Edgar Filing: TIMKEN CO - Form SD

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2013.

## Section 1 Conflict Minerals Disclosure

### Item 1.01 Conflict Minerals Disclosure and Report

This conflict minerals disclosure is made by The Timken Company (the Company) pursuant to Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the related rules promulgated by the Securities and Exchange Commission (the Rules).

The Company has conducted in good faith a reasonable country of origin inquiry into the origin of conflict minerals, as defined in the Rules (the Minerals), that are necessary to the functionality or production of products that the Company manufactures or contracts to manufacture, to determine whether the Minerals originated from the Democratic Republic of Congo or an adjoining country (each a Covered Country), or are from recycled or scrap sources.

As a result of its reasonable country of origin inquiry, the Company has made the determination that either such Minerals came from recycled or scrap sources, or, to the extent such Minerals are not from recycled or scrap sources, such Minerals did not originate in a Covered Country, or it has no reason to believe that such Minerals may have originated in a Covered Country. Below is a brief description of the reasonable country of origin inquiry the Company undertook.

First, the Company conducted a review of its product categories and product specifications, and through this review, it identified those products it manufactures or contracts to manufacture for which any of the Minerals are necessary to functionality or production. The Minerals are not necessary to the functionality or production of the vast majority of the products the Company manufactures or contracts to manufacture. The Company also identified those products it manufactures or contracts to manufacture on which the Company desired to conduct further inquiries, to confirm its understanding as to whether any Minerals are necessary to their functionality or production.

Next, the Company identified the suppliers of the products (or their relevant components or materials) identified from the review described above that contain or may contain necessary Minerals. The Company sent each such supplier a form to complete and sign, which included a series of questions seeking information relating to the use and country of origin of any Minerals necessary to the functionality or production of that product, component or material, and required signed certifications as to the foregoing.

The Company evaluated all the responses received, and conducted additional follow-up with suppliers where necessary.

Based on its reasonable country of origin inquiry described above, conducted in good faith, the Company determined that the necessary Minerals in the products it manufactures or contracts to manufacture were from recycled or scrap sources, did not originate from a Covered Country, or did not give the Company reason to believe that the necessary Minerals may have originated from a Covered Country.

This information is also available at the Company's publicly available Internet website at <http://www.timken.com/conflictminerals>.

**Item 1.02 Exhibit**

No Conflict Minerals Report is required.

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

THE TIMKEN COMPANY
