(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2016
OR

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File number 000-50567

MVB Financial Corp.

(Exact name of registrant as specified in its charter)

West Virginia 20-0034461

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

301 Virginia Avenue

Fairmont, West Virginia 26554-2777

(Address of principal executive offices)

304-363-4800

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address, and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant has (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.)

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

As of November 3, 2016, the Registrant had 8,083,500 shares of common stock outstanding with a par value of \$1.00 per share.

MVB Financial Corp. and Subsidiary

Notes to Consolidated Financial Statements

Note 1 – Basis of Presentation

These consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) for interim financial information and with instructions to Form 10-Q. Accordingly, they do not include all the information and footnotes required by GAAP for annual year-end financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal, recurring nature. The consolidated balance sheet as of December 31, 2015 has been derived from audited financial statements included in the Company’s 2015 filing on Form 10-K. Operating results for the nine and three months ended September 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016.

The accounting and reporting policies of MVB Financial Corp. (“the Company” or “MVB”) and its subsidiary (“Subsidiary”), MVB Bank, Inc. (the “Bank”), the Bank’s subsidiaries Potomac Mortgage Group, Inc., which does business as MVB Mortgage (“MVB Mortgage”) and MVB Insurance, LLC (“MVB Insurance”), conform to accounting principles generally accepted in the United States and practices in the banking industry. The preparation of the financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Estimates, such as the allowance for loan losses, are based upon known facts and circumstances. Estimates are revised by management in the period such facts and circumstances change. Actual results could differ from those estimates. All significant inter-company accounts and transactions have been eliminated in consolidation.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the company’s December 31, 2015, Form 10-K filed with the Securities and Exchange Commission.

In certain instances, amounts reported in prior periods’ consolidated financial statements have been reclassified to conform to the current presentation. Specifically, a portion of the prior periods’ interest income and interest expense was classified as gain on loans held for sale and has been reclassified in the current presentation.

All financial information is reported on a continuing operations basis, unless otherwise noted. See Note 12 to the consolidated financial statements for a discussion regarding discontinued operations.

Information is presented in these notes with dollars expressed in thousands, unless otherwise noted or specified.

Note 2 – Recent Accounting Pronouncements

In August 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. The ASU provides guidance on the following eight specific cash flow issues: debt prepayment or debt extinguishment costs; settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies (COLIs) (including bank-owned life insurance policies (BOLIs)); distributions received from equity method investees; beneficial interests in securitization transactions; and separately identifiable cash flows and application of the predominance principle. For public companies, this update will be effective for fiscal years beginning after December 15, 2017, including all interim periods within those fiscal years. The Company is currently assessing the impact that this guidance will have on its consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The ASU requires that financial assets measured at amortized cost should be presented at the net amount expected to be collected, through an allowance for credit losses that is deducted from the amortized cost basis. The allowance for credit losses should reflect management’s current estimate of credit losses that are expected to occur over the remaining life of a financial asset. This is in contrast to existing guidance whereby credit losses generally are not recognized until they are incurred. For public companies, this update will be effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. The Company

is currently assessing the impact that this guidance will have on its consolidated financial statements. In March 2016, the FASB issued ASU 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting (“ASU 2016-09”), which is intended to simplify several aspects of the accounting for share-

Table of Contents

based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. ASU 2016-09 is effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early application is permitted. The Company is currently evaluating the impact of adopting the new guidance on its consolidated financial statements. In March 2016, the FASB issued ASU 2016-08, Revenue from Contracts with Customers (Topic 606), Principal versus Agent Considerations (Reporting Revenue versus Net) (“ASU 2016-08”), which clarifies the implementation guidance on principal versus agent considerations in the new revenue recognition standard. ASU 2016-08 clarifies how an entity should identify the unit of accounting (i.e. the specified good or service) for the principal versus agent evaluation and how it should apply the control principle to certain types of arrangements. The amendments in ASU 2016-08 affect the guidance in ASU 2014-09, Revenue from Contracts with Customers (Topic 606), and have similar effective dates and transition requirements (i.e., effective for annual reporting periods beginning after December 15, 2017, including interim reporting periods therein). The Company is currently evaluating the impact of adopting the new revenue recognition guidance on its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842) (“ASU 2016-02”). The FASB issued this ASU to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet by lessees for those leases classified as operating leases under current U.S. GAAP and disclosing key information about leasing arrangements. The amendments in this ASU are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2018. Early application of this ASU is permitted for all entities. The Company is currently evaluating the impact of adopting the new guidance on its consolidated financial statements.

In January 2016, the FASB issued ASU 2016-01, Accounting for Financial Instruments – Overall: Classification and Measurement (Subtopic 825-10) (“ASU 2016-01”). Amendments within ASU 2016-01 that relate to non-public entities have been excluded from this presentation. The amendments in this ASU 2016-01 address the following: 1) require equity investments to be measured at fair value with changes in fair value recognized in net income; 2) simplify the impairment assessment of equity investments without readily-determinable fair values by requiring a qualitative assessment to identify impairment; 3) eliminate the requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; 4) require entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; 5) require separate presentation in other comprehensive income for the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments; 6) require separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (that is, securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements; and 7) clarify that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. The amendments are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The Company is currently evaluating the provisions of this amendment to determine the potential impact the new standard will have on the Company's consolidated financial statements as it relates to accounting for financial instruments.

In September 2015, the FASB issued ASU 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments (“ASU 2015-16”). The amendments in ASU 2015-16 require that an acquirer recognize adjustments to estimated amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendments require that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the estimated amounts, calculated as if the accounting had been completed at the acquisition date. The amendments also require an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the estimated amounts had been recognized as of the acquisition date. The amendments in this ASU are effective for public business entities for fiscal years beginning

after December 15, 2015, including interim periods within those fiscal years. The amendments should be applied prospectively to adjustments to provisional amounts that occur after the effective date with earlier application permitted for financial statements that have not been issued. As such, the adoption of ASU 2015-15 did not have a material impact on the Company's consolidated financial statements.

In February 2015, the FASB issued ASU 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis ("ASU 2015-2"). The amendments modify the evaluation reporting organizations must perform to determine if certain legal entities should be consolidated as VIEs. Specifically, the amendments: (1) Modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities ("VIEs") or voting interest entities; (2) Eliminate the presumption that a general partner should consolidate a limited partnership; (3) Affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships; and (4) Provide a scope exception from consolidation guidance

Table of Contents

for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. ASU 2015-02 is effective for interim and annual reporting periods beginning after December 15, 2015. The Company has evaluated the provisions of ASU 2015-02 and determined the new standard has no impact on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-9”). These amendments affect any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (e.g. insurance contracts or lease contracts). This ASU will supersede the revenue recognition requirements in Topic 605, Revenue Recognition, and most industry-specific guidance, and creates a Topic 606, Revenue from Contracts with Customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. This ASU will be effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early adoption is not permitted. The ASU allows for either full retrospective or modified retrospective adoption. We are evaluating the transition method that will be elected and the potential effects of the adoption of the ASU on our consolidated financial statements.

Note 3 – Investments

Prior to the final determination of Basel III, investments were recorded as held-to-maturity due to the uncertainty of the capital treatment of available-for-sale investments. Upon the issuance of the final ruling, the Company opted out of the Other Comprehensive Income treatment of available-for-sale investments permitted under Basel III. Due to the change in capital treatment under the final ruling of Basel III, the Company’s purpose of recording investments as held-to-maturity changed; therefore, during the period ended March 31, 2016, the Company reclassified \$52.4 million, with unrealized holding gains of \$1.8 million, of the remaining held-to-maturity investments into available-for-sale investments.

There were no investment securities held-to-maturity at September 30, 2016.

Amortized cost and fair values of investment securities held-to-maturity at December 31, 2015, including gross unrealized gains and losses, are summarized as follows:

(Dollars in thousands)	Amortized	Unrealized	Unrealized	Fair
	Cost	Gain	Loss	Value
Municipal securities	\$ 52,859	\$ 1,699	\$ (88)	\$54,470
Total investment securities held-to-maturity	\$ 52,859	\$ 1,699	\$ (88)	\$54,470

Amortized cost and fair values of investment securities available-for-sale at September 30, 2016 are summarized as follows:

(Dollars in thousands)	Amortized	Unrealized	Unrealized	Fair
	Cost	Gain	Loss	Value
U.S. Agency securities	\$ 19,931	\$ 5	\$ (92)	\$19,844
U.S. Sponsored Mortgage-backed securities	55,786	188	(310)	55,664
Municipal securities	67,876	1,799	(125)	69,550
Total debt securities	143,593	1,992	(527)	145,058
Equity and other securities	6,948	165	—	7,113
Total investment securities available-for-sale	\$ 150,541	\$ 2,157	\$ (527)	\$152,171

Table of Contents

Amortized cost and fair values of investment securities available-for-sale at December 31, 2015 are summarized as follows:

(Dollars in thousands)	Amortized Cost	Unrealized Gain	Unrealized Loss	Fair Value
U.S. Agency securities	\$ 29,532	\$ —	\$ (181)	\$29,351
U.S. Sponsored Mortgage-backed securities	34,246	1	(533)	33,714
Municipal securities	1,775	23	—	1,798
Total debt securities	65,553	24	(714)	64,863
Equity and other securities	5,309	95	(11)	5,393
Total investment securities available-for-sale	\$ 70,862	\$ 119	\$ (725)	\$70,256

The following tables summarize amortized cost and fair values of debt securities by maturity at September 30, 2016:

(Dollars in thousands)	Available for sale	
	Amortized Cost	Fair Value
Within one year	\$1,287	\$1,294
After one year, but within five	5,278	5,416
After five years, but within ten	15,473	15,754
After ten years	121,555	122,594
Total	\$143,593	\$145,058

Investment securities with a carrying value of \$97.5 million at September 30, 2016, were pledged to secure public funds, repurchase agreements and potential borrowings at the Federal Reserve discount window.

The Company's investment portfolio includes securities that are in an unrealized loss position as of September 30, 2016, the details of which are included in the following table. Although these securities, if sold at September 30, 2016 would result in a pretax loss of \$527 thousand the Company has no intent to sell the applicable securities at such fair values, and maintains the Company has the ability to hold these securities until all principal has been recovered. It is not more likely than not the Company would sell any securities at a loss for liquidity purposes. Declines in the fair values of these securities can be traced to general market conditions which reflect the prospect for the economy as a whole. When determining other-than-temporary impairment on securities, the Company considers such factors as adverse conditions specifically related to a certain security or to specific conditions in an industry or geographic area, the time frame securities have been in an unrealized loss position, the Company's ability to hold the security for a period of time sufficient to allow for anticipated recovery in value, whether or not the security has been downgraded by a rating agency, and whether or not the financial condition of the security issuer has severely deteriorated. As of September 30, 2016, the Company considers all securities with unrealized loss positions to be temporarily impaired, and consequently, does not believe the Company will sustain any material realized losses as a result of the current temporary decline in market value.

The following table discloses investments in an unrealized loss position at September 30, 2016:

Description and number of positions (Dollars in thousands)	Less than 12 months		12 months or more	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
U.S. Agency securities (9)	\$ 10,990	\$ (92)	\$—	\$ —
U.S. Sponsored Mortgage-backed securities (17)	13,130	(62)	17,733	(248)
Municipal securities (23)	11,042	(125)	—	—
Equity and other securities (0)	—	—	—	—
	\$ 35,162	\$ (279)	\$ 17,733	\$ (248)

Table of Contents

The following table discloses investments in an unrealized loss position at December 31, 2015:

Description and number of positions (Dollars in thousands)	Less than 12 months		12 months or more	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
U.S. Agency securities (9)	\$ 28,351	\$ (181)	\$—	\$ —
U.S. Sponsored Mortgage-backed securities (19)	20,647	(233)	11,862	(300)
Municipal securities (22)	3,827	(32)	5,559	(56)
Equity and other securities (1)	2,489	(11)	—	—
	\$ 55,314	\$ (457)	\$ 17,421	\$ (356)

For the three month period ended September 30, 2016 and 2015, the Company sold investments available-for-sale of \$15.7 million and \$1.4 million, respectively, resulting in gross gains of \$479 thousand and \$4 thousand, respectively, and gross losses of \$0 and \$0, respectively.

For the nine month period ended September 30, 2016 and 2015, the Company sold investments available-for-sale of \$55.2 million and \$12.9 million, respectively, resulting in gross gains of \$1.1 million and \$125 thousand, respectively, and gross losses of \$2 thousand and \$0, respectively.

The Company sold no held-to-maturity investments during the three month period ended September 30, 2016 and sold investments held-to maturity of \$421 thousand, resulting in gross gains of \$5 thousand and no gross losses, during the three month period ended September 30, 2015. The held-to-maturity investment was sold due to a credit downgrade.

Note 4 – Loans and Allowance for Loan Losses

All loan origination fees and direct loan origination costs are deferred and recognized over the life of the loan. As of September 30, 2016 and 2015, net deferred fees of \$796 thousand and \$1.2 million, respectively, were included in the carrying value of loans.

An allowance for loan losses (“ALL”) is maintained to absorb losses from the loan portfolio. The ALL is based on management’s continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience, and the amount of non-performing loans.

The Bank’s methodology for determining the ALL is based on the requirements of ASC Section 310-10-35 for loans individually evaluated for impairment (discussed above) and ASC Subtopic 450-20 for loans collectively evaluated for impairment, as well as the Interagency Policy Statements on the Allowance for Loan and Lease Losses and other bank regulatory guidance. The total of the two components represents the Bank’s ALL.

Loans that are collectively evaluated for impairment are analyzed with general allowances being made as appropriate. For general allowances, historical loss trends are used in the estimation of losses in the current portfolio. These historical loss amounts are modified by qualified factors.

The segments as presented in this note, which are based on the Federal call code assigned to each loan, provide the starting point for the ALL analysis. Company and Bank management tracks the historical net charge-off activity at the call code level. A historical charge-off factor is calculated utilizing a defined number of consecutive historical quarters. All pools currently utilize a rolling 12 quarters.

“Pass” rated credits are segregated from “Criticized” credits for the application of qualitative factors. Loans in the criticized pools, which possess certain qualities or characteristics that may lead to collection and loss issues, are closely monitored by management and subject to additional qualitative factors.

Company and Bank management have identified a number of additional qualitative factors which it uses to supplement the historical charge-off factor because these factors are likely to cause estimated credit losses associated with the existing loan pools to differ from historical loss experience. The additional factors that are evaluated quarterly and updated using information obtained from internal, regulatory, and governmental sources are: national and local economic trends and conditions; levels of and trends in delinquency rates and non-accrual loans; trends in volume and terms of loans; effects of changes in lending policies; experience, ability, and depth of lending staff; value of underlying collateral; and concentrations of credit from a loan type, industry and/or geographic standpoint. The combination of historical charge-off and qualitative factors are then weighted for each risk grade. These weightings are determined internally based upon the likelihood of loss as a loan risk grading deteriorates.

Table of Contents

To estimate the liability for off-balance sheet credit exposures, Bank management analyzed the portfolios of letters of credit, non-revolving lines of credit, and revolving lines of credit, and based its calculation on the expectation of future advances of each loan category. Letters of credit were determined to be highly unlikely to advance since they are generally in place only to ensure various forms of performance of the borrowers. In the Bank's history, there have been no letters of credit drawn upon. In addition, many of the letters of credit are cash secured and do not warrant an allocation. Non-revolving lines of credit were determined to be highly likely to advance as these are typically construction lines. Meanwhile, the likelihood of revolving lines of credit advancing varies with each individual borrower. Therefore, the future usage of each line was estimated based on the average line utilization of the revolving line of credit portfolio as a whole.

Once the estimated future advances were calculated, an allocation rate, which was derived from the Bank's historical losses and qualitative environmental factors, was applied in the similar manner as those used for the allowance for loan loss calculation. The resulting estimated loss allocations were totaled to determine the liability for unfunded commitments related to these loans. The liability for unfunded commitments was \$224 thousand and \$194 thousand respectively as of September 30, 2016 and 2015.

Bank management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALL.

The allowance for loan losses is based on estimates, and actual losses will vary from current estimates. Management believes that the granularity of the homogeneous pools and the related historical loss ratios and other qualitative factors, as well as the consistency in the application of assumptions, result in an ALL that is representative of the risk found in the components of the portfolio at any given date.

The following tables summarize the primary segments of the ALL, segregated into the amount required for loans individually evaluated for impairment and the amount required for loans collectively evaluated for impairment as of September 30, 2016:

(Dollars in thousands)	Commercial	Residential	Home Equity	Consumer	Total
ALL balance June 30, 2016	\$ 6,956	\$ 1,011	\$ 758	\$ 366	\$9,091

Provision	1,741	170	18	(73)	1,856
ALL balance September 30, 2015	\$ 5,417	\$ 1,119	\$ 710	\$ 142	\$7,388
Individually evaluated for impairment	\$ 595	\$ 301	\$ 28	\$ 6	\$930
Collectively evaluated for impairment	\$ 4,822	\$ 818	\$ 682	\$ 136	\$6,458

The following table summarizes the primary segments of the Company loan portfolio as of September 30, 2015:

(Dollars in thousands)	Commercial	Residential	Equity	Consumer	Total
Individually evaluated for impairment	\$ 12,036	\$ 849	\$28	\$ 6	\$12,919
Collectively evaluated for impairment	687,623	210,997	65,617	17,677	981,914
Total Loans	\$ 699,659	\$ 211,846	\$65,645	\$ 17,683	\$994,833

Loans are considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in evaluating impairment include current risk grade payment status and the probability of collecting scheduled principal and interest payments when due. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. The Company also separately evaluates individual consumer loans for impairment. The Chief Credit Officer identifies these loans individually by monitoring the delinquency status of the Bank's portfolio. Once identified, the Bank's ongoing communications with the borrower allow Management to evaluate the significance of the payment delays and the circumstances surrounding the loan and the borrower.

Once the determination has been made that a loan is impaired, the determination of whether a specific allocation of the allowance is necessary is measured by comparing the recorded investment in the loan to the fair value of the loan using one of three methods: (a) the present value of expected future cash flows discounted at the loan's effective interest rate; (b) the loan's observable market price; or (c) the fair value of the collateral less selling costs. The method is selected on a loan-by-loan basis, with management primarily utilizing the fair value of collateral method. The evaluation of the need and amount of a specific allocation of the allowance and whether a loan can be removed from impairment status is made on a quarterly basis.

During December 2013, the Bank purchased \$74.3 million in performing commercial real estate secured loans in the northern Virginia area. At the time of acquisition, none of these loans were considered impaired. They were acquired at a premium of roughly 1.024 or \$1.8 million, which is being amortized in accordance with ASC 310-20. These loans are collectively evaluated for impairment under ASC 450. The loans continue to be individually monitored for payoff activity, and any necessary adjustments to the premium are made accordingly. As of September 30, 2016 and December 31, 2015, these balances totaled \$25.8 million and \$46.8 million, respectively. Of the \$48.5 million decrease since originally purchased, MVB refinanced \$19.6 million, sold participations totaling \$7.5 million and sold

\$9.7 million back to the institution from which the loans were originally purchased in December 2013. The remainder of the decrease was the result of principal paydowns. The weighted average yield on the remaining portfolio is 5.91%.

Table of Contents

The following table presents impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not necessary as of September 30, 2016 and December 31, 2015 (Dollars in thousands):

	Impaired Loans with Specific Allowance		Impaired Loans with No Specific Allowance	Total Impaired Loans	
	Recorded Investment	Related Allowance	Recorded Investment	Recorded Investment	Unpaid Principal Balance

Total impaired loans	\$ 11,137	\$ 1,013	\$ 4,238	\$ 15,375	\$ 16,750

Impaired loans have decreased by \$3.6 million, or 23% during the first nine months of 2016, primarily the result of the net impact of four commercial loans. A \$5.0 million loan to finance commercial real estate property in the Northern Virginia market, which had as primary tenants, government contractors that have vacated the premises as a result of losing significant contracts with the United States government, was purchased from another financial institution in late 2013. In the first quarter of 2016, this \$5.0 million loan was repurchased by the selling financial institution thereby decreasing total impaired loans by \$5.0 million. In contrast, a \$1.8 million commercial real estate loan (net of a \$619 thousand participation) was identified as impaired in the first quarter of 2016 as a result of an extended stabilization and interest only period, as well as a lack of project specific cash flows. A charge-off of \$535 thousand was incurred on this loan in the second quarter of 2016. The remaining two loans that caused the most significant change to total impaired loans in 2016, which are related commercial loans within a single relationship, totaled \$1.0 million and were identified as impaired in the second quarter of 2016 as a result of a decline in the coal industry. In the third quarter of 2016, these two loans, along with a third related loan that was previous impaired, required orderly liquidation of the related collateral, resulting in \$435 thousand in principal curtailment and a total of partial charge offs in the amount of \$679 thousand. The net effect of these three significant impairment items was \$4.0 million. The remaining \$400 thousand of the decrease in impaired loans since December 31, 2015 was the net effect of multiple other factors, including the identification of ten impaired commercial loans with a total balance of \$855 thousand, the identification of two impaired installment loans with a total balance of \$368 thousand, the identification of one impaired home equity line of credit with a balance of \$23 thousand, a total of \$630 thousand in partial charge-offs related to these

various loans, the foreclosure upon a \$127 thousand impaired residential real estate loan, and normal loan amortization.

15

Total	\$13,935	\$ 184	\$ 170	\$13,365	\$ 61	\$ 60

As of September 30, 2016, the Bank held two foreclosed residential real estate properties representing \$158 thousand, or 66%, of the total balance of other real estate owned. There are five additional consumer mortgage loans collateralized by residential real estate properties in the process of foreclosure. The total recorded investment in these loans was \$529 thousand as of September 30, 2016.

Bank management uses a nine point internal risk rating system to monitor the credit quality of the overall loan portfolio. The first six categories are considered not criticized, and are aggregated as "Pass" rated. The criticized rating categories utilized by management generally follow bank regulatory definitions. The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt, and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. Any portion of a loan that has been or is expected to be charged off is placed in the Loss category.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Bank has a structured loan rating process with several layers of internal and external oversight. Generally, consumer and residential mortgage loans are included in the Pass categories unless a specific action, such as past due status, bankruptcy,

Table of Contents

repossession, or death occurs to raise awareness of a possible credit event. The Bank's Chief Credit Officer is responsible for the timely and accurate risk rating of the loans in the portfolio at origination and on an ongoing basis. The Credit Department ensures that a review of all commercial relationships of one million dollars or greater is performed annually.

Review of the appropriate risk grade is included in both the internal and external loan review process, and on an ongoing basis. The Bank has an experienced Credit Department that continually reviews and assesses loans within the portfolio. The Bank engages an external consultant to conduct independent loan reviews on at least an annual basis. Generally, the external consultant reviews larger commercial relationships or criticized relationships. The Bank's Credit Department compiles detailed reviews, including plans for resolution, on loans classified as Substandard on a quarterly basis. Loans in the Special Mention and Substandard categories that are collectively evaluated for impairment are given separate consideration in the determination of the allowance.

The following table represents the classes of the loan portfolio summarized by the aggregate Pass and the criticized categories of Special Mention, Substandard and Doubtful within the internal risk rating system as of September 30, 2016 and December 31, 2015 (Dollars in thousands):

September 30, 2016	Pass	Special Mention	Substandard	Doubtful	Total

Management further monitors the performance and credit quality of the loan portfolio by analyzing the age of the portfolio as determined by the length of time a recorded payment is past due.

A loan that has deteriorated and is in a collection process could warrant non-accrual status. A thorough review is to be presented to the Chief Credit Officer and or the Management Loan Committee ("MLC"), as required with respect to any loan which is in a collection process and to make a determination as to whether the loan should be placed on non-accrual status. The placement of loans on non-accrual status will be subject to applicable regulatory restrictions and guidelines. Generally, loans should be placed in non-accrual status when the loan approaches 90 days past due, when it becomes likely the borrower cannot or will not make scheduled principal or interest payments, when full repayment of principal and interest is not expected, or when the loan displays potential loss characteristics. Normally, all accrued interest should be charged off when a loan is placed in non-accrual status. Any payments subsequently received should be applied to principal. To remove a loan from non-accrual status, all principal and interest due must be paid up to date and the Bank is reasonably sure of future satisfactory payment performance. Usually, this requires a six-month recent history of payments due. Removal of a loan from non-accrual status will require the approval of the

Chief Credit Officer and or MLC.

17

Troubled Debt Restructurings

The restructuring of a loan is considered a troubled debt restructuring (“TDR”) if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, principal forgiveness, restructuring amortization schedules and other actions intended to minimize potential losses. At September 30, 2016 and December 31, 2015, the Bank had specific reserve allocations for TDR’s of \$292 thousand and \$672 thousand, respectively.

Loans considered to be troubled debt restructured loans totaled \$8.4 million and \$9.3 million as of September 30, 2016 and December 31, 2015, respectively. \$6.0 million and \$6.0 million, respectively, represent accruing troubled debt restructured loans and represent 51% and 46%, respectively of total impaired loans. Meanwhile, \$2.6 million and \$2.5 million, respectively, represent three loans to two borrowers that have defaulted under the restructured terms. All three loans are commercial acquisition and development loans that were considered restructured due to extended interest only periods and/or unsatisfactory repayment structures once transitioned to principal and interest payments. These borrowers have experienced continued financial difficulty and are considered non-performing loans as of September 30, 2016 and December 31, 2015. Two additional restructured loans, a \$214 thousand commercial real estate loan and a \$348 thousand mortgage loan, are considered non-performing as of September 30, 2016. Both of these loans were also considered restructured due to extended interest only periods and/or unsatisfactory repayment structures.

There were no new TDR’s for the three months ended September 30, 2016 and 2015.

Note 5 – Borrowed Funds**Short-term Borrowings**

Along with traditional deposits, the Bank has access to short-term borrowings from FHLB to fund its operations and investments. Short-term borrowings from FHLB totaled \$132.9 million at September 30, 2016, compared to \$179.9 million at December 31, 2015.

Table of Contents

Information related to short-term borrowings is summarized as follows:

(Dollars in thousands)	September 30, December 31,		
	2016	2015	
Balance at end of period	\$ 132,901	\$ 179,917	
Average balance	169,309	121,425	
Maximum month-end balance	210,600	179,917	
Weighted-average rate	0.47	% 0.34	%
Rate at end of period	0.46	% 0.44	%

Repurchase agreements:

Along with traditional deposits, the Bank has access to securities sold under agreements to repurchase “repurchase agreements” with customers represent funds deposited by customers, on an overnight basis, that are collateralized by investment securities owned by the Company. Repurchase agreements with customers are included in borrowings section on the consolidated balance sheets. All repurchase agreements are subject to terms and conditions of repurchase/security agreements between the Company and the client and are accounted for as secured borrowings. The Company's repurchase agreements reflected in liabilities consist of customer accounts and securities which are pledged on an individual security basis.

The Company monitors the fair value of the underlying securities on a monthly basis. Repurchase agreements are reflected at the amount of cash received in connection with the transaction and included in Securities sold under agreements to repurchase on the consolidated balance sheets. The primary risk with our repurchase agreements is market risk associated with the investments securing the transactions, as we may be required to provide additional collateral based on fair value changes of the underlying investments. Securities pledged as collateral under repurchase agreements are maintained with our safekeeping agents.

All of the Company's repurchase agreements were overnight agreements at September 30, 2016 and December 31, 2015. These borrowings were collateralized with investment securities with a carrying value of \$28.0 million and \$28.3 million at September 30, 2016 and December 31, 2015, respectively, and were comprised of U.S. Government Agencies and Mortgage backed securities. Declines in the value of the collateral would require the Company to increase the amounts of securities pledged.

Repurchase agreements totaled \$27.2 million at September 30, 2016, compared to \$27.4 million at December 31, 2015.

Information related to repurchase agreements is summarized as follows:

(Dollars in thousands)	September 30, December 31,		
	2016	2015	
Balance at end of period	\$ 27,192	\$ 27,437	
Average balance	26,238	26,884

Weighted-average rate	6.59	% 6.55	%
Rate at end of period	6.61	% 6.57	%

In March 2007, the Company completed the private placement of \$4 million Floating Rate, Trust Preferred Securities through its MVB Financial Statutory Trust I subsidiary (the "Trust"). The Company established the trust for the sole purpose of issuing the Trust Preferred Securities pursuant to an Amended and Restated Declaration of Trust. The proceeds from the sale of the Trust Preferred Securities were loaned to the Company under subordinated Debentures (the "Debentures") issued to the Trust pursuant to an Indenture. The Debentures are the only asset of the Trust. The Trust Preferred Securities have been issued to a pooling vehicle that will use the distributions on the Trust Preferred Securities to securitize note obligations. The obligations of the Company with respect to the issuance of the trust preferred securities constitute a full and unconditional guarantee by the Company of the Trust's obligations with respect to the trust preferred securities to the extent set forth in the related guarantees. The securities issued by the Trust are includable for regulatory purposes as a component of the Company's Tier I capital.

The Trust Preferred Securities and the Debentures mature in 2037 and have been redeemable by the Company since 2012. Interest payments are due in March, June, September and December and are adjusted at the interest due dates at a rate of 1.62% over the three month LIBOR Rate. The obligations of the Company with respect to the issuance of the trust preferred securities constitute a full and unconditional guarantee by the Company of the Trust's obligations with respect to the trust preferred securities to the extent set forth in the related guarantees.

On June 30, 2014, MVB Financial Corp. (the "Company") issued its Convertible Subordinated Promissory Notes Due 2024 (the "Notes") to various investors in the aggregate principal amount of \$29,400,000. The Notes were issued in \$100,000 increments per Note subject to a minimum investment of \$1,000,000. The Notes expire 10 years after the initial issuance date of the Notes (the "Maturity Date").

Interest on the Notes accrues on the unpaid principal amount of each Note (paid quarterly in arrears on January 1, April 1, July 1 and October 1 of each year) which rate shall be dependent upon the principal invested in the Notes and the holder's ownership of common stock in the Company. For investments of less than \$3,000,000 in Notes, an ownership of Company common stock representing at least 30% of the principal of the Notes acquired, the interest rate on the Notes is 7% per annum. For investments of \$3,000,000 or greater in Notes and ownership of the Company's common stock representing at least 30% of the principal of the Notes acquired, the interest rate on the Notes is 7.5% per annum. For investments of \$10,000,000 or greater, the interest rate on the Notes is 7% per annum, regardless of whether the holder owns or acquires MVB common stock. The principal on the Notes shall be paid in full at the Maturity Date. On the fifth anniversary of the issuance of the Notes, a holder may elect to continue to receive the stated fixed rate on the Notes or a floating rate determined by LIBOR plus 5% up to a maximum rate of 9%, adjusted quarterly.

The Notes are unsecured and subject to the terms and conditions of any senior debt and after consultation with the Board of Governors of the Federal Reserve System, the Company may, after the Notes have been outstanding for five years, and without premium or penalty, prepay all or a portion of the unpaid principal amount of any Note together with the unpaid interest accrued on such portion of the principal amount of such Note. All such prepayments shall be made pro rata among the holders of all outstanding Notes.

At the election of a holder, any or all of the Notes may be converted into shares of common stock during the 30-day period after the first, second, third, fourth, and fifth anniversaries of the issuance of the Notes or upon a notice to prepay by the Company. The Notes will convert into common stock based on \$16 per share of the Company's common stock. The conversion price will be subject to anti-dilution adjustments for certain events such as stock splits, reclassifications, non-cash distributions, extraordinary cash dividends, pro rata repurchases of common stock,

and business combination transactions. The Company must give 20 days' notice to the holders of the Company's intent to prepay the Notes, so that holders may execute the conversion right set forth above if a holder so desires.

20

Table of Contents

Repayment of the Notes is subordinated to the Company's outstanding senior debt including (if any) without limitation, senior secured loans. No payment will be made by the Company, directly or indirectly, on the Notes, unless and until all of the senior debt then due has been paid in full. Notwithstanding the foregoing, so long as there exists no event of default under any senior debt, the Company would make, and a holder would receive and retain for the holder's account, regularly scheduled payments of accrued interest and principal pursuant to the terms of the Notes. The Company must obtain a consent of the holders of the Notes prior to issuing any new senior debt in excess of \$15,000,000 after the date of issuance of the Notes and prior to the Maturity Date.

An event of default will occur upon the Company's bankruptcy or any failure to pay interest, principal, or other amounts owing on the Notes when due. Upon the occurrence and during the continuance of an event of default (but subject to the subordination provisions of the Notes) the holders of a majority of the outstanding principal amount of the Notes may declare all or any portion of the outstanding principal amount of the Notes due and payable and demand immediate payment of such amount.

The Notes are redeemable, in whole or in part, at a redemption price equal to 100% of the principal amount of the Notes to be redeemed on any interest payment date after a date five years from the original issue date.

The Company reflects subordinated debt in the amount of \$33.5 million as of September 30, 2016 and December 31, 2015. Interest expense was \$1.7 million and \$1.6 million for the nine months ended September 30, 2016 and 2015.

A summary of maturities of borrowings and subordinated debt over the next five years is as follows:

(Dollars in thousands)

Year	Amount
2016	\$ 132,924
2017	615
2018	81
2019	85
2020	90
Thereafter	35,841
	\$ 169,636

Note 6 – Fair Value of Financial Instruments

The following summarizes the methods and significant assumptions used by the Company in estimating its fair value disclosures for financial instruments.

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities include items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

Assets Measured on a Recurring Basis

As required by accounting standards, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company classified investments in government securities as Level 2 instruments and valued them using the market approach. The following measurements are made on a recurring basis.

Table of Contents

- Available-for-sale investment securities – Available-for-sale investment securities are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities issued by government sponsored entities and private label entities, municipal bonds and corporate debt securities. There have been no changes in valuation techniques for the year ended December 31, 2015 and the nine months ended September 30, 2016. Valuation techniques are consistent with techniques used in prior periods.
- Loans held for sale – Loans held for sale are carried at fair value. These loans currently consist of one-to-four-family residential loans originated for sale in the secondary market. Fair value is based on the committed market rates or the price secondary markets are currently offering for similar loans using observable market data.
- Interest rate lock commitment – For mortgage interest rate locks, the fair value is based on either (i) the price of the underlying loans obtained from an investor for loans that will be delivered on a best efforts basis or (ii) the observable price for individual loans traded in the secondary market for loans that will be delivered on a mandatory basis less (iii) expected costs to deliver the interest rate locks, any expected “pull through rate” is applied to this calculation to estimate the derivative value.
- Interest rate cap – The fair value of the interest rate cap is determined at the end of each quarter by using Bloomberg Finance which values the interest rate cap using observable inputs from forward and futures yield curves as well as standard market volatility.
- Interest rate swap – Interest rate swaps are recorded at fair value based on third party vendors who compile prices from various sources and may determine fair value of identical or similar instruments by using pricing models that consider observable market data.
- Forward sales commitments – Forward sales commitments are considered derivatives and are recorded at fair value, based on (i) committed sales prices from investors for commitments to sell mortgage loans or (ii) observable market data inputs for commitments to sell mortgage backed securities. A majority of the interest rate locks and loans held for sale are committed on a best efforts basis.

The following tables present the assets and liabilities reported on the consolidated statements of financial condition at their fair value on a recurring basis as of September 30, 2016 and December 31, 2015 by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Assets Measured on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain financial assets, financial liabilities, non-financial assets and non-financial liabilities at fair value on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. These include assets that are measured at the lower of cost or market value that were recognized at fair value below cost at the end of the period. Certain non-financial assets measured at fair value on a non-recurring basis include foreclosed assets (upon initial recognition or subsequent impairment), non-financial assets and non-financial liabilities measured at fair value in the second step of a goodwill impairment test, and intangible assets and other non-financial long-lived assets measured at fair value for impairment assessment. Non-financial assets measured at fair value on a nonrecurring basis during 2016 and 2015 include certain foreclosed assets which, upon initial recognition, were remeasured and reported at fair value through a charge-off to the allowance for possible loan losses and certain foreclosed assets which, subsequent to their initial recognition, were remeasured at fair value through a write-down included in other non-interest expense.

- **Impaired Loans** - Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment using one of several methods, including collateral value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. Collateral values are estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria. For a majority of impaired real estate related loans, the Company obtains a current external appraisal. Other valuation techniques are used as well, including internal valuations, comparable property analysis and contractual sales information.

- **Other Real Estate owned** — Other real estate owned, which is obtained through the Bank's foreclosure process is valued utilizing the appraised collateral value. Collateral values are estimated using Level 2 inputs based on observable market data or Level 3 inputs based on customized discounting criteria. At the time, the foreclosure is completed, the

Company obtains a current external appraisal.

23

Table of Contents

Assets measured at fair value on a nonrecurring basis as of September 30, 2016 and December 31, 2015 are included in the tables below:

		September 30, 2016		
(Dollars in thousands)	Level	Level II	Level III	Total
Assets:				
Impaired loans	\$-\$	—	—\$10,441	\$10,441
Other real estate owned	—	240	—	\$240

		December 31, 2015		
(Dollars in thousands)	Level	Level II	Level III	Total
Assets:				
Impaired loans	\$-\$	—	—\$14,362	\$14,362
Other real estate owned	—	239	—	\$239

The following tables present quantitative information about the Level 3 significant unobservable inputs for assets measured at fair value on a nonrecurring basis at September 30, 2016 and December 31, 2015.

September 30, 2016		Quantitative Information about Level 3 Fair Value Measurements		
(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Range
Impaired loans	\$10,441	Appraisal of collateral (1)	Appraisal adjustments (2)	20% - 62%
			Liquidation expense (2)	5% - 10%
Other real estate owned	\$240	Appraisal of collateral (1)	Appraisal adjustments (2)	20% - 30%
			Liquidation expense (2)	5% - 10%
December 31, 2015		Quantitative Information about Level 3 Fair Value Measurements		
(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Range
Impaired loans	\$14,362	Appraisal of collateral (1)	Appraisal adjustments (2)	20% - 62%
			Liquidation expense (2)	5% - 10%
Other real estate owned	\$239	Appraisal of collateral (1)	Appraisal adjustments (2)	20% - 30%
			Liquidation expense (2)	5% - 10%

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various level 3 inputs which are not observable.

(2) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses. The range and weighted average of liquidation expenses and other appraisal adjustments are presented as a percent of the appraisal.

The following summarizes the methods and significant assumptions used by the Company in estimating its fair value disclosures for financial instruments.

Cash and cash equivalents: The carrying amounts for cash and cash equivalents approximate fair value because they have original maturities of 90 days or less and do not present unanticipated credit concerns.

Certificates of deposits: The fair values for certificates of deposits are computed based on scheduled future cash flows of principal and interest, discounted at interest rates currently offered for certificates of deposits with similar terms of investors. No prepayments of principal are assumed.

Table of Contents

Securities: Fair values of securities are based on quoted market prices, where available. If quoted market prices are not available, estimated fair values are based on quoted market prices of comparable securities.

Loans held for sale: Loans held for sale are reported at fair value. These loans currently consist of one-to-four-family residential loans originated for sale in the secondary market. Fair value is based on committed market rates or the price secondary markets are currently offering for similar loans using observable market data. (Level II)

Loans: The fair values for loans are computed based on scheduled future cash flows of principal and interest, discounted at interest rates currently offered for loans with similar terms of borrowers of similar credit quality. No prepayments of principal are assumed.

Mortgage servicing rights: The carrying value of mortgage servicing rights approximates their fair value.

Interest rate lock commitment: For mortgage interest rate locks, the fair value is based on either (i) the price of the underlying loans obtained from an investor for loans that will be delivered on a best efforts basis or (ii) the observable price for individual loans traded in the secondary market for loans that will be delivered on a mandatory basis less (iii) expected costs to deliver the interest rate locks, any expected “pull through rate” is applied to this calculation to estimate the derivative value. The “pull through rate” range from 78% – 82% as of September 30, 2016 and December 31, 2015.

Interest rate cap: The fair value of the interest rate cap is determined at the end of each quarter by using Bloomberg Finance which values the interest rate cap using observable inputs from forward and futures yield curves as well as standard market volatility.

Interest rate swap: Interest rate swaps are recorded at fair value based on third party vendors who compile prices from various sources and may determine fair value of identical or similar instruments by using pricing models that consider observable market data.

Accrued interest receivable and payable and repurchase agreements: The carrying values of accrued interest receivable and payable and repurchase agreements approximate their fair values.

Deposits: The fair values of demand deposits (i.e., non-interest bearing checking, NOW and money market), savings accounts and other variable rate deposits approximate their carrying values. Fair values of fixed maturity deposits are estimated using a discounted cash flow methodology at rates currently offered for deposits with similar remaining maturities. Any intangible value of long-term relationships with depositors is not considered in estimating the fair values disclosed.

Forward Sales Commitments: Forward sales commitments are used to mitigate interest rate risk for residential mortgage loans held for sale and interest rate locks and manage expected funding percentages. These instruments are considered derivatives and are recorded at fair value, based on (i) committed sales prices from investors for commitments to sell mortgage loans or (ii) observable market data inputs for commitments to sell mortgage backed securities.

FHLB and other borrowings: The fair values for loans are computed based on scheduled future cash flows of principal and interest, discounted at interest rates currently offered for loans with similar terms of borrowers of similar credit quality. No prepayments of principal are assumed.

Subordinated debt: The fair values for debt are computed based on scheduled future cash flows of principal and interest, discounted at interest rates currently offered for debt with similar terms of borrowers of similar credit quality. No prepayments of principal are assumed.

Off-balance sheet instruments: The fair values of commitments to extend credit and standby letters of credit are estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of agreements and the present credit standing of the counterparties. The amounts of fees currently charged on commitments and standby letters of credit are deemed insignificant, and therefore, the estimated fair values and carrying values are not shown.

Table of Contents

The carrying values and estimated fair values of the Company's financial instruments are summarized as follows

Table of Contents

Fair value estimates are made at a specific point in time, based on relevant market information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Fair value estimates are based on existing on-and-off balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.

Note 7 – Stock Offerings

On June 30, 2014, the Company filed Certificates of Designations for its Convertible Noncumulative Perpetual Preferred Stock, Series B (“Class B Preferred”) and its Convertible Noncumulative Perpetual Preferred Stock, Series C (“Class C Preferred”). The Class B Preferred Certificate designated 400 shares of preferred stock as Class B Preferred shares. The Class B Preferred shares carry an annual dividend rate of 6% and are convertible into shares of Company common stock within thirty days after the first, second, third, fourth and fifth anniversaries of the original issue date, based on a common stock price of \$16 per share, as adjusted for future corporate activities. The Class B Preferred shares are redeemable by the Company on or after the fifth anniversary of the original issue date for Liquidation Amount, as defined therein, plus declared and unpaid dividends. Redemption is subject to any necessary regulatory approvals. In the event of liquidation of the Company, shares of Class B Preferred stock shall be junior to creditors of the Company and to the shares of Senior Noncumulative Perpetual Preferred Stock, Series A. Holders of Class B Preferred shares shall have no voting rights, except for authorization of senior shares of stock, amendment to the Class B Preferred shares, share exchanges, reclassifications or changes of control, or as required by law.

The Class C Preferred Certificate designated 383.4 shares of preferred stock as Class C Preferred shares. The Class C Preferred shares carry an annual dividend rate of 6.5% and are convertible into shares of Company common stock within thirty days after the first, second, third, fourth and fifth anniversaries of the original issue date, based on a common stock price of \$16 per share, as adjusted for future corporate activities. The Class C Preferred shares are redeemable by the Company on or after the fifth anniversary of the original issue date for Liquidation Amount, as defined therein, plus declared and unpaid dividends. Redemption is subject to any necessary regulatory approvals. In the event of liquidation of the Company, shares of Class C Preferred stock shall be junior to creditors of the Company and to the shares of Senior Noncumulative Perpetual Preferred Stock, Series A and the Class B Preferred shares. Holders of Class C Preferred shares shall have no voting rights, except for authorization of senior shares of stock, amendment to the Class C Preferred shares, share exchanges, reclassifications or changes of control, or as required by law. The proceeds of these preferred stock offerings will be used to support continued growth of the Company and its Subsidiary.

On September 8, 2011, MVB received \$8.5 million in Small Business Lending Fund (SBLF) capital. The Company issued 8,500 shares of \$1,000 per share preferred stock with dividends payable in arrears on January 1, April 1, July 1 and October 1 each year. Through March 8, 2016, the company's loan production qualified for the lowest dividend rate possible of 1%. Beginning March 9, 2016 the dividend rate increased to 9% and will remain as such until the SBLF is retired.

Note 8 – Net Income Per Common Share

The Company determines basic earnings per share by dividing net income less preferred stock dividends by the weighted average number of common shares outstanding during the period. Diluted earnings per share is determined by dividing net income less dividends on convertible preferred stock plus interest on convertible subordinated debt by the weighted average number of shares outstanding increased by both the number of shares that would be issued assuming the exercise of stock options under the Company's 2003 and 2013 Stock Incentive Plans and the conversion of preferred stock and subordinated debt if dilutive. Earnings per share available for the common shareholder has been corrected from prior year. The prior year calculation included convertible preferred stock in the dilutive calculations instead of the convertible subordinated debt. The net effect resulted in a decrease of one penny in dilutive earnings per share for both the nine and three months ended September 30, 2015.

Earnings per share per common shareholder - diluted	\$1.08	\$ 0.60	\$0.24	\$ 0.16

Note 9 – Segment Reporting

For the current reporting period, the Company has identified four reportable segments: commercial and retail banking; mortgage banking; financial holding company; and insurance services. Revenue from commercial and retail banking activities consists primarily of interest earned on loans and investment securities and service charges on deposit accounts. Revenue from financial holding company activities is mainly comprised of intercompany service income and dividends.

Revenue from the mortgage banking activities is comprised of interest earned on loans and fees received as a result of the mortgage origination process. The mortgage banking services are conducted by MVB Mortgage. Revenue from insurance services is comprised mainly of commissions on the sale of insurance products.

On June 30, 2016, the Company entered into an Asset Purchase Agreement with USI Insurance Services (“USI”), in which USI purchased substantially all of the assets and assumed certain liabilities of MVB Insurance, which resulted in a pre-tax gain of \$6.9 million, as discussed in Note 12. MVB Insurance retained the assets related to, and continues

to operate, its title insurance business. The title insurance business is immaterial in terms of revenue and the Company has reorganized MVB Insurance as a subsidiary of the Bank.

Commercial & Retail Banking

For the three months ended September 30, 2016, the Commercial & Retail Banking segment earned \$2.3 million compared to \$1.6 million during the three months ended September 30, 2015. Net interest income increased \$1.8 million, mainly the result of average loan balances increasing by \$164.9 million. In addition, average interest bearing liabilities increased \$154.4 million which led to a \$335 thousand increase in interest expense. Noninterest income increased by \$804 thousand, largely the result of an increase in gain on sale of securities of \$475 thousand and a \$528 thousand expense reduction due to the mark to market valuation of the interest rate cap. Noninterest expense increased \$980 thousand, largely the result of a \$852 thousand increase in other operating expense, a \$81 thousand increase in occupancy and equipment, a \$29 thousand increase in salaries and employee benefits, and a \$350 thousand increase in data processing and communications. \$289 thousand of the increase to noninterest expense relates to intercompany services expense related to Regulation W. In addition, income tax expense increased \$460 thousand due to the increase in earnings.

Table of Contents

For the nine months ended September 30, 2016, the Commercial & Retail Banking segment earned \$7.1 million compared to \$3.8 million during the nine months ended September 30, 2015. Net interest income increased \$7.1 million, mainly the result of average loan balances increasing by \$207.9 million. In addition, average interest bearing liabilities increased \$200.7 million which led to a \$1.4 million increase in interest expense. Noninterest income increased by \$1.3 million, largely the result of an increase in gain on sale of securities of \$882 thousand and a \$644 thousand expense increase due to the mark to market valuation of the interest rate cap. Noninterest expense increased \$2.2 million, largely the result of a \$1.2 million increase in other operating expense and a \$410 thousand increase in occupancy and equipment. \$681 thousand of the increase to noninterest expense relates to intercompany services expense related to Regulation W. In addition, income tax expense increased \$1.9 million due to the increase in earnings.

Mortgage Banking

For the three months ended September 30, 2016, the Mortgage Banking segment earned \$1.1 million compared to \$719 thousand during the three months ended September 30, 2015. Net interest income decreased \$17 thousand, noninterest income increased by \$3.2 million and noninterest expense increased by \$2.6 million. The \$402 thousand earnings increase is largely due to a \$1.5 million increase in gains related to the mark to market valuation of the interest rate lock commitments driven by a 10% increase in the locked mortgage loan pipeline for the three months ended September 30, 2016 compared to a 9% decrease in the locked mortgage pipeline for the three months ended September 30, 2015. In addition, loans held for sale increased from \$73.0 million at September 30, 2015 to \$123.1 million at September 30, 2016. Mortgage fee income also increased by \$1.7 million. Personnel expense increased by \$2.4 million and income tax expense increased \$256 thousand due to the increase in earnings.

For the nine months ended September 30, 2016, the Mortgage Banking segment earned \$2.8 million compared to \$3.7 million during the nine months ended September 30, 2015. Net interest income increased \$58 thousand, noninterest income increased by \$3.9 million and noninterest expense increased by \$5.4 million. The \$889 thousand earnings decrease is largely due to a \$4.9 million increase in personnel expense, which was largely offset by a \$3.2 million increase in mortgage fee income and a \$721 thousand increase in gains related to the mark to market valuation of the interest rate lock commitments driven by a 71% increase in the locked mortgage loan pipeline for the nine months ended September 30, 2016 compared to a 58% increase in the locked mortgage pipeline for the nine months ended September 30, 2015. Loans held for sale increased from \$73.0 million at September 30, 2015 to \$123.1 million at September 30, 2016. In addition, income tax expense decreased \$525 thousand due to the decrease in earnings.

Financial Holding Company

Excluding discontinued operations, for the three months ended September 30, 2016, the Financial Holding Company segment lost \$1.1 million compared to a loss of \$844 thousand during the three months ended September 30, 2015. Interest expense increased \$5 thousand, noninterest income increased \$318 thousand and noninterest expense increased \$761 thousand. In addition, the income tax benefit increased \$154 thousand. The increase in noninterest income was mainly due to a \$318 thousand increase in other operating income, primarily intercompany services income related to Regulation W. The increase in noninterest expense was largely due to a \$648 thousand increase in salaries and employee benefits, a \$64 thousand increase in occupancy and equipment, and a \$39 thousand increase in professional fees.

Excluding discontinued operations, for the nine months ended September 30, 2016, the Financial Holding Company segment lost \$3.2 million compared to a loss of \$2.2 million during the nine months ended September 30, 2015. Interest expense increased \$17 thousand, noninterest income increased \$991 thousand and noninterest expense increased \$2.5 million. In addition, the income tax benefit increased \$545 thousand. The increase in noninterest income was mainly due to a \$921 thousand increase in other operating income, primarily intercompany services income related to Regulation W, and a \$70 thousand increase in gain on sale of securities. The increase in noninterest expense was largely due to a \$1.8 million increase in salaries and employee benefits, including a \$500 thousand reorganization expense, a \$198 thousand increase in occupancy and equipment, and a \$398 thousand increase in professional fees.

Insurance

For the three months ended September 30, 2015, the discontinued insurance segment lost \$104 thousand. Income tax benefit for the third quarter 2016 increased by \$63 thousand.

For the nine months ended September 30, 2016, the discontinued insurance segment lost \$362 thousand compared to a \$65 thousand profit during the nine months ended September 30, 2015. Income tax benefit for the nine months ended September 30, 2016 increased by \$261 thousand.

Table of Contents

Note 10 – Pension Plan

The Company participates in a trustee pension plan known as the Allegheny Group Retirement Plan covering virtually all full-time employees. Benefits are based on years of service and the employee's compensation. Accruals under the Plan were frozen as of May 31, 2014. Freezing the plan resulted in a re-measurement of the pension obligations and plan assets as of the freeze date. The pension obligation was re-measured using the discount rate based on the Citigroup Above Median Pension Discount Curve in effect on May 31, 2014 of 4.46%.

Information pertaining to the activity in the Company's defined benefit plan, using the latest available actuarial valuations for the three and nine months ended September 30, 2016 and 2015 is as follows:

(Dollars in thousands)	For the three months ended September 30, 2016	For the three months ended September 30, 2015

Note 12 – Discontinued Operations

On June 30, 2016, the Company entered into an Asset Purchase Agreement with USI Insurance Services (“USI”), in which USI purchased substantially all of the assets and assumed certain liabilities of MVB Insurance, which resulted in a pre-tax gain of \$6.9 million. MVB Insurance retained the assets related to, and continues to operate, its title insurance business. The title insurance business is immaterial in terms of revenue and the Company has reorganized MVB Insurance as a subsidiary of the Bank. The Company retained approximately \$424 thousand in liabilities and received proceeds totaling \$7.0 million related to this transaction.

Assets and liabilities of discontinued operations at the dates indicated were as follows:

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following presents management’s discussion and analysis of our consolidated financial condition at September 30, 2016 and December 31, 2015 and the results of our operations for the nine and three months ended September 30, 2016 and 2015. This discussion should be read in conjunction with our unaudited consolidated financial statements and the notes thereto appearing elsewhere in this report and the audited consolidated financial statements and the notes to consolidated financial statements included in our Annual Report to Shareholders on Form 10-K for the year ended December 31, 2015.

FORWARD-LOOKING INFORMATION

Statements in this Quarterly Report on Form 10-Q that are based on other than historical data are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations or forecasts of future events and include, among others:

statements with respect to the beliefs, plans, objectives, goals, guidelines, expectations, anticipations, and future financial condition, results of operations and performance of MVB Financial Corp. (the “Company”) and its subsidiary (collectively “we,” “our,” or “us), including MVB Bank, Inc. (the “Bank”);

- statements preceded by, followed by or that include the words “may,” “could,” “should,” “would,” “believe,” “anticipate,” “estimate,” “expect,” “intend,” “plan,” “projects,” or similar expressions.

These forward-looking statements are not guarantees of future performance, nor should they be relied upon as representing the Company’s or the Bank management’s views as of any subsequent date. Forward-looking statements involve significant risks and uncertainties and actual results may differ materially from those presented, either expressed or implied, including, but not limited to, those presented in this Management’s Discussion and Analysis section; and therefore, undue reliance should not be placed on forward-looking statements. Factors that might cause such differences include, but are not limited to:

- the ability of the Company, the Bank, and MVB Mortgage to successfully execute business plans, manage risks, and achieve objectives;
- changes in local, national and international political and economic conditions, including without limitation the political and economic effects of the recent economic crisis, delay of recovery from that crisis, economic conditions and fiscal imbalances in the United States and other countries, potential or actual downgrades in rating of sovereign debt issued by the United States and other countries, and other major developments, including wars, military actions, and terrorist attacks;
- changes in financial market conditions, either internationally, nationally or locally in areas in which the Company, the Bank, and MVB Mortgage conduct operations, including without limitation, reduced rates of business formation and growth, commercial and residential real estate development and real estate prices;
- fluctuations in markets for equity, fixed-income, commercial paper and other securities, including availability, market liquidity levels, and pricing; changes in interest rates, the quality and composition of the loan and securities portfolios, demand for loan products, deposit flows and competition;
- the ability of the Company, the Bank, and MVB Mortgage to successfully conduct acquisitions and integrate acquired businesses;
- potential difficulties in expanding the businesses of the Company, the Bank, and MVB Mortgage in existing and new markets;
- increases in the levels of losses, customer bankruptcies, bank failures, claims, and assessments;
- changes in fiscal, monetary, regulatory, trade and tax policies and laws, and regulatory assessments and fees, including policies of the U.S. Department of Treasury, the Board of Governors of the Federal Reserve Board System, and the Federal Deposit Insurance Corporation (“FDIC”);
- the impact of executive compensation rules under the Dodd-Frank Act and banking regulations which may impact the ability of the Company, the Bank, MVB Mortgage, and other American financial institutions to retain and recruit executives and other personnel necessary for their businesses and competitiveness;

Table of Contents

the impact of the Dodd-Frank Act and of new international standards known as Basel III, and rules and regulations thereunder, many of which have not yet been promulgated, on our required regulatory capital and liquidity levels, governmental assessments on us, the scope of business activities in which we may engage, the manner in which the Company, the Bank, and MVB Mortgage engage in such activities, the fees that the Bank and MVB Mortgage may charge for certain products and services, and other matters affected by the Dodd-Frank Act and these international standards;

continuing consolidation in the financial services industry; new legal claims against the Company, the Bank, and MVB Mortgage, including litigation, arbitration and proceedings brought by governmental or self-regulatory agencies, or changes in existing legal matters;

success in gaining regulatory approvals, when required, including for proposed mergers or acquisitions;

changes in consumer spending and savings habits;

increased competitive challenges and expanding product and pricing pressures among financial institutions;

inflation and deflation;

technological changes and the implementation of new technologies by the Company, the Bank, and MVB Mortgage;

the ability of the Company, the Bank, and MVB Mortgage to develop and maintain secure and reliable information technology systems;

legislation or regulatory changes which adversely affect the operations or business of the Company, the Bank, or MVB Mortgage;

the ability of the Company, the Bank, and MVB Mortgage to comply with applicable laws and regulations; changes in

accounting policies or procedures as may be required by the Financial Accounting Standards Board or regulatory agencies; and,

costs of deposit insurance and changes with respect to FDIC insurance coverage levels.

Except to the extent required by law, the Company specifically disclaims any obligation to update any factors or to publicly announce the result of revisions to any of the forward-looking statements included herein to reflect future events or developments.

Introduction

MVB Financial Corp. was formed on May 29, 2003 and became a bank holding company under the laws of West Virginia on January 1, 2004, and, effective December 19, 2012, became a financial holding company. The Company features a subsidiary and multiple affiliated businesses, each of which is described in more detail below, including MVB Bank, Inc. and its wholly-owned subsidiaries MVB Mortgage and MVB Insurance, LLC. On December 31, 2013, three Company subsidiaries, MVB-Central, Inc. (a second-tier level holding company), MVB-East, Inc. (a second tier holding company) and Bank Compliance Solutions, Inc. (an inactive subsidiary) were merged into the Company.

The Bank was formed on October 30, 1997 and chartered under the laws of the State of West Virginia. The Bank commenced operations on January 4, 1999. In August of 2005, the Bank opened a full service office in neighboring Harrison County, West Virginia. During October of 2005, the Bank purchased a branch office in Jefferson County, West Virginia, situated in West Virginia's eastern panhandle. During the third quarter of 2007, the Bank opened a full service office in the Martinsburg area of Berkeley County, West Virginia. In the second quarter of 2011, the Bank opened a banking facility in the Cheat Lake area of Monongalia County, West Virginia. The Bank opened its second Harrison County, West Virginia location, the downtown Clarksburg office in the historic Empire Building during the fourth quarter of 2012.

Table of Contents

During the fourth quarter of 2012, the Bank acquired Potomac Mortgage Group, Inc. (“PMG” which, following July 15, 2013, began doing business under the registered trade name “MVB Mortgage”), a mortgage company in the northern Virginia area, and fifty percent (50%) interest in a mortgage services company, Lender Service Provider, LLC (“LSP”). In the third quarter of 2013, this fifty percent (50%) interest in LSP was reduced to a twenty-five percent (25%) interest through a sale of a partial interest. MVB Mortgage has eleven mortgage only offices, located in Virginia, within the Washington, DC metropolitan area as well as North Carolina and South Carolina, and, in addition, has mortgage loan originators located at select Bank locations throughout West Virginia.

In the first quarter of 2013, the Bank opened its second Monongalia County location in the Sabraton area of Morgantown, West Virginia. In the second quarter of 2013, the Bank opened its second full service office in Berkeley County, West Virginia, at Edwin Miller Boulevard. In addition, the Bank opened a loan production office at 184 Summers Street, Charleston, Kanawha County, West Virginia, which was subsequently moved to 400 Washington Street East, Charleston, West Virginia and later replaced during March 2015 by a full service branch at the same location.

In 2014, the Bank opened a loan production office in Reston, Fairfax County, Virginia, which was replaced by a full service branch in October 2015.

During January 2015, the Bank opened a location at 100 NASA Boulevard, Fairmont, Marion County, West Virginia, which replaced the 9789 Mall Loop, White Hall, Marion County, West Virginia location as the Technology Park location offers a drive-thru facility to better serve customers. During March 2015, the location at 9789 Mall Loop was closed. During August 2015, the Bank purchased two branch locations in Berkeley County, West Virginia, situated in West Virginia’s eastern panhandle at 704 Foxcroft Avenue, Martinsburg, West Virginia and 5091 Gerrardstown Road, Inwood, West Virginia.

Currently, the Bank operates thirteen full-service banking branches in West Virginia and Virginia, which are located at: 301 Virginia Avenue in Fairmont, Marion County; 100 NASA Boulevard in Fairmont, Marion County; 1000 Johnson Avenue in Bridgeport, Harrison County; 406 West Main St. in Clarksburg, Harrison County; 88 Somerset Boulevard in Charles Town, Jefferson County; 651 Foxcroft Avenue in Martinsburg, Berkeley County; 704 Foxcroft Avenue in Martinsburg, Berkeley County; 5091 Gerrardstown Road in Inwood, Berkeley County; 2400 Cranberry Square in Cheat Lake, Monongalia County; 10 Sterling Drive in Morgantown, Monongalia County; 231 Aikens Center in Martinsburg, Berkeley County; 400 Washington Street East in Charleston, Kanawha County; and 1801 Old Reston Avenue Reston, Fairfax County.

MVB Insurance was originally formed in 2000 and reinstated in 2005, as a Bank subsidiary. Effective June 1, 2013, MVB Insurance became a direct subsidiary of the Company. MVB Insurance offered select insurance products such as title insurance, individual insurance, commercial insurance, employee benefits insurance, and professional liability insurance. On June 30, 2016, the Company entered into an Asset Purchase agreement with USI Insurance Services (“USI”), in which USI purchased substantially all of the assets and assumed certain liabilities of MVB Insurance, which resulted in a pre-tax gain of \$6.9 million, and was reported in discontinued operations, as discussed in Note 12. MVB Insurance retained the assets related to, and continues to operate, its title insurance business. The title insurance business is immaterial in terms of revenue and the Company has reorganized MVB Insurance as a subsidiary of the Bank.

Subsequent to the sale of MVB Insurance, the Company’s primary business activities, through its subsidiary, are currently community banking, and mortgage banking. As a community-based bank, the Bank offers its customers a full range of products through various delivery channels. Such products and services include checking accounts, NOW accounts, money market and savings accounts, time certificates of deposit, commercial, installment, commercial real estate and residential real estate mortgage loans, debit cards, and safe deposit rental facilities. Services are provided through our walk-in offices, automated teller machines (“ATMs”), drive-in facilities, and internet and telephone banking. Additionally, the Bank offers non-deposit investment products through an association with a broker-dealer. Since the opening date of January 4, 1999, the Bank has experienced significant growth in assets, loans, and deposits due to strong community and customer support in the Marion County and Harrison County, West Virginia markets, expansion into Monongalia and Kanawha Counties, West Virginia and, most recently, into Fairfax County, Virginia. With the acquisition of PMG, mortgage banking is now a much more significant focus, which has

opened up increased market opportunities in the Washington, D.C. metropolitan region and added enough volume to further diversify the Company's revenue stream.

This discussion and analysis should be read in conjunction with the prior year-end audited consolidated financial statements and footnotes thereto included in the Company's filing on Form 10-K and the unaudited financial statements, ratios, statistics, and discussions contained elsewhere in this Form 10-Q. At September 30, 2016, the Company had 362 full-time equivalent employees. The Company's principal office is located at 301 Virginia Avenue, Fairmont, West Virginia 26554, and its telephone number is (304) 363-4800. The Company's Internet web site is www.mvbbanking.com.

Table of Contents

Application of Critical Accounting Policies

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States and follow general practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions, and judgments. Application of certain accounting policies inherently requires a greater reliance on the use of estimates, assumptions and judgments and as such, the probability of actual results being materially different from reported estimates is increased. Estimates, assumptions, and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily through the use of internal forecasting techniques.

The most significant accounting policies followed by the Company are presented in Note 1 to the audited consolidated financial statements included in the Company's 2015 Annual Report on Form 10-K. These policies, along with the disclosures presented in the other financial statement notes and in management's discussion and analysis of operations, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, management has identified the determination of the allowance for loan losses to be the accounting area that requires the most subjective or complex judgments, and as such could be most subject to revision as new information becomes available.

The allowance for loan losses represents management's estimate of probable credit losses inherent in the loan portfolio. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment and the use of estimates related to the amount and timing of losses inherent in classifications of homogeneous loans based on historical loss experience of peer banks, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. Non-homogeneous loans are specifically evaluated due to the increased risks inherent in those loans. The loan portfolio also represents the largest asset type in the consolidated balance sheet. Note 1 to the consolidated financial statements in MVB's 10-K describes the methodology used to determine the allowance for loan losses and a discussion of the factors driving changes in the amount of the allowance for loan losses is included in the Allowance for Loan Losses section of Management's Discussion and Analysis in this quarterly report on Form 10-Q.

Results of Operations

Overview of the Statements of Income

Excluding discontinued operations, for the three months ended September 30, 2016, the Company earned \$2.3 million compared to \$1.5 million million in the third quarter of 2015. Net interest income increased by \$1.7 million, noninterest income increased by \$4.1 million and noninterest expenses increased by \$4.0 million. The increase in net interest income was driven mainly by the continued growth of the Company's balance sheet, with \$166.8 million in average loan growth and despite an increase in average interest bearing liabilities of \$154.2 million and an increase in interest expense of \$396 thousand. The increase in average interest bearing liabilities generated the increase in interest expense of \$396 thousand; \$145 thousand of the increase was related to an increase in certificates of deposit, which increased cost of funds by 17 basis points, \$257 thousand of the increase was related to MMDA, which increased the cost of funds by 20 basis points, and \$157 thousand of the increase was related to FHLB and other borrowings, which increased the cost of funds by 19 basis points. In addition, income tax expense increased from \$569 thousand to \$1.1 million which equated to an effective tax rate of 27.37% and 32.87%, respectively.

Table of Contents

Loan loss provisions of \$1.1 million and \$636 thousand were made for the quarters ended September 30, 2016 and 2015, respectively. The increase in loan loss provision is attributable primarily to quarterly adjustments to the qualitative factors that increased the loan loss allocation rates in effect during the third quarter of 2016, an increased level of charge offs, and the recognition of additional loan impairments. The increased charge offs and loan impairments were mainly concentrated in just three commercial loans, one of which is a \$1.1 million commercial real estate development loan, net of a \$535 thousand charge off, that is contractually current as of September 30, 2016, and continues to pay in accordance with the terms of the loan agreement. This loan is considered non-performing due to an extended period of interest only debt service requirements and the impairment of this loan has been increased to be an additional \$509 thousand during the third quarter of 2016, the result of an updated appraisal. The other two loans were related party commercial loans that were impacted by downturns in the coal industry and totaled \$366 thousand, net of \$679 thousand of partial charge-offs and \$435 thousand of proceeds received from the orderly liquidation of the collateral. The provision for loan losses, which is a product of management's formal quarterly analysis, is recorded in response to inherent losses in the loan portfolio. The Company charged off \$1.0 million in loans during the third quarter of 2016 versus \$304 thousand for the same time period in 2015. As noted above, charge offs of \$679 thousand, or 67% of the total third quarter 2016 charge offs, were attributable to the related party coal industry loans. Meanwhile, the remaining \$339 thousand, or 33%, of third quarter 2016 charge offs were attributable to one additional \$86 thousand commercial loan that was charged off in its entirety, and four consumer loans that incurred \$253 thousand in partial charge offs. All of these loans, with the exception of those charged off completely, were non-performing as of September 30, 2016.

Excluding discontinued operations, for the nine months ended September 30, 2016, the Company earned \$6.7 million compared to \$5.3 million for the nine months ended September 30, 2015. Net interest income increased by \$7.2 million, noninterest income increased by \$5.3 million and noninterest expenses increased by \$9.2 million. The increase in net interest income was driven mainly by the continued growth of the Company's balance sheet, with \$210.8 million in average loan growth and despite an increase in average interest bearing liabilities of \$200.7 million and an increase in interest expense of \$1.6 million. The increase in average interest bearing liabilities generated the increase in interest expense of \$1.6 million; \$710 thousand of the increase was related to an increase in certificates of deposit, which increased cost of funds by 15 basis points, \$559 thousand of the increase was related to MMDA, which increased the cost of funds by 16 basis points, and \$368 thousand of the increase was related to FHLB and other borrowings, which increased the cost of funds by 21 basis points. In addition, income tax expense increased from \$2.5 million to \$3.3 million which equated to an effective tax rate of 31.63% and 32.86%, respectively.

Loan loss provisions of \$3.0 million and \$1.9 million were made for the nine months ended September 30, 2016 and 2015, respectively. The increase in loan loss provision is attributable primarily to quarterly adjustments to the qualitative factors that increased loan loss allocation rates in effect during the third quarter of 2016, an increased level of charge offs, and the recognition of additional loan impairments. The increased charge offs and loan impairments were mainly concentrated in just three commercial loans, one of which is a \$1.1 million commercial real estate development loan, net of a \$535 thousand charge off, that is contractually current as of September 30, 2016, and continues to pay in accordance with the terms of the loan agreement. This loan is considered non-performing due to an extended period of interest only debt service requirements. The other two loans were related party commercial loans that were impacted by downturns in the coal industry and totaled \$366 thousand, net of \$679 thousand of partial charge-offs and \$435 thousand of proceeds received from the orderly liquidation of the collateral. The provision for loan losses, which is a product of management's formal quarterly analysis, is recorded in response to inherent losses in the loan portfolio. The Company charged off \$1.8 million in loans during the nine months ended September 30, 2016 versus \$727 thousand for the same time period in 2015. As noted above, a charge off of \$535 thousand, or 29% of the total 2016 charge offs, was attributable to the development loan while charge offs of \$679 thousand, or 37%, were attributable to the related party coal industry loans. Meanwhile, the remaining \$630 thousand of total 2016 charge offs were attributable to a variety of relatively smaller loans, including four commercial loans that incurred \$232 thousand, or 13%, of the total 2016 charge offs, six consumer loans that incurred a total of \$275 thousand, or 15%, or total 2016 charge offs, and two residential mortgage loans that incurred \$124 thousand, or 7%, of the total 2016 charge offs. All of these loans, with the exception of those charged off completely, were non-performing as of September 30, 2016.

Table of Contents

Interest Income and Expense

Net interest income is the amount by which interest income on earning assets exceeds interest expense on interest-bearing liabilities. Interest-earning assets include loans and investment securities. Interest-bearing liabilities include interest-bearing deposits and repurchase agreements, subordinated debt and Federal Home Loan Bank advances. Net interest income is a primary source of revenue for the bank. Changes in market interest rates, as well as changes in the mix and volume of interest-earning assets and interest-bearing liabilities impact net interest income. Net interest margin is calculated by dividing net interest income by average interest-earning assets. This ratio serves as a performance measurement of the net interest revenue stream generated by the Company's balance sheet. The net interest margin for the three months ended September 30, 2016 and 2015 was 3.17% and 3.11% respectively. The 6 basis point increase in the net interest margin for the quarter ended September 30, 2016 was the result of a 7 basis point increase in yield, largely the result of a 30 basis point increase in yield on consumer loans, a 17 basis point increase in yield on real estate loans, a 51 basis point increase in tax-exempt investment securities, and a 12 basis point increase on taxable investment securities. Cost of funds for the three months ended September 30, 2016 versus 2015 increased by 1 basis point. The cost of funds increase was mainly the result of a 19 basis point increase in FHLB and other borrowings, a 17 basis point increase in certificates of deposit and a 20 basis point increase in money market checking and offset by a 12 basis point decrease in NOW and an 10 basis point decrease in savings. The continued low rate environment and increasing competition for quality credit continues to apply pressure upon the Company's loan portfolio yield. The Company was able to grow average loan balances by \$166.8 million and average deposit balances by \$118.9 million, resulting in an increase in net interest income of \$1.7 million. Additionally, investment securities average balance increased by \$27.7 million through the purchase of available-for-sale securities, and the resulting securities earned higher rates in the loan portfolio. An increase in the Company's average non-interest bearing balances of \$21.8 million helped to sustain a 10 basis point favorable spread on net interest margin.

The net interest margin for the nine months ended September 30, 2016 and 2015 was 3.22% and 3.02% respectively. The 20 basis point increase in the net interest margin for the nine months ended September 30, 2016 was the result of a 21 basis point increase in yield, largely the result of a 18 basis point increase in yield on commercial loans, a 20 basis point increase in yield on real estate loans, and a 49 basis point increase in tax-exempt investment securities. The increase in yield on commercial loans was primarily the result of the recovery of non-accrual interest on one commercial lending relationship which contributed \$662 thousand to commercial loan interest income for the nine months ended September 30, 2016, representing 12 basis points of the increase in commercial loan yield for the nine months ended September 30, 2016. Cost of funds for the nine months ended September 30, 2016 versus 2015 increased by 3 basis points. The cost of funds increase was mainly the result of a 21 basis point increase in FHLB and other borrowings, a 15 basis point increase in certificates of deposit and a 16 basis point increase in money market checking and offset by a 8 basis point decrease in NOW and a 8 basis point decrease in savings. The continued low rate environment and increasing competition for quality credit continues to apply pressure upon the Company's loan portfolio yield. The Company was able to grow average loan balances by \$210.8 million and average deposit balances by \$187.8 million, resulting in an increase in net interest income of 7.2 million. Additionally, investment securities average balance increased by 17.1 million through the purchase of available-for-sale securities, and the resulting securities earned higher rates in the loan portfolio. An increase in the Company's average non-interest bearing balances of 19.3 million helped to sustain a 10 basis point favorable spread on net interest margin.

Company and Bank management continuously monitor the effects of net interest margin on the performance of the Bank and, thus, the Company. Growth and mix of the balance sheet will continue to impact net interest margin in future periods.

Table of Contents

Non-Interest Income

Mortgage fee income and gain on derivatives generate the core of the Company's noninterest income. Also, gain on sale of portfolio loans and interchange income continue to be part of the core of the Bank's noninterest income. In addition, beginning in the third quarter of 2015, the Bank began entering into swap loan agreements. These swap loan agreements allow the bank to offer customers fixed rate loans and the bank to "swap" the interest rate on the loans with a third party at a floating rate. This helps the Bank lower its exposure by improving the interest rate risk position and also produces current period non-interest income.

For the three months ended September 30, 2016, noninterest income totaled \$12.5 million compared to \$8.5 million for the same time period in 2015. The \$4.0 million increase in noninterest income was mainly the result of an increase in gain on derivatives of \$2.0 million and a \$1.7 million increase in mortgage fee income. The increase in gain on derivatives was largely the result of a 18% increase in the locked mortgage loan pipeline for the three months ended September 30, 2016 compared to the three months ended September 30, 2015. In addition, loans held for sale increased from \$73.0 million at September 30, 2015 to \$123.1 million at September 30, 2016. The increase in mortgage fee income was due to a \$106.0 million or 16% increase in loan sale volume combined with a flat gain on sale margin.

For the nine months ended September 30, 2016, noninterest income totaled \$33.1 million compared to \$27.9 million for the same time period in 2015. The \$5.2 million increase in noninterest income was mainly the result of a \$3.0 million increase in mortgage fee income, a \$952 thousand increase in gain on sale of securities and a \$1.4 million increase in gain on derivatives. The increase in mortgage fee income was due to a \$143.5 million or 13.8% increase in loan sale volume combined with a flat gain on sale margin. The increase in gain on sale of securities was the result of selling \$42.3 million more investment securities during the nine months ended September 30, 2016 versus the same time period in 2015. The increase in gain on derivatives was largely the result of an 13% increase in the locked mortgage loan pipeline for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015. In addition, loans held for sale increased from \$73.0 million at September 30, 2015 to \$123.1 million at September 30, 2016.

Non-Interest Expense

The Company had 362 full-time equivalent personnel at September 30, 2016, as noted, compared to 376 full-time equivalent personnel as of September 30, 2015. Company and Bank management will continue to strive to find new ways of increasing efficiencies and leveraging its resources, while effectively optimizing customer service. Salaries and employee benefits, occupancy and equipment, data processing and communications, mortgage processing and professional fees generate the core of the Company's noninterest expense. The Company's efficiency ratio was 80.58% for the third quarter of 2016 compared to 84.46% for the third quarter of 2015. This ratio measures the efficiency of noninterest expenses incurred in relationship to net interest income plus noninterest income. The decreased efficiency ratio is the result of net interest income and noninterest income outpacing the growth in noninterest expense.

For the three months ended September 30, 2016, noninterest expense totaled \$18.7 million compared to \$14.8 million for the same time period in 2015. The \$3.9 million increase in noninterest expense was mainly the result of the following:

Salaries and employee benefits expense increased \$3.1 million, this increase related to: the addition of new bank and mortgage offices, increased incentives and commissions related to goal attainment and production, additional staffing related to organic growth and raises for existing staff.

Occupancy and equipment expense increased \$157 thousand. This increase was mainly the result of the opening of multiple new bank and mortgage office locations.

Data processing and communication costs increased \$387 thousand. This increase was largely driven by a \$300 thousand core vendor termination fee that was accrued for in September 2016. In addition, overall growth in terms of client base, personnel and office space, and the usage of new and enhanced products, services and providers to better serve the client base also drove the increase.

Other operating expenses increased \$630 thousand. The increase was offset by a decrease in gains on the sale of other real estate properties.

The Company's efficiency ratio was 80.23% for the nine months ended September 30, 2016 compared to 81.69% for the same period in 2015. This ratio measures the efficiency of noninterest expenses incurred in relationship to net interest income plus noninterest income. The decreased efficiency ratio is the result of net interest income and noninterest income outpacing the growth in noninterest expense.

Table of Contents

For the nine months ended September 30, 2016, noninterest expense totaled \$52.4 million compared to \$43.2 million for the same time period in 2015. The \$9.2 million increase in noninterest expense was mainly the result of the following:

Salaries and employee benefits expense increased \$7.0 million, this increase related to: the addition of new bank and mortgage offices, increased incentives and commissions related to goal attainment and production, additional staffing related to organic growth and raises for existing staff.

Occupancy and equipment expense increased \$581 thousand. This increase was mainly the result of the opening of multiple new bank and mortgage office locations.

Data processing and communication costs increased \$949 thousand. This increase was largely driven by a \$300 thousand core vendor termination fee that was accrued for in September 2016. In addition, overall growth in terms of client base, personnel and office space, and the usage of new and enhanced products, services and providers to better serve the client base also drove the increase.

Other operating expenses increased \$503 thousand. The increase was primarily the result of a decrease in gains on the sale of other real estate properties.

Return on Average Assets and Average Equity (Annualized)

Excluding discontinued operations, returns on average assets (ROA) and average equity (ROE) annualized were 0.64% and 7.32% for the three months ended September 30, 2016 compared to 0.48% and 5.35% in the three months ended September 30, 2015. The 0.16% increase in ROA is due to increased earnings from continuing operations of \$800 thousand and slightly offset by a \$195.8 million increase in average assets for the three months ended September 30, 2016 compared to the three months ended September 30, 2015. The increase in average assets was primarily due to an increase in net loans due to continued loan growth. The 1.97% increase in ROE is also due to increased earnings of \$800 thousand and a \$13.5 million increase in average equity for the three months ended September 30, 2015 compared to the three months ended September 30, 2015. The increase in average equity was mainly due to increased earnings.

Excluding discontinued operations, returns on average assets (ROA) and average equity (ROE) annualized were 0.62% and 7.41% for the nine months ended September 30, 2016 compared to 0.60% and 6.41% in the nine months ended September 30, 2015. The 0.02% increase in ROA is due to increased earnings from continuing operations of \$1.3 million but was nearly outpaced by a \$232.5 million increase in average assets for the nine months ended September 30, 2016 compared to the nine months ended September 30, 2015. The increase in average assets was primarily due to an increase in net loans due to continued loan growth. The 1.00% increase in ROE is also due to increased earnings of \$1.3 million and a \$8.7 million increase in average equity for the nine months ended September 30, 2016 compared to the three months ended September 30, 2015. The increase in average equity was mainly due to increased earnings.

Overview of the Statement of Condition

The Company's interest-earning assets, interest-bearing liabilities, and stockholders' equity changed significantly during the third quarter of 2016 compared to the quarter ended September 30, 2015. The most significant areas of change between the quarters ended September 30, 2016 and September 30, 2015 were as follows: total loans increased to an average balance of \$1.2 billion from \$1.0 billion, investment securities increased \$27.7 million to an average of \$146.0 million, interest-bearing liabilities grew to an average balance of \$1.2 billion from \$1.0 billion and stockholders' equity grew \$13.5 million to an average of \$126.3 million. These trends reflect the continued growth of the Company and its subsidiary in the loan, deposit and capital areas.

Total assets at September 30, 2016 were \$1.5 billion or an increase of \$84.1 million since December 31, 2015. The greatest area of increase was a \$42.8 million increase in net loan growth.

Deposits totaled \$1.1 billion at September 30, 2016 or an increase of \$114.5 million since December 31, 2015, mainly the result of an increase in savings, NOW and time deposits.

Stockholders' equity has increased approximately \$10.7 million from December 31, 2015 largely due to earnings for the nine months ended September 30, 2016 of \$10.6 million. In addition, unrealized gains on available-for-sale securities increased \$1.3 million, in part due to the reclassification of all held-to-maturity investments into available-for-sale investments. Also, pension liability was reduced by \$430 thousand.

Table of Contents**Cash and Cash Equivalents**

Cash and cash equivalents totaled \$28.8 million as of September 30, 2016 compared to \$29.1 million as of December 31, 2015.

Total cash and cash equivalents fluctuate on a daily basis due to transactions in process and other liquidity and performance demands. Management believes the liquidity needs of the Company are satisfied by the current balance of cash and cash equivalents, readily available access to traditional and non-traditional funding sources, and the portions of the investment and loan portfolios that mature within one year. These sources of funds should enable the Company and the Bank to meet cash obligations as they come due.

Investment Securities

Prior to the final determination of Basel III, investments were recorded as held-to-maturity due to the uncertainty of the capital treatment of available-for-sale investments. Upon the issuance of the final ruling, the Company opted out of the Other Comprehensive Income treatment of available-for-sale investments permitted under Basel III. Due to the change in capital treatment under the final ruling of Basel III, the Company's purpose of recording investments as held-to-maturity changed; therefore, during the period ended March 31, 2016, the Company reclassified \$52.4 million of the remaining held-to-maturity investments into available-for-sale investments.

Investment securities totaled \$152.2 million as of September 30, 2016 and \$123.1 million as of December 31, 2015.

As of September 30, 2016, the investment portfolio is comprised of the following mix of securities:

- 45.7% of municipal securities
- 13.0% - U.S. Agency securities
- 36.6% - U.S. Sponsored Mortgage-backed securities
- 4.7% - Equity and other securities

The Company and Bank management monitor the earnings performance and liquidity of the investment portfolio on a regular basis through Asset/Liability Committee meetings. The group also monitors net interest income and pricing guidelines, and manages interest rate risk for the bank. Through active balance sheet management and analysis of the investment securities portfolio, the bank maintains sufficient liquidity to satisfy depositor requirements and the various credit needs of its customers. The Company and Bank management believes the risk characteristics inherent in the investment portfolio are acceptable based on these parameters.

Loans

The Company's loan portfolio totaled \$1.1 billion as of September 30, 2016 and \$1.0 billion as of December 31, 2015. The Bank's lending is primarily focused in the Marion, Harrison, Jefferson, Berkeley, Monongalia, and Kanawha counties of West Virginia, as well as the northern Virginia area for the mortgage and commercial lending business. Its extended market is in the adjacent counties. The portfolio consists principally of commercial lending, retail lending, which includes single-family residential mortgages, and consumer lending. The growth in loans is primarily attributable to organic growth within the Bank's primary lending areas and northern Virginia.

Loan Concentration

At September 30, 2016 and December 31, 2015, \$750.0 million, or 69.7% and \$729.3 million, or 70.7%, respectively, of our loan portfolio consisted of commercial loans. A significant portion of the nonresidential real estate loan portfolio is secured by commercial real estate. The majority of nonresidential real estate loans that are not secured by real estate are lines of credit secured by accounts receivable and equipment and obligations of states and political subdivisions. While the loan concentration is in nonresidential real estate loans, the nonresidential real estate portfolio is comprised of loans to many different borrowers, in numerous different industries but primarily located in our market areas.

Table of Contents

Allowance for Loan Losses

The allowance for loan losses was \$9.2 million or 0.85% of total loans at September 30, 2016 compared to \$8.0 million or 0.78% of total loans at December 31, 2015. The increase in this ratio was the direct result of the increase in loan loss provision noted previously in the Overview of the Statements of Income on page 44. An increase of the overall loan loss allocation rates caused by adjustments to the qualitative factors, an increased level of charge offs, and the recognition of additional loan impairments each attributed to the increased loan loss provision. Furthermore, this increased level of loan loss provision occurred in conjunction with a period of relatively lower loan growth, thus creating an increase in the allowance for loan losses as a percentage of total loans. The Bank management continually monitors the risk in the loan portfolio through review of the monthly delinquency reports and the Loan Review Committee. The Loan Review Committee is responsible for the determination of the adequacy of the allowance for loan losses. This analysis involves both experience of the portfolio to date and the makeup of the overall portfolio. Specific loss estimates are derived for individual loans based on specific criteria such as current delinquent status, related deposit account activity, where applicable, and changes in the local and national economy. When appropriate, Management also considers public knowledge and/or verifiable information from the local market to assess risks to specific loans and the loan portfolios as a whole.

Capital Resources

The Company considers a number of alternatives, including but not limited to deposits, short-term borrowings and long-term borrowings when evaluating funding sources. Traditional deposits continue to be the most significant source of funds for the bank, reaching \$1.1 billion at September 30, 2016.

Non-interest bearing deposits remain a core funding source for the Bank and, thus, the Company. At September 30, 2016, non-interest bearing deposits totaled \$105.8 million compared to \$80.4 million at December 31, 2015. The Company and Bank management intend to continue to focus on finding ways to increase the base of non-interest bearing funding sources of the Bank and its subsidiaries.

Interest-bearing deposits totaled \$1.0 billion at September 30, 2016 compared to \$931.9 million at December 31, 2015. Average interest-bearing liabilities totaled \$1.2 billion for the nine months ended September 30, 2016 compared to \$997.0 million for the same time period in 2015. This \$200.7 million increase is the result of the following: \$44.9 million increase in CDs, \$26.9 million increase in NOW accounts, \$85.5 million increase in MMDA and \$32.0 million increase in FHLB and other borrowings. Average non-interest bearing demand deposits totaled \$96.6 million for the nine months ended September 30, 2016 compared to \$77.3 million for the same time period in 2015. Management will continue to emphasize deposit gathering in 2016 by offering outstanding customer service and competitively priced products. The Company and Bank management will also concentrate on balancing deposit growth with adequate net interest margin to meet the Company's strategic goals.

Along with traditional deposits, the Bank has access to both repurchase agreements, which are corporate deposits secured by pledging securities from the investment portfolio, and Federal Home Loan Bank borrowings to fund its operations and investments. At September 30, 2016, repurchase agreements totaled \$27.2 million compared to \$27.4 million at December 31, 2015. In addition to the aforementioned funds alternatives, the Bank has access to more than \$291.5 million through additional advances from the Federal Home Loan Bank of Pittsburgh and the ability to readily sell jumbo certificates of deposits to other banks as well as brokered deposit markets.

Liquidity

Maintenance of a sufficient level of liquidity is a primary objective of the Asset and Liability Committee ("ALCO"). Liquidity, as defined by the ALCO, is the ability to meet anticipated operating cash needs, loan demand, and deposit withdrawals, without incurring a sustained negative impact on net interest income. It is MVB's policy to manage liquidity so that there is no need to make unplanned sales of assets or to borrow funds under emergency conditions. The main source of liquidity for the Bank comes through deposit growth. Liquidity is also provided from cash generated from investment maturities, principal payments from loans, and income from loans and investment securities. During the nine months ended September 30, 2016, cash provided by financing activities totaled \$65.9 million, while outflows from investing activity totaled \$57.7 million. When appropriate, the Bank has the ability to take advantage of external sources of funds such as advances from the Federal Home Loan Bank (FHLB), national market certificate of deposit issuance programs, the Federal Reserve discount window, brokered deposits and

CDARS. These external sources often provide attractive interest rates and flexible maturity dates that enable the Bank to match funding with contractual maturity dates of assets. Securities in the investment portfolio are primarily classified as available-for-sale and can be utilized as an additional source of liquidity.

Table of Contents

The Company has an effective shelf registration covering \$75 million of debt and equity securities, all of which remains available, subject to Board authorization and market conditions, to issue equity or debt securities at our discretion. While we seek to preserve flexibility with respect to cash requirements, there can be no assurance that market conditions would permit us to sell securities on acceptable terms at any given time or at all.

Current Economic Conditions

The Company's primary market areas are the Marion, Harrison, Jefferson, Berkeley, Monongalia, and Kanawha counties of West Virginia and Fairfax county of Virginia. In addition, MVB Mortgage has mortgage only offices located in Virginia, Washington, DC, as well as North Carolina and South Carolina and, in addition, has mortgage loan originators located at select Bank locations throughout West Virginia.

The current economic climate in the Company's primary market areas reflect economic climates that are generally more favorable than the general national climate. Unemployment in the United States was 4.8% and 4.9% in September 30, 2016 and 2015, respectively. The unemployment levels in the Company's primary market areas were as follows for the periods indicated:

	August 2016	August 2015
Berkeley County, WV	4.00 %	5.10 %
Harrison County, WV	5.50 %	6.60 %
Jefferson County, WV	3.40 %	4.20 %
Marion County, WV	6.00 %	7.50 %
Monongalia County, WV	4.50 %	5.30 %
Kanawha County, WV	5.20 %	6.00 %
Fairfax County, VA	3.20 %	3.50 %

Nonperforming loans to total loans were 0.95% as of September 30, 2016 versus 0.94% as of September 30, 2015. Charge offs to total loans were 0.17% and 0.07% for the nine months ended September 30, 2016 and 2015, respectively. The Company and the Bank continue to closely monitor economic and delinquency trends.

The Company originates various types of loans, including commercial and commercial real estate loans, residential real estate loans, home equity lines of credit, real estate construction loans, and consumer loans (loans to individuals). In general, the Company retains most of its originated loans (exclusive of certain long-term, fixed rate residential mortgages that are sold.) However, loans originated in excess of the Bank's legal lending limit are participated to other banking institutions and the servicing of those loans is retained by the bank.

The energy industry, consisting of coal and natural gas, which has been negatively impacted by the decline in energy commodity prices, are elements of the West Virginia economy and numerous markets in which the Company operates. The Company has limited exposure in both the coal and natural gas industry. As of September 30, 2016 and December 31, 2015, the outstanding loan balances to coal and natural gas production clients was \$7.2 million and \$7.3 million, respectively.

Capital/Stockholders' Equity

The Company and the Bank have financed operations and growth over the years through the sale of equity. These equity sales have resulted in an effective source of capital.

At September 30, 2016, accumulated other comprehensive loss totaled \$2.0 million compared to \$2.9 million at December 31, 2015. This change is primarily the result in the rise of the change in the value of the unrealized loss on available for sale securities in large part due to the reclassification of all held-to-maturity investments into available-for-sale investments.

Treasury stock shares totaled 51,077 shares.

The Board of Directors of the Company approved a transition from a semi-annual dividend to a quarterly dividend on August 18, 2015 and declared its first quarterly cash dividend to shareholders of record at the close of business on September 1, 2015, payable September 15, 2015.

The primary source of funds for dividends to be paid by the Company are dividends received by the Company from the Bank. Dividends paid by the Bank are subject to restrictions by banking regulations. The most restrictive provision requires regulatory

Table of Contents

approval if dividends declared in any year exceed that year's retained net profits, as defined, plus the retained net profits, as defined, of the two preceding years.

Capital Requirements

The Bank's total risk based capital ratio increased from 12.19% at December 31, 2015 to 12.30% at September 30, 2016. The increase in this ratio was largely due to a \$13.4 million increase in total bank capital.

The Company and the Bank are each required to comply with applicable capital adequacy standards established by the Federal Reserve Board and the FDIC, respectively ("Capital Rules"). State chartered banks, such as the Bank, are subject to similar capital requirements adopted by the West Virginia Division of Financial Institutions.

The Capital Rules, among other things, (i) introduce a new capital measure called "Common Equity Tier 1" ("CET1"), (ii) specify that Tier 1 capital consists of CET1 and "Additional Tier 1 capital" instruments meeting certain revised requirements, (iii) define CET1 narrowly by requiring that most deductions/adjustments to regulatory capital measures be made to CET1 and not to the other components of capital, and (iv) expand the scope of the deductions/adjustments to capital as compared to existing regulations.

Under the Capital Rules, the minimum capital ratios effective as of January 1, 2015 are:

• 4.5% CET1 to risk-weighted assets;

• 6.0% Tier 1 capital (that is, CET1 plus Additional Tier 1 capital) to risk-weighted assets;

• 8.0% Total capital (that is, Tier 1 capital plus Tier 2 capital) to risk-weighted assets;

and

• 4.0% Tier 1 capital to average consolidated assets as reported on consolidated financial statements (known as the "leverage ratio").

The Capital Rules also introduced a new "capital conservation buffer", composed entirely of CET1, on top of these minimum risk-weighted asset ratios. The implementation of the capital conservation buffer began on January 1, 2016 at the 0.625% level and will increase by 0.625% on each subsequent January 1, until it reaches 2.5% on January 1, 2019. The Capital Rules also provide for a "countercyclical capital buffer" that is only applicable to certain covered institutions and does not have any current applicability to the Company or the Bank. The capital conservation buffer is designed to absorb losses during periods of economic stress and effectively increases the minimum required risk-weighted capital ratios. Banking institutions with a ratio of CET1 to risk-weighted assets below the effective minimum (4.5% plus the capital conservation buffer and, if applicable, the countercyclical capital buffer) will face constraints on dividends, equity repurchases and compensation based on the amount of the shortfall.

When fully phased in on January 1, 2019, the Capital Rules will require the Company and the Bank to maintain an additional capital conservation buffer of 2.5% of CET1, effectively resulting in minimum ratios of (i) CET1 to risk-weighted assets of at least 7%, (ii) Tier 1 capital to risk-weighted assets of at least 8.5%, (iii) a minimum ratio of Total capital to risk-weighted assets of at least 10.5%; and (iv) a minimum leverage ratio of 4%. The Capital Rules also provide for a number of deductions from and adjustments to CET1.

The Capital Rules prescribe a standardized approach for risk weightings that expanded the risk-weighting categories from the general risk-based capital rules to a much larger and more risk-sensitive number of categories, depending on the nature of the assets, generally ranging from 0% for U.S. government and agency securities, to 600% for certain equity exposures, and resulting in higher risk weights for a variety of asset categories.

With respect to the Bank, the Capital Rules also revise the "prompt corrective action" regulations pursuant to Section 38 of the Federal Deposit Insurance Act, as discussed below under "Prompt Corrective Action."

Prompt Corrective Action

The Federal Deposit Insurance Act ("FDIA") requires among other things, the federal banking agencies to take "prompt corrective action" in respect of depository institutions that do not meet minimum capital requirements. The FDIA includes the following five capital tiers: "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized." A depository institution's capital tier will depend upon how its capital levels compare with various relevant capital measures and certain other factors, as established by regulation. The relevant capital measures, which reflect changes under the Capital Rules that became effective on January 1, 2015, are the total capital ratio, the CET1 capital ratio, the Tier 1 capital ratio and the leverage ratio.

Table of Contents

A bank will be (i) “well capitalized” if the institution has a total risk-based capital ratio of 10.0% or greater, a CET1 capital ratio of 6.5% or greater, a Tier 1 risk-based capital ratio of 8.0% or greater, and a leverage ratio of 5.0% or greater, and is not subject to any order or written directive by any such regulatory authority to meet and maintain a specific capital level for any capital measure; (ii) “adequately capitalized” if the institution has a total risk-based capital ratio of 8.0% or greater, a CET1 capital ratio of 4.5% or greater, a Tier 1 risk-based capital ratio of 6.0% or greater, and a leverage ratio of 4.0% or greater and is not “well capitalized”; (iii) “undercapitalized” if the institution has a total risk-based capital ratio that is less than 8.0%, a CET1 capital ratio less than 4.5%, a Tier 1 risk-based capital ratio of less than 6.0% or a leverage ratio of less than 4.0%; (iv) “significantly undercapitalized” if the institution has a total risk-based capital ratio of less than 6.0%, a CET1 capital ratio less than 3.0%, a Tier 1 risk-based capital ratio of less than 4.0% or a leverage ratio of less than 3.0%; and (v) “critically undercapitalized” if the institution’s tangible equity is equal to or less than 2.0% of average quarterly tangible assets. An institution may be downgraded to, or deemed to be in, a capital category that is lower than indicated by its capital ratios if it is determined to be in an unsafe or unsound condition or if it receives an unsatisfactory examination rating with respect to certain matters. A bank’s capital category is determined solely for the purpose of applying prompt corrective action regulations, and the capital category may not constitute an accurate representation of the bank’s overall financial condition or prospects for other purposes.

The FDIA generally prohibits a depository institution from making any capital distributions (including payment of a dividend) or paying any management fee to its parent holding company if the depository institution would thereafter be “undercapitalized.” “Undercapitalized” institutions are subject to growth limitations and are required to submit a capital restoration plan. The agencies may not accept such a plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution’s capital. In addition, for a capital restoration plan to be acceptable, the depository institution’s parent holding company must guarantee that the institution will comply with such capital restoration plan. The bank holding company must also provide appropriate assurances of performance. The aggregate liability of the parent holding company is limited to the lesser of (i) an amount equal to 5.0% of the depository institution’s total assets at the time it became undercapitalized and (ii) the amount which is necessary (or would have been necessary) to bring the institution into compliance with all capital standards applicable with respect to such institution as of the time it fails to comply with the plan. If a depository institution fails to submit an acceptable plan, it is treated as if it is “significantly undercapitalized.”

“Significantly undercapitalized” depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become “adequately capitalized,” requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks. “Critically undercapitalized” institutions are subject to the appointment of a receiver or conservator.

The appropriate federal banking agency may, under certain circumstances, reclassify a well capitalized insured depository institution as adequately capitalized. The FDIA provides that an institution may be reclassified if the appropriate federal banking agency determines (after notice and opportunity for hearing) that the institution is in an unsafe or unsound condition or deems the institution to be engaging in an unsafe or unsound practice.

The appropriate agency is also permitted to require an adequately capitalized or undercapitalized institution to comply with the supervisory provisions as if the institution were in the next lower category (but not treat a significantly undercapitalized institution as critically undercapitalized) based on supervisory information other than the capital levels of the institution.

In addition to the “prompt corrective action” directives, failure to meet capital guidelines may subject a banking organization to a variety of other enforcement remedies, including additional substantial restrictions on its operations and activities, termination of deposit insurance by the FDIC and, under certain conditions, the appointment of a conservator or receiver.

For further information regarding the capital ratios and leverage ratio of the Company and the Bank see the discussion under the section captioned “Capital/Stockholders’ Equity” included in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations and Note 14, “Regulatory Capital Requirements” of the Notes to the Consolidated Financial Statements included in Item 8 of the Company’s 2015 Form 10-K.

Commitments and Contingent Liabilities

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the statements of financial condition.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The

Table of Contents

Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount and type of collateral obtained, if deemed necessary by the Company upon extension of credit, varies and is based on management's credit evaluation of the customer.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Standby letters of credit generally have fixed expiration dates or other termination clauses and may require payment of a fee. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers. The Company's policy for obtaining collateral, and the nature of such collateral, is essentially the same as that involved in making commitments to extend credit.

Concentration of Credit Risk

The Company grants a majority of its commercial, financial, agricultural, real estate and installment loans to customers throughout the Marion, Harrison, Monongalia, Kanawha, Jefferson and Berkeley County areas of West Virginia as well as the Northern Virginia area and adjacent counties. Collateral for loans is primarily residential and commercial real estate, personal property, and business equipment. The Company evaluates the credit worthiness of each of its customers on a case-by-case basis, and the amount of collateral it obtains is based upon management's credit evaluation.

Regulatory

The Company is required to maintain certain reserve balances on hand in accordance with the Federal Reserve Board requirements. The average balance maintained in accordance with such requirements was \$12.2 million and \$17.0 million on September 30, 2016 and December 31, 2015, respectively. On October 4, 2016, the Company began utilizing a software platform to aid in minimizing the daily reserve requirement with the Federal Reserve Board.

Contingent Liability

The subsidiary bank is involved in various legal actions arising in the ordinary course of business. In the opinion of management and counsel, the outcome of these matters will not have a significant adverse effect on the consolidated financial statements.

Off-Balance Sheet Commitments

The Bank has entered into certain agreements that represent off-balance sheet arrangements that could have a significant impact on the consolidated financial statements and could have a significant impact in future periods. Specifically, the Bank has entered into agreements to extend credit or provide conditional payments pursuant to standby and commercial letters of credit.

Commitments to extend credit, including loan commitments, standby letters of credit, and commercial letters of credit do not necessarily represent future cash requirements, in that these commitments often expire without being drawn upon.

Market Risk

There have been no material changes in market risks faced by the Company since December 31, 2015. For information regarding the Company's market risk, refer to the Company's Annual Report to Shareholders for the year ended December 31, 2015.

Effects of Inflation on Financial Statements

Substantially all of the Bank's assets relate to banking and are monetary in nature. Therefore, they are not impacted by inflation to the same degree as companies in capital-intensive industries in a replacement cost environment. During a period of rising prices, a net monetary asset position results in loss in purchasing power and conversely a net monetary liability position results in an increase in purchasing power. In the banking industry, typically monetary assets exceed monetary liabilities. Therefore as prices increase, financial institutions experience a decline in the purchasing power of their net assets.

Table of Contents

Future Outlook

The Company's net income from continuing operations increased in the third quarter of 2016 compared to the third quarter of 2015 mainly due to an increase in net interest income, an increase in gain on derivatives, an increase in mortgage fee income and offset partially by an increase in noninterest expense. The Company has invested in the infrastructure to support envisioned future growth in each key area, including personnel, technology and processes to meet the growing compliance requirements in the industry. Commercial and retail loan production remains strong and mortgage has added staff and locations to ramp up production and improve profitability. The Company believes it is well positioned in some of the finest markets in the states of West Virginia and Virginia and will focus on doing the things that have made it successful thus far through the following: margin improvement; leveraging capital; organic portfolio loan growth; and operating efficiency. The critical challenge for the Company in the future is to attract core deposits to fund growth in the new markets through continued delivery of the most outstanding customer service with the highest quality products and technology.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's market risk is composed primarily of interest rate risk. The ALCO is responsible for reviewing the interest rate sensitivity position and establishes policies to monitor and coordinate the Company's sources, uses, and pricing of funds.

Interest Rate Sensitivity Management

The Company uses a simulation model to analyze, manage and formulate operating strategies that address net interest income sensitivity to movements in interest rates. The simulation model projects net interest income based on various interest rate scenarios over a twenty-four month period. The model is based on the actual maturity and re-pricing characteristics of rate sensitive assets and liabilities. The model incorporates certain assumptions which management believes to be reasonable regarding the impact of changing interest rates and the prepayment assumption of certain assets and liabilities as of June 30, 2016. The model assumes changes in interest rates without any management intervention to change the composition of the balance sheet. According to the model run for the period ended June 30, 2016, over a twelve month period an immediate 100 basis point increase in interest rates would result in an increase in net interest income by 3.22%. An immediate 200 basis point increase in interest rates would result in an increase in net interest income by 5.95%. A 100 basis point decrease in interest rates would result in a decrease in net interest income of 5.92%. While management carefully monitors the exposure to changes in interest rates and takes actions as warranted to decrease any adverse impact, there can be no assurance about the actual effect of interest rate changes on net interest income.

The Company's net interest income and the fair value of its financial instruments are influenced by changes in the level of interest rates. The Company manages its exposure to fluctuations in interest rates through policies established by its ALCO. The ALCO meets quarterly and has responsibility for formulating and implementing strategies to improve balance sheet positioning and reviewing interest rate sensitivity.

We have counter-party risk which may arise from the possible inability of the Company's third-party investors to meet the terms of their forward sales contracts. The Company works with third-party investors that are generally well-capitalized, are investment grade and exhibit strong financial performance to mitigate this risk. We do not expect any third-party investor to fail to meet its obligation. We monitor the financial condition of these third parties on an annual basis. We do not expect these third parties to fail to meet their obligations.

Item 4. Controls and Procedures

The Company, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, along with the Company's Chief Financial Officer (the Principal Financial Officer), has evaluated the effectiveness as of September 30, 2016, of the design and operation of the Company's disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based upon that evaluation, the Company's Chief Executive Officer, along with the Company's Principal Accounting Officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2016.

There have been no material changes in the Company's internal control over financial reporting during the third quarter of 2016 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over

financial reporting.
Part II. Other Information

55

Table of Contents

Item 1. Legal Proceedings

From time to time in the ordinary course of business, the Company and its subsidiary are subject to claims, asserted or unasserted, or named as a party to lawsuits or investigations. Litigation, in general, and intellectual property and securities litigation in particular, can be expensive and disruptive to normal business operations. Moreover, the results of legal proceedings cannot be predicted with any certainty and in the case of more complex legal proceedings, the results are difficult to predict at all. The Company is not aware of any asserted or unasserted legal proceedings or claims that the Company believes would have a material adverse effect on the Company's financial condition or results of the Company's operations.

Item 1A. Risk Factors

Our operations are subject to many risks that could adversely affect our future financial condition and performance and, therefore, the market value of our securities, including the risk factors that are described in our Annual Report to Shareholders on Form 10-K for the year ended December 31, 2015. There have been no material changes in our risk factors from those disclosed.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the first quarter of 2014, the Company began a private offering under Regulation D of the Securities Act of 1933, as amended (the "Securities Act") of subordinated promissory notes and preferred stock. During the six month period ended June 30, 2014, the Company received net proceeds related to subscriptions for subordinated promissory notes totaling \$29.3 million. In addition, during the same period, the Company received subscriptions for seven hundred eighty-three preferred stock shares totaling \$7.8 million in additional capital. The proceeds of these subordinated debt and preferred stock offerings will be used to support continued growth of the Company and its Subsidiary.

During 2013, the Company commenced a private offering under Rule 506 of Regulation D of its common stock to accredited investors. As of December 31, 2013, the Company had received subscriptions for 610,194 common stock shares totaling \$9.8 million in additional capital. During the six month period ended June 30, 2014, the Company received additional subscriptions for 361,865 common stock shares totaling \$5.8 million in additional capital at September 30, 2014. The proceeds of this offering are also being used to support continued growth of the Company and its Subsidiary.
