#Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended. At Aug. 31, 2015, the aggregate value of Rule 144A securities was \$54,265,220, which represents 28.94% of the Fund's net assets.

@Illiquid security. At Aug. 31, 2015, the aggregate value of illiquid securities was \$1,171,731, which represents 0.63% of the Fund's net assets.

Pass Through Agreement. Security represents the contractual right to receive a proportionate amount of underlying payments due to the counterparty pursuant to various agreements related to the rescheduling of obligations and the exchange of certain notes.

Securities have been classified by type of business.

100% of the income received was in the form of cash.

Includes \$2,726 cash collateral for swap contracts as of Aug. 31, 2015.

=Security is being fair valued in accordance with the Fund's fair valuation policy. At Aug. 31, 2015, the aggregate value of fair valued securities was \$59,904, which represents 0.03% of the Fund's net assets.

≠The rate shown is the effective yield at the time of purchase.

°Principal amount shown is stated in U.S. dollars unless noted that the security is denominated in another currency.

Non-income-producing security.

Variable rate security. The rate shown is the rate as of Aug. 31, 2015. Interest rates reset periodically.

ΔSecurities have been classified by country of origin.

«Senior secured loans generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally: (i) the prime rate offered by one or more U.S. banks, (ii) the lending rate offered by one or more European banks such as the London Interbank Offered Rate (LIBOR), and (iii) the certificate of deposit rate. Senior secured loans may be subject to restrictions on resale. Stated rate in effect at Aug. 31, 2015.

Step coupon bond. Coupon increases or decreases periodically based on a predetermined schedule. Stated rate in effect at Aug. 31, 2015.

Swap Contract

CDS Contract¹

Counterparty	Swap Referenced Obligation	Notional Value	Annual Protection Payments	Termination Date	Unrealized Appreciation (Depreciation) ²
	Protection Purchased:				
	JPMC -				
	iTraxx				
	Europe				
	Crossover Series 23				
ICE	Version 1	EUR 20,000	5.00%	6/20/20	\$ 318

The use of foreign currency exchange contracts and swap contracts involves elements of market risk and risks in excess of the amounts disclosed in the financial statements. The foreign currency exchange contracts and swap contracts presented above represents the Fund's total exposure in such contracts, whereas only the net unrealized appreciation (depreciation) is reflected in the Fund's net assets.

¹A CDS contract is a risk-transfer instrument through which one party (purchaser of protection) transfers to another party (seller of protection) the financial risk of a credit event (as defined in the CDS agreement), as it relates to a particular reference security or basket of securities (such as an index). Periodic payments (receipts) on such contracts are accrued daily and recorded as realized losses (gains) on swap contracts. Upon payment (receipt), such amounts are recorded as unrealized losses (gains) on swap contracts. Upfront payments made or received in connection with CDS contracts are amortized over the expected life of the CDS contracts as unrealized losses (gains) on swap contracts. The change in value of CDS contracts is recorded as unrealized appreciation or depreciation daily. A realized gain or loss is recorded upon a credit event (as defined in the CDS agreement) or the maturity or termination of the agreement.

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-Q

²Unrealized appreciation (depreciation) does not include periodic interest payments on swap contracts accrued daily in the amount of \$(219).

Notes

Delaware Enhanced Global Dividend and Income Fund

August 31, 2015 (Unaudited)

1. Significant Accounting Policies

The following accounting policies are in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and are consistently followed by Delaware Enhanced Global Dividend and Income Fund (Fund). This report covers the period of time since the Fund's last fiscal year end.

Security Valuation Equity securities and exchange-traded funds (ETFs), except those traded on The Nasdaq Stock Market LLC (Nasdaq), are valued at the last quoted sales price as of the time of the regular close of the New York Stock Exchange on the valuation date. Securities and ETFs traded on the Nasdaq are valued in accordance with the Nasdaq Official Closing Price, which may not be the last sales price. If, on a particular day, an equity security or ETF does not trade, the mean between the bid and ask prices will be used, which approximates fair value. Securities listed on a foreign exchange are normally valued at the last quoted sales price on the valuation date. Open-end investment company securities are valued at net asset value per share, as reported by the underlying investment company. U.S. government and agency securities are valued at the mean between the bid and ask prices, which approximates fair value. Other debt securities and credit default swap (CDS) contracts are valued based upon valuations provided by an independent pricing service or broker/counterparty and reviewed by management. To the extent current market prices are not available, the pricing service may take into account developments related to the specific security, as well as transactions in comparable securities. Valuations for fixed income securities utilize matrix systems, which reflect such factors as security prices, yields, maturities, and ratings, and are supplemented by dealer and exchange quotations. For asset-backed securities, collateralized mortgage obligations, commercial mortgage securities, and U.S. government agency mortgage securities, pricing vendors utilize matrix pricing which considers prepayment speed, attributes of the collateral; yield or price of bonds of comparable quality, coupon, maturity, and type as well as broker/dealer-supplied prices. Swap prices are derived using daily swap curves and models that incorporate a number of market data factors, such as discounted cash flows, trades, and values of the underlying reference instruments. Foreign currency exchange contracts and foreign cross currency exchange contracts are valued at the mean between the bid and ask prices, which approximates fair value. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available. Futures contracts are valued at the daily quoted settlement prices. Generally, other securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith under the direction of the Fund's Board of Trustees. In determining whether market quotations are readily available or fair valuation will be used, various factors will be taken into consideration, such as market closures or suspension of trading in a security. The Fund may use fair value pricing more frequently for securities traded primarily in non-U.S. markets because, among other things, most foreign markets close well before the Fund values its securities, generally as of 4:00 p.m. Eastern time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, government actions or pronouncements, aftermarket trading, or news events may have occurred in the interim. Whenever such a significant event occurs, the Fund may frequently value foreign securities using fair value prices based on third-party vendor modeling tools (international fair value pricing).

2. Investments

U.S. GAAP defines fair value as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. A three-level hierarchy for fair value measurements has been established based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available under the circumstances. The Fund's investment in its entirety is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-level hierarchy of inputs is summarized below.

Level 1

Inputs are quoted prices in active markets for identical investments. (Examples: equity securities, open-end investment companies, futures contracts, exchange-traded options contracts)

Edgar Filing: Delaware Enhanced Global Dividend & Income Fund - Form N-Q

Level 2

Other observable inputs, including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, and default rates), or other market-corroborated inputs. (Examples: debt securities, government securities, swap contracts, foreign currency exchange contracts, foreign securities utilizing international fair value pricing, broker-quoted securities, fair valued securities)

Level 3

Significant unobservable inputs, including the Fund's own assumptions used to determine the fair value of investments. (Examples: broker-quoted securities, fair valued securities)

(continues) NQ-DEX [8/15] 10/15 (15216) 19

(Unaudited)

2. Investments (continued)

Level 3 investments are valued using significant unobservable inputs. The Fund may also use an income-based valuation approach in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Valuations may also be based upon current market prices of securities that are comparable in coupon, rating, maturity, and industry. The derived value of a Level 3 investment may not represent the value which is received upon disposition and this could impact the results of operations.

The following table summarizes the valuation of the Fund's investments by fair value hierarchy levels as of Aug. 31, 2015:

Securities	Level 1	Level 2	Level 3	Total
Agency, Asset-Backed and Mortgage-Backed Securities	\$	\$ 1,004,424	\$	\$ 1,004,424
Corporate Debt		107,745,987		107,745,987
Foreign Debt		10,716,580		10,716,580

Short-Term Investments		1,449,122		1,449,122
Total Value of Securities	\$ 62,413,376	\$ 201,979,997	\$ 59,904	\$ 264,453,277
Foreign Currency Exchange Contracts	\$	\$ (1,225)	\$	\$ (1,225)
Swap Contract		318		318

The securities that have been deemed worthless on the Schedule of investments are considered to be Level 3 investments in this table.

¹Security type is valued across multiple levels. Level 1 investments represent exchange-traded investments, Level 2 investments represent investments with observable inputs or matrix-priced investments, and Level 3 investments represent investments without observable inputs. The amounts attributed to Level 1 investments, Level 2 investments, and Level 3 investments represent the following percentages of the total market value of these security types:

	Level 1	Level 2	Level 3	Total
Convertible Preferred Stock	92.81%	6.63%	0.56%	100.00%
Preferred Stock	28.61%	71.39%		100.00%

As a result of utilizing international fair value pricing at Aug. 31, 2015, the majority of the Fund's common stock was categorized as Level 2.

During the period ended Aug. 31, 2015, there were no transfers between Level 1 investments, Level 2 investments, or Level 3 investments that had a significant impact to the Fund. This does not include transfers between Level 1 investments and Level 2 investments due to the Fund utilizing international fair value pricing during the period. In accordance with the fair valuation procedures described in Note 1, international fair value pricing of securities in the Fund occurs when market volatility exceeds an established rolling threshold. If the threshold is exceeded on a given date, then prices of international securities (those that traded on exchanges that close at a different time than the time that the Fund's net asset value is determined) are established using a separate pricing feed from a third party vendor designed to establish a price for each such security as of the time that the Fund's net asset value is determined. Further, international fair value pricing uses other observable market-based inputs in place of the closing exchange price due to the events occurring after the close of the exchange or market on which the investment is principally traded, causing a change in classification between levels.

A reconciliation of Level 3 investments is presented when the Fund has a significant amount of Level 3 investments at the beginning, interim, or end of the period in relation to net assets. Management has determined not to provide additional disclosure on Level 3 inputs since the Level 3 investments are not considered significant to the Fund's net assets at the end of the period.

3. Subsequent Events

Management has determined that no material events or transactions occurred subsequent to Aug. 31, 2015 that would require recognition or disclosure in the Fund's Schedule of investments.

Item 2. Controls and Procedures.

The registrant's principal executive officer and principal financial officer have evaluated the registrant's disclosure controls and procedures within 90 days of the filing of this report and have concluded that they are effective in providing reasonable assurance that the information required to be disclosed by the registrant in its reports or statements filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

There were no significant changes in the registrant's internal control over financial reporting that occurred during the registrant's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 3. Exhibits.

File as exhibits as part of this Form a separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Act (17 CFR 270.30a-2(a)), exactly as set forth below:
