Deferred taxes have been recorded based on the assumption of their future realization, as follows:

a) Tax loss carryforwards : principally of the subsidiary TC, will be offset up to a limit of 30% per year of taxable income for the next few years. This subsidiary, based on projections of future results, estimates that its tax loss carryforwards will be fully set off in two years.

b) Merged tax credit : consists of the net balance of goodwill and reserve for maintaining the integrity of shareholders' equity (Note 28) and is realized proportionally to the amortization of the goodwill of the subsidiaries, with terms of five to ten years. Studies by external consultants used in the corporate restructuring process supported recovery of the amount within this term.

c) Temporary differences : will be realized upon the payments of accruals, the effective losses on bad debts and the realization of inventories.

At the end of the 2004 fiscal year, the Company prepared technical feasibility studies, approved by the Board of Directors, which indicate full recovery of the deferred taxes recognized, as determined by CVM Resolution No. 371. Management did not identify any changes that could affect the conclusion of these studies.

The Company and its subsidiaries GT and TCO IP did not recognize deferred income and social contribution on tax losses and temporary differences, due to the lack of projections of taxable income to be generated in the short term.

As from January 1, 2005, the goodwill paid on acquisitions by GT based on future profitability, totaling R\$1,077,020, is being amortized over a ten-year period as from the acquisition date.

TC has investments in Telesp Celular International Ltd. and Telesp Celular Overseas, companies located abroad, for the purpose of obtaining and passing on funding through international loans. These subsidiaries are dormant.

On May 31, 2004, the tax benefit derived from the goodwill paid on the acquisition of TCO was transferred to that company and its subsidiaries. As a result, R\$510,790 as of June 30, 2005 (R\$510,678 as of June 30, 2004) was transferred as an advance for future capital increase, since shares will be issued in favor of TCP when this benefit is realized by TCO and its subsidiaries. The remaining goodwill, amounting to R\$992,060, was based on future profitability and is being amortized over five years.

On March 30, 2004 , TCP increased its investment in TCO using part of the advance for future capital increase. The participation of minority shareholders in this capital increase resulted in the reimbursement of R\$1,132 to TCP.

26. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONSOLIDATED)

a) Risk considerations

TCP is the parent company of the operators TC, GT and TCO and their subsidiaries, which provide mobile telephone services, in accordance with the terms of the licenses granted by the Federal Government. The operators also exploit the business of purchasing and distributing handsets through their own channels and distributional network to stimulate their core business.

The major market risks to which TCP, TC, GT and TCO are exposed in conducting their business are:

Credit risk : derived from the possible difficulty in collecting amounts of telecommunications services provided to customers, and the sales of handsets by the distribution network, together with the risks related with investments and swap operations.

Interest rate risk : derived from the portion of the debt and liability positions in derivatives contracted at floating rates and involves the risk of financial expenses rising due to an unfavorable movement in interest rates (principally Libor, TJLP and CDI).

Exchange risk : the possibility of the Company incurring losses on account of fluctuations in exchange rates that increase the balances of foreign currency denominated loan and financing liabilities.

The Company and its subsidiaries take a positive attitude towards the management of the various risks to which they are subject, by means of a wide-ranging set of operational initiatives, procedures and policies that permit attenuation of the risks inherent to their operations.

Credit risk

The credit risk from providing telecommunications services is minimized by a strict control of the customer base and active management of default by means of clear policies related with selling postpaid sets. TC, GT and TCO and their subsidiaries have, respectively, 83%, 88% and 85% (83%, 88% and 84% as of March 31, 2005 , respectively) of their customer bases under the prepaid system, which requires prepaid loading and therefore does not represent any credit risk.

The credit risk on the sale of handsets is managed by means of a conservative credit policy, using modern management methods that involve applying credit scoring techniques, balance sheet analysis and consulting commercial databases, together with the automatic control of sales release integrated with the ERP software distribution module.

Interest rate risk

The Company is exposed to the risk of a rise in interest rates, especially the combination of interest rates associated with the cost of Interfinancial Deposit Certificates (CDI), due to the liability portion of the derivative operations (exchange hedge) and of loans contracted in Brazilian reais.

The Company is also exposed to fluctuations in the TJLP, as a result of the loans contracted from the BNDES. As of June 30, 2005 , the principal of these operations amounted to R\$317,999 (R\$342,479 as of March 31, 2005). The Company has not contracted derivative operations to hedge the TJLP risk.

Loans contracted in foreign currency are also exposed to the risk of a rise in the interest rates (Libor) associated with foreign loans. As of June 30, 2005 , these operations totaled US\$138,454 thousand (US\$146,807 thousand as of March 31, 2005).

Currency risk

TC, GT and TCO utilize derivative instruments to protect against currency risk on foreign currency-denominated loans. The instruments normally used are swap, options and forward contracts.

The following table summarizes the net exposure of the Company and its subsidiaries to the exchange rate factor as of June 30, 2005 .

	Stated in thousands of		
	US\$	€	¥
Loans and financing	(1,164,503)	-	(5,898,930)
Hedge instruments	1,197,437	14,612	5,898,930
Suppliers - technical assistance	(21,309)	(15,156)	-
Total	(11,625)	(544)	-

The UMBNDES is a monetary unit prepared by the BNDES, comprising a basket of foreign currencies, the U.S. dollar being the main reason why the Company and its subsidiaries take it into consideration in analyzing the risk coverage in relation to variations in the exchange risks.

b) Derivative instruments

The Company and its subsidiaries record gains and losses on derivative contracts as net financial income or expenses.

Book and market values of loans and financing and derivative instruments are estimated as follows:

	Book value	Market value	Unrealized losses
Loans and financing	(4,879,530)	(4,972,910)	(93,380)
Derivative instruments	(406,942)	(445,156)	(38,214)
Other liabilities	(91,812)	(91,812)	-
Total	(5,378,284)	(5,509,878)	(131,594)

c) Market value of financial instruments

The market value of the loans and financing, swap and forward contracts was established based on the discounted cash flow method, using available projections of interest rates.

The market values are calculated at a specific time based on information available and in-house valuation methodologies, and, therefore, the estimates indicated do not necessarily represent market realization values. The use of different assumptions could significantly affect the estimates.

27. POST-RETIREMENT BENEFIT PLANS

TCP and its subsidiaries TC and TCO, together with the other companies of the former Telebrás system, sponsor private pension and health care plans for retired employees, managed by Fundação Sistel de Seguridade Social - SISTEL, as follows:

- a) PBS-A - defined-benefit multi-sponsor plan, for participants that were previously assisted and had such status on January 31, 2000 .
- b) PBS-Telesp Celular and PBS-TCO - defined-benefit retirement plans sponsored individually by the Companies.
- c) PAMA - multi-sponsor healthcare plan for retired employees and their dependents, on a shared cost basis.

The contributions to the PBS-Telesp Celular and PBS-TCO Plans are determined based on actuarial valuations prepared by independent actuaries, in accordance with the rules in force in Brazil . Cost is determined using the capitalization method and the contribution due by the sponsor is 13.5% of the payroll for the employees participating in the Plan, of which 12.0% is used to finance the PBS-Telesp Celular and PBS-TCO Plans and 1.5% for the PAMA plan. In the six-month period ended June 30, 2005 , the contributions to these Plans were R\$2 (R\$4 as of June 30, 2004).

d) TCP Prev and TCO Prev Plans - these are individual defined contribution plans, introduced by SISTEL in August 2000. The Company's contributions to the TCP Prev and TCO Prev Plans are equal to those of the participants, varying between 1% and 8% of the participation salary, according to the percentage chosen by the participant. In the six-month period ended June 30, 2005 , the contributions to these Plans were R\$3,562 (R\$7,368 as of June 30, 2004).

28. CORPORATE RESTRUCTURING

Edgar Filing: TELESP CELLULAR HOLDING CO /ADR/ - Form 6-K

On January 14, 2000, the corporate restructuring plan was concluded, in which the goodwill paid on the privatization process of the Company was transferred to TC.

The financial statements, maintained for the Companies' corporate and tax purposes, record specific accounts related with the goodwill and the related reserve, and the respective amortization, reversal and tax credit, the balances of which are as follows:

	Balances on date of merger	Consolidated	
		06.30.05	03.31.05
Balance sheet:			
Merged goodwill	3,192,738	1,410,126	1,489,944
Merged reserve	(2,127,694)	(930,683)	(983,364)
Balance	1,065,044	479,443	506,580
		06.30.05	06.30.04
Statement of operations :			
Amortization of goodwill		(159,637)	(159,637)
Reversal of reserve		105,360	105,360
Tax credit		54,277	54,277
Effect on net result		-	-

On May 13, 2004, the Boards of the Company and TCO approved a corporate restructuring for the purpose of transferring to TCO and its subsidiaries the goodwill paid by TCP in the acquisition of a controlling interest in TCO, which, on May 31, 2004, amounted to R\$1,503,121.

Prior to the merger of goodwill by TCO a reserve has been constituted for maintaining the merger's shareholders' equity in the amount of R\$992,060. Thus, net assets merged by TCO amounted to R\$511,061, which, in essence, represent the tax benefit derived from the deductibility of the mentioned goodwill when merged by TCO and its subsidiaries.

The merged net assets will be amortized over approximately five years and the balancing item was a special goodwill reserve to be transferred to the capital account in favor of the Parent Company at the time of effective realization of the tax benefit. The remaining shareholders are assured the right to participate in these capital increases, in which case the funds raised will be paid to the Company.

As of June 30, 2004 the transfer of part of the net assets of TCO to its subsidiaries was approved, based on appraisal reports prepared by independent specialists, as described below:

Company	Goodwill	Merged reserve	Net amount
Telemat	248,558	(164,048)	84,510
Telegoiás	352,025	(232,336)	119,689
Telems	144,078	(95,092)	48,986
Teleron	68,775	(45,392)	23,383
Teleacre	29,353	(19,373)	9,980
Total spin-off	842,789	(556,241)	286,548
Balance TCO	660,332	(435,819)	224,513
Total	1,503,121	(992,060)	511,061

Concurrently with the transfer of a portion of the net assets to TCO subsidiaries, the proposal to merge the shares of TCO subsidiaries held by minority shareholders, who received TCO shares in a proportion established by a market evaluation appraisal prepared by independent experts, was approved. The transfer of the interests in TCO subsidiaries resulted in an increase of R\$28,555 in the capital of TCO.

The accounting records of the Companies maintained for corporate and tax purposes have specific accounts related with the premium and provision merged and corresponding amortization, reversal and tax credit, the balances of which as of June 30 and March 31, 2005 are as follows:

	Consolidated	
	06.30.05	03.31.05
Balance sheet:		
Merged goodwill	1,177,444	1,252,600
Merged reserve	(777,113)	(826,715)
Balance (a)	400,331	425,885
	06.30.05	06.30.04
Statement of operations:		
Amortization of goodwill	(150,312)	(57,321)
Reversal of reserve	99,206	37,832
Tax credit	51,106	19,489
Effect on result	-	-

As demonstrated, the goodwill amortization, net of the reversal of the reserve and corresponding tax credit, results in a null effect on income and, consequently, on the calculation base of the statutory minimum dividends. To ensure a better presentation of the Companies' financial and equity situation, the net value of R\$400,331 as of June 30, 2005 (R\$425,885 as of March 31, 2005), which essentially represents the balance of the tax credit merged, was classified in the balance sheet as deferred taxes (Note 6).
