Non-GAAP Financial Measures This presentation includes certain non-GAAP financial measures, including core earnings metrics, which are presented both inclusive and exclusive of the premium amortization adjustment (“PAA”). We believe the non-GAAP financial measures are useful for management, investors, analysts, and other interested parties in evaluating our performance but should not be viewed in isolation and are not a substitute for financial measures computed in accordance with U.S. generally accepted accounting principles (“GAAP”). In addition, we may calculate non-GAAP metrics, which include core earnings, and the PAA, differently than our peers making comparative analysis difficult. Please see the section entitled “Non-GAAP Reconciliations” in the attached Appendix for a reconciliation to the most directly comparable GAAP financial measures.

3 Major Questions Have Been Answered

Against the current macroeconomic backdrop, there are three questions consistently raised by nearly all of our investors. Three Major Questions Answered: How Will Annaly Be Impacted By Central Bank Policy And A Rising Rate Environment? How Stable And Resilient Is The Annaly Model Over Time? How Is Annaly Positioned For The Current And Future Market Environment? 1 2 3 6

Annaly has outperformed as market “paranoia” eases around central bank policy Increased Visibility of Central Bank Policy Source: Bloomberg market data as of May 11, 2018. As a result of the diversification strategy, Annaly has delivered consistent dividends and stable margins Demonstrated Resiliency – Scaled Diversification Enhances Stability Dividend Stability(1) Annaly NIM ex-PAA (%) (2) NLY has paid a consistent \$0.30 dividend over the past 18 quarters Annaly has continued to provide an attractive, stable NIM throughout different yield environments 2 Source: Bloomberg and Company filings. Includes all companies in the respective Agency, Hybrid, and Commercial sectors of the BBREMTG Index as of May 11, 2018. Market data as of May 11, 2018. Dividend Stability measures the change in dividend from Q4 2013 to Q1 2018. Net interest margin represents the sum of the Company's interest income plus TBA dollar roll income less interest expense and realized gains (losses) on interest rate swaps divided by the sum of average interest earning assets plus average TBA contract balances. Net interest margin (excluding PAA) excludes the PAA representing the cumulative impact on prior periods, but not the current period, of quarter-over-quarter changes in estimated long-term prepayment speeds related to the Company's Agency MBS. Represents a non-GAAP financial measure; see Appendix. In addition, the diversification strategy has allowed Annaly to operate with a leverage profile that is nearly 20% lower than mREITs with pure play Agency strategies 8
