Additional Information

The Board Benefit Trust (BBT) Program

Since MHFG operates its business giving due regard to creating value for diverse stakeholders and realizing improved corporate value through the continuous and stable growth of MHFG group pursuant to MHFG's basic management policy defined under the Mizuho Financial Group's Corporate Identity, MHFG has introduced a performance-based stock compensation program using a trust (the Program) that functions as an incentive for each Director, Executive Officer, and Specialist Officer to exert maximum effort in performing his or her duties, and also as consideration for such exertion of effort.

(1) Outline of the Program

The Program has adopted the Board Benefit Trust (BBT) framework. MHFG's shares on the stock market will be acquired through a trust established based on the underlying funds contributed by MHFG, and MHFG's shares will be distributed to Directors, Executive Officers, and Specialist Officers of MHFG, Mizuho Bank, Ltd., Mizuho Trust & Banking Co., Ltd., and Mizuho Securities Co., Ltd. (the Company Group) in accordance with the Rules on Distribution of Shares to be prescribed in advance. The number of MHFG's shares to be distributed will be determined pursuant to a performance evaluation based on the annual business plan.

A structure has been introduced for the distribution of MHFG's shares under the Program, whereby the distribution will be deferred over three years, and the deferred portion will be subject to reduction or forfeiture depending on certain factors, including the performance of the Company Group or the relevant Directors, Executive Officers, and Specialist Officers.

Voting rights related to MHFG's shares belonging to the trust assets under the trust shall not be exercised.

(2) MHFG's Shares Outstanding in the Trust

MHFG's shares outstanding in the trust are recognized as Treasury Stock under Net Assets at the carrying amount (excluding the amount of incidental expenses) in the trust. The carrying amount of such Treasury Stock as of December 31, 2017 was ¥2,424 million for 13,319 thousand shares (the carrying amount as of March 31, 2017 was ¥1,428 million for 9,000 thousand shares).

- (Notes) 1. Unrealized Gains (Losses) include ¥34,372 million and ¥68,710 million, which were recognized in the statements of income for the year ended March 31, 2017 and the nine months ended December 31, 2017, respectively, by applying the fair-value hedge method.
2. As for the quarterly consolidated balance sheet amount (consolidated balance sheet amount), fair value of Japanese stocks with a quoted market price is determined based on the average quoted market price, or other reasonable value during the last month of the nine months ended December 31, 2017 (last month of the fiscal year ended March 31, 2017), and fair value of securities other than Japanese stocks is determined at the quoted market price if available, or other reasonable value as of December 31, 2017 (March 31, 2017).
3. Certain Securities other than Trading Securities (excluding Securities for which it is deemed to be extremely difficult to determine the fair value) are devalued to the fair value, and the difference between the acquisition cost and the fair value is treated as the loss for the nine months ended December 31, 2017 (the fiscal year ended March 31, 2017) (impairment (devaluation)), if the fair value (primarily the closing market price as of December 31, 2017 (March 31, 2017)) has significantly deteriorated compared with the acquisition cost (including amortized cost), and unless it is deemed that there is a possibility of a recovery in the fair value.

The amount of impairment (devaluation) for the fiscal year ended March 31, 2017 was ¥1,139 million.

The amount of impairment (devaluation) for the nine months ended December 31, 2017 was ¥1,806 million.

The criteria for determining whether a security's fair value has significantly deteriorated are outlined as follows:

Securities whose fair value is 50% or less of the acquisition cost

Securities whose fair value exceeds 50% but is 70% or less of the acquisition cost and the quoted market price maintains a certain level or lower

4. Floating-rate Japanese Government Bonds

Fair values of Floating-rate Japanese Government Bonds, according to our determination that current market prices may not reflect the fair value, are based on the reasonably calculated prices as book value on the quarterly consolidated balance sheet (consolidated balance sheet).

In deriving the reasonably calculated prices, we used the Discounted Cash Flow method as well as other methods. The price decision variables include the yield of 10-year Japanese Government Bonds and the volatilities of interest rate swap options for 10-year Japanese Government Bonds as underlying assets.
