, 2011, the Company has the ability to obtain additional funding from the FHLB and Federal Reserve Bank discount window of approximately \$384.6 million, utilizing unencumbered securities of \$427.3 million at December 31, 2011. Repurchase agreements are primarily secured by mortgage-backed securities. Advances from the Federal Home Loan Bank of New York are secured by our investment in the common stock of the Federal Home Loan Bank of New York as well as by pledged mortgage-backed securities.

Table of Contents

The following table sets forth information concerning balances and interest rates on our borrowings at and for the years indicated:

	At or For the Years Ended December 31,		
	2011	2010	2009
	(Dollars in thousands)		
Balance at end of year	\$ 481,934	\$ 391,237	\$ 279,424
Average balance during year	\$ 476,413	\$ 330,693	\$ 297,365
Maximum outstanding at any month end	\$ 535,447	\$ 391,237	\$ 345,506
Weighted average interest rate at end of year	2.64%	2.97%	3.63%
Average interest rate during year	2.76%	3.28%	3.62%

Employees

As of December 31, 2011, we had 247 full-time employees and 45 part-time employees. Our employees are not represented by any collective bargaining group. Management believes that we have a good working relationship with our employees.

Subsidiary Activities

Northfield Bancorp, Inc. owns 100% of Northfield Investments, Inc., an inactive New Jersey investment company, and 100% of Northfield Bank. Northfield Bank owns 100% of NSB Services Corp., a Delaware corporation, which in turn owns 100% of the voting common stock of NSB Realty Trust. NSB Realty Trust is a Maryland real estate investment trust that holds mortgage loans, mortgage-backed securities and other investments. These entities enable us to segregate certain assets for management purposes, and promote our ability to raise regulatory capital in the future through the sale of preferred stock or other capital-enhancing securities or borrow against assets or stock of these entities for liquidity purposes. At December 31, 2011, Northfield Bank's investment in NSB Services Corp. was \$599.9 million, and NSB Services Corp. had assets of \$600.0 million and liabilities of \$132,000 at that date. At December 31, 2011, NSB Services Corp.'s investment in NSB Realty Trust was \$600.7 million, and NSB Realty Trust had \$600.7 million in assets, and liabilities of \$14,000 at that date. NSB Insurance Agency, Inc. is a New York corporation that receives nominal commissions from the sale of life insurance by employees of Northfield Bank. At December 31, 2011, Northfield Bank's investment in NSB Insurance Agency was \$1,000.

SUPERVISION AND REGULATION**General**

The Bank is a federal savings bank, examined and supervised by the Office of the Comptroller of the Currency. This regulation and supervision establishes a comprehensive framework of activities in which an institution may engage and is intended primarily for the protection of the Federal Deposit Insurance Corporation's deposit insurance fund and the institution's depositors. Under this system of federal regulation, financial institutions are periodically examined to ensure that they satisfy applicable standards with respect to capital adequacy, asset quality, management, earnings, liquidity and sensitivity to market interest rates as well as risk management practices. Following completion of its examination, the federal agency critiques the institution's operations and assigns its rating (known as an institution's CAMELS rating). Under federal law, an institution may not disclose its CAMELS rating to the public. The Bank also is a member of and owns stock in the FHLB of New York, which is one of the twelve regional banks in the Federal Home Loan Bank System. The Bank also is regulated to a lesser extent by the Board of Governors of the Federal Reserve System (FRB), governing reserves to be maintained against deposits and other matters including the approval of any dividends paid by the Bank to Northfield Bancorp, Inc. The OCC will examine the Bank and prepare reports of its findings for the consideration of the Bank's board of directors. The Bank's relationship with its depositors and borrowers also is regulated to a great extent by federal law and, to a much lesser extent, state law, especially in matters concerning the ownership of deposit accounts and the form and content of the Bank's loan documents.

Table of Contents

Northfield Bancorp, Inc. and Northfield Bancorp, MHC are savings and loan holding companies, and are required to file certain reports with, be examined by, and otherwise comply with the rules and regulations of the FRB. Northfield Bancorp, Inc. also is subject to the rules and regulations of the Securities and Exchange Commission under the federal securities laws.

Any change in these laws or regulations, whether by the Federal Deposit Insurance Corporation, the OCC, the FRB or Congress, could have a material adverse effect on our operations.

Certain of the regulatory requirements that are applicable to Northfield Bank, Northfield Bancorp, Inc. and Northfield Bancorp, MHC are described below. This description of statutes and regulations is not intended to be a complete explanation of such statutes and regulations and their effects on Northfield Bank, Northfield Bancorp, Inc. and Northfield Bancorp, MHC, and is qualified in its entirety by reference to the actual statutes and regulations.

The Dodd-Frank Act

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the Dodd-Frank Act), enacted on July 21, 2010, is significantly changing the bank regulatory structure and affecting the lending, investment, trading and operating activities of depository institutions and their holding companies. The Dodd-Frank Act eliminated our former primary federal regulator, the Office of Thrift Supervision, and required Northfield Bank to be regulated by the OCC (the primary federal regulator for national banks). The Dodd-Frank Act also authorized the FRB to supervise and regulate all savings and loan holding companies, including mutual holding companies and their mid-tier holding companies, like Northfield Bancorp, MHC and Northfield Bancorp, Inc.

As a result of the Dodd-Frank Act, Northfield Bancorp, MHC will require the approval of the FRB before it may waive the receipt of any dividends from Northfield Bancorp, Inc. and Northfield Bank will require the approval of the FRB to pay dividends to Northfield Bancorp, Inc. and there is no assurance that the FRB will approve such actions or, if it does, what conditions it may impose. For additional discussion regarding the waiver of dividends by Northfield Bancorp, MHC, see Holding Company Regulation Waivers of Dividend by Northfield Bancorp, MHC.

The Dodd-Frank Act also requires the FRB to set minimum capital levels for depository institution holding companies that are as stringent as those required for the insured depository subsidiaries, and the components of Tier 1 capital would be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. There is a five-year transition period (from the July 21, 2010 effective date of the Dodd-Frank Act) before the capital requirements will apply to savings and loan holding companies. Under the Dodd-Frank Act, the proceeds of trust preferred securities are excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by bank or savings and loan holding companies with less than \$15 billion of assets. The legislation also established a floor for capital of insured depository institutions that cannot be lower than the standards in effect on July 21, 2010, and directed the federal banking regulators to implement new leverage and capital requirements that take into account off-balance sheet activities and other risks, including risks relating to securitized products and derivatives.

The Dodd-Frank Act also created a new Consumer Financial Protection Bureau with substantial power to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rulemaking authority for a wide range of consumer protection laws that apply to all banks and savings institutions such as Northfield Bank, including the authority to prohibit unfair, deceptive or abusive acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets such as Northfield Bank will continue to be examined by their applicable federal bank regulators. The legislation also weakened the federal preemption available for national banks and federal savings banks, and gives state attorneys general the ability to enforce applicable federal consumer protection laws.

Table of Contents

The legislation broadened the base for FDIC insurance assessments. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution. The Dodd-Frank Act also permanently increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2008, and non-interest bearing transaction accounts have unlimited deposit insurance through December 31, 2012. The Dodd-Frank Act increased stockholder influence over boards of directors by requiring companies to give stockholders a non-binding vote on executive compensation and so-called "golden parachute" payments. The legislation also directed the FRB to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the company is publicly traded. The Dodd-Frank Act provided for originators of certain securitized loans to retain a percentage of the risk for transferred loans, directed the FRB to regulate pricing of certain debit card interchange fees and contained a number of reforms related to mortgage origination.

Many of the provisions of the Dodd-Frank Act have delayed effective dates and the legislation requires various federal agencies to promulgate numerous and extensive implementing regulations over the next few years. Although the substance and scope of these regulations cannot be completely determined at this time, it is expected that the legislation and implementing regulations will increase our operating and compliance costs and could further limit the business activities of the Company.

Federal Banking Regulation

Business Activities. A federal savings bank derives its lending and other investment powers from the Home Owners' Loan Act, as amended, and federal regulations. Under these laws and regulations, the Bank may invest in mortgage loans secured by residential real estate without limitation as a percentage of assets, and may invest in non-residential real estate loans up to 400% of capital in the aggregate, commercial business loans up to 20% of assets in the aggregate and consumer loans up to 35% of assets in the aggregate. The Bank may also invest in certain types of debt securities and certain other assets. The Bank also may establish subsidiaries that may engage in certain activities not otherwise permissible for the Bank, including real estate investment and securities and insurance brokerage. The Dodd-Frank Act allowed depository institutions to pay interest on business checking accounts, commencing effective July 21, 2011.

Capital Requirements. Federal regulations require savings banks to meet three minimum capital standards: a 1.5% tangible capital ratio, a 4% Tier 1 (core) ratio (3% for savings banks receiving the highest rating on the CAMELS rating system and meeting certain other requirements) and an 8% total risk-based capital ratio.

The risk-based capital standard for savings banks requires the maintenance of Tier 1 (core) and total capital (which is defined as core capital and supplementary capital) to risk-weighted assets of at least 4% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100% (or 200% for certain residual interests in transferred assets), assigned by the applicable regulatory agency, based on the risks believed inherent in the type of asset. Core capital is defined as common stockholders' equity (including retained earnings), certain noncumulative perpetual preferred stock, and related surplus and minority interests in equity accounts of consolidated subsidiaries, less intangibles other than certain mortgage servicing rights and credit card relationships. The components of supplementary capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets and up to 45% of net unrealized gains on available-for-sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital. Additionally, a savings bank that retains credit risk in connection with an asset sale may be required to maintain additional regulatory capital because of the possible recourse to the savings bank.

At December 31, 2011, Northfield Bank's capital exceeded all applicable requirements.

Table of Contents

Loans-to-One Borrower. Generally, a federal savings bank may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of unimpaired capital and surplus. An additional amount may be loaned, equal to 10% of unimpaired capital and surplus, if the loan is secured by readily marketable collateral, which generally does not include real estate. As of December 31, 2011, Northfield Bank's largest lending relationship with a single or related group of borrowers totaled \$23.9 million, which represented 7.25% of unimpaired capital and surplus. Therefore, Northfield Bank was in compliance with the loans-to-one borrower limitations at December 31, 2011.

Qualified Thrift Lender Test. As a federal savings bank, Northfield Bank must satisfy the qualified thrift lender, or QTL, test. Under the QTL test, Northfield Bank must maintain at least 65% of its portfolio assets in qualified thrift investments (primarily residential mortgages and related investments, including mortgage-backed securities) in at least nine months of the most recent 12-month period. Portfolio assets generally means total assets of a savings bank, less the sum of specified liquid assets up to 20% of total assets, goodwill and other intangible assets, and the value of property used in the conduct of the savings bank's business.

A savings bank that fails the qualified thrift lender test is subject to certain restrictions on operations. The Dodd-Frank Act made noncompliance with the QTL Test potentially subject to agency enforcement action for a violation of law. At December 31, 2011, Northfield Bank maintained approximately 81% of its portfolio assets in qualified thrift investments and, therefore, satisfied the QTL test.

Capital Distributions. Federal regulations govern capital distributions by a federal savings bank, including cash dividends, stock repurchases and other transactions charged to the capital account. A federal savings bank must file an application with the OCC for approval of a capital distribution if:

the total capital distributions for the applicable calendar year exceed the sum of the savings bank's net income for that year to date plus the savings bank's retained net income for the preceding two years;

the savings bank would not be at least adequately capitalized following the distribution;

the distribution would violate any applicable statute, regulation, agreement or condition imposed by a regulator; or

the savings bank is not eligible for expedited treatment of its regulatory filings.

Even if an application is not otherwise required, every savings bank that is a subsidiary of a savings and loan holding company must file a notice with the FRB at least 30 days before the board of directors declares a dividend or approves a capital distribution.

The OCC and the FRB have established similar criteria for approving an application or a notice and may disapprove a notice or application if:

the savings bank would be undercapitalized following the distribution;

the proposed capital distribution raises safety and soundness concerns; or

the capital distribution would violate a prohibition contained in any statute, regulation or agreement.

In addition, the Federal Deposit Insurance Act provides that an insured depository institution shall not make a capital distribution if, after making the distribution, the institution would be undercapitalized.

Liquidity. A federal savings bank is required to maintain a sufficient amount of liquidity to ensure its safe and sound operation. We seek to maintain a ratio of liquid assets not subject to pledge as a percentage of deposits and borrowings not subject to pledge of 35% or greater. At December 31, 2011, this ratio was 52.7%.

Edgar Filing: ROWAN COMPANIES PLC - Form DEFA14A

Community Reinvestment Act and Fair Lending Laws. All insured institutions have a responsibility under the Community Reinvestment Act and related regulations to help meet the credit needs of their communities, including low- and moderate-income areas. In connection with its examination of a federal savings bank, the

Table of Contents

OCC is required to assess the savings bank's record of compliance with the Community Reinvestment Act. In addition, the Equal Credit Opportunity Act and the Fair Housing Act prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. A savings bank's failure to comply with the provisions of the Community Reinvestment Act could, at a minimum, result in denial of certain corporate applications such as branches or mergers, or in restrictions on its activities. The failure to comply with the Equal Credit Opportunity Act and the Fair Housing Act could result in enforcement actions by the OCC, as well as other federal regulatory agencies and the Department of Justice. The Bank received a satisfactory Community Reinvestment Act rating in its most recent examination.

Transactions with Related Parties. A federal savings bank's authority to engage in transactions with its affiliates is limited by FRB regulations and by Sections 23A and 23B of the Federal Reserve Act and its implementing Regulation W. An affiliate is a company that controls, is controlled by, or is under common control with an insured depository institution such as Northfield Bank. Northfield Bancorp, Inc. and Northfield Bancorp, MHC are affiliates of Northfield Bank. In general, loan transactions between an insured depository institution and its affiliates are subject to certain quantitative and collateral requirements. In this regard, transactions between an insured depository institution and its affiliates are limited to 10% of the institution's unimpaired capital and unimpaired surplus for transactions with any one affiliate and 20% of unimpaired capital and unimpaired surplus for transactions in the aggregate with all affiliates. Collateral in specified amounts ranging from 100% to 130% of the amount of the transaction must usually be provided by affiliates in order to receive loans from the savings bank. In addition, federal regulations prohibit a savings bank from lending to any of its affiliates that are engaged in activities that are not permissible for bank holding companies and from purchasing the securities of any affiliate, other than a subsidiary. Finally, transactions with affiliates must be consistent with safe and sound banking practices, not involve low-quality assets and be on terms that are as favorable to the institution as comparable transactions with non-affiliates. Savings banks are required to maintain detailed records of all transactions with affiliates.

Northfield Bank's authority to extend credit to its directors, executive officers, and principal stockholders, as well as to entities controlled by such persons, is governed by the requirements of Sections 22(g) and 22(h) of the Federal Reserve Act and Regulation O of the FRB. Among other things, these provisions require that extensions of credit to insiders:

be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with unaffiliated persons and that do not involve more than the normal risk of repayment or present other unfavorable features (except for extensions of credit made pursuant to lending programs are widely available to the employees of the institution and do not give preference to insiders); and

not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate, which limits are based, in part, on the amount of Northfield Bank's capital.

In addition, extensions of credit in excess of certain limits must be approved by Northfield Bank's board of directors.

Section 402 of the Sarbanes-Oxley Act of 2002, prohibits the extension of personal loans to directors and executive officers of issuers (as defined by in Sarbanes-Oxley). The prohibition, however, does not apply to any loans made or maintained by an insured depository institution, such as Northfield Bank, that is subject to the insider lending restrictions of the Federal Reserve Act and other applicable rules and regulations.

Enforcement. The OCC has primary enforcement responsibility over federal savings banks and has the authority to bring enforcement action against all institution-affiliated parties, including stockholders, attorneys, appraisers, and accountants who knowingly or recklessly participate in wrongful actions likely to have an adverse effect on an insured institution. Formal enforcement action by the OCC may range from the issuance of a capital directive or cease and desist order, to removal of officers and/or directors of the institution and the appointment of a receiver or conservator. Civil penalties cover a wide range of violations and actions, and range up to \$25,000

Table of Contents

per day, unless a finding of reckless disregard is made, in which case penalties may be as high as \$1 million per day. The Federal Deposit Insurance Corporation also has the authority to terminate deposit insurance or to recommend to the OCC that enforcement action be taken with respect to a particular savings institution. If action is not taken by the OCC, the FDIC has authority to take action under specified circumstances.

Standards for Safety and Soundness. Federal law requires each federal banking agency to prescribe certain standards for all insured depository institutions. These standards relate to, among other things, internal controls, information systems and audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, compensation, and other operational and managerial standards as the agency deems appropriate. The federal banking agencies adopted Interagency Guidelines Prescribing Standards for Safety and Soundness to implement the safety and soundness standards required under federal law. The guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard. If an institution fails to meet these standards, the appropriate federal banking agency may require the institution to submit a compliance plan.

Prompt Corrective Action Regulations. Under the prompt corrective action regulations, the OCC is required and authorized to take supervisory actions against undercapitalized savings banks. For this purpose, a savings bank is placed in one of the following five categories based on the savings bank's capital:

well-capitalized (at least 5% (core) capital, 6% Tier 1 risk-based capital and 10% total risk-based capital, and is not subject to any written agreement, order, capital directive, or prompt corrective action directive issued by the OCC (or the OTS) under certain statutes and regulations, to meet and maintain a specific capital level for any capital measure);

adequately capitalized (at least 4% leverage capital (3% for associations with a composite CAMELS rating of 1), 4% Tier 1 risk-based capital and 8% total risk-based capital);

undercapitalized (less than 4% leverage capital (except as noted in the bullet point above), less than 4% Tier 1 risk-based capital or less than 8% total risk-based capital);

significantly undercapitalized (less than 3% leverage capital, less than 3% Tier 1 risk-based capital, or less than 6% total risk-based capital); and

critically undercapitalized (less than 2% tangible capital).

Generally, the banking regulator is required to appoint a receiver or conservator for a savings bank that is critically undercapitalized within specific time frames. The regulations also provide that a capital restoration plan must be filed with the OCC within 45 days of the date a savings bank receives notice that it is undercapitalized, significantly undercapitalized, or critically undercapitalized. The criteria for an acceptable capital restoration plan include, among other things, the establishment of the methodology and assumptions for attaining adequately capitalized status on an annual basis, procedures for ensuring compliance with restrictions imposed by applicable federal regulations, the identification of the types and levels of activities the savings bank will engage in while the capital restoration plan is in effect, and assurances that the capital restoration plan will not appreciably increase the current risk profile of the savings bank. Any holding company for the savings bank required to submit a capital restoration plan must guarantee the lesser of an amount equal to 5% of the savings bank's assets at the time it was notified or deemed to be undercapitalized by the OCC, or the amount necessary to restore the savings bank to adequately capitalized status. This guarantee remains in place until the OCC notifies the savings bank that it has maintained adequately capitalized status for each of four consecutive calendar quarters, and the OCC has the authority to require payment and collect payment under the guarantee. Failure by a holding company to provide the required guarantee will result in certain operating restrictions on the savings bank, such as restrictions on the ability to declare and pay dividends, pay executive compensation and management fees, and increase assets or expand operations. The OCC may also take any one of a number of discretionary supervisory actions against undercapitalized associations, including the issuance of a capital directive and the replacement of senior executive officers and directors.

Table of Contents

At December 31, 2011, Northfield Bank met the criteria for being considered well-capitalized.

Federal Reserve System. The Federal Reserve System requires all depository institutions to maintain noninterest-bearing reserves at specified levels against transaction accounts and non-personal time deposits. The balances maintained to meet the reserve requirements imposed by the Federal Reserve System may be used to satisfy the OCC liquidity requirements.

Savings institutions have authority to borrow from the Federal Reserve System discount window. Northfield Bank maintains a primary credit facility at the Federal Reserve's discount window. Northfield Bank had no borrowings from the Federal Reserve's discount window as of December 31, 2011.

Insurance of Deposit Accounts. The Dodd-Frank Act permanently increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2008. Also, under the Dodd-Frank Act, noninterest-bearing checking accounts have unlimited deposit insurance through December 31, 2012.

On November 12, 2009, the FDIC approved a final rule requiring insured depository institutions to prepay, on December 30, 2009, their estimated quarterly risk-based assessments for the fourth quarter of 2009, and for all of 2010, 2011, and 2012. Prepaid assessments are to be applied against the actual quarterly assessments until exhausted, and may not be applied to any special assessments that may occur in the future. Any unused prepayments will be returned to the institution on June 30, 2013. On December 30, 2009, the Bank prepaid \$5.7 million in estimated assessment fees for the fourth quarter of 2009 through 2012. At December 31, 2011 the prepaid balance was \$2.2 million.

Effective April 1, 2011, the FDIC implemented a requirement of the Dodd-Frank Act to revise its assessment system to base it on each institution's total assets less tangible capital of each institution instead of deposits. The FDIC also revised its assessment schedule so that it ranges from 2.5 basis points for the least risky institutions to 45 basis points for the riskiest. The Bank's annual assessment rate was approximately seven basis points based on its latest assessment received from the FDIC for the third quarter of 2011.

Insurance of deposits may be terminated by the Federal Deposit Insurance Corporation upon a finding that an institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the Federal Deposit Insurance Corporation. Northfield Bank does not believe that it is taking or is subject to any action, condition or violation that could lead to termination of its deposit insurance.

All FDIC-insured institutions are required to pay a pro rata portion of the interest due on obligations issued by the Financing Corporation (FICO) for anticipated payments, issuance costs and custodial fees on bonds issued by the FICO in the 1980s to recapitalize the Federal Savings and Loan Insurance Corporation. The bonds issued by the FICO are due to mature in 2017 through 2019. For the fiscal year ended December 31, 2011, Northfield Bank paid \$137,000 related to the FICO bonds.

Federal Home Loan Bank System. Northfield Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank System provides a central credit facility primarily for member institutions. As a member of the Federal Home Loan Bank of New York, Northfield Bank is required to acquire and hold shares of capital stock in the Federal Home Loan Bank of New York. As of December 31, 2011, Northfield Bank was in compliance with its ownership requirement, holding \$12.7 million of Federal Home Loan Bank of New York stock.

Other Regulations

Some interest and other charges collected or contracted by Northfield Bank are subject to state usury laws and federal laws concerning interest rates and charges. Northfield Bank's operations also are subject to federal laws applicable to credit transactions, such as the:

Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

Table of Contents

Real Estate Settlement Procedures Act, requiring that borrowers for mortgage loans for one- to four-family residential real estate receive various disclosures, including good faith estimates of settlement costs, lender servicing and escrow account practices, and prohibiting certain practices that increase the cost of settlement services;

Home Mortgage Disclosure Act, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed, or other prohibited factors in extending credit;

Fair Credit Reporting Act, governing the use and provision of information to credit reporting agencies;

Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies; and

Rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws. The operations of Northfield Bank also are subject to the:

Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records;

Electronic Funds Transfer Act and Regulation E promulgated thereunder, that govern automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services;

Title III of The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (referred to as the USA PATRIOT Act), which significantly expanded the responsibilities of financial institutions, in preventing the use of the United States financial system to fund terrorist activities. Among other things, the USA PATRIOT Act and related regulations require savings banks operating in the United States to develop anti-money laundering compliance programs, due diligence policies and controls to ensure the detection and reporting of money laundering. Such required compliance programs are intended to supplement existing compliance requirements, also applicable to financial institutions, under the Bank Secrecy Act and the Office of Foreign Assets Control Regulations; and

The Gramm-Leach-Bliley Act, which places limitations on the sharing of consumer financial information by financial institutions with unaffiliated third parties. Specifically, the Gramm-Leach-Bliley Act requires all financial institutions offering financial products or services to retail customers to provide such customers with the financial institution's privacy policy and provide such customers the opportunity to opt out of the sharing of certain personal financial information with unaffiliated third parties, if the financial institution customarily shares such information.

Holding Company Regulation

General. Northfield Bancorp, MHC and Northfield Bancorp, Inc. are non-diversified savings and loan holding companies within the meaning of the Home Owners' Loan Act. As such, Northfield Bancorp, MHC and Northfield Bancorp, Inc. are registered with the FRB and subject to FRB regulations, examinations, supervision and reporting requirements. In addition, the FRB has enforcement authority over Northfield Bancorp, MHC, Northfield Bancorp, Inc. and their subsidiaries. Among other things, this authority permits the FRB to restrict or prohibit activities that are determined to be a serious risk to the subsidiary savings institution. As federal corporations, Northfield Bancorp, MHC and Northfield Bancorp, Inc. generally are not subject to state business organization laws.

Table of Contents

Permitted Activities. Pursuant to Section 10(o) of the Home Owners Loan Act and FRB regulations and policy, a mutual holding company and a federally chartered mid-tier holding company, such as Northfield Bancorp, Inc., may, with appropriate regulatory approvals, engage in the following activities:

- (i) investing in the stock of a savings bank;
 - (ii) acquiring a mutual association through the merger of such association into a savings bank subsidiary of such holding company or an interim savings bank subsidiary of such holding company;
 - (iii) merging with or acquiring another holding company, one of whose subsidiaries is a savings bank;
 - (iv) investing in a corporation, the capital stock of which is available for purchase by a savings bank under federal law or under the law of any state where the subsidiary savings bank has its home offices;
 - (v) furnishing or performing management services for a savings bank subsidiary of such company;
 - (vi) holding, managing or liquidating assets owned or acquired from a savings bank subsidiary of such company;
 - (vii) holding or managing properties used or occupied by a savings bank subsidiary of such company;
 - (viii) acting as trustee under deeds of trust;
 - (ix) any other activity:
- (A) that the FRB by regulation, has determined to be permissible for bank holding companies under Section 4(c) of the Bank Holding Company Act of 1956; or
- (B) in which multiple savings and loan holding companies were authorized (by regulation) to directly engage on March 5, 1987;
- (x) if the savings and loan holding company meets the criteria to qualify as a financial holding company, it may engage in any activity permissible for financial holding companies under Section 4(k) of the Bank Holding Company Act, including securities and insurance underwriting; and
- (xi) purchasing, holding, or disposing of stock acquired in connection with a qualified stock issuance if the purchase of such stock by such savings and loan holding company is approved by the FRB.

If a mutual holding company acquires or merges with another holding company, the holding company acquired or the holding company resulting from such merger or acquisition may only invest in assets and engage in activities listed in (i) through (xi) above, and has a period of two years to cease any nonconforming activities and divest any nonconforming investments.

The Home Owners Loan Act prohibits a savings and loan holding company, including Northfield Bancorp, Inc. and Northfield Bancorp, MHC, directly or indirectly, or through one or more subsidiaries, from acquiring more than 5% of another savings institution or holding company thereof, without prior written approval of the FRB. It also prohibits the acquisition or retention of, with certain exceptions, more than 5% of a nonsubsidiary company engaged in activities other than those permitted by the Home Owners Loan Act or acquiring or retaining control of an institution that is not federally insured. In evaluating applications by holding companies to acquire savings institutions, the FRB must consider such things as the financial and managerial resources, future prospects of the company and institution involved, the effect of the acquisition on the risk to the federal deposit insurance fund, the convenience and needs of the community and competitive factors.

The FRB is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions:

- (i) the approval of interstate supervisory acquisitions by savings and loan holding companies; and

(ii) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisition.

Table of Contents

The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Waivers of Dividends by Northfield Bancorp, MHC. Federal regulations require Northfield Bancorp, MHC to notify the FRB of any proposed waiver of its receipt of dividends from Northfield Bancorp, Inc. The OTS, the previous regulator for Northfield Bancorp, MHC, allowed dividend waivers where the mutual holding company's board of directors determined that the waiver was consistent with its fiduciary duties and the waiver would not be detrimental to the safety and soundness of the institution. The Dodd-Frank Act provides that the FRB may not object to a waiver of dividends: (i) if the mutual holding company involved has, prior to December 1, 2009, reorganized into a mutual holding company structure, engaged in a minority stock offering and waived dividends; (ii) the board of directors of the mutual holding company expressly determines that a waiver of the dividend is consistent with its fiduciary duties to members; and (iii) the waiver would not be detrimental to the safe and sound operation of the savings bank subsidiaries of the holding company. Northfield Bancorp, MHC was formed, engaged in a minority stock offering (through Northfield Bancorp, Inc.), and waived dividends prior to December 1, 2009.

The FRB has issued an interim final rule providing that, pursuant to the Dodd-Frank Act grandfathering provision discussed in the preceding paragraph, it may not object to dividend waivers under similar circumstances as the OTS, but adding a requirement that a majority of the mutual holding company's members eligible to vote have approved a waiver of dividends by the company within 12 months prior to the declaration of the dividend being waived.

The FRB has typically not allowed dividend waivers by mutual bank holding companies and, therefore, the ability of Northfield Bancorp, MHC to waive dividends in the future, should any dividends be declared by Northfield Bancorp, Inc., is uncertain. Currently, Northfield Bancorp, MHC has been granted approval to waive dividends through March 31, 2012.

Capital. Savings and loan holding companies are not currently subject to specific regulatory capital requirements. The Dodd-Frank Act, however, requires the FRB to promulgate consolidated capital requirements for depository institution holding companies that are no less stringent, both quantitatively and in terms of components of capital, than those applicable to depository institutions themselves. Instruments such as cumulative preferred stock and trust preferred securities will no longer be includable as Tier 1 capital, as is currently permitted for bank holding companies. Such instruments issued prior to May 19, 2010, will be grandfathered for companies with consolidated assets of \$15 billion or less. There is a five-year transition period (from the July 21, 2010 effective date of the Dodd-Frank Act) before the capital requirements will apply to savings and loan holding companies.

Dividends and Stock Repurchases. The Federal Reserve Board has issued a policy statement regarding the payment of dividends and the repurchase of shares of common stock by bank holding companies that it has made applicable to savings and loan holding companies as well. In general, the policy provides that dividends should be paid only out of current earnings and only if the prospective rate of earnings retention by the holding company appears consistent with the organization's capital needs, asset quality and overall financial condition. Regulatory guidance provides for prior regulatory review of capital distributions in certain circumstances such as where the company's net income for the past four quarters, net of dividends previously paid over that period, is insufficient to fully fund the dividend. The guidance also provides for prior regulatory review where the company's overall rate of earnings retention is inconsistent with the company's capital needs and overall financial condition. The ability of a holding company to pay dividends may be restricted if a subsidiary bank becomes undercapitalized. The policy statement also provides for regulatory review prior to a holding company redeeming or repurchasing regulatory capital instruments when the holding company is experiencing financial weaknesses or redeeming or repurchasing common stock or perpetual preferred stock that would result in a net reduction as of the end of a quarter in the amount of such equity instruments outstanding compared with the beginning of the quarter in which the redemption or repurchase occurred. These regulatory policies could affect the ability of the Holding Company to pay dividends, repurchase shares of common stock or otherwise engage in capital distributions.

Table of Contents

Source of Strength. As required by the Dodd-Frank Act, the FRB has adopted regulations requiring that savings and loan holding companies act as a source of strength to their subsidiary depository institutions by providing capital, liquidity and other support in times of financial stress.

Conversion of Northfield Bancorp, MHC to Stock Form. Federal regulations permit Northfield Bancorp, MHC to convert from the mutual form of organization to the capital stock form of organization (a Conversion Transaction). There can be no assurance when, if ever, a Conversion Transaction will occur. In a Conversion Transaction a new stock holding company would be formed as the successor to Northfield Bancorp, Inc., Northfield Bancorp, MHC's corporate existence would end, and certain depositors of Northfield Bank would receive the right to subscribe for additional shares of the new holding company. In a Conversion Transaction, each share of common stock held by stockholders other than Northfield Bancorp, MHC (Minority Stockholders) would be automatically converted into a number of shares of common stock of the new holding company determined pursuant to an exchange ratio that ensures that Minority Stockholders own the same percentage of common stock in the new holding company as they owned in Northfield Bancorp, Inc. immediately prior to the Conversion Transaction. Under a provision of the Dodd-Frank Act applicable to Northfield Bancorp, MHC, Minority Stockholders should not be diluted because of any dividends waived by Northfield Bancorp, MHC (i.e., waived dividends will not be considered in determining an appropriate exchange ratio), in the event Northfield Bancorp, MHC converts to stock form. Any such Conversion Transaction would require various member and stockholder approvals, as well as regulatory approval.

Liquidation Rights. Each depositor of Northfield Bank has both a deposit account in Northfield Bank and a pro rata ownership interest in the net worth of Northfield Bancorp, MHC based on the deposit balance in his or her account. This ownership interest is tied to the depositor's account and has no tangible market value separate from the deposit account. This interest may only be realized in the unlikely event of a complete liquidation of Northfield Bank. Any depositor who opens a deposit account obtains a pro rata ownership interest in Northfield Bancorp, MHC without any additional payment beyond the amount of the deposit. A depositor who reduces or closes his or her account receives a portion or all, respectively, of the balance in the deposit account but nothing for his or her ownership interest in the net worth of Northfield Bancorp, MHC, which is lost to the extent that the balance in the account is reduced or closed.

In the unlikely event of a complete liquidation of Northfield Bank, all claims of creditors of Northfield Bank, including those of depositors of Northfield Bank (to the extent of their deposit balances), would be paid first. Thereafter, if there were any assets of Northfield Bank remaining, these assets would be distributed to Northfield Bancorp, Inc. as Northfield Bank's sole stockholder. Then, if there were any assets of Northfield Bancorp, Inc. remaining, depositors of Northfield Bank would receive those remaining assets, pro rata, based upon the deposit balances in their deposit account in Northfield Bank immediately prior to liquidation.

Federal Securities Laws

Northfield Bancorp, Inc.'s common stock is registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended. Northfield Bancorp, Inc. is subject to the information, proxy solicitation, insider trading restrictions, and other requirements under the Securities Exchange Act of 1934.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 addresses, among other issues, corporate governance, auditing and accounting, executive compensation, and enhanced and timely disclosure of corporate information. As directed by the Sarbanes-Oxley Act, our Chief Executive Officer and Chief Financial Officer are required to certify that our quarterly and annual reports do not contain any untrue statement of a material fact. The rules adopted by the Securities and Exchange Commission under the Sarbanes-Oxley Act have several requirements, including having these officers certify that: (i) they are responsible for establishing, maintaining and regularly evaluating the effectiveness of our disclosure controls and procedures and internal control over financial reporting; (ii) they have made certain disclosures to our auditors and the audit committee of the board of directors about our internal

Table of Contents

control over financial reporting; and (iii) they have included information in our quarterly and annual reports about the effectiveness of our disclosure controls and procedures and whether there have been any changes in our internal control over financial reporting or in other factors that could materially affect internal control over financial reporting.

TAXATION

Federal Taxation

General. Northfield Bancorp, Inc. and Northfield Bank are subject to federal income taxation in the same general manner as other corporations, with some exceptions discussed below. Northfield Bancorp, Inc. and Northfield Bank are part of a consolidated tax group and file consolidated tax returns including Northfield Bank's wholly-owned subsidiaries. Northfield Bancorp, MHC does not own at least 80% of the common stock of Northfield Bancorp, Inc. and therefore files a separate federal tax return.

Northfield Bancorp, Inc.'s consolidated federal tax returns are currently under audit for the tax years of 2009 and 2010. The following discussion of federal taxation is intended only to summarize certain pertinent federal income tax matters and is not a comprehensive description of the tax rules applicable to Northfield Bancorp, MHC, Northfield Bancorp, Inc., or Northfield Bank.

Method of Accounting. For federal income tax purposes, Northfield Bancorp, MHC reports its income and expenses on the accrual method of accounting and uses a tax year ending December 31 for filing its federal and state income tax returns.

Bad Debt Reserves. Historically, Northfield Bank was subject to special provisions in the tax law applicable to qualifying savings banks regarding allowable tax bad debt deductions and related reserves. Tax law changes were enacted in 1996 that eliminated the ability of savings banks to use the percentage of taxable income method for computing tax bad debt reserves for tax years after 1995, and required recapture into taxable income over a six-year period of all bad debt reserves accumulated after a savings bank's last tax year beginning before January 1, 1988. Northfield Bank recaptured its post December 31, 1987, bad-debt reserve balance over the six-year period ended December 31, 2004.

The State of New York passed legislation in August of 2010 to conform the bad debt deduction allowed under Article 32 of the New York State tax law to the bad debt deduction allowed for federal income tax purposes. As a result, Northfield Bank no longer establishes, or maintains, a New York reserve for losses on loans, and is required to claim a deduction for bad debts in an amount equal to its actual loan loss experience. In addition, this legislation eliminated the potential recapture of the New York tax bad debt reserve that could have otherwise occurred in certain circumstances under New York State tax law prior to August of 2010. As a result of this new legislation, the Company reversed approximately \$738,000 in deferred tax liabilities during the third quarter of 2010.

Taxable Distributions and Recapture. Prior to 1996, bad debt reserves created prior to 1988 were subject to recapture into taxable income if Northfield Bank failed to meet certain thrift asset and definitional tests or made certain distributions. Tax law changes in 1996 eliminated thrift-related recapture rules. However, under current law, pre-1988 tax bad debt reserves remain subject to recapture if Northfield Bank makes certain non-dividend distributions, repurchases any of its common stock, pays dividends in excess of earnings and profits, or fails to qualify as a bank for tax purposes.

At December 31, 2011, the total federal pre-base year bad debt reserve of Northfield Bank was approximately \$5.9 million.

Alternative Minimum Tax. The Internal Revenue Code of 1986, as amended, imposes an alternative minimum tax at a rate of 20% on a base of regular taxable income plus certain tax preferences, less any available

Table of Contents

exemption. The alternative minimum tax is imposed to the extent it exceeds the regular income tax. Net operating losses can offset no more than 90% of alternative taxable income. Certain payments of alternative minimum tax may be used as credits against regular tax liabilities in future years. Northfield Bancorp, Inc.'s consolidated group has not been subject to the alternative minimum tax and has no such amounts available as credits for carryover.

Net Operating Loss Carryovers. A financial institution may carry back net operating losses to the preceding two taxable years and forward to the succeeding 20 taxable years. At December 31, 2011, Northfield Bancorp Inc.'s consolidated group had no net operating loss carryforwards for federal income tax purposes.

Corporate Dividends-Received Deduction. Northfield Bancorp, Inc. may exclude from its federal taxable income 100% of dividends received from Northfield Bank as a wholly-owned subsidiary by filing consolidated tax returns. The corporate dividends-received deduction is 80% when the corporation receiving the dividend owns at least 20% of the stock of the distributing corporation. The dividends-received deduction is 70% when the corporation receiving the dividend owns less than 20% of the distributing corporation.

State/City Taxation

Northfield Bancorp, MHC and Northfield Bank report income on a calendar year basis to New York State. New York State franchise tax on corporations is imposed in an amount equal to the greater of (a) 7.1% of entire net income allocable to New York State, (b) 3% of alternative entire net income allocable to New York State, or (c) 0.01% of the average value of assets allocable to New York State plus nominal minimum tax of \$250 per company. Entire net income is based on federal taxable income, subject to certain modifications. Alternative entire net income is equal to entire net income without certain modifications.

Northfield Bancorp, MHC and Northfield Bank report income on a calendar year basis to New York City. New York City franchise tax on corporations is imposed in an amount equal to the greater of (a) 9.0% of entire net income allocable to New York State, (b) 3% of alternative entire net income allocable to New York City, or (c) 0.01% of the average value of assets allocable to New York City plus nominal minimum tax of \$250 per company. Entire net income is based on federal taxable income, subject to certain modifications. Alternative entire net income is equal to entire net income without certain modifications.

Northfield Bancorp, Inc. and Northfield Bank file New Jersey Corporation Business Tax returns on a calendar year basis. Generally, the income derived from New Jersey sources is subject to New Jersey tax. Northfield Bancorp, Inc. and Northfield Bank pay the greater of the corporate business tax (CBT) at 9% of taxable income or the minimum tax of \$1,200 per entity.

At December 31, 2005, Northfield Bank did not meet the definition of a domestic building and loan association for New York State and City tax purposes. As a result, we were required to recognize a \$2.2 million deferred tax liability for state and city thrift-related base-year bad debt reserves accumulated after December 31, 1987.

Our state tax returns for New York State are currently under audit for tax years 2007, 2008, and 2009.

ITEM 1A. RISK FACTORS

The material risks and uncertainties that management believes affect us are described below. You should carefully consider the risks and uncertainties described below, together with all of the other information included or incorporated by reference herein. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair our business operations. This report is qualified in its entirety by these risk factors. See also, Forward-Looking Statements.

Table of Contents

Our Concentration in Multifamily Loans, Commercial Real Estate Loans, and Construction and Land Lending Could Expose Us to Increased Lending Risks and Related Loan Losses

Our current business strategy is to continue to emphasize multifamily loans and to a lesser extent commercial real estate loans. At December 31, 2011, \$808.9 million, or 75.3% of our originated total loan portfolio held-for-investment, consisted of multifamily, commercial real estate, and construction and land loans. In addition, we acquired \$41.9 million of commercial real estate PCI loans with an estimated fair value of \$33.4 million. As a result, our credit risk profile may be higher than traditional thrift institutions that have higher concentrations of one- to four-family residential mortgage loans.

A Significant Portion of Our Loan Portfolio is Unseasoned

Our loan portfolio has grown to \$1.073 billion at December 31, 2011, from \$424.4 million at December 31, 2007. A large portion of this increase is due to increases in multifamily and commercial real estate loans. It is difficult to assess the future performance of these recently originated loans because of our relatively limited history in commercial real estate and multifamily lending. These loans may experience higher delinquency or charge-off levels above our historical experience, which could adversely affect our future performance.

If Our Allowance for Loan Losses is Not Sufficient to Cover Actual Loan Losses, Our Earnings Could Decrease

We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of many of our loans. In determining the amount of the allowance for loan losses, we review our loans and our loss and delinquency experience, as well as the experience of other similarly situated institutions, and we evaluate other factors including, among other things, current economic conditions. If our assumptions are incorrect, our allowance for loan losses may not be sufficient to cover losses inherent in our loan portfolio, which would require additions to our allowance. Material additions to our allowance would materially decrease our net income. In addition, bank regulators periodically review our allowance for loan losses and, based on information available to them at the time of their review, may require us to increase our allowance for loan losses or recognize further loan charge-offs. An increase in our allowance for loan losses or loan charge-offs as required by these regulatory authorities may have a material adverse effect on our financial condition and results of operations.

Because Most of Our Borrowers are Located in the New York Metropolitan Area, a Prolonged Downturn in the Local Economy, and a Decline in Local Real Estate Values Could Cause an Increase in Nonperforming Loans, or a Decrease in Loan Demand, Which Would Reduce our Profits

Substantially all loans are secured by real estate located in our primary market areas. Continued weakness in our economy and our real estate markets could adversely affect the ability of our borrowers to repay their loans and the value of the collateral securing our loans. Real estate values are affected by various other factors, including supply and demand, changes in general or regional economic conditions, interest rates, governmental rules or policies, natural disasters, and terrorist attacks. Continued negative economic conditions also could result in reduced loan demand and a decline in loan originations.

Declines in Real Estate Values Could Decrease Our Loan Originations and Increase Delinquencies and Defaults

Declines in real estate values in our market area could adversely affect our results from operations. Like all financial institutions, we are subject to the effects of any economic downturn. In particular, a significant decline in real estate values would likely lead to a decrease in new multifamily, commercial real estate, and home equity loan originations and increased delinquencies and defaults in our real estate loan portfolio. Declines in the average sale prices of real estate in our primary markets could lead to higher loan losses.

Table of Contents

Elevated Loan Delinquencies and Defaults Could Result in Further Deterioration of Our Asset Quality Ratios, Which Could Have a Material Adverse Effect on Our Financial Condition and Results of Operations

If delinquencies do not continue to improve, and non-accrual and non-performing loans increase, our asset quality ratios, such as non-performing loans to total loans held-for-investment, net, could deteriorate, which could have a material adverse effect on our financial condition and results of operations.

There are Potential Risks Stemming from the Loans We Acquired from the FDIC-Assisted Transaction

The credit risk associated with the loans and OREO we acquired in an FDIC-assisted transaction in October 2011 were substantially mitigated by the discount we received from the FDIC; however, these assets are not without risk of loss. Although these acquired assets were initially accounted for at estimated fair value, the Company did not purchase the assets with loss share from the FDIC. To the extent future cash flows are less than those estimated at time of acquisition, the Company will recognize impairment losses on the underlying loan pools. Fluctuations in national, regional and local economic conditions may increase the level of charge-offs on the loans we acquired in this transactions and correspondingly reduce our net income. These fluctuations are not predictable, cannot be fully controlled, and may have a material adverse impact on our operations and financial condition even if other favorable events occur.

We Could Record Future Losses on Our Securities Portfolio

During the years ended December 31, 2011 and 2010, we recognized total other-than-temporary impairment on our securities portfolio of \$1,152,000 and \$962,000, respectively, of which \$409,000 and \$154,000, respectively, was considered to be credit-related and, therefore, recorded as a loss through a reduction of non-interest income. A number of factors or combinations of factors could require us to conclude in one or more future reporting periods that an unrealized loss that exists with respect to our securities portfolio constitutes additional impairment that is other than temporary, which could result in material losses to us. These factors include, but are not limited to, a continued failure by an issuer to make scheduled interest payments, an increase in the severity of the unrealized loss on a particular security, an increase in the continuous duration of the unrealized loss without an improvement in value or changes in market conditions and/or industry or issuer specific factors that would render us unable to forecast a full recovery in value. In addition, the fair values of securities could decline if the overall economy and the financial condition of some of the issuers continue to deteriorate and there remains limited liquidity for these securities.

If the Company's Investment in the Common Stock of the Federal Home Loan Bank of New York is Classified as Other-Than-Temporarily Impaired or as Permanently Impaired, Earnings and Stockholders' Equity Could Decrease

The Company owns stock of the Federal Home Loan Bank of New York (FHLB-NY), which is part of the Federal Home Loan Bank System. The FHLB-NY common stock is held to qualify for membership in the FHLB-NY and to be eligible to borrow funds under the FHLB-NY's advance programs. The aggregate cost of our FHLB-NY common stock as of December 31, 2011, was \$12.7 million based on its par value. There is no market for FHLB-NY common stock.

Although the FHLB-NY is not reporting current operating difficulties, in an extreme situation, it is possible that the capital of the Federal Home Loan Bank System, including the FHLB-NY, could be substantially diminished. Consequently, there continues to be a risk that the Company's investment in FHLB-NY common stock could be deemed other-than-temporarily impaired at some time in the future, and if this occurs, it would cause earnings and stockholders' equity to decrease by the impairment charge.

Table of Contents

Further downgrades in the U.S. government's sovereign credit rating, and in the credit ratings of instruments issued, insured or guaranteed by certain related institutions, agencies and instrumentalities, could result in risks to the Company and general economic conditions that we are not able to predict.

On August 5, 2011, Standard & Poor's downgraded the United States long-term debt rating from its AAA rating to AA+. On August 8, 2011, Standard & Poor's downgraded the credit ratings of certain long-term debt instruments issued by Fannie Mae and Freddie Mac and other U.S. government agencies linked to long-term U.S. debt. Instruments of this nature are key assets on the balance sheets of financial institutions, including the Bank. These downgrades could adversely affect the market value of such instruments, and could adversely impact our ability to obtain funding that is collateralized by affected instruments, as well as affecting the pricing of that funding when it is available. We cannot predict if, when or how these changes to the credit ratings will affect economic conditions. These ratings downgrades could result in a significant adverse impact to the Company, and could exacerbate the other risks to which the Company is subject.

Changes in Our Accounting Policies or in Accounting Standards Could Materially Affect How We Report Our Financial Results and Condition

Our accounting policies are essential to understanding our financial results and condition. Some of these policies require the use of estimates and assumptions that may affect the value of our assets or liabilities and financial results. Some of our accounting policies are critical because they require management to make difficult, subjective, and complex judgments about matters that are inherently uncertain and because it is likely that materially different amounts would be reported under different conditions or using different assumptions. If such estimates or assumptions underlying our financial statements are incorrect, we may experience material losses.

From time to time, the Financial Accounting Standards Board (FASB) and the Securities Exchange Commission (SEC) change the financial accounting and reporting standards or the interpretation of those standards that govern the preparation of our external financial statements. These changes are beyond our control, can be hard to predict and could materially impact how we report our results of operations and financial condition. We could be required to apply a new or revised standard retroactively, resulting in our restating prior period financial statements in material amounts.

The Need to Account for Certain Assets at Estimated Fair Value May Adversely Affect Our Results of Operations

We report certain assets, including securities, at fair value. Generally, for assets that are reported at fair value, we use quoted market prices or valuation models that utilize observable market inputs to estimate fair value. Because we carry these assets on our books at their estimated fair value, we may incur losses even if the asset in question presents minimal credit risk. Elevated delinquencies, defaults, and estimated losses from the disposition of collateral in our private-label mortgage-backed securities portfolio may require us to recognize additional other-than-temporary impairments in future periods with respect to our securities portfolio. The amount and timing of any impairment recognized will depend on the severity and duration of the decline in the estimated fair value of the securities and our estimation of the anticipated recovery period.

We Hold Certain Intangible Assets that Could Be Classified as Impaired in The Future. If These Assets Are Considered To Be Either Partially or Fully Impaired in the Future, Our Earnings and the Book Values of These Assets Would Decrease

We are required to test our goodwill for impairment on a periodic basis. The impairment testing process considers a variety of factors, including the current market price of our common shares, the estimated net present value of our assets and liabilities and information concerning the terminal valuation of similarly situated insured depository institutions. It is possible that future impairment testing could result in a partial or full impairment of the value of our goodwill. If an impairment determination is made in a future reporting period, our earnings and the book value of goodwill will be reduced by the amount of the impairment. If an impairment loss is recorded, it will have little or no impact on the tangible book value of our shares of common stock or our regulatory capital levels.

Table of Contents

Because the Nature of the Financial Services Business Involves a High Volume of Transactions, We Face Significant Operational Risks

We operate in diverse markets and rely on the ability of our employees and systems to process a high number of transactions. Operational risk is the risk of loss resulting from our operations, including but not limited to, the risk of fraud by employees or persons outside our company, the execution of unauthorized transactions by employees, errors relating to transaction processing and technology, breaches of the internal control system and compliance requirements, and business continuation and disaster recovery. Insurance coverage may not be available for such losses, or where available, such losses may exceed insurance limits. This risk of loss also includes the potential legal actions that could arise as a result of an operational deficiency or as a result of noncompliance with applicable regulatory standards, adverse business decisions or their implementation, and customer attrition due to potential negative publicity. In the event of a breakdown in the internal control system, improper operation of systems or improper employee actions, we could suffer financial loss, face regulatory action, and suffer damage to our reputation.

The Bank is Required to Maintain a Significant Percentage of its Total Assets in Residential Mortgage Loans and Investments Secured by Residential Mortgage Loans, Which Restricts Our Ability to Diversify Our Loan Portfolio

A federal savings bank or thrift differs from a commercial bank in that it is required to maintain at least 65% of its total assets in qualified thrift investments which generally include loans and investments, for the purchase, refinance, construction, improvement, or repair of residential real estate, as well as home equity loans, education loans and small business loans. To maintain our federal savings bank charter we have to be a qualified thrift lender or QTL in nine out of each 12 immediately preceding months. The QTL requirement limits the extent to which we can grow our commercial loan portfolio, and as a result of The Dodd-Frank Act, failing the QTL test can result in an enforcement action. However, a loan that does not exceed \$2 million (including a group of loans to one borrower) that is for commercial, corporate, business, or agricultural purposes is included in our qualified thrift investments. Because of the QTL requirement, we may be limited in our ability to change our asset mix and increase the yield on our earning assets by growing our commercial loan portfolio.

In addition, if we continue to grow our commercial loan portfolio and our single-family residential mortgage loan portfolio decreases, it is possible that in order to maintain our QTL status, we could be forced to buy mortgage-backed securities or other qualifying assets at times when the terms of such investments may not be attractive. Alternatively, we may find it necessary to pursue different structures, including converting Northfield Bank's savings bank charter to a commercial bank charter.

Risks Associated with System Failures, Interruptions, or Breaches of Security Could Negatively Affect Our Earnings

Information technology systems are critical to our business. We use various technology systems to manage our customer relationships, general ledger, securities, deposits, and loans. We have established policies and procedures to prevent or limit the impact of system failures, interruptions, and security breaches, but there can be no assurance that such events will not occur or that they will be adequately addressed if they do. In addition any compromise of our systems could deter customers from using our products and services. Although we rely on security systems to provide security and authentication necessary to effect the secure transmission of data, these precautions may not protect our systems from compromises or breaches of security.

In addition, we outsource a majority of our data processing to certain third-party providers. If these third-party providers encounter difficulties, or if we have difficulty communicating with them, our ability to adequately process and account for transactions could be affected, and our business operations could be adversely affected. Threats to information security also exist in the processing of customer information through various other vendors and their personnel.

Table of Contents

The occurrence of any system failures, interruption, or breach of security could damage our reputation and result in a loss of customers and business thereby subjecting us to additional regulatory scrutiny, or could expose us to litigation and possible financial liability. Any of these events could have a material adverse effect on our financial condition and results of operations.

We Are Subject to Extensive Regulatory Oversight

We are subject to extensive supervision, regulation, and examination by the Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System (FRB), and the Federal Deposit Insurance Corporation (FDIC). As a result, we are limited in the manner in which we conduct our business, undertake new investments and activities, and obtain financing. This regulatory structure is designed primarily for the protection of the Deposit Insurance Fund and our depositors, and not to benefit our stockholders. This regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement actions and examination policies, including policies with respect to capital levels, the timing, and amount of dividend payments, the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes.

In addition, we must comply with significant anti-money laundering and anti-terrorism laws and regulations, Community Reinvestment Act laws and regulations, and fair lending laws and regulations. Government agencies have the authority to impose monetary penalties and other sanctions on institutions which fail to comply with these laws and regulations, which could significantly affect our business activities, including the execution of our business plan.

Legislative or Regulatory Responses to Perceived Financial and Market Problems Could Impair Our Rights Against Borrowers

Current and future proposals made by members of Congress would reduce the amount distressed borrowers are otherwise contractually obligated to pay under their mortgage loans, and may limit the ability of lenders to foreclose on mortgage collateral. If proposals such as these, or other proposals limiting Northfield Bank's rights as creditor, were to be implemented, we could experience increased credit losses on our loans and mortgage-backed securities, or increased expense in pursuing our remedies as a creditor.

Changes in the structure of Fannie Mae and Freddie Mac (GSEs) and the relationship among the GSEs, the government and the private markets, or the conversion of the current conservatorship of the GSEs into receivership, could result in significant changes to our securities portfolio.

The GSEs are currently in conservatorship, with its primary regulator, the Federal Housing Finance Agency, acting as conservator. We cannot predict if, when or how the conservatorships will end, or any associated changes to the GSEs' business structure that could result. We also cannot predict whether the conservatorships will end in receivership. There are several proposed approaches to reform the GSEs which, if enacted, could change the structure of the GSEs and the relationship among the GSEs, the government and the private markets, including the trading markets for agency conforming mortgage loans and markets for mortgage-related securities in which we participate. We cannot predict the prospects for the enactment, timing or content of legislative or rulemaking proposals regarding the future status of the GSEs. Accordingly, there continues to be uncertainty regarding the future of the GSEs, including whether they will continue to exist in their current form. GSE reform, if enacted, could result in a significant change and adversely impact our business operations.

Financial reform legislation has, among other things, eliminated the Office of Thrift Supervision, tightened capital standards and created a new Consumer Financial Protection Bureau, and will result in new laws and regulations that are expected to increase our costs of operations.

The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given

Table of Contents

significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many months or years.

Among other things, as a result of the Dodd-Frank Act:

the OCC became the primary federal regulator for federal thrifts such as Northfield Bank (replacing the OTS), and the FRB now supervises and regulates all savings and loan holding companies that were formerly regulated by the OTS, including Northfield Bancorp, MHC and Northfield Bancorp, Inc.

effective July 21, 2011, the federal prohibitions on paying interest on demand deposits has been eliminated, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change could have an adverse effect on our interest expense.

the FRB is required to set minimum capital levels for depository institution holding companies that are as stringent as those required for the insured depository subsidiaries, and the components of Tier 1 capital would be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. There is a five-year transition period (from the July 21, 2010, effective date of the Dodd-Frank Act) before the capital requirements will apply to savings and loan holding companies.

the federal banking regulators are required to implement new leverage and capital requirements that take into account off-balance sheet activities and other risks, including risks relating to securitized products and derivatives.

a new Consumer Financial Protection Bureau has been established, which has broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit unfair, deceptive or abusive acts and practices. Banks and savings institutions with \$10 billion or less in assets, like the Bank, will be examined by their applicable bank regulators.

federal preemption rules that have been applicable for national banks and federal savings banks have been weakened, and state attorneys general have the ability to enforce federal consumer protection laws.

Northfield Bancorp, MHC will require the approval of the FRB before it may waive the receipt of any dividends from Northfield Bancorp, Inc. and there is no assurance that the FRB will approve future dividend waivers or, if it does, what conditions it may impose on such waivers. For additional discussion regarding the waiver of dividends by Northfield Bancorp, MHC, see the following risk factor titled "The Dodd-Frank Act's Elimination of the OTS May Adversely Affect Northfield Bancorp, MHC's Ability to Waive Dividends, Which Could Adversely Affect Our Ability to Pay Dividends and the Value of our Common Stock."

In addition to the risks noted above, we expect that our operating and compliance costs, and possibly our interest expense, could increase as a result of the Dodd-Frank Act and the implementing rules and regulations. The need to comply with additional rules and regulations, as well as state laws and regulations to which we were not previously subject, will also divert management's time from managing the remainder of our operations. Higher capital levels could require us to maintain higher levels of assets that earn less interest and dividend income.

The Dodd-Frank Act's Elimination of the OTS May Adversely Affect Northfield Bancorp, MHC's Ability to Waive Dividends, Which Could Adversely Affect Our Ability to Pay Dividends and the Value of our Common Stock

The value of Northfield Bancorp, Inc.'s common stock is significantly affected by our ability to pay dividends to our public stockholders, which is affected by our earnings and cash resources at the holding company level and by the ability of the Bank to make capital distributions to Northfield Bancorp, Inc. Moreover, the amount of such dividends is affected by the ability of Northfield Bancorp, MHC, our mutual holding

Table of Contents

company, to waive the receipt of dividends declared by Northfield Bancorp, Inc. Northfield Bancorp, MHC has historically waived its right to receive dividends on its shares of Northfield Bancorp, Inc. common stock, which means that Northfield Bancorp, Inc. has had more cash resources to pay dividends to our public stockholders and repurchase stock than if Northfield Bancorp, MHC had accepted such dividends.

The Dodd-Frank Act requires federally-chartered mutual holding companies to give the FRB notice before waiving the receipt of dividends, and provides that in the case of grandfathered mutual holding companies, like Northfield Bancorp, MHC, the FRB may not object to a dividend waiver if the board of directors of the mutual holding company waiving dividends determines that the waiver: (i) would not be detrimental to the safe and sound operation of the subsidiary savings bank; and (ii) is consistent with the board's fiduciary duties to members of the mutual holding company. To qualify as a grandfathered mutual holding company, a mutual holding company must have been formed, issued stock and waived dividends prior to December 1, 2009. The Dodd-Frank Act further provides that the FRB may not consider waived dividends in determining an appropriate exchange ratio upon the conversion of a grandfathered mutual holding company to stock form.

In September 2011, however, the FRB issued an interim final rule that also requires as a condition to waiving dividends, that each mutual holding company obtain the approval of a majority of the eligible votes of its members within 12 months prior to the declaration of the dividend being waived. The FRB has requested comments on the interim final rule, and there can be no assurance that the rule will be amended to eliminate or modify the member vote requirement for dividend waivers by grandfathered mutual holding companies, such as Northfield Bancorp, MHC. In the past, the FRB generally has not allowed dividend waivers by mutual bank holding companies and, therefore, there can be no assurance that the FRB will approve dividend waivers by Northfield Bancorp, MHC in the future, or what conditions the FRB may place on any dividend waivers.

On October 12, 2011, Northfield Bancorp, MHC received a letter of non-objection from the FRB for Northfield Bancorp, MHC to waive its right to receive dividends from Northfield Bancorp, Inc through March 31, 2012.

The Value of Our Deferred Tax Assets Could be Reduced if Corporate Tax Rates in the United States are Decreased

There have been recent discussions in Congress and by the White House Administration regarding potentially decreasing the United States corporate tax rate. While we may benefit in some respects from any decreases in these corporate tax rates, any reduction in the United States corporate tax rate would result in a decrease to the value of our net deferred tax asset, which could be significant.

Recent Health Care Legislation Could Increase Our Expenses or Require us to Pass Further Costs on to Our Employees, Which Could Adversely Affect Our Operations, Financial Condition and Results of Operations

Legislation enacted in 2010 requires companies to provide expanded health care coverage to their employees, such as affordable coverage to part-time employees and coverage to dependent adult children of employees. Companies will also be required to enroll new employees automatically into one of their health plans. Compliance with these and other new requirements of the health care legislation will increase our employee benefits expense, and may require us to pass these costs on to our employees, which could give us a competitive disadvantage in hiring and retaining qualified employees.

We Have Been Negatively Affected by Current Market and Economic Conditions. A Continuation or Worsening of These Conditions Could Adversely Affect Our Operations, Financial Condition, and Earnings

The severe economic recession of 2008 and 2009 and the weak economic recovery since then have resulted in continued uncertainty in the financial markets and the expectation of weak general economic conditions,

Table of Contents

including high levels of unemployment. The resulting economic pressure on consumers and businesses has adversely affected our business, financial condition, and results of operations. The credit quality of loan and investment securities portfolios has deteriorated at many financial institutions and the values of real estate collateral supporting many commercial loans and home mortgages have declined and may continue to decline. Our commercial and multi-family real estate loan customers have experienced increases in vacancy rates and declines in rental rates for both multi-family and commercial properties. Financial companies' stock prices have been negatively affected, as has the ability of banks and bank holding companies to raise capital or borrow in the debt markets. A continuation or worsening of these conditions could result in reduced loan demand and further increases in loan delinquencies, loan losses, loan loss provisions, costs associated with monitoring delinquent loans and disposing of foreclosed property, and otherwise negatively affect our operations, financial condition, and earnings.

Strong Competition Within Our Market Areas May Limit Our Growth and Profitability

Competition in the banking and financial services industry is intense. In our market areas, we compete with commercial banks, savings institutions, mortgage brokerage firms, credit unions, finance companies, mutual funds, money market funds, insurance companies, and brokerage and investment banking firms operating locally and elsewhere. Some of our competitors have greater name recognition and market presence which benefit them in attracting business and offer certain services that we do not or cannot provide. In addition, larger competitors may be able to price loans and deposits more aggressively than we do.

In addition, the recent crises in the financial services industry have resulted in a number of financial services companies such as investment banks and automobile and real estate finance companies electing to become bank holding companies. These financial services companies traditionally have generated funds from sources other than insured bank deposits. Many of the alternative funding sources traditionally utilized by these companies are no longer available. This has resulted in these companies relying more on insured bank deposits to fund their operations, which has increased competition for deposits and the related costs of such deposits. Our profitability depends on our continued ability to compete successfully in our market areas. For additional information, see [Business Northfield Bank Market Area and Competition](#).

Changes in Market Interest Rates Could Adversely Affect Our Financial Condition and Results of Operations

Our financial condition and results of operations are significantly affected by changes in market interest rates. Our results of operations substantially depend on our net interest income, which is the difference between the interest income we earn on our interest-earning assets and the interest expense we pay on our interest-bearing liabilities. Our interest-bearing liabilities generally reprice or mature more quickly than our interest-earning assets. If rates increase rapidly, we may have to increase the rates we pay on our deposits and borrowed funds more quickly than any changes in interest rates earned on our loans and investments, resulting in a negative effect on interest spreads and net interest income. In addition, the effect of rising rates could be compounded if deposit customers move funds from savings accounts to higher rate certificate of deposit accounts. Conversely, should market interest rates fall below current levels, our net interest margin could also be negatively affected if competitive pressures keep us from further reducing rates on our deposits, while the yields on our assets decrease more rapidly through loan prepayments and interest rate adjustments.

We also are subject to reinvestment risk associated with changes in interest rates. Changes in interest rates may affect the average life of loans and mortgage-related securities. Decreases in interest rates often result in increased prepayments of loans and mortgage-related securities, as borrowers refinance their loans to reduce borrowings costs. Under these circumstances, we are subject to reinvestment risk to the extent we are unable to reinvest the cash received from such prepayments in loans or other investments that have interest rates that are comparable to the interest rates on existing loans and securities. Additionally, increases in interest rates may decrease loan demand and/or may make it more difficult for borrowers to repay adjustable rate loans. Changes in interest rates also affect the value of our interest earning assets and in particular our securities portfolio. Generally, the value of securities fluctuates inversely with changes in interest rates.

Table of Contents

Historically Low Interest Rates May Adversely Affect Our Net Interest Income and Profitability.

In recent years it has been the policy of the FRB to maintain interest rates at historically low levels through its targeted federal funds rate and the purchase of mortgage-backed securities. As a general matter, our interest-bearing liabilities reprice or mature more quickly than our interest-earning assets, which has resulted in increases in net interest income in the short term. Our ability to lower our interest expense is limited at these interest rate levels while the average yield on our interest-earning assets may continue to decrease. The FRB has indicated its intention to maintain low interest rates through late 2014. Accordingly, our net interest income (the difference between interest income earned on assets and interest expense paid on liabilities) may decrease, which may have an adverse affect on our profitability.

Our Financial Condition and Results of Operations Could be Negatively Affected if We Fail to Grow or Fail to Manage our Growth Effectively

Our business strategy includes growth plans. We intend to continue pursuing a profitable, safe and sound, growth strategy, including *de novo* branching. Our prospects must be considered carefully in light of risks, expenses and difficulties frequently encountered by companies in significant growth strategies. We cannot assure you that we will be able to expand our market presence in our existing markets or that any such expansion, including the costs associated with *de novo* branching, will not adversely affect our results of operations. Failure to effectively grow could have a material adverse effect on our business, future prospects, financial condition, or results of operations and could adversely affect our ability to successfully implement our business strategy. In addition, if we grow more slowly than anticipated, our operating results could be adversely affected.

Our ability to grow successfully will depend on a variety of factors including the continued availability of desirable business opportunities, the competitive responses from other financial institutions in our market areas and our ability to manage our growth. While we believe we have the management resources and internal systems in place to successfully manage our future growth, there can be no assurance growth opportunities will be available or growth will be successfully managed.

Our risk management framework may not be effective in mitigating risk and reducing the potential for significant losses.

Our risk management framework is designed to minimize risk and loss to us. We seek to identify, measure, monitor, report and control our exposure to the types of risk to which we are subject, including strategic, market, liquidity, compliance and operational risks, among others. While we employ a broad and diversified set of risk monitoring and mitigation techniques, those techniques are inherently limited because they cannot anticipate the existence or future development of currently unanticipated or unknown risks. Recent economic conditions, heightened legislative and regulatory scrutiny of the financial services industry, among other developments, have resulted in a heightened level of risk for us. Accordingly, we could suffer losses as a result of our failure to properly anticipate and manage these risks.

Acquisitions may Disrupt our Business and Dilute Stockholder Value

We regularly evaluate merger and acquisition opportunities and conduct due diligence activities related to possible transactions with other financial institutions and financial services companies. As a result, negotiations may take place and future mergers or acquisitions involving cash, debt, or equity securities may occur at any time. We seek merger or acquisition partners that are culturally similar, have experienced management, and possess either significant market presence or have potential for improved profitability through financial management, economies of scale, or expanded services.

Acquiring other banks, businesses, or branches involves potential adverse impact to our financial results and various other risks commonly associated with acquisitions, including, among other things:

difficulty in estimating the value of the target company;

Table of Contents

payment of a premium over book and market values that may dilute our tangible book value and earnings per share in the short and long term;

potential exposure to unknown or contingent liabilities of the target company;

exposure to potential asset quality issues of the target company;

there may be volatility in reported income as goodwill impairment losses could occur irregularly and in varying amounts;

difficulty and expense of integrating the operations and personnel of the target company;

inability to realize the expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits;

potential disruption to our business;

potential diversion of our management's time and attention;

the possible loss of key employees and customers of the target company; and

potential changes in banking or tax laws or regulations that may affect the target company.

We may Eliminate Dividends on Our Common Stock

Although we have been paying a quarterly cash dividend to our stockholders, stockholders are not entitled to receive dividends. Downturns in domestic and global economies or the inability to waive dividends to Northfield Bancorp, MHC could cause our board of directors to consider, among other things, the elimination of dividends paid on our common stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

No unresolved staff comments.

ITEM 2. PROPERTIES

The Bank operates from our home office in Staten Island, New York, our operations center located at 581 Main Street, Woodbridge, New Jersey, and our additional 23 branch offices located in New York and New Jersey. Our branch offices are located in the New York Counties of Richmond, and Kings and the New Jersey Counties of Middlesex and Union. The net book value of our premises, land, and equipment was \$20.0 million at December 31, 2011.

ITEM 3. LEGAL PROCEEDINGS

In the normal course of business, we may be party to various outstanding legal proceedings and claims. In the opinion of management, the consolidated financial statements will not be materially affected by the outcome of such legal proceedings and claims as of December 31, 2011.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

(a) Our shares of common stock are traded on the NASDAQ Global Select Market under the symbol NFBK. The approximate number of holders of record of Northfield Bancorp, Inc.'s common stock as of December 31, 2011, was 4,415. Certain shares of Northfield Bancorp, Inc. are held in nominee or street name and accordingly, the number of beneficial owners of such shares is not known or included in the foregoing number. The following table presents quarterly market information for Northfield Bancorp, Inc.'s common stock for the year ended December 31, 2011 and 2010. The following information was provided by the NASDAQ Global Stock Market.

	High	Low	Dividends
Quarter ended December 31, 2011	\$ 14.62	\$ 12.61	\$ 0.06
Quarter ended September 30, 2011	\$ 14.42	\$ 11.68	\$ 0.06
Quarter ended June 30, 2011	\$ 14.25	\$ 12.92	\$ 0.06
Quarter ended March 31, 2011	\$ 13.88	\$ 12.70	\$ 0.05
Quarter ended December 31, 2010	\$ 13.49	\$ 10.80	\$ 0.05
Quarter ended September 30, 2010	\$ 13.81	\$ 10.51	\$ 0.05
Quarter ended June 30, 2010	\$ 15.30	\$ 12.80	\$ 0.05
Quarter ended March 31, 2010	\$ 15.00	\$ 12.29	\$ 0.04

The sources of funds for the payment of a cash dividend are the retained proceeds from the initial sale of shares of common stock and earnings on those proceeds, interest, and principal payments on Northfield Bancorp, Inc.'s investments, including its loan to Northfield Bank's Employee Stock Ownership Plan, and dividends from Northfield Bank.

For a discussion of Northfield Bank's ability to pay dividends, see Supervision and Regulation - Federal Banking Regulation.

Table of Contents**Stock Performance Graph**

Set forth below is a stock performance graph (Source: SNL Financial) comparing (a) the cumulative total return on the Holding Company's Common Stock for the period November 8, 2007, through December 31, 2011, (b) the cumulative total return of the stocks included in the NASDAQ Composite Index over such period, and, (c) the cumulative total return on stocks included in the NASDAQ Bank Index over such period. Cumulative return assumes the reinvestment of dividends, and is expressed in dollars based on an assumed investment of \$100.

Index	Period Ending					
	11/08/07	12/31/07	12/31/08	12/31/09	12/31/10	12/31/11

NASDAQ Composite Index	100.00	98.50	59.12	85.93	101.53	100.72
NASDAQ Bank Index	100.00	97.42	76.44	63.97	73.03	65.36

The Company had in effect at December 31, 2011, the 2008 Equity Incentive Plan which was approved by stockholders on December 17, 2008. The 2008 Equity Incentive Plan provides for the issuance of up to 3,073,488 equity awards. As of December 31, 2011 the Compensation Committee of the Board of Directors awarded 841,050 shares of restricted stock, and 2,109,400 stock options with tandem stock appreciation rights.

Table of Contents**Issuer Purchases of Equity Securities**

The following table shows the Company's repurchase of its common stock for each calendar month in the three months ended December 31, 2011.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Maximum Number of Shares that May Yet Be Purchased Under Plans or Programs(1)
October 1, 2011, through October 31, 2011	557,360	13.56	557,360	1,466,369
November 1, 2011, through November 30, 2011	127,240	13.91	121,515	1,344,854
December 1, 2011, through December 31, 2011	17,300	14.02	17,300	1,327,554
Total	701,900	13.63	696,175	

- (1) On September 9, 2011 the Board of Directors of the Company authorized the continuance of the Company's stock repurchase program. Under the program, the Company intends to repurchase up to 2,066,379 additional shares, representing approximately 5% of its outstanding shares following the repurchase of the remaining shares authorized under the existing stock repurchase program announced on October 27, 2010. The timing of the repurchases will depend on certain factors, including but not limited to, market conditions and prices, the Company's liquidity and capital requirements, and alternative uses of capital. Any repurchased shares will be held as treasury stock and will be available for general corporate purposes. The Company is conducting such repurchases in accordance with a Rule 10b5-1 trading plan.

As of December 31, 2011, the Company has repurchased (under its current and prior repurchase plans) 5,064,252 shares of its stock at an average price of \$12.85 per share.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the Consolidated Financial Statements of Northfield Bancorp, Inc. and the Notes thereto included elsewhere in this report (collectively, the Financial Statements).

Basis of Discussion and Analysis

On October 14, 2011, the Bank assumed all of the deposits and acquired essentially all of the assets of a failed New Jersey State-chartered bank, from the Federal Deposit Insurance Corporation (the FDIC) as receiver for the failed bank, pursuant to the terms of the Purchase and Assumption Agreement, dated October 14, 2011, between the Bank and the FDIC.

The accounting and reporting for the acquired loan portfolio, with deteriorated credit quality, from the Federal Deposit Insurance Corporation, herein referred to as purchased credit-impaired loans, and transferred certain loans, previously originated and designated by the Company as held-for-investment, to held-for-sale differs substantially from those loans originated and classified by the Company as held-for-investment. For purposes of reporting, discussion and analysis, management has classified its loan portfolio into three categories: (1) loans originated by the Company and held-for-sale, which are carried at the lower of aggregate cost or estimated fair value, less costs to sell, and therefore have no associated allowance for loan losses, (2) purchased credit-impaired (PCI) loans, which are held-for-investment, and initially valued at estimated fair value on the date of acquisition, with no initial related allowance for loan losses, and (3) originated loans held-for-investment, which are carried at amortized cost, less net charge-offs and the allowance for loan losses.

Overview

On November 7, 2007, Northfield Bancorp, Inc. completed its initial stock offering whereby the Company sold 19,265,316 shares of common stock, for a price of \$10.00 per share. The transaction closed at the adjusted maximum level of shares permitted by the offering. The shares sold represented 43.0% of the shares of the Company's common stock outstanding following the stock offering. The Company also contributed 2.0% of the shares of our outstanding common stock, or 896,061 shares, and \$3.0 million in cash, to the Northfield Bank Foundation, a charitable foundation established by Northfield Bank. Northfield Bancorp, MHC, the Company's federally chartered mutual holding company parent, owns 61% of the Company's outstanding common stock as of December 31, 2011.

Net income was \$16.8 million, or \$0.42 per common share for 2011, as compared to \$13.8 million, or \$0.33 per common share for 2010. For 2011, our return on average assets and average stockholders' equity were 0.72% and 4.27%, respectively, as compared to 0.65% and 3.46% for 2010. The increases in our return on average equity and average assets were due primarily to the increase in our net income during 2011 as compared to 2010. Net income in 2011 included an after-tax bargain purchase gain of \$3.6 million, or \$0.09 per share, related to an FDIC-assisted transaction completed in October 2011 as well as a charge of \$2.4 million, or \$0.06 per common share for the transfer of \$7.5 million of loans to held-for-sale. Net income for 2010 included an after-tax charge of \$1.2 million, or \$0.05 per common share, related to costs associated with the Company's postponed, second-step offering, and a \$738,000, or \$0.02 per common share, benefit related to the elimination of deferred tax liabilities associated with a change in New York State tax laws.

We grew our assets by 5.8% to \$2.377 billion at December 31, 2011, from \$2.247 billion at December 31, 2010. The increase in total assets was primarily attributable to increases in net loans held-for-investment of \$241.9 million, or 30.0% and cash and cash equivalents of \$21.4 million. This increase was partially offset by a decrease in securities available for sale of \$145.6 million. This increase in assets was funded by deposits increasing \$120.7 million to \$1.494 billion at December 31, 2011, from \$1.373 billion at December 31, 2010. The increase in deposits was attributable to growth in transaction accounts and savings partially offset by decreased certificates of deposit. Borrowed funds increased \$90.7 million to \$481.9 million at December 31, 2011, from \$391.2 million at December 31, 2010.

Table of Contents

Critical Accounting Policies

Critical accounting policies are defined as those that involve significant judgments and uncertainties, and could potentially result in materially different results under different assumptions and conditions. We believe that the most critical accounting policies upon which our financial condition and results of operation depend, and which involve the most complex subjective decisions or assessments, are the following:

Allowance for Loan Losses, Impaired Loans, and Other Real Estate Owned. The allowance for loan losses is the estimated amount considered necessary to cover probable and reasonably estimable credit losses inherent in the loan portfolio at the balance sheet date. The allowance is established through the provision for loan losses that is charged against income. In determining the allowance for loan losses, we make significant estimates and judgments. The determination of the allowance for loan losses is considered a critical accounting policy by management because of the high degree of judgment involved, the subjectivity of the assumptions used, and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses.

The allowance for loan losses has been determined in accordance with GAAP. We are responsible for the timely and periodic determination of the amount of the allowance required. We believe that our allowance for loan losses is adequate to cover identifiable losses, as well as estimated losses inherent in our portfolio for which certain losses are probable but not specifically identifiable.

Management performs a formal quarterly evaluation of the adequacy of the allowance for loan losses. The analysis of the allowance for loan losses has a component for originated held-for-investment impaired loan losses, and a component for general loan losses, including unallocated reserves. Management has defined an originated impaired loan to be a loan for which it is probable, based on current information, that the Company will not collect all amounts due in accordance with the contractual terms of the loan agreement. We have defined the population of originated held-for-investment impaired loans to be all originated non-accrual loans held-for-investment with an outstanding balance of \$500,000 or greater, and all originated loans subject to a troubled debt restructuring. Impaired loans are individually assessed to determine that the loan's carrying value is not in excess of the estimated fair value of the collateral (less cost to sell), if the loan is collateral dependent, or the present value of the expected future cash flows, if the loan is not collateral dependent. Management performs a detailed evaluation of each originated impaired loan and generally obtains updated appraisals as part of the evaluation. In addition, management adjusts estimated fair values down to appropriately consider recent market conditions, our willingness to accept a lower sales price to effect a quick sale, and costs to dispose of any supporting collateral. Determining the estimated fair value of underlying collateral (and related costs to sell) can be difficult in illiquid real estate markets and is subject to significant assumptions and estimates. Management employs an independent third party expert in appraisal preparation and review to ascertain the reasonableness of updated appraisals. Projecting the expected cash flows under troubled debt restructurings is inherently subjective and requires, among other things, an evaluation of the borrower's current and projected financial condition. Actual results may be significantly different than our projections, and our established allowance for loan losses on these loans, and could have a material effect on our financial results.

The second component of the allowance for loan losses is the general loss allocation. This assessment is performed on a portfolio basis, excluding impaired originated held-for-investment, trouble debt restructured, held-for-sale and PCI loans, with loans being grouped into similar risk characteristics, primarily loan type, loan-to-value (if collateral dependent) and internal credit risk rating. We apply an estimated loss rate to each loan group. The loss rates applied are based on our loss experience as adjusted for our qualitative assessment of relevant changes related to: underwriting standards; delinquency trends; collection, charge-off and recovery practices; the nature or volume of the loan group; lending staff; concentration of loan type; current economic conditions; and other relevant factors considered appropriate by management. In evaluating the estimated loss factors to be utilized for each loan group, management also reviews actual loss history over an extended period of time as reported by the FDIC for institutions both nationally and in our market area, for periods that are believed to have been under similar economic conditions. This evaluation is inherently subjective as it requires

Table of Contents

material estimates that may be susceptible to significant revisions based on changes in economic and real estate market conditions. Actual loan losses may be significantly different than the allowance for loan losses we have established, and could have a material effect on our financial results. The Company also maintains an unallocated component related to the general loss allocation. Management does not target a specific unallocated percentage of the total general allocation, or total allowance for loan losses. The primary purpose of the unallocated component is to account for the inherent imprecision of the loss estimation process related primarily to periodic updating of appraisals on impaired loans, as well as periodic updating of commercial loan credit risk ratings by loan officers and the Company's internal credit audit process. Generally, management will establish higher levels of unallocated reserves between independent credit audits, and between appraisal reviews for larger impaired loans. Adjustments to the provision for loans due to the receipt of updated appraisals is mitigated by management's quarterly review of real estate market index changes, and reviews of property valuation trends noted in current appraisals being received on other impaired and unimpaired loans. These changes in indicators of value are applied to impaired loans that are awaiting updated appraisals.

This quarterly process is performed by the accounting department, in conjunction with the credit administration department, and approved by the Controller. The Chief Financial Officer performs a final review of the calculation. All supporting documentation with regard to the evaluation process is maintained by the accounting department. Each quarter a summary of the allowance for loan losses is presented by the Controller to the audit committee of the board of directors.

We have a concentration of loans secured by real property located in New York and New Jersey. As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans are critical in determining the amount of the allowance required for specific loans. Assumptions for appraisal valuations are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly impact the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals are reviewed by management and an independent third party appraiser to determine that the resulting values reasonably reflect amounts realizable on the collateral. Based on the composition of our loan portfolio, we believe the primary risks are increases in interest rates, a decline in the economy generally, and a decline in real estate market values in New York or New Jersey. Any one or a combination of these events may adversely affect our loan portfolio resulting in delinquencies, increased loan losses, and future loan loss provisions.

Although we believe we have established and maintained the allowance for loan losses at adequate levels, changes may be necessary if future economic or other conditions differ substantially from our estimation of the current operating environment. Although management uses the information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change. In addition, the OCC, as an integral part of their examination process, will periodically review our allowance for loan losses. Such agency may require us to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

We also maintain an allowance for estimated losses on off-balance sheet credit risks related to loan commitments and standby letters of credit. Management utilizes a methodology similar to its allowance for loan loss methodology to estimate losses on these items. The allowance for estimated credit losses on these items is included in other liabilities and any changes to the allowance are recorded as a component of other non-interest expense.

Real estate acquired by us as a result of foreclosure or by deed in lieu of foreclosure is classified as real estate owned. When the Company acquires other real estate owned, it generally obtains a current appraisal to substantiate the net carrying value of the asset. The asset is recorded at the lower of cost or estimated fair value, establishing a new cost basis. Holding costs and declines in estimated fair value result in charges to expense after acquisition.

PCI Loans. PCI loans are subject to our internal credit review. If and when credit deterioration occurs at the loan pool level subsequent to the acquisition date, a provision for credit losses for PCI loans will be

Table of Contents

charged to earnings for the full amount of the decline in expected cash flows for the pool. Under the accounting guidance of ASC Subtopic 310-30, for acquired credit impaired loans, the allowance for loan losses on PCI loans is measured at each financial reporting date based on future expected cash flows. This assessment and measurement is performed at the pool level and not at the individual loan level. Accordingly, decreases in expected cash flows resulting from further credit deterioration, on a pool basis, as of such measurement date compared to those originally estimated are recognized by recording a provision and allowance for credit losses on PCI loans. Subsequent increases in the expected cash flows of the loans in each pool would first reduce any allowance for loan losses on PCI loans; and any excess will be accreted prospectively as a yield adjustment. The analysis of expected cash flows for pools incorporates updated pool level expected prepayment rates, default rates, and delinquency levels, and loan level loss severity given default assumptions. The expected cash flows are estimated based on factors which include loan grades established in the Bank's ongoing credit review program, likelihood of default based on observations of specific loans during the credit review process as well as applicable industry data, loss severity based on updated evaluation of cash flow from available collateral, and the contractual terms of the underlying loan agreement. Actual cash flows could differ from those expected, and others provided with the same information could draw different reasonable conclusions and calculate different expected cash flows.

Goodwill. Business combinations accounted for under the acquisition method require us to record as assets on our financial statements goodwill, an unidentifiable intangible asset which is equal to the excess of the purchase price which we pay for another company over the estimated fair value of the net assets acquired. Net assets acquired include identifiable intangible assets such as core deposit intangibles and non-compete agreements. We evaluate goodwill for impairment annually on December 31, and more often if circumstances warrant, and we will reduce its carrying value through a charge to earnings if impairment exists. Future events or changes in the estimates that we use to determine the carrying value of our goodwill or which otherwise adversely affect its value could have a material adverse impact on our results of operations. As of December 31, 2011, goodwill had a carrying value of \$16.2 million.

Securities Valuation and Impairment. Our securities portfolio is comprised of mortgage-backed securities and to a lesser extent corporate bonds, agency bonds, and mutual funds. Our available-for-sale securities portfolio is carried at estimated fair value, with any unrealized gains or losses, net of taxes, reported as accumulated other comprehensive income or loss in stockholders' equity. Our trading securities portfolio is reported at estimated fair value. Our held-to-maturity securities portfolio, consisting of debt securities for which we have a positive intent and ability to hold to maturity, is carried at amortized cost. We conduct a quarterly review and evaluation of the available-for-sale and held-to-maturity securities portfolios to determine if the estimated fair value of any security has declined below its amortized cost, and whether such decline is other-than-temporary. If such decline is deemed other-than-temporary, we adjust the cost basis of the security by writing down the security to estimated fair value through a charge to current period operations. The estimated fair values of our securities are primarily affected by changes in interest rates, credit quality, and market liquidity.

Management is responsible for determining the estimated fair value of the Company's securities. In determining estimated fair values, management utilizes the services of an independent third party recognized as a specialist in pricing securities. The independent pricing service utilizes market prices of same or similar securities whenever such prices are available. Prices involving distressed sellers are not utilized in determining fair value. Where necessary, the independent third party pricing service estimates fair value using models employing techniques such as discounted cash flow analyses. The assumptions used in these models typically include assumptions for interest rates, credit losses, and prepayments, utilizing observable market data, where available. Where the market price of the same or similar securities is not available, the valuation becomes more subjective and involves a high degree of judgment. On a quarterly basis, we review the pricing methodologies utilized by the independent third party pricing service for each security type. In addition, we compare securities prices to a second independent pricing service that is utilized as part of our asset liability risk management process and analyze significant anomalies in pricing including significant fluctuations, or lack thereof, in relation to other securities. At December 31, 2011, and for each quarter end in 2011, all securities were priced by an independent third party pricing service, and management made no adjustment to the prices received.

Table of Contents

Determining that a security's decline in estimated fair value is other-than-temporary is inherently subjective, and becomes increasingly difficult as it relates to mortgage-backed securities that are not guaranteed by the U.S. Government, or a U.S. Government Sponsored Enterprise (e.g., Fannie Mae and Freddie Mac). In performing our evaluation of securities in an unrealized loss position, we consider among other things, the severity, and duration of time that the security has been in an unrealized loss position and the credit quality of the issuer. As it relates to mortgage-backed securities not guaranteed by the U.S. Government, Fannie Mae, or Freddie Mac, we perform a review of the key underlying loan collateral risk characteristics including, among other things, origination dates, interest rate levels, composition of variable and fixed rates, reset dates (including related pricing indices), current loan to original collateral values, locations of collateral, delinquency status of loans, and current credit support. In addition, for securities experiencing declines in estimated fair values of over 10%, as compared to its amortized cost, management also reviews published historical and expected prepayment speeds, underlying loan collateral default rates, and related historical and expected losses on the disposal of the underlying collateral on defaulted loans. This evaluation is inherently subjective as it requires estimates of future events, many of which are difficult to predict. Actual results could be significantly different than our estimates and could have a material effect on our financial results.

Federal Home Loan Bank Stock Impairment Assessment. Northfield Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. As a member of the Federal Home Loan Bank of New York (FHLB), the Bank is required to acquire and hold shares of capital stock in the FHLB in an amount determined by a membership investment component and an activity-based investment component. As of December 31, 2011, the Bank was in compliance with its ownership requirement. At December 31, 2011, Northfield Bank held \$12.7 million of FHLB common stock. In performing our evaluation of our investment in FHLB stock, on a quarterly basis, management reviews the most recent financial statements of the FHLB and determines whether there have been any adverse changes to its capital position as compared to the trailing period. In addition, management reviews the FHLB most recent President's Report in order to determine whether or not a dividend has been declared for the current reporting period. Furthermore, management obtains the credit rating of the FHLB from an accredited credit rating industry to ensure that no downgrades have occurred. At December 31, 2011, it was determined by management that the Bank's investment in FHLB stock was not impaired.

Deferred Income Taxes. We use the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. If it is determined that it is more likely than not that the deferred tax assets will not be realized, a valuation allowance is established. We consider the determination of this valuation allowance to be a critical accounting policy because of the need to exercise significant judgment in evaluating the amount and timing of recognition of deferred tax liabilities and assets, including projections of future taxable income. These judgments and estimates are reviewed quarterly as regulatory and business factors change. A valuation allowance for deferred tax assets may be required if the amounts of taxes recoverable through loss carry backs decline, or if we project lower levels of future taxable income. Such a valuation allowance would be established and any subsequent changes to such allowance would require an adjustment to income tax expense that could adversely affect our operating results.

Stock Based Compensation. We recognize the cost of employee services received in exchange for awards of equity instruments based on the grant-date fair value.

We estimate the per share fair value of options on the date of grant using the Black-Scholes option pricing model using assumptions for the expected dividend yield, expected stock price volatility, risk-free interest rate and expected option term. These assumptions are based on our judgments regarding future option exercise experience and market conditions. These assumptions are subjective in nature, involve uncertainties, and, therefore, cannot be determined with precision. The Black-Scholes option pricing model also contains certain inherent limitations when applied to options that are not traded on public markets.

Table of Contents

The per share fair value of options is highly sensitive to changes in assumptions. In general, the per share fair value of options will move in the same direction as changes in the expected stock price volatility, risk-free interest rate and expected option term, and in the opposite direction of changes in the expected dividend yield. For example, the per share fair value of options will generally increase as expected stock price volatility increases, risk-free interest rate increases, expected option term increases and expected dividend yield decreases. The use of different assumptions or different option pricing models could result in materially different per share fair values of options.

As our Company's stock does not have a significant amount of historical price volatility, we utilized the historical stock price volatility of a peer group when pricing stock options.

Comparison of Financial Condition at December 31, 2011 and 2010

Total assets increased \$129.8 million, or 5.8%, to \$2.38 billion at December 31, 2011, from \$2.25 billion at December 31, 2010. The increase was primarily attributable to increases in net loans held-for-investment of \$241.9 million, or 30.0% and cash and cash equivalents of \$21.4 million. This increase was partially offset by a decrease in securities available for sale of \$145.6 million.

Cash and cash equivalents increased by \$21.4 million, or 48.9%, to \$65.3 million at December 31, 2011, from \$43.9 million at December 31, 2010. Balances fluctuate based on the timing of receipt of security and loan repayments and the redeployment into higher yielding assets, or the funding of deposit or borrowing obligations.

Securities available-for-sale decreased \$145.6 million, or 11.7%, to \$1.1 billion at December 31, 2011, from \$1.2 billion at December 31, 2010. The decrease was primarily attributable to maturities and paydowns of \$403.4 million and sales of \$182.7 million partially offset by purchases of \$427.4 million and an increase of \$10.9 million in net unrealized gains. The Company routinely sells securities when market pricing presents, in management's assessment, an economic benefit that outweighs holding such securities, and when smaller balance securities become cost prohibitive to carry. In the current low interest rate environment, the Company has experienced elevated levels of prepayments on mortgage-backed securities that it has reinvested into shorter term securities.

At December 31, 2011, \$949.6 million of the portfolio consisted of residential mortgage-backed securities issued or guaranteed by Fannie Mae, Freddie Mac, or Ginnie Mae. The Company also held residential mortgage-backed securities not guaranteed by Fannie Mae, Freddie Mac, or Ginnie Mae, referred to as private label securities. The private label securities had an amortized cost of \$39.9 million and an estimated fair value of \$40.5 million at December 31, 2011. These private label securities were in a net unrealized gain position of \$567,000 million at December 31, 2011, consisting of gross unrealized gains of \$1.9 million and gross unrealized losses of \$1.3 million. In addition to the above mortgage-backed securities, the Company held \$100.7 million in securities issued by corporate entities which were all rated investment grade (A- or better) at December 31, 2011.

Securities held-to-maturity decreased \$1.4 million, or 28.5%, to \$3.6 million at December 31, 2011, from \$5.0 million at December 31, 2010. The decrease was attributable to maturities and paydowns during the year ended December 31, 2011.

Originated loans held-for-investment, net, totaled \$985.9 million at December 31, 2011, as compared to \$827.6 million at December 31, 2010. The increase was primarily in multifamily real estate loans, which increased \$174.7 million, or 61.6%, to \$458.3 million at December 31, 2011, from \$283.6 million at December 31, 2010. Insurance premium loans increased \$14.6 million, or 32.7%, to \$59.1 million and home equity loans increased \$1.5 million, or 5.5%, to \$29.7 million at December 31, 2011. These increases were partially offset by \$7.4 million of originated loans held-for-investment, at amortized cost, being transferred to held-for-sale, at estimated fair value, less costs to sell, of \$3.4 million, resulting in a charge-off to the allowance for loan losses of \$4.0 million. Originated loans held-for-investment also decreased due to decreases in one-to-four-family residential loans of \$5.4 million, commercial real estate loans of \$12.5 million, land and construction loans of \$11.9 million, and commercial and industrial loans of \$4.3 million. Currently, management is focused on originating multi-family loans, with less emphasis on other loan types.

Table of Contents

PCI loans were \$88.5 million at December 31, 2011. On October 14, 2011, the Company purchased PCI loans of approximately \$132.4 million, based on the recorded principal balance, net of deferred fees and costs, of a failed institution, as part of a Federal Deposit Insurance Corporation-assisted transaction. Management recorded PCI loans at their estimated fair value of \$91.9 million at the date of acquisition.

Bank owned life insurance increased \$3.0 million, or 4.0%, to \$77.8 million at December 31, 2011. The increase resulted from income earned on bank owned life insurance for the year ended December 31, 2011.

Federal Home Loan Bank of New York stock, at cost, increased \$2.9 million, or 29.6%, to \$12.7 million at December 31, 2011, from \$9.8 million at December 31, 2010. This increase was attributable to an increase in borrowings outstanding with the Federal Home Loan Bank of New York over the same time period.

Premises and equipment, net, increased \$3.9 million, or 24.5%, to \$20.0 million at December 31, 2011, from \$16.1 million at December 31, 2010. This increase was primarily attributable to leasehold improvements made to new branches and the renovation of existing branches.

Other real estate owned increased \$3.2 million to \$3.4 at December 31, 2011, from \$171,000 at December 31, 2010. This increase was partially attributable to \$1.2 million of properties acquired as part of a Federal Deposit Insurance Corporation-assisted transaction.

Other assets decreased \$3.0 million, or 16.6%, to \$15.1 million at December 31, 2011, from \$18.1 million at December 31, 2010. The decrease in other assets was primarily attributable to a decrease in net deferred tax assets, due to an increase in deferred tax liabilities associated with net unrealized gains on securities available-for-sale and the amortization of prepaid FDIC insurance.

Deposits increased \$120.7 million, or 8.8%, to \$1.5 billion at December 31, 2011, from \$1.4 billion at December 31, 2010. The increase in deposits for the year ended December 31, 2011 was due to an increase in transaction accounts of \$67.0 million, or 35.7% as compared to December 31, 2010. This increase was partially offset by a decrease in certificates of deposit accounts (issued by the Bank) of \$7.9 million, or 1.6%, from December 31, 2010 to December 31, 2011, a decrease in savings accounts of \$3.1 million, or 0.9%, from December 31, 2010 and a decrease of \$65.0 million in short-term certificates of deposit originated through the CDARS® Network. The Company utilizes the CDARS® Network as a cost effective alternative to other short-term funding sources. The increase in deposits was also partially attributable to the FDIC-assisted transaction. The acquired deposits were approximately \$109.5 million at December 31, 2011. The Company continues to focus on its marketing and pricing of its products, which it believes promotes longer-term customer relationships.

Borrowings, consisting primarily of Federal Home Loan Bank advances and repurchase agreements, increased \$90.7 million, or 23.2%, to \$481.9 million at December 31, 2011, from \$391.2 million at December 31, 2010. The increase in borrowings was primarily the result of the Company increasing longer-term borrowings, taking advantage of, and locking in, lower interest rates, partially offset by maturities during the year ended December 31, 2011.

Accrued expenses and other liabilities decreased \$69.1 million, to \$16.6 million at December 31, 2011, from \$85.7 million at December 31, 2010. The decrease was primarily a result of \$70.7 million owed for securities purchases occurring prior to December 31, 2010, and settling after year end. The Company had no such transactions at December 31, 2011.

Total stockholders' equity decreased by \$14.1 million to \$382.7 million at December 31, 2011, from \$396.7 million at December 31, 2010. The decrease was primarily due to \$37.8 million in stock repurchases and the payment of approximately \$3.7 million in cash dividends. These decreases were partially offset by net income of \$16.8 million for the year ended December 31, 2011, and an increase of \$3.2 million in additional paid-in capital primarily related to the recognition of compensation expense associated with equity awards, and an increase in accumulated other comprehensive income of \$6.6 million, related primarily to increases in unrealized gains on securities available for sale, net of tax, due to a decrease in general market interest rates.

Table of Contents

On September 9, 2011, the Board of Directors of the Company authorized the continuance of the stock repurchase program. Under the program, the Company intends to repurchase up to 2,066,379 additional shares, representing approximately 5% of its outstanding shares following the repurchase of the remaining shares authorized under the existing stock repurchase program announced on October 27, 2010. The timing of the repurchases will depend on certain factors, including but not limited to, market conditions and prices, the Company's liquidity and capital requirements, and alternative uses of capital. Any repurchased shares will be held as treasury stock and will be available for general corporate purposes. The Company is conducting such repurchases in accordance with a Rule 10b5-1 trading plan. As of December 31, 2011, the Company has repurchased (under its current and prior repurchase plans) 5,064,252 shares of its stock at an average price of \$12.85 per share. The Company also repurchased shares of stock from employees to meet minimum tax obligations related to vesting of equity awards.

Comparison of Operating Results for the Years Ended December 31, 2011 and 2010

Net Income. Net income increased \$3.0 million, or 22.0%, to \$16.8 million for the year ended December 31, 2011, as compared to \$13.8 million for the year ended December 31, 2010, due primarily to an increase of \$3.5 million in net interest income and an increase in non-interest income of \$5.0 million, partially offset by a \$2.5 million increase in the provision for loan losses, an increase of \$2.8 million in non-interest expense and an increase of \$127,000 in income tax expense.

Interest Income. Interest income increased by \$4.5 million, or 5.2%, to \$91.0 million for the year ended December 31, 2011, as compared to \$86.5 million for the year ended December 31, 2010. The increase was primarily the result of an increase in average interest-earning assets of \$175.6 million, or 8.8%. The increase in average interest-earning assets was primarily attributable to an increase in average loans of \$153.5 million, or 19.8%, an increase in average mortgage-backed securities of \$124.3 million, or 13.3%, and an increase in average interest-earning deposits of \$3.0 million, or 6.4%, partially offset by a decrease in securities (other than mortgage-backed securities) of \$108.7 million, or 45.3%. The effect of the increase in average interest-earning assets was partially offset by a decrease of 14 basis points, or 3.2%, in the yield earned to 4.17% for the year ended December 31, 2011, from 4.31% for the year ended December 31, 2010. The rates earned on loans and mortgage-backed securities decreased due to the general decline in market interest rates for these asset types.

Interest Expense. Interest expense increased \$1.0 million, or 4.1%, to \$25.4 million for the year ended December 31, 2011, from \$24.4 million for the year ended December 31, 2010. The increase was attributable to an increase in interest expense on borrowings of \$2.3 million, or 21.5%, partially offset by a decrease in interest expense on deposits of \$1.3 million, or 9.7%. The increase in interest expense on borrowings was primarily attributable to an increase of \$145.7 million, or 44.1%, in average borrowings outstanding, partially offset by a decrease of 52 basis points, or 15.9%, in the cost of borrowings, reflecting lower market interest rates for borrowed funds. The decrease in interest expense on deposits was attributable to a decrease in the cost of interest-bearing deposits of 13 basis points, or 12.1%, to 0.94% for the year ended December 31, 2011, from 1.07% for the year ended December 31, 2010, reflecting lower market interest rates for short-term deposits. The decrease in the cost of deposits was partially offset by an increase of \$41.0 million, or 3.2%, in average interest-bearing deposits outstanding.

Net Interest Income. Net interest income increased \$3.5 million, or 5.7%, as interest-earning assets increased by 8.8% to \$2.2 billion. The general decline in interest rates has resulted in yields earned on interest earning assets to decline 14 basis points to 4.17% for the current year as compared to 4.31% for the prior year, while rates paid on interest-bearing liabilities decreased 11 basis points to 1.42% for the current year as compared to 1.53% for the prior year. Yields on loans include \$1.4 million in interest income recognized on PCI loans with an average balance of \$19.3 million contributing approximately four basis points to the net interest margin. Additionally, net interest income for the year ended December 31, 2011, included prepayment penalties of \$812,000 compared to \$67,000 for the year ended December 31, 2010. The increase in average interest earning assets was due primarily to increases in average loans outstanding of \$153.5 million and \$124.3 million in mortgage-backed securities, partially offset by a decrease in other securities. Other securities consist primarily of investment-grade shorter-term corporate bonds and government-sponsored enterprise bonds.

Table of Contents

Provision for Loan Losses. The provision for loan losses was \$12.6 million for the year ended December 31, 2011, an increase of \$2.5 million, or 24.8%, from the \$10.1 million provision recorded in the year ended December 31, 2010. The increase in the provision for loan losses in the current year was due primarily to increased charge-offs and increased loan originations partially offset by a shift in the composition of our loan portfolio to multifamily loans, which generally require lower general reserves than other commercial real estate loans and decreases in non-performing loans, during the year ended December 31, 2011, as compared to the year ended December 31, 2010. During the year ended December 31, 2011, the Company recorded net charge-offs of \$7.6 million compared to net charge-offs of \$3.7 million for the year ended December 31, 2010. Charge-offs for 2011 included \$4.0 million related to the transfer of \$7.4 million of loans to held-for-sale.

Non-interest Income. Non-interest income increased \$5.0 million, or 73.0%, to \$11.8 million for the year ended December 31, 2011, as compared to \$6.8 million for the year ended December 31, 2010. This increase was primarily a result of a \$3.6 million, net of taxes, bargain purchase gain, associated with the FDIC-assisted acquisition in October 2011, a \$750,000 increase in gains on security sales, a \$364,000 increase in fees and service charges for customer services, and a \$694,000 increase in income earned on bank owned life insurance, generated by increased cash surrender values, primarily resulting from higher levels of bank owned life insurance. The Company routinely sells securities when market pricing presents, in management's assessment, an economic benefit that outweighs holding such securities, and when smaller balance securities become cost prohibitive to carry. These increases were partially offset by an increase of \$255,000 in other-than-temporary credit impairment charges recognized on two private label mortgage-backed securities and an equity mutual fund and a decrease of \$120,000 in other income.

Non-interest Expense. Non-interest expense increased \$2.8 million, or 7.4%, for the year ended December 31, 2011, as compared to the year ended December 31, 2010, due primarily to compensation and employee benefits expense increasing \$2.6 million, which resulted primarily from increases in employees related to additional branch and operations personnel, and to a lesser extent, salary adjustments effective January 1, 2011. Occupancy expense increased \$1.1 million, or 22.3, primarily due to increases in rent and amortization of leasehold improvements relating to new branches and the renovation of existing branches. These increases were partially offset by decreased professional fees of \$1.3 million, primarily resulting from the expensing of approximately \$1.8 million in costs incurred for the Company's postponed, second-step stock offering in the prior year partially offset by increased costs related to loan workouts.

Income Tax Expense. The Company recorded income tax expense of \$6.5 million and \$6.4 million for the years ended December 31, 2011 and 2010, respectively. The effective tax rate for the year ended December 31, 2011, was 27.8%, as compared to 31.6% for the year ended December 31, 2010. The decrease in rate was due primarily to the \$5.9 million bargain purchase gain recorded in the FDIC-assisted transaction being recorded net of tax, of \$2.3 million and lower taxable income in the current year as a result of an increase in tax-exempt bank owned life insurance income of \$694,000.

Comparison of Operating Results for the Years Ended December 31, 2010 and 2009

Net Income. Net income increased \$1.7 million or 14.2%, to \$13.8 million for the year ended December 31, 2010, from \$12.1 million for the year ended December 31, 2009, due primarily to an increase of \$5.5 million in net interest income, an increase of \$1.4 million in non-interest income, and a decrease of \$248,000 in income tax expense, partially offset by an increase of \$4.4 million in non-interest expense, and an increase of \$1.0 million in provision for loan losses.

Interest Income. Interest income increased by \$927,000, or 1.1%, to \$86.5 million for the year ended December 31, 2010, as compared to \$85.6 million for the year ended December 31, 2009. The increase was primarily the result of an increase in average interest-earning assets of \$213.0 million, or 11.9%. The increase in average interest-earning assets was primarily attributable to an increase in average loans of \$121.7 million, or 18.6%, an increase in average mortgage-backed securities of \$16.2 million, or 1.8%, and an increase in securities (other than mortgage-backed securities) of \$112.9 million, or 88.9%, partially offset by a decrease in average interest-earning deposits of \$37.2 million, or 44.7%. The effect of the increase in average interest-earning assets

Table of Contents

was partially offset by a decrease in the yield earned to 4.31% for the year ended December 31, 2010, from 4.77% for the year ended December 31, 2009. The rates earned on all asset categories, other than loans, decreased due to the general decline in market interest rates for these asset types. The rate earned on loans increased from 5.95% for the year ended December 31, 2009, to 6.02% for the year ended December 31, 2010, primarily as a result of fewer loans migrating to non-accrual status during the 2010, as compared to the amount of loans that migrated to non-accrual status during 2009.

Interest Expense. Interest expense decreased \$4.6 million, or 15.8%, to \$24.4 million for the year ended December 31, 2010, from \$29.0 million for the year ended December 31, 2009. The decrease was attributable to a decrease in interest expense on deposits of \$4.6 million, or 25.5%, partially offset by a modest increase in interest expense on borrowings of \$70,000, or 0.7%. The decrease in interest expense on deposits was attributable to a decrease in the cost of interest-bearing deposits of 62 basis points, or 36.7%, to 1.07% for the year ended December 31, 2010, from 1.69% for the year ended December 31, 2009, reflecting lower market interest rates for short-term deposits. The decrease in the cost of deposits was partially offset by an increase of \$190.3 million, or 17.7%, in average interest-bearing deposits outstanding. The increase in interest expense on borrowings was primarily attributable to an increase of \$33.3 million, or 11.2%, in average borrowings outstanding, partially offset by a decrease of 34 basis points, or 9.4%, in the cost of borrowings, reflecting lower market interest rates for borrowed funds.

Net Interest Income. Net interest income increased \$5.5 million, or 9.7%, due primarily to interest earning assets increasing \$213.0 million, or 11.9%, partially offset by a decrease in the net interest margin of six basis points, or 1.9%, over the prior year. The net interest margin decreased for the year ended December 31, 2010, as the average yield earned on interest earning assets decreased, which was partially offset by a decrease in the average rate paid on interest-bearing liabilities. The general decline in yields was due to the overall low interest rate environment and was driven by decreases in yields earned on mortgage-backed securities, as principal repayments were reinvested into lower yielding securities. The decline in yield on interest-earning assets was also due to declining yields on other securities and interest-earning deposits in other financial institutions. These decreases were partially offset by an increase in yield earned on loans due primarily to fewer loans migrating to non-accrual status during 2010, as compared to the amount of loans that migrated to non-accrual status during 2009. The increase in average interest earning assets was due primarily to an increase in average loans outstanding of \$121.7 million, other securities of \$112.9 million, and mortgage-backed securities of \$16.2 million, being partially offset by decreases in interest-earning assets in other financial institutions. Other securities consist primarily of investment-grade corporate bonds, and government-sponsored enterprise bonds.

Provision for Loan Losses. We recorded a provision for loan losses of \$10.1 million for the year ended December 31, 2010, an increase of \$1.1 million, or 11.6%, from the \$9.0 million provision recorded for the year ended December 31, 2009. The increase in the provision for loan losses was due primarily to increases in total loans, the change in the composition of our loan portfolio, and increases in general loss factors, due primarily to higher levels of charge-offs. The increases in the general loss factors utilized in management's estimate of credit losses inherent in the loan portfolio were also the result of continued deterioration of the local economy. Net charge-offs for the year ended December 31, 2010, were \$3.7 million, as compared to \$2.4 million for the year ended December 31, 2009.

Non-interest Income. Non-interest income increased \$1.4 million, or 26.9%, primarily as a result of an increase of \$962,000 in gains on securities transactions, net for the year ended December 31, 2010, as compared to the year ended December 31, 2009. The Company recognized \$1.9 million in gains on securities transactions during the year ended December 31, 2010, as compared to \$891,000 in gains on securities transactions during the year ended December 31, 2009. Securities gains during the year ended December 31, 2010, included gross realized gains of \$1.3 million primarily from the sale of mortgage-backed securities, coupled with securities gains of \$597,000 related to the Company's trading portfolio. During the year ended December 31, 2009, securities gains included gross realized gains of \$299,000 primarily from the sale of mortgage-backed securities, coupled with securities gains of \$592,000 related to the Company's trading portfolio. The trading portfolio is

Table of Contents

utilized to fund the Company's deferred compensation obligation to certain employees and directors of the Company. The participants of this plan, at their election, defer a portion of their compensation. Gains and losses on trading securities have no effect on net income since participants benefit from, and bear the full risk of, changes in the trading securities market values. Therefore, the Company records an equal and offsetting amount in non-interest expense, reflecting the change in the Company's obligations under the plan. The Company routinely sells securities when market pricing presents, in management's assessment, an economic benefit that outweighs holding such security, and when smaller balance securities become cost prohibitive to carry.

Non-interest income also was positively affected by a \$524,000, or 29.9%, increase in income on bank owned life insurance for the year ended December 31, 2010, as compared to the year ended December 31, 2009, due to the purchase of \$28.8 million of insurance policies during the year ended December 31, 2010. The Company also recognized approximately \$197,000 of income on the sale of fixed assets during the year ended December 31, 2010.

Non-interest Expense. Non-interest expense increased \$4.4 million, or 12.9%, for the year ended December 31, 2010, as compared to the year ended December 31, 2009, due primarily to the expensing of approximately \$1.8 million in costs incurred on the Company's postponed, second-step stock offering, and an increase of \$2.2 million, or 12.8%, in compensation and employee benefits expense. Compensation and employee benefits expense increased primarily due to increases in full-time equivalent employees related to additional branch and operations personnel, as well as incremental personnel from our insurance premium finance division formed in October 2009. Occupancy expense increased \$547,000, or 11.9%, over the same time period, primarily due to increases in rent and amortization of leasehold improvements relating to new branches and the renovation of existing branches. In addition, other non-interest expense also increased \$536,000, or 15.7%, from the year ended December 31, 2009 to the year ended December 31, 2010. This increase is primarily attributable to operating expenses of the insurance premium finance division. These increases in non-interest expense were partially offset by a decrease of \$515,000 in FDIC insurance expense. FDIC insurance expense for the year ended December 31, 2009 included \$770,000 related to an FDIC special assessment.

Income Tax Expense. The Company recorded a provision for income taxes of \$6.4 million for the year ended December 31, 2010, as compared to \$6.6 million for the year ended December 31, 2009. The effective tax rate for the year ended December 31, 2010, was 31.6%, as compared to 35.4% for the year ended December 31, 2009. The decrease in the effective tax rate was primarily the result of the reversal of deferred tax liabilities related to state bad debt reserves of approximately \$738,000 resulting from the enactment of new State of New York tax laws during the year ended December 31, 2010, and higher levels of tax exempt income from bank owned life insurance.

Table of Contents

Average Balances and Yields. The following tables set forth average balance sheets, average yields and costs, and certain other information for the years indicated. No tax-equivalent yield adjustments have been made, as we had no tax-free interest-earning assets during the years. All average balances are daily average balances based upon amortized costs. Non-accrual loans were included in the computation of average balances. The yields set forth below include the effect of deferred fees, discounts, and premiums that are amortized or accreted to interest income or interest expense.

	2011		For the Years Ended December 31, 2010				2009		Average Yield/ Rate

Average interest-earning assets to interest-bearing liabilities	122.23%	125.52%	130.44%
---	---------	---------	---------

- (1) Net interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average rate of interest-bearing liabilities.
- (2) Net interest-earning assets represent total interest-earning assets less total interest-bearing liabilities.
- (3) Net interest margin represents net interest income divided by average total interest-earning assets.

Table of Contents**Rate/Volume Analysis**

The following table presents the effects of changing rates and volumes on our net interest income for the years indicated. The rate column shows the effects attributable to changes in rate (changes in rate multiplied by prior volume). The volume column shows the effects attributable to changes in volume (changes in volume multiplied by prior rate). The total column represents the sum of the prior columns. For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately based on the changes due to rate and the changes due to volume.

	Year Ended December 31, 2011 vs. 2010			Year Ended December 31, 2010 vs. 2009

Asset Quality**Purchased Credit Impaired (PCI) Loans**

PCI loans were recorded at estimated fair value using expected future cash flows deemed to be collectible on the date acquired. Based on its detailed review of PCI loans and experience in loan workouts, management believes it has a reasonable expectation about the amount and timing of future cash flows and accordingly has classified PCI loans (\$88.5 million at December 31, 2011) as accruing, even though they may be contractually past due. At December 31, 2011, based on recorded contractual principal, 9.0% of PCI loans were past due 30 to 89 days, and 16.1% were past due 90 days or more, as compared to 8.0% and 13.9% at October 14, 2011. The amount and timing of expected cash flows as of December 31, 2011 did not change significantly from the October 2011 acquisition date. The discussion that follows relates specifically to originated loans, both held-for-investment and held-for-sale.

Originated Loans

General. Maintaining loan quality historically has been, and will continue to be, a key element of our business strategy. We employ conservative underwriting standards for new loan originations and maintain sound credit administration practices while the loans are outstanding. In addition, substantially all of our loans are secured, predominantly by real estate. However, during the current economic recession, we have experienced increases in delinquent and non-performing loans. At December 31, 2011, our non-performing loans totaled

Table of Contents

\$43.9 million or 4.07% of total loans. At the same time charge-offs have remained relatively low at 0.78% of average loans outstanding for the year ended December 31, 2011, 0.47% for the year ended December 31, 2010, and 0.37% for the year ended December 31, 2009. Net charge-offs in 2011 include \$4.0 million related to the transfer of \$7.4 million of loans held-for-investment to held-for-sale.

Delinquent Loans and Non-performing Loans. Non-performing loans decreased \$17.0 million, or 28.0%, from \$60.9 million at December 31, 2010, to \$43.9 million at December 31, 2011. The following table details non-performing loans at December 31, 2011 and 2010.

	December 31, 2011	December 31, 2010
	(in thousands)

Multifamily	72	
Home equity and lines of credit		59
Commercial and industrial		38
Total loans delinquent 90 days or more and still accruing:	85	1,609
Total non-performing loans	\$ 43,866	\$ 60,890

Table of Contents

Generally, originated loans are placed on non-accruing status when they become 90 days or more delinquent, and remain on non-accrual status until they are brought current, have six months of performance under the loan terms, and factors indicating reasonable doubt about the timely collection of payments no longer exist. Therefore, loans may be current in accordance with their loan terms, or may be less than 90 days delinquent and still be on a non-accruing status. The following table details the delinquency status of non-accruing loans at December 31, 2011:

	Days Past Due			Total
	0 to 29	30 to 89	90 or more	
	(in thousands)			
Real estate loans:				
Commercial	\$ 16,395	\$ 3,613	\$ 14,651	\$ 34,659
One- to four-family residential	210	594	534	1,338
Construction and land	1,709		422	2,131
Multifamily	523		1,652	2,175
Home equity and lines of credit	102		1,664	1,766
Commercial and industrial loans	553		1,022	1,575
Insurance premium loans			137	137
Total non-accruing loans	\$ 19,492	\$ 4,207	\$ 20,082	\$ 43,781

The decrease in non-accrual loans was primarily attributable to \$12.5 million in loans being returned to accrual status during the year ended December 31, 2011. Loans returned to accrual status were current as to principal and interest, and factors indicating doubtful collection no longer existed, including the borrower's performance under the original loan terms for at least six months. Non-accrual loans also decreased as a result of \$4.0 million of pay-offs and principal pay-downs, charge offs of \$7.6 million, and the transfer of \$2.7 million to other real estate owned. The above decreases in non-accruing loans during the year ended December 31, 2011, were partially offset by \$11.3 million of loans being placed on non-accrual status during the year ended December 31, 2011.

At December 31, 2011, the Company had \$21.1 million of accruing loans that were 30 to 89 days delinquent, as compared to \$19.8 million at December 31, 2010. The following table sets forth the total amounts of delinquencies for accruing loans that were 30 to 89 days past due by type and by amount at the dates indicated.

	December 31,	
	2011	2010
	(in thousands)

Total	\$ 21,067	\$ 19,798

Table of Contents

Non-accruing loans subject to restructuring agreements increased to \$23.3 million at December 31, 2011, from \$20.0 million at December 31, 2010. Loans subject to restructuring agreements, and still accruing totaled \$18.3 million and \$11.2 million at December 31, 2011 and 2010, respectively. During the year ended December 31, 2011, the Company entered into thirteen troubled debt restructuring agreements (TDRs), of which \$6.8 million and \$12.8 million were classified as accruing and non-accruing, respectively, at December 31, 2011. At December 31, 2011, \$12.7 million, or 69.4%, of the \$18.3 million of accruing troubled debt restructurings, and \$19.2 million, or 82.3%, of the \$23.3 million of non-accruing troubled debt restructurings, were performing in accordance with their restructured terms. Generally, the types of concession that we make to troubled borrowers includes reduction to, both temporary and permanent, interest rates and extension of payment terms. At December 31, 2011 the balance of TDRs are 81% commercial real estate loans, 4% construction loans, 5% multifamily loans, 4% commercial and industrial loans, and 6% one- to four-family residential loans.

The table below sets forth the amounts and categories of the troubled debt restructurings as of December 31, 2011 and December 31, 2010.

	At December 31,			
	2011 Non-Accruing	Accruing	2010 Non-Accruing	Accruing
	(in thousands)			
Troubled Debt Restructurings:				
Real estate loans:				
Commercial	\$ 20,420	\$ 13,389	\$ 13,138	\$ 7,879
One- to four-family residential		2,532		1,750
Construction and land	1,709		4,012	
Multifamily	523	1,552	2,327	1,569
Home equity and lines of credit	102			
Commercial and industrial loans	547	876	501	
	\$ 23,301	\$ 18,349	\$ 19,978	\$ 11,198
Performing in accordance with restructured terms	82.34%	69.03%	61.03%	100.00%

The allowance for loan losses to non-performing loans (held-for-investment) increased from 35.83% at December 31, 2010 to 66.4% at December 31, 2011. This increase was primarily attributable to an increase of \$5.0 million, or 23.0%, in the allowance for loan losses partially offset by a decrease in non-performing loans of \$17.0 million, from \$60.9 million at December 31, 2010, to \$43.9 million at December 31, 2011. At December 31, 2011, 64.5% (balance of impaired loans) of the appraisals utilized for our impairment analysis were completed within the last nine months, 32.7% (balance of impaired loans) were completed within the last 18 months, with the remaining 2.8% (balance of impaired loans) being older than 18 months. All appraisals older than 12 months were reviewed by management and appropriate adjustments were made utilizing current market indices. Generally loans are charged down to the appraised value less costs to sell, which reduces the coverage ratio of the allowance for loan losses to non-performing loans. Downward adjustments to appraisal values, primarily to reflect quick sale discounts, are generally recorded as specific reserves within the allowance for loan losses.

The allowance for loan losses to originated loans held-for-investment, net, increased to 2.72% at December 31, 2011, from 2.64% at December 31, 2010. This increase was attributable to an increase of \$2.5 million, or 24.9%, in the allowance for loan losses from December 31, 2010, to December 31, 2011, partially offset by an increase in the loan portfolio over the same time period. The increase in the Company's allowance for loan losses during the year is primarily attributable to specific reserves on impaired loans related to quick sale discounts, and an increase in general loss factors related to increases in non-accrual loans, fluctuations in loan delinquencies, and continued declines in general economic conditions and real estate values as well as an increase in unallocated reserves due to the timing of appraisals and ongoing loan reviews.

Table of Contents

Specific reserves on impaired loans increased \$1.4 million, or 51.8%, from \$2.7 million, for the year ended December 31, 2010, to \$4.1 million for the year ended December 31, 2011. At December 31, 2011, the Company had 48 loans classified as impaired and recorded a total of \$4.1 million of specific reserves on 16 of the 48 impaired loans. At December 31, 2010, the Company had 44 loans classified as impaired and recorded a total of \$2.7 million of specific reserves on 13 of the 44 impaired loans.

The following table sets forth activity in our allowance for loan losses, by loan type, for the years indicated.

	Real estate loans							Other	Unallocated	Total Allowance for Loan Losses
	Commercial	One-to-four Family Residential	Construction and Land	Multifamily	Home Equity and Lines of Credit (in thousands)	Commercial and Industrial	Insurance Premium Loans			
December 31, 2008	\$ 5,176	\$ 131	\$ 1,982	\$ 788	\$ 146	\$ 523	\$	\$ 32	\$	\$ 8,778
Provision for loan losses	4,575	95	1,113	1,242	64	1,495	101	2	351	9,038
Recoveries										
Charge-offs	(1,348)	(63)	(686)	(164)		(141)				(2,402)
December 31, 2009	8,403	163	2,409	1,866	210	1,877	101	34	351	15,414
Provision for loan losses	5,238	407	(111)	5,403	32	(1,122)	91	(6)	152	10,084
Recoveries							20			20
Charge-offs	(987)		(443)	(2,132)		(36)	(101)			(3,699)
December 31, 2010	12,654	570	1,855	5,137	242	719	111	28	503	21,819
Provision for loan losses	6,809	498	27	2,353	238	1,931	115	12	606	12,589
Recoveries	55					23	30			108
Charge-offs	(5,398)	(101)	(693)	(718)	(62)	(638)	(70)			(7,680)
December 31, 2011	\$ 14,120	\$ 967	\$ 1,189	\$ 6,772	\$ 418	\$ 2,035	\$ 186	\$ 40	\$ 1,109	\$ 26,836

During the year ended December 31, 2011, the Company recorded net charge-offs of \$7.6 million, an increase of \$3.9 million, or 105.4%, as compared to the year ended December 31, 2010. The increase in net charge-offs was primarily attributable to a \$4.4 million increase in net charge-offs related to commercial real estate loans and a \$602,000 increase in net charge-offs related to commercial and industrial loans offset by a \$1.4 million decrease in net charge-offs related to multifamily real estate loans. 2011 net charge-offs include \$4.0 million related to loans transferred to held-for-sale. Charge-offs related to this transfer did not have a material effect on the Company's loss factors for calculating the allowance for loan losses since such losses represent a change in intent for these loans which is not the intent for the held-for-investment portfolio. As a result of increases in outstanding balances, the general decline in real estate values and the current economic downturn, the Company's historical and general loss factors have increased, thus increasing the allowance for loan losses allocated to multifamily real estate loans by \$1.7 million, or 31.8%, from \$5.1 million at December 31, 2010, to \$6.8 million at December 31, 2011. In addition, as a result of the net charge-offs incurred, as well as increased levels of commercial real estate loans on non-accrual status, coupled with the general decline in real estate values and the current economic downturn, the Company's historical and general loss factors have increased, thus increasing the allowance for loan losses allocated to commercial real estate loans by \$1.5 million, or 11.6%, from \$12.6 million at December 31, 2010, to \$14.1 million at December 31, 2011. The allowance for loan losses allocated to commercial and industrial loans increased \$1.3 million from December 31, 2010 to December 31, 2011. This increase was primarily attributable to an increase in historical loss factors, coupled with the increased level of non-accrual commercial and industrial loans. The Company could experience an increase in its allowance for loan losses in future periods if charge-offs and non-performing loans continue to increase.

Table of Contents**Management of Market Risk**

General. A majority of our assets and liabilities are monetary in nature. Consequently, our most significant form of market risk is interest rate risk. Our assets, consisting primarily of mortgage-related assets and loans, generally have longer maturities than our liabilities, which consist primarily of deposits and wholesale funding. As a result, a principal part of our business strategy involves managing interest rate risk and limiting the exposure of our net interest income to changes in market interest rates. Accordingly, our board of directors has established a management risk committee, comprised of our Treasurer, who chairs this Committee, our Chief Executive Officer, our Chief Financial Officer, our Chief Lending Officer, and our Executive Vice President of Operations. This committee is responsible for, among other things, evaluating the interest rate risk inherent in our assets and liabilities, for recommending to the risk committee of our board of directors the level of risk that is appropriate given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the board of directors.

We seek to manage our interest rate risk in order to minimize the exposure of our earnings and capital to changes in interest rates. As part of our ongoing asset-liability management, we currently use the following strategies to manage our interest rate risk:

originate multifamily real estate and commercial real estate loans that generally have interest rates that reset every five years;

invest in shorter maturity investment grade corporate securities and mortgage-related securities; and

obtain general financing through lower cost deposits and wholesale funding and repurchase agreements.

Net Portfolio Value Analysis. We compute the net present value of our interest-earning assets and interest-bearing liabilities (net portfolio value or NPV) over a range of assumed market interest rates. Our simulation model uses a discounted cash flow analysis to measure the net portfolio value. We estimate the economic value of these assets and liabilities under the assumption that interest rates experience an instantaneous, parallel, and sustained increase of 100, 200, 300, or 400 basis points, or a decrease of 100 and 200 basis points which is based on the current interest rate environment. A basis point equals one-hundredth of one percent, and 100 basis points equals one percent. An increase in interest rates from 3% to 4% would mean, for example, a 100 basis point increase in the Change in Interest Rates column below.

Net Interest Income Analysis. We also analyze our sensitivity to changes in interest rates through our net interest income model. Net interest income is the difference between the interest income we earn on our interest-earning assets, such as loans and securities, and the interest we pay on our interest-bearing liabilities, such as deposits and borrowings. We estimate what our net interest income would be for a twelve-month period. We then calculate what the net interest income would be for the same period under the assumption that interest rates experience an instantaneous and sustained increase of 100, 200, 300, or 400 basis points or a decrease of 100 and 200 basis points which is based on the current interest rate environment.

Table of Contents

The table below sets forth, as of December 31, 2011, our calculation of the estimated changes in our net portfolio value, net present value ratio, and percent change in net interest income that would result from the designated instantaneous and sustained changes in interest rates. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, loan prepayments and deposit decay, and should not be relied on as indicative of actual results.

Change in Interest Rates (basis points)	Estimated Present Value of Assets	Estimated Present Value of Liabilities	NPV		Estimated NPV/Present Value of Assets Ratio	Net Interest Income Percent Change
			Estimated NPV (dollars in thousands)	Estimated Change In NPV		
+400	\$ 2,162,339	\$ 1,850,354	\$ 311,985	\$ (118,243)	14.43%	(7.72)%
+300	2,216,517	1,882,182	334,335	(95,893)	15.08%	(5.56)%
+200	2,282,543	1,915,059	367,484	(62,744)	16.10%	(3.10)%
+100	2,352,573	1,949,034	403,539	(26,689)	17.15%	(1.02)%
0	2,414,383	1,984,155	430,228		17.82%	
-100	2,447,264	2,015,567	431,697	1,469	17.64%	(0.66)%
-200	2,480,170	2,026,021	454,149	23,921	18.31%	(2.21)%

(1) Assumes an instantaneous and sustained uniform change in interest rates at all maturities.

(2) NPV includes non-interest earning assets and liabilities.

The table above indicates that at December 31, 2011, in the event of a 200 basis point decrease in interest rates, we would experience a 5.56% increase in estimated net portfolio value and a 2.21% decrease in net interest income. In the event of a 400 basis point increase in interest rates, we would experience a 27.48% decrease in net portfolio value and a 7.72% decrease in net interest income. Our policies provide that, in the event of a 400 basis point increase/decrease or less in interest rates, our net present value ratio should decrease by no more than 300 basis points and in the event of a 200 basis point increase/decrease, our projected net interest income should decrease by no more than 20%. Additionally, our policy states that our net portfolio value should be at least 8.5% of total assets before and after such shock at December 31, 2011. At December 31, 2011, we were in compliance with all board approved policies with respect to interest rate risk management.

Certain shortcomings are inherent in the methodologies used in determining interest rate risk through changes in net portfolio value and net interest income. Our model requires us to make certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the net portfolio value and net interest income information presented assume that the composition of our interest-sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and assume that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration or repricing of specific assets and liabilities. Accordingly, although interest rate risk calculations provide an indication of our interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on our net interest income and will differ from actual results.

Liquidity and Capital Resources

Liquidity is the ability to fund assets and meet obligations as they come due. Our primary sources of funds consist of deposit inflows, loan repayments, borrowings through repurchase agreements and advances from money center banks and the Federal Home Loan Bank of New York, and repayments, maturities and sales of securities. While maturities and scheduled amortization of loans and securities are reasonably predictable sources of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates, economic conditions, and competition. Our board asset and liability management committee is responsible for establishing and monitoring our liquidity targets and strategies in order to ensure that sufficient liquidity exists for meeting the borrowing needs and withdrawals of deposits by our customers as well as unanticipated contingencies. We seek to maintain a ratio of liquid assets (not subject to pledge) as a percentage of deposits and borrowings of 35%

Table of Contents

or greater. At December 31, 2011, this ratio was 52.70%. We believe that we had sufficient sources of liquidity to satisfy our short- and long-term liquidity needs at December 31, 2011.

We regularly adjust our investments in liquid assets based on our assessment of:

expected loan demand;

expected deposit flows;

yields available on interest-earning deposits and securities; and

the objectives of our asset/liability management program.

Our most liquid assets are cash and cash equivalents, and unpledged mortgage-related securities issued or guaranteed by the U.S. Government, Fannie Mae, or Freddie Mac, that we can either borrow against or sell. We also have the ability to surrender bank owned life insurance contracts. The surrender of these contracts would subject the Company to income taxes and penalties for increases in the cash surrender values over the original premium payments.

The Company had the following primary sources of liquidity at December 31, 2011 (in thousands):

Cash and cash equivalents	\$ 65,269
Unpledged mortgage-backed securities (Issued or guaranteed by the U.S. Government, Fannie Mae, or Freddie Mac)	427,262

At December 31, 2011, we had \$32.9 million in outstanding loan commitments. In addition, we had \$31.9 million in unused lines of credit to borrowers. Certificates of deposit due within one year of December 31, 2011, totaled \$356.4 million, or 23.9% of total deposits. If these deposits do not remain with us, we will be required to seek other sources of funds, including loan sales, other deposit products, including replacement certificates of deposit, securities sold under agreements to repurchase (repurchase agreements), and advances from the Federal Home Loan Bank of New York and other borrowing sources. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before December 31, 2011. We believe, based on experience, that a significant portion of such deposits will remain with us, and we have the ability to attract and retain deposits by adjusting the interest rates offered.

The Company has a detailed contingency funding plan that is reviewed and reported to the board risk committee on at least a quarterly basis. This plan includes monitoring cash on a daily basis to determine the liquidity needs of the Bank. Additionally, management performs a stress test on the Bank's retail deposits and wholesale funding sources in several scenarios on a quarterly basis. The stress scenarios include deposit attrition of up to 50%, and selling our securities available-for-sale portfolio at a discount of 20% to its current estimated fair value. The Bank continues to maintain significant liquidity under all stress scenarios.

Northfield Bank is subject to various regulatory capital requirements, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning assets and off-balance sheet items to broad risk categories. At December 31, 2011, Northfield Bank exceeded all regulatory capital requirements and is considered well capitalized under regulatory guidelines. See Supervision and Regulation Federal Banking Regulation Capital Requirements and Note 13 of the Notes to the Consolidated Financial Statements.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Commitments. As a financial services provider, we routinely are a party to various financial instruments with off-balance-sheet risks, such as commitments to extend credit, and unused lines of credit. While these

Table of Contents

contractual obligations represent our potential future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process applicable to loans we originate. In addition, we routinely enter into commitments to sell mortgage loans; such amounts are not significant to our operations. For additional information, see Note 12 of the Notes to the Consolidated Financial Statements.

Contractual Obligations. In the ordinary course of our operations we enter into certain contractual obligations. Such obligations include leases for premises and equipment, agreements with respect to borrowed funds and deposit liabilities, and agreements with respect to investments.

The following table summarizes our significant fixed and determinable contractual obligations and other funding needs by payment date at December 31, 2011. The payment amounts represent those amounts due to the recipient and do not include any unamortized premiums or discounts or other similar carrying amount adjustments.

Contractual Obligations	Payments Due by Period				Total
	Less Than One Year	One to Three Years	Three to Five Years (In thousands)	More Than Five Years	
Long-term debt(1)	\$ 108,681	\$ 138,800	\$ 223,410	\$ 8,000	\$ 478,891
Floating rate advances	3,004				3,004
Operating leases	3,378	6,609	6,474	31,607	48,068
Capitalized leases	387	810	516	560	2,273
Certificates of deposit	356,391	72,017	51,712	3	480,123
Total	\$ 471,841	\$ 218,236	\$ 282,112	\$ 40,170	\$ 1,012,359
Commitments to extend credit(2)	\$ 64,735	\$	\$	\$	\$ 64,735

(1) Includes repurchase agreements, Federal Home Loan Bank of New York advances, and accrued interest payable at December 31, 2011.

(2) Includes unused lines of credit which are assumed to be funded within the year.

As of December 31, 2011, we serviced \$41.3 million of loans for Freddie Mac. These one- to four-family residential mortgage real estate loans were underwritten to Freddie Mac guidelines and to comply with applicable federal, state, and local laws. At the time of the closing of these loans the Company owned the loans and subsequently sold them to Freddie Mac providing normal and customary representations and warranties, including representations and warranties related to compliance with Freddie Mac underwriting standards. At the time of sale, the loans were free from encumbrances except for the mortgages filed by the Company which, with other underwriting documents, were subsequently assigned and delivered to Freddie Mac. At December 31, 2011, substantially all of the loans serviced for Freddie Mac were performing in accordance with their contractual terms and management believes that it has no material repurchase obligations associated with these loans.

Impact of Recent Accounting Standards and Interpretations

Accounting Standards Update No. 2011-02 amends Topic 310 and clarifies the guidance on a creditor's evaluation of whether it has granted a concession, and whether a restructuring constitutes a troubled debt restructuring. The amendments in this update are effective for the first interim or annual period beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. As a result of applying these amendments, an entity may identify receivables that are newly considered impaired. For purposes of measuring impairment of those receivables, an entity should apply the amendments prospectively for the first interim or annual period beginning on or after June 15, 2011. An entity should disclose the total amount of receivables and the allowance for credit losses as of the end of the period of adoption related to those receivables that are newly considered impaired under Section 310-10-35 for which impairment was previously

Table of Contents

measured under Subtopic 450-20, Contingencies – Loss Contingencies. An entity should disclose the information required by paragraphs 310-10-50-33 through 50-34, which was deferred by Accounting Standards Update No. 2011-01, *Receivables (Topic 310): Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20*, for interim and annual periods beginning on or after June 15, 2011. The Company adopted this Accounting Standard Update in 2011, and has provided the applicable disclosures as part of Note 5 to these financial statements. The adoption of this Accounting Standard Update did not result in a material change to the Company's consolidated financial statements.

Accounting Standards Update No. 2011-03, *Reconsideration of Effective Control for Repurchase Agreements*, amends Topic 860 (Transfers and Servicing) where an entity may or may not recognize a sale upon the transfer of financial assets subject to repurchase agreements, based on whether or not the transferor has maintained effective control. In the assessment of effective control, Accounting Standard Update 2011-03 has removed the criteria that requires transferors to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee. Other criteria applicable to the assessment of effective control have not been changed. This guidance is effective for prospective periods beginning on or after December 15, 2011. Early adoption is prohibited. We do not expect the adoption of this Accounting Standard Update to have a material effect on the Company's consolidated financial statements.

In May 2011, the FASB issued ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. ASU No. 2011-04 results in a consistent definition of fair value and common requirements for measurement of and disclosure about fair value between U.S. GAAP and International Financial Reporting Standards (IFRS). The changes to U.S. GAAP as a result of ASU No. 2011-04 are as follows: (1) The concepts of highest and best use and valuation premise are only relevant when measuring the fair value of nonfinancial assets (that is, it does not apply to financial assets or any liabilities); (2) U.S. GAAP currently prohibits application of a blockage factor in valuing financial instruments with quoted prices in active markets. ASU No. 2011-04 extends that prohibition to all fair value measurements; (3) An exception is provided to the basic fair value measurement principles for an entity that holds a group of financial assets and financial liabilities with offsetting positions in market risk or counterparty credit risk that are managed on the basis of the entity's net exposure to either of those risks. This exception allows the entity, if certain criteria are met, to measure the fair value of the net asset or liability position in a manner consistent with how market participants would price the net risk position; (4) Aligns the fair value measurement of instruments classified within an entity's shareholders' equity with the guidance for liabilities; and (5) Disclosure requirements have been enhanced for recurring Level 3 fair value measurements to disclose quantitative information about unobservable inputs and assumptions used, to describe the valuation processes used by the entity, and to describe the sensitivity of fair value measurements to changes in unobservable inputs and interrelationships between those inputs. In addition, entities must report the level in the fair value hierarchy of items that are not measured at fair value in the statement of condition but whose fair value must be disclosed. The provisions of ASU No. 2011-04 are effective for the Company's interim reporting period beginning on or after December 15, 2011. The adoption of ASU No. 2011-04 is not expected to have a material effect on the Company's consolidated financial statements.

In June 2011, the FASB issued ASU No. 2011-05, *Presentation of Comprehensive Income*. The provisions of ASU No. 2011-05 allow an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The statement(s) are required to be presented with equal prominence as the other primary financial statements. ASU No. 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in shareholders' equity but does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. In December 2011, the FASB issued ASU 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting*

Table of Contents

Standards Update No. 2011-05 which defers the effective date of the requirement to present separate line items on the income statement for reclassification adjustments of items out of accumulated other comprehensive income into net income. All other requirements in ASU 2011-05 are not affected by this Update. For a public entity, the ASUs are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted. The Company does not expect that the adoption of these pronouncements will have a material impact on the Company's financial condition or results of operations.

In September 2011, the FASB issued ASU No. 2011-08, *Testing Goodwill for Impairment*. The provisions of ASU No. 2011-08 simplify how entities, both public and nonpublic, test goodwill for impairment. The amendments in the Update permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. The provisions of ASU No. 2011-05 are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if an entity's financial statements for the most recent annual or interim period have not yet been issued or, for nonpublic entities, have not yet been made available for issuance. The adoption of ASU No. 2011-08 is not expected to have a material effect on the Company's consolidated financial statements.

Impact of Inflation and Changing Prices

Our consolidated financial statements and related notes have been prepared in accordance with GAAP. GAAP generally requires the measurement of financial position and operating results in terms of historical dollars without consideration for changes in the relative purchasing power of money over time due to inflation. The effect of inflation is reflected in the increased cost of our operations. Unlike industrial companies, our assets and liabilities are primarily monetary in nature. As a result, changes in market interest rates have a greater effect on our performance than inflation.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

For information regarding market risk see Item 7- Management's Discussion and Analysis of Financial Conditions and Results of Operations Management of Market Risk.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Northfield Bancorp, Inc. and subsidiaries:

We have audited the accompanying consolidated balance sheets of Northfield Bancorp, Inc. and subsidiaries (the Company) as of December 31, 2011 and 2010, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2011. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Northfield Bancorp, Inc. and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 15, 2012 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Northfield Bancorp, Inc. and subsidiaries:

We have audited Northfield Bancorp, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Northfield Bancorp, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on Northfield Bancorp, Inc. and subsidiaries' internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Northfield Bancorp, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Northfield Bancorp, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2011, and our report dated March 15, 2012 expressed an unqualified opinion on those consolidated financial statements.

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(1) Summary of Significant Accounting Policies

The following significant accounting and reporting policies of Northfield Bancorp, Inc. and subsidiaries (collectively, the Company), conform to U.S. generally accepted accounting principles, or (GAAP), and are used in preparing and presenting these consolidated financial statements.

(a) Basis of Presentation

The consolidated financial statements are comprised of the accounts of Northfield Bancorp, Inc. and its wholly owned subsidiaries, Northfield Investment, Inc. and Northfield Bank (the Bank) and the Bank's wholly-owned significant subsidiaries, NSB Services Corp. and NSB Realty Trust. All significant intercompany accounts and transactions have been eliminated in consolidation.

Effective July 21, 2011, as a result of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), the Bank began to be regulated and supervised by the Office of the Comptroller of the Currency and Northfield Bancorp, Inc. began to be regulated and supervised by the Board of Governors of the Federal Reserve System.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheets and revenues and expenses during the reporting periods. Actual results may differ significantly from those estimates and assumptions. A material estimate that is particularly susceptible to significant change in the near term is the allowance for loan losses. In connection with the determination of this allowance, management generally obtains independent appraisals for significant properties. In addition, judgments related to the amount and timing of expected cash flows from purchased credit-impaired loans, goodwill, securities valuation and impairment, and deferred income taxes, involve a higher degree of complexity and subjectivity and require estimates and assumptions about highly uncertain matters. Actual results may differ from the estimates and assumptions.

Certain prior year balances have been reclassified to conform to the current year presentation.

(b) Business

The Company, through its principal subsidiary, the Bank, provides a full range of banking services primarily to individuals and corporate customers in Richmond and Kings Counties in New York, and Union and Middlesex Counties in New Jersey. The Company is subject to competition from other financial institutions and to the regulations of certain federal and state agencies, and undergoes periodic examinations by those regulatory authorities.

(c) Cash Equivalents

Cash equivalents consist of cash on hand, due from banks, federal funds sold, and interest-bearing deposits in other financial institutions with an original term of three months or less.

(d) Securities

Securities are classified at the time of purchase, based on management's intention, as securities held-to-maturity, securities available-for-sale, or trading account securities. Securities held-to-maturity are those that management has the positive intent and ability to hold until maturity. Securities held-to-maturity are carried at amortized cost, adjusted for amortization of premiums and accretion of discounts using the level-yield method over the contractual term of the securities, adjusted for actual prepayments. Securities available-for-sale represents all securities not classified as either held-to-maturity or trading. Securities available-for-sale are carried at estimated fair value with unrealized holding gains and losses (net of related tax effects) on such

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

securities excluded from earnings, but included as a separate component of stockholders' equity, titled Accumulated other comprehensive income (loss). The cost of securities sold is determined using the specific-identification method. Security transactions are recorded on a trade-date basis. Trading securities are securities that are bought and may be held for the purpose of selling them in the near term. Trading securities are reported at estimated fair value, with unrealized holding gains and losses reported as a component of gain (loss) on securities transactions, net in non-interest income.

Our evaluation of other-than-temporary impairment considers the duration and severity of the impairment, our intent and ability to hold the securities, and our assessments of the reason for the decline in value and the likelihood of a near-term recovery. If a determination is made that a debt security is other-than-temporarily impaired, the Company will estimate the amount of the unrealized loss that is attributable to credit and all other non-credit related factors. The credit related component will be recognized as an other-than-temporary impairment charge in non-interest income. The non-credit related component will be recorded as an adjustment to accumulated other comprehensive income (loss), net of tax. The estimated fair value of debt securities, including mortgage-backed securities and corporate debt obligations is furnished by an independent third party pricing service. The third party pricing service primarily utilizes pricing models and methodologies that incorporate observable market inputs, including among other things, benchmark yields, reported trades, and projected prepayment and default rates. Management reviews the data and assumptions used in pricing the securities by its third party provider for reasonableness.

(e) Loans

During the fourth quarter of 2011, the Company acquired a loan portfolio, with deteriorated credit quality, from the Federal Deposit Insurance Corporation, herein referred to as purchased credit-impaired loans, and transferred certain loans, previously originated and designated by the Company as held-for-investment, to held-for-sale. The accounting and reporting for these loans differs substantially from those loans originated and classified by the Company as held-for-investment. For purposes of reporting, discussion and analysis, management has classified its loan portfolio into three categories: (1) loans originated by the Company and held-for-sale, which are carried at the lower of aggregate cost or estimated fair value, less costs to sell, and therefore have no associated allowance for loan losses, (2) purchased credit-impaired (PCI) loans, which are held-for-investment, and initially valued at estimated fair value on the date of acquisition, with no initial related allowance for loan losses, and (3) originated loans held-for-investment, which are carried at amortized cost, less net charge-offs and the allowance for loan losses.

Originated net loans held-for-investment are stated at unpaid principal balance, adjusted by unamortized premiums and unearned discounts, deferred origination fees and certain direct origination costs, and the allowance for loan losses. Interest income on loans is accrued and credited to income as earned. Net loan origination fees/costs are deferred and accreted/amortized to interest income over the loan's contractual life using the level-yield method, adjusted for actual prepayments. Generally, loans held-for-sale are designated at time of origination and routinely consist of newly originated fixed rate residential loans and are recorded at the lower of aggregate cost or estimated fair value in the aggregate. In 2011, the Company transferred from held-for-investment to held-for-sale certain impaired loans. Transfers from held-for-investment are infrequent and occur at fair value less costs to sell, with any charge-off to allowance for loan losses. Gains are recognized on a settlement-date basis and are determined by the difference between the net sales proceeds and the carrying value of the loans, including any net deferred fees or costs.

Originated net loans held-for-investment are deemed impaired when it is probable, based on current information, that the Company will not collect all amounts due in accordance with the contractual terms of the loan agreement. The Company has defined the population of originated impaired loans to be all originated

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

non-accrual loans held-for-investment with an outstanding balance of \$500,000 or greater. Originated impaired loans held-for-investment are individually assessed to determine that the loan's carrying value is not in excess of the expected future cash flows, discounted at the loan's original effective interest rate, or the underlying collateral (less estimated costs to sell) if the loan is collateral dependent. Impairments are recognized through a charge to the provision for loan losses for the amount that the loan's carrying value exceeds the discounted cash flow analysis or estimated fair value of collateral (less estimated costs to sell) if the loan is collateral dependent. Homogeneous loans with balances less than \$500,000 are collectively evaluated for impairment.

The allowance for loan losses is increased by the provision for loan losses charged against income and is decreased by charge-offs, net of recoveries. Loan losses are charged-off in the period the loans, or portion thereof, are deemed uncollectible. Generally, the Company will record a loan charge-off (including a partial charge-off) to reduce a loan to the estimated fair value of the underlying collateral, less cost to sell, if it is determined that it is probable that recovery will come primarily from the sale of such collateral. The provision for loan losses is based on management's evaluation of the adequacy of the allowance which considers, among other things, originated impaired loans held-for-investment, deterioration in PCI loans subsequent to acquisition, past loan loss experience, known and inherent risks in the portfolio, existing adverse situations that may affect the borrower's ability to repay, and estimated value of any underlying collateral securing loans. Additionally, management evaluates changes, if any, in underwriting standards, collection, charge-off and recovery practices, the nature or volume of the portfolio, lending staff, concentration of loans, as well as current economic conditions, and other relevant factors. Management believes the allowance for loan losses is adequate to provide for probable and reasonably estimable losses at the date of the consolidated balance sheets. The Company also maintains an allowance for estimated losses on off-balance sheet credit risks related to loan commitments and standby letters of credit. Management utilizes a methodology similar to its allowance for loan loss adequacy methodology to estimate losses on these commitments. The allowance for estimated credit losses on off-balance sheet commitments is included in other liabilities and any changes to the allowance are recorded as a component of other non-interest expense.

While management uses available information to recognize probable and reasonably estimable losses on loans, future additions may be necessary based on changes in conditions, including changes in economic conditions, particularly in Richmond and Kings Counties in New York, and Union and Middlesex Counties in New Jersey. Accordingly, as with most financial institutions in the market area, the ultimate collectability of a substantial portion of the Company's loan portfolio is susceptible to changes in conditions in the Company's marketplace. In addition, future changes in laws and regulations could make it more difficult for the Company to collect all contractual amounts due on its loans and mortgage-backed securities.

In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance based on their judgments about information available to them at the time of their examination.

Troubled debt restructured loans are those loans whose terms have been modified because of deterioration in the financial condition of the borrower. Modifications could include extension of the terms of the loan, reduced interest rates, and forgiveness of accrued interest and/or principal. Once an obligation has been restructured because of such credit problems, it continues to be considered restructured until paid in full or, if the obligation yields a market rate (a rate equal to the rate the Company was willing to accept at the time of the restructuring for a new loan with comparable risk), until the year subsequent to the year in which the restructuring takes place, provided the borrower has performed under the modified terms for a six-month period. The Company records an impairment charge equal to the difference between the present value of estimated future cash flows under the restructured terms discounted at the original loan's effective interest rate, or the underlying collateral value less costs to sell, if the loan is collateral dependent. Changes in present values attributable to the passage of time are recorded as a component of the provision for loan losses.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

A loan is considered past due when it is not paid in accordance with its contractual terms. The accrual of income on loans, including originated impaired loans held-for-investment, and other loans in the process of foreclosure, is generally discontinued when a loan becomes 90 days or more delinquent, or when certain factors indicate that the ultimate collection of principal and interest is in doubt. Loans on which the accrual of income has been discontinued are designated as non-accrual loans. All previously accrued interest is reversed against interest income, and income is recognized subsequently only in the period that cash is received, provided no principal payments are due and the remaining principal balance outstanding is deemed collectible. A non-accrual loan is not returned to accrual status until both principal and interest payments are brought current and factors indicating doubtful collection no longer exist, including performance by the borrower under the loan terms for a six-month period.

The Company accounts for the PCI loans acquired as a result of the FDIC-assisted transaction in October 2011 based on expected cash flows (Please see Note 2, Business Combinations, for further information regarding the acquisition). This election is in accordance with FASB Accounting Standards Codification (ASC) Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (ASC 310-30). In accordance with ASC 310-30, the Company will maintain the integrity of a pool of multiple loans accounted for as a single asset and evaluate the pools for impairment, and accrual status, based on variances from the expected cash flows.

(f) Federal Home Loan Bank Stock

The Bank, as a member of the Federal Home Loan Bank of New York (the FHLB), is required to hold shares of capital stock in the FHLB as a condition to both becoming a member and engaging in certain transactions with the FHLB. The minimum investment requirement is determined by a membership investment component and an activity-based investment component. The membership investment component is the greater of 0.20% of the Bank's mortgage-related assets, as defined by the FHLB, or \$1,000. The activity-based investment component is equal to 4.5% of the Bank's outstanding advances with the FHLB. The activity-based investment component also considers other transactions, including assets originated for or sold to the FHLB, and delivery commitments issued by the FHLB. The Company currently does not enter into these other types of transactions with the FHLB.

On a quarterly basis, we perform our other-than-temporary impairment analysis of FHLB stock, we evaluate, among other things, (i) its earnings performance, including the significance of any decline in net assets of the FHLB as compared to the regulatory capital amount of the FHLB, (ii) the commitment by the FHLB to continue dividend payments, and (iii) the liquidity position of the FHLB. We did not consider our investment in FHLB stock to be other-than-temporarily impaired at December 31, 2011.

(g) Premises and Equipment, Net

Premises and equipment, including leasehold improvements, are carried at cost, less accumulated depreciation and amortization. Depreciation and amortization of premises and equipment, including capital leases, are computed on a straight-line basis over the estimated useful lives of the related assets. The estimated useful lives of significant classes of assets are generally as follows: buildings forty years; furniture and equipment five to seven years; and purchased computer software three years. Leasehold improvements are amortized over the shorter of the term of the related lease or the estimated useful lives of the improvements. Major improvements are capitalized, while repairs and maintenance costs are charged to operations as incurred. Upon retirement or sale, any gain or loss is credited or charged to operations.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)*****(h) Bank Owned Life Insurance***

The Company has purchased bank owned life insurance contracts to help fund its obligations for certain employee benefit costs. The Company's investment in such insurance contracts has been reported in the consolidated balance sheets at their cash surrender values. Changes in cash surrender values and death benefit proceeds received in excess of the related cash surrender values are recorded as non-interest income.

(i) Goodwill

Goodwill is presumed to have an indefinite useful life and is not amortized, but rather is tested, at least annually, for impairment at the reporting unit level. For purposes of the Company's goodwill impairment testing, management has identified a single reporting unit. The Company uses the quoted market price of its common stock on the impairment testing date as the basis for estimating the fair value of the Company's reporting unit. If the fair value of the reporting unit exceeds its carrying amount, further evaluation is not necessary. However, if the fair value of the reporting unit is less than its carrying amount, further evaluation is required to compare the implied fair value of the reporting unit's goodwill to its carrying amount to determine if a write-down of goodwill is required. As of December 31, 2011, the carrying value of goodwill totaled \$16.2 million. The Company performed its annual goodwill impairment test, as of December 31, 2011, and determined the fair value of the Company's single reporting unit to be in excess of its carrying value. Accordingly, as of the annual impairment test date, there was no indication of goodwill impairment. The Company will test goodwill for impairment between annual test dates if an event occurs or circumstances change that would indicate the fair value of the reporting unit is below its carrying amount. No events have occurred and no circumstances have changed since the annual impairment test date that would indicate the fair value of the reporting unit is below its carrying amount.

(j) Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply in the year in which those temporary differences are expected to be recovered or settled. When applicable, deferred tax assets are reduced by a valuation allowance for any portions determined not likely to be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Income tax benefits are recognized and measured based upon a two-step model: 1) a tax position must be more-likely-than-not to be sustained based solely on its technical merits in order to be recognized, and 2) the benefit is measured as the largest dollar amount of that position that is more-likely-than-not to be sustained upon settlement. The difference between the benefit recognized and the tax benefit claimed on a tax return is referred to as an unrecognized tax benefit (UTB). The Corporation records income tax-related interest and penalties, if applicable, within income tax expense.

(k) Impairment of Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted (and without interest) net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

(l) Securities Sold Under Agreements to Repurchase and Other Borrowings

The Company enters into sales of securities under agreements to repurchase (Repurchase Agreements) and collateral pledge agreements (Pledge Agreements) with selected dealers and banks. Such agreements are accounted for as secured financing transactions since the Company maintains effective control over the transferred or pledged securities and the transfer meets the other accounting and recognition criteria as required by the transfer and servicing topic of the FASB Accounting Standards. Obligations under these agreements are reflected as a liability in the consolidated balance sheets. Securities underlying the agreements are maintained at selected dealers and banks as collateral for each transaction executed and may be sold or pledged by the counterparty. Collateral underlying Repurchase Agreements which permit the counterparty to sell or pledge the underlying collateral is disclosed on the consolidated balance sheets as encumbered. The Company retains the right under all Repurchase Agreements and Pledge Agreements to substitute acceptable collateral throughout the terms of the agreement.

(m) Comprehensive Income

Comprehensive income includes net income and the change in unrealized holding gains and losses on securities available-for-sale, change in actuarial gains and losses on other post retirement benefits, and change in service cost on other postretirement benefits, net of taxes. Comprehensive income is presented in the Consolidated Statements of Changes in Stockholders' Equity.

(n) Employee Benefits

The Company sponsors a defined postretirement benefit plan that provides for medical and life insurance coverage to a limited number of retirees, as well as life insurance to all qualifying employees of the Company. The estimated cost of postretirement benefits earned is accrued during an individual's estimated service period to the Company. The Company recognizes in its balance sheet the over-funded or under-funded status of a defined benefit postretirement plan measured as the difference between the fair value of plan assets and the benefit obligation at the end of our calendar year. The actuarial gains and losses and the prior service costs and credits that arise during the period are recognized as a component of other comprehensive income, net of tax.

Funds borrowed by the Employee Stock Ownership Plan (ESOP) from the Company to purchase the Company's common stock are being repaid from the Bank's contributions over a period of up to 30 years. The Company's common stock not yet allocated to participants is recorded as a reduction of stockholders' equity at cost. The Company records compensation expense related to the ESOP at an amount equal to the shares committed to be released by the ESOP multiplied by the average fair value of our common stock during the reporting period.

The Company recognizes the grant-date fair value of stock based awards issued to employees as compensation cost in the consolidated statements of income. The fair value of common stock awards is based on the closing price of our common stock as reported on the NASDAQ Stock Market on the grant date. The expense related to stock options is based on the estimated fair value of the options at the date of the grant using the Black-Scholes pricing model. The awards are fixed in nature and compensation cost related to stock based awards is recognized on a straight-line basis over the requisite service periods.

The Bank has a 401(k) plan covering substantially all employees. Contributions to the plan are expensed as incurred.

(o) Segment Reporting

As a community-focused financial institution, substantially all of the Company's operations involve the delivery of loan and deposit products to customers. Management makes operating decisions and assesses

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

performance based on an ongoing review of these community banking operations, which constitute the Company's only operating segment for financial reporting purposes.

(p) Net Income per Common Share

Net income per common share-basic is computed by dividing the net income available to common stockholders by the weighted average number of common shares outstanding, excluding unallocated ESOP shares and unearned common stock award shares. The weighted average common shares outstanding includes the average number of shares of common stock outstanding, including shares held by Northfield Bancorp, MHC and allocated or committed to be released ESOP shares.

Net income per common share-diluted is computed using the same method as basic earnings per share, but reflects the potential dilution that could occur if stock options and unvested shares of restricted stock were exercised and converted into common stock. These potentially dilutive shares are included in the weighted average number of shares outstanding for the period using the treasury stock method. When applying the treasury stock method, we add: (1) the assumed proceeds from option exercises; (2) the tax benefit, if any, that would have been credited to additional paid-in capital assuming exercise of non-qualified stock options and vesting of shares of restricted stock; and (3) the average unamortized compensation costs related to unvested shares of restricted stock and stock options. We then divide this sum by our average stock price for the period to calculate assumed shares repurchased. The excess of the number of shares issuable over the number of shares assumed to be repurchased is added to basic weighted average common shares to calculate diluted earnings per share. At December 31, 2011, 2010, and 2009, there were 446,254, 281,900 and 126,974 dilutive shares outstanding, respectively.

(q) Other Real Estate Owned

Assets acquired through loan foreclosure, or deed-in-lieu of, are held for sale and are initially recorded at estimated fair value less estimated selling costs when acquired, thus establishing a new cost basis. Costs after acquisition are generally expensed. If the estimated fair value of the asset declines, a write-down is recorded through other non-interest expense.

(2) Business Combination

On October 14, 2011, the Bank assumed all of the deposits and acquired essentially all of the assets of a failed New Jersey State-chartered bank, from the Federal Deposit Insurance Corporation (the "FDIC") as receiver for the failed bank, pursuant to the terms of the Purchase and Assumption Agreement, dated October 14, 2011, between the Bank and the FDIC.

The application of the acquisition method of accounting resulted in a bargain purchase gain of \$3.6 million, net of tax, which is included in non-interest income in the Company's Consolidated Statement of Income for the year ended December 31, 2011.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

A summary of the net assets acquired and the estimated fair value adjustments resulting in the net gain follows:

	October 14, 2011 (in thousands)
Transaction cost basis liabilities in excess of assets	\$ (3,692)
Receivable from the FDIC	50,502
Net assets acquired before fair value adjustments	46,810
Fair value adjustments:	
Loans	(40,506)
Other real estate owned	(1,531)
Core deposit intangible	1,160
Pre-tax bargain purchase gain	5,933
Deferred income tax liability	(2,373)
Net after-tax bargain purchase gain	\$ 3,560

The following table sets forth the assets acquired and liabilities assumed, at fair value.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)*****Fair Value of Assets Acquired and Liabilities Assumed***

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected cash flows and loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with a high degree of precision. Changes in assumptions could significantly affect the estimates.

The following is a description of valuation methodologies used for assets and liabilities recorded at fair value on the acquisition date. The determination of where an instrument falls in the fair value hierarchy requires significant judgment.

Cash and Cash Equivalents and Receivable from FDIC

Included in the acquired cash and cash equivalents were cash and due from banks of \$23.9 million and federal funds sold of \$3.0 million. The estimated fair values of cash and cash equivalents and the receivable from the FDIC of \$50.5 million approximate their stated face amounts, as these financial instruments are either due on demand or have short-term maturities.

Investment Securities and Federal Home Loan Bank of New York (FHLB) Stock

Estimated fair values for the securities was derived from observable inputs (Level 2). The estimated fair values were derived primarily from cash flow models, which include assumptions for interest rates, credit losses, and prepayment speeds. Broker/dealer quotes are utilized as well when such quotes are available and deemed representative of the market. The significant inputs utilized in the cash flow models are based on market data obtained from sources independent of the Company (observable inputs).

The redemption value of the FHLB stock approximates fair value.

Loans

The loans are accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality, since all of these loans were acquired at a discount attributable, at least in part, to credit quality and are referred to as PCI loans. At the October 14, 2011 acquisition date, we estimated the fair value of the loan portfolio, at \$91.9 million, which represents the expected cash flows from the portfolio discounted at market-based rates with no valuation allowance. In estimating such fair value, we (a) calculated the contractual recorded amount and timing of undiscounted principal and interest payments (the undiscounted contractual cash flows); and (b) estimated the amount and timing of undiscounted expected principal and interest payments (the undiscounted expected cash flows). The difference between the undiscounted cash flows expected at acquisition and the investment in the PCI loans, or the accretable yield, is recognized as interest income utilizing the level yield method over the life of the loans. Contractually required payments for interest and principal that exceed the undiscounted cash flows expected at acquisition, or the non-accretable difference, are not recognized as a yield adjustment or as a loss accrual or a valuation allowance. The nonaccretable difference represents an estimate of the credit risk in the loan portfolio at the acquisition date. We estimated the cash flows expected to be collected by using credit risk, interest rate risk, and prepayment risk models, which incorporate our best estimate of current key assumptions, such as default rates, loss severity rates, collateral values and prepayment speeds. We adopted guidelines under FASB ASC Topic 310-30, whereby the Bank

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

aggregated acquired loans into pools, with common risk characteristics. Each pool of loans is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows.

The loans acquired in the transaction are, and will continue to be, reviewed for collectability, based on the expectations of cash flows on these loans. Increases in expected cash flows subsequent to the acquisition are recognized prospectively through an adjustment of the yield on the pool over its remaining life, while decreases in expected cash flows are recognized as impairment through a loss provision and an increase in the allowance for loan losses.

The following details the accretable yield for the year ended December 31, 2011 (in thousands):

	For the Year Ended December 31, 2011
Balance at the beginning of year	\$
Accretable yield at purchase date	43,937
Accretion into interest income	(1,444)
Net reclassification from / (to) non-accretable difference	
Balance at end of year	\$ 42,493

Core Deposit Intangible (CDI)

CDI is a measure of the value of the customer relationships in non-maturity deposits. The fair value of the CDI is based on the present value of the expected cost savings attributable to this funding, relative to an alternative source of funding (Level 2). The CDI related to the acquisition will be amortized over an estimated useful life of seven years to approximate the existing deposit relationships acquired. The Company evaluates such identifiable intangibles for impairment when an indication of impairment exists.

Other real estate owned

Other real estate owned (OREO) estimated fair values are based on unobservable inputs (Level 3) such as recent comparable sales, current listings of similar properties, and appraisal reports prepared by qualified independent third party appraisers, less estimated disposition costs, discounted over the estimated holding period.

Deposit Liabilities

The fair values of deposit liabilities with no stated maturity (i.e., NOW and money market accounts, savings accounts, and non-interest-bearing accounts) are equal to the carrying amounts payable on demand. The fair values of certificates of deposit are equal to the carrying amount payable. All rates on certificate of deposits were adjusted in accordance with FDIC rules, regulations, and powers to current market rates based on the remaining maturity of the account, therefore the carrying value approximates fair value.

Deferred Income Taxes

Deferred income taxes relate to the differences between the financial statement and tax bases of assets acquired and liabilities assumed in the transaction. The Company's deferred income taxes were measured using a combined federal and state tax rate of approximately 40%.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****(3) Securities Available-for-Sale**

The following is a comparative summary of mortgage-backed securities and other securities available-for-sale at December 31 (in thousands):

	2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Mortgage-backed securities:				
Pass-through certificates:				
Government sponsored enterprises (GSE)	\$ 490,184	\$ 24,709	\$	\$ 514,893
Non-GSE	8,770		1,255	7,515

Corporate bonds	119,765	2,146	123	121,788
	167,190	2,222	238	169,174

Edgar Filing: ROWAN COMPANIES PLC - Form DEFA14A

Total securities available-for-sale	\$ 1,225,655	\$ 23,209	\$ 4,551	\$ 1,244,313
-------------------------------------	--------------	-----------	----------	--------------

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The following is a summary of the expected maturity distribution of debt securities available-for-sale other than mortgage-backed securities at December 31, 2011 (in thousands):

Available-for-sale	Amortized Cost	Estimated Fair Value
Due in one year or less	\$ 30,354	\$ 30,552
Due after one year through five years	70,568	70,105
	\$ 100,922	\$ 100,657

Expected maturities on mortgage-backed securities will differ from contractual maturities as borrowers may have the right to call or prepay obligations with or without penalties.

Certain securities available-for-sale are pledged to secure borrowings under Pledge Agreements and Repurchase Agreements and for other purposes required by law. At December 31, 2011, and December 31, 2010, securities available-for-sale with a carrying value of \$3,992,000 and \$5,725,000, respectively, were pledged to secure deposits. See Note 8 for further discussion regarding securities pledged for borrowings.

For the year ended December 31, 2011, the Company had gross proceeds of \$182.7 million on sales of securities available-for-sale with gross realized gains and gross realized losses of approximately \$2.9 million and \$177,000, respectively. For the year ended December 31, 2010, the Company had gross proceeds of \$221.2 million on sales of securities available-for-sale with gross realized gains and gross realized losses of approximately \$1.3 million and \$4,000, respectively. For the year ended December 31, 2009, the Company had gross proceeds of \$3.3 million on sales of securities available-for-sale with gross realized gains and gross realized losses of approximately \$89,000 and \$0, respectively. The Company routinely sells securities when market pricing presents, in management's assessment, an economic benefit that outweighs holding such security, and when smaller balance securities become cost prohibitive to carry.

The Company recognized other-than-temporary impairment charges of \$1.2 million during the year ended December 31, 2011, related to one equity investment in a mutual fund and two private label mortgage-backed securities. The Company recognized the credit component of \$409,000 in earnings and the non-credit component of \$743,000 as a component of accumulated other comprehensive income, net of tax. The Company recognized other-than-temporary impairment charges of \$962,000 during the year ended December 31, 2010, related to one private label mortgage-backed security. The Company recognized the credit component of \$154,000 in earnings and the non-credit component of \$808,000 as a part of accumulated other comprehensive income, net of tax. The Company recognized other-than-temporary impairment charges of \$1.4 million during the year ended December 31, 2009, related to one private label mortgage-backed security. The Company recognized the credit component of \$176,000 in earnings and the non-credit component of \$1.2 million as a part of accumulated other comprehensive income, net of tax.

The following is a rollforward of 2011, 2010, and 2009 activity related to the credit component of other-than-temporary impairment recognized on debt securities in pre-tax earnings, for which a portion of other-than-temporary impairment was recognized in accumulated other comprehensive income (in thousands):

	2011	2010	2009
Balance, beginning of year	\$ 330	\$ 176	\$
Additions to the credit component on debt securities in which other-than-temporary impairment was not previously recognized	248	154	176
Cumulative pre-tax credit losses, end of year	\$ 578	\$ 330	\$ 176

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

In addition, the Company recorded other-than-temporary impairment of \$161,000 in 2011 on equity securities.

Gross unrealized losses on mortgage-backed securities, equity securities, agency bonds, and corporate bonds available-for-sale, and the estimated fair value of the related securities, aggregated by security category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2011 and 2010, were as follows (in thousands):

	Less than 12 months		December 31, 2011 12 months or more		Total	
	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value
Mortgage-backed securities:						
Pass-through certificates:						
Non-GSE	307	2,513	948	5,002	1,255	7,515
Real estate mortgage investment conduits (REMICs):						
GSE	135	54,475			135	54,475
Non-GSE			37	842	37	842
Corporate bonds	113	27,523	510	13,132	623	40,655
Total	\$ 555	\$ 84,511	\$ 1,495	\$ 18,976	\$ 2,050	\$ 103,487

	Less than 12 months		December 31, 2010 12 months or more		Total	
	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value
Mortgage-backed securities:						
Pass-through certificates:						
Non-GSE	\$	\$	\$ 737	\$ 10,126	\$ 737	\$ 10,126
Real estate mortgage investment conduits (REMICs):						
GSE	3,525	344,971			3,525	344,971
Non-GSE			51	1,238	51	1,238
Corporate bonds	123	13,880			123	13,880
Equity Investments mutual funds	115	4,884			115	4,884
Total	\$ 3,763	\$ 363,735	\$ 788	\$ 11,364	\$ 4,551	\$ 375,099

Included in the above available-for-sale security amounts at December 31, 2011, was one pass-through non-GSE mortgage-backed security in a continuous unrealized loss position of greater than twelve months that was rated less than investment grade at December 31, 2011. The security had an estimated fair value of \$5.0 million (amortized cost of \$5.9 million), was rated Caa2, and had the following underlying collateral characteristics: 83% originated in 2004, and 17% originated in 2005. The rating of the security detailed above represents the lowest rating received from the rating agencies of Moody's, Standard & Poor's, and Fitch. The Company continues to receive principal and interest payments in accordance with the contractual terms of this security. Management has evaluated, among other things, delinquency status, location of collateral, estimated prepayment speeds, and the estimated default rates and loss severity in liquidating the underlying collateral of this security. As a result of management's evaluation of this security, the Company recognized, during the year ended December 31, 2011, other-than-temporary impairment of \$593,000. Since management does not have the intent to sell the security, and believes it is more likely than not that the Company will not be required to sell the

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

security, before its anticipated recovery (which may be at maturity), the credit component of \$139,000 was recognized in earnings, and the non-credit component of \$454,000 was recorded as a component of accumulated other comprehensive income, net of tax.

In addition to the one pass-through non-GSE mortgage-backed security discussed above, the Company had one additional private label security that was rated less than investment grade at December 31, 2011. The security had an estimated fair value of \$2.5 million (amortized cost of \$2.8 million), was rated C, and was supported by collateral which was originated in 2006. The rating of the security detailed above represents the lowest rating for the security received from the rating agencies of Moody's, Standard & Poor's, and Fitch.

The Company continues to receive principal and interest payments in accordance with the contractual terms of this security. Management has evaluated, among other things, delinquency status, location of collateral, estimated prepayment speeds, and the estimated default rates and loss severity in liquidating the underlying collateral for this security. As a result of management's evaluation of this security, the Company recognized during the year ended December 31, 2011, other than temporary impairment of \$398,000. Since management does not have the intent to sell the security and believes it is more likely than not that the Company will not be required to sell the security, before its anticipated recovery (which may be maturity), the credit component of \$109,000 was recognized in earnings, and the non credit component of \$289,000 was recorded as a component of accumulated other comprehensive income, net of tax.

The Company held one REMIC non-GSE mortgage-backed security that was in a continuous unrealized loss position of greater than twelve months, three corporate bonds, two pass-through GSE mortgage-backed securities, and five REMIC mortgage-backed securities issued or guaranteed by GSEs, that were in an unrealized loss position of less than twelve months, and rated investment grade at December 31, 2011. The declines in value relate to the general interest rate environment and are considered temporary. The securities cannot be prepaid in a manner that would result in the Company not receiving substantially all of its amortized cost. The Company neither has an intent to sell, nor is it more likely than not that the Company will be required to sell, the securities before the recovery of their amortized cost basis or, if necessary, maturity.

The fair values of our investment securities could decline in the future if the underlying performance of the collateral for the collateralized mortgage obligations or other securities deteriorates and our credit enhancement levels do not provide sufficient protections to our contractual principal and interest. As a result, there is a risk that significant other-than-temporary impairments may occur in the future given the current economic environment.

(4) Securities Held-to-Maturity

The following is a comparative summary of mortgage-backed securities held-to-maturity at December 31 (in thousands):

		2011		
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Mortgage-backed securities:				
Pass-through certificates:				
GSE	\$ 629	\$ 43	\$	\$ 672
Real estate mortgage investment conduits (REMICs):				
GSE	2,988	111		3,099
Total securities held-to-maturity	\$ 3,617	\$ 154	\$	\$ 3,771

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

	Amortized	Gross	2010 Gross	Estimated
Mortgage-backed securities:				
Pass-through certificates:				
GSE	\$ 854	\$ 45	\$	\$ 899
Real estate mortgage investment conduits (REMICs):				
GSE	4,206	168		4,374
Total securities held-to-maturity	\$ 5,060	\$ 213	\$	\$ 5,273

The Company did not sell any held-to-maturity securities during the years ended December 31, 2011, 2010 and 2009.

The fair values of our investment securities could decline in the future if the underlying performance of the collateral for the collateralized mortgage obligation or other securities deteriorates and our credit enhancement levels do not provide sufficient protections to our contractual principal and interest. As a result, there is a risk that significant other-than-temporary impairments may occur in the future given the current economic environment.

(5) Loans

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

The Company had \$3.9 million and \$1.2 million in loans held-for-sale at December 31, 2011 and 2010, respectively. Loans held-for-sale included \$3.4 million and \$0 of non-accrual loans at December 31, 2011 and 2010.

The Company does not have any lending programs commonly referred to as subprime lending. Subprime lending generally targets borrowers with weakened credit histories typically characterized by payment delinquencies, previous charge-offs, judgments, bankruptcies, or borrowers with questionable repayment capacity as evidenced by low credit scores or high debt-burden ratios.

The Company, through its principal subsidiary, the Bank, serviced \$41.3 million and \$52.1 million of loans at December 31, 2011 and 2010, respectively, for Freddie Mac. These one- to four-family residential mortgage real estate loans were underwritten to Freddie Mac guidelines and to comply with applicable federal, state, and local laws. At the time of the closing of these loans the Company owned the loans and subsequently sold them to Freddie Mac providing normal and customary representations and warranties, including representations and warranties related to compliance with Freddie Mac underwriting standards. At the time of sale, the loans were free from encumbrances except for the mortgages filed for by the Company which, with other underwriting documents, were subsequently assigned and delivered to Freddie Mac. At December 31, 2011, substantially all of the loans serviced for Freddie Mac were performing in accordance with their contractual terms and management believes that it has no material repurchase obligations associated with these loans. Servicing of loans for others does not have a significant effect on our financial position or results of operations.

We provide for loan losses based on the consistent application of our documented allowance for loan loss methodology. Loan losses are charged to the allowance for loans losses and recoveries are credited to it. Additions to the allowance for loan losses are provided by charges against income based on various factors which, in our judgment, deserve current recognition in estimating probable losses. Loan losses are charged-off in the period the loans, or portion thereof, are deemed uncollectible. Generally, the Company will record a loan charge-off (including a partial charge-off) to reduce a loan to the estimated fair value of the underlying collateral, less cost to sell, for collateral dependent loans. We regularly review the loan portfolio and make adjustments for loan losses in order to maintain the allowance for loan losses in accordance with U.S. generally accepted accounting principles (GAAP). At December 31, 2011 management's evaluation of estimated cash flows related to PCI loan pools was consistent with estimates utilized to determine estimated fair values on date of acquisition and therefore no provision for loan losses was deemed necessary in 2011. At December 31, 2011 and 2010, the allowance for loan losses related solely to originated loans held-for-investment and consisted primarily of the following two components:

(1) Specific allowances are established for originated impaired loans (generally defined by the company as non-accrual loans with an outstanding balance of \$500,000 or greater). The amount of impairment provided for as an allowance is represented by the deficiency, if any, between the present value of expected future cash flows discounted at the original loan's effective interest rate or the underlying collateral value (less estimated costs to sell,) if the loan is collateral dependent, and the carrying value of the loan. Impaired loans that have no impairment losses are not considered for general valuation allowances described below. Generally, the Company charges down a loan to the estimated fair value of the underlying collateral, less costs to sell, and maintains an allowance for loan losses for expected losses related to discounts to facilitate a sale of the property.

(2) General allowances are established for loan losses on a portfolio basis for originated loans that do not meet the definition of impaired. The portfolio is grouped into similar risk characteristics, primarily loan type, loan-to-value, if collateral dependent, and internal credit risk ratings. We apply an estimated loss rate to each loan group. The loss rates applied are based on our cumulative prior two year loss experience adjusted, as appropriate, for the environmental factors discussed below. This evaluation is inherently subjective, as it requires material estimates that may be susceptible to significant revisions based upon

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

changes in economic and real estate market conditions. Actual loan losses may be significantly more than the allowance for loan losses we have established, which could have a material negative effect on our financial results. Within general allowances is an unallocated reserve established to recognize losses related to the inherent subjective nature of the appraisal process and the internal credit risk rating process.

In underwriting a loan secured by real property, we require an appraisal (or an automated valuation model) of the property by an independent licensed appraiser approved by the Company's board of directors. The appraisal is subject to review by an independent third party hired by the Company. We review and inspect properties before disbursement of funds during the term of a construction loan. Generally, management obtains updated appraisals when a loan is deemed impaired. These appraisals may be more limited than those prepared for the underwriting of a new loan. In addition, when the Company acquires other real estate owned, it generally obtains a current appraisal to substantiate the net carrying value of the asset.

The adjustments to our loss experience are based on our evaluation of several environmental factors, including:

changes in local, regional, national, and international economic and business conditions and developments that affect the collectability of our portfolio, including the condition of various market segments;

changes in the nature and volume of our portfolio and in the terms of our loans;

changes in the experience, ability, and depth of lending management and other relevant staff;

changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans;

changes in the quality of our loan review system;

changes in the value of underlying collateral for collateral-dependent loans;

the existence and effect of any concentrations of credit, and changes in the level of such concentrations; and

the effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in our existing portfolio.

In evaluating the estimated loss factors to be utilized for each loan group, management also reviews actual loss history over an extended period of time as reported by the FDIC for institutions both in our market area and nationally for periods that are believed to have experienced similar economic conditions.

We evaluate the allowance for loan losses based on the combined total of the impaired and general components for originated loans. Generally when the loan portfolio increases, absent other factors, our allowance for loan loss methodology results in a higher dollar amount of estimated probable losses. Conversely, when the loan portfolio decreases, absent other factors, our allowance for loan loss methodology results in a lower

dollar amount of estimated probable losses.

Each quarter we evaluate the allowance for loan losses and adjust the allowance as appropriate through a provision for loan losses. While we use the best information available to make evaluations, future adjustments to the allowance may be necessary if conditions differ substantially from the information used in making the evaluations. In addition, as an integral part of their examination process, the OCC will periodically review the allowance for loan losses. The OCC may require us to adjust the allowance based on their analysis of information available to them at the time of their examination. Our last examination was as of September 30, 2011.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

A summary of changes in the allowance for loan losses for the years ended December 31, 2011, 2010, and 2009 follows (in thousands):

	2011	December 31, 2010	2009
Balance at beginning of year	\$ 21,819	\$ 15,414	\$ 8,778
Provision for loan losses	12,589	10,084	9,038
Recoveries	108	20	
Charge-offs	(7,680)	(3,699)	(2,402)
Balance at end of year	\$ 26,836	\$ 21,819	\$ 15,414

The following table sets forth activity in our allowance for loan losses, by loan type, for the years ended December 31, 2011 and 2010. The following table also details the amount of originated loans receivable held-for-investment, net of deferred loan fees and costs, that are evaluated individually, and collectively, for impairment, and the related portion of allowance for loan losses that is allocated to each loan portfolio segment (in thousands).

The Company monitors the credit quality of its loan receivables on a periodic basis. Credit quality is monitored by reviewing certain credit quality indicators. Management has determined that loan-to-value ratios (at period end) and internally assigned credit risk ratings by loan type are the key credit quality indicators that best management measure the credit quality of the Company's loan receivables. Loan-to-value (LTV) ratios used by management in monitoring credit quality are based on current period loan balances and original values at time of origination (unless a current appraisal has been obtained as a result of the loan being deemed impaired). In calculating the provision for loan losses, management has determined that commercial real estate loans and multifamily loans having loan-to-value ratios of less than 35%, and one-to-four family loans having loan-to-value ratios of less than 60%, require less of a loss factor than those with higher loan to value ratios.

The Company maintains a credit risk rating system as part of the risk assessment of its loan portfolio. The Company's lending officers are required to assign a credit risk rating to each loan in their portfolio at origination. When the lender learns of important financial developments, the risk rating is reviewed accordingly, and adjusted if necessary. Monthly, management presents monitored assets to the loan committee. In addition, the Company engages a third party independent loan reviewer that performs semi-annual reviews of a sample of loans, validating the credit risk ratings assigned to such loans. The credit risk ratings play an important role in the establishment of the loan loss provision and to confirm the adequacy of the allowance for loan losses for originated loans held-for-investment. After determining the general reserve loss factor for each originated portfolio segment held-for-investment, the originated portfolio segment held-for-investment balance collectively evaluated for impairment is multiplied by the general reserve loss factor for the respective portfolio segment in order to determine the general reserve. Loans that have an internal credit rating of special mention or substandard receive a multiple of the general reserve loss factors for each portfolio segment, in order to determine the general reserve.

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

When assigning a risk rating to a loan, management utilizes the Bank's internal nine-point credit risk rating system.

1. Strong
2. Good
3. Acceptable
4. Adequate
5. Watch
6. Special Mention
7. Substandard
8. Doubtful
9. Loss

Loans rated 1 to 5 are considered pass ratings. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets have well defined weaknesses based on objective evidence, and are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full highly questionable and improbable based on current circumstances. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets is not warranted. Assets which do not currently expose the Company to sufficient risk to warrant classification in one of the aforementioned categories, but possess weaknesses, are required to be designated special mention.

Included in originated loans receivable (including held-for-sale) are loans for which the accrual of interest income has been discontinued due to deterioration in the financial condition of the borrowers. The recorded investment of these nonaccrual loans was \$43.8 million and \$59.3 million at December 31, 2011, and December 31, 2010, respectively. Generally, originated loans (both held-for-investment and held-for-sale) are placed on non-accruing status when they become 90 days or more delinquent, and remain on non-accrual status until they are brought current, have six months of performance under the loan terms, and factors indicating reasonable doubt about the timely collection of payments no longer exist. Therefore, loans may be current in accordance with their loan terms, or may be less than 90 days delinquent and still be on a non-accruing status.

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

Non-accrual amounts included loans deemed to be impaired of \$36.1 million and \$52.0 million at December 31, 2011, and December 31, 2010, respectively. Loans on non-accrual status with principal balances less than \$500,000, and therefore not meeting the Company's definition of an impaired loan, amounted to \$4.3 million and \$7.3 million at December 31, 2011, and December 31, 2010, respectively. Non-accrual amounts included in loans held-for-sale were \$3.4 million and \$0 at December 31, 2011, and December 31, 2010, respectively. Loans past due ninety days or more and still accruing interest were \$85,000 and \$1.6 million at December 31, 2011, and December 31, 2010, respectively, and consisted of loans that are well secured and in the process of renewal.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The following table sets forth the detail, and delinquency status, of non-performing loans (non-accrual loans and loans past due ninety days or more and still accruing), net of deferred fees and costs, at December 31, 2011 and 2010 (in thousands) excluding PCI loans which have been segregated into pools in accordance with ASC Subtopic 310-30. Each loan pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows.

Included in the table above at December 31, 2011, are loans with carrying balances of \$27.9 million that were not written down by either charge-offs or specific reserves in our allowance for loan losses. Included in the impaired loans at December 31, 2010, are loans with carrying balances of \$24.8 million that were not written down either by charge-offs or specific reserves in our allowance for loan losses. Loans not written down by charge-offs or specific reserves at December 31, 2011, and 2010, have sufficient collateral values, less costs to sell (including any discounts to facilitate a sale), to support the carrying balances of the loans.

The average recorded balance of originated impaired loans (including held-for-investment and held-for-sale) for the years ended December 31, 2011, 2010, and 2009 was approximately \$58.7 million, \$54.3 million, and

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

\$27.2 million, respectively. The Company recorded \$2.5 million, \$2.8 million and \$624,000 of interest income on impaired loans for the years ended December 31, 2011, 2010 and 2009, respectively.

The following tables summarize loans that were modified in a troubled debt restructuring during the year ended December 31, 2011.

	Number of Relationships	Year Ended December 31, 2011	
		Pre-Modification Outstanding Recorded Investment (in thousands)	Post-Modification Outstanding Recorded Investment
Troubled Debt Restructurings:			
Commercial real estate loans			
Special Mention	2	\$ 4,007	\$ 2,819
Substandard	3	13,966	13,966
Construction and land			
Substandard	1	164	164
One-to-four Family			
Special Mention	3	782	782
Home equity and lines of credit			
Substandard	1	102	102
Commercial and industrial loans			
Special Mention	1	40	40
Substandard	2	1,701	1,701
Total Troubled Debt Restructurings	13	\$ 20,762	\$ 19,574

At December 31, 2011 and 2010 we had troubled debt restructurings of \$41.6 million and \$31.2 million, respectively.

Nine of the relationships in the table above were restructured to receive reduced interest rates, two relationships were provided forbearance agreements to allow the owners to liquidate the properties and two relationships were granted extended maturities.

Management classifies all troubled debt restructurings as impaired loans. Impaired loans are individually assessed to determine that the loan's carrying value is not in excess of the estimated fair value of the collateral (less cost to sell), if the loan is collateral dependent, or the present value of the expected future cash flows, if the loan is not collateral dependent. Management performs a detailed evaluation of each impaired loan and generally obtains updated appraisals as part of the evaluation. In addition, management adjusts estimated fair values down to appropriately consider recent market conditions, our willingness to accept a lower sales price to effect a quick sale, and costs to dispose of any supporting collateral. Determining the estimated fair value of underlying collateral (and related costs to sell) can be difficult in illiquid real estate markets and is subject to significant assumptions and estimates. Management employs an independent third party expert in appraisal preparation and review to ascertain the reasonableness of updated appraisals. Projecting the expected cash flows under troubled debt restructurings is inherently subjective and requires, among other things, an evaluation of the borrower's current and projected financial condition. Actual results may be significantly different than our projections and our established allowance for loan losses on these loans, which could have a material effect on our financial results.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

There have been three loans that were restructured during the last twelve months that have subsequently defaulted. The following table details these loans at December 31, 2011:

		Year ended December 31, 2011

(6) Premises and Equipment, Net

At December 31, 2011 and 2010, premises and equipment, less accumulated depreciation and amortization, consists of the following (in thousands):

	December 31,	
	2011	2010
At cost:		
Land	\$ 436	\$ 436
Buildings and improvements	3,224	3,270
Capital leases	2,600	2,600
Furniture, fixtures, and equipment	15,155	13,724
Leasehold improvements	19,454	14,807
	40,869	34,837
Accumulated depreciation and amortization	(20,881)	(18,780)
Premises and equipment, net	\$ 19,988	\$ 16,057

Depreciation expense for the years ended December 31, 2011, 2010, and 2009 was \$2.1 million, \$1.8 million, and \$1.7 million, respectively.

During the year ended December 31, 2010, the Company recognized gains of approximately \$197,000 as a result of the sale of premises and equipment. The Company had no sales of premises and equipment in 2011 or 2009.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****(7) Deposits**

Deposit account balances at December 31, 2011 and 2010, are summarized as follows (dollars in thousands):

	2011		December 31,		2010	
	Amount	Weighted Average Rate	Amount	(Dollars in thousands)	Amount	Weighted Average Rate
Transaction:						
Negotiable orders of withdrawal	\$ 91,829	0.60%	\$ 76,251			1.03%
Non-interest bearing checking	156,493		111,413			
Total transaction	248,322	0.22	187,664			0.42
Savings:

Savings-passbook and statement	334,994	0.28	338,140			0.33
Total savings	765,081	0.56	632,143			0.63
Certificates of deposit:						
Under \$100,000	262,435	1.08	272,266			1.34
\$100,000 or more	217,688	1.36	280,769			1.25
Total certificates of deposit	480,123	1.21	553,035			1.29
Total deposits	\$ 1,493,526	0.71%	\$ 1,372,842			0.87%

The Company had brokered deposits (classified as certificates of deposit in the above table) of \$3.4 million and \$68.4 million, at December 31, 2011 and 2010, respectively.

Scheduled maturities of certificates of deposit at December 31, 2011, are summarized as follows (in thousands):

	December 31, 2011
2012	\$ 356,391
2013	40,998
2014	31,019
2015	34,581
2016 and after	17,134
Total	\$ 480,123

Interest expense on deposits for the years ended December 31, 2011, 2010, and 2009 is summarized as follows (in thousands):

	2011	December 31, 2010	2009
Negotiable order of withdrawal and money market	\$ 3,624	\$ 3,546	\$ 3,213
Savings-passbook and statement	1,027	1,573	2,833
Certificates of deposit	7,600	8,454	12,168
	\$ 12,251	\$ 13,573	\$ 18,214

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****(8) Borrowings**

Borrowings consisted of securities sold under agreements to repurchase, FHLB advances, and obligations under capital leases and are summarized as follows (in thousands):

	December 31,	
	2011	2010
Repurchase agreements	\$ 276,000	\$ 243,000
Other borrowings:		
FHLB advances	201,210	146,300
Floating rate advances	3,004	
Obligations under capital leases	1,720	1,937
	\$ 481,934	\$ 391,237

FHLB advances are secured by a blanket lien on unencumbered securities and the Company's FHLB capital stock.

Repurchase agreements and FHLB advances have contractual maturities at December 31, 2011, as follows (in thousands):

	December 31, 2011	
	FHLB Advances	Repurchase Agreements
2012	\$ 57,000	\$ 50,000
2013	27,300	45,000
2014	10,500	56,000
2015	52,500	62,000
2016 and after	53,910	63,000
	\$ 201,210	\$ 276,000

Repurchase agreements have a weighted average rate of 3.20%, with all maturing in more than 90 days. The repurchase agreements are secured primarily by mortgage-backed securities with an amortized cost of \$296.6 million, and a market value of \$309.8 million, at December 31, 2011.

The Company has the ability to obtain additional funding from the FHLB and Federal Reserve Bank discount window of approximately \$384.6 million, utilizing unencumbered securities of \$427.3 million at December 31, 2011. The Company expects to have sufficient funds available to meet current commitments in the normal course of business.

Interest expense on borrowings for the years ended December 31, 2011, 2010, and 2009 is summarized as follows (in thousands):

	December 31,		
	2011	2010	2009
Repurchase agreements	\$ 11,207	\$ 9,116	\$ 7,158
FHLB advances	1,776	1,513	3,358
Over-night borrowings	20	26	53

Mortgage servicing rights	24	49
Employee Stock Ownership Plan		78
Step up to fair market value of acquired loans	62	95
Step up to fair market value of acquired investment		1
Bargain purchase gain	2,297	
Deferred loan fees	179	
Other		12
Total gross deferred tax liabilities	14,542	7,916
Valuation allowance	1,038	1,038
Net deferred tax asset	\$ 6,263	\$ 10,116

The Company has determined that a valuation allowance should be established for certain state and local tax benefits related to the Company's contribution to the Northfield Bank Foundation. The Company has determined that it is not required to establish a valuation reserve for the remaining net deferred tax asset account since it is more likely than not that the net deferred tax assets will be realized through future reversals of existing taxable temporary differences, future taxable income and tax planning strategies. The conclusion that it is more likely than not that the remaining net deferred tax assets will be realized is based on the history of earnings and the prospects for continued profitability. Management will continue to review the tax criteria related to the recognition of deferred tax assets.

Edgar Filing: ROWAN COMPANIES PLC - Form DEFA14A

As a savings institution, the Bank is subject to a special federal tax provision regarding its frozen tax bad debt reserve. At December 31, 2011, the Bank's federal tax bad debt base-year reserve was \$5.9 million, with a

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

related net deferred tax liability of \$2.8 million, which has not been recognized since the Bank does not expect that this reserve will become taxable in the foreseeable future. Events that would result in taxation of this reserve include redemptions of the Bank's stock or certain excess distributions by the Bank to the Company.

The Company did not have any material uncertain tax positions for the years ended December 31, 2011 and 2010.

The State of New York passed legislation in August of 2010 to conform the bad debt deduction allowed under Article 32 of the New York State tax law to the bad debt deduction allowed for federal income tax purposes. As a result, Northfield Bank no longer establishes, or maintains, a New York reserve for losses on loans, and is required to claim a deduction for bad debts in an amount equal to its actual loan loss experience. In addition, this legislation eliminated the potential recapture of the New York tax bad debt reserve that could have otherwise occurred in certain circumstances under New York State tax law prior to August of 2010. As a result of this new legislation, the Company reversed approximately \$738,000 in deferred tax liabilities during the third quarter of 2010.

The following are the most significant years that are open for examination or under examination:

Federal tax filings for 2008 through present. The Company has received notification from the Internal Revenue Service that they intend to examine the 2009 and 2010 filings.

New York State tax filings 2007 through the present. Currently the 2007, 2008, and 2009 filings are under examination.

New York City tax filings 2007 through the present. Currently the 2007, 2008, and 2009 filings are under examination.

State of New Jersey 2008 through present.

(10) Retirement Benefits

The Company has a 401(k) plan for its employees, which grants eligible employees (those salaried employees with at least three months of service) the opportunity to invest from 2% to 15% of their base compensation in certain investment alternatives. The Company contributes an amount equal to 25% of employee contributions on the first 6% of base compensation contributed by eligible employees for the first three years of participation. Subsequent years of participation in excess of three years will increase the Company matching contribution from 25% to 50% of an employee's contributions, on the first 6% of base compensation contributed by eligible employees. A member becomes fully vested in the Company's contributions upon (a) completion of five years of service, or (b) normal retirement, early retirement, permanent disability, or death. The Company's contribution to this plan amounted to approximately \$218,000, \$166,000, and \$156,000 for the years ended December 31, 2011, 2010, and 2009, respectively.

The Company also maintains a profit-sharing plan in which the Company can contribute to the participant's 401(k) account, at its discretion, up to the legal limit of the Internal Revenue Code. The Company did not contribute to the profit sharing plan during 2011, 2010 and 2009.

The Company maintains the Northfield Bank Employee Stock Ownership Plan (the ESOP). The ESOP is a tax-qualified plan designed to invest primarily in the Company's common stock. The ESOP provides employees with the opportunity to receive a funded retirement benefit from the Bank, based primarily on the value of the Company's common stock. The ESOP was authorized to, and did purchase, 1,756,279 shares of the Company's common stock in the Company's initial public offering at a price of \$10.00 per share. This purchase was funded

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

with a loan from Northfield Bancorp, Inc. to the ESOP. The first payment on the loan from the ESOP to the Company was due and paid on December 31, 2007, and the outstanding balance at December 31, 2011 and 2010, was \$15.0 million and \$15.4 million, respectively. The shares of the Company's common stock purchased in the initial public offering are pledged as collateral for the loan. Shares are released for allocation to participants as loan payments are made. A total of 61,801 and 60,570 shares were released and allocated to participants for the ESOP year ended December 31, 2011 and 2010, respectively. ESOP compensation expense for the year ended December 31, 2011, 2010, and 2009 was \$790,000, \$774,000, and \$676,000, respectively. Cash dividends on unallocated shares are utilized to satisfy required debt payments. Dividends on allocated shares are utilized to prepay debt which releases additional shares to participants.

The Company maintains a Supplemental Employee Stock Ownership Plan (the SESOP), a non-qualified plan, that provides supplemental benefits to certain executives who are prevented from receiving the full benefits contemplated by the ESOP's benefit formula due to tax law limits for tax-qualified plans. The supplemental payments for the SESOP consist of cash payments representing the value of Company shares that cannot be allocated to participants under the ESOP due to legal limitations imposed on tax-qualified plans. The Company made a contribution to the SESOP plan of \$25,000, \$33,000, and \$41,000 for the years ended December 31, 2011, 2010, and 2009, respectively.

The Company provides post retirement medical and life insurance to a limited number of retired individuals. The Company also provides retiree life insurance benefits to all qualified employees, up to certain limits. The following tables set forth the funded status and components of postretirement benefit costs at December 31 measurement dates (in thousands):

	2011	2010	2009
Accumulated postretirement benefit obligation beginning of year	\$ 1,668	\$ 1,670	\$ 1,559
Service cost	6	5	4
Interest cost	80	88	93
Actuarial loss	47	12	111
Benefits paid	(104)	(108)	(97)
Accumulated postretirement benefit obligation end of year	1,697	1,667	1,670
Plan assets at fair value			
Unrecognized transition obligation			
Unrecognized prior service cost			
Unrecognized loss			
Accrued liability (included in accrued expenses and other liabilities)	\$ 1,697	\$ 1,667	\$ 1,670

The following table sets forth the amounts recognized in accumulated other comprehensive income (loss) (in thousands):

	December 31,	
	2011	2010
Net loss	\$ 288	\$ 266
Transition obligation	67	84
Prior service cost	106	121
Loss recognized in accumulated other comprehensive income (loss)	\$ 461	\$ 471

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The estimated net loss, transition obligation, and prior service cost that will be amortized from accumulated other comprehensive income (loss) into net periodic cost in 2012 are \$27,778, \$16,711, and \$15,575, respectively.

The following table sets forth the components of net periodic postretirement benefit costs for the years ended December 31, 2011, 2010, and 2009 (in thousands):

	December 31,		
	2011	2010	2009
Service cost	\$ 6	\$ 5	\$ 4
Interest cost	80	88	93
Amortization of transition obligation	17	17	17
Amortization of prior service costs	15	15	15
Amortization of unrecognized loss	25	26	17
Net postretirement benefit cost included in compensation and employee benefits	\$ 143	\$ 151	\$ 146

The assumed discount rate related to plan obligations reflects the weighted average of published market rates for high-quality corporate bonds with terms similar to those of the plans expected benefit payments, rounded to the nearest quarter percentage point. The Company's discount rate and rate of compensation increase used in accounting for the plan are as follows:

	2011	2010	2009
Assumptions used to determine benefit obligation at period end:			
Discount rate	4.00%	5.00%	5.50%
Rate of increase in compensation	4.00	4.00	4.25
Assumptions used to determine net periodic benefit cost for the year:			
Discount rate	5.00	5.50	6.25
Rate of increase in compensation	4.00	4.25	4.25

At both December 31, 2011 and 2010, a medical cost trend rate of 8.75%, decreasing 0.50% per year thereafter until an ultimate rate of 4.75% is reached, was used in the plan's valuation. The Company's healthcare cost trend rates are based, among other things, on the Company's own experience and third party analysis of recent and projected healthcare cost trends.

A one percentage-point change in assumed health care cost trends would have the following effects (in thousands):

	One Percentage Point Increase		One Percentage Point Decrease	
	2011	2010	2011	2010
Effect on benefits earned and interest cost	\$ 7	\$ 7	\$ (5)	\$ (6)
Effect on accumulated postretirement benefit obligation	134	129	(119)	(115)

A one percentage-point change in assumed health care cost trends would have the following effects (in thousands):

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Benefit payments of approximately \$104,000, \$108,000, and \$97,000 were made in 2011, 2010, and 2009, respectively. The benefits expected to be paid under the postretirement health benefits plan for the next five years are as follows: \$109,000 in 2012; \$114,000 in 2013; \$119,000 in 2014; \$123,000 in 2015; and \$125,000 in 2016. The benefit payments expected to be paid in the aggregate for the years 2016 through 2021 are \$623,000. The expected benefits are based on the same assumptions used to measure the Company's benefit obligation at December 31, 2011, and include estimated future employee service.

The Medicare Prescription Drug, Improvement and Modernization Act of 2003, or Medicare Act, introduced both a Medicare prescription-drug benefit and a federal subsidy to sponsors of retiree health-care plans that provide a benefit at least actuarially equivalent to the Medicare benefit. The Company has evaluated the estimated potential subsidy available under the Medicare Act and the related costs associated with qualifying for the subsidy. Due to the limited number of participants in the plan, the Company has concluded that it is not cost beneficial to apply for the subsidy. Therefore, the accumulated postretirement benefit obligation information and related net periodic postretirement benefit costs do not reflect the effect of any potential subsidy.

The Company maintains a nonqualified plan to provide for the elective deferral of all or a portion of director fees by members of the participating board of directors, deferral of all or a portion of the compensation and/or annual incentive compensation payable to eligible employees of the Company, and to provide to certain officers of the Company benefits in excess of those permitted to be paid by the Company's savings plan, ESOP, and profit-sharing plan under the applicable Internal Revenue Code. The plan obligation was approximately \$4,145,000 and \$4,095,000 at December 31, 2011 and 2010, respectively, and is included in accrued expenses and other liabilities on the consolidated balance sheets. Expense under this plan was \$151,000, \$597,000, and \$592,000 for the years ended December 31, 2011, 2010, and 2009, respectively. The Company invests to fund this future obligation, in various mutual funds designated as trading securities. The securities are marked-to-market through current period earnings as a component of non-interest income. Accrued obligations under this plan are credited or charged with the return on the trading securities portfolio as a component of compensation and benefits expense.

The Company entered into a supplemental retirement agreement with its former president and current director on July 18, 2006. The agreement provides for 120 monthly payments of \$17,450. The present value of the obligation, of approximately \$1,625,000, was recorded in compensation and benefits expense in 2006. The present value of the obligation as of December 31, 2011 and 2010, was approximately \$880,000 and \$1,039,000, respectively.

(11) Equity Incentive Plan

The Company maintains the Northfield Bancorp, Inc. 2008 Equity Incentive Plan to grant common stock or options to purchase common stock at specific prices to directors and employees of the Company. The Plan provides for the issuance or delivery of up to 3,073,488 shares of Northfield Bancorp, Inc. common stock subject to certain Plan limitations. 157,538 shares of stock remain available for issuance under the Plan as of December 31, 2011. All stock options and restricted stock granted to date vests in equal installments over a five year period beginning one year from the date of grant. The vesting of options and restricted stock awards may accelerate in accordance with terms of the plan. Stock options were granted at an exercise price equal to the fair value of the Company's common stock on the grant date based on quoted market prices and all have an expiration period of ten years. The fair value of stock options granted on January 30, 2009, was estimated utilizing the Black-Scholes option pricing model using the following assumptions: an expected life of 6.5 years utilizing the simplified method, risk-free rate of return of 2.17%, volatility of 35.33% and a dividend yield of 1.61%. The fair value of stock options granted on May 29, 2009, was estimated utilizing the Black-Scholes option pricing model using the following assumptions: an expected life of 6.5 years utilizing the simplified method, risk-free rate of return of 2.88%, volatility of 38.39% and a dividend yield of 1.50%. The fair value of

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

stock options granted on January 30, 2010, was estimated utilizing the Black-Scholes option pricing model using the following assumptions: an expected life of 6.5 years utilizing the simplified method, risk-free rate of return of 2.90%, volatility of 38.29% and a dividend yield of 1.81%. The Company is expensing the grant date fair value of all employee and director share-based compensation over the requisite service periods on a straight-line basis.

During the years ended December 31, 2011, 2010 and 2009, the Company recorded \$3.0 million, \$3.0 million and \$2.9 million, respectively, of stock-based compensation

The following table is a summary of the Company's non-vested stock options as of December 31, 2011, and changes therein during the year then ended:

	Number of Stock Options	Weighted Average Grant Date Fair Value	Weighted Average Exercise Price	Weighted Average Contractual Life (years)
Outstanding- December 31, 2008		\$	\$	
Granted	2,106,400	3.22	9.94	10.00
Exercised	(23,000)	3.22	9.94	
Outstanding- December 31, 2009	2,083,400	3.22	9.94	9.08
Granted	3,000	4.66	13.24	10.00
Exercised	(13,860)	3.22	9.94	
Outstanding- December 31, 2010	2,072,540	3.22	9.94	8.09
Granted				
Exercised	(15,880)	3.22	9.94	
Outstanding- December 31, 2011	2,056,660	\$ 3.22	\$ 9.95	7.02
Exercisable- December 31, 2011	824,080	\$ 3.22	\$ 9.94	6.98

Expected future stock option expense related to the non-vested options outstanding as of December 31, 2011, is \$2.8 million over an average period of 2.1 years.

The following is a summary of the status of the Company's restricted shares as of December 31, 2011, and changes therein during the year then ended.

	Number of Shares Awarded	Weighted Average Grant Date Fair Value
Non-vested at December 31, 2008		\$
Granted	836,650	9.94
Vested		
Forfeited	(11,500)	9.94

Edgar Filing: ROWAN COMPANIES PLC - Form DEFA14A

Non-vested at December 31, 2009	825,150	9.94
Granted	4,400	13.24
Vested	(175,670)	9.94
Non-vested at December 31, 2010	653,880	9.97
Granted		
Vested	(165,050)	9.96
Non-vested at December 31, 2011	488,830	\$ 9.97

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Expected future stock award expense related to the non-vested restricted awards as of December 31, 2011, is \$3.5 million over an average period of 2.1 years.

Upon the exercise of stock options, management expects to utilize treasury stock as the source of issuance for these shares.

(12) Commitments and Contingencies

The Company, in the normal course of business, is party to commitments that involve, to varying degrees, elements of risk in excess of the amounts recognized in the consolidated financial statements. These commitments include unused lines of credit and commitments to extend credit.

At December 31, 2011, the following commitment and contingent liabilities existed that are not reflected in the accompanying consolidated financial statements (in thousands):

Commitments to extend credit	\$ 32,878
Unused lines of credit	31,857
Standby letters of credit	1,769

The Company's maximum exposure to credit losses in the event of nonperformance by the other party to these commitments is represented by the contractual amount. The Company uses the same credit policies in granting commitments and conditional obligations as it does for amounts recorded in the consolidated balance sheets. These commitments and obligations do not necessarily represent future cash flow requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, is based on management's assessment of risk. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The guarantees generally extend for a term of up to one year and are fully collateralized. For each guarantee issued, if the customer defaults on a payment to the third party, the Company would have to perform under the guarantee. The unamortized fee on standby letters of credit approximates their fair value; such fees were insignificant at December 31, 2011. The Company maintains an allowance for estimated losses on commitments to extend credit in other liabilities. At December 31, 2011 and 2010, the allowance was \$328,000 and \$366,000, respectively, changes to the allowance are recorded as a component of other non-interest expense.

At December 31, 2011, the Company was obligated under non-cancelable operating leases and capitalized leases on property used for banking purposes. Most leases contain escalation clauses and renewal options which provide for increased rentals as well as for increases in certain property costs including real estate taxes, common area maintenance, and insurance.

The projected minimum annual rental payments and receipts under the capitalized leases and operating leases, are as follows (in thousands):

	Rental Payments Capitalized Leases	Rental Payments Operating Leases	Rental Receipts Operating Leases
Year ending December 31:			
2012	\$ 387	\$ 3,378	\$ 165
2013	399	3,307	170
2014	411	3,302	190
2015	269	3,339	190
2016	247	3,135	190

Edgar Filing: ROWAN COMPANIES PLC - Form DEFA14A

Thereafter	560	31,607	1,442
Total minimum lease payments	\$ 2,273	\$ 48,068	\$ 2,347

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

There are four properties with contractual operating rental payments over the term of the lease totaling \$13.8 million which are not included in the above table because possession of such premises has not been delivered. Lease terms range from 15 to 20 years.

Net rental expense included in occupancy expense was approximately \$2,872,000, \$2,353,000, and \$2,128,000 for the years ended December 31, 2011, 2010, and 2009, respectively.

In the normal course of business, the Company may be a party to various outstanding legal proceedings and claims. In the opinion of management, the consolidated financial statements will not be materially affected by the outcome of such legal proceedings and claims.

The Bank is required by regulation to maintain a certain level of cash balances on hand and/or on deposit with the Federal Reserve Bank of New York. As of December 31, 2011 and 2010, the Bank was required to maintain balances of \$197,000 and \$700,000, respectively.

The Bank has entered into employment agreements with its Chief Executive Officer and the other executive officers of the Bank to ensure the continuity of executive leadership, to clarify the roles and responsibilities of executives, and to make explicit the terms and conditions of executive employment. These agreements are for a term of three-years subject to review and annual renewal, and provide for certain levels of base annual salary and in the event of a change in control, as defined, or in the event of termination, as defined, certain levels of base salary, bonus payments, and benefits for a period of up to three-years.

(13) Regulatory Requirements

The OCC requires savings institutions to maintain a minimum tangible capital ratio to tangible assets of 1.5%, a minimum core capital ratio to total adjusted assets of 4.0%, and a minimum ratio of total risk-adjusted total assets of 8.0%.

Under prompt corrective action regulations, the OCC is required to take certain supervisory actions (and may take additional discretionary actions) with respect to an undercapitalized institution. Such actions could have a direct material effect on the institution's financial statements. The regulations establish a framework for the classification of savings institutions into five categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. Generally, an institution is considered well capitalized if it has a core capital ratio of at least 5%, a Tier 1 risk-based capital ratio of at least 6%, and a total risk-based capital ratio of at least 10%.

The foregoing capital ratios are based in part on specific quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Capital amounts and classifications also are subject to qualitative judgments by the regulators about capital components, risk weighting, and other factors.

Management believes that as of December 31, 2011, the Bank met all capital adequacy requirements to which it is subject. Further, the most recent OCC notification categorized the Bank as a well-capitalized institution under the prompt corrective action regulations. There have been no conditions or events since that notification that management believes have changed the Bank's capital classification.

Northfield Bancorp, Inc. is regulated, supervised, and examined by the FRB as a savings and loan holding company and, as such, is not subject to regulatory capital requirements. The Dodd-Frank Act will require the federal banking agencies to establish consolidated risk-based and leverage capital requirements for insured

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

depository institutions, depository institution holding companies and systemically important nonbank financial companies. These requirements must be no less than those to which insured depository institutions are currently subject. As a result, on the fifth anniversary of the effective date of the Dodd-Frank Act, we will become subject to consolidated capital requirements which we have not been subject to previously.

The following is a summary of the Bank's regulatory capital amounts and ratios compared to the regulatory requirements as of December 31, 2011 and 2010, for classification as a well-capitalized institution and minimum capital (dollars in thousands).

	Actual		Adequacy Purposes		Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2011:						
Tangible capital to tangible assets	\$ 312,993	13.42%	\$ 34,987	1.50%	NA	NA
Tier I capital (core) (to adjusted total assets)	312,993	13.42	93,298	4.00	116,622	5.00
Total capital (to risk-weighted assets)	330,147	24.71	106,901	8.00	133,627	10.00
As of December 31, 2010:						
Tangible capital to tangible assets	\$ 292,981	13.43%	\$ 32,723	1.50%	NA	NA
Tier I capital (core) (to adjusted total assets)	292,981	13.43	87,263	4.00	109,078	5.00
Total capital (to risk-weighted assets)	307,375	27.39	89,751	8.00	112,188	10.00

(14) Fair Value of Measurement

The following table presents the assets reported on the consolidated balance sheet at their estimated fair value as of December 31, 2011 and 2010, by level within the Fair Value Measurements and Disclosures Topic of the FASB Accounting Standards Codification. Financial assets and liabilities are classified in their entirety based on the level of input that is significant to the fair value measurement. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlations or other means.

Level 3 Inputs Significant unobservable inputs that reflect the Company's own assumptions that market participants would use in pricing the assets or liabilities.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The following tables summarize financial assets and financial liabilities measured at fair value on a recurring basis as of December 31, 2011 and 2010, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

Available -for- Sale Securities: The estimated fair values for mortgage-backed securities, GSE bonds, and corporate securities are obtained from a nationally recognized third-party pricing service. The estimated fair values are derived primarily from cash flow models, which include assumptions for interest rates, credit losses, and prepayment speeds. Broker/dealer quotes are utilized as well when such quotes are available and deemed representative of the market. The significant inputs utilized in the cash flow models are based on market data obtained from sources independent of the Company (observable inputs,) and are therefore classified as Level 2 within the fair value hierarchy. The estimated fair value of equity securities classified as Level 1, are derived from quoted market prices in active markets. Equity securities consist primarily of money market mutual funds. There were no transfers of securities between Level 1 and Level 2 during the year ended December 31, 2011.

Trading Securities: Fair values are derived from quoted market prices in active markets. The assets consist of publicly traded mutual funds.

In addition, the Company may be required, from time to time, to measure the fair value of certain other financial assets on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. The

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

adjustments to fair value usually result from the application of lower-of-cost-or-market accounting or write downs of individual assets.

Impaired Loans: At December 31, 2011, and December 31, 2010, the Company had originated impaired loans held-for-investment and held-for-sale with outstanding principal balances of \$39.1 million and \$38.4 million that were recorded at their estimated fair value of \$35.7 million and \$35.7 million, respectively. The Company recorded impairment charges of \$4.1 million and \$2.7 million for the years ended December 31, 2011 and 2010, respectively, and charge-offs of \$7.7 million and \$3.7 million for the years ended December 31, 2011 and 2010, respectively, utilizing Level 3 inputs. For purposes of estimating fair value of impaired loans, management utilizes independent appraisals, if the loan is collateral dependent, adjusted downward by management, as necessary, for changes in relevant valuation factors subsequent to the appraisal date, or the present value of expected future cash flows for non-collateral dependent loans and troubled debt restructurings.

Other Real Estate Owned: At December 31, 2011 and 2010, the Company had assets acquired through foreclosure of \$3,359,000 and \$171,000, respectively, recorded at estimated fair value, less estimated selling costs when acquired, thus establishing a new cost basis. Estimated fair value is generally based on independent appraisals. These appraisals include adjustments to comparable assets based on the appraisers market knowledge and experience, and are considered level 3 inputs. When an asset is acquired, the excess of the loan balance over fair value, less estimated selling costs, is charged to the allowance for loan losses. If the estimated fair value of the asset declines, a write-down is recorded through non-interest expense. The valuation of foreclosed assets is subjective in nature and may be adjusted in the future because of changes in the economic conditions.

Subsequent valuation adjustments to other real estate owned (REO) totaled \$72,000 and \$146,000, for the years ended December 31, 2011 and 2010, reflecting continued deterioration in estimated fair values. There were no subsequent valuation adjustments to other real estate owned for the years ended December 31, 2009. Operating costs after acquisition are expensed.

Fair Value of Financial Instruments

The FASB Accounting Standards Topic for Financial Instruments requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring or non-recurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The following methods and assumptions were used to estimate the fair value of other financial assets and financial liabilities not already discussed above:

(a) Cash, Cash Equivalents, and Certificates of Deposit

Cash and cash equivalents are short-term in nature with original maturities of three months or less; the carrying amount approximates fair value. Certificates of deposits having original terms of six-months or less; carrying value generally approximates fair value. Certificate of deposits with an original maturity of six months or greater the fair value is derived from discounted cash flows.

(b) Securities (Held to Maturity)

The estimated fair values for substantially all of our securities are obtained from an independent nationally recognized pricing service. The independent pricing service utilizes market prices of same or similar securities whenever such prices are available. Prices involving distressed sellers are not utilized in determining fair value. Where necessary, the independent third-party pricing service estimates fair value using models employing techniques such as discounted cash flow analyses. The assumptions used in these models typically include assumptions for interest rates, credit losses, and prepayments, utilizing market observable data where available.

Table of Contents

NORTHFIELD BANCORP, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

(c) Federal Home Loan Bank of New York Stock

The fair value for Federal Home Loan Bank of New York stock is its carrying value, since this is the amount for which it could be redeemed and there is no active market for this stock.

(d) Loans (Held-for-Investment)

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as originated and purchased, and further segregated by residential mortgage, construction, land, multifamily, commercial and consumer. Each loan category is further segmented into amortizing and non-amortizing and fixed and adjustable rate interest terms and by performing and nonperforming categories. The fair value of loans is estimated by discounting the future cash flows using current prepayment assumptions and current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. This method of estimating fair value does not incorporate the exit price concept of fair value prescribed by the FASB ASC Topic for Fair Value Measurements and Disclosures.

(e) Loans (Held-for-Sale)

Held-for-sale loans are carried at the lower of aggregate cost or estimated fair value, less costs to sell, and therefore fair value is equal to carrying value.

(f) Deposits

The fair value of deposits with no stated maturity, such as non-interest-bearing demand deposits, savings, NOW and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

(g) Commitments to Extend Credit and Standby Letters of Credit

The fair value of commitments to extend credit and standby letters of credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates.

The fair value of off-balance-sheet commitments is insignificant and therefore not included in the following table.

(h) Borrowings

The fair value of borrowings is estimated by discounting future cash flows based on rates currently available for debt with similar terms and remaining maturity.

(i) Advance Payments by Borrowers

Advance payments by borrowers for taxes and insurance have no stated maturity; the fair value is equal to the amount currently payable.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The estimated fair values of the Company's significant financial instruments at December 31, 2011, and 2010, are presented in the following table (in thousands):

	2011		December 31,		2010	
	Carrying value	Estimated Fair value	Carrying value	Estimated Fair value	Carrying value	Estimated Fair value
Financial assets:						
Cash and cash equivalents	\$ 65,269	\$ 65,269	\$ 43,852	\$ 43,852	\$ 43,852	\$ 43,852

Advance payments by borrowers	2,201	2,201	693	693	693	693

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with a high degree of precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing on- and off-balance-sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

(15) Stock Repurchase Program

On September 9, 2011, the Board of Directors of the Company authorized the continuance of the stock repurchase program. Under its current program, the Company intends to repurchase up to 2,066,379 additional shares, representing approximately 5% of its outstanding shares. The timing of the repurchases will depend on certain factors, including but not limited to, market conditions and prices, the Company's liquidity and capital requirements, and alternative uses of capital. Any repurchased shares will be held as treasury stock and will be available for general corporate purposes. The Company is conducting such repurchases in accordance with a Rule 10b5-1 trading plan. As of December 31, 2011, the company held 5,114,020 shares in treasury at a weighted average cost of \$12.86 per share.

Table of Contents**NORTHFIELD BANCORP, INC. AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****(16) Earnings Per Share**

The following is a summary of the Company's earnings per share calculations and reconciliation of basic to diluted earnings per share for the periods indicated (in thousands, except share data):

	2011	December 31, 2010	2009

Earnings per share-diluted	\$ 0.42	\$ 0.33	\$ 0.28

(17) Postponement of Plan of Conversion and Reorganization

On September 30, 2010, Northfield Bancorp, Inc., a federal corporation and the stock holding company for Northfield Bank, announced due to the current market conditions that Northfield Bancorp, Inc., the recently formed Delaware corporation and proposed new holding company for Northfield Bank, had postponed its stock offering in connection with the second-step conversion of Northfield Bancorp, MHC. The Company expensed approximately \$1.8 million in costs incurred for the Company's postponed, second-step offering.

(18) Subsequent Events

On February 15, 2012, Northfield Bank, the wholly-owned subsidiary of Northfield Bancorp, Inc., sold the majority of its portfolio of premium finance loans at carrying value, except for \$1.7 million of cancelled loans, and \$4.3 million of loans originated to obligors residing in states where the purchaser is awaiting approval to own premium finance loans (Excluded Loans). At February 15, 2012, the sold loans had a carrying value of approximately \$42.0 million. The Excluded Loans will be sold when the purchaser obtains approval to own them with the exception of cancelled loans, which will be held by the Bank until their ultimate resolution, which is generally a payment from the insurance carrier in the amount of the unearned premiums.

On February 22, 2012, Northfield Bancorp, Inc., Northfield Bancorp, MHC, and Northfield Bank were served with a summons and complaint related to a personal injury matter. The plaintiff is seeking damages of \$40 million. The matter relates to an injury sustained by an individual on a property owned by a borrower of the Bank, which secures a loan to the Bank. The borrower is named as a co-defendant. The Bank does not operate the subject property or have any interest in the property, other than as collateral for its loan. The discovery phase is forthcoming; however, management believes the lawsuit is without merit. The Bank has \$12 million in insurance coverage and the complaint is being defended by the Bank's insurer. No accrual for loss has been established at December 31, 2011.

On March 13, 2012, Northfield Bancorp, Inc. (Northfield Bancorp) and Flatbush Federal Bancorp, Inc. (Flatbush Federal Bancorp) announced the execution of an Agreement and Plan of Merger, dated as of March 13, 2012, by and among Northfield Bancorp, MHC, Northfield Bancorp, the Bank and Flatbush Federal Bancorp, MHC, Flatbush Federal Bancorp and Flatbush Federal Savings and Loan Association (the Merger Agreement). Under the terms of the Merger Agreement, consideration for the transaction will be comprised of Northfield Bancorp's common stock. Flatbush Federal Bancorp stockholders will receive 0.4748 of a share of Northfield Bancorp stock for each share of Flatbush Federal Bancorp common stock they own, subject to the terms and conditions of the Merger Agreement. The transactions contemplated by the Merger Agreement are subject to customary closing conditions, including regulatory approvals and approval from the stockholders of Flatbush Federal Bancorp and the members of Flatbush Federal Bancorp, MHC.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

John W. Alexander, our Chief Executive Officer, and Steven M. Klein, our Chief Operating and Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) the Exchange Act as of December 31, 2011. Based upon their evaluation, they each found that our disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports that we file and submit under the Exchange Act is recorded, processed, summarized and reported as and when required and that such information is accumulated and communicated to our management as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the fourth quarter of 2011 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting and we identified no material weaknesses requiring corrective action with respect to those controls.

Management Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining effective internal control over financial reporting as such term is defined in Rule 13a-15(f) in the Exchange Act. The Company's internal control system is a process designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements.

Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on our financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2011. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control-Integrated Framework*. Based on our assessment we believe that, as of December 31, 2011, the Company's internal control over financial reporting is effective based on those criteria.

The Company's independent registered public accounting firm that audited the consolidated financial statements has issued an audit report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2011, and it is included in Item 8, under Part II of this Annual Report on Form 10-K. This report appears on page 77 of the document.
