## Edgar Filing: Eaton Vance Risk-Managed Diversified Equity Income Fund - Form N-Q

The percentage shown for each investment category in the Portfolio of Investments is based on net assets.

- (1) Non-income producing security.
- (2) Affiliated investment company available to Eaton Vance portfolios and funds which invests in high quality, U.S. dollar denominated money market instruments. The rate shown is the annualized seven-day yield as of September 30, 2012. Net income allocated from the investment in Eaton Vance Cash Reserves Fund, LLC for the fiscal year to date ended September 30, 2012 was \$23,601.
- (3) Amount is less than 0.05%.

The cost and unrealized appreciation (depreciation) of investments of the Fund at September 30, 2012, as determined on a federal income tax basis, were as follows:

<b>Aggregate cost</b>	<b>\$ 687,554,941</b>
Gross unrealized appreciation	\$ 218,821,680
Gross unrealized depreciation	(18,297,623)
<b>Net unrealized appreciation</b>	<b>\$ 200,524,057</b>

Written options activity for the fiscal year to date ended September 30, 2012 was as follows:

	Number of Contracts	Premiums Received
Outstanding, beginning of period	4,035	\$ 13,370,981
Options written	88,604	121,433,365
Options terminated in closing purchase transactions	(67,663)	(113,759,096)
Options expired	(19,465)	(12,496,439)
<b>Outstanding, end of period</b>	<b>5,511</b>	<b>\$ 8,548,811</b>

All of the assets of the Fund are subject to segregation to satisfy the requirements of the escrow agent.

At September 30, 2012, the Fund had sufficient cash and/or securities to cover commitments under these contracts.

The Fund is subject to equity price risk in the normal course of pursuing its investment objective. The Fund purchases put options, with respect to a substantial portion of its investments in common stocks, on indices or exchange-traded funds that replicate such indices at strike prices below the current value of the index or exchange-traded fund to reduce the Fund's exposure to market risk and volatility. In buying put options on an index or exchange-traded fund, the Fund in effect, acquires protection against decline in the value of the applicable index or exchange-traded fund below the exercise price in exchange for the option premium paid.

During periods of high and rising volatility, the Fund may and did write put options during the period ended September 30, 2012 on indices at a strike price below that of the Fund's long put options on indices or exchange traded funds, creating a spread that reduces the overall cost of protection, but also limits protection. The Fund writes index or OTC call options at the money and occasionally, OTC put options on individual stocks below the current value of the security to generate premium income. In writing index call options, the Fund in effect, sells potential appreciation in the value of the applicable index above the exercise price in exchange for the option premium received. The Fund retains the risk of lost appreciation, minus the premium received, should the price of the underlying index rise above the strike price. In writing put options on individual stocks, the Fund in effect, sells protection against decline in the value of the applicable individual stock at strike prices below the current market price in exchange for the option premium received. The Fund retains the risk of loss, minus the premium received, should the

price of the underlying stock decline below the exercise price. The Fund is not subject to counterparty credit risk with respect to its written options as the Fund, not the counterparty, is obligated to perform under such derivatives.

At September 30, 2012, the aggregate fair value of open derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) in an asset position and in a liability position and whose primary underlying risk exposure is equity price risk was \$17,057,940 and \$3,999,945, respectively.

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At September 30, 2012, the hierarchy of inputs used in valuing the Fund's investments and open derivative instruments, which are carried at value, were as follows:

Asset Description	Level 1	Level 2	Level 3	Total

\* Includes foreign equity securities whose values were adjusted to reflect market trading of comparable securities or other correlated instruments that occurred after the close of trading in their applicable foreign markets.

The Fund held no investments or other financial instruments as of December 31, 2011 whose fair value was determined using Level 3 inputs. At September 30, 2012, there were no investments transferred between Level 1 and Level 2 during the fiscal year to date then ended.

For information on the Fund's policy regarding the valuation of investments and other significant accounting policies, please refer to the Fund's most recent financial statements included in its semiannual or annual report to shareholders.

**Item 2. Controls and Procedures**
