4)	Date Filed:

Our heritage in systems, silicon and software is a core strength and a foundation for an innovative portfolio of products and services. In 2014, we continued to invest in innovation and strengthening our product portfolio, which resulted in new product offerings across routing, switching, and security.

In routing, we announced a virtualized version of our flagship MX Series 3D Universal Edge Routing platform, the vMX 3D Universal Edge Router, to deliver the industry s first full-featured, carrier-grade virtualized router. The vMX gives service providers and enterprises the ability to seamlessly leverage the benefits of both virtual and physical networking.

In switching, to address the networking requirements of large cloud providers and enterprise customers who build large and massive scale data centers, we announced the Juniper Networks OCX1100, the first switch to combine Open Compute Project hardware design with Junos OS, our carrier-class network operating system. We also announced a new line of EX4600 Ethernet switches to fulfill the increasing demands for highly available access to cloud services and applications across enterprise campus networks.

Additionally, we expanded our software defined networking portfolio with new software and hardware, including the NorthStar Controller, a new traffic-engineering controller that leverages open, industry-standard protocols built to optimize service providers transport networks, as well as the Junos Fusion software that can control thousands of independent network elements from a single management plane.

In security, we announced vSRX, formerly Firefly Perimeter, a virtual version of our SRX Series Services Gateway, new advancements in our Spotlight Secure threat intelligence platform, Junos Space Virtual Director, an application that automates the management and deployment of vSRX, as well as Juniper Argon Secure, an advanced anti-malware service.

Juniper Networks innovations are critical to helping our customers transform their business models to capitalize on new growth opportunities. In addition we work with many strategic partners to help customers connect their ideas to the marketplace.

The Year Ahead

We have sharpened our strategy to focus on delivering the most scalable, reliable, secure and cost-effective networks while revolutionizing their agility, efficiency and value through automation. The concept of automation is an important shift happening in the networking industry, and we intend to lead in automation, as we have done very successfully in network performance. We are focusing on customers and partners across our key verticals who view these network attributes as fundamental to their businesses. Product and solution differentiation, with a relentless customer focus, will allow us to achieve our goal of growing revenue faster than the market.

We believe that our innovation engine is running stronger than ever and we are executing on a compelling product roadmap that positions Juniper Networks for continued growth. I am very excited about our product pipeline, which has never been better and will offer our customers breakthrough performance and impressive capabilities unmatched in the industry.

Our exciting new product portfolio, along with our focused go-to-market model, are coming together to create real competitive advantage for our customers. Consequently, we believe that we are in an excellent position to accelerate our growth and increase stockholder value.

Corporate Governance Principles

We remain committed to ensuring that our Board is composed of a highly capable and diverse group of directors. We believe that our directors bring the experiences and perspectives necessary to address the challenges of the evolving markets we serve. We are particularly pleased with the addition of two new directors on our Board, Jim Dolce and Rahul Merchant.

In Summary

As CEO, I am committed to ensuring we are running the business for growth and seizing the opportunities ahead of us. I am confident in Juniper s potential and I am enthusiastic about our future.

At the same time, it is equally important for me to be the keeper of Juniper s culture, not just because our values make Juniper a better place to work but because they absolutely achieve business results. Our passion leads to success, and I will continue to shepherd a culture and company where every colleague is inspired to do their best work.

There is seemingly no limit to what we can achieve when we connect things together and empower everyone in an increasingly connected world. It is why we exist as a company to solve the real-world problems that we solve.

We appreciate the loyalty and support of our stockholders, customers, partners and employees. We will continue to earn your trust and confidence by delivering on our commitments in 2015 and beyond.

Sincerely,

Rami Rahim

Chief Executive Officer

Forward-Looking Statements

This Letter to Stockholders (this Letter) contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 regarding future events and the future results of Juniper Networks, Inc. (we. us. or the Company) that are based on our current expectations, estimates, forecasts, and projections about our business, our results of operations, the industry in which we operate and the beliefs and assumptions of our management.
