PLANDAI BIOTECHNOLOGY, INC.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2013**

(UNAUDITED)

NOTE 1 - NATURE OF OPERATIONS AND GOING CONCERN

Plandai Biotechnology, Inc.'s (the "Company" or "Plandai") consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. The financial statements do not include any adjustment relating to recoverability and classification of recorded amounts of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

The Company's continued existence is dependent upon its ability to continue to execute its operating plan and to obtain additional debt or equity financing. There can be no assurance the necessary debt or equity financing will be available, or will be available on terms acceptable to the Company.

Plandai and its subsidiaries focus on the production of proprietary botanical extracts for the nutraceutical and pharmaceutical industries. The company grows much of the live plant material used in its products on a 3,000 hectare estate it operates under a 49-year notarial lease in the Mpumalanga region of South Africa. Plandai uses a patented extraction process that is designed to yield highly bioavailable products of pharmaceutical-grade purity. The first product to be brought to market is Phytofare™ Catechin Complex, a green-tea derived extract that has multiple potential wellness applications. The company's principle holdings consist of land, farms and infrastructure in South Africa. The Company is actively pursuing additional financing and has had discussions with various third parties, although no firm commitments have been obtained. Management believes these efforts will generate sufficient cash flows from future operations to pay the Company's obligations and realize positive cash flow. There is no assurance any of these transactions will occur.

These financial statements should be read in conjunction with the Company's annual report for the year ended June 30, 2013 previously filed on Form 10-K. In management's opinion, all adjustments necessary for a fair statement of the results for the interim periods have been made. All adjustments made were of a normal recurring nature.

Organization

On November 17, 2011, the Company, through its wholly-owned subsidiary, Plandaí Biotechnologies, Inc., consummated a share exchange with Global Energy Solutions, Inc. (“GES”), an Irish corporation. Under the terms of the share exchange, GES received 76,000,000 shares of the Company’s common stock that had been previously issued to Plandaí in exchange for 100% of the issued and outstanding capital of GES. Concurrent with the share exchange, the Company sold its subsidiary, Diamond Ranch, Ltd., together with its wholly-owned subsidiary, Executive Seafood, Inc., to a former officer and director of Diamond Ranch. Under the terms of the sale, the purchasers assumed all associated debt as consideration. During the three months ended September 30, 2011 and through the date of the share exchange, Diamond Ranch, Ltd. and Executive Seafood, Inc. had negligible revenues from operations, generated a net loss of \$126,000, and as of September 30, 2011, liabilities exceeded assets by over \$5,000,000. The Company subsequently changed its name to Plandaí Biotechnology, Inc. and dissolved GES.

For accounting purposes, the share exchange has been treated as a reverse merger since the acquired entity now forms the basis for operations and the transaction resulted in a change in control, with the acquired company electing to become the successor issuer for reporting purposes. The accompanying financial statements have been prepared to reflect the assets, liabilities and operations of Plandaí Biotechnology, Inc. exclusive of Diamond Ranch Foods since the acquisition and sale were executed simultaneously. For equity purposes, the shares issued to acquire GES (76,000,000 shares) have been shown to be issued and outstanding since inception, with the previous balance outstanding (25,415,300 shares Common) treated as a new issuance as of the date of the share exchange. The additional paid-in capital and retained deficit shown are those of Plandaí and its subsidiary operations.

In management’s opinion, all adjustments necessary for a fair statement of the results for the presented periods have been made. All adjustments made were of a normal recurring nature.

Basis of Presentation

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The accompanying financial statements represent the results of operations for the three months ended September 30, 2013.

NOTE 2 – SUMMARY OF ACCOUNTING POLICIES

This summary of accounting policies for Plandai Biotechnology, Inc. and its wholly-owned subsidiaries, is presented to assist in understanding the Company's financial statements. The accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

Use of Estimates

The financial statements are prepared in conformity with accounting principles generally accepted in the United States of America. In preparing the financial statements, management is required to make estimates and assumptions that effect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the balance sheet and statement of operations for the year then ended. Actual results may differ from these estimates. Estimates are used when accounting for allowance for bad debts, collect ability of accounts receivable, amounts due to service providers, depreciation and litigation contingencies, among others.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents to the extent the funds are not being held for investment purposes.

Revenue recognition

The Company presently derives its revenue from the sale of timber and agricultural products produced on its farm and tea estate holdings in South Africa. Revenue is recognized when the product is delivered to the customer. Once production of the Company's Phytofare™ botanical extracts commence in 2014, revenues will be recognized when

product is shipped.

Concentration of Credit Risk

The Company has no significant off-balance sheet concentrations of credit risk such as foreign exchange contracts, options contracts or other foreign hedging arrangements.

Property and equipment

Property and equipment are stated at cost less accumulated depreciation and amortization. The Company provides for depreciation and amortization using the straight-line method over the estimated useful lives of the related assets, which range from three to five years. Maintenance and repair costs are expensed as they are incurred while renewals and improvements which extend the useful life of an asset are capitalized. At the time of retirement or disposal of property and equipment, the cost and related accumulated depreciation and amortization are removed from the accounts and any resulting gain or loss is reflected in the results of operations.

Impairment of Long-Lived Assets

In accordance with ASC Topic 360, formerly SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be fully recoverable. The assessment of possible impairment is based on the Company's ability to recover the carrying value of its asset based on estimates of its undiscounted future cash flows. If these estimated future cash flows are less than the carrying value of the asset, an impairment charge is recognized for the difference between the asset's estimated fair value and its carrying value. As of the date of these financial statements, the Company is not aware of any items or events that would cause it to adjust the recorded value of its long-lived assets for impairment.

Earnings per Share

Basic gain or loss per share has been computed by dividing the loss for the period applicable to the common stockholders by the weighted average number of common shares outstanding during the years. At September 30, 2013, the Company had three convertible debentures outstanding that if-converted would result in 786,229 new common shares being issued. At June 30, 2013, the Company had one convertible debenture outstanding that if-converted would result in 340,984 new common shares being issued.

Income Taxes

The Company accounts for income taxes under ASC Topic 740, formerly SFAS No. 109, *Accounting for Income Taxes*, as clarified by ASC Topic 740, formerly FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, (“FIN No. 48”). Deferred tax assets and liabilities are determined based upon differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. A valuation allowance is provided when it is more likely than not that some portion or all of a deferred tax asset will not be realized.

The Company adopted the provisions of ASC Topic 740, formerly FIN No. 48 on January 1, 2007. Previously, the Company had accounted for tax contingencies in accordance with Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*. As required by ASC Topic 450, formerly FIN No. 48, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority. At the adoption date, the Company applied ASC Topic 740, formerly FIN No. 48 to all tax positions for which the statute of limitations remained open. As a result of the implementation of ASC Topic 740, formerly FIN No. 48, the Company did not recognize any change in the liability for unrecognized tax benefits.

The Company is subject to income taxes in the U.S. federal jurisdiction and that of South Africa. Tax regulations within each jurisdiction are subject to the interpretation of the related tax laws and regulations and require significant judgment to apply. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for the years before April 1, 2007.

The Company is not currently under examination by any federal or state jurisdiction.

The Company's policy is to record tax-related interest and penalties as a component of operating expenses.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Emerging Growth Company

We qualify as an "emerging growth company" under the 2012 JOBS Act. Section 107 of the JOBS Act provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. As an emerging growth company, we can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. We have elected to take advantage of the benefits of this extended transition period.

Fair Value of Financial Instruments

Fair value of certain of the Company's financial instruments including cash and cash equivalents, accounts receivable, account payable, accrued expenses, notes payables, and other accrued liabilities approximate cost because of their short maturities. The Company measures and reports fair value in accordance with ASC 820, "Fair Value Measurements and Disclosure" defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles and expands disclosures about fair value investments.

Fair value, as defined in ASC 820, is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of an asset should reflect its highest and best use by market participants, principal (or most advantageous) markets, and an in-use or an in-exchange valuation premise. The fair value of a liability should reflect the risk of nonperformance, which includes, among other things, the Company's credit risk.

Valuation techniques are generally classified into three categories: the market approach; the income approach; and the cost approach. The selection and application of one or more of the techniques may require significant judgment and are primarily dependent upon the characteristics of the asset or liability, and the quality and availability of inputs. Valuation techniques used to measure fair value under ASC 820 must maximize the use of observable inputs and minimize the use of unobservable inputs. ASC 820 also provides fair value hierarchy for inputs and resulting measurement as follows:

Level 1

Quoted prices (unadjusted) in active markets that are accessible at the measurement date for identical assets or liabilities; The Company values its available for sale securities using Level 1.

Level 2

Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3

Unobservable inputs for the asset or liability that are supported by little or no market activity and that are significant to the fair values.

Fair value measurements are required to be disclosed by the Level within the fair value hierarchy in which the fair value measurements in their entirety fall. Fair value measurements using significant unobservable inputs (in Level 3 measurements) are subject to expanded disclosure requirements including a reconciliation of the beginning and ending balances, separately presenting changes during the period attributable to the following: (i) total gains or losses for the

period (realized and unrealized), segregating those gains or losses included in earnings, and a description of where those gains or losses included in earnings are reported in the statement of income.

Advertising

Advertising costs are expensed as incurred.

Principles of Consolidation

Plandai Biotechnology, Inc. and its subsidiaries, are encompassed in the following entities, which have been consolidated in the accompanying financial statements:

Global Energy Solutions, Ltd.	100% owned by Plandai Biotechnology, Inc.
Dunn Roman Holdings—Africa, Ltd	82% owned by Plandai Biotechnology, Inc.
Breakwood Trading 22 (Pty) Ltd.	74% owned by Dunn Roman Holdings-Africa
Green Gold Biotechnologies (Pty) Ltd.	74% owned by Dunn Roman Holdings-Africa

During the year ended June 30, 2013, the Company determined that the entity, Global Energy Solutions, was unnecessary to operations and decided to dissolve that corporation, resulting in the stock of Dunn Roman Holdings-Africa being held directly by Plandai. All liabilities were either satisfied or forgiven and all bank accounts closed. There were no operations in Global Energy Solutions during the periods presented. Global Energy Solutions was officially dissolved during the year ended June 30, 2013.

All intercompany balances have been eliminated in consolidation.

Straight-lining of Lease Obligation

Plandai's subsidiaries have two long-term, material leases which either have escalating terms or included several months of "free" rent, including the 49-year notarial lease for the Senteeko Tea Estate. In accordance with US Generally Accepted Accounting Principles, the Company has calculated a straight-line monthly cost on the leases and recorded the corresponding difference between the amount actually paid and the amount calculated as a Capitalized Lease Obligation. As of September 30, 2013, the amount of this deferred liability was \$1,109,126.

Recent Accounting Pronouncements

Recent accounting pronouncements that the Company has adopted or that will be required to adopt in the future are summarized below.

In May 2011, the FASB issued ASC update No. 2011-04, *Fair Value Measurement (Topic 820), Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The amendments in this update result in common fair value measurement and disclosure requirements in US generally accepted accounting principles ("U.S. GAAP") and International Financial Reporting Standards ("IFRS"). Consequently, the amendments converge the fair value measurement guidance in U.S. GAAP and IFRS. Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. The amendments in this update that change a particular principle or requirement for measuring fair value or disclosing information about fair value measurements include the following: 1) measuring the fair value of financial instruments that are managed within a portfolio, 2) application of premiums and discounts in a fair value measurement, and 3) additional disclosures about fair value measurements. The amendments in this update are to be applied prospectively and are effective during interim and annual periods beginning after December 15, 2011. The Company does not believe that adoption of this update will have a material impact on its financial statements.

In June 2011, the FASB issued ASC update No. 2011-05, *Comprehensive Income (Topic 220), Presentation of Comprehensive Income*. The FASB decided to eliminate the option to present components of other comprehensive income as part of the statement of changes in stockholders' equity, among other amendments in this update. The amendments require that all non-owner changes in stockholder's equity be presented in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, the Company is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The statement of other comprehensive income should immediately follow the statement of net income and include the components of other comprehensive income and total for other comprehensive income, along with a total for comprehensive income.

The entity is also required to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of comprehensive income are presented. The amendments in this update should be applied retrospectively, and are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011.

In September 2011, the FASB issued an accounting update that gives companies the option to make a qualitative evaluation about the likelihood of goodwill impairment. Companies will be required to perform the two-step impairment test only if it concludes that the fair value of a reporting unit is more likely than not less than its carrying value. The accounting update is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. We did not early adopt this guidance and do not believe our adoption of the new guidance in 2012 will have a material impact on our consolidated financial position, results of operations or cash flows.

In December 2011, the FASB issued an accounting update that will add new disclosure requirements for entities with recognized financial instruments that are appropriately offset on the balance sheet or that are subject to a master netting arrangement. The accounting update is effective for periods beginning on or after January 1, 2013 with retrospective presentation. We do not believe this guidance will have a material impact on our presentation and disclosure.

In December 2010, the FASB (Financial Accounting Standards Board) issued Accounting Standards Update 2010-29 (ASU 2010-29), *Business Combinations (Topic 805) – Disclosure of Supplementary Pro Forma Information for Business Combinations*. This Accounting Standards Update requires a public entity to disclose pro forma information for business combinations that occurred in the current reporting period. The disclosures include pro forma revenue and earnings of the combined entity for the current reporting period as though the acquisition date for all business combinations that occurred during the year had been as of the beginning of the annual reporting period. If comparative financial statements are presented, the pro forma revenue and earnings of the combined entity for the comparable prior reporting period should be reported as though the acquisition date for all business combinations that occurred during the current year had been as of the beginning of the comparable prior annual reporting period. The amendments in this Update affect any public entity as defined by Topic 805 that enters into business combinations that are material on an individual or aggregate basis. The amendments in this Update are effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. The adoption of ASU 2010-29 did not have a material effect on its financial position, results of operations or cash flows.

In February 2010, the FASB issued ASU No. 2010-09 *Subsequent Events (ASC Topic 855) - Amendments to Certain Recognition and Disclosure Requirements* (ASU 2010-09). ASU No. 2010-09 requires an entity that is an SEC filer to evaluate subsequent events through the date that the financial statements are issued and removes the requirement for an SEC filer to disclose a date, in both issued and revised financial statements, through which the filer had evaluated subsequent events. The adoption did not have an impact on the Company's financial position, results of operations or cash flows.

Financial Accounting Statement No. 52, *Foreign Currency Translation (FAS 52)*, sets forth the appropriate accounting treatment under U.S. GAAP for companies that consolidate the results of foreign operations denominated in local currencies. FAS 52 requires that all assets and liabilities be translated at the current spot rate at the date of translation. Equity items, other than retained earnings, are translated at the spot rates in effect on each related transaction date. Retained earnings are translated at the weighted-average rate for the relevant year and income statement items are translated at the average rate for the period, except where specific identification is practicable. The resulting adjustment is not recognized in current earnings, but rather as a component of other comprehensive income. The Company adopted FAS 52 in the year ended June 30, 2012 and has chosen US dollars as the local currency. The effect of adopting FAS 52 have been reflected in the accompanying consolidated financial statements.

Statement of Financial Accounting Standards No. 35, *Capitalization of Interest Costs*, establishes standards for capitalizing interest cost as part of the historical cost of acquiring certain assets. To qualify for interest capitalization, assets must require a period of time to get them ready for their intended use. In the year Ended June 30, 2012, the Company borrowed funds to commence the construction of a manufacturing facility which is expected to be completed during 2013. The company accordingly adopted FAS 35 and capitalized interest associated with the borrowing.

Statement of Financial Accounting Standards No. 160, *Non-controlling Interests in Consolidated Financial Statements*, establishes standards for accounting for noncontrolling interest, sometimes called a minority interest, which is that portion of equity in a subsidiary not attributable, directly or indirectly, to a parent. FAS 160 requires that

the minority portion of equity and net income/loss from operations of consolidated entities be reflected in the financial statements. The Company previously adopted FAS 160 and has reflected the impact in the accompanying consolidated financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA, and the SEC did not or are not believed by management to have a material impact on the Company's present or future financial statements.

NOTE 3 – RECEIVABLE FROM RELATED PARTY

As of September 30, 2013, the Company had advanced \$60,759 to a company affiliated to certain of our officers and directors.

NOTE 4 –LOANS FROM RELATED PARTIES

As of September 30, 2013, the Company has outstanding loans to various related parties in the amount of \$503,269. These loans were provided for short-term working capital purposes, bear interest at rates between 8-10%, and mature on January 1, 2014.

NOTE 5 - LINE OF CREDIT

During the year ended June 30, 2012, the company entered into a line of credit agreement for \$500,000 which was later increased to \$1,000,000. The line of credit matures on January 5, 2014 and bears interest at the rate of ten percent (10%) per annum. As of September 30, 2013, the balance drawn down on the credit line was \$777,503 and accrued interest was \$115,852. The company is in negotiations to convert the balance outstanding plus accrued interest into common stock and anticipates consummating a resolution to this debt prior to the due date.

NOTE 6 – DEBENTURE PAYABLE

In May 2013, the company issued an 8% interest rate convertible debenture in the amount of \$103,500 which becomes due and payable in February 2014. The debenture is convertible into common stock of the company at a discount of 42% off the market price of the company's common stock six months after issuance (November 2013). The company repaid the debenture in full on November 11, 2013.

On August 20, 2013, the Company executed two convertible promissory notes totaling \$550,000. The notes bear interest at the rate of 8% per annum and become due and payable in six months from the date of issuance. During the first 90 days from issuance, the notes are repayable without incurring any interest charges. As of September 30, 2013, the company had been advanced \$125,000 against the two notes. When the notes become payable, the holder has the option of converting the unpaid balance of any advances into common stock of the company at a discount of 40% off the then current price per share. Management has made arrangements for these notes to be repaid prior to conversion.

The company has recorded a derivative liability of \$273,264 representing the estimate value of the shares over and above the amount of debentures that would be issued on conversion.

NOTE 7 – LONG-TERM DEBT

In June 2012, the Company, through the majority-owned subsidiaries of Dunn Roman Holdings, Inc., executed final loan documents on a 100 million Rand (approx. \$13 million USD) financing with the Land and Agriculture Bank of South Africa. The total loan is comprised of multiple agreements totaling, between Green Gold Biotechnologies (Pty)

Ltd. and Breakwood Trading 22(Pty) Ltd., 100 million rand. The loans all bear interest at the rate of prime plus 0.5% per annum and are all due in seven years. In addition, the loans have a 25-month “holiday” in which no payments or interest are due until 25 months after the first drawn down of funds. The loans are collateralized by the assets and operations, including the Senteeko lease, agriculture production and receivables of Dunn Roman Holdings, which is the African operating arm of Plandaí. In addition, Dunn Roman Holdings was required to grant a 15% profit share agreement to the Land Bank which extends through the duration of the loan agreements (7 years unless pre-paid). The profit share agreement extends only to profits generated by Dunn Roman Holdings exclusive of operations of Plandaí and outside of South Africa. In connection with this financing arrangement, the Land and Agriculture Bank of South Africa required the Company to maintain the following loan covenants: debt to equity of 1.5:1, interest coverage ratio of 1.5:1, and security coverage ratio of 1:1. However, the Company is not currently complying with these loan covenants, because the Land and Agriculture Bank of South Africa has temporarily released it from such covenants, until such time that the equipment purchased with the borrowed funds is placed in revenue producing service.

As of September 30, 2013, a total of \$8,154,904 had been drawn down against the loans by Green Gold Biotechnologies (Pty) Ltd., which was used to purchased fixed assets that will be employed in South Africa to produce the company’s botanical extracts. Additionally, \$2,335,806 had been drawn down against the loans by Breakwood Trading22 (Pty) Ltd. to fund the rehabilitation of the Senteeko Tea Estate, including the repair of roads, bridges, and onsite worker housing, and the pruning, weeding and fertilizing of plantation.

During the year ended June 30, 2012, the Company issued 1,500,000 shares of restricted common stock to three individuals in exchange for shares of Dunn Roman Holdings stock which had been previously issued. The acquired Dunn Roman shares were then provided to thirds parties in order to comply with the BEE provisions associated with the loan from the Land Bank of South Africa, which required that 15% of Dunn Roman be black owned. The Company has therefore determined to treat the value of the shares issued to acquire the Dunn Roman stock (\$585,000) as a cost of securing the financing and recorded as a loan discount which will be amortized over the life of the loan (7 years) once payment of the loan commences in July 2014.

As of September 30, 2013, the loan balance was:

Loan Principle	\$10,490,711
Less: Discount	585,000
Net Loan per Books	\$9,905,711

NOTE 8 – CURRENCY ADJUSTMENT

The Company's principle operations are located in South Africa and the primary currency used is the South African Rand. Accordingly, the financial statements are first prepared in using Rand and then converted to US Dollars for reporting purposes, with the average conversion rate being used for income statement purposes and the closing exchange rate as of September 30, 2013 applied to the balance sheet. Differences resulting from the fluctuation in the exchange rate are recorded as an offset to equity in the balance sheet. As of September 30, 2013, the cumulative currency translation adjustments were \$167,711.

NOTE 9 – FIXED ASSETS

Fixed assets, stated at cost, less accumulated depreciation at September 30, 2013 consisted of the following:

September
30,
2013

Total Fixed Assets	\$8,480,680
Less: Accumulated Depreciation	(165,076)
Fixed Assets, net	\$8,315,604

Depreciation expense

Depreciation expense for the three months ended September 30, 2013 was \$50,055.

NOTE 10 – COMMON STOCK

During the three months ended September 30, 2013, the Company issued a total of 50,000 shares of restricted common stock in exchange for proceeds of \$15,000.

NOTE 11 – NON-CONTROLLING INTEREST

Plandai owns 82% of Dunn Roman Holdings—Africa, which in turn owns 74% each of Breakwood Trading 22 (Pty, Ltd. and Green Gold Biotechnologies (Pty), Ltd., in order to be compliant with the Black Economic Empowerment rules imposed by the South African Land Bank. While the Company, under the Equity Method of Accounting, is required to consolidate 100% of the operations of its majority-owned subsidiaries, that portion of subsidiary net equity attributable to the minority ownership, together with an allocated portion of net income or net loss incurred by the subsidiaries, must be reflected on the consolidated financial statements. On the balance sheet, minority interest has been shown in the Equity Section, separated from the equity of Plandai, while on the income statement, the non-controlling shareholder allocation of net loss has been shown in the Consolidated Statement of Operations.

NOTE 12 – CAPITALIZED LEASE OBLIGATIONS

In February 2012, the Company entered into a long-term (49 year) lease of tea, avocado, macadamia and timber plantation estates totaling roughly eight thousand acres in South Africa. Under the terms of the lease, the Company is required to pay annual rent of R250,000 (\$30,000) plus an annual dividend of 26% of net income generated from the use of the property with a R500,000 (\$60,000) annual minimum dividend. The first payment of R20,883 (\$2,610) was due April 2012, but by mutual agreement this payment was extended until funding is received under the loan from the Land Bank of South Africa. On March 1, 2012, the Company entered into a 10 year lease for office space for its subsidiary Dunn Roman Holdings. Under the terms of the lease, payments are \$2,500 a month.

Both of these leases either have escalating terms or included several months of “free” rent, including the 49-year notarial lease for the Senteeko Tea Estate. In accordance with US Generally Accepted Accounting Principles, the Company has calculated a straight-line monthly cost on the leases and recorded the corresponding difference between the amount actually paid and the amount calculated as a Capitalized Lease Obligation. As of September 30, 2013, the amount of this deferred liability was \$1,109,126.

NOTE 13 – RELATED PARTY TRANSACTION

In addition to the loans payable and receivables as discussed above, the Company had the following related party transactions during the quarter ended September 30, 2013.

Office Lease

The Company leases its South African Office space from a trust of which one of the beneficiaries serves on the Board of Directors of Dunn Roman Holding—Africa, Ltd., a subsidiary of the Company. The lease agreement calls for monthly payments of \$2,500. During the quarter ended September 30, 2013, a total of \$5,184 was paid in rent expense.

Compensation to Officers and Management

Pursuant to three employment agreements executed on March 1, 2013 by the Company with two of its officers and one manager, the Company is also obligated to issue 4,000,000 common shares at the end of each completed year for services rendered to the Company. The Company valued the 4,000,000 shares at the closing stock price on the date of

the executed agreement which was \$0.06 per share. At September 30, 2013, the Company accrued compensation expense for services completed in the amount of \$261,600, which has been recorded as Stock Subscription Payable.

NOTE 14 – SUBSEQUENT EVENTS

Management was evaluated subsequent events pursuant to the requirements of ASC Topic 855 and has determined that besides listed below, no material subsequent events exist through the date of this filing.

1. On November 11, 2013, the company paid \$143,000 to satisfy its obligation under a convertible debenture issued in May 2013.
2. In November 2013, the company issued a non-convertible promissory note to an unrelated third party in the amount of \$250,000. The note is due November 1, 2014 and earns interest at 6% per annum.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This statement includes projections of future results and "forward looking statements" as that term is defined in Section 27A of the Securities Act of 1933 as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934 as amended (the "Exchange Act"). All statements that are included in this Quarterly Report, other than statements of historical fact, are forward looking statements. Although management believes that the expectations reflected in these forward looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct.

BUSINESS

Plandai Biotechnology, Inc., (the "Company") through its recent acquisition of Global Energy Solutions, Ltd. and its subsidiaries, focuses on the farming of whole fruits, vegetables and live plant material and the production of proprietary functional foods and botanical extracts for the health and wellness industry. Its principle holdings consist of land, farms and infrastructure in South Africa.

The Company was incorporated, as Jerry's Inc., in the State of Florida on November 30, 1942. The company catered airline flights and operated coffee shops, lounges and gift shops at airports and other facilities located in Florida, Alabama and Georgia. The company's airline catering services included the preparation of meals in kitchens located at, or adjacent to, airports and the distribution of meals and beverages for service on commercial airline flights. The company also provided certain ancillary services, including, among others, the preparation of beverage service carts, the unloading and cleaning of plates, utensils and other accessories arriving on incoming aircraft, and the inventory management and storage of airline-owned dining service equipment. In March of 2004 we moved our domicile to Nevada and changed our name to Diamond Ranch Foods, Ltd. Diamond Ranch Foods, Ltd. was engaged in the meat processing and distribution industry. Operations consisted of packing, processing, custom meat cutting, portion controlled meats, private labeling, and distribution of our products to a diversified customer base, including, but not limited to; in-home food service businesses, retailers, hotels, restaurants and institutions, deli and catering operators, and industry suppliers. On November 17, 2011, the Company, through its wholly-owned subsidiary, Plandai Biotechnologies, Inc. consummated a share exchange with Global Energy Solutions Corporation Limited, an Irish corporation. Under the terms of the Share Exchange, GES received 76,000,000 shares of Diamond Ranch that had been previously issued to Plandai Biotechnologies, Inc. in exchange for 100% of the issued and outstanding capital of GES. On November 21, 2011, the Company filed an amendment to the articles of incorporation to change the name of the company to Plandai Biotechnology, Inc.

We will continue to seek to raise additional capital through the sale of common stock to fund the expansion of our company. There can be no assurance that we will be successful in raising the capital required and without additional funds we would be unable to expand our plant, acquire other companies, or further implement our business plan. In April 2012, through our subsidiary companies, we secured a 100 million Rand (approximately \$13 million) financing with the Land and Agriculture Bank of South Africa which will be used to build infrastructure and further operations.

PRODUCTS AND SERVICES

Plandai Biotechnologies has a proprietary technology that extracts a high level of bio-available compounds from organic matter including green tea leaves and most other organic materials. Numerous documented scientific studies have been conducted over the past ten years using this technology that releases bioavailable antioxidants and other phytonutrients in form the body can easily absorb. The Company intends to use its notarial leases to focuses on the farming of whole fruits, vegetables and live plant material and the production of Phytofare™ functional foods and botanical extracts for the health and wellness industry using its proprietary extraction technology.

The company is presently developing for market two unique extracts: Phytofare™ Green Tea Catechin Extract and Phytofare™ Citrus Limonoid Glycoside Complex.

COMPETITION

The Company faces competition from a variety of sources. There are several large producers of farm products including green tea and there are numerous companies that develop and market nutraceutical products that include bio-available compounds including those from green tea extract. Many of these competitors benefit from established distribution, market-ready products, and greater levels of financing. Plandaí intends to compete by producing higher quality and higher concentration extracts, producing at lower costs, and controlling a vertically integrated market that includes all stages from farming through production and marketing.

CUSTOMERS

Plandaí will market to end users as well as other nutraceutical companies that require high-quality bio-available extracts for their products. In addition, the Company anticipates having surplus farm products including avocado, and macadamia nuts.

SALES

For the three months ended September 30, 2013, revenues were \$226,953 compared to revenues of \$90,785 for the quarter ended September 30, 2012. Sales consisted of avocados, macadamia nuts and timber from the company's tea estate in South Africa. The company also recorded revenues of \$196,906 from the sale of a license agreement. Sales of Phytofare™ extracts are not expected to commence until Summer 2013, when the commercial-grade extraction facility is completed.

Cost of sales for the quarter ended September 30, 2013 was \$135,397, which consists of expenses incurred with managing and restoring the Senteeko Tea Estate. There were no such costs associated in the prior year as the company had not yet begun rehabilitating the property and therefore no associated farming costs. A third party harvested the fruit and timber and paid the company a fixed price per unit.

EXPENSES

Our total expenses for the three months ended September 30, 2013 were \$537,907 compared to \$496,146 for the same period of the prior year. Expenses in 2013 consisted primarily of salaries, rent, professional services and general and administrative expenses. Expenses were comparable from year to year with the exception of rent expense, which did not exist in 2012, and a reduction in professional services from 2012 to 2013.

LIQUIDITY AND CAPITAL RESOURCES

For the three months ended September 30, 2013, the Company's cash used in operating activities totaled \$581,340, which was primarily attributable to a loss from operations, and cash used in investing activities was \$440,748, which consisted of the purchase of fixed assets to be used in production. Cash provided by financing activities was \$898,758, generated by draw downs on the loan from the Land and Agriculture Bank of South Africa and borrowings of \$125,000 under convertible notes. As of September 30, 2013, the Company had current assets of \$453,832 compared to current liabilities of \$819,731.

PLAN OF OPERATION

The Company's long-term existence is dependent upon our ability to execute our operating plan and to obtain additional debt or equity financing to fund payment of obligations and provide working capital for operations. In April 2012, the Company through majority-owned subsidiaries of Dunn Roman Holdings Africa (Pty) Limited, executed final loan documents on a 100 million Rand (approx. \$13 million USD) financing with the Land and Agriculture Bank of South Africa and has begun rehabilitating the Senteeko Tea Estate so that it can begin yielding green tea feedstock by the end of 2013. The company has also commenced construction of the factory and associated equipment necessary to begin the extraction process on live botanical matter, including green tea and citrus, with a goal to have the factory completed by the end of 2013. Once the facility is tested and operational, the company will commence processing green tea material for its Phytofare™ Catechin Complex in the first quarter of 2014.

CRITICAL ACCOUNTING POLICIES

The preparation of our financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and judgments that affect our reported assets, liabilities, revenues, and expenses, and the disclosure of contingent assets and liabilities. We base our estimates and judgments on historical experience and on various other assumptions we believe to be reasonable under the circumstances. Future events, however, may differ markedly from our current expectations and assumptions. While there are a number of significant accounting policies affecting our financial statements, we believe the following critical accounting policies involve the most complex, difficult and subjective estimates and judgments.

Revenue recognition

The Company derives its revenue from the production and sale of farm goods, raw materials and the sale of bioavailable extracts in both raw material and finished product form. Revenues are recognized when product is ordered and delivered. Product shipped on consignment is not counted in revenue until sold.

Intangible and Long-Lived Assets

We follow Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 360, “Property Plant and Equipment”, which establishes a “primary asset” approach to determine the cash flow estimation period for a group of assets and liabilities that represents the unit of accounting for a long lived asset to be held and used. Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

Goodwill is accounted for in accordance with ASC Topic 350, “Intangibles – Goodwill and Other”. We assess the impairment of long-lived assets, including goodwill and intangibles on an annual basis or whenever events or changes in circumstances indicate that the fair value is less than its carrying value. Factors that we consider important which could trigger an impairment review include poor economic performance relative to historical or projected future operating results, significant negative industry, economic or company specific trends, changes in the manner of our use of the assets or the plans for our business, market price of our common stock, and loss of key personnel. We have determined that there was no impairment of goodwill during 2013 or 2012. The share exchange did not result in the recording of goodwill and there is not currently any goodwill recorded.

Potential Derivative Instruments

We periodically assess our financial and equity instruments to determine if they require derivative accounting. Instruments which may potentially require derivative accounting are conversion features of debt and common stock equivalents in excess of available authorized common shares.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Non-Controlling Interest

Plandai owns 82% of Dunn Roman Holdings—Africa, which in turn owns 74% each of Breakwood Trading 22 (Pty, Ltd. and Green Gold Biotechnologies (Pty), Ltd., in order to be compliant with the Black Economic Empowerment rules imposed by the South African Land Bank. While the Company, under the Equity Method of Accounting, is required to consolidate 100% of the operations of its majority-owned subsidiaries, that portion of subsidiary net equity attributable to the minority ownership, together with an allocated portion of net income or net loss incurred by the subsidiaries, must be reflected on the consolidated financial statements. On the balance sheet, minority interest has been shown in the Equity Section, separated from the equity of Plandai, while on the income statement, the non-controlling shareholder allocation of net loss has been shown in the Consolidated Statement of Operations.

Currency Translation Adjustment

18

The Company maintains significant operations in South Africa, where the currency is the Rand. The subsidiary financial statements are therefore converted into US dollars prior to consolidation with the parent entity, Plandai Biotechnology, Inc. US GAAP requires that the weighted average exchange rate be applied to the foreign income statements and that the closing exchange rate as of the period end date be applied to the balance sheet. The cumulative foreign currency adjustment is included in the equity section of the balance sheet.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK RISKS RELATED TO OUR BUSINESS

We Have Historically Lost Money and Losses May Continue in the Future

We have historically lost money. The loss for the fiscal year ended June 30, 2013 was \$2,188,005 and future losses are likely to occur. Accordingly, we may experience significant liquidity and cash flow problems if we are not able to raise additional capital as needed and on acceptable terms. No assurances can be given we will be successful in reaching or maintaining profitable operations.

We Will Need to Raise Additional Capital to Finance Operations

Our operations have relied almost entirely on external financing to fund our operations. Such financing has historically come from a combination of borrowings and from the sale of common stock and assets to third parties. We will need to raise additional capital to fund our anticipated operating expenses and future expansion. Among other things, external financing will be required to cover our operating costs. We cannot assure you that financing whether from external sources or related parties will be available if needed or on favorable terms. The sale of our common stock to raise capital may cause dilution to our existing shareholders. Our inability to obtain adequate financing will result in the need to curtail business operations. Any of these events would be materially harmful to our business and may result in a lower stock price.

There is Substantial Doubt About Our Ability to Continue as a Going Concern Due to Recurring Losses and Working Capital Shortages, Which Means that We May Not Be Able to Continue Operations Unless We Obtain Additional Funding

The report of our independent accountants on our June 30, 2013 financial statements include an explanatory paragraph indicating that there is substantial doubt about our ability to continue as a going concern due to recurring losses and working capital shortages. Our ability to continue as a going concern will be determined by our ability to obtain additional funding. Our financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Our Common Stock May Be Affected By Limited Trading Volume and May Fluctuate Significantly

There has been a limited public market for our common stock and there can be no assurance that an active trading market for our common stock will develop. As a result, this could adversely affect our shareholders' ability to sell our common stock in short time periods, or possibly at all. Our common stock has experienced, and is likely to experience in the future, significant price and volume fluctuations that could adversely affect the market price of our common stock without regard to our operating performance. In addition, we believe that factors such as quarterly fluctuations in our financial results and changes in the overall economy or the condition of the financial markets could cause the price of our common stock to fluctuate substantially. Substantial fluctuations in our stock price could significantly reduce the price of our stock.

There is no Assurance of Continued Public Trading Market and Being a Low Priced Security may Affect the Market Value of Our Stock

To date, there has been only a limited public market for our common stock. Our common stock is currently quoted on the OTCBB. As a result, an investor may find it difficult to dispose of, or to obtain accurate quotations as to the market value of our stock. Our stock is subject to the low-priced security or so called "penny stock" rules that impose additional sales practice requirements on broker-dealers who sell such securities. The Securities Enforcement and Penny Stock Reform Act of 1990 requires additional disclosure in connection with any trades involving a stock defined as a penny stock (generally, according to recent regulations adopted by the SEC, any equity security that has a market price of less than \$5.00 per share, subject to certain exceptions that we no longer meet). For example, brokers/dealers selling such securities must, prior to effecting the transaction, provide their customers with a document that discloses the risks of investing in such securities. Included in this document are the following:

- the bid and offer price quotes in and for the "penny stock," and the number of shares to which the quoted prices apply,
- the brokerage firm's compensation for the trade, and
- the compensation received by the brokerage firm's sales person for the trade.

In addition, the brokerage firm must send the investor:

- a monthly account statement that gives an estimate of the value of each "penny stock" in the investor's account, and
- a written statement of the investor's financial situation and investment goals.

If the person purchasing the securities is someone other than an accredited investor or an established customer of the broker/dealer, the broker/dealer must also approve the potential customer's account by obtaining information concerning the customer's financial situation, investment experience and investment objectives. The broker/dealer must also make a determination whether the transaction is suitable for the customer and whether the customer has sufficient knowledge and experience in financial matters to be reasonably expected to be capable of evaluating the risk of transactions in such securities. Accordingly, the Commission's rules may limit the number of potential purchasers of the shares of our common stock.

Resale restrictions on transferring "penny stocks" are sometimes imposed by some states, which may make transaction in our stock more difficult and may reduce the value of the investment. Various state securities laws pose restrictions on transferring "penny stocks" and as a result, investors in our common stock may have the ability to sell their shares of our common stock impaired.

There can be no assurance we will have market makers in our stock. If the number of market makers in our stock should decline, the liquidity of our common stock could be impaired, not only in the number of shares of common stock which could be bought and sold, but also through possible delays in the timing of transactions, and lower prices for the common stock than might otherwise prevail. Furthermore, the lack of market makers could result in persons being unable to buy or sell shares of the common stock on any secondary market.

We Could Fail to Retain or Attract Key Personnel

Our future success depends in significant part on the continued services of Roger Duffield, our President. We cannot assure you we would be able to find an appropriate replacement for key personnel. Any loss or interruption of our key personnel's services could adversely affect our ability to develop our business plan. We have no employment agreements or life insurance on Mr. Duffield.

Nevada Law and Our Charter May Inhibit a Takeover of Our Company That Stockholders May Consider Favorable

Provisions of Nevada law, such as its business combination statute, may have the effect of delaying, deferring or preventing a change in control of our company. As a result, these provisions could limit the price some investors might be willing to pay in the future for shares of our common stock.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") that are designed to be effective in providing reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission (the "SEC"), and that such information is accumulated and communicated to our management to allow timely decisions regarding required disclosure.

In designing and evaluating disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, not absolute assurance of achieving the desired objectives. Also, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. The design of any system of controls is based, in part, upon certain assumptions about the likelihood of future events and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of management, including our chief executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, management concluded that our disclosure controls and procedures are effective as of June 30, 2013 to cause the information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods prescribed by SEC, and that such information is accumulated and communicated to management, including our chief executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in our internal controls over financial reporting identified in connection with the requisite evaluation that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 1A. RISK FACTORS

This item is not applicable as we are currently considered a smaller reporting company.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

During the three months ended September 30, 2013, the Company sold 50,000 shares of unregistered, restricted common stock for proceeds of \$15,000. The shares were issued under an exemption from registration provided by Rule 144 of the Securities Act of 1933.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINING SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Plandai Biotechnology, Inc. includes herewith the following exhibits:

Exhibit	Exhibit Description	Filed herewith	Incorporated by reference
