Management's Discussion of Fund Performance

Economic and Market Conditions

In December 2011, an equity rally took hold and continued into early April 2012, fueled by stronger economic growth in the fourth quarter, falling unemployment and what the markets perceived as a successful restructuring of Greek debt. Then in May 2012, the third annual mid-year economic slowdown arrived, instigated by renewed concerns in Europe, slowing growth in China and continuing political uncertainty in the United States with the upcoming presidential election.

Despite a slowdown in consumer spending and weakening employment data, however, stocks moved upward intermittently from June 2012 through early fall in part because investors anticipated that worsening economic news would prompt the U.S. Federal Reserve to initiate another round of quantitative easing to stimulate the economy, which it did in September 2012. U.S. Treasury yields, meanwhile, fell to all-time lows in July 2012. In the final weeks of the period, however, during the run-up to the election and after President Obama's victory, the equity market retreated as investors turned their attention to the so-called fiscal cliff, the automatic triggering of spending cuts and expiration of tax cuts set to occur on New Year's Day 2013.

Against this backdrop, municipal bonds rallied during the one-year period ended November 30, 2012, led by the long end of the yield curve. The Barclays Capital Municipal Bond Index² an unmanaged index of municipal bonds traded in the United States returned 10.17% for the period, while the Funds' benchmark, the Barclays Capital Long (22+) Municipal Bond Index (the Index), returned 16.10%. As yields on high quality bonds fell, investors moved out on the yield curve, buying longer-maturity municipal bonds to potentially take advantage of higher yields. In their quest for income during a period of historically low interest rates, investors also favored lower-quality, higher-yielding issues over higher-quality bonds. As a result, longer-duration, lower credit-quality bonds were the best performers in the municipal space during the period.

Municipal bonds offered higher taxable-equivalent yields than Treasuries for much of the period. The ratio of 30-year AAA⁶ municipal yields to 30-year Treasury yields which historically has averaged less than 100% because municipal yields are federally tax-exempt began the period at 125.9%, making municipal bonds attractive relative to Treasuries. After the election, however, investors seemed to view Obama's win as an indication that marginal tax

rates were likely to go up. That sentiment led to higher demand for tax-exempt municipals, driving the municipal-to-Treasury yield ratio down to 87.9% at period-end on November 30, 2012. For the one-year period, municipal bonds outperformed Treasuries.

Fund Performance

For the fiscal year ended November 30, 2012, all of the Funds' shares at net asset value (NAV) outperformed the 16.10% return of the Index.

The Funds' overall strategy is to invest in bonds with maturities of 10 years or more, in order to capture their generally higher yields and potentially greater income payments at the long end of the yield curve. Management tends to hedge to various degrees against the greater potential risk of volatility at the long end of the yield curve by using Treasury futures in seeking to provide downside protection.

For all Funds except the Massachusetts Fund, an overweighting in zero-coupon bonds which were the strongest-performing coupon structure in the Index during the period contributed to those Funds' relative outperformance versus the Index. However, security selection in the zero-coupon issues detracted from results relative to the Index for all Funds, as none was able to beat the 38.10% return of the zero-coupon allocation in the Index.

Edgar Filing: EATON VANCE MASSACHUSETTS MUNICIPAL INCOME TRUST - Form N-CSR

The Funds' use of leverage contributed to the outperformance of all Funds versus the Index during the one-year period. In managing the Funds, management employs leverage to seek to enhance the Funds' tax-exempt income. The use of leverage has the effect of achieving additional exposure to the municipal market. Leverage magnifies the Funds' exposure to their underlying investments in both up and down markets. During this period of strong performance by municipal bonds, leverage was a key contributor to the Funds' relative outperformance versus the unleveraged Index.

As a risk-management tactic within the overall Fund strategy mentioned above, interest-rate hedging is intended to moderate performance on both the upside and the downside of the market. During the one-year period, when municipal bonds and Treasuries performed strongly, the hedging strategy moderated a portion of the positive performance versus the Index of all Funds to various degrees.

See Endnotes and Additional Disclosures in this report.

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) with all distributions reinvested. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. For performance as of the most recent month end, please refer to www.eatonvance.com.

Management's Discussion of Fund Performance *continued*

State-specific Results

Eaton Vance California Municipal Income Trust shares at NAV returned 25.59%, surpassing the 16.10% return of the Index. In addition to leverage and an overweighting in zero-coupon bonds, the Fund's longer call protection, relative to the Index, contributed to the Fund's relative outperformance. In a period of falling interest rates, such as occurred during the Fund's fiscal year, bond issuers tend to retire bonds as soon as they are callable and replace them with lower-interest issues. Thus in a rallying market, it may be beneficial for a fund to own bonds with longer call protection, because it allows the Fund to hold onto higher-yielding issues. Notable detractors from Fund performance versus the Index included the Fund's hedging strategy, security selection in zero-coupon bonds, and an underweighting in A-rated issues, which were the strongest-performing rating category in the Index. Underweighted positions in hospital bonds, industrial development revenue (IDR) bonds and lease revenue/certificates of participation (COP) bonds dragged on performance relative to the Index as well.

Eaton Vance Massachusetts Municipal Income Trust shares at NAV returned 22.28%, outperforming the 16.10% return of the Index. Key contributors to performance versus the Index included leverage, longer call protection, and an overweighting and security selection in the education sector, which performed well during the period. Detractors from performance versus the Index included security selection in zero-coupon bonds, the Fund's hedging strategy, and underweights and security selection in A-rated and BBB-rated issues.

Eaton Vance Michigan Municipal Income Trust shares at NAV returned 20.92%, outperforming the 16.10% return of the Index. Leverage and an overweighting in zero-coupon bonds were contributors to relative outperformance versus the Index. The key detractors from performance versus the Index were security selection in zero-coupon bonds, an underweighting and security selection in IDR bonds, and an overweighting in high-quality, intermediate-maturity general obligation (GO) bonds.

Eaton Vance New Jersey Municipal Income Trust shares at NAV returned 20.18%, outpacing the 16.10% return of the Index. The Fund's relative outperformance versus the Index was driven by leverage, overweights in zero-coupon bonds and IDR bonds, and longer call protection. Primary detractors from the Fund's performance versus the Index included the

Fund's hedging strategy as well as security selection in both zero-coupon bonds and IDR bonds.

Eaton Vance New York Municipal Income Trust shares at NAV returned 24.30%, outperforming the 16.10% return of the Index. Key contributors to results versus the Index included leverage, an overweighting in zero-coupon bonds, an overweighting and security selection in IDR bonds, and longer call protection. Detractors from the Fund's performance versus the Index included security selection in zero-coupon bonds, the Fund's hedging strategy, and an underweighting and security selection in A-rated bonds.

Eaton Vance Ohio Municipal Income Trust shares at NAV returned 24.71%, outperforming the 16.10% return of the Index. Leverage, an overweighting in zero-coupon bonds, and longer call protection were the main drivers of results versus the Index. In contrast, security selection in zero-coupon bonds, the Fund's hedging strategy, and an underweighting in A-rated and BBB-rated bonds detracted from results versus the Index.

Eaton Vance Pennsylvania Municipal Income Trust shares at NAV returned 18.20%, outperforming the 16.10% return of the Index. The Fund's relative outperformance versus the Index was driven by leverage and an overweighting in zero-coupon bonds. Detractors from the Fund's performance versus the Index included security selection in zero-coupon bonds, the Fund's hedging strategy, an overweighting in pre-refunded bonds, and security selection in hospital and IDR issues.

See Endnotes and Additional Disclosures in this report.

Endnotes and Additional Disclosures

- ¹ The views expressed in this report are those of the portfolio manager(s) and are current only through the date stated at the top of this page. These views are subject to change at any time based upon market or other conditions, and Eaton Vance and the Fund(s) disclaim any responsibility to update such views. These views may not be relied upon as investment advice and, because investment decisions are based on many factors, may not be relied upon as an indication of trading intent on behalf of any Eaton Vance fund. This commentary may contain statements that are not historical facts, referred to as forward looking statements. The Fund's actual future results may differ significantly from those stated in any forward looking statement, depending on factors such as changes in securities or financial markets or general economic conditions, the volume of sales and purchases of Fund shares, the continuation of investment advisory, administrative and service contracts, and other risks discussed from time to time in the Fund's filings with the Securities and Exchange Commission.
- ² Barclays Capital Municipal Bond Index is an unmanaged index of municipal bonds traded in the U.S. Barclays Capital Long (22+) Municipal Bond Index is an unmanaged index of municipal bonds traded in the U.S. with maturities of 22 years or more. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index.
- ³ Performance results reflect the effects of leverage.
- ⁴ The Distribution Rate is based on the Fund's last regular distribution per share in the period (annualized) divided by the Fund's NAV or market price at the end of the period. The Fund's distributions may be composed of ordinary income, tax-exempt income, net realized capital gains and return of capital. Taxable-equivalent performance is based on the highest combined federal and state income tax rates, where applicable. Lower tax rates would result in lower tax-equivalent performance. Actual tax rates will vary depending on your income, exemptions and deductions. Rates do not include local taxes. Subsequent distributions declared, but not reflected in Fund Performance, reflect a reduction of the monthly distribution for Ohio Municipal Income Trust.
- ⁵ Fund employs RIB financing and/or APS leverage. The leverage created by RIB investments and APS provides an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater price volatility). The cost of leverage rises and falls with changes in short-term interest rates. See Floating Rate Notes Issued in Conjunction with Securities Held in the notes to the financial statements for more information about RIB financing. RIB leverage represents the amount of Floating Rate Notes outstanding at period end as a percentage of Fund net assets applicable to common shares plus APS and Floating Rate Notes. APS leverage represents the liquidation value of the Fund's APS outstanding at period end as a percentage of Fund net assets applicable to common shares plus APS and Floating Rate Notes. The Fund is required to maintain prescribed asset coverage for its APS, which could be reduced if Fund asset values decline. Floating Rate Notes in both calculations reflect the effect of RIBs purchased in secondary market transactions, if applicable.
- ⁶ Ratings are based on Moody's, S&P or Fitch, as applicable. Credit ratings are based largely on the rating agency's investment analysis at the time of rating and the rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition. The rating assigned to a security by a rating agency does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. If securities are rated differently by the rating agencies, the higher rating is applied. Ratings of BBB or higher by Standard and Poor's or Fitch (Baa or higher by Moody's) are considered to be investment grade quality.

Fund profile subject to change due to active management.

NPFG	National Public Finance Guaranty Corp.
RADIAN	Radian Group, Inc.

The Trust invests primarily in debt securities issued by California municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at November 30, 2012, 34.3% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 0.5% to 13.8% of total investments.

(1) Security represents the municipal bond held by a trust that issues residual interest bonds (see Note 1H).

Edgar Filing: EATON VANCE MASSACHUSETTS MUNICIPAL INCOME TRUST - Form N-CSR

⁽²⁾ Security (or a portion thereof) has been pledged as collateral for residual interest bond transactions. The aggregate value of such collateral is \$2,712,022.

The Trust invests primarily in debt securities issued by Massachusetts municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at November 30, 2012, 22.2% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.2% to 13.4% of total investments.

(1) Security represents the municipal bond held by a trust that issues residual interest bonds (see Note 1H).

Edgar Filing: EATON VANCE MASSACHUSETTS MUNICIPAL INCOME TRUST - Form N-CSR

⁽²⁾ Security (or a portion thereof) has been pledged as collateral for residual interest bond transactions. The aggregate value of such collateral is \$1,001,874.

The Trust invests primarily in debt securities issued by New Jersey municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at November 30, 2012, 27.5% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 2.2% to 9.7% of total investments.

(1) Security represents the municipal bond held by a trust that issues residual interest bonds (see Note 1H).

(2) Security (or a portion thereof) has been pledged as collateral for residual interest bond transactions. The aggregate value of such collateral is \$506,600.

(3) Variable rate security. The stated interest rate represents the rate in effect at November 30, 2012.

Portfolio of Investments continued

The percentage shown for each investment category in the Portfolio of Investments is based on net assets applicable to common shares.

AGC	Assured Guaranty Corp.
AMBAC	AMBAC Financial Group, Inc.
AMT	Interest earned from these securities may be considered a tax preference item for purposes of the Federal Alternative Minimum Tax.
BHAC	Berkshire Hathaway Assurance Corp.
FNMA	Federal National Mortgage Association
MFMR	Multi-Family Mortgage Revenue
NPFG	National Public Finance Guaranty Corp.

The Trust invests primarily in debt securities issued by New York municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at November 30, 2012, 11.4% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 2.2% to 3.5% of total investments.

- (1) Security represents the municipal bond held by a trust that issues residual interest bonds (see Note 1H).
- (2) Security (or a portion thereof) has been pledged as collateral for residual interest bond transactions. The aggregate value of such collateral is \$2,827,350.
- (3) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be sold in certain transactions (normally to qualified institutional buyers) and remain exempt from registration. At November 30, 2012, the aggregate value of these securities is \$822,400 or 1.0% of the Trust's net assets applicable to common shares.
- (4) Non-income producing security.
- (5) For fair value measurement purposes, security is categorized as Level 3 (see Note 10).
