**Eni and NOC establish the foundations
for future joint oil & gas development in Libya**

Tripoli, October 16, 2007 - Eni and NOC today signed a wide-ranging agreement, which represents a further step in the consolidation of their long-lasting strategic partnership which began in 1959.

This agreement will boost Eni's growth in gas and oil production in Libya, ensuring greater energy security for Italy and enabling Eni to develop some of Libya's most prolific basins in the long term. The agreement also confirms Eni as the leading foreign operator in the country and further consolidates the good relationship between Italy and Libya.

In a highly competitive framework, NOC and Eni agreed to convert the existing petroleum contracts to the most recent contractual model (EPSA IV), with a renewed duration of 25 years from January 2008, well beyond the present expiry dates. The new expiry dates set by the agreement are 2042 for production of oil and 2047 for gas.

Having recently completed two major hydrocarbon developments in the country, El Feel (Elephant) and Western Libya Gas Project, Eni and NOC have now defined a new plan of strategic initiatives aimed at exploiting the significant oil and gas potential in Libya.

In particular, the parties will focus their efforts on maximising the recovery of their existing oil fields through enhanced programs by applying the most advanced technology for the assisted recovery of hydrocarbons (CO₂ injection and water alternate gas). They will also implement a new drilling campaign at nearby fields.

NOC and Eni will continue to explore the prolific NC41 offshore area, and strengthen the hub of Mellitah by expanding gas export capacity from 8 to 16 billion cubic meters/year. The expansion will be achieved through the upgrading of the GreenStream export line by 3 billion cubic meters/year, which will increase export capacity to Italy, and by the construction of a new LNG plant of 5 billion cubic meters/year for worldwide marketing. Further additional gas production will be made available for industrial use in Libya.

The overall investment associated with the agreed work programs is in the range of US\$28 billion over 10 years.

Eni has been present in Libya since 1959 and is currently the major foreign operator in the country, with total average daily operated production in excess of 550,000 boepd (Eni equity of around 250,000 boepd). Eni is operator in some of the country's biggest fields: the oil fields of Abu-Attifel, El Feel and Bouri, and the gas and condensate fields of Bahr Essalam and Wafa which supply the Mellitah treatment plant and the GreenStream export line.

ENI ANNOUNCES RESULTS FOR THE THIRD QUARTER AND THE FIRST NINE MONTHS OF 2007

Adjusted net profit: down by 27.8% to euro 1.89 billion for the third quarter and down by 15.7% to euro 6.79 billion for the first nine months

Net profit: down by 11.4% to euro 2.15 billion for the third quarter and down by 9% to euro 7 billion for the first nine months

Cash flow: euro 3.37 billion for the third quarter (euro 13.05 billion for the first nine months)

Expenditures on capital and exploration projects for the third quarter were up 46% to euro 2.68 billion (up 41.9% to euro 6.94 billion for the nine months)

Oil and gas production for the third quarter was down by 2.9% to 1.66 million boe/d and down 2.9% for the first nine months. Previous guidance for a production level in line with 2006 reaffirmed, under the assumption of full-year Brent crude oil price at \$55 per barrel as per Eni's four-year plan

Gas sales for the third quarter: up 4.4% to 19.74 bcm (down by 3.2% for the first nine months). Previous guidance for light year-on-year sales growth reaffirmed, supported by expansion in target European markets

San Donato Milanese, October 31, 2007 - Eni, the international oil and gas company, today announces its group results for the third quarter and the first nine months of 2007 (unaudited).

Paolo Scaroni, Chief Executive Officer, commented:

Eni has delivered another set of solid results. The third quarter was impacted by the negative effect of the appreciation of the euro against the dollar, which more than offset the benefit of high oil prices, and weaker refining and natural gas margins. Eni continues to strengthen its position in its key markets and in the world's leading oil regions. I am confident that 2007 will be another excellent year for the Company.

- 1 -

Table of Contents**Financial highlights****Third quarter of 2007**

- Adjusted operating profit was euro 4.25 billion, down 17.2% from the third quarter of 2006. Results in the Exploration & Production division were impacted by the euro's appreciation against the dollar (up 7.9%), lower sold production volumes and rising costs and results in the Refining & Marketing division were impacted by declining refining margins.
- Adjusted net profit was down 27.8% to euro 1.89 billion, mainly as a result of the reduced operating profit, coupled with an increase recorded in the Group tax-rate on an adjusted basis (from 48.8% to 53%) owing mainly to an increase recorded in the upstream business.
- Expenditure on capital and exploratory projects for the third quarter was up 46% from a year ago to euro 2.68 billion and mainly related to the finding and development of oil and gas reserves and the upgrading of international and domestic gas transportation infrastructure and refineries.
- Net borrowings amounting to euro 11.43 billion as of September 30, 2007 increased by euro 2.31 billion in the third quarter due to expenditures on capital and exploratory projects (euro 2.68 billion), and the acquisition of upstream properties offshore in the Gulf of Mexico (approximately euro 3.5 billion) and downstream oil assets (euro 0.2 billion). These cash outflows were partly absorbed by net cash provided by operating activities (euro 3.37 billion).

First nine months of 2007

- Adjusted operating profit for the first nine months was euro 13.69 billion, down 12.9% from a year ago. A weaker operating performance reported by the Exploration & Production and Refining & Marketing divisions was partly offset by the improved operating performance in the Engineering & Construction, Petrochemicals and Gas & Power divisions.
- Adjusted net profit was down 15.7% to euro 6.79 billion, mainly as a result of the decreased operating profit, coupled with an increase recorded in the Group tax-rate on an adjusted basis (from 48.5% to 49.1%).
- Net borrowings at period-end was euro 11.43 billion, up euro 4.66 billion from December 31, 2006. Main cash outflows for the period were: euro 6.94 billion for expenditures on capital and exploratory projects, euro 4.7 billion for the acquisition of upstream and downstream properties, euro 3.73 billion for the acquisition of 20% and 60% interests in OAO Gazprom Neft and three Russian gas companies, respectively, as part of a bid procedure for ex-Yukos assets; euro 2.38 billion for dividend payment and euro 486 million for the repurchase of own shares. These outflows were partly absorbed by net cash provided by operating activities coming in at euro 13.05 billion.
- Return on Average Capital Employed (ROACE)¹ calculated on an adjusted basis for the twelve-month period ending September 30, 2007 was 19.5% (23.9% for the twelve-month period ending September 30, 2006).
- Ratio of net borrowings to shareholders' equity including minority interest leverage increased to 0.26 from 0.16 at the end of 2006.

- 2 -

Table of Contents**Third quarter of 2007**

- Oil and natural gas production for the third quarter averaged 1.659 mmb/d, a decrease of 2.9% compared with the third quarter of 2006 mainly due to disruptions in Nigeria owing to continuing social unrest, unplanned facility shutdowns and technical issues particularly in the North Sea, also as a result of an accident that occurred to the CATS pipeline in the United Kingdom, as well as mature field declines. Partially offsetting these effects was the benefit of the acquired assets in the Gulf of Mexico and in Congo as well as the organic growth achieved in Libya and Kazakhstan.
- Eni's worldwide natural gas sales were 19.74 bcm, up 4.4%, driven by higher sales volumes achieved in international markets, particularly in Spain, Germany/Austria and France, and in LNG sales in both the Asian and North American markets.
- The trading environment was unfavorable, despite the fact that higher Brent crude prices were recorded averaging \$74.87 per barrel, up 7.7% compared to the third quarter 2006. The benefit of higher oil prices was more than offset by the appreciation of the euro over the dollar (up 7.9%). Also, realized refining margins decreased significantly due to the worsening of the ratio between prices of main distillates and Brent quotations (the margin on Brent was down 5.4%) in addition to the narrowing of price differentials between light and heavy crude qualities that penalized Eni's complex throughputs by reducing the competitive advantage to process low-cost feedstock. Gas selling margins decreased due to an unfavorable trading environment reflecting indexation mechanisms of purchase/selling prices.

First nine months of 2007

- Oil and natural gas production for the first nine months averaged 1.71 mmb/d, a decrease of 2.9% compared with the first nine months of 2006. Production performance was impacted by events in Nigeria, unplanned shutdowns, and mature field declines. The first nine months production was also affected by the loss of production at the Venezuelan Dación oilfield as a consequence of the unilateral cancellation of the service agreement for the field exploitation by the Venezuelan State Oil Company PDVSA which took effect on April 1, 2006. Partially offsetting these effects was the benefit of the acquired assets in the Gulf of Mexico and in Congo as well as the organic growth achieved in Libya and Kazakhstan.
- Eni's worldwide natural gas sales were down 3.2% to 68.31 bcm due to lower European gas demand in the first quarter from the unusually mild winter weather.
- Overall the trading environment was unfavorable due to the appreciation of the euro over the dollar (up 8.0%), lower realized refining margins, in particular on complex throughputs, and lower gas selling margins due to adverse trends in energy parameters to which purchase and selling prices are indexed. In the first nine months a slight increase in oil prices (up 0.3%) was recorded with Brent crude prices averaging \$67.13 per barrel; when converted to euros, crude oil prices recorded a 7.2% drop.

Strategic agreement with the Libyan National Oil Company

As part of Eni's strategic partnership with the Libyan National Oil Company, on October 16, 2007, both parties signed a major industrial agreement aimed at:

- Extending the duration of Eni's mineral rights in Libya by a 25-year term, with the possibility of a further five-year extension for oil properties till 2042 and a ten-year extension for gas properties till 2047. This will enable Eni to develop its long-life producing fields over a longer time frame by applying its advanced techniques for maximizing the recoverability of hydrocarbons;
- Monetizing additional and substantial gas reserves by expanding Libya's gas export capacity by 8 bcm/y. The planned expansion will be achieved through the upgrading of the GreenStream export line by 3 bcm/y, which will increase export capacity to Italy, and through the construction of a new LNG plant of 5 bcm/y for worldwide markets; and
- Overhauling the exploration activities in areas where Eni is already present.

The two partners estimated that the planned initiatives will involve expenditures of approximately \$28 billion over 10 years. This deal further strengthens Eni's competitive position in Libya, reaffirming its leadership among the international oil companies engaged in this Country.

Table of Contents**Status of the Kashagan Project**

- In late June 2007 Agip KCO, as operator of the Kashagan oilfield (18.52 per cent stake), located offshore in the Caspian Sea in Kazakhstan, filed certain revisions to the sanctioned development plan of the field with the Kazakh Authorities. These revisions confirmed, among other things, a rescheduling of the production start-up to 2010. The Kazakh Authorities rejected the proposed revisions to the sanctioned development plan. In August 2007, the Government of the Kazakh Republic sent the companies forming the North Caspian Sea Production Sharing Agreement (NCSPSA) consortium a notice of dispute alleging failure on the part of the consortium to fulfill certain contractual obligations and violation of the Republic's laws. All parties are in discussions aimed at resolving the dispute on amicable terms and have agreed that these discussions will continue beyond the October 22, 2007 contractual deadline.

Galp Energia plans to exercise its call option on downstream oil activities in Spain and Portugal

Galp Energia, in accordance with the agreements signed in December 2005 between majority shareholders (Eni 33.34%, Amorim Energia and Caixa General de Depositos), announced the intention to exercise its call option for the acquisition of Eni's Agip branded oil products marketing activities. The option excludes the lubricants business in Spain and Portugal, both in the retail and wholesale markets. Eni's retail activity in the Iberian region includes more than 350 service stations. The transaction is subject to approval from antitrust authorities.

Other initiatives

- On October 19, 2007 Saipem acquired almost the total interest in Frigstad Discoverer Invest Ltd listed on the Norwegian Stock Exchange. This company is engaged in ultra-deep offshore drilling activities by means of an ongoing project for the construction of the semi-submersible rig D90 and is listed on the Norwegian stock exchange. This vessel is expected to be able to drill wells in water depths of up to 3,600 meters. Operations are expected to begin by late 2009 and the transaction will include approximately euro 520 million of capital expenditure. This will include the purchase of Frigstad Discoverer Invest Ltd, as well as other capital expenditure necessary to complete the vessel.
- Eni was awarded 26 new exploration licenses in the Gulf of Mexico following an international bid procedure. The acquired acreage is estimated to have significant mineral potential and is located nearby other Eni's production facilities. The transaction is subject to approval from antitrust authorities.
- Eni and Sonatrach signed an agreement to extend the terms of the development and production license for oil fields of Block 403 (Eni 50%) in Algeria. In 2006 production from this block represented approximately 13% of Eni's total production in the Country.

Outlook

Key Eni's business trends for the year 2007 are as follows:

- **Production of liquids and natural gas** is forecast to be in line with the previous year (actual oil and gas production averaged 1.77 mmb/d in 2006) under the assumption of full-year Brent crude oil prices at \$55 per barrel. Production decline caused by continuing social unrest in Nigeria, the loss of the Dación oilfield in Venezuela, unplanned facility shutdowns and mature field declines is expected to be offset by the contribution from assets acquired in the Gulf of Mexico and Congo as well as by organic growth expected in Libya and Kazakhstan.
- **Sales volumes of natural gas worldwide** are expected to increase by a small amount from the previous year (actual sales volumes in 2006 were 97.48 bcm) assuming normal weather conditions for the final part of the current year. Growth is expected to be achieved in European target markets both in terms of market share and volume gains, mainly in Spain, Turkey, France and Germany/Austria and in LNG sales on both the Asian and North American markets. These increases are expected to be offset by: (i) lower sales volumes forecast in Italy as a result of a mild winter in the initial part of the current year and competitive pressures, partly offset by increases in natural gas sales to the residential and power generation sectors in the fourth quarter due to ongoing marketing

initiatives; (ii) lower natural gas offtakes on part of importers in Italy due to sluggish growth in domestic consumption.

- **Sales volumes of electricity** are expected to increase by approximately 4.5% from 2006 (actual volumes in 2006 were 31.03 TWh), due to an expected increase in traded volumes.

- 4 -

Table of Contents

- **Refining throughputs** are forecast to marginally decrease from 2006 (actual throughputs in 2006 were 38.04 mmt tonnes), reflecting expiration of a processing contract at the Priolo refinery at the end of 2006. Excluding this reduction, throughputs are expected to increase, reflecting better volume performance at the Livorno, Gela and Sannazzaro refineries. Higher throughputs are also expected outside Italy as a result of the acquisition of a further 16.11% stake in Ceska Rafinerska in the Czech Republic which took effect on September 1, 2007.
- **Retail sales of refined products** are expected to marginally increase from 2006 (actual volumes sold in 2006 were 12.48 mmt tonnes), driven by increased sales in Europe as a result of the acquisition of a number of service station networks in target markets in Central-Eastern Europe (approximately 100 outlets) which took effect on October 1, 2007, in addition to other upgrades. As a result of marketing initiatives in the Italian market sales are expected to remain unchanged despite a decline in domestic consumption.

Eni's expenditures on capital and exploration projects in 2007 are expected to amount to approximately euro 10.5 billion, including expenditures for developing acquired upstream assets, representing a 35% increase on 2006. Approximately 86% of this capital expenditure programme is expected to be deployed in the Exploration & Production, Gas & Power and Refining & Marketing divisions. Furthermore, acquisitions of assets and interests amounting to euro 9.2 billion are forecast for 2007, of which euro 3.73 billion relate to the acquisition of ex-Yukos assets; euro 4.5 billion relate to the purchase of proved and unproved oil and gas properties in the Gulf of Mexico and onshore Congo, and euro 0.4 billion relate to the purchase of refining and marketing assets in the Central-Eastern Europe. If Gazprom exercises its call options to purchase a 20% interest in OAO Gazprom Neft held by Eni and a 51% interest in the three Russian gas companies held according to a 60% interest by Eni, net cash outflows used in investing activities will decrease to euro 16.5 billion. On the basis of expected cash outflows for planned capital expenditures, acquisitions, and shareholders remuneration, while assuming a \$55/barrel scenario for the Brent crude oil, Eni foresees its leverage to settle in the low or high end of the 0.3 to 0.4 range by the end of the year, depending on the exercising of the above mentioned call options by Gazprom.

Table of Contents

Eni's Chief Financial Officer, Marco Mangiagalli in his position as manager responsible for the preparation of financial reports, certifies pursuant to Article 154-bis paragraph 2 of Legislative Decree No. 58/1998, that data and information disclosed in this press release correspond to the company's evidence and accounting books and entries.

Disclaimer

Due to the seasonality in demand for natural gas and certain refined products and the changes in a number of external factors affecting Eni's operations, such as prices and margins of hydrocarbons and refined products, Eni's results from operations and changes in net borrowings for the first nine months cannot be extrapolated on an annual basis.

Cautionary statement

This press release, in particular the statements under the section Outlook, contains certain forward-looking statements particularly those regarding capital expenditure, development and management of oil and gas resources, dividends, share repurchases, allocation of future cash flow from operations, future operating performance, gearing, targets of production and sales growth, new markets, and the progress and timing of projects. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that will or may occur in the future.

Actual results may differ from those expressed in such statements, depending on a variety of factors, including the timing of bringing new fields on stream; management's ability in carrying out industrial plans and in succeeding in commercial transactions; future levels of industry product supply; demand and pricing; operational problems; general economic conditions; political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations; development and use of new technology; changes in public expectations and other changes in business conditions; the actions of competitors and other factors discussed elsewhere in this document.

Table of Contents**Third quarter of 2007***Group results*

Eni s net profit for the third quarter of 2007 was euro 2,146 million, down euro 276 million from the third quarter of 2006, or 11.4%, due mainly to a weaker operating performance which was down by euro 449 million, or 9.3%, as a result of a decline in the Exploration & Production and Refining & Marketing divisions. This reduction in operating profit was offset in part by a euro 190 million decrease in income taxes reflecting lower profit before taxes and a 1.4 percentage points decline in the Group tax rate (from 50.4 to 49%) among other things as a result of a lower share of profit generated by the Exploration & Production division.

Eni s adjusted net profit amounted to euro 1,892 million, down 27.8% from the third quarter 2006. Adjusted net profit is arrived at by excluding an inventory holding gain of euro 165 million and special gains of euro 89 million net, resulting in a downward adjustment to reported net profit (down euro 254 million). Special gains related to the divestment of interests in certain affiliates in the Engineering & Construction division, which were partly offset by environmental charges and provisions for redundancy incentives.

Results by division

The decline in the Group adjusted net profit was a result of:

- The reduction of adjusted net profit reported by the **Exploration & Production** division (down euro 584 million, or 29.9%) due to a weaker operating performance (down euro 786 million, or 19.2%), which was adversely impacted by the appreciation of the euro over the dollar (7.9%), a decline in production sold (down 5.6 mmboe) and rising operating costs and amortization charges in connection with higher exploratory activity. Net profit was also impacted by a 6.6 percentage point increase in tax-rate on an adjusted basis.
- The reduction of adjusted net profit reported by the **Refining & Marketing** division (down euro 162 million, or 63%) due to a weaker operating performance of the refining activity in the wake of a negative trading environment which particularly affected results from complex throughputs and the appreciation of the euro over the dollar.

These declines in the adjusted net profit were partly offset by higher adjusted net profit in the **Engineering & Construction** division (up euro 57 million; up 48.7%), due to an improved operating performance (up euro 66 million) relating to favorable demand trends in oilfield services.

First nine months of 2007*Group results*

Eni s net profit for the first nine months of 2007 was euro 7,001 million, down euro 696 million from the first nine months of 2006, or 9%, due primarily to a lower operating performance (down euro 1,668 million, or 10.9%) as a result of a decline in the Exploration & Production and Refining & Marketing divisions, partially offset by the positive performance delivered by the Engineering & Construction, the Petrochemicals and the Gas & Power divisions. This reduction in operating profit was offset in part by lower income taxes (down by euro 1,064 million) owing to lower profit before taxes and a 1.9 percentage points decline in the Group tax rate (from 49.9 to 48.0%).

Eni s adjusted net profit amounted to euro 6,792 million, down 15.7% from the first nine months of 2006. Adjusted net profit is arrived at by excluding an inventory holding gain of euro 275 million and special charges of euro 66 million net, resulting in a downward adjustment to reported net profit (down euro 209 million).

Return on Average Capital Employed (ROACE) calculated on an adjusted basis for the twelve-month period ending September 30, 2007 was 19.5% (23.9% for the twelve-month period ending September 30, 2006). If Gazprom exercises its call options to purchase a 20% interest in OAO Gazprom Neft held by Eni and a 51% interest in the three

Russian gas companies held according to a 60:40 interest by Eni and Enel as of September 30, 2007, the Group ROACE would stand at 20.1%.

Table of Contents*Results by division*

The decline in the Group adjusted net profit resulted from the reduction of adjusted net profit recorded in the:

- **Exploration & Production** division (down euro 1,547 million, or 25.9%), due to a weaker operating performance (down euro 2,644 million, or 21%) which was adversely impacted by the appreciation of the euro over the dollar (8.0%), a decline in production sold (down 17.8 mmbbl), higher operating costs and amortization charges. Performance in this segment was also negatively affected by the 3.3 percentage points increase in the adjusted tax rate.
- **Refining & Marketing** division (down euro 169 million, or 32.9%), due to weaker realized refining margins particularly on complex throughputs and the appreciation of the euro over the dollar.

These declines in the adjusted net profit were partly offset by a higher adjusted net profit reported in the:

- **Engineering & Construction** division (up euro 209 million, or 77.7%), reflecting an improved operating performance (up euro 234 million) against the backdrop of favorable demand trends in oilfield services.
- **Petrochemicals** division (up euro 115 million, or 348.5%), due to an improved operating performance (up euro 154 million), reflecting a recovery in product selling margins and a weaker 2006 operating performance resulting from the impact of the shutdown of the Priolo cracker and related downstream plants as a result of an accident at the nearby refinery.
- **Gas & Power** division (up euro 53 million, or 2.7%), due to a better operating performance (up euro 170 million, or 6.5%) reflecting the positive developments in the regulatory framework in Italy and because higher purchase charges were incurred in the first quarter of 2006 due to the climatic emergency in the 2005-2006 winter. These positive factors were offset in part by the impact of unusually mild weather conditions in the first quarter affecting natural gas sales of consolidated subsidiaries (down 2.16 bcm, or 3.5%). Divisional results were also negatively impacted by weaker selling margins on gas due to an unfavorable trading environment.

Net borrowings and cash flow

Net borrowings as of September 30, 2007 amounted to euro 11,430 million, increasing by euro 4,663 million from December 31, 2006. Net cash provided by operating activities totalled euro 13,049 million in addition to euro 631 million related to cash from divestments. The main cash outflows related to: (i) expenditures on capital and exploration projects totalling euro 6,936 million; (ii) the purchase of oil and gas assets in the Gulf of Mexico and in Congo and in downstream oil (approximately euro 4.7 billion); (iii) the purchase of a 20% interests in OAO Gazprom Neft and 60% interests in three Russian companies engaged in developing natural gas following the finalization of a bid procedure for ex-Yukos assets (euro 3,729 million); (iv) dividend payments (euro 2,582 million, of which euro 2,384 million is the balance of the 2006 dividend by the parent company Eni SpA); (v) the repurchase of own shares for euro 486 million.

Net borrowings as of September 30, 2007 increased by euro 2,308 million from June 30, 2007. The main cash outflows related to: (i) the purchase of oil and gas assets in the Gulf of Mexico (euro 3.5 billion) and downstream oil assets (euro 0.2 billion); (ii) expenditures for the third quarter on capital and exploration projects totalling euro 2,679 million; (iii) the repurchase of own shares for euro 147 million. These outflows were partly offset by net cash provided by operating activities of euro 3,366 million in the third quarter and by cash from divestments for euro 455 million.

Leverage, the ratio of net borrowings to shareholders' equity including minority interest increased to 0.26 from 0.16 at December 31, 2006.

Repurchase of own shares

From January 1 to September 30, 2007, a total of 19.62 million own shares were purchased by the company for a total amount of euro 486 million (representing an average cost of euro 24.772 per share). Since the inception of the share buy-back programme (September 1, 2000), Eni has repurchased 355 million shares, equal to 8.85% of outstanding

capital stock, at a total cost of euro 5,998 million (representing an average cost of euro 16.915 per share).

Table of Contents

Expenditure on capital and exploratory projects

Expenditure on capital and exploratory projects in the first nine months of 2007 amounted to euro 6,936 million (euro 4,889 million in the first nine months of 2006) and related mainly to:

- Development activities (euro 3,223 million) deployed predominantly in Kazakhstan, Egypt, Angola, Italy, and Congo and exploration projects (euro 1,197 million) of which 93% was spent outside Italy, primarily in the Gulf of Mexico, Egypt, Norway, Nigeria, and Brazil. In Italy exploration activity related primarily to projects off the coast of Sicily.
- Development and upgrading of Eni's natural gas transport and distribution networks in Italy (euro 560 million) as well as upgrading of natural gas import pipelines to Italy (euro 176 million).
- Ongoing construction of combined cycle power plants (euro 123 million).
- Projects aimed at upgrading Eni's refineries, also improving the flexibility and yields of refineries, including the construction of a new hydrocracking unit at the Sannazzaro refinery (euro 392 million), building of new service stations and upgrading of existing ones (euro 138 million).
- Upgrading of the fleet used in the Engineering & Construction division (euro 821 million).

Other information

The Board of Directors resolved that Praoil SpA (Eni SpA 100%) is to be merged into Eni SpA according to the scheme approved by the same Board on September 20, 2007.

Financial and operating information by division for the third quarter and first nine months of 2007 is provided in the following pages.

- (a) Excluding special items.
- (b) Includes exploration bonuses.
- (c) Supplementary operating data is provided on page 32.
- (d) Includes Eni's share of production of equity-accounted entities.
- (e) Includes condensates.

Adjusted operating profit for the third quarter of 2007 was euro 3,309 million, a decrease of euro 786 million from the third quarter of 2006, or 19.2%, due primarily to:

- The adverse impact of the appreciation of the euro versus the dollar (approximately euro 290 million).
- Lower production sold (down 5.6 mmboe).
- Higher expenses incurred in connection with exploration activities (euro 249 million; euro 283 million on a constant exchange rate basis).
- Rising operating costs and amortization/depreciation charges reflecting the impact of sector specific inflation.

- 11 -

Table of Contents

Oil and gas realizations in dollars increased by 4.2% due to higher liquid realizations as compared to the marker Brent which benefited from narrowing differentials between heavy and light crude recorded in the third quarter, partly offset by lower gas realizations, related to the time lags in indexation mechanisms.

Adjusted net profit was euro 1,372 million, down euro 584 million, or 29.9% from the third quarter of 2006, primarily due to a weaker operating performance and an increase in tax rate from 52.5% to 59.1%, due to a higher share of profit before income taxes generated in countries with higher marginal tax rates.

Adjusted operating profit recorded for the first nine months of 2007 amounted to euro 9,924 million, down euro 2,644 million or 21% from first nine months of 2006, due mainly to:

- The adverse impact of the appreciation of the euro over the dollar (approximately euro 870 million).
- A decline in production sold (down 17.8 mboe).
- Higher exploration expenses (euro 625 million, euro 709 million at constant exchange rates).
- Rising operating costs and amortization and depreciation charges

Adjusted net profit of euro 4,428 million declined by euro 1,547 million, down 25.9% from first nine months of 2006 due to a weaker operating performance and an increase in the adjusted tax rate (from 52.7% to 56%) due to a change in the fiscal regime of Algeria enacted in the second half of 2006.

Special charges excluded by the adjusted operating profit of euro 65 million for the first nine months 2007 primarily related to the depreciation of mineral assets.

Oil and natural gas production in the third quarter of 2007 averaged 1,659 kboe/d, a decrease of 50 kboe/d compared to the same period last year (down 2.9%). This reduction was due primarily to the negative impact of disruptions resulting from continuing social unrest in Nigeria (down 25 kboe/d), unplanned downtime and technical issues in the North Sea, particularly the accident that occurred to the CATS pipeline in the United Kingdom, as well as mature fields declines in Italy and the United Kingdom. Increased oil prices reduced volume entitlements (down 11 kboe/d) for the recovery of expenditures and operating costs in Eni's Production Sharing Agreements and buy-back contracts. These negative effects were offset in part by the contribution of recently acquired properties in the Gulf of Mexico and Congo (up 77 kboe/d) and organic growth achieved in Kazakhstan and Libya. 88% of oil and natural gas was produced outside Italy (86% in the third quarter of 2006).

Daily production of oil and condensates (975 kbbbl/d) decreased by 66 kbbbl/d, or 6.3% from the third quarter 2006. Production decreases were reported mainly in: (i) Nigeria and the North Sea due to the above mentioned causes; (ii) mature field declines in particular in Italy and the United Kingdom. Main increases were registered in: (i) the Gulf of Mexico and Congo due to the contribution of purchased assets; (ii) Kazakhstan due to a better performance of the Karachaganak field and the maintenance activities that were performed in 2006.

Daily production of natural gas for the third quarter (3,927 mmcf/d) increased by 93 mmcf/d, or 2.4% mainly in the Gulf of Mexico and Libya, as a result of the development of the Western Libyan Gas Project, in Egypt, in Kazakhstan and in Norway. Gas production decreased due to mature field declines in Italy and as a result of technical issues in the United Kingdom.

Oil and natural gas production for the first nine months of 2007 averaged 1,710 kboe/d, a decrease of 51 kboe/d compared to the same period last year (down 2.9%). This was due to disruptions in Nigeria relating to social unrest (down 27 kboe/d), unplanned downtime and technical issues in the North Sea and mature field declines, in particular in Italy and the United Kingdom. As compared to the same period in 2006, production performance for the period was impacted also by the loss of production at the Venezuelan Dación oilfield (down 20 kbbbl/d) as a consequence of the unilateral cancellation of the service agreement for the field exploitation by the Venezuelan State Oil Company

PDVSA which took effect on April 1, 2006. These negative factors were offset in part by the contribution of recently acquired assets in the Gulf of Mexico and Congo and production increases in Libya and Kazakhstan. Oil and natural gas production share outside Italy was 88% (86% in the first nine months of 2006).

Daily production of oil and condensates (1,010 kbb/d) decreased by 70 kbb/d, or 6.5% from the same period in 2006. Production decreases were reported mainly in Nigeria, Venezuela and the North Sea due to the above mentioned causes. The most significant increases were registered in Kazakhstan and the United States.

Daily production of natural gas for first nine months of 2007 (4,017 mmcf/d) increased by 106 mmcf/d, or 2.7% mainly in Libya and the Gulf of Mexico.

				(TWh)			

(a) Starting on January 1, 2007, results from marketing of electricity have been included in results from market and distribution activities following an internal reorganization. As a consequence of this, electricity generation activity conducted by EniPower subsidiary comprises only results from production of electricity. Prior quarter results have not been restated.

(b) Excluding special items.

Adjusted operating profit for the third quarter of 2007 was euro 581 million, representing a decline of euro 38 million from the third quarter 2006, or 6.1%. This was mainly due to a decline in gas selling margins from an unfavorable trading environment due mainly to different reference periods for the energy parameters to which natural gas purchase and selling prices are contractually indexed. This trend was particularly significant in the thermoelectric segment. In addition, selling margins to wholesalers declined due to the current scheme for the indexation of the raw material component in tariffs.

This negative factor was partly offset by: (i) a growth achieved in sales volumes from consolidated subsidiaries (up 3.9%); and (ii) better operating performance recorded by transport activities in Italy reflecting tariff entitlements against expenditures incurred for upgrading the network (up euro 42 million).

Adjusted net profit for the third quarter of 2007 decreased by euro 7 million to euro 465 million, down 1.5%.

Table of Contents

Adjusted operating profit for the first nine months of 2007 increased by euro 170 million to euro 2,783, up 6.5%, notwithstanding the occurrence of unusually mild winter weather conditions resulting in lower volumes sold of natural gas by consolidated subsidiaries (down 2.16 bcm, or 3.5%). Despite this negative impact, divisional results were driven by:

- The positive impact of favorable developments with Italy's regulatory framework. This reflected the enactment of Resolution No. 79/2007 by the Authority for Electricity and Gas implementing a more favorable indexation mechanism of the raw material cost component in supplies to residential users compared to what was in force in the first half of 2006. Additionally, Eni fulfilled obligations provided by this resolution to renegotiate wholesale contracts based on the same indexation mechanism resulting in the partial reversal of provisions accrued in 2005 and in the first half of 2006 with respect to expected charges for these renegotiations.
- Higher supply costs incurred in the same period of last year caused by a climatic emergency during the 2005-2006 winter.
- Better operating performance recorded by transport activities in Italy.

In the first nine months the impact of the trading environment on gas selling margins yielded a decline in operating results compared to the first nine months of 2006, owing to the unfavorable trends recorded in the third quarter.

Net adjusted profit for the first nine months of 2007 was euro 2,042 million, representing an increase of euro 53 million over the first nine months of 2006, up 2.7%. This reflected higher adjusted operating profit, offset in part by weaker performance in certain affiliates accounted for under the equity method.

18.90	20.43	19.74	4.4	Worldwide gas sales	70.55	68.31	(3.2)

In the third quarter of 2007, natural gas sales of 19.74 bcm, including own consumption, sales by affiliates and upstream sales in Europe grew by 0.84 bcm from the third quarter of 2006, up 4.4%. Main increases in sales were recorded in:

- Italy, where volumes grew by 0.57 bcm (5.2%) driven by higher supplies to wholesalers (up 0.65 bcm) in view of optimizing equity production of the Libyan gas, also entailing lower supplies to Italian importers. This increase was partially offset by lower supplies to industrial clients (down 0.17 bcm), due to the competitive pressure, and the power generation segment (down 0.15 bcm).

- 14 -

Table of Contents

- Target markets in the rest of Europe, where volumes grew by 1.27 bcm, or 33.1%, reflecting the increase in the market share registered particularly in Spain (up 0.53 bcm), Germany/Austria (up 0.40 bcm), and France (up 0.15 bcm) and Turkey (up 0.12 bcm).
- Markets outside Europe (up 0.34 bcm, or 61,8%) reflecting an increase in LNG sales to the Asiatic and Northern American markets.

These increases were offset in part by lower supplies to Italian importers (down 1.20 bcm) essentially due to lower supplies of Libyan gas and the expiration of a supply contract with Promgas. Also, volumes produced in the North Sea declined by 0.14 bcm.

In the first nine months of 2007, natural gas sales of 68.31 bcm, including own consumption and sales by affiliates and upstream sales in Europe, declined by 2.24 bcm from the first nine months of 2006, or 3.2%, due to declining demand in Europe resulting from unusually mild winter weather conditions. Main decreases in sales were recorded in:

- Supplies to Italian importers (down 3 bcm).
- Sales in Italy, where volumes declined by 1.48 bcm, or 3.6%, primarily due to lower sales to residential (down 0.96 bcm) and industrial users (down 0.93 bcm), also owing to competitive pressure; supplies to wholesalers increased by 0.81 bcm.

These decreases were offset in part by sales growth achieved in target markets in the rest of Europe (up 2.07 bcm), particularly in Spain (up 0.98 bcm), Turkey (up 0.85 bcm), Northern Europe (up 0.41 bcm) and France (up 0.35 bcm) where market share gains were recorded.

Sales to markets outside Europe grew by 0.57 bcm, or 45.2%, on the back of higher LNG volumes sold on the Asiatic and Northern American markets.

EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization charges) on an adjusted basis is calculated by adding amortization and depreciation charges to adjusted operating profit on a pro forma basis. This performance indicator, which is not a GAAP measure under either IFRSs or U.S. GAAP, includes:

- Adjusted EBITDA of Eni's wholly-owned subsidiaries.
- Eni's share of adjusted EBITDA of Snam Rete Gas (55%), which is fully-consolidated when preparing consolidated financial statements in accordance with IFRSs.
- Eni's share of adjusted EBITDA generated by certain affiliates which are accounted for under the equity method for IFRSs purposes.

Management also evaluates performance in Eni's Gas & Power division on the basis of this measure taking account of the evidence that this division is comparable to European utilities in the gas and power generation sector. This measure is provided with the intent to assist investors and financial analysts in assessing the Eni Gas & Power

divisional performance as compared to its European peers, as EBITDA is widely used as the main performance indicator for utilities.

(a) Excludes special items.

In the third quarter 2007, the Refining & Marketing division reported an adjusted operating profit of euro 119 million, down euro 244 million, or 67.2% compared to the third quarter of 2006. This decline reflected a weaker operating performance delivered by the refining business, as a result of an unfavorable trading environment

Table of Contents

due to the narrowing of price differentials between light and heavy crude qualities that penalized complex throughputs by reducing the competitive advantage to process low-cost feedstock and the appreciation of the euro over the dollar. These effects were partially offset by better refinery yields.

Marketing activities in Italy reported a marginally lower operating profit mainly due to a decline in wholesale margins, particularly for aviation fuels and bitumen. This was partially offset by improved results reported by retail also due to higher volumes sold.

Adjusted net profit for the third quarter was euro 95 million, down euro 162 million, or 63%, from a year ago.

Adjusted operating profit for the first nine months of 2007 amounted to euro 424 million, down euro 218 million from the first nine months of 2006, or 34%. This reflected a weaker operating performance delivered by the refining business on the back of an unfavorable trading environment and the appreciation of the euro over the dollar. Partially offsetting these effects were higher yields of refineries and lower downtimes.

Marketing activities in Italy reported a lower operating profit mainly due to:

- Lower retail margins.
- A decline in wholesale business results due to lower margins and volumes marketed (down 7.8%), the latter also reflects unusually mild winter weather in the first quarter of 2007 causing lower sales of home-heating fuels.

The adjusted net profit for the first nine months of 2007 was euro 345 million, down euro 169 million, or 32.9%.

Special charges excluded from the adjusted operating profit related mainly to environmental provisions and a risk provision relating to an ongoing antitrust proceeding against European authorities (for a total charge of euro 56 million in the third quarter and euro 128 million in the first nine months).

In the third quarter of 2007 refining throughputs on Eni's own account (9.42 mmt tonnes) decreased by 360 ktonnes as compared to the third quarter of 2006, due to the expiration of a processing contract at the Priolo refinery owned by third parties, which occurred at the end of 2006 (down 280 ktonnes in the third quarter, down 940 ktonnes in the first nine months). Excluding this effect, refining throughputs in Italy were stable compared to the third quarter of 2006 as a result of:

- Better volume performance at the Gela and Milazzo refineries.
- Lower volume performance at the Sannazzaro and Taranto refineries reflecting planned and unplanned downtime.

In the first nine months of 2007 refining throughputs on Eni's own account (27.74 mmt tonnes) decreased by 50 ktonnes due to the expiration of a processing contract at the Priolo refinery as described above. Excluding this effect, refining throughputs in Italy increased by one million tonnes, or 4%, to 24.38 mmt tonnes reflecting better performance at the Livorno and Milazzo, Gela and Venice refineries owing to lower downtime, partially offset by decreases at the Sannazzaro and Taranto refineries.

In the third quarter of 2007, sales of refined products decreased by 1.17 mmt tonnes to 11.90 mmt tonnes, down 9%, mainly due to lower sales to oil companies and traders both in and outside Italy and lower volumes sold on wholesale markets in Italy.

Eni's increased retail marketing initiatives meant that volumes of refined products marketed in the retail market in Italy increased by 0.6% to 2.25 mmt tonnes, as compared to the third quarter 2006, resulting in a higher rate of growth compared to domestic consumptions. Diesel fuel sales increased driven by continuing trends in vehicle substitution, while gasoline fuel sales declined.

Volumes sold to retail markets in the Rest of Europe increased by 1.9% to 1.05 mmt tonnes mainly in Spain. Sales in the Italian wholesale market decreased by 4% from the third quarter 2006, to 2.85 mmt tonnes, as a result of intense competitive pressure and lower demand for diesel fuel and heating oil, particularly from the power generation sector.

Table of Contents

In the first nine months of 2007, sales of refined products decreased by 1.68 mmtonnes from the first nine months of 2006, to 36.27 mmtonnes, down 4.4%. This was due to lower volumes sold to oil companies and traders in Italy, lower sales of feedstock to the petrochemical sector as a result of the expiration of a processing contract at the Priolo refinery and lower sales on the wholesale market in Italy.

Sales of refined products on the retail market in Italy were 6.43 mmtonnes a decline of 1.1%, due to competitive pressure.

Sales on the retail market in the rest of Europe increased by 3.2% to 2.94 mmtonnes mainly in Spain.

Sales on the wholesale market in Italy decreased by 7.8% to 8.12 mmtonnes, due to lower demand for heating oil from the power generation sector, unusually mild winter weather conditions that impacted sales of heating products (diesel oil and LPG) in the first quarter of 2007 and competitive pressures.

Table of Contents

NON-GAAP measures

Reconciliation of reported operating profit and reported net profit to results on an adjusted basis

Management evaluates Group and business performance on the basis of adjusted operating profit and adjusted net profit, which are arrived at by excluding inventory holding gains or losses and special items. Further, finance charges on finance debt, interest income, gains or losses deriving from evaluation of certain derivative financial instruments at fair value through profit or loss as they do not meet the formal criteria to be assessed as hedges under IFRS, and exchange rate differences are excluded when determining adjusted net profit of each business segment.

The taxation effect of such items excluded from adjusted net profit is determined based on the specific rate of taxes applicable to each item, with the exception for finance charges or income, to which the Italian statutory tax rate of 33% is applied.

Adjusted operating profit and adjusted net profit are non-GAAP financial measures under either IFRS, or U.S. GAAP. Management includes them in order to facilitate a comparison of base business performance across periods and allow financial analysts to evaluate Eni's trading performance on the basis of their forecasting models. In addition, management uses segmental adjusted net profit when calculating return on average capital employed (ROACE) by each business segment.

The following is a description of items which are excluded from the calculation of adjusted results.

Inventory holding gain or loss is the difference between the cost of sales of the volumes sold in the period based on the cost of supplies of the same period and the cost of sales of the volumes sold calculated using the weighted average cost method of inventory accounting.

Special items include certain relevant income or charges pertaining to either: (i) infrequent or unusual events and transactions, being identified as non-recurring items under such circumstances; or (ii) certain events or transactions which are not considered to be representative of the ordinary course of business, as in the case of environmental provisions, restructuring charges, asset impairments or write ups and gains or losses on divestments even though they occurred in past periods or are likely to occur in future ones. As provided for in Decision No. 15519 of July 27, 2006 of the Italian market regulator (CONSOB), non recurring material income or charges are to be clearly reported in the management's discussion and financial tables.

Finance charges or income related to net borrowings excluded from the adjusted net profit of business segments are comprised of interest charges on finance debt and interest income earned on cash and cash equivalents not related to operations. In addition gains or losses on the fair value evaluation of above mentioned derivative financial instruments and exchange rate differences are excluded from the adjusted net profit of business segments.

Therefore, the adjusted net profit of business segments includes finance charges or income deriving from certain segment-operated assets, i.e., interest income on certain receivable financing and securities related to operations and finance charge pertaining to the accretion of certain provisions recorded on a discounted basis (as in the case of the asset retirement obligations in the Exploration & Production division). Finance charges or interest income and related taxation effects excluded from the adjusted net profit of the business segments are allocated on the aggregate Corporate and financial companies.

For a reconciliation of adjusted operating profit and adjusted net profit to reported operating profit and reported net profit see tables below.

Table of Contents**Summarized Group balance sheet**

Summarized group balance sheet aggregates the amount of assets and liabilities derived from the statutory balance sheet in accordance with functional criteria which consider the enterprise conventionally divided into the three fundamental areas focusing on resource investments, operations and financing. Management believes that this summarized group balance sheet is useful information in assisting investors to assess Eni's capital structure and to analyze its sources of funds and investments in fixed assets and working capital. Management uses the summarized group balance sheet to calculate key ratios such as return on capital employed (ROACE) and the proportion of net borrowings to shareholders' equity (leverage) intended to evaluate whether Eni's financing structure is sound and well-balanced.

Table of Contents**Net borrowings and leverage**

Leverage is a measure of a company's level of indebtedness, calculated as the ratio between net borrowings which is calculated by excluding cash and cash equivalents and certain very liquid assets from financial debt and shareholders equity, including minority interests. Management makes use of leverage in order to assess the soundness and efficiency of the Group balance sheet in terms of optimal mix between net borrowings and net equity, and to carry out benchmark analysis with industry standards. In the medium term, management plans to maintain a strong financial structure targeting a level of leverage up to 0.40.

(million euro)

	Dec. 31, 2006	June 30, 2007	Sep. 30, 2007	Change vs Dec. 31, 2006	Change vs June 30, 2007
Total debt	11,699	16,141	15,701	4,002	(440)
Short-term debt	4,290	9,061	7,244	2,954	(1,817)

Table of Contents**ROACE (Return On Average Capital Employed)**

Return On Average Capital Employed for the Group, on an adjusted basis is the return on the Group average capital invested, calculated as ratio between net adjusted profit before minority interest, plus net finance charges on net borrowings net of the related tax effect, and net average capital employed. The tax rate applied on finance charges is the Italian statutory tax rate of 33%. The capital invested as of period-end used for the calculation of net average capital invested is obtained by deducting inventory gains or losses as of in the period, net of the related tax effect.

(million euro)

Calculated on a twelve-month period ending on

Table of Contents**Summarized cash flow statement and change in net borrowings**

Eni's summarized group cash flow statement derives from the statutory statement of cash flows. It enables investors to understand the link existing between changes in cash and cash equivalents (deriving from the statutory cash flows statement) and in net borrowings (deriving from the summarized cash flow statement) that occurred from the beginning of period to the end of period. The measure enabling such a link is represented by the free cash flow which is the cash in excess of capital expenditure needs. Starting from free cash flow it is possible to determine either: (i) changes in cash and cash equivalents for the period by adding/deducting cash flows relating to financing debts/receivables (issuance/repayment of debt and receivables related to financing activities), shareholders' equity (dividends paid, net repurchase of own shares, capital issuance) and the effect of changes in consolidation and of exchange rate differences; (ii) changes in net borrowings for the period by adding/deducting cash flows relating to shareholders' equity and the effect of changes in consolidation and of exchange rate differences.

The free cash flow is a non-GAAP measure of financial performance.

ENI REPORT ON THE THIRD QUARTER OF 2007

BASIS OF PRESENTATION

Eni's consolidated report at September 30, 2007, unaudited, has been prepared in compliance with Italian listing standards set by the Commissione Nazionale per le Società e la Borsa (CONSOB) in its regulation for Italian listed companies.

Profit and loss account information is presented for the third quarter of 2007 and for the first nine months of 2007 and for the same periods a year earlier. Balance sheet information is presented at September 30, 2007, June 30, 2007 and December 31, 2006. Tables are comparable with those of 2006 financial statements and the 2007 interim report.

Eni's accounts at September 30, 2007 have been prepared in accordance with the evaluation and measurement criteria set by the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and adopted by the European Commission according to the procedure set forth in Article 6 of the European Regulation (CE) No. 1606/2002 of the European Parliament and European Council of July 19, 2002.

Non-GAAP financial measures disclosed throughout this report are accompanied by explanatory notes and tables to help investors to gain a full understanding of said measures in line with guidance provided for by recommendation CESR/05-178b.

Disclaimer

This report contains certain forward-looking statements, in particular in the Outlook section those regarding capital expenditure, dividends, share repurchases, allocation of future cash flow from operations, future operating performance, gearing, targets of production and sale growth, new markets, and the progress and timing of projects. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that will or may occur in the future. Actual results may differ from those expressed in such statements, depending on a variety of factors, including the timing of bringing new fields on stream; management's ability in carrying out industrial plans and in succeeding in commercial transactions; future levels of industry product supply, demand and pricing; operational problems; general economic conditions; political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations; development and use of new technology; changes in public expectations and other changes in business conditions; the actions of competitors.

Due to the seasonality in demand for natural gas and certain refined products and the changes in a number of external factors affecting Eni's operations, such as prices and margins of hydrocarbons and refined products, Eni's results of operations and changes in net borrowings for the first nine months of the year cannot be extrapolated for the full year.

Third quarter

Eni's net profit for the third quarter of 2007 was euro 2,146 million, down euro 276 million from the third quarter of 2006, or 11.4%, due mainly to a lower operating performance down by euro 449 million, or 9.3%, as a result of a decline in the Exploration & Production and Refining & Marketing divisions. This reduction in

operating profit was offset in part by a euro 190 million decrease in income taxes reflecting lower profit before taxes and a 1.4 percentage points decline in the Group tax rate (from 50.4 to 49%) among other things as a result of a lower share of profit generated by the Exploration & Production division.

Third quarter					(million euro)	Nine months			
2006	2007	Change	% Change		2006	2007	Change	% Change	
2,422	2,146	(276)	(11.4)	Net profit pertaining to Eni	7,697	7,001	(696)	(9.0)

2,620	1,892	(728)	(27.8)	Eni s adjusted net profit^(a)		8,057	6,792	(1,265)	(15.7)

(a) For a definition and reconciliation of reported operating profit and reported net profit to adjusted results, which exclude inventory holding gains/losses and special items, see Reconciliation of reported operating profit and reported net profit to results on an adjusted basis on page 38.

Eni s adjusted net profit amounted to euro 1,892 million, down 27.8% from the third quarter 2006. Adjusted net profit is arrived at by excluding an inventory holding gain of euro 165 million and special gains of euro 89 million net, resulting in a downward adjustment to net profit (down euro 254 million).

Special gains related to the divestment of interests in certain associates in the Engineering & Construction division, partly offset by environmental charges and provisions for redundancy incentives.

(14)	(70)	(56)	..	Corporate and financial companies	(3)	(41)	(38)	..	
12	35	23		Impact of unrealized profit in inventory ^(a)	(76)	20	96		
2,710	2,046	(664)	(24.5)		8,485	7,257	(1,228)	(14.5)	
<i>of which:</i>									
90	154	64	71.1	net profit of minorities	428	465	37	8.6	
2,620	1,892	(728)	(27.8)	Eni s adjusted net profit	8,057	6,792	(1,265)	(15.7)	

(a) Unrealized profit in inventory concerned intragroup sales of goods and services recorded at period end in the equity of the purchasing business segment.

The decline in the Group adjusted net profit was a result of:

- The reduction of adjusted net profit reported by the **Exploration & Production** division (down euro 584 million, or 29.9%) due to a weaker operating performance (down euro 786 million, or 19.2%), which was adversely impacted by the appreciation of the euro over the dollar, a decline in production sold (down 5.6 mmboe) and rising operating costs and amortization charges in connection with higher exploratory activity. Net profit was also impacted by a 6.6 percentage point increase in the tax-rate on an adjusted basis.
- The reduction of adjusted net profit reported by the **Refining & Marketing** division (down euro 162 million, or 63%) due to a weaker operating

interest in OAO Gazprom Neft held by Eni and a 51% interest in the three Russian gas companies held according to a 60:40 interest by Eni and Enel as of September 30, 2007, the Group ROACE would stand at 20.1%.

These declines in the adjusted net profit were partly offset by higher adjusted net profit in the Engineering & Construction division (up euro 57 million; up 48.7%), due to an improved operating performance (up euro 66 million) relating particularly to favorable demand trends in oilfield services.

The **trading environment** was unfavorable, despite the fact that higher Brent crude prices were recorded averaging \$74.87 per barrel, up 7.7% compared to the third quarter 2006. In fact, the benefit of higher oil prices was more than offset by the appreciation of the euro over the dollar (up 7.9%). Also realized refining margins decreased significantly due to the worsening of the ratio between prices of main distillates and Brent quotations (the margin on Brent was down 5.4%) in addition to the narrowing of price differentials between light and heavy crude qualities which penalized complex

performance of refining activity reflecting a negative trading environment which affected results from complex throughputs and the appreciation of the euro over the dollar.

throughputs by reducing the competitive advantage to process low-cost feedstock. Gas selling margins decreased due to an unfavorable trading environment reflecting indexation mechanisms of purchase/selling prices.

-
- (1) Non-GAAP financial measures disclosed throughout this report are accompanied by explanatory notes and tables to help investors to gain a full understanding of said measures in line with guidance provided for by CESR recommendation No. 2005-178b. See pages 15 and 16 for ROACE, leverage and net borrowings respectively.

Contents

ENI REPORT ON THE THIRD QUARTER OF 2007

First nine months

Eni's net profit for the first nine months of 2007 was euro 7,001 million, down euro 696 million from the first nine months of 2006, or 9%, due primarily to a lower operating performance (down euro 1,668 million, or 10.9%) as a result of a decline in the Exploration & Production and Refining & Marketing divisions, partially offset by the positive performance delivered by the Engineering & Construction, Petrochemicals and Gas & Power divisions. This reduction in operating profit was offset in part by lower income taxes (down by euro 1,064 million) owing to lower profit before taxes and a 1.9 percentage points decline in the Group tax rate (from 49.9 to 48%).

Eni's adjusted net profit amounted to euro 6,792 million, down 15.7% from the first nine months of 2006. Adjusted net profit is arrived at by excluding an inventory holding gain of euro 275 million and special charges of euro 66 million net, resulting in a downward adjustment to net profit (up euro 209 million).

Special charges related to gains on divestment in the Engineering & Construction division, environmental charges, provisions for redundancy incentives, as well as non-recurring charges related to: (i) risk provisions against certain ongoing antitrust proceedings before the European antitrust authority; (ii) a gain deriving from the curtailment of the provision for employee post-retirement benefits deriving from a change in Italian laws regulating this matter for Italian companies.

The decline in the Group adjusted net profit resulted from the reduction of adjusted net profit recorded in the: (i) **Exploration & Production** division (down euro 1,547 million, or 25.9%), due to a weaker operating performance (down euro 2,644 million, or 21%) which was adversely impacted by the appreciation of the euro over the dollar (8%), a decline in production sold (down 17.8 mmbob), higher operating costs and amortization charges. Performance in this division was also negatively affected by the 3.3 percentage points increase in the adjusted tax rate.

(ii) **Refining & Marketing** division (down euro 169 million, or 32.9%), due to weaker realized refining margins particularly on complex throughputs and the appreciation of the euro over the dollar.

These declines in the adjusted net profit were partly offset by a higher adjusted net profit reported in the divisions:

- **Engineering & Construction** (up euro 209 million, or 77.7%), reflecting an improved operating performance (up euro 234 million) against the backdrop of favorable demand trends in oilfield services.
- **Petrochemicals** (up euro 115 million), due to an improved operating performance (up euro 154 million), reflecting a recovery in product selling margins and a weak operating performance in 2006 resulting from the unplanned downtime of the Priolo cracker and downstream plants as a consequence of an accident that occurred at the nearby refinery in April 2006.
- **Gas & Power** (up euro 53 million, or 2.7%), due to a better operating performance (up euro 170 million, or 6.5%) reflecting the positive developments in the regulatory framework in Italy and because higher purchase charges were incurred in the first quarter of 2006 due to the climatic emergency in the 2005-2006 winter. These positive factors were offset in part by the impact of unusually mild winter weather conditions affecting natural gas sales volumes by consolidated subsidiaries (down 2.16 bcm, or 3.5%). Divisional results were also negatively impacted by weaker selling margins on gas due to an unfavorable trading environment.

In the first nine months, the **trading environment** was unfavorable due to the appreciation of the euro over the dollar (up 8%), lower realized refining margins, in particular on complex throughputs, and lower gas selling margins due to adverse trends in energy parameters to which purchase and selling prices are indexed. In the first nine months a slight increase in the oil prices (up 0.3%) was recorded with Brent crude prices averaging \$67.13 per barrel; when expressed in terms of euros,

Brent prices recorded a 7.2 drop.

Third quarter

Eni's net sales from operations (revenues) for the third quarter of 2007 (euro 20,190 million) were down euro 176 million, a 0.9% decline from the third quarter of 2006, primarily reflecting the impact of the appreciation of the euro versus the dollar (up 7.9%) and a decline in volumes. These negative factors were partially offset by higher activity levels in the Engineering & Construction and higher oil and refined products dollar prices.

First nine months

Eni's net sales from operations (revenues) for the first nine months of 2007 (euro 61,878 million) were down euro 2,811 million, a 4.3% decline from the first nine months of 2006, primarily reflecting the impact of the appreciation of the euro versus the dollar (up 8%) and a decline in volumes. These negative factors were offset in part by higher activity levels in the Engineering & Construction division.

Revenues generated by the Exploration & Production division (euro 19,240 million) declined by euro 1,781 million, down 8.5%, mainly due to the impact of the appreciation of the euro versus the dollar and lower hydrocarbon production sold (down 17.8 mmmboe, or 3.8%). The impact on revenues changes from variations

Revenues generated by the Gas & Power division (euro 18,937 million) declined by euro 1,261 million, down 6.2%, mainly due to lower natural gas volumes sold (down 2.16 bcm or 3.5%) and lower volumes transported and distributed as a consequence of an unusually mild winter weather. Also, average natural gas prices were lower compared to the first nine months 2006 mainly reflecting negative trends in energy parameters to which gas prices are contractually indexed.

Revenues generated by the Refining & Marketing division (euro 25,932 million) declined by euro 3,699 million, down 12.5%, mainly due to the effect of the appreciation of the euro over the dollar and lower product volumes marketed (-1.7 mmmtonnes) and lower oil volumes traded (-3.9 mmmtonnes), partially offset by increased international product prices.

Revenues generated by the Petrochemical division (euro 5,243 million) increased by euro 160 million from the first nine months of 2006, up 3.1%, reflecting mainly the fact that performance in 2006 was impacted by the unplanned downtime of the Priolo cracker and downstream plants as a consequence of an accident that occurred at the nearby refinery in April 2006.

in dollar realizations was immaterial (oil up 2.1%, natural gas down 2%).

Net sales from operations generated by the Engineering and Construction division (euro 6,474 million) increased by euro 1,464 million, up 29.2%, due to increased activity levels in the Offshore and Onshore construction businesses.

Operating expenses

Third quarter				(million euro)	Nine months			
2006	2007	Change	% Change		2006	2007	Change	% Change
13,210	13,265	55	0.4	Purchases, services and other	42,593	40,992	(1,601)	(3.8)
				<i>of which:</i>				
57				<i>non-recurring items</i>	57	130		
120	39			<i>other special items</i>	327	210		
937	962	25	2.7	Payroll and related costs	2,673	2,739	66	2.5
				<i>of which:</i>				
				<i>non-recurring items</i>		(74)		
35	70			<i>provision for redundancy incentives</i>	77	89		
14,147	14,227	80	0.6		45,266	43,731	(1,535)	(3.4)

Operating expenses for the first nine months of 2007 (euro 43,731 million) declined by euro 1,535 million from the first nine months of 2006, down 3.4%, essentially due to appreciation of the euro versus the dollar. Other factors behind this reduction were: (i) lower supplies of natural gas in line with lower sales, lower purchase prices for natural gas and the fact that in the first quarter of 2006 higher gas supplies costs were recorded due to a climatic emergency for the winter time 2005-2006; (ii) lower costs for refinery maintenance activity.

Those reductions were partially offset by rising

Italy and outside Italy and an increase in the average number of employees outside Italy in the Engineering & Construction division related to higher activity levels and the Exploration & Production division related to acquired assets. These increases were offset in part by exchange rates differences and a euro 74 million non-recurring gain deriving from the curtailment of the provision for post-retirement benefits existing at 2006 year-end related to obligations towards Italian employees. In fact, effective January 1, 2007, Italian laws modified Italian post-retirement benefits scheme from a defined benefit plan to a defined contribution

operating costs in the upstream and by higher purchase prices for refinery and petrochemical feedstock.

Labor costs (euro 2,739 million) increased by euro 66 million, up 2.5%, mainly due to an increase in unit labor costs in

one. Following this, the provision for Italian employees was reassessed to take account of the exclusion of future salaries and relevant increases from actuarial calculations.

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007****Employees**

(units)	Dec. 31, 2006	Sep. 30, 2007	Change	% Change
Exploration & Production	8,336	9,132	796	9.5
Gas & Power	12,074	11,826	(248)	(2.1)
Refining & Marketing	9,437	9,412	(25)	(0.3)
Petrochemicals	6,025	6,805	780	12.9
Engineering & Construction	30,902	32,634	1,732	5.6
Other activities	2,219	1,412	(807)	(36.4)
Corporate and financial companies	4,579	4,780	201	4.4
	73,572	76,001	2,429	3.3

As of September 30, 2007, employees were 76,001, an increase of 2,429 employees from December 31, 2006, or 3.3%. Employees in Italy were 40,186. The 421 employee increase related mainly to an increase in the headcount (up 429 employees) and changes in consolidation scope.

In the nine months of 2007, 1,840 employees were newly hired, of these 1,316 on open-end contracts and **Depreciation and amortization and impairments**

1,411 employees were dismissed (of these 885 employees on open-end contracts).

Outside Italy employees were 35,815, with a 2,008 employee increase mainly concerning fixed-term workers in the Engineering & Construction division and the acquisition of new activities in the Exploration & Production division (Dominion Resources e Maurel&Prom).

Third quarter				(million euro)	Nine months			
2006	2007	Change	% Change		2006	2007	Change	% Change
1,108	1,377	269	24.3	Exploration & Production	3,228	3,893	665	20.6
182	168	(14)	(7.7)	Gas & Power	502	501	(1)	(0.2)
114	107	(7)	(6.1)	Refining & Marketing	333	323	(10)	(3.0)
30	28	(2)	(6.7)	Petrochemicals	91	84	(7)	(7.7)
52	58	6	11.5	Engineering & Construction	139	177	38	27.3
	1	1	..	Other activities	4	3	(1)	(25.0)

1,500	1,748	248	16.5		4,534	5,054	520	11.5

Depreciation and amortization charges (euro 5,020 million) increased by euro 676 million, up 15.6%, mainly in the Exploration & Production division (up

charges of an estimated update of asset retirement obligations for certain Italian and U.S. fields carried out in the preparation of 2006 financial statements, offset in

euro 665 million) related to higher exploration expenditures (up euro 709 million on a constant exchange rate basis), the consolidation of activities acquired in the Gulf of Mexico and Congo and the impact on amortization

part by exchange rate differences.

Impairment charges for the period at euro 34 million regarded mainly upstream assets.

19	56	37		Impact of unrealized profit in inventory	(121)	32	153		
5,127	4,245	(882)	(17.2)		15,714	13,694	(2,020)	(12.9)	

Third quarter

Adjusted operating profit for the third quarter was

appreciation against the dollar (7.9%), lower sold production volumes (-5.6 million boe) and higher

euro 4,245 million, down euro 882 million or 17.2% from the third quarter 2006. Adjusted operating profit is arrived at by excluding an inventory holding gain of euro 238 million and special charges of euro 104 million net. The Group operating profit was dragged down by a weaker operating performance recorded in: (i) the Exploration & Production division primarily due to the euro s

operating expenses and amortization charges mainly referred to higher exploratory expenditures, and (ii) the Refining & Marketing division due to a weaker refining performance in the wake of a negative trading environment which particularly affected results from complex throughputs and the appreciation of the euro over the dollar.

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007****First nine months**

Adjusted operating profit for the first nine months of 2007 was euro 13,694 million, down 12.9% from a year ago. Adjusted operating profit is arrived at by excluding an inventory holding gain of euro 345 million and special charges of euro 337 million net. The main factor affecting this decline was a weaker operating performance reported by: (i) the Exploration & Production division (down euro 2,644 million from the first nine months of 2006, or 21%), primarily due to a 8% appreciation of the euro versus the dollar, lower production sold (down 17.8 mmmboe), and rising operating costs and amortization charges; (ii) the Refining & Marketing division (down euro 218 million from the first nine months of 2006, or 34%) due to the decline in realized refinery margins, particularly on complex throughputs, and the appreciation of the euro over the dollar.

These declines in the adjusted operating profit were partly offset by a higher adjusted operating profit reported in the divisions:

- **Engineering & Construction** (up euro 234 million, or 65.7%), reflecting the backdrop of favorable demand trends in oilfield services;
- **Petrochemicals** (up euro 154 million), due to a recovery in product selling margins and to the impact of the unplanned downtime of the Priolo cracker and downstream plants on 2006 performance;
- **Gas & Power** (up euro 170 million, or 6.5%), reflecting the positive developments in the regulatory framework in Italy and because higher purchase charges were incurred in the first quarter of 2006 due to the climatic emergency in the 2005-2006 winter. These positive factors were offset in part by the impact of unusually mild weather conditions affecting natural sales gas by consolidated subsidiaries (down 2.16 bcm, or 3.5%). Divisional results were also negatively impacted by weaker selling margins on gas due to an unfavorable trading environment.

Net income from investments

The comparison with the first nine months of 2006 data is shown in the table below:

Net financial expense

In the first nine months 2007, net financial expense (euro 27 million) increased by euro 136 million from the first nine months 2006 when a net financial income of euro 109 million was recorded. This decrease was mainly due to: (i) the recognition of fair value gains on certain financial derivatives instruments in the first nine months of 2006 as compared to a fair value loss recorded for these instruments in the first nine months of 2007. Fair value changes on these financial instruments are recorded in the profit and loss account instead of being recognized in connection with related assets, liabilities and commitments because these instruments do not meet the formal criteria to be assessed as hedges under IFRS, including the time value component (for a loss of euro 82 million) of certain cash flow hedges Eni entered into to hedge commodity risk in connection with the acquisitions of proved and unproved upstream properties executed in the first nine months of 2007 (for more details on this issues see the balance sheet discussion under the paragraph net working capital); (ii) the increase in net finance expenses as a result of increasing average net borrowings, higher interest rates on euro (Euribor up 1.2 percentage points) and dollar loans (Libor up 0.4 percentage points). These negatives were partly offset by a euro 127 million net gain upon fair value valuation through profit and loss account of both the 20% interest in OAO Gazprom Neft and the related call option guaranteed by Eni to Gazprom related to this interest. This net gain is equal to the remuneration of the capital employed according to the contractual arrangements between the two partners (for more details on this issues see the balance sheet discussion under the paragraph net working capital).

ENI REPORT ON THE THIRD QUARTER OF 2007

Net income from investments in the first nine months of 2007 amounted to euro 986 million and concerned essentially: (i) Eni's share of income of affiliates accounted for with the equity method of accounting (euro 550 million), in particular in the Gas & Power, Refining & Marketing and Engineering & Construction division; (ii) net gains on the divestment of interests in certain

associates (Haldor Topsøe AS, euro 264 million, and Camom Group euro 25 million) of the Engineering & Construction division; (iii) dividends received by affiliates accounted for at cost (euro 135 million). The table below sets forth an analysis of net income/losses from investment by type for the periods indicated.

Third quarter			(million euro)	Nine months		
2006	2007	Change		2006	2007	Change
251	202	(49)	Effect of the application of the equity method of accounting	631	550	(81)
37	4	(33)	Dividends	94	135	41
(4)	290	294	Net gains on disposal	21	301	280
(5)	(1)	4	Other income (losses) from investments			
279	495	216		746	986	240

Income taxes

Third quarter			(million euro)	Nine months		
2006	2007	Change		2006	2007	Change
Profit before income taxes						
1,149	875	(274)	Italy	4,462	4,223	(239)
3,916	3,947	31	Outside Italy	11,763	10,438	(1,325)
5,065	4,822	(243)		16,225	14,661	(1,564)
Income taxes						
462	411	(51)	Italy	1,758	1,666	(92)
2,091	1,952	(139)	Outside Italy	6,342	5,370	(972)
2,553	2,363	(190)		8,100	7,036	(1,064)
Tax rate (%)						
40.2	47.0	6.8	Italy	39.4	39.5	0.1
53.4	49.5	(3.9)	Outside Italy	53.9	51.4	(2.5)
50.4	49.0	(1.4)		49.9	48.0	(1.9)

Income taxes were euro 7,036 million, down euro 1,064 million, or 13.1%, due primarily to lower income before taxes (down euro 1,564 million). The 48% Group tax rate declined by 1.9 percentage points from the first nine months of 2006 (49.9%) reflecting: (i) a lower share of

taxes generated in Algeria due to changes in the fiscal regime implemented in the second half of 2006.

Adjusted tax rate was up 0.6 percentage points to 49.1% (48.5% in the first nine months of 2006), which is

income before taxes generated by the Exploration & Production division which is subject to a higher rate of taxes compared to the Group's other activities; (ii) the recording of higher income on investments which is subject to a limited tax burden; (iii) the recognition of deferred tax assets related to an increase in assets and liabilities carrying amounts for tax purposes on part of certain Italian subsidiaries upon renewal of the Group option for the Italian consolidated statement for tax purposes. These positive factors were partly offset by a higher tax rate applicable to income before income

calculated as ratio of adjusted net profit to income taxes on an adjusted basis.

Minority interest

Minority interest's share of profit was euro 624 million and related to Snam Rete Gas SpA (euro 192 million) and Saipem SpA (euro 428 million). Minority interest's share of profit of Saipem includes the minority share of gains recorded by Saipem on the divestment of certain interests.

SUMMARIZED GROUP BALANCE SHEET

Summarized group balance sheet aggregates the amount of assets and liabilities derived from the statutory balance sheet in accordance with functional criteria which consider the enterprise conventionally divided into the three fundamental areas focusing on resource investments, operations and financing. Management believes that this summarized group balance sheet is useful information in assisting investors

Summarized Group Balance Sheet ^(a)

(million euro)

to assess Eni's capital structure and to analyze its sources of funds and investments in fixed assets and working capital. Management uses the summarized group balance sheet to calculate key ratios such as return on capital employed (ROACE) and the proportion of net borrowings to shareholders' equity (leverage) intended to evaluate whether Eni's financing structure is sound and well-balanced.

(a) For a reconciliation to the statutory tables see Eni's Report on the first half of 2007, under the paragraph: Reconciliation of Summarized Group Balance Sheet to statutory schemes pages 52-53.

(b) Include operating financing receivables and securities related to operations for euro 269 million (euro 302 million at June 30, 2007 and euro 245 million at December 31, 2006) and securities covering technical reserves of Eni's insurance activities for euro 482 million (euro 515 million at June 30, 2007 and euro 417 million at December 31, 2006).

Contents

ENI REPORT ON THE THIRD QUARTER OF 2007

The appreciation of the euro over other currencies, in particular the dollar (at September 30, 2007 the EUR/USD exchange rate was 1.418 as compared to 1.317 at December 31, 2006, up 7.7%) determined with respect to September 30, 2007 an estimated decrease in the book value of net capital employed of approximately euro 1,700 million, in shareholders' equity of approximately euro 1,250 million and in net borrowings of approximately euro 450 million.

At September 30, 2007, **net capital employed** totalled euro 55,059 million, representing an increase of euro 7,093 million from December 31, 2006.

Fixed assets

Fixed assets totalled euro 60,501 million, representing an increase of euro 6,267 million from December 31, 2006 (euro 54,234 million) due to capital expenditures (euro 6,936 million) and acquisition of assets and investments, partly offset by depreciation, amortization and impairments charges (euro 5,054 million) and currency translation effects.

Other assets include, for a book value of \$829 million (corresponding to euro 585 million at the September 30, 2007 EUR/USD exchange rate), the assets related to the service contract for oil activities in the Dación area of the Venezuelan branch of Eni's subsidiary Eni Dación BV. With effective date April 1, 2006, the Venezuelan State oil company Petróleos de Venezuela SA (PDVSA) unilaterally terminated the Operating Service Agreement (OSA) governing activities at the Dación oil field where Eni acted as a contractor, holding a 100% working interest. As a consequence, starting at the same date, operations at the Dación oil field are conducted by PDVSA. Eni proposed to PDVSA to agree in terms in order to recover the fair value of its Dación assets. On November 2006, based on the bilateral investments treaty in place between the Netherlands and Venezuela (the Treaty), Eni commenced a proceeding before on International Centre for Settlement of Investment Disputes (ICSID) Tribunal (i.e. a tribunal acting under the auspices of the ICSID Convention and being competent pursuant to the Treaty) to claim its rights. Despite this action, Eni is still ready to negotiate a solution with PDVSA to obtain a fair compensation for its assets. Based on the opinion of its internal and

method, based on Eni's interest in the expected future hydrocarbon production and associated capital expenditures and operating costs, and applying to the projected cash flow a discount rate reflecting Eni's cost of capital as well as the specific risk of concerned activities. Independent evaluations carried out by a primary petroleum consulting firm fully support Eni's internal evaluation. The estimated net present value of Eni's interest in the Dación field, as calculated by Eni, is higher than the net book value of the Dación assets which consequently have not been impaired. In accordance with the ICSID Convention, a judgement by the ICSID Tribunal awarding compensation to Eni would be binding upon the parties and immediately enforceable as if it were a final judgement of a court of each of the States that have ratified the ICSID Convention. The ICSID Convention was ratified in 143 States.

Accordingly, if Venezuela fails to comply with the award and to pay the compensation, Eni could take steps to enforce the award against commercial assets of the Venezuelan Government almost anywhere those may be located (subject to national law provisions on sovereign immunity).

The item **Investments** comprises a 60% interest in Arctic Russia BV (the former Eni Russia BV) which owns 100% interest in three Russian companies acquired on April 4, 2007 in partnership with Enel, following award of a bid for Lot 2 in the Yukos liquidation procedure. These three companies OAO Arctic Gas, OAO Urengoil and OAO Neftegaztehnologia are engaged in exploration and development of gas reserves. Eni and Enel granted to Gazprom a call option to acquire a 51% interest in these acquired companies to be exercisable by Gazprom within 24 months starting from the acquisition date. Eni evaluates the investment in Arctic Russia BV under the equity method accounting as it jointly controls the three entities based on ongoing contractual arrangements, therefore exercising significant influence in the financial and operating policy decisions of the investees. This proportion allocated of 60% is the present ownership interest of Eni in the acquired companies determined by not taking into account the eventual exercise of the call option by Gazprom.

external legal consultants, Eni believes to be entitled to a compensation for such expropriation in an amount equal to the market value of the OSA before the expropriation took place. The market value of the OSA depends upon its expected profits. In accordance with established international practice, Eni has calculated the OSA's market value using the discounted cash flow

Net working capital

At September 30, 2007, **net working capital** totalled euro 4,622 million, representing an increase of euro 575 million from December 31, 2006 mainly due to: (i) the acquisition of a 20% interest in the Russian company OAO Gazprom Neft (see below); (ii) the increase in the inventories evaluated applying the weighted average cost method due to the impact of higher oil and refined

- 13 -

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007**

products prices as recorded in the third quarter of 2007 compared to the fourth quarter 2006; (iii) a receivable upon a dividend approved by OAO Gazprom Neft on June 22, 2007; this dividend has not yet been distributed. These increases were partly offset by decreases in connection with the following items:

(i) higher taxes payable and an increase in deferred tax liability due to the recognition of income taxes and taxable temporary differences for the period and the fact that excise taxes on oil products marketed in Italy in the first 15 days of December are settled within the end of this month, instead of being paid in the following month as it occurs for the other calendar months. These factors were partly offset by the payment of the balance of income taxes due by Italian companies for the fiscal year of 2006 and the recognition of a deferred tax asset and lower taxes payable in connection with fair value losses on certain cash flow hedges (see next paragraph);

(ii) a euro 1,072 million loss recognized on the fair value evaluation of certain cash flow hedges, which the Group entered into in order to hedge cash flows expected in the 2008-2011 period from the sale of approximately 2% of Eni's proved hydrocarbon reserves as of 2006 year-end in connection with its purchase of certain proved and unproved oil and gas properties onshore in Congo (from the French company Maurel & Prom) and in the Gulf of Mexico (from the US company Dominion) finalized in February and April 2007, respectively.

In the light of this, Eni put in place certain forward sale contracts at a fixed price and call and put options with the same date of exercise. These options can be exercised in presence of crude oil market prices higher or lower compared with preset contractual prices. This treatment does not apply to the time value component arising from market price fluctuations within the range provided by these call and put options which is recognized in the profit and loss account under the item net financial expenses because the hedging relationship is ineffective. This loss was partly offset by gains recorded on the fair value evaluation of certain derivative financial instruments, which do not meet the formal criteria to be recognized as hedges under IFRS, reflecting the depreciation of the US dollar.

The item **Equity instruments** comprises the carrying amount of a 20% interest in OAO Gazprom Neft acquired on April 4, 2007 following finalization of a bid within the Yukos liquidation procedure. This entity is currently listed at the London Stock Exchange. This accounting classification reflects the circumstance that Eni granted to Gazprom a call option on the entire 20% interest to be exercisable by Gazprom within 24 months starting from the acquisition date, at a price of \$3.7 billion equalling the bid price, as modified by subtracting dividends received and adding possible share capital increases, a contractual remuneration of 9.4% on the capital employed and financing collateral expenses. In accordance with the fair value option provided for by IAS 39, Eni evaluated its 20% interest in OAO Gazprom Neft at fair value with changes in fair value recognized through the profit or loss account instead of net equity. Eni elected this way in order to eliminate a recognition inconsistency that would otherwise arise from measuring both the equity instrument and the related call option on different bases. In fact, the call option granted to Gazprom is measured at fair value through profit or loss being a derivative instrument. Consequently, the carrying amount of this equity instrument is determined based on its fair value as expressed by current quoted market prices, as reduced by the fair value amount of the relevant call option, thus equalling the option strike price as of September 30, 2007.

Net assets held for sale including related net borrowings were euro 114 million and related to the Engineering & Construction division's interest in Gaztransport et Technigaz SAS, a company owing a patent for the construction of tanks to transport LNG.

The share of the Exploration & Production, Gas & Power and Refining & Marketing divisions on net capital employed was 89% (90% at December 31, 2006).

ENI REPORT ON THE THIRD QUARTER OF 2007

Return On Average Capital Employed (ROACE)

Return On Average Capital Employed for the Group, on an adjusted basis is the return on the Group average capital invested, calculated as ratio between net adjusted profit before minority interest, plus net finance charges on net borrowings net of the related tax effect, and net average capital employed. The tax rate applied on finance charges is the Italian statutory tax rate of 33%. The capital invested as of period-end used for the calculation of net average capital invested is obtained (million euro)

by deducting inventory gains or losses as of in the period, net of the related tax effect.

ROACE by business segment is determined as ratio between adjusted net profit and net average capital invested pertaining to each business segment, adjusting net capital invested as of period-end by net inventory gains or losses (net of the related tax effect based on each business segment specific tax rate).

Calculated on a twelve-month period ending on September 30, 2007

	Exploration & Production	Gas & Power	Refining & Marketing	Group
Adjusted net profit	5,732	2,915	460	9,790

ENI REPORT ON THE THIRD QUARTER OF 2007

Net borrowings and leverage

Leverage is a measure of a company's level of indebtedness, calculated as the ratio between net borrowings which is calculated by excluding cash and cash equivalents and certain very liquid assets from financial debt and shareholders' equity, including minority interests. Management makes use of leverage in order to

(million euro)

assess the soundness and efficiency of the Group balance sheet in terms of optimal mix between net borrowings and net equity, and to carry out benchmark analysis with industry standards. In the medium term, management plans to maintain a strong financial structure targeting a level of leverage up to 0.40.

	Dec. 31, 2006	June 30, 2007	Sep. 30, 2007	Change vs Dec. 31, 2006	Change vs June 30, 2007
Total debt	11,699	16,141	15,701	4,002	(440)
<i>Short-term debt</i>	4,290	9,061	7,244	2,954	(1,817)
<i>Long-term debt</i>	7,409	7,080	8,457	1,048	1,377
Cash and cash equivalent	(3,985)	(6,368)	(3,676)	309	2,692
Securities not related to operations	(552)	(214)	(178)	374	36
Non-operating financing receivables	(395)	(437)	(417)	(22)	20
Net borrowings	6,767	9,122	11,430	4,663	2,308
Shareholders' equity including minority interest	41,199	42,296	43,629	2,430	1,333
Leverage	0.16	0.22	0.26	0.10	0.04

Net borrowings at September 30, 2007 were euro 11,430 million, representing an increase of euro 4,663 million from December 31, 2006. The high level of cash inflow generated by operating activities (euro 13,049 million) affected by seasonality in demand for natural gas and certain refined products, cash from divestments (euro 631 million) and currency translation effects, were more than offset by the cash outflows related to: (i) the acquisition of investments and assets (euro 8,711 million) mainly relating to the 20% interest in OAO Gazprom Neft and 60% interest in three Russian companies engaged in developing natural gas following finalization of a bid procedure for ex-Yukos assets (euro 3.7 billion), the purchase of Dominion Resources upstream assets in the Gulf of Mexico (approximately euro 3.5 billion), the purchase of oil producing assets onshore Congo (approximately euro 1 billion) and the acquisition of a further 16.11% stake in the Ceska Rafinerska in the Czech Republic (euro 0.2 billion) increasing Eni's ownership interest to 32.4%; (ii) capital expenditures totalling euro 6,936 million; (iii) dividend

total amount of euro 486 million (representing an average cost of euro 24.772 per share). Since the inception of the share buy-back programme (September 1, 2000), Eni has repurchased 355 million shares, equal to 8.85% of outstanding capital stock, at a total cost of euro 5,998 million (representing an average cost of euro 16.915 per share).

Total debt amounted to euro 15,701 million, of which 7,244 million were short-term (including the portion of long-term debt due within 12 months for euro 1,047 million) and euro 8,457 million were long-term.

At September 30, 2007, **leverage** ratio between net borrowings and shareholders' equity was 0.26 compared with 0.16 at December 31, 2006. Assuming Gazprom exercises its call options to purchase a 20% interest in OAO Gazprom Neft and a 51% interest in ex-Yukos gas assets from Eni as of September 30, 2007, leverage would stand at 0.19.

payments (euro 2,582 million, of which euro 2,384 million concerning the balance of the 2006 dividend by the parent company Eni SpA and euro 149 million and euro 71 million were paid by Snam Rete Gas SpA and Saipem SpA, respectively); (iv) the repurchase of own shares for euro 486 million, Snam Rete Gas SpA and Saipem SpA (totalling euro 353 million).

From January 1 to September 30, 2007, a total of 19.62 million own shares were purchased by the company for a

Net borrowings increased by euro 2,308 million from June 30, 2007, due to: (i) the acquisition of upstream assets in the Gulf of Mexico (approximately euro 3.5 billion) and the acquisition of downstream oil assets (euro 0.2 billion); (ii) capital expenditures for the third quarter totalling euro 2,679 million; and (iii) the repurchase of own shares (euro 147 million). These outflows were partially offset by cash inflow generated by operating activities in the third quarter (euro 3,366 million) and cash from divestments (euro 455 million).

ENI REPORT ON THE THIRD QUARTER OF 2007

SUMMARIZED CASH FLOW STATEMENT AND CHANGE IN NET BORROWINGS

Eni's summarized group cash flow statement derives from the statutory statement of cash flows. It allows to create a link between changes in cash and cash equivalents (deriving from the statutory cash flows statement) occurred from the beginning of period to the end of period and changes in net borrowings (deriving from the summarized cash flow statement) occurred from the beginning of period to the end of period. The measure enabling to make such a link is represented by free cash flow which is the cash in excess of capital expenditure needs. Starting from free cash flow it is possible to determine either: (i) changes in **Summarized Group Cash Flow Statement** ^(a)

cash and cash equivalents for the period by adding/deducting cash flows relating to financing debts/receivables (issuance/repayment of debt and receivables related to financing activities), shareholders' equity (dividends paid, net repurchase of own shares, capital issuance) and the effect of changes in consolidation and of exchange rate differences; (ii) changes in net borrowings for the period by adding/deducting cash flows relating to shareholders' equity and the effect of changes in consolidation and of exchange rate differences.

-------	-------	-----	------	--	--	-------	-------	-------	------

Capital expenditures of the Exploration & Production division (euro 4,562 million) concerned development of oil and gas reserves directed mainly outside Italy, in particular Kazakhstan, Egypt, Angola and Congo. Development expenditures in Italy concerned in particular well drilling programme and facility upgrading in Val d'Agri and sidetrack and infilling interventions in mature fields.

Important expenditures were directed to exploratory

projects. About 93% of these expenditures were directed outside Italy in particular the Gulf of Mexico, Egypt, Norway, Nigeria and Brazil. In Italy, exploration activities were directed mainly to the offshore of Sicily. Acquisition of proved and unproved property concerned mainly a 70% interest in the Nikaitchuq oilfield in Alaska, in which Eni reached a 100% ownership.

ENI REPORT ON THE THIRD QUARTER OF 2007

Engineering & Construction

Capital expenditures in the Engineering & Construction division amounted to euro 821 million and concerned: (i) the construction start-up of the new semisubmersible platform Scarabeo 8 and a new pipelayer and a new deepwater drilling ship Saipem 12000; (ii) conversion of two tanker ships into FPSO vessels that will operate in Brazil on the Golfinho 2 field and in Angola.

Investments and purchase of consolidated subsidiaries and businesses

Investments and purchase of consolidated subsidiaries and businesses for the first nine months of 2007 amounted to euro 8,711 million and related mainly to the 20% interest in OAO Gazprom Neft and 60% interest in

three Russian companies engaged in developing natural gas following finalization of a bid procedure for ex-Yukos assets (euro 3.7 billion), the purchase of Dominion Resources upstream assets in the Gulf of Mexico (approximately euro 3.5 billion), the purchase of oil producing assets onshore Congo (approximately euro 1 billion) and the acquisition of a further 16.11% stake in the Ceska Rafinerska in the Czech Republic (euro 0.2 billion) increasing Eni's ownership interest to 32.4%.

Disposals

Disposals for the first nine months of 2007 amounted to euro 631 million and related mainly to the divestment of interests in certain associates in the Engineering & Construction division.

ENI REPORT ON THE THIRD QUARTER OF 2007

POST-CLOSING EVENTS

Strategic agreement with the Libyan National Oil Company

As part of Eni's strategic partnership with the Libyan National Oil Company, on October 16, 2007, both parties signed a major industrial agreement aimed at:

- Extending the duration of Eni's mineral rights in Libya by a 25-year term, with the possibility of a further five-year extension for oil properties till 2042 and ten-year extension for gas properties till 2047. This will enable Eni to develop its long-life producing fields over a longer time frame by applying its advanced techniques for maximizing the recoverability of hydrocarbons.
- Monetizing additional and substantial gas reserves by expanding Libya's gas export capacity from 8 to 16 bcm/y. The planned expansion will be achieved through the upgrading of the GreenStream export line by 3 bcm/y, which will increase export capacity to Italy, and through the construction of a new LNG plant of 5 bcm/y for worldwide markets; and
- Overhauling the exploration activities in areas where Eni is already present.

The two partners estimated that the planned initiatives will entail expenditures of approximately \$28 billion over 10 years. This deal further strengthens Eni's competitive position in Libya, reaffirming its leadership among the international oil companies engaged in this Country.

Status of the Kashagan Project

In late June 2007 Agip KCO, as operator of the Kashagan oilfield (18.52 per cent stake), located offshore in the Caspian Sea in Kazakhstan, filed certain revisions to the sanctioned development plan of the field with the Kazakh Authorities. These revisions confirmed, among other things, a rescheduling of the production start-up to 2010. The Kazakh Authorities rejected the proposed revisions to the sanctioned development plan. In August 2007, the Government of the Kazakh Republic sent the companies forming the North Caspian

Galp Energia plans to exercise its call option on downstream oil activities in Spain and Portugal

Galp Energia, in accordance with the agreements signed in December 2005 between majority shareholders (Eni 33.34%, Amorim Energia and Caixa General de Depositos), announced the intention to exercise its call option for the acquisition of Eni's Agip branded oil products marketing activities. The option excludes the lubricants business in Spain and Portugal, both in the retail and wholesale markets. Eni's retail activity in the Iberian region includes more than 350 service stations. The transaction is subject to approval from antitrust authorities.

Other initiatives

On October 19, 2007 Saipem acquired almost the total interest in Frigstad Discoverer Invest Ltd listed on the Norwegian Stock Exchange. This company is engaged in ultra-deep offshore drilling activities by means of an ongoing project for the construction of the semi-submersible rig D90 and is listed on the Norwegian stock exchange. This vessel is expected to be able to drill wells in water depths of up to 3,600 meters. Operations are expected to begin by late 2009 and the transaction will include approximately euro 520 million of capital expenditure. This will include the purchase of Frigstad Discoverer Invest Ltd, as well as other capital expenditure necessary to complete the vessel.

Eni was awarded 26 new exploration licenses in Gulf of Mexico following an international bid procedure. The acquired acreage is estimated to have a significant mineral potential and it is located nearby other Eni's production facilities. The transaction is subject to the approval from antitrust authorities.

Eni and Sonatrach signed an agreement to extend terms of the development and production license for oil fields of Block 403 (Eni 50%) in Algeria. In 2006 production from this block represented approximately 13% of Eni's total production in the country.

Sea Production Sharing Agreement (NCSPSA)
consortium a notice of dispute alleging failure on part of
the consortium to fulfill certain contractual obligations
and violation of the Republic's laws.

All parties are in discussions aimed at resolving the
dispute on amicable terms and have agreed that these
discussions will continue beyond the October 22, 2007
contractual deadline.

ENI REPORT ON THE THIRD QUARTER OF 2007

OUTLOOK FOR 2007

Key Eni's business trends for the year 2007 are as follows:

- **Production of liquids and natural gas** is forecast to be in line with the previous year (actual oil and gas production averaged 1.77 mmmboe/d in 2006) under the assumption of full-year Brent crude oil prices at \$55 per barrel. Production impacted by continuing social unrest in Nigeria, the loss of the Dación oilfield in Venezuela, unplanned facility shutdowns and mature field declines is expected to be offset by the contribution from assets acquired in the Gulf of Mexico and Congo as well as the organic growth expected in Libya and Kazakhstan.
- **Sales volumes of natural gas worldwide** are expected to increase by a small amount from the previous year (actual sales volumes in 2006 were 97.48 bcm) assuming normal weather conditions for the final part of the current year. Growth is expected to be achieved in European target markets both in terms of market share and volume gains, mainly in Spain, Turkey, France and Germany/Austria and in LNG sales on both the Asian and North American markets. These increases are expected to be offset by: (i) the lower sales volumes forecast in Italy as a result of a mild winter time in the initial part of the current year and the competitive pressures, partly offset by the increases in the natural gas sales to the residential and thermoelectric sectors in the fourth quarter due to ongoing marketing initiatives; (ii) the lower natural gas offtakes from importers in Italy due to sluggish growth in domestic consumptions.
- **Sales volumes of electricity** are expected to increase by approximately 4.5% from 2006 (actual volumes in 2006 were 31.03 TWh), due to an expected increase in traded volumes.
- **Refining throughputs on Eni's account** are forecast to marginally decrease from 2006 (actual throughputs in 2006 were 38.04 mmmtonnes), reflecting expiration of a processing contract at the Priolo refinery at the end of 2006. Excluding this reduction, throughputs are

- **Retail sales of refined products** are expected to marginally increase from 2006 (actual volumes sold in 2006 were 12.48 mmmtonnes), driven by increased sales in Europe as a result of the acquisition of a number of service station networks in target markets in Central-Eastern Europe (approximately 100 outlets) which took effect on October 1, 2007 in addition to upgrades. As a result of initiatives in the Italian market, sales are expected to remain unchanged despite a decline in domestic consumption.

Eni's expenditures on capital and exploration projects in 2007 are expected to amount to approximately euro 10.5 billion, including expenditures for developing acquired upstream assets, representing a 35% increase on 2006. Approximately 86% of this capital expenditure programme is expected to be deployed in the Exploration & Production, Gas & Power and Refining & Marketing divisions. Furthermore, acquisitions of assets and interests amounting to euro 9.2 billion are forecast for 2007, of which euro 3.73 billion relate to the acquisition of ex-Yukos assets; euro 4.5 billion relate to the purchase of proved and unproved oil and gas properties in the Gulf of Mexico and onshore Congo, and euro 0.4 billion relate to the purchase of refining and marketing assets in the Central-Eastern Europe. If Gazprom exercises its call options to purchase a 20% interest in OAO Gazprom Neft held by Eni and a 51% interest in the three Russian gas companies held according to a 60:40 interest by Eni and Enel, net cash outflows used in investing activities will decrease to euro 16.5 billion. On the basis of expected cash outflows for planned capital expenditures, acquisitions, and shareholders remuneration, while assuming a \$55/barrel scenario for the Brent crude oil, Eni foresees its leverage to settle in the low or high end of the 0.3 to 0.4 range by the end of the year, depending on the exercising of the above mentioned call options by Gazprom.

expected to increase, reflecting better volume performance at the Livorno, Gela and Sannazzaro refineries. Higher throughputs are also expected outside Italy as a result of the acquisition of a further 16.11% stake in Ceska Rafinerska in the Czech Republic which took effect on September 1, 2007.

- (e) Includes condensates.

RESULTS

Third quarter

Adjusted operating profit for the third quarter 2007 was euro 3,309 million, a decrease of euro 786 million from the third quarter 2006, or 19.2%, due primarily to: (i) the adverse impact of the appreciation of the euro versus the dollar (approximately euro 290 million);

(ii) lower production sold (down 5.6 mmboe); (iii) higher expenses incurred in connection with exploration activities (euro 249 million; euro 283 million on a constant exchange rate basis); (iv) rising operating costs and amortization/depreciation charges reflecting the impact of sector specific inflation.

- 24 -

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007**

Oil and gas realizations in dollars increased by 4.2% due to higher liquid realizations as compared to the marker Brent which benefited from narrowing differentials between heavy and light crude recorded in the third quarter, partly offset by lower gas realizations, related to the time-lag in indexation mechanisms.

Adjusted net profit was euro 1,372 million, down euro 584 million, or 29.9% from the third quarter of 2006, primarily due to a weaker operating performance and an increase in tax rate from 52.5% to 59.1%, due to a higher share of profit before income taxes generated in countries with higher marginal tax rates.

First nine months

Adjusted operating profit recorded for the first first nine months of 2007 amounted to euro 9,924 million, down euro 2,644 million or 21% from first first nine months of 2006, due mainly to:

PRODUCTION

- (i) the adverse impact of the appreciation of the euro over the dollar (approximately euro 870 million);
- (ii) a decline in production sold (down 17.8 mmbœ);
- (iii) higher exploration expenses (euro 625 million, euro 709 million at constant exchange rates);
- (iv) rising operating costs and amortization and depreciation charges.

Adjusted net profit of euro 4,428 million declined by euro 1,547 million, down 25.9% from first first nine months of 2006 due to a weaker operating performance and an increase in the adjusted tax rate (from 52.7% to 56%) due to a change in the fiscal regime of Algeria enacted in the second half of 2006.

Special charges excluded by the adjusted operating profit of euro 65 million for the first first nine months 2007 primarily related to the depreciation of mineral assets.

- 25 -

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007****Third quarter**

Oil and natural gas production in the third quarter of 2007 averaged 1,659 kboe/d, a decrease of 50 kboe/d compared to the same period last year (down 2.9%).

This reduction was due primarily to the negative impact of disruptions resulting from continuing social unrest in Nigeria (down 25 kboe/d), unplanned downtime and technical issues in the North Sea, particularly the accident occurred to the Cats pipeline, and mature fields declines in Italy and the United Kingdom. Increased oil prices reduced volume entitlements (down 11 kboe/d) for the recovery of expenditures and operating costs in Eni's Production Sharing Agreements and buy-back contracts. These negative effects were offset in part by the contribution of recently acquired properties in the Gulf of Mexico and Congo (up 77 kboe/d) and organic growth achieved in Kazakhstan and Libya. 88% of oil and natural gas was produced outside Italy (86% in the third quarter of 2006).

Daily production of oil and condensates (975 kbbbl/d) decreased by 66 kbbbl/d, or 6.3% from the third quarter 2006. Production decreases were reported mainly in: (i) Nigeria and the North Sea due to the above mentioned causes; (ii) mature field declines in particular in Italy and the United Kingdom. Main increases were registered in: (i) the Gulf of Mexico and Congo due to the contribution of purchased assets; (ii) Kazakhstan due to a better performance of the Karachaganak field and to the fact that maintenance activities were performed in 2006.

Daily production of natural gas for the third quarter (3,927 mmcf/d) increased by 93 mmcf/d, or 2.4% mainly in the Gulf of Mexico, Libya as a result of the build-up of the Western Libyan Gas Project, Egypt for the development of reserves in the Nile Delta, Kazakhstan and Norway. Gas production decreased due to mature field declines in Italy and in the United Kingdom due to technical issues.

First nine months

Oil and natural gas production for the first first nine months of 2007 averaged 1,710 kboe/d, a decrease of 51 kboe/d compared to the same period last year (down 2.9%), due to disruptions in Nigeria related to social unrest (down 27 kboe/d), unplanned downtime and technical issues in the North Sea and mature field declines in particular in Italy and the United Kingdom. As compared to the same period in 2006, production performance for the period was impacted also by the loss of production at the Venezuelan Dación oilfield (down 20 kbbbl/d) as a consequence of the unilateral cancellation of the service agreement for the field exploitation by the Venezuelan State Oil Company PDVSA which took effect on April 1, 2006. These negative factors were offset in part by the contribution of recently acquired assets in the Gulf of Mexico and Congo and production increases in Libya and Kazakhstan. Oil and natural gas production share outside Italy was 88% (86% in the first first first nine months of 2006).

Daily production of oil and condensates (1,010 kbbbl) decreased by 70 kbbbl/d, or 6.5% from the same period in 2006. Production decreases were reported mainly in Nigeria, Venezuela and the North Sea due to the above mentioned causes. Main increases were registered in Kazakhstan, reflecting a better performance at the Karachaganak field and in the United States, due to the resumption of full activity at plants damaged by hurricanes in the second half of 2005.

Daily production of natural gas for first first nine months of 2007 (4,017 mmcf/d) increased by 106 mmcf, or 2.7% mainly in Libya, as a result of production ramp-up at the Bah Essalam field, in the Gulf of Mexico due to asset acquisition and in Norway, particularly at the Aasgard (Eni's interest 14.81%) and Kristin (Eni's interest 8.25%) fields. Gas production in Italy and in the United Kingdom decreased due to mature field declines.

- (a) Before elimination of intragroup sales.
- (b) Starting on January 1, 2007, results from marketing of electricity have been included in results from market and distribution activities following an internal reorganization. As a consequence of this, electricity generation activity conducted by EniPower subsidiary comprises only results from production of electricity. Prior quarter results have not been restated.
- (c) Excluding special items.

RESULTS

Third quarter

Adjusted operating profit for the third quarter of 2007 was euro 581 million, representing a decline of euro 38 million

from the third quarter of 2006, or 6.1%. This was due mainly to a decline in gas selling margins due to an unfavorable trading environment reflecting different reference periods for energy parameters to which

- 27 -

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007**

natural gas purchase and selling prices are contractually indexed. This trend was particularly significant in the thermoelectric segment. Also selling margins to wholesalers declined due to the current scheme for the indexation of the raw material component in tariffs. These negative factors were partly offset by: (i) a growth achieved in sales volumes from consolidated subsidiaries (up 3.9%); and (ii) better operating performance recorded by transport activities in Italy reflecting tariff entitlements against expenditures incurred for upgrading the network. Adjusted net profit of the third quarter of 2007 decreased by euro 7 million to euro 465 million, down 1.5%.

First nine months

Adjusted operating profit for the first first nine months of 2007 increased by euro 170 million to euro 2,783, up 6.5%, notwithstanding the occurrence of unusually mild winter weather conditions resulting in lower volumes sold of natural gas by consolidated subsidiaries (down 2.16 bcm, or 3.5%). Despite this negative impact, divisional results were driven by:

(i) The positive impact of favorable developments with Italy's regulatory framework. This reflected the enactment of Resolution No. 79/2007 by the Authority for Electricity and Gas implementing a more favorable indexation mechanism of the raw material

Other performance indicators

Third quarter					(million euro)	Nine months			
2006	2007	Change	% Change			2006	2007	Change	% Change
882	797	(85)	(9.6)	EBITDA adjusted	3,364	3,485	121	3.6	
345	268	(77)	(22.3)	Market	1,460	1,606	146	10.0	
193	215	22	11.4	Regulated business	895	863	(32)	(3.6)

94	80	(14)	(14.9)	Power generation	243	263	20	8.2	

EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization charges) on an adjusted basis is calculated by adding to adjusted operating profit amortization and depreciation charges on a pro forma basis. This performance indicator, which is not a GAAP

cost component in supplies to residential users compared to what was in force in the first half of 2006.

Additionally, Eni fulfilled obligations provided by this resolution to renegotiate wholesale contracts based on the same indexation mechanism resulting in the partial reversal of provisions accrued in 2005 and in the first half of 2006 with respect to expected charges for these renegotiations;

(ii) Higher supply costs incurred in the same period last year caused by a climatic emergency during the 2005-2006 winter;

(iii) Better operating performance recorded by transport activities in Italy.

In the first nine months of 2007 the impact of the trading environment on gas selling margins yielded a decline in operating results as compared to the first nine months of 2006, owing to the unfavorable trends recorded in the third quarter.

Net adjusted profit for the first nine months of 2007 was euro 2,042 million, representing an increase of euro 53 million over the first nine months of 2006, up 2.7%.

This reflected higher adjusted operating profit, offset in part by weaker performance in certain affiliates accounted for under the equity method of accounting.

affiliates which are accounted for under the equity-method for IFRSs purposes.

Management evaluates performance in Eni's Gas & Power division also on the basis of this measure taking account of the evidence that this division is comparable

measure under either IFRSs or U.S. GAAP, includes Adjusted EBITDA of Eni's wholly-owned subsidiaries; Eni's share of adjusted EBITDA of Snam Rete Gas (55%), which is fully-consolidated when preparing consolidated financial statements in accordance with IFRSs; Eni's share of adjusted EBITDA generated by certain

to European utilities in the gas and power generation sector. This measure is provided with the intent to assist investors and financial analysts in assessing the Eni Gas & Power divisional performance as compared to its European peers, as EBITDA is widely used as the main performance indicator for utilities.

Third quarter

In the third quarter of 2007, natural gas sales of 19.74 bcm, including own consumption, Eni's share of sales by affiliates and upstream sales in Europe grew by 0.84 bcm from the third quarter of 2006, up 4.4%. In particular volumes on target markets in the rest of Europe grew by 1.27 bcm, in Italy volumes grew by 0.57 bcm and outside Europe volumes grew by 0.34 bcm. These increases were offset in part by lower supplies to Italian importers (down 1.20 bcm) essentially due lower supplies of Libyan gas and the expiration of a supply contract with Promgas.

In an increasingly competitive market, sales in the Italian market were 11.46 bcm with an increase of 0.57 bcm, or 5.2%. This increase reflected higher sales to wholesalers (up 0.65 bcm), in view of optimizing equity

offset in part by to lower sales to industrial users (down 0.17 bcm) and to the power generation sector (down 0.15 bcm). Sales under the gas release⁴ program (0.42 bcm) increased by 0.11 bcm.

Gas sales in target markets of the rest of Europe were 5.11 bcm, including sales of affiliates, with an increase of 1.27 bcm, or 33.1%, due to growth registered in: (i) Spain (up 0.53 bcm); (ii) Germany/Austria (up 0.40 bcm); (iii) France (up 0.15 bcm); (iv) Turkey (up 0.12 bcm).

Sales of Eni's affiliates in the rest of Europe (net to Eni and net of Eni's supplies) amounted to 1.43 bcm, a 0.09 bcm increase or 6.7%. Main sales volumes were achieved by Unión Fenosa Gas (Eni's interest 50%) with 0.42 bcm and GVS (Eni's interest 50%) with 0.33 bcm. Sales outside Europe (0.89 bcm) increased by 0.34 bcm

production of Libyan gas, also entailing lower supplies to Italian importers, and higher own consumption³ (up 0.12 bcm) for power generation. These positives were

from the third quarter of 2006, or 61.8%, due to higher volumes of LNG sold by Unión Fenosa Gas (Eni's interest 50%) to the Far East and the United States markets.

-
- (3) In accordance with Article 19, paragraph 4 of Legislative Decree No. 164/2000, the volumes of natural gas consumed in operations by a company or its subsidiaries are excluded from the calculation of ceilings for sales to end customers and from volumes input into the Italian network to be sold in Italy.
- (4) In June 2004 Eni agreed with the Antitrust Authority to sell a total volume of 9.2 bcm of natural gas (2.3 bcm/y) in the four thermal years from October 1, 2004 to September 30, 2008 at the Tarvisio entry point into the Italian network.

- 29 -

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007**

Eni transported 16.98 bcm of natural gas in Italy, a decrease of 2.04 bcm from the third quarter of 2006, down 10.7%, due to a decline in domestic demand.

Volumes transported on behalf of third parties declined by 0.55 bcm, those transported on behalf of Eni declined by 1.49 bcm.

Sales of electricity (8.67 TWh) increased by 0.82 TWh, up 10.4%, due to higher sales to the open market.

First nine months

In the first nine months of 2007, natural gas sales of 68.31 bcm, including own consumption, Eni's share of sales by affiliates and upstream sales in Europe, declined by 2.24 bcm from the first nine months of 2006, or 3.2%, due to declining demand in Europe resulting from unusually mild winter weather conditions. Lower sales in Italy (down 1.48 bcm), in the rest of Europe (down 0.93 bcm) and lower volumes of equity gas from the North Sea (down 0.40 bcm) were offset in part by higher sales outside Europe (up 0.57 bcm).

In an increasingly competitive market, sales in the Italian market were 39.96 bcm with a decline of 1.48 bcm, or 3.6%, due in particular to lower sales to residential and commercial users (down 0.96 bcm), to industrial users (down 0.93 bcm) and to the power generation sector (down 0.24 bcm), offset in part by higher sales to wholesalers (up 0.81 bcm) in view of optimizing equity production of Libyan gas, also entailing lower supplies to Italian importers.

Sales under the gas release program (1.37 bcm) declined by 0.07 bcm.

Own consumption for electricity generation (4.49 bcm) declined by 0.09 bcm, or 2%.

Sales to importers into Italy declined by 3 bcm, or 29.1%, due to lower offtakes related to mild winter weather conditions and lower supplies of Libyan gas to Italian importers as well as the expiration of a contract with Promgas.

Gas sales in target markets of the rest of Europe were 6.59 bcm, including sales of affiliates with an increase of 2.07 bcm, or 14.3%, due to growth registered in: (i) Spain (up 0.98 bcm); (ii) Turkey (up 0.85 bcm); (iii) Northern Europe (up 0.41 bcm); (iv) France (up 0.35 bcm). This growth was offset in part by lower sales in Hungary (down 0.68 bcm). Sales of Eni's affiliates in the rest of Europe (net to Eni and net of Eni's supplies) amounted to 4.86 bcm, a 0.19 bcm decline. Main sales volumes were achieved by: (i) GVS (Eni's interest 50%) with 1.72 bcm; (ii) Unión Fenosa Gas (Eni's interest 50%) with 1.27 bcm.

Sales outside Europe (1.83 bcm) increased by 0.57 bcm, or 45.2% due to higher volumes on LNG sold by Unión Fenosa Gas (Eni's interest 50%) to the Far East and the United States.

Eni transported 58.87 bcm of natural gas in Italy, a decrease of 6.67 bcm from the first nine months of 2006, down 10.2%, due to a decline in domestic demand. Volumes transported on behalf of third parties declined by 1.86 bcm, those transported on behalf of Eni declined by 4.81 bcm.

Sales of electricity (24.91 TWh) increased by 1.67 TWh, up 7.2% due to higher sales on the open market.

RESULTS**Third quarter**

The Refining & Marketing division reported an adjusted operating profit of euro 119 million, down euro 244 million, or 67.2% compared to the third quarter of 2006. This decline reflected a weaker operating performance delivered by the refining business, in the wake of an unfavorable trading environment due to the narrowing of price differentials between light and heavy crude qualities that penalized complex throughputs by reducing the competitive advantage to process low-cost feedstock and the appreciation of the euro over the

Adjusted net profit for the third quarter was euro 95 million, down euro 162 million, or 63%, from a year ago.

Special charges excluded from the adjusted operating profit of the third quarter (euro 56 million) concerned mainly environmental provisions and employee redundancy incentives.

First nine months

Adjusted operating profit for the first nine months of 2007 amounted to euro 424 million, down euro 218 million from the first nine months of 2006, or 34%. This

dollar. Partially offsetting these effects was better yields of refineries.

Marketing activities in Italy reported a marginally lower operating profit mainly due to a decline in wholesale margins, particularly for aviation fuels and bitumen, partially offset by improved results reported by retail marketing reflecting also higher volumes sold.

reflected a weaker operating performance delivered by the refining business on the back of an unfavorable trading environment and the appreciation of the euro over the dollar. Partially offsetting these effects were higher yields of refineries and lower downtimes.

Marketing activities in Italy reported a lower operating profit mainly due to: (i) lower retail margins;

- 31 -

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007**

(ii) a decline in wholesale business results due to lower margins and volumes marketed (down 7.8%), the latter also reflected unusually mild winter weather causing lower sales of home-heating fuels.

The adjusted net profit for the first nine months of 2007 was euro 345 million, down euro 169 million, or 32.9%.

Third quarter

In the third quarter of 2007, refining throughputs on Eni's own account (9.42 mmttonnes) decreased by 360 ktonnes as compared to the third quarter of 2006, due to the expiration of a processing contract at the Priolo refinery owned by third parties occurred at the end of 2006 (down 280 ktonnes in the third quarter, down 940 ktonnes in the first nine months). Excluding this effect, refining throughputs in Italy were stable compared to the third quarter of 2006 as a result of:

- Better volume performance at the Gela and Milazzo refineries.

down 8.9%, due mainly to sales to oil companies and traders in Italy and outside Italy and lower volumes marketed on wholesale markets in Italy.

Volumes of refined products marketed on the retail market in Italy increased by 0.6% to 2.25 mmttonnes with a higher rate growth compared to domestic consumption supported by Eni's marketing initiatives. Gasoline sales declined, while diesel fuel sales increased driven by ongoing trends in vehicle substitution. Retail market share in Italy increased slightly from 29.6% in the third quarter of 2006 to 29.8%. Average throughput (0.64 mmliters in the third quarter of 2007) is in line with the same period in 2006.

- Lower volume performance at the Sannazzaro and Taranto refineries reflecting planned and unplanned downtime.

Volumes marketed on retail markets in the rest of Europe increased by 1.9% to 1.05 mmt tonnes, mainly in Spain.

Market share in the rest of Europe was stable at 3.3%.

In the third quarter of 2007 sales of refined products decreased by 1.17 mmt tonnes to 11.91 mmt tonnes,

Contents**ENI REPORT ON THE THIRD QUARTER OF 2007**

Average throughput (0.68 mmliters in the third quarter of 2007) decreased by approximately 40 kliters from the same period in 2006.

Sales in the wholesale market in Italy decreased by 4% from the third quarter of 2006, to 2.85 mmtonnes, due to lower sales of heating oil related to competitive pressure and lower demand from the power generation sector.

First nine months

In the first nine months of 2007 refining throughputs on Eni's own account (27.74 mmtonnes) decreased by 50 ktonnes due to the expiration of a processing contract at the Priolo refinery as above described. Excluding this effect, refining throughputs in Italy increased by one million tonnes, or 4%, to 24.38 mmtonnes reflecting better performance at the Livorno and Milazzo, Gela and Venice refineries owing to lower downtime, partially offset by decreases at the Taranto refinery because of a slow plant resumption following technical issues and Sannazzaro refinery for planned downtime.

In the first nine months of 2007, sales of refined products decreased by 1.68 mmtonnes from the first nine months of 2006, to 36.27 mmtonnes, down 4.4%. This was due to lower volumes sold to oil companies and traders in Italy, lower sales of feedstock to the

petrochemical sector as a result of the expiration of a processing contract at the Priolo refinery and lower sales on the wholesale market in Italy.

Sales of refined products on the retail market in Italy were 6.43 mmtonnes, a 1.1% decline, due to competitive pressure.

Retail market share in Italy was 29.1%, slightly decreasing compared with the same period of 2006.

A 0.3 percentage point increase was recorded versus the first half of 2007. Average throughput (1.82 mmliters in the first nine months of 2007) declined by about 20 kliters.

Sales in the retail market in the rest of Europe increased by 3.2% to 2.94 mmtonnes, mainly in Spain.

Market share in the rest of Europe was stable from the first nine months of 2006 at 3.2%. Average throughput (1.91 mmliters in the first nine months of 2007) increased by approximately 70 kliters from the same period in 2006.

Sales in the wholesale market in Italy decreased by 7.8% to 8.12 mmtonnes, due to lower demand for heating oil from the power generation sector, unusually mild winter weather conditions that impacted sales of heating products (diesel oil and LPG) and competitive pressure.

(b) Excluding special items.

RESULTS**Third quarter**

Adjusted operating profit in the third quarter of 2007 amounted to euro 30 million decreasing by euro 7 million from the third quarter of 2006 down 18.9% due to lower selling margins, essentially the cracker margin and in the aromatics businesses, offset in part by higher volumes produced and sold as compared to the slow down of 2006 as a consequence of the accident occurred at the Priolo refinery in April 2006 provoking outages at several Eni's petrochemicals plants.

PRODUCTION AND SALES**First nine months**

Adjusted operating profit in the first nine months of 2007 increased by euro 154 million from the first nine months of 2006 due mainly to higher selling margins of all main products in addition to the fact that production and sales of the same period of 2006 were hit by an accident occurred at the Priolo refinery in April 2006.

Special charges excluded from the adjusted operating profit of the first nine months of 2007 (euro 22 million, euro 16 million in the third quarter of 2007) concerned essentially provisions to the risk reserve related to antitrust procedure pending with European authorities and employees redundancy incentives.

2006	2007	Change	% Change		2006	2007	Change	% Change
1,729	2,201	472	27.3	Production	5,283	6,612	1,329	25.2
1,261	1,354	93	7.4	Sales of petrochemical products	3,941	4,166	225	5.7

333	365	32	9.6	<i>Polyethylene</i>	1,078	1,123	45	4.2

Third quarter

Sales of petrochemical products (1,354 ktonnes) increased by 93 ktonnes from the third quarter of 2006, up 7.4%, reflecting positive demand trends and the fact that performance in 2006 was hit by an accident

occurred at the Priolo refinery in April 2006. Main increases were registered in intermediates (up 14.8%), elastomers (up 10.4%) due also to the purchase of the NBR line in the Porto Torres plant, polyethylene (up 9.6%). Lower sales were recorded by styrene (down

Contents

ENI REPORT ON THE THIRD QUARTER OF 2007

3.2%) dragged by the slowdown in the construction business and in aromatics (down 1.7%) due to lower product availability resulting from the shutdown of the Priolo paraxylene line.

Petrochemical production (2,201 ktonnes) increased by 472 ktonnes from the third quarter of 2006, up 27.3% due to the consolidation of operations at Porto Torres (up 331 ktonnes) and the fact that production and sales of the second quarter of 2006 were by an accident occurred at the Priolo refinery in April 2006. Excluding these effects, production increased by 47 ktonnes (up 3%) due in particular to the growth registered at the Mantova and Gela plants. Lower production was registered at the Porto Marghera and Ferrara plants due to unexpected outages and technical problems.

First nine months

Sales of petrochemical products (4,166 ktonnes) increased by 225 ktonnes from the first nine months of 2006, up 5.7%, increasing in all business areas except for xylene (down 10.6%) affected by the shutdown of the Priolo line. Increases reflect positive market scenario and the fact that performance in 2006 was hit by an accident occurred at the Priolo refinery in April 2006. Higher sales were registered in (i) olefins (up 10.3%) due also to higher product availability, polyethylene (up 4.2%) and styrene (up 3.3%).

Petrochemical production (6,612 ktonnes) increased by 1,329 ktonnes from the first nine months of 2006, up 25.2% due to the consolidation of operations at Porto Torres (up 946 ktonnes) and a good performance at the Ravenna, Gela and Brindisi plants and the effect on 2006 production of the accident occurred at Priolo.

RESULTS**Third quarter**

Adjusted operating profit for the third quarter of 2007 was euro 211 million, up euro 66 million from the third quarter of 2006, up 45.5%, due to a better operating performance in all businesses. Major increases were registered in: (i) the Offshore construction business due

First nine months

Adjusted operating profit for the first nine months of 2007 was euro 590 million, up euro 234 million from the first nine months of 2006, up 65.7%, due to a better operating performance in all business areas, in particular the higher increases were registered in the Offshore and Onshore construction areas due to higher activity levels

to higher activity levels in Saudi Arabia and improved margins; (ii) the Onshore construction business due to higher activity levels in the Far East and in the North Sea increased activity and higher operating efficiency.

Adjusted net profit for the third quarter of 2007 was euro 174 million, up euro 57 million from the third quarter of 2006 due to a better operating performance.

and improved margins.

Adjusted net profit for the first nine months of 2007 was euro 478 million, up euro 209 million from the first nine months of 2006 due to a better operating performance also of affiliates.

Special charges excluded from adjusted net profit (euro 132 million; euro 125 million in the third quarter) concerned mainly gains on disposal of interests.

(a) Net of the backlog of divested companies (Haldor Topsøe and Camom Group).

Among the main orders acquired in the first nine months of 2007 were:

- An EPC for Sonatrach contract for the construction of three oil stabilization and treatment trains with a capacity of 100 kbb/d and transport and storage facilities within the development of the Hassi Messaoud onshore
- An EPC contract for Saudi Aramco for the realization and installation of 16 platforms, 80 kilometers of underwater pipelines and platform facilities aimed at maintaining the country producing capacity.
- An EPC contract for Saudi Aramco for the construction of stations for pumping in fields the

field in Algeria.

- An EPC contract for Medgaz for the installation of an underwater pipeline system or the transport of natural gas from Algeria to Spain.
- An EPIC contract for Saudi Aramco for the construction of the nine sea water treatment modules for the expansion of the Qurayya plant within the development of the Khursaniyah field in Saudi Arabia.

water from expansion of the Qurayya plant.

Orders acquired amounted to euro 7,428 million, of these projects to be carried out outside Italy represented 95%, while orders from Eni companies amounted to 14% of the total. Eni's order backlog was euro 13,343 million at September 30, 2007 (euro 13,191 million at December 31, 2006). Projects to be carried out outside Italy represented 93% of the total order backlog, while orders from Eni companies amounted to 22% of the total.

ENI REPORT ON THE THIRD QUARTER OF 2007

Non-GAAP measures**RECONCILIATION OF REPORTED OPERATING PROFIT AND REPORTED NET PROFIT TO RESULTS ON AN ADJUSTED BASIS**

Management evaluates Group and business performance on the basis of adjusted operating profit and adjusted net profit, which are arrived at by excluding inventory holding gains or losses and special items. Further, finance charges on finance debt, interest income, gains or losses deriving from evaluation of certain derivative financial instruments at fair value through profit or loss as they do not meet the formal criteria to be assessed as hedges under IFRS, and exchange rate differences are excluded when determining adjusted net profit of each business segment.

The taxation effect of such items excluded from adjusted net profit is determined based on the specific rate of taxes applicable to each item, with the exception for finance charges or income, to which the Italian statutory tax rate of 33% is applied.

Adjusted operating profit and adjusted net profit are non-GAAP financial measures under either IFRS, or U.S. GAAP. Management includes them in order to facilitate a comparison of base business performance across periods and allow financial analysts to evaluate Eni's trading performance on the basis of their forecasting models.

In addition, management uses segmental adjusted net profit when calculating return on average capital employed (ROACE) by each business segment.

The following is a description of items which are excluded from the calculation of adjusted results.

Inventory holding gain or loss is the difference between the cost of sales of the volumes sold in the period based on the cost of supplies of the same period and the cost of sales of the volumes sold calculated using the weighted average cost method of inventory accounting.

Special items include certain relevant income or charges pertaining to either: (i) infrequent or unusual events and transactions, being identified as non-recurring items under

such circumstances; or (ii) certain events or transactions which are not considered to be representative of the ordinary course of business, as in the case of environmental provisions, restructuring charges, asset impairments or write ups and gains or losses on divestments even though they occurred in past periods or are likely to occur in future ones. As provided for in Decision No. 15519 of July 27, 2006 of the Italian market regulator (CONSOB), non recurring material income or charges are to be clearly reported in the management's discussion and financial tables. Finance charges or income related to net borrowings excluded from the adjusted net profit of business segments are comprised of interest charges on finance debt and interest income earned on cash and cash equivalents not related to operations. In addition gains or losses on the fair value evaluation of above mentioned derivative financial instruments and exchange rate differences are excluded from the adjusted net profit of business segments.

Therefore, the adjusted net profit of business segments includes finance charges or income deriving from certain segment-operated assets, i.e., interest income on certain receivable financing and securities related to operations and finance charge pertaining to the accretion of certain provisions recorded on a discounted basis (as in the case of the asset retirement obligations in the Exploration & Production division). Finance charges or interest income and related taxation effects excluded from the adjusted net profit of the business segments are allocated on the aggregate Corporate and financial companies.

For a reconciliation of adjusted operating profit and adjusted net profit to reported operating profit and reported net profit see tables below.
