15. In April 2010, Bradesco and Banco do Brasil signed a Memorandum of Understanding to enter into a partnership to manage a Brazilian brand of credit, debt and prepaid cards for both account holders and customers without accounts at the Bank, called "Elo", which will, among other activities, also create new business opportunities for private-label cards.

16. In June 2010, Bradesco completed the acquisition of controlling interest in Ibi Services S. de R.L. México (Ibi México) and RFS Human Management S. de R.L., Ibi México's subsidiary, for approximately R\$297 million. The transaction comprises a 20-year partnership with C&A México S. de R.L. (C&A México).

17. In July 2010, Bradesco concluded the acquisition of 2.09% of capital in Cielo S.A. for R\$431.7 million, and 10.67% of the capital in Companhia Brasileira de Soluções e Serviços CBSS for R\$141.4 million.

18. Main Awards and Recognitions in the second quarter of 2010:

- Bradesco was the first financial institution to win the "Modern Consumer Award of Excellence in Customer Service", in three categories: Retail Bank, Premium Bank and Credit Cards (*Consumidor Moderno* magazine / GKF);

- Grupo Bradesco de Seguros e Previdência was the highlight in the 7th edition of the "Prêmio Segurador Brasil" (Brazilian Insurer Award), receiving recognition in seven categories (*Editores Brasil Notícias*);

- Bradesco is the largest private Brazilian group among the 100 largest companies on the planet (Ranking-Forbes 2000);

- Bradesco is the private company and financial institution with the most valuable brand in Brazil, which was appraised at R\$14.9 billion, based on a study conducted by the specialized consulting firm BrandAnalytics/Millward Brown (*IstoÉ Dinheiro* magazine).

- Bradesco is the best stock fund manager according to a survey conducted by Standard & Poor's (*ValorInveste* magazine); and

- The 2008 Bradesco Sustainability Report was the winner of the GRI Reader's Choice Awards 2010 in the Most Effective Report Category (Global Reporting Initiative).

19. On the sustainability front, Bradesco divides its actions into three pillars: (i) Sustainable Finances, with a focus on banking inclusion, social and environmental variables for loan approvals and offering social and environmental products; (ii) Responsible Management, focused on valuing professionals, improving the workplace and adopting eco-efficient practices; and (iii) Social and Environmental Investments, focusing on education, the environment, culture and sports. The highlight in this area is Fundação Bradesco, which for 53 years has been developing a broad social and educational program that operates 40 schools across Brazil. In 2010, a R\$268.010 million budget will provide over 660 thousand service events, of which 112 thousand were provided to students in its own schools. In addition, the more than 50 thousand basic education students also receive, at no charge, uniforms, school supplies, meals and health and dental assistance. Over 550 thousand students will be served through the Virtual School, its e-learning portal, through the Digital Inclusion Centers (CIDs) and through programs conducted under strategic partnerships, like *Educa+Ação*.

Summarized Analysis of Adjusted Income

To improve the understanding, comparability and analysis of Bradesco's results, we use the Adjusted Statement of Income for the analyses and comments contained in this Report on Economic and Financial Analysis, which is obtained from adjustments made to the Book

Statement of Income, and detailed at the end of this Press Release. Note that the Adjusted Statement of Income is the base adopted for the analyses and comments made in chapters 1 and 2 of this report.

Adjusted Net Income and Profitability

In the second quarter of 2010, Bradesco's Adjusted Net Income was R\$2,455 million, an increase of 14.3% or R\$308 million from the previous quarter, which was primarily impacted by: (i) the growth in financial margin; (ii) higher fee and commission income; and (iii) higher income from the insurance, private pension and savings bond operations. In the six months ended June 30, 2010, adjusted net income reached R\$4,602 million, up 16.4% or R\$650 million from the same period in 2009.

The main causes of this result are described below in the analysis of main income statement items, with the consolidation of Banco Ibi's income accounts as of November 2009.

Shareholders Equity was R\$44,295 million on June 30, 2010, increasing 18.8% from the same period a year ago. The Capital Adequacy Ratio reached 15.9%, of which 13.9% was under Tier I Capital, and was mainly impacted by the exclusion of the portion related to the build in the Allowance for Loan Losses (PLL).

Total assets stood at R\$558,100 million in June 2010, up 15.7% in the last 12 months, driven by the expansion in operations and increased business volume, led by growth in the loan portfolio. Return on Average Assets (ROAA) remained stable at around 1.7%.

Efficiency Ratio (ER)

On a quarterly analysis, ER showed an improvement from 41.9% in the first quarter of 2010 to 41.5% in the second quarter of 2010, due basically to the improvement in financial margin and revenues from the insurance, private pension and savings bond areas.

Regarding the 12-month accumulated ER, the increases seen in the last two quarters are primarily due to outstanding treasury gains in the first and second quarters of 2009, which improved the indicator performance in those periods.

ER calculated on an "adjusted-to-risk" basis better show that this indicator better reflect the reality of presented results, since a clear deterioration of the indicator can be seen over 2009, as a result of the increase in provision for loans; whereas a recovery can be seen as of this year, due to an improvement in delinquency and subsequent reduction in related provision expenses.

- (1) Efficiency Ratio (ER) = (Personnel Expenses Employee Profit Sharing (PLR) + Administrative Expenses / Financial Margin + Fee and Commission Income + Income from Insurance + Equity in the Earnings (Losses) of Unconsolidated Companies + Other Operating Income Other Operating Expenses). Considering the ratio between: (i) total administrative costs (Personnel Expenses + Administrative Expenses + Other Operating Expenses + Tax Expenses not related to revenue generation) and (ii) revenue net of related taxes (not considering Claims Expenses from the Insurance Group), our Efficiency Ratio in the second quarter of 2010 was 42.6%.
- (2) Includes PLL expenses, adjusted by discounts granted, by credit recuperation, by income from the sale of foreclosed assets, among other.

Financial Margin

The R\$358 million increase between the second quarter of 2010 and the first quarter of 2010 was due to:

- the R\$257 million increase in income from interest-earning operations, which was basically explained by: (i) greater average volume of loan operations; and (ii) increases in the average rates of securities/other operations and funding; and

- higher income from non-interest margin, of R\$101 million.

- the growth in income from interest-earning operations of R\$1,876 million, mainly due to increased income from loan operations, which was positively impacted by the higher business volumes and margins;

and offset by:

- reduced non-interest margin, of R\$815 million, reflecting fewer gains from treasury/securities.

In the comparison of the first half of 2010 with the same period of 2009, financial margin improved by R\$1,061 million, or 7.2%, driven by:

Total Loan Portfolio

In June 2010, Bradesco's loan operations (considering sureties, guarantees, advances of credit card receivables and assignment of receivables-backed investment funds and mortgage-backed securities) totaled R\$244.8 billion. This expansion of 4.1% in the quarter is explained by increases of 4.2% in the Individuals portfolio, 6.7% in the SME portfolio and 1.7% in the Large Corporate portfolio.

In the comparison of the first six months of 2010 with the same period of 2009, the portfolio expanded by 15.0%, with growth of 21.4% in the SME portfolio, 20.7% in the Individuals portfolio and 5.0% in the Large Corporate portfolio.

In the Individuals segment, the products registering the strongest growth in the last 12 months were: payroll-deductible loans, credit cards (impacted by the acquisition of Banco Ibi in October 2009), BNDES/Finame onlending operations and vehicle CDC financing. In the Corporate segment, growth was led by BNDES/Finame onlending operations, real estate financing corporate plans, working capital and operations abroad.

Considering other operations with credit risk from the commercial area⁽¹⁾ mainly impacting operations with large corporate clients (debentures and promissory notes), which totaled nearly R\$13.8 billion in June 2010 (R\$10.5 billion in December 2009), total loan operations would be nearly R\$258.6 billion in June 2010 (R\$238.6 billion in December 2009), for growth of 8.4% in 2010 and 15.3% in the last 12 months.

Allowance for Loan Losses (PLL)

In the second quarter of 2010, expenses with the allowance for loan losses continued to decrease, even after taking into account loan portfolio growth of 4.1%. The reduction in relation to the previous

quarter was mainly due to the increased efforts to recover credits, in addition to the decline in delinquency resulting from improved macroeconomic conditions in Brazil. PLL expenses dropped 26.0% in the first half of 2010 versus the same period in 2009, while loan operations grew 15.0% in the same period, thus showing the quality improvement in Bradesco's loan portfolio.

Delinquency Ratio > 90 days

The delinquency ratio for credits more than 90 days overdue decreased for the third consecutive quarter, from 5.1% in September 2009 to 4.0% in June 2010, benefitted by the improved domestic economic scenario, which fueled growth with quality in the loan portfolio and greater recovery of credits. This improvement was seen in all segments and, given the current economic scenario and the same levels of employment and consumption, there are expectations for an improved indicator, however, in lower levels.

Coverage Ratio

The graph below presents the evolution in the coverage ratio of the Allowance for Loan Losses for loans more than 90 days overdue. In June 2010, overdue loans decreased by 4.4%, or R\$389 million, leading the coverage ratio to reach 188.5%, the highest level in the data series.

Central Bank of Brazil and R\$3.0 billion in additional provisions, which is considered an adequate level of provisioning. Note that item that increased the most was generic provision, which has preventive features due to the change in customer ratings, not pegged to possible delays.

The balance of the Allowance for Loan Losses of R\$15.8 billion in June 2010 was composed of: R\$12.8 billion in provisions required by the

Results of Insurance, Private Pension and Savings Bond Operations

Net Income in the second quarter of 2010 was R\$701 million, for Return on Average Equity of 28.3%, and remained practically stable in comparison with the R\$703 million recorded in the first quarter of 2010.

In the first six months of 2010, Net Income was R\$1.404 billion, up 9.0% from the same period in 2009 (R\$1.288 billion), for Return on Average Equity of 27.4%.

(*) Excludes the effects of RN 206/09 (ANS) in the total amount of R\$372 million (Health), which as of January 2010 extinguished the PPNG (SES), with income from premiums accounted *pro-rata temporis*. Note that this accounting change did not affect Earned Premiums; and

(**) 2Q10 considers data for May 2010.

In the second quarter of 2010, total revenue from the Insurance Group (insurance premiums written, private pension contributions and savings bond income) remained stable from the previous quarter, especially important improvements recorded in Health and Saving Bonds segments, which offset the seasonal effect of the Life and Pension Plan products.

In the first half of 2010, production grew by 23.7% from the same period in 2009, driven by the high performance of the products Auto; Vida VGBL and Private Pension, and Health, which increased by 28.2%, 24.1% and 22.3% respectively.

Net Income in the second quarter of 2010 remained stable in comparison with the previous quarter, reflecting: (i) the positive impacts generated by the decline in claims in the health, life and basic lines segments; and (ii) lower selling costs; which were offset by: (iii) the behavior of the financial result in the second quarter of 2010, mainly returns on stock funds and multi-asset funds, which were lower than in the previous quarter.

In the first six months of 2010, Net Income was 9.0% higher than in the same period of 2009, reflecting: (i) revenue growth of 23.7% (Brazil's insurance industry grew by 16.0% in the year to May); (ii) reduced claims; and (iii) expenses remaining at the same levels seen in 2009, despite the collective bargaining agreement in January 2010.

The combination of these factors led the efficiency ratio to remain stable and the combined ratio to decline, from 85.8 in June 2009 to 84.9 in June 2010.

Based on figures for the year through May 2010, Net Income from the Insurance Group represented 36.9% of Net Income in Brazil's entire insurance industry and 47.4% of the net income of insurers associated with private banks. (Source: Insurance Superintendence Susep). The technical provisions of the Insurance Group corresponded to 31.4% of the insurance industry in May 2010, according to the Insurance Superintendent (Susep) and the National Supplementary Health Agency (ANS).

In terms of solvency, Grupo Bradesco de Seguros e Previdência is in compliance with Susep rules that took effect on January 1, 2008, and also with international standards (Solvency II). The financial leverage ratio stood at 2.6 times Shareholders Equity.

Fee and Commission Income

In the second quarter of 2010, Fee and Commission Income totaled R\$3,253 million, up 4.1% from the previous quarter. This income growth in the quarter was the result of: (i) greater loan operation volumes; (ii) a net increase in the number of checking accounts; and (iii) higher income from credit cards and asset management; which offset: (iv) reduced income from underwriting operations in the period. In the comparison of the first six months of 2010 with the same period a year ago, the increase in income of 13.2% was basically the result of: (i) the strong performance of credit card operations, Banco Ibi income, merged in November 2009; (ii) higher asset management income; and (iii) the increase in loan operation income, which was basically driven by increased business volume and a larger client base, which expanded by some 1.5 million accounts in the last 12 months.

Personnel Expenses

In the second quarter of 2010, the R\$118 million increase from the previous quarter was composed of the variations in the following components:

- structural R\$96 million, essentially related to: (i) lower concentration of vacations in the second quarter of 2010; and (ii) higher expenses with salaries and compulsory social charges, reflecting the organic growth in the period, with an increase in the number of service points and the associated new hires; and
- non-structural R\$22 million, basically related to higher expenses with provisions for labor claims and training.

In the comparison of the first six months of this year with the same period of last year, the R\$598 million increase is explained by:

- the R\$342 million increase in the structural" portion, related primarily to: (i) higher expenses with salaries, charges and benefits, which were impacted by wage increases (6% increase resulting from the 2009 collective bargaining agreement); and (ii) the Banco Ibi merger; and

Edgar Filing: BANK BRADESCO - Form 6-K

· the R\$256 million increase in the non-structural portion, resulting basically from: (i) the higher expenses with employee profit sharing; (ii) higher build in provisions for labor claims; and (iii) higher expenses with severance.

Note: Structural Expenses = Salaries + Compulsory Social Charges + Benefits + Private Pension.

Non-Structural Expenses = Employee Profit Sharing (PLR) + Training + Labor Provision + Severance Expenses.

Administrative Expenses

In the second quarter of 2010, the 3.4% increase in administrative expenses in relation to the first six months of 2010 was mainly due to higher expenses with: (i) transportation; (ii) depreciation and amortization; and (iii) data processing; which was partially offset by: (iv) lower expenses with asset leasing. It is important to bear in mind that the business model (use of non-bank correspondents) results in higher variable expenses that, in most cases, are offset by increased income.

In the comparison with the first half of last year, the 22.7% increase is essentially due to: (i) the expansion in the Customer Service Network; (ii) the higher business volume; (iii) contract adjustments; and (iv) the impact of the Banco Ibi merger.

Other Income and Operating Expenses

Other operating expenses, net of other operating income, increased by R\$38 million in the first quarter of 2010 in comparison with the previous quarter, mainly due to: (i) higher general expenses; which were partially offset by: (ii) the lower build in operating provisions.

In the comparison of the first six months of 2010 with same period a year ago, the R\$267 million increase in other operating expenses net of other operating income basically reflects higher expenses with: (i) the build in operating provisions, especially for civil contingencies; (ii) goodwill amortization; and (iii) the operating expenses resulting from the Banco IBI merger in November 2009.

Income Tax and Social Contribution

In the second quarter of 2010, expenses with income tax and social contribution increased by R\$151 million from the prior quarter, basically reflecting greater taxable income.

In the comparison of the first six months of 2010 with same period a year earlier, the increase of 50.8%, or R\$731 million, was due to the higher operating income in the period.

Tax credits from prior periods, which result from the increase in the Social Contribution tax rate to 15%, are recorded in the financial statements up to the limit of the corresponding consolidated tax obligations. The unused balance currently stands at R\$613 million. More details are available in note 34 to the Financial Statements.

Unrealized Gains

Unrealized gains totaled R\$9,226 million in the second quarter of 2010, down R\$1.685 million from the previous quarter. The variation reflected the drop recorded in capital markets (Ibovespa: - 13.4%), which affected equity investments, in particular our interest in Cielo.

Economic Scenario

The world economy has shown significant instability throughout the first half of this year. On the one hand, various signs point to consistent, albeit slow recoveries in production, consumption and employment. On the other hand, the high debt levels held by governments intensified fears of a more serious fiscal crisis in Europe, with repercussions in the region's banking system. Meanwhile, China has been adopting a series of measures to slow its economy, especially the construction industry, which could lead to lower demand for commodities and in turn adversely affect Brazil. In our view, the balance of these factors remains favorable, since, despite concerns with sovereign debt, European governments in general are currently implementing fiscal adjustments to assure balance in the medium term, and have developed mechanisms to extend loans to member countries and to improve liquidity in the banking industry, while a slowdown in the Chinese economy would help promote more balanced growth in the world economy. This situation should keep the more-adverse scenario at bay for the time being, with gradual but solid growth in the global economy most likely prevailing.

In Brazil, the start of the year registered some of the most formidable growth rates in economic activity, consumption and employment growth in recent years, which were fueled by the fiscal and monetary stimuli implemented in 2009 and the positive medium-term prospects. Investment remains one of the most important sources for sustaining GDP growth in the future, assuring job and income growth that, combined with the availability of credit, translates into a very favorable consumption outlook. This strong economic growth led to some increases in inflation, in the external deficit and, as a result, in interest rates, which were hiked in an attempt to rebalance supply and demand and avoid acceleration in inflation and external deficit. For the coming quarters, we expect more moderate GDP growth in Brazil, though still robust and sufficient to maintain and expand the gains in employment and income levels, along with a healthy growth rate for the country's economy in the medium term.

Given the strong GDP growth in the first quarter, we have revised upward our forecast for the year to 7.5%, which is the third-highest GDP growth rate in our sample of countries. Annual inflation measured by the IPCA consumer price index should remain at around 5.5%, while annual IGP- M inflation should end the year at 8.4%, responding to the stronger demand growth. Brazil's central bank should continue hiking the Selic basic interest rate to end the year at 11.25% in order to better align the excess supply with demand. However, despite the rate hikes, the country's strong social mobility, expansion in credit and lower unemployment should assure more reasonable growth prospects for the leading sectors of Brazil's economy.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
