#### Item 2.05 Costs Associated with Exit or Disposal Activities.

Ferro Corporation (the "Company") has initiated additional restructuring activities within its Inorganic Specialties operations in Europe.

The Company plans to discontinue smelting, milling and other manufacturing operations in Limoges, France. These activities will be consolidated at other Company facilities in St. Dizier, France; Frankfurt, Germany; and Almazora, Spain. In addition, all sales, technical service and research and development activities currently being done in Limoges will be transferred to St. Dizier and Frankfurt. The restructuring action is expected to be substantially completed at the end of 2010. When the restructuring is completed, the Limoges site will be closed.

As a result of these restructuring actions, the Company expects to eliminate approximately 125 employee positions. The Company formally informed the Works Council of Limoges of the Company's decision to commence the restructuring on January 22, 2009. The Company expects to record pre-tax charges of approximately \$29 million related to the actions over the next 8 quarters, although the exact timing of the charges cannot be determined at this time. The charges include approximately \$18 million in cash costs for employee termination, approximately \$7 million in site cleanup and other costs, and non-cash asset write-offs of approximately \$4 million.

The annual pre-tax costs savings resulting from these actions are estimated to be approximately \$14 million, once the project is completed.
