UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)
þ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2014

OR

o TRANSITION REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from ________ to ________.

Commission file number 001-32277

Crexendo, Inc.
(Exact name of registrant as specified in its charter)

Delaware	87-0591719
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
1615 South 52nd Street, Tempe, AZ	85281
(Address of Principal Executive Offices)	(Zip Code)

(602) 714-8500
(Registrant’s telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes þ No ¨

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes þ No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (check one).

Large accelerated filer	o	Accelerated filer	o
Non-accelerated filer	o	Smaller reporting company	þ

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No þ.

The number of shares outstanding of the registrant's common stock as of October 31, 2014 was 11,223,485.

CREXENDO, INC. AND SUBSIDIARIES
Notes to the Condensed Consolidated Financial Statements (unaudited)

(1) Significant Accounting Policies

Description of Business - Crexendo, Inc. is incorporated in the state of Delaware. As used hereafter in the notes to consolidated financial statements, we refer to Crexendo, Inc. and its wholly owned subsidiaries, as “we,” “us,” or “our Company”. We are a hosted services company that provides web hosting, hosted telecommunications services, e-commerce software, website development software, and broadband internet services for businesses and entrepreneurs. Our services are designed to make enterprise-class hosting services available to small, medium-sized and enterprise-sized businesses at affordable monthly rates. The Company has two operating segments, which consist of Hosted Telecommunication Services and Web Services.

The Company has transformed into a start-up company with the inherent risks and uncertainties of funding operations until profitability is achieved. We currently plan to fund our operations during the next twelve months using our cash and cash equivalents of $1,861,000. However, after considering the Company’s historical negative cash flow from operating activities as well as internal forecasts, such amount does not appear adequate to fund our anticipated cash needs for the next twelve months. Accordingly, the Company will be required to obtain additional debt or equity financing such as that available from its CEO to sustain operations. The Company received a commitment from the CEO, and major shareholder, in July 2014 that he would provide the necessary level of financial support to enable the Company to pay its debts as they become due through November 15, 2015. Based on such commitment, the Company believes it will have sufficient funds to sustain its operations during the next twelve months as a result of the sources of funding detailed above.

Basis of Presentation – These unaudited condensed consolidated financial statements include the accounts and operations of Crexendo, Inc. and its wholly owned subsidiaries, which include Avail 24/7 Inc., Crexendo Business Solutions, Inc., StoresOnline Inc., StoresOnline International Canada ULC, StoresOnline International, Inc., StoresOnline International Ltd., StoresOnline International Canada, Ltd., Internet Training Group, Inc., Crexendo International, Inc., Crexendo Telecom, Inc., Crexendo India Limited, and Crexendo Property Management, LLC. All intercompany account balances and transactions have been eliminated in consolidation. The accompanying unaudited interim consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles, consistent in all material respects with those applied in our financial statements included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013. Because these financial statements address interim periods, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. Such interim financial information is unaudited but reflects all adjustments that in the opinion of management are necessary for the fair presentation of the interim periods presented. The results of operations presented in this Quarterly Report on Form 10-Q are not necessarily indicative of the results that may be expected for the year ending December 31, 2014 or for any future periods. This Quarterly Report on Form 10-Q should be read in conjunction with the Company’s audited financial statements and footnotes included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Cash and Cash Equivalents - We consider all highly liquid, short-term investments with maturities of three months or less at the time of purchase to be cash equivalents.

Restricted Cash – We classified $480,000 and $487,000 as restricted cash as of September 30, 2014 and December 31, 2013, respectively. Cash is restricted for state licensing letters of credit and compensating balance requirements on purchasing card agreements. As of September 30, 2014, we had restricted cash in financial institutions in excess of federally insured limits in the amount of $480,000. Subsequent to September 30, 2014, the Company received a release for $125,000 letter of credit, which will be processed during the fourth quarter.

Trade Receivables – We have historically offered to our StoresOnline customers the option to finance, typically through 24 and 36-month extended payment term arrangements ("EPTAs"), purchases made at our Internet Training Workshops through our StoresOnline segment. EPTAs are reflected as short-term and long-term trade receivables, as applicable, as we have the intent and ability to hold the receivables for the foreseeable future, until maturity or payoff. EPTAs are recorded on a nonaccrual status beginning on the contract date. Trade receivables from our hosted telecommunications and web services segments are recorded at invoiced amounts.

Allowance for Doubtful Accounts – For sales made through EPTA contracts, we record an allowance for doubtful accounts each reporting period based on the Company's ongoing assessment of collectability. The allowance represents estimated losses resulting from customers' failure to make required payments. The allowance for doubtful accounts for EPTAs is netted against the current and long-term trade receivables balances. The allowance estimate is based on historical collection experience, specific identification of probable bad debts based on collection efforts, aging of trade receivables, customer payment history, and other known factors, including current economic conditions. We believe that the allowance for doubtful accounts is adequate based on our assessment to date, however, actual collection results may differ materially from our expectations. Because revenue generated from customers financing through EPTAs is deferred and not recognized prior to the collection of cash, adjustments to the allowance for doubtful accounts related to our EPTA contracts increase or decrease deferred revenue. Trade receivables are written off against the allowance when the related customers are no longer making required payments and the trade receivables are determined to be uncollectible, typically 90 days past their original due date. For sales made in our Hosted Telecommunications Services and Web Services segments, the allowance for doubtful accounts reflects our best estimate of probable losses inherent in the accounts receivable balance. We determine the allowance based on known troubled accounts, historical experience, and other currently available evidence.

Interest Income - Interest income is primarily earned from EPTA contracts. EPTA contract terms generally contain an 18% simple interest rate. Interest income is recognized on these accounts only to the extent cash is received as the receivables are generally 24 and 36-months in length and collection of the full amount of the receivable is not probable. We recognized $37,000 and $78,000 for the three months ended September 30, 2014 and 2013, respectively. We recognized $122,000 and $443,000 for the nine months ended September 30, 2014 and 2013, respectively.

Inventory - Telecommunication equipment inventory is stated at the lower of cost (first-in, first-out method) or market. In accordance with applicable accounting guidance, we regularly evaluate whether inventory is stated at the lower of cost or market.

Certificate of Deposit - We hold a $251,000 certificate of deposit as collateral for merchant accounts, which automatically renews every 12 months. The certificate of deposit is classified as long-term in the condensed consolidated balance sheets.

Property and Equipment - Depreciation and amortization expense is computed using the straight-line method in amounts sufficient to allocate the cost of depreciable assets over their estimated useful lives ranging from two to five years. The cost of leasehold improvements is amortized using the straight-line method over the shorter of the estimated useful life of the asset or the term of the related lease. Depreciation and amortization expense is included in general and administrative expenses and totaled $161,000 and $226,000 for the three months ended September 30, 2014 and 2013, respectively and $554,000 and $800,000 for the nine months ended September 30, 2014 and 2013, respectively. Depreciable lives by asset group are as follows:

Computer and office equipment	2 to 5 years
Computer software	3 years
Furniture and fixtures	4 years
Leasehold improvements	2 to 5 years

Maintenance and repairs are expensed as incurred. The cost and accumulated depreciation of property and equipment sold or otherwise retired are removed from the accounts and any related gain or loss on disposition is reflected in net income or loss for the year.

Goodwill – Goodwill of $75,000 was recorded in connection with the acquisition of PBX Central on June 4, 2013 and $197,000 in connection with the acquisition of One Stop Voice (OSV), on June 1, 2014. Goodwill of $265,000 was recorded in connection with the acquisition of CastleWave in 2010. Goodwill is tested for impairment using a fair-value-based approach on an annual basis (December 31) and between annual tests if indicators of potential impairment exist. During the quarter ended September 30, 2013, the Company made a strategic decision to limit our provision of web services to our enterprise sized customers. As this change will significantly impact future revenue in our Web Services segment, the Company determined that the change was a triggering event requiring the Company to perform an impairment assessment to determine whether the carrying amount of the goodwill exceeded its fair value. In accordance with the accounting guidance, the Company performed the two step goodwill impairment test and concluded that the goodwill balance of $265,000 was impaired. The Company recorded an impairment charge of $265,000 to eliminate the carrying value of the CastleWave goodwill during the nine months ended September 30, 2013.

Intangible Assets - Our intangible assets consist primarily of assets acquired in the acquisition of PBX Central and OSV, which include customer relationships, developed technology, technical know-how, and a non-compete agreement. The fair value of identifiable intangible assets is based upon the lower of discounted future cash flow projections or the amount paid in an arm's length transaction. The intangible assets are amortized following the patterns in which the economic benefits are consumed. Amortization expense from these acquired assets is included in general and administrative expenses and totaled $72,000 and $50,000 for the three months ended September 30, 2014 and 2013, respectively, and $177,000 and $73,000 for the nine months ended September 30, 2014 and 2013, respectively.

Use of Estimates - In preparing the consolidated financial statements, management makes assumptions, estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the consolidated financial statements and the reported amounts of net sales and expenses during the reported periods. Specific estimates and judgments include inventory valuation and obsolescence, valuation of goodwill and intangible assets in connection with business acquisitions, allowances for doubtful accounts, sales returns and allowances, uncertainties related to certain income tax benefits, valuation of deferred income tax assets, valuations of share-based payments and recoverability of long-lived assets. Management's estimates are based on historical experience and on our expectations that are believed to be reasonable. The combination of these factors forms the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from our current estimates and those differences may be material.

Revenue Recognition - In general, we recognize revenue when all of the following conditions are satisfied: (1) there is persuasive evidence of an arrangement; (2) the product or service has been provided to the customer; (3) the amount of fees to be paid by the customer is fixed or determinable; and (4) the collection of our fees is probable. We recognize revenue from our Hosted Telecommunications Services and Web Services segments on an accrual basis, with the exception of our EPTA cash receipts which are recognized on a cash basis. Specifics to revenue category are as follows:

Software licenses and DVD training courses sold under EPTAs are recognized as revenue upon receipt of cash from customers and not at the time of sale. Accounting standards require revenue to be deferred until customer payments are received if collection of the original principal balance is not probable.

We enter into agreements where revenue is derived from multiple deliverables including any mix of products and/or services. For these arrangements, we determine whether the delivered item(s) has value to the customer on a stand-alone basis, and in the event the arrangement includes a general right of return relative to the delivered item(s), whether the delivery or performance of the undelivered item(s) is considered probable and substantially in our control. If these criteria are met, the arrangement consideration is allocated to the separate units of accounting based on each unit's relative selling price. If these criteria are not met, the arrangement is accounted for as a single unit of accounting which would result in revenue being recognized ratably over the contract term or deferred until the earlier of when such criteria are met or when the last undelivered element is delivered. The amount of product and services revenue recognized for arrangements with multiple deliverables is impacted by the allocation of arrangement consideration to the deliverables in the arrangement based on the relative selling prices. In determining our selling prices, we apply the selling price hierarchy using vendor specific objective evidence (VSOE) when available, third-party evidence of selling price ("TPE") if VSOE does not exist, and best estimated selling price ("BESP") if neither VSOE nor TPE is available.

VSOE of fair value for elements of an arrangement is based upon the normal pricing and discounting practices for a deliverable when sold separately. In determining VSOE, we require that a substantial majority of the selling prices fall within a reasonably narrow pricing range, generally evidenced by a substantial majority of such historical stand-alone transactions falling within a reasonably narrow range of the median rate. In addition, we consider major

service groups, geographies, customer classifications, and other variables in determining VSOE.

We are typically not able to determine TPE for our products or services. TPE is determined based on competitor prices for similar deliverables when sold separately. Generally, our offerings contain a significant level of differentiation such that the comparable pricing of products with similar functionality is difficult to obtain. Furthermore, we are unable to reliably determine what similar competitor products’ selling prices are on a stand-alone basis.

When we are unable to establish the selling price using VSOE or TPE, we use BESP in our allocation of arrangement consideration. The objective of BESP is to determine the price at which we would transact a sale if the product or service were sold on a stand-alone basis. We determine BESP for a product or service by considering multiple factors including, but not limited to, cost of products, gross margin objectives, pricing practices, geographies, customer classes and distribution channels.

We recognize revenue for delivered elements only when we determine there are no uncertainties regarding customer acceptance. Changes in the allocation of the sales price between delivered and undelivered elements can impact the timing of revenue recognized but does not change the total revenue recognized on any agreement.

Professional Services Revenue - Fees collected for professional services, including website design and development, search engine optimization services, link-building, paid search management services, and telecom installation services are recognized as revenue, net of expected customer refunds, over the period during which the services are performed, based upon the value for such services.

Web and Telecommunications Services Hosting Revenue - Fees collected for hosting revenue are recognized ratably as services are provided. Customers are billed for these services on a monthly or annual basis at the customer's option. We recognize revenue ratably over the applicable service period. When we provide a free trial period, we do not begin to recognize subscription revenue until the trial period has ended and the customer has been billed for the services.

Equipment Sales and Financing Revenue - Fees generated from the sale of telecommunications equipment are recognized when the devices are installed and hosted telecommunications services begin.

Fees generated from renting our hosted telecommunication equipment (IP or cloud telephone devices) through leasing contracts are recognized as revenue based on whether the lease qualifies as an operating lease or sales-type lease. The two primary accounting provisions which we use to classify transactions as sales-type or operating leases are: 1) lease term to determine if it is equal to or greater than 75% of the economic life of the equipment and 2) the present value of the minimum lease payments to determine if they are equal to or greater than 90% of the fair market value of the equipment at the inception of the lease. The economic life of most of our products is estimated to be three years, since this represents the most frequent contractual lease term for our products, and there is no residual value for used equipment. Residual values, if any, are established at the lease inception using estimates of fair value at the end of the lease term. The vast majority of our leases that qualify as sales-type leases are non-cancelable and include cancellation penalties approximately equal to the full value of the lease receivables. Leases that do not meet the criteria for sales-type lease accounting are accounted for as operating leases. Revenue from sales-type leases is recognized upon installation and the interest portion is deferred and recognized as earned. Revenue from operating leases in recognized ratably over the applicable service period.

Commission Revenue - We have affiliate agreements with third-party entities that are resellers of satellite television services and internet service provider bandwidth. We receive commissions when the services are bundled with our hosted service offerings.

Cost of Revenue – Cost of revenue consists primarily of salaries for fulfillment services, and the cost of telecommunications equipment, services, and other products sold.

Prepaid Sales Commissions - For arrangements where we recognize revenue over the relevant contract period, we defer related commission payments to our direct sales force and amortize these amounts over the same period that the related revenues are recognized. This is done to match commissions with the related revenues. Commission payments are nonrefundable unless amounts due from a customer are determined to be uncollectible or if the customer subsequently changes or terminates the level of service, in which case commissions which were paid are recoverable by us. Prepaid sales commissions were as follows:

	September 30, 2014	December 31, 2013

Prepaid sales commissions	$319,000	$189,000
Accumulated amortization	(84,000)	(13,000)
Prepaid sales commissions, net	$235,000	$176,000

We amortized commission expense of $23,000 and $4,400 for the three months ended September 30, 2014 and 2013, respectively. We amortized commission expense of $71,000 and $5,400 for the nine months ended September 30, 2014 and 2013, respectively.

Research and Development - Research and development costs are expensed as incurred. Costs related to internally developed software are expensed as research and development expense until technological feasibility has been achieved, after which the costs are capitalized.

Fair Value Measurements - The fair value of our financial assets and liabilities was determined based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

Level 1 — Unadjusted quoted prices that are available in active markets for the identical assets or liabilities at the measurement date.

Level 2 — Other observable inputs available at the measurement date, other than quoted prices included in Level 1, either directly or indirectly, including:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets in non-active markets;
- Inputs other than quoted prices that are observable for the asset or liability; and
- Inputs that are derived principally from or corroborated by other observable market data.

Level 3 — Unobservable inputs that cannot be corroborated by observable market data and reflect the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions.

Income Taxes - We recognize a liability or asset for the deferred tax consequences of all temporary differences between the tax basis of assets and liabilities and their reported amounts in the consolidated financial statements that will result in taxable or deductible amounts in future years when the reported amounts of the assets and liabilities are recovered or settled. Accruals for uncertain tax positions are provided for in accordance with accounting guidance. Accordingly, we may recognize the tax benefits from an uncertain tax position only if it is more-likely-than-not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. Accounting guidance is also provided on de-recognition of income tax assets and liabilities, classification of current and deferred income tax assets and liabilities, accounting for interest and penalties associated with tax positions, and income tax disclosures. Judgment is required in assessing the future tax consequences of events that have been recognized in the financial statements or tax returns. Variations in the actual outcome of these future tax consequences could materially impact our financial position, results of operations, and cash flows. In assessing the need for a valuation allowance, we evaluate all significant available positive and negative evidence, including historical operating results, estimates of future taxable income and the existence of prudent and feasible tax planning strategies. We have placed a full valuation allowance on deferred tax assets (see Note 5).

Interest and penalties associated with income taxes are classified as income tax expense in the consolidated statements of operations.

We do not intend to permanently reinvest the undistributed earnings of our United Kingdom subsidiary, therefore, we have provided for U.S. deferred income taxes on such undistributed foreign earnings. All other foreign subsidiaries

are considered disregarded foreign entities for US tax purposes.

Stock-Based Compensation - For equity-classified awards, compensation expense is recognized over the requisite service period based on the computed fair value on the grant date of the award. Equity classified awards include the issuance of stock options.

Comprehensive Income (Loss) – There were no other components of comprehensive income (loss) other than net income (loss) for the three and nine months ended September 30, 2014 and 2013.

Operating Segments - Accounting guidance establishes standards for the way public business enterprises are to report information about operating segments in annual financial statements and requires enterprises to report selected information about operating segments in financial reports issued to stockholders. The Company has two operating segments, which consist of Hosted Telecommunications Services and Web Services. Research and development expenses are allocated to Hosted Telecommunications Services and Web Services segments based on the level of effort, measured primarily by wages and benefits attributed to our engineering department. Indirect sales and marketing expenses are allocated to the Hosted Telecommunications Services and Web Services segments based on level of effort, measured by month-to-date contract bookings. General and administrative expenses are allocated to both segments based on revenue recognized for each segment. Accounting guidance also establishes standards for related disclosure about products and services, geographic areas and major customers. We generate over 90% of our total revenue from customers within North America (United States and Canada) and less than 10% of our total revenues from customers in other parts of the world.

Significant Customers – No customer accounted for 10% or more of our total revenue for the three and nine months ended September 30, 2014 and 2013.

Recently Issued Accounting Pronouncements - In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09 that introduces a new five-step revenue recognition model in which an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires disclosures sufficient to enable users to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers, including qualitative and quantitative disclosures about contracts with customers, significant judgments and changes in judgments, and assets recognized from the costs to obtain or fulfill a contract. This standard is effective for fiscal years beginning after December 15, 2016, including interim periods within that reporting period. The Company is currently evaluating the new guidance to determine the impact it will have on its consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. This ASU requires that a performance target that affects vesting and could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in ASC 718, Compensation-Stock Compensation, as it relates to such awards. ASU 2014-12 is effective for us in our first quarter of fiscal 2017 with early adoption permitted using either of two methods: (i) prospective to all awards granted or modified after the effective date; or (ii) retrospective to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter, with the cumulative effect of applying ASU 2014-12 as an adjustment to the opening retained earnings balance as of the beginning of the earliest annual period presented in the financial statements. The Company is currently assessing the impact of this pronouncement to its consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15. This ASU requires management to assess an entity’s ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards. Specifically, the ASU (1) provides a definition of the term substantial doubt, (2) requires an evaluation

every reporting period including interim periods, (3) provides principles for considering the mitigating effect of management's plans, (4) requires certain disclosures when substantial doubt is alleviated as a result of consideration of management's plans, (5) requires an express statement and other disclosures when substantial doubt is not alleviated, and (6) requires an assessment for a period of one year after the date that the financial statements are issued (or available to be issued). This standard is effective for the fiscal years ending after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. The Company is currently evaluating the new guidance to determine the impact it will have on its consolidated financial statements.

(2) Net Loss Per Common Share

Basic net income (loss) per common share is computed by dividing the net income (loss) for the period by the weighted-average number of common shares outstanding during the period. Diluted net income per common share is computed giving effect to all dilutive common stock equivalents, consisting of common stock options and restricted shares held in escrow. Diluted net loss per common share for the three and nine months ended September 30, 2014 and 2013 was the same as basic net loss per common share, as the common share equivalents were anti-dilutive. The following table sets forth the computation of basic and diluted net income (loss) per common share:

	Three Months Ended September 30,		Nine Months Ended September 30	
	2014	2013	2014	2013
Net (loss) income (in thousands)	$(1,502)	$(1,659)	$(4,628)	$(3,127)
Weighted-average share reconciliation:				
Weighted-average shares outstanding	11,220,674	10,713,961	11,103,386	10,688,786
Weighted-average basic shares outstanding	11,220,674	10,713,961	11,103,386	10,688,786
Dilutive employee stock options	-	-	-	-
Diluted shares outstanding	11,220,674	10,713,961	11,103,386	10,688,786
Net (loss) income per common share:				
Basic	$(0.13)	$(0.15)	$(0.42)	$(0.29)
Diluted	$(0.13)	$(0.15)	$(0.42)	$(0.29)

Common share equivalent shares are not included in the computation of diluted loss per share, because the Company has a net loss and the inclusion of such shares would be anti-dilutive due to the net loss. At September 30, 2014 and 2013, the common stock equivalent shares were 2,257,107 and 2,271,456, respectively.

(3) Trade Receivables, net

Our trade receivables balance consists of traditional trade receivables and residual Extended Payment Term Agreements (EPTAs) sold prior to July 2011. Below is an analysis of the days outstanding of our trade receivables as shown on our balance sheet (in thousands):

	September 30, 2014	December 31, 2013
Trade receivables	$548	$688
Conforming EPTAs	246	577
Non-Conforming EPTAs:		
1 - 30 days	11	68
31 - 60 days	17	30
61 - 90 days	-	43
Gross trade receivables	822	1,406
Less allowance for doubtful accounts	(83)	(200)
Trade receivables, net	$739	$1,206
Current trade receivables, net	$653	$1,090
Long-term trade receivables, net	86	116
Trade receivables, net	$739	$1,206

All current and long-term EPTAs in the table above had original contract terms of greater than one year. The Company wrote off $133,000 of EPTAs during the nine months ended September 30, 2014 and $1,027,000 during the year ended December 31, 2013, of which, all had original contract terms of greater than one year.

(4) Equipment Financing Receivables

We rent our hosted telecommunication equipment (VoIP telephone devices) through leasing contracts that we classify as either operating leases or sale-type leases. Equipment finance receivables arising from the rental of our hosted telecommunication equipment through sales-type leases were as follows (in thousands):

	September 30, 2014	December 31, 2013
Gross financing receivables	$1,700	$1,369
Less unearned income	(1,059)	(877)
Financing receivables, net	641	492
Less: Current portion of finance receivables, net	(163)	(94)
Finance receivables due after one year	$478	$398

Equipment finance receivables are expected to be collected over the next thirty-six to sixty months.

(5) Income Taxes

Our effective tax rate for the three and nine months ended September 30, 2014 was (0.6)% and (1.2%), respectively. Various state tax minimums resulted in a provision for income taxes for the three and nine months ended September 30, 2014 of $9,000 and $56,000, respectively.

Our effective tax rate for the three months ended September 30, 2013 was (1.4)% which resulted in a provision for income taxes of $23,000. Our effective tax rate for the nine months ended September 30, 2013 was 7.1% which resulted in a benefit for income taxes of $240,000. The benefit for the nine months ended September 30, 2013 was primarily due to the statute of limitations expiring on two uncertain tax positions.

Significant management judgment is required in determining our provision for income taxes and in determining whether deferred tax assets will be realized in full or in part. In assessing the recovery of the deferred tax assets, we considered whether it is more likely than not that some portion or all of our deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income in the periods in which those temporary differences become deductible. We considered the scheduled reversals of future deferred tax assets, projected future taxable income, the suspension of the sale of product and services through the seminar sales channel and tax planning strategies in making this assessment. As a result, we determined it was more likely than not that the deferred tax assets would not be realized; accordingly, we recorded a full valuation allowance. Subsequent to placing a full valuation allowance on our net deferred tax assets, adjustments impacting our tax rate have been and are expected to continue to be insignificant.

(6) Fair Value Measurements

We have financial instruments as of September 30, 2014 and December 31, 2013 for which the fair value is summarized below (in thousands):

	September 30, 2014		December 31, 2013	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Assets:				
Trade receivables, net	$739	$733	$1,206	$1,190
Certificate of deposit	251	251	250	250
Equipment financing receivables	641	641	492	492
Liabilities:				
Acquisition related contingent consideration	$211	$211	$51	$51

The carrying amount of certificates of deposit approximates fair value, as determined by certificates of deposit with similar terms and conditions. The trade receivables consist primarily of extended payment term agreements and the fair value is computed using a discounted cash flow model with an estimated market rate.

The recurring Level 3 measurement of our contingent consideration liability includes the following significant observable inputs at September 30, 2014 and December 31, 2013, respectively (in thousands).

Contingent consideration liability	Fair Value at September 30, 2014	Valuation technique	Unobservable inputs	Range
Revenue - based payments	$211	Discounted cash flow	Discount Rate	12.5%

	Probability of milestone payment	90%
	Projected year of payments	2014 - 2015

Contingent consideration liability	Fair Value at December 31, 2013	Valuation technique	Unobservable inputs	Range
Revenue - based payments	$51	Discounted cash flow	Discount Rate	17.9%
			Probability of milestone payment	90%
			Projected year of payments	2014

Level 3 instruments are valued based on unobservable inputs that are supported by little or no market activity and reflect the Company's own assumptions in measuring fair value. Future changes in fair value of the contingent financial milestone consideration, as a result of changes in significant inputs such as the discount rate and estimated probabilities of financial milestone achievements, could have a material effect on the statement of operations and balance sheet in the period of the change.

The progression of the Company's Level 3 instruments fair valued on a recurring basis for the nine months ended September 30, 2014 are shown in the table below (in thousands):

	Acquisition Related Contingent Consideration
Balance at December 31, 2013	$ 51
Change in fair value	3
Cash payments	(54)
Additions	211
Balance at September 30, 2014	$ 211

(7) Commitments and Contingencies

Legal Proceedings

From time to time we receive inquiries from federal, state, city and local government officials in the various jurisdictions in which we operate. These inquiries and investigations generally concern compliance with various city, county, state and/or federal regulations involving sales, representations made, customer service, refund policies, and marketing practices. We respond to these inquiries and have generally been successful in addressing the concerns of these persons and entities, without a formal complaint or charge being made, although there is often no formal closing of the inquiry or investigation. There can be no assurance that the ultimate resolution of these or other inquiries and investigations will not have a material adverse effect on our business or operations, or that a formal complaint will not be initiated. We also receive complaints and inquiries in the ordinary course of business from both customers and governmental and non-governmental bodies on behalf of customers, and in some cases these customer complaints have risen to the level of litigation. There can be no assurance that the ultimate resolution of these matters will not have a material adverse effect on our business or results of operations.

We have recorded liabilities of approximately $193,000 and $202,000 as of September 30, 2014 and December 31, 2013, respectively, for estimated losses resulting from various legal proceedings in which we are engaged. Attorney's fees associated with the various legal proceedings are expensed as incurred. We are also subject to various claims and legal proceedings covering matters that arise in the ordinary course of business. We believe that the resolution of these other cases will not have a material adverse effect on our business, financial position, or results of operations.

Sale-Leaseback

On February 28, 2014, the Company sold and leased back the land, building and furniture associated with the corporate headquarters in Tempe, Arizona for $2.0 million in cash (Note 10). The Company recognized a deferred gain of $281,000 on sale-leaseback, which will be amortized over the initial lease term of 36 months to offset rent expense. The net deferred gain is included in other long-term liabilities in the condensed consolidated balance sheets as of September 30, 2014.

The lease agreement called for rent payments for the initial three year term to be made in advance in the form of 300,000 shares of common stock of Crexendo, Inc. The fair value price per share at the time of the lease was $3.22 per share, resulting in rent expense of $322,000 per year for three years. Prepaid rent included in the condensed consolidated balance sheets as of September 30, 2014, is as follows:

Prepaid rent, current	$322,000
Long-term prepaid rent	456,000
Total prepaid rent, net	$778,000

Rent expense incurred on the sale-leaseback, net of $24,000 deferred gain amortization, during the three months ended September 30, 2014 and 2013 was $57,000 and $0, respectively. Rent expense incurred on the sale-leaseback, net of $55,000 deferred gain amortization, during the nine months ended September 30, 2014 and 2013 was $133,000 and $0, respectively.

(8) Segment Information

Management has chosen to organize the Company around differences based on its products and services. Hosted Telecommunication Services segment generates revenue from selling hosted telecommunication services and broadband internet services. Web Services segment generates revenue from website hosting, managing e-commerce or lead generation offerings, websites, search engine optimization/management and online promotional needs for small, medium, and enterprise sized businesses. The Company has two operating segments, which consist of Hosted Telecommunications Services and Web Services. Effective April 1, 2014, the Company changed its reporting segments to reflect changes in how the Chief Operating Decision Maker (CODM) internally measures performance and allocates resources. Segment operating results for the prior year have been revised to conform to current year segment operating results presentation. Segment revenue and income (loss) before income tax provision was as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Revenue:				
Hosted Telecommunications Services	$1,035	$696	$2,953	$1,572
Web Services	690	1,732	2,652	6,615
Consolidated revenue	1,725	2,428	5,605	8,187
Loss from Operations:				
Hosted Telecommunications Services	(1,300)	(1,369)	(4,187)	(3,854)
Web Services	(254)	(365)	(605)	57
Total operating loss	(1,554)	(1,734)	(4,792)	(3,797)
Other Income, net:				
Hosted Telecommunications Services	24	-	65	3
Web Services	37	98	155	427
Total other income	61	98	220	430
Loss before income tax provision				
Hosted Telecommunications Services	(1,276)	(1,369)	(4,122)	(3,851)
Web Services	(217)	(267)	(450)	484
Loss before income tax provision	$(1,493)	$(1,636)	$(4,572)	$(3,367)

(9) Business Acquisition

One Stop Voice Acquisition

On June 1, 2014, we acquired certain assets from One Stop Tech Solutions, LLC, dba One Stop Voice (OSV), a privately-held provider of IP Telecom and Cloud communications located in Scottsdale, Arizona. The aggregate purchase price of approximately $540,000 consisted of $195,000 of cash paid at closing and 40,521 shares of our common stock with an estimated fair value of approximately $134,000. The fair value of the issuance of common stock issued as consideration for OSV was determined on the basis of the closing market price of the Company's common stock on the acquisition date. In addition, the Company recorded as part of the purchase price approximately $211,000 of contingent consideration it estimates will be paid during the earn-out period. The contingent consideration of $211,000 will be paid out in cash and stock at a split of 60% cash and 40% stock. The Company's consolidated financial statements include the results of operations of OSV from the date of acquisition. The historical results of operations of OSV were not significant to the Company's consolidated results of operations for the periods presented. The total purchase consideration was allocated to the assets acquired and liabilities assumed at their estimated fair values as of the date of acquisition, as determined by management based on a valuation performed by an independent third party valuation firm. The excess of the purchase price over the amounts allocated to assets acquired and liabilities assumed has been recorded as goodwill. The goodwill arising from the acquisitions discussed above consists largely of the synergies and economies of scale we hope to achieve from combining the acquired assets and operations with our historical operations. In accordance with current accounting standards, goodwill associated with the OSV acquisition will not be amortized and will be tested for impairment at least annually.

The preliminary purchase price allocation is subject to completion of final fair value allocations. The actual amounts that will be recorded based upon final assessment of the fair values may differ substantially from the information in the unaudited condensed consolidated financial statements. The primary area of the purchase price allocation that is not yet finalized relate to the valuation of the intangible assets acquired. We anticipate finalizing our purchase price allocation during 2014. The following table presents the preliminary allocation of the purchase price for OSV (in thousands):

Consideration (including estimated unpaid contingent consideration):	
Cash	$195
Common stock	134
Contingent consideration	211
Total consideration	$540
Recognized amounts of identifiable assets acquired and liabilities assumed:	
Identifiable intangible assets	$353
Commission liability	(10)
Total identifiable net assets	343
Goodwill	197
	$540

The following were the identified intangible assets acquired and the respective estimated periods over which such assets will be amortized (in thousands):

Customer relationships	$335	7
Technology	18	3
Total intangible assets	$353	

In determining the preliminary purchase price allocation, the Company considered, among other factors, its intention to use the acquired assets and the historical and estimated future demand for One Stop Voice services. The estimated fair value of customer relationships was based upon the income approach. The income approach relies on an estimation of the present value of the future monetary benefits expected to flow to the owner of an asset during its remaining economic life. This approach requires a projection of the cash flow that the asset is expected to generate in the future. The projected cash flow is discounted to its present value using a rate of return, or discount rate that accounts for the time value of money and the degree of risk inherent in the asset. The income approach may take the form of a "relief from royalty" methodology, a cost savings methodology, a "with and without" methodology, or excess earnings methodology, depending on the specific asset under consideration.

The relief from royalty approach was used to determine the fair value of the technology license acquired from One Stop Voice. The relief from royalty approach estimates the value of the intangible asset by quantifying the aggregate expenditures that would be required to replace the intangible asset. The customer relationships were valued using a form of the income approach known as the multi-period excess earnings method. Inherent in the multi-period excess earnings method is the recognition that, in most cases, all of the assets of the business, both tangible and intangible, contribute to the generation of the cash flow of the business and the net cash flows attributable to the subject asset must recognize the support of the other assets which contribute to the realization of the cash flows. This future cash flow was then discounted using an estimated required rate of return for the asset to determine the present value of the future cash flows attributable to the asset. The key assumptions used in valuing the customer relationships acquired are as follows: discount rate of 12.5%, tax rate of 39.3%, contributory asset charges for technology license and tangible assets used to deliver services, assembled workforce, and estimated economic life of 7 years.

The total weighted average amortization period for the identified intangible assets acquired from One Stop Voice is 7 years. The goodwill resulting from the One Stop Voice acquisition is not currently deductible for income tax purposes.

PBX Holdings, LLC. Acquisition

On June 4, 2013, we acquired certain assets from PBX Holdings, LLC., dba PBX Central, a privately-held provider of IP Telecom and Cloud communications located in Austin, Texas. The aggregate purchase price of approximately $770,000 consisted of $300,000 of cash paid at closing and 38,516 shares of our common stock with an estimated fair value of approximately $107,000. The fair value of the issuance of common stock issued as consideration for PBX Central was determined on the basis of the closing market price of the Company's common stock on the acquisition date. In addition, the Company recorded as part of the purchase price approximately $363,000 of contingent consideration it estimates will be earned relating to an additional payment provision. The estimated additional payment obligation is comprised of approximately $87,000 of cash consideration and 115,385 shares of the Company's common stock with an estimated value of approximately $276,000 at the time of the acquisition. The Company's consolidated financial statements include the results of operations of PBX Central from the date of acquisition. The historical results of operations of PBX Central were not significant to the Company's consolidated results of operations for the periods presented. The total purchase consideration was allocated to the assets acquired and liabilities assumed at their estimated fair values as of the date of acquisition, as determined by management. The excess of the purchase price over the amounts allocated to assets acquired and liabilities assumed has been recorded as goodwill. The goodwill arising from the acquisitions discussed above consists largely of the synergies and economies of scale we hope to achieve from combining the acquired assets and operations with our historical operations. In accordance with current accounting standards, goodwill associated with the PBX Central acquisition will not be amortized and will be tested for impairment at least annually.

During the third quarter of 2013, the Company completed the valuation of the intangible assets acquired. The final assessment resulted in no changes to the amounts recorded. The following table presents the final allocation of the purchase price for PBX Central (in thousands):

Consideration (including estimated unpaid contingent consideration):	
Cash	$300
Common stock	107
Contingent consideration	363
Total consideration	$770
Recognized amounts of identifiable assets acquired and liabilities assumed:	
Property and equipment	$7
Identifiable intangible assets	688
Total identifiable net assets	695
Goodwill	75
	$770

The following were the identified intangible assets acquired and the respective estimated periods over which such assets will be amortized (in thousands):

Intangible Assets:	Amount	Weighted Average useful life (In years)
Technology	$180	2
Customer relationships	508	10
Total intangible assets	$688	

In determining the preliminary purchase price allocation, the Company considered, among other factors, its intention to use the acquired assets and the historical and estimated future demand for PBX Central services. The estimated fair value of customer relationships was based upon the income approach. The income approach relies on an estimation of the present value of the future monetary benefits expected to flow to the owner of an asset during its remaining economic life. This approach requires a projection of the cash flow that the asset is expected to generate in the future. The projected cash flow is discounted to its present value using a rate of return, or discount rate that accounts for the time value of money and the degree of risk inherent in the asset. The income approach may take the form of a “relief from royalty” methodology, a cost savings methodology, a “with and without” methodology, or excess earnings methodology, depending on the specific asset under consideration.

The cost approach was used to determine the fair value of the technology acquired from PBX Central. The cost approach estimates the value of the intangible asset by quantifying the aggregate expenditures that would be required to replace the intangible asset. Such expenditures include the developers’ time and materials. The underlying assumption is that the cost to purchase or develop an asset is commensurate with the economic benefits the asset is expected to generate over its remaining economic life. Management has estimated the cost to develop a similar product with current technology. The key assumption used in valuing the technology acquired is developers’ time.

The customer relationships were valued using a form of the income approach known as the multi-period excess earnings method. Inherent in the multi-period excess earnings method is the recognition that, in most cases, all of the assets of the business, both tangible and intangible, contribute to the generation of the cash flow of the business and the net cash flows attributable to the subject asset must recognize the support of the other assets which contribute to the realization of the cash flows. This future cash flow was then discounted using an estimated required rate of return for the asset to determine the present value of the future cash flows attributable to the asset. The key assumptions used in valuing the customer relationships acquired are as follows: discount rate of 18%, tax rate of 38.1%, contributory asset charges for technology license and tangible assets used to deliver services, and estimated economic life of 10 years.

The total weighted average amortization period for the identified intangible assets acquired from PBX Central is 6 years. The goodwill resulting from the PBX Central acquisition is not currently deductible for income tax purposes.

At December 31, 2013, the Company updated the cash flow forecast using actual results for the period June 1, 2013 through December 31, 2013, and determined a re-measurement was necessary to adjust the fair value of the contingent consideration. The contingent consideration comprised of 25% cash and 75% common stock. The cash contingent consideration recorded as a liability at the acquisition date fair value of $87,000 was reduced by $14,000. As the common stock contingent consideration was recorded as equity at the acquisition date fair value of $276,000, no re-measurement was necessary. During the quarter ended September 30, 2014, management finalized the earn-out calculation for the final payout of contingent consideration. The cash contingent consideration classified as liability was increased by $3,000 and the stock consideration was increased by $2,000. The liability change in fair value was

recognized in general and administrative expenses. The stock contingent consideration change in fair value was accounted for within equity. The sellers received cash of $76,000 and stock of $278,000 for total contingent consideration of $354,000.

(10) Related Party Transactions

On February 28, 2014, the Company entered into a Deed of Sale with SGM EXE, LLC, a Nevada limited liability company controlled by Steven G. Mihaylo, the Chairman of the Board, Chief Executive Officer and principal shareholder of the Company. The land, building and furniture of the corporate headquarters were sold for $2.0 million in cash, which resulted in a deferred gain on sale of disposal of $281,000.

On March 1, 2014, the Company entered into a sale-leaseback agreement with SGM EXE, LLC. The Company has signed a three-year lease agreement, with the option to renew the lease at fair market value rates for two consecutive three-year terms. The lease agreement called for rent payments for the initial three year term to be made in advance in the form of 300,000 shares of common stock of Crexendo, Inc. The fair value price per share at the time of the lease was $3.22 per share, resulting in rent expense of $322,000 per year for three years. The Company has the option to pay rent expense for the subsequent renewal periods in stock or cash. If stock, the number of shares is computed as the average of the last sale price for each business day for the thirty (30) days prior to the first day of the three year renewal term.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This section and other parts of this Form 10-Q contain forward-looking statements that involve risks and uncertainties. Forward-looking statements can be identified by words such as "anticipates," "expects," "believes," "plans," "predicts," and similar terms. Forward-looking statements are not guarantees of future performance and our Company's actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in Part II, Item 1A, "Risk Factors," which are incorporated herein by reference. The following discussion should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2013 (the "2013 Form 10-K") filed with the SEC and the Condensed Consolidated Financial Statements and notes thereto included in the 2013 Form 10-Q's and elsewhere in this Form 10-Q. We assume no obligation to revise or update any forward-looking statements for any reason, except as required by law.

OVERVIEW

We are a hosted services company that provides website hosting, hosted telecommunications services, e-commerce software, website development software, and broadband internet services for businesses and entrepreneurs. Our services are designed to make enterprise-class hosting services available to small, medium-sized and enterprise-sized businesses at affordable monthly rates. The Company has two operating segments, which consist of Hosted Telecommunication Services and Web Services.

Hosted Telecommunications Services segment - Our hosted telecommunications services transmit calls using IP or cloud technology, which converts voice signals into digital data packets for transmission over the Internet or cloud. Each of our calling plans provides a number of basic features typically offered by traditional telephone service providers, plus a wide range of enhanced features that we believe offer an attractive value proposition to our customers. This platform enables a user, via a single "identity" or telephone number, to access and utilize services and features regardless of how the user is connected to the Internet or cloud, whether it's from a desktop device or a mobile device.

We generate subscription fees from our hosted telecommunications and broadband Internet services. Our hosted telecommunications contracts typically have a thirty-six to sixty month term. We generate product revenue and equipment financing revenue from the sale and lease of our hosted telecommunications equipment. Revenues from the sale of equipment, including those from sales-type leases, are recognized at the time of sale or at the inception of the lease, as appropriate.

Web Services segment –We generate website hosting revenue and professional services revenue primarily from search engine optimization services, link building, paid search management services, conversion rate optimization services, and website design and development. These services are typically billed on a fixed price basis or on a monthly recurring basis with an initial term of six to twelve months. During the quarter ended September 30, 2013, the Company made a strategic decision to limit our provision of web services to our enterprise sized customers.

OUR SERVICES AND PRODUCTS

Our goal is to provide a broad range of Cloud-based products and services that nearly eliminate the cost of a businesses' technology infrastructure and enable businesses of any size to more efficiently run their business. By providing a variety of comprehensive and scalable solutions, we are able to provide these solutions on a monthly basis to businesses and entrepreneurs without the need for expensive capital investments, regardless of where their business is in its lifecycle. Our products and services can be categorized in the following offerings:

Hosted Website Services - Our website hosting services allows businesses and entrepreneurs to host their websites in our data center for a monthly fee.

Hosted Telecommunications Services - Our hosted telecommunications service offering includes hardware and software and unified communication solutions for businesses using IP or cloud technology over any high-speed internet connection. These services are rendered through a variety of devices and user interfaces such as a Crexendo branded desktop phones, mobile and desktop applications. Some examples of mobile devices are Android cell phones, iPhones, iPads or Android tablets. These services enable our customers to seamlessly communicate with others through phone calls that originate/terminate on our network or PSTN networks. Our hosted telecommunications services are powered by our proprietary implementation of standard Internet, Web and IP or cloud technologies. Our services also use our complex infrastructure that we build and manage based on industry standard best practices to achieve greater efficiencies and customer satisfaction. Our infrastructure comprises of computing, storage, network technologies, 3rd party products and vendor relationships. We also develop end user portals for account management,

license management, billing and customer support and adopt other cloud technologies through our partnerships.

Crexendo's hosted telecommunication service offers a wide variety of essential and advanced features for small and medium-size businesses. Many of these features included in the service offering are:

Business Productivity Features such as dial-by extension and name, transfer, conference, call recording, Unlimited calling to anywhere in the US and Canada, International calling, Toll free (Inbound and Outbound)

Individual Productivity Features such as Caller ID, Call Waiting, Last Call Return, Call Recording, Music-On-Hold, Voicemail, Unified Messaging, Hot-Desking

Group Productivity Features such as Call Park, Call Pickup, Interactive Voice Response (IVR), Individual and Universal Paging, Corporate Directory, Multi-Party Conferencing, Group Mailboxes

Call Center Features such as Automated Call Distribution (ACD), Call Monitor, Whisper and Barge, Automatic Call Recording

Advanced Unified Communication Features such as Find-Me-Follow-Me, Sequential Ring and Simultaneous Ring

Mobile Features such extension dialing, transfer and conference and seamless hand-off from Wifi to/from 3G and 4G, as well as other data services. These features are also available on CrexMo, an intelligent mobile application for iPhones and Android smartphones, as well as iPads and Android tablets

Traditional PBX Features such as Busy Lamp Fields, System Hold. 16-48 Port density Analog Devices

Expanded Desktop Device Selection such as Entry Level Phone, Executive Desktop, DECT Phone for roaming users

Advanced Faxing solution such as Cloud Fax (cFax) allowing customers to send and receive Faxes from their Email Clients, Mobile Phones and Desktops without having to use a Fax Machine simply by attaching a file

Web based online portal to administer, manage and provision the system.

Many of these services are included in our basic offering to our customers for a monthly recurring fee and do not require a capital expense. Some of the advanced features such as Automatic Call Recording and Call Center Features require additional monthly fees. Crexendo continues to invest and develop its technology and SaaS offerings to make them more competitive and profitable.

Search Engine Optimization (SEO) - There are two general aspects to Search Engine Optimization ("SEO"). First, the tactical level, that includes conditioning a website and/or its pages to be relevant and search-engine friendly. Second, we help businesses strategically select keywords and keyword phrases. The popularity of a site plays a role in what keyword phrases a business can compete on versus what keyword phrases might be "out of their league". We focus on the strategic selection of keywords and prioritize keywords that have healthy search volumes and high 'win' capability. Our experience coupled with our software allow us to strategically select the best choices for keyword phrases to target which provide the highest probability of getting high search engine positions and draws maximum traffic to the website. Our SEO packages include a keyword interview, strategic keyword research, baseline ranking report, search engine optimization plan, and comparison ranking report.

Link Building - Link building is a critical component of off-page SEO. To be effective, a link building campaign must be done manually. Search engines can detect links obtained via automated submission. Also, links need to come from many different types of sites, not just one or two. Link building is closely related to search engine optimization, as such; we carefully synchronize all our link building efforts and anchor text with our search engine optimization efforts.

An effective link building effort is labor intensive, with no real shortcuts. We use a broad based approach for link building that follows search engine webmaster guidelines. We use strategies that include, but aren't limited to: Web 2.0 sites, social media and social bookmarking sites, vertical portals, local directories, live directories, and others.

Paid Search Management - We offer paid search management services, such as management of Google® AdWords™, Yahoo and Microsoft Advertising adCenter™ accounts for our customers.

Modern paid search networks are incredibly sophisticated and require a tremendous amount of experience and expertise to avoid the many potential pitfalls of paid search. We assist customers by taking a conservative approach to paid search management. By using a combination of proprietary automation tools, split test dedicated landing pages, as well as the practiced eye of an expert monitoring our customer accounts on a daily basis, we are able to consistently raise conversion rates and lower the cost of pay-per-click (PPC) acquisition.

Website Design and Development - Using our proprietary software and processes we design and develop websites with "conversion" in mind. The term conversion means different things to different websites. To a lead-generation website, it means getting prospects to submit their contact information so the sales team can contact them. For an e-commerce website, conversion means getting an online customer to complete an order.

Our website design packages range from a semi-custom template based design package to a completely custom design package. We incorporate analytics into every website we build. Proper analytics allow identification of weak spots in the conversion process. Once weak spots are identified, the site can be adjusted to smooth out the process and help turn more prospects into customers.

Once the site is complete, we provide tutorials and tools to allow customers to make changes to their sites as often as necessary without having to pay additional programming fees. Alternatively, customers can elect to have us manage the changes to their websites for an additional fee.

TECHNOLOGY

We believe our proprietary implementation of standard Web, IP, Cloud, Mobile and Internet technologies represent a key component of our business model. We believe these technologies and how we deliver them to our customers distinguish our services and products from the services and products offered by our competitors. Our technology infrastructure and virtual network operation center, all of which is built and managed on industry standard computing, storage, data and platforms offers us greater efficiencies. The synergies between Web and Telecommunication protocols such as TCP/IP, HTTP, XML, SIP and innovations in computing, load balancing, redundancy and high availability of Web and Telecommunications technologies offers us a unique advantage in delivering these services to our customers seamlessly from our data center.

Our Hosted Telecommunications technology is continuously being enhanced with additional features and software functionality. Our current functionality includes:

High-end desktop telephony devices such as Gigabit, PoE, 6 Line Color Phone with 10 programmable buttons and lower end Monochrome 2 Line wall mountable device

Basic Business Telephony Features such as those offered in a traditional private branch exchange (“PBX”) systems like extension dialing, Direct Inward Dialing (DID), Hold/Resume, Music-On-Hold, Call Transfer (Attended and Unattended), Conferencing, Local, Long Distance, Toll-Free and International Dialing, Voicemail, Auto-Attendant and traditional faxing

Advanced telephony features such as Call Park, Call Pickup, Paging (through the phones), Overhead paging, Call Recording

Call Center Functionality such as Agent Log In/Log Out, Whisper, Barge and Call center reporting

Unified Communications features like Simultaneous Ring, Sequential Ring, Status based Routing (Find-Me-Follow-Me), 10-party instant conference, and Mobile application (CrexMo)

Crexendo Mobile Application (CrexMo), which allows users to place and receive extension calls using Crexendo’s network, transfer and conference other users right from their mobile device as if they were in the office. It also provided users instant access to visual voicemail and call logs

End User Portal and Unified Messaging with Voicemail, Call Recording and eFax inbox.

Our web software platform is continuously being enhanced and is an innovative website-building environment. Features and functions of our software include:

- during website development, our customers can experience the look and feel of their websites as if they were their own customers. They can shop, navigate, order products, track orders, and more. If they want to change or add more elements, they can edit, rearrange, add, and delete the elements all within a dynamic, point-and-click environment;

- designs that are customized based on the customers' choices and arrangements. Customers can modify the look and feel of the design to complement their services or products. In addition, design modification and arrangement are executed within a streamlined, point-and-click environment;

- blogs, online journals, message boards, and forums that are easily integrated into the content of the website. As administrators, the customers have full control in terms of filtering content, allowing images, and other blog, message board, and forum permissions;

- customizable forms that address customer-specific needs. By using customized forms, our customers can set up secure, encrypted forms with improved ease to collect sensitive information from their customers. This is especially useful for service-based businesses, as these forms can be used for job, loan, applications, questionnaires, bids, quotes, lead generation, etc.;

- advanced out of the box eCommerce features include: shopping cart, ordering rules setup for shipping, sales tax, discount codes, UPS integration, inventory control system, gift certificate and gift card purchasing and redemption, integration with Amazon® Checkout and/or Google® Checkout, Google® Base integration, eBay® auctions integration, shopping cart supporting multiple currencies and price sets, automatic sitemap generation used by search engines, and advanced website product search using filters to quickly narrow down the product offering based on product attributes.

We continue to invest and develop on our Web platform to make it more easy-to-use, enable larger mobile and 3rd party integration features thus enabling our web customers to drive more traffic to their web-sites.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

In preparing our financial statements, we make estimates, assumptions and judgments that can have a significant impact on our revenue, operating income or loss and net income or loss, as well as on the value of certain assets and liabilities on our balance sheet. We believe that the estimates, assumptions and judgments involved in our accounting policies described in Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2013 have the greatest potential impact on our financial statements, so we consider them to be our critical accounting policies and estimates. Our senior management has reviewed the development and selection of our critical accounting policies and estimates and their disclosure in this Form 10-Q with the Audit Committee of our Board of Directors.

RESULTS OF OPERATIONS

The following discussion of financial condition and results of operations should be read in conjunction with our consolidated financial statements and notes thereto and other financial information included elsewhere in this Form 10-Q.

Results of Consolidated Operations (in thousands):

	Three Months Ended September 30,		Nine Months Ended September	
	2014	2013	2014	2013
Revenue	$1,725	$2,428	$5,605	$8,187
Loss before income taxes	(1,493)	(1,636)	(4,572)	(3,367)
Income tax benefit (provision)	(9)	(23)	(56)	240
Net (loss) income	(1,502)	(1,659)	(4,628)	(3,127)
Basic net (loss) income per share	$(0.13)	$(0.15)	$(0.42)	$(0.29)
Diluted net (loss) income per share	$(0.13)	$(0.15)	$(0.42)	$(0.29)

Three months ended September 30, 2014 compared to three months ended September 30, 2013

Revenue

Total revenue decreased 29% or $703,000, to $1,725,000 for the three months ended September 30, 2014 as compared to $2,428,000 for the three months ended September 30, 2013. Hosted Telecommunications Services segment revenue increased 49% or $339,000, to $1,035,000 for the three months ended September 30, 2014 as compared to $696,000 for the three months ended September 30, 2013. Web Services segment revenue decreased 60% or $1,042,000, to $690,000 for the three months ended September 30, 2014 as compared to $1,732,000 for the three months ended September 30, 2013.

Loss Before Income Taxes

Loss before income tax decreased $143,000, to $1,493,000 for the three months ended September 30, 2014 as compared to loss before income tax of $1,636,000 for the three months ended September 30, 2013. Revenue decreased 29% or $703,000, to $1,725,000 for the three months ended September 30, 2014 as compared to $2,428,000 for the three months ending September 30, 2013. Total operating expenses decreased 21% or $883,000, to $3,279,000 for the three months ended September 30, 2014 as compared to $4,162,000 for the three months ended September 30, 2013.

Income Tax Provision

Our effective tax rate for the three months ended September 30, 2014 was (0.6)%. Various state tax minimums resulted in a provision for income taxes for the three months ending September 30, 2014 of $9,000. Our effective tax rate for the three months ended September 30, 2013 was (1.4)%. Various state tax minimums resulted in a provision for income taxes for the three months ending September 30, 2013 of $23,000.

Nine months ended September 30, 2014 compared to nine months ended September 30, 2013

Revenue

Total revenue decreased 32% or $2,582,000, to $5,605,000 for the nine months ended September 30, 2014 as compared to $8,187,000 for the nine months ended September 30, 2013. Hosted Telecommunications Services segment revenue increased 88% or $1,381,000, to $2,953,000 for the nine months ended September 30, 2014 as compared to $1,572,000 for the nine months ended September 30, 2013. Web Services segment revenue decreased 60% or $3,963,000, to $2,652,000 for the nine months ended September 30, 2014 as compared to $6,615,000 for the nine months ended September 30, 2013.

Loss Before Income Taxes

Loss before income tax increased 36% or $1,205,000, to $4,572,000 for the nine months ended September 30, 2014 as compared to loss before income tax of $3,367,000 for the nine months ended September 30, 2013. Revenue decreased 32% or $2,582,000, to $5,605,000 for the nine months ended September 30, 2014 as compared to $8,187,000 for the nine months ending September 30, 2013. Total operating expenses decreased 13% or $1,587,000, to $10,397,000 for the nine months ended September 30, 2014 as compared to $11,984,000 for the nine months ended September 30, 2013.

Income Tax Provision

Our effective tax rate for the nine months ended September 30, 2014 was (1.2)%. Various state tax minimums resulted in a provision for income taxes for the nine months ended September 30, 2014 of $56,000. Our effective tax rate for the nine months ended September 30, 2013 was 7.1%, which resulted in a benefit for income taxes of $240,000.

Segment Operating Results

The Company has two operating segments, which consist of Hosted Telecommunications Services and Web Services. Effective April 1, 2014, the Company changed its reporting segments to reflect changes in how the Chief Operating Decision Maker (CODM) internally measures performance and allocates resources. Segment operating results for the three and nine months ended September 30, 2013 have been modified to conform to current segment operating results presentations. The information below is organized in accordance with our two reportable segments. Segment operating income (loss) is equal to segment net revenue less segment cost of revenue, sales and marketing, and general and administrative expenses.

Operating Results of our Hosted Telecommunications Services segment (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Hosted Telecommunications Services				
Revenue	$1,035	$696	$2,953	$1,572
Operating expenses:				
Cost of revenue	630	580	2,001	1,526
Research and development	214	223	720	762
Selling and marketing	536	564	1,642	1,576
General and administrative	955	698	2,777	1,562

Operating loss	(1,300)	(1,369)	(4,187)	(3,854)
Other Income	24	-	65	3
Loss before taxes	$(1,276)	$(1,369)	$(4,122)	$(3,851)

Three months ended September 30, 2014 compared to three months ended September 30, 2013

Revenue

Hosted Telecommunications Services segment revenue increased 49% or $339,000, to $1,035,000 for the three months ended September 30, 2014 as compared to $696,000 for the three months ended September 30, 2013. Interest income associated with the sales-type leases increased 117% or $63,000, to $117,000 for the three months ended September 30, 2014 as compared to $54,000 for the three months ended September 30, 2013. Revenue from recurring and one-time services increased 68% or $307,000 to $756,000 for the three months ended September 30, 2014 as compared to $449,000 for the three months ended September 30, 2013. The increase was offset by a decrease in equipment sales, which includes the sales-type leases of 16%, or $31,000 from $194,000 for the three months ended September 30, 2013 to $163,000 for the 3 months ended September 30, 2014. A substantial portion of Hosted Telecommunications Services segment revenue is generated through thirty-six to sixty month service contracts. As such, we believe growth in Hosted Telecommunications Services segment will initially be seen through increases in our backlog. Backlog represents contracts signed with no service or payment provided at September 30, 2014 and 2013.

Below is a table which displays the Hosted Telecommunications Services segment revenue backlog as of July 1, 2014 and 2013, and September 30, 2014 and 2013, which we expect to recognize as revenue within the next thirty-six to sixty months (in thousands):

Hosted Telecommunications Services backlog as of July 1, 2014	$8,402
Hosted Telecommunications Services backlog as of September 30, 2014	$8,806
Hosted Telecommunications Services backlog as of July 1, 2013	$4,253
Hosted Telecommunications Services backlog as of September 30, 2013	$5,220

Cost of Revenue

Cost of revenue consists primarily of product cost and customer support department salaries of our hosted telecommunication services and bandwidth. Cost of revenue increased 9% or $50,000, to $630,000 for the three months ended September 30, 2014 as compared to $580,000 for the three months ended September 30, 2013. The increase in cost of revenue was primarily due to an increase in customer support costs of $47,000, as we continue to increase personnel to fulfill our increasing hosted telecommunications services orders, and an increase in bandwidth costs of $16,000 and other cost of revenue of $10,000. This was offset by a decrease in product costs of $25,000 due to equipment sales being down for the three months ended September 30, 2014.

Research and Development

Research and development expenses consist primarily of salaries and benefits which are attributable to the development of our new hosted telecommunications products. Research and development expenses decreased 4% or $9,000, to $214,000 for the three months ended September 30, 2014 as compared to $223,000 for the three months ended September 30, 2013.

Selling and Marketing

Selling and marketing expenses consist primarily of salaries and benefits, commissions, and advertising expenses. Selling and marketing expenses decreased 5% or $28,000, to $536,000 for the three months ended September 30, 2014 as compared to $564,000 for the three months ended September 30, 2013.

General and Administrative

General and administrative expenses consist primarily of payroll and related expenses for executives, administrative personnel, legal, rent, accounting and other professional services, and other general corporate expenses. General and administrative expenses increased 37% or $257,000, to $955,000 for the three months ended September 30, 2014 as compared to $698,000 for the three months ended September 30, 2013. The increase in general and administrative expenses for the three months ended September 30, 2014 is the result of an increase in the allocation of corporate general and administrative expenses as revenue increases. The increases primarily consisted of additional salaries and benefits allocations of $43,000, additional allocation of stock option expense of $27,000, increase in rent expense allocations of $45,000, corporate accounting service allocations of $50,000, software and maintenance expense allocations of $27,000, and other expenses of $63,000.

Nine months ended September 30, 2014 compared to nine months ended September 30, 2013

Revenue

Hosted Telecommunications Services segment revenue increased 88% or $1,381,000, to $2,953,000 for the nine months ended September 30, 2014 as compared to $1,572,000 for the nine months ended September 30, 2013. A substantial portion of Hosted Telecommunications Services segment revenue is generated through thirty-six to sixty month service contracts. As such, we believe growth in Hosted Telecommunications Services segment will initially be seen through increases in our backlog. Backlog represents contracts signed with no service or payment provided at September 30, 2014 and 2013.

Below is a table which displays the Hosted Telecommunications Services segment revenue backlog as of January 1, 2013 and 2014, and September 30, 2013 and 2014, which we expect to recognize as revenue within the next thirty-six to sixty months (in thousands):

Hosted Telecommunications Services backlog as of January 1, 2014	$7,019
Hosted Telecommunications Services backlog as of September 30, 2014	$8,806
Hosted Telecommunications Services backlog as of January 1, 2013	$2,374
Hosted Telecommunications Services backlog as of September 30, 2013	$5,220

Cost of Revenue

Cost of revenue consists primarily of product cost and customer support department salaries of our hosted telecommunication services and bandwidth. Cost of revenue increased 31% or $475,000, to $2,001,000 for the nine months ended September 30, 2014 as compared to $1,526,000 for the nine months ended September 30, 2013. The increase in cost of revenue was primarily due to an increase in product cost of $102,000 and customer support costs of $199,000, as we continue to increase personnel to fulfill our increasing hosted telecommunications services orders, and an increase in bandwidth costs of $65,000, installation charges of $32,000 and other cost of revenue of $77,000.

Research and Development

Research and development expenses consist primarily of salaries and benefits which are attributable to the development of our new hosted telecommunications products. Research and development expenses decreased 6% or $42,000, to $720,000 for the nine months ended September 30, 2014 as compared to $762,000 for the nine months ended September 30, 2013.

Selling and Marketing

Selling and marketing expenses consist primarily of salaries and benefits, commissions, and advertising expenses. Selling and marketing expenses increased 4% or $66,000, to $1,642,000 for the nine months ended September 30, 2014 as compared to $1,576,000 for the nine months ended September 30, 2013. The increase in selling and marketing expenses was primarily due to the increase in the commissions for referral partners of $84,000 related to Telecommunications services sales, business development of $20,000 and other sales and marketing costs of $45,000, which was offset by a decrease in the direct sales representative salaries and benefits of $83,000.

General and Administrative

General and administrative expenses consist primarily of payroll and related expenses for executives, administrative personnel, legal, rent, accounting and other professional services, and other general corporate expenses. General and administrative expenses increased 78% or $1,215,000, to $2,777,000 for the nine months ended September 30, 2014 as compared to $1,562,000 for the nine months ended September 30, 2013. The increase in general and administrative expenses for the nine months ended September 30, 2014 is the result of an increase in the allocation of corporate general and administrative expenses as revenue increases. The increases primarily consisted of additional salaries and benefits allocations of $300,000, additional allocation of stock option expense of $120,000, corporate accounting service allocations of $113,000, rent expense allocations of $246,000, software and maintenance allocations of $118,000, other expenses of $255,000 and depreciation allocations of $65,000.

Operating Results of Web Services segment (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Web Services				
Revenue	$690	$1,732	$2,652	$6,615
Operating Expenses:				
Cost of revenue	160	464	603	1,530
Research and development	180	173	523	529
Selling and marketing	10	148	61	761
General and administrative	594	1,312	2,070	3,738
Operating income	(254)	(365)	(605)	57
Other income	37	98	155	427
Income before taxes	$(217)	$(267)	$(450)	$484

Three months ended September 30, 2014 compared to three months ended September 30, 2013

Revenue

Web Services segment revenue decreased 60% or $1,042,000, to $690,000 for the three months ended September 30, 2014 as compared to $1,732,000 for the three months ended September 30, 2013. The decrease in revenue is primarily related to the decrease in cash collected on EPTAs of $447,000 and our shift in focus to only providing web services to enterprise-sized customers resulting in a decrease of $388,000, and a decrease in website hosting revenue of $113,000. Revenue from Web Services segment is generated primarily through website hosting and Search Engine Optimization ("SEO") services, search engine management services, conversion rate optimization services, and website design and development services. A substantial portion of Web Services segment's revenue is generated through three to twelve-month service contracts.

Below is a table which displays the Web Services segment revenue backlog as of July 1, 2014 and 2013, and September 30, 2014 and 2013, which is expected to be recognized as revenue within the next twelve months (in thousands):

Web Services backlog as of July 1, 2014	$117
Web Services backlog as of September 30, 2014	$66
Web Services backlog as of July 1, 2013	$1,162
Web Services backlog as of September 30, 2013	$760

Revenue related to cash collected under EPTA agreements decreased 81% or $435,000, to $99,000 for the three months ended September 30, 2014 as compared to $534,000 for the three months ended September 30, 2013. Our typical EPTA agreement has a term of two to three years. As such, while we no longer plan to offer EPTAs to our customers as a result of the suspension of our direct mail seminar sales, we will continue to recognize revenue from those EPTA contracts executed prior to July 2011 as cash is collected from those contracts. EPTAs were originally recognized in our balance sheet, net of an allowance for doubtful accounts, through our deferred revenue balance. The remaining deferred revenue balance is expected to be recognized as revenue, however, at a decreasing rate over the next year. The following table summarizes the activity within deferred revenue for the three months ended September 30, 2014 and 2013 (in thousands):

EPTA deferred revenue as of July1, 2014	$284
Cash collected on principal of EPTA contracts	(99)
Adjustments of EPTA deferred revenue	21
EPTA deferred revenue as of September 30, 2014	$206
EPTA deferred revenue as of July 1, 2013	$1,015
Cash collected on principal of EPTA contracts	(534)
Adjustments of EPTA deferred revenue	163
EPTA deferred revenue as of September 30, 2013	$644

Revenue related to cash collected on previously written off bad debt decreased 22% or $17,000, to $62,000 for the three months ended September 30, 2014 as compared to $79,000 for the three months ended September 30, 2013.

Commissions from third parties and other revenue decreased 38% or $22,000, to $36,000 for the three months ended September 30, 2014 as compared to $58,000 for the three months ended September 30, 2013. The decrease in commissions was primarily due to the suspension our direct mail seminar sales channel. As a result of this decision, we no longer send leads to third parties, and we do not expect this revenue source to be significant in the future.

Cost of Revenue

Cost of revenue consists primarily of salaries and related expenses related to fulfillment of our web management services and customer service. Cost of revenue decreased 66% or $304,000, to $160,000 for the three months ended September 30, 2014 as compared to $464,000 for the three months ended September 30, 2013. The decrease is primarily related to the reduction in employee salaries and benefits associated with the fulfillment of website management services of $259,000 and customer service cost for website hosting of $37,000.

Research and Development

Research and development expenses consist primarily of salaries and benefits which are attributable to the development of our website development software products. Research and development expenses increased 4% or $7,000, to $180,000 for the three months ended September 30, 2014 as compared to $173,000 for the three months ended September 30, 2013. The increase was primarily due to salaries and expenses related to the continued development of our website development software.

Selling and Marketing

Selling and marketing expenses consist primarily of salaries and benefits, as well as advertising expenses. Selling and marketing expense decreased 93% or $138,000, to $10,000 for the three months ended September 30, 2014 as compared to $148,000 for the three months ended September 30, 2013. This decrease was primarily attributable to the decrease in allocated salaries and benefits based on reduced sales.

General and Administrative

General and administrative expenses consist of salaries and related expenses for executives, administrative personnel, legal, rent, accounting and other professional services, and other general corporate expenses. General and administrative expenses decreased 55% or $718,000, to $594,000 for the three months ended September 30, 2014 as compared to $1,312,000 for the three months ended September 30, 2013. The decrease in general and administrative expenses is primarily due to less of an allocation of corporate general and administrative expenses due to the 60% reduction in revenue for the three months ended September 30, 2014 compared to the three months ended September 30, 2013, and a company-wide reduction in general and administrative expenses as we continue to cut unnecessary expenses.

Other Income

Other income primarily relates to interest earned on EPTAs, which generally carry an 18% simple interest rate. Other income decreased 62% or $61,000, to $37,000 for the three months ended September 30, 2014 as compared to $98,000 for the three months ended September 30, 2013. The decrease primarily relates to the decrease in the outstanding EPTA balance to $247,000 as of September 30, 2014 compared to $644,000 at September 30, 2013.

Nine months ended September 30, 2014 compared to nine months ended September 30, 2013

Revenue

Web Services segment revenue decreased 60% or $3,963,000, to $2,652,000 for the nine months ended September 30, 2014 as compared to $6,615,000 for the nine months ended September 30, 2013. The decrease in revenue is primarily related to the decrease in cash collected on EPTAs of $2,388,000 and our shift in focus to only providing web services to enterprise-sized customers resulting in a decrease of $1,115,000 and a decrease in Website hosting revenue of $337,000. Revenue from Web Services segment is generated primarily through website hosting and Search Engine Optimization ("SEO") services, search engine management services, conversion rate optimization services, and website design and development services. A substantial portion of Web Services segment's revenue is generated through three to twelve-month service contracts.

Below is a table which displays the Web Services segment revenue backlog as of January 1, 2014 and 2013, and September 30, 2014 and 2013, which is expected to be recognized as revenue within the next twelve months (in thousands):

Web Services backlog as of January 1, 2014	$553
Web Services backlog as of September 30, 2014	$66
Web Services backlog as of January 1, 2013	$1,135
Web Services backlog as of September 30, 2013	$760

Revenue related to cash collected under EPTA agreements decreased 79% or $2,273,000, to $585,000 for the nine months ended September 30, 2014 as compared to $2,869,000 for the nine months ended September 30, 2013. Our typical EPTA agreement has a term of two to three years. As such, while we no longer plan to offer EPTAs to our customers as a result of the suspension of our direct mail seminar sales, we will continue to recognize revenue from those EPTA contracts executed prior to July 2011 as cash is collected from those contracts. EPTAs were originally recognized in our balance sheet, net of an allowance for doubtful accounts, through our deferred revenue balance. The remaining deferred revenue balance is expected to be recognized as revenue, however, at a decreasing rate over the next year to eighteen months. The following table summarizes the activity within deferred revenue for the nine months ended September 30, 2014 and 2013 (in thousands):

EPTA deferred revenue as of January 1, 2014	$545
Cash collected on principal of EPTA contracts	(585)
Adjustments of EPTA deferred revenue	246
EPTA deferred revenue as of September 30, 2014	$206
EPTA deferred revenue as of January 1, 2013	$3,173
Cash collected on principal of EPTA contracts	(2,869)
Adjustments of EPTA deferred revenue	340
EPTA deferred revenue as of September 30, 2013	$644

Revenue related to cash collected on previously written off bad debt decreased 30% or $102,000, to $239,000 for the nine months ended September 30, 2014 as compared to $341,000 for the nine months ended September 30, 2013.

Commissions from third parties and other revenue decreased 56% or $126,000, to $98,000 for the nine months ended September 30, 2014 as compared to $224,000 for the nine months ended September 30, 2013. The decrease in commissions was primarily due to the suspension our direct mail seminar sales channel. As a result of this decision,

we no longer send leads to third parties, and as such, we do not expect this revenue source to be significant in the future.

Cost of Revenue

Cost of revenue consists primarily of salaries and related expenses related to fulfillment of our web management services and customer service. Cost of revenue decreased 61% or $927,000, to $603,000 for the nine months ended September 30, 2014 as compared to $1,530,000 for the nine months ended September 30, 2013. The decrease is primarily related to the reduction in employee salaries and benefits associated with the fulfillment of service of the web management services of $677,000, customer service costs for website hosting of $204,000, and processing fees of $44,000.

Research and Development

Research and development expenses consist primarily of salaries and benefits which are attributable to the development of our web development software products. Research and development expenses decreased 1% or $6,000, to $523,000 for the nine months ended September 30, 2014 as compared to $529,000 for the nine months ended September 30, 2013.

Selling and Marketing

Selling and marketing expenses consist primarily of salaries and benefits, as well as advertising expenses. Selling and marketing expense decreased 92% or $700,000, to $61,000 for the nine months ended September 30, 2014 as compared to $761,000 for the nine months ended September 30, 2013. This decrease was primarily attributable to the decrease in allocated salaries and benefits based on reduced sales.

General and Administrative

General and administrative expenses consist of salaries and related expenses for executives, administrative personnel, legal, rent, accounting and other professional services, and other general corporate expenses. General and administrative expenses decreased 45% or $1,668,000, to $2,070,000 for the nine months ended September 30, 2014 as compared to $3,738,000 for the nine months ended September 30, 2013. The decrease in general and administrative expenses is primarily due to less of an allocation of corporate general and administrative expenses due to the 60% reduction in revenue for the nine months ended September 30, 2014 compared to the nine months ended September 30, 2013, and a company-wide reduction in general and administrative expenses as we continue to cut unnecessary expenses.

Other Income

Other income primarily relates to interest earned on EPTAs, which generally carry an 18% simple interest rate. Other income decreased 64% or $272,000, to $155,000 for the nine months ended September 30, 2014 as compared to $427,000 for the nine months ended September 30, 2013. The decrease primarily relates to the decrease in the outstanding EPTA balance to $247,000 as of September 30, 2014 compared to $644,000 at September 30, 2013.

Liquidity and Capital Resources

The Company has transformed into a start-up company with the inherent risks and uncertainties of funding operations until profitability is achieved. We currently plan to fund our operations during the next twelve months using our cash and cash equivalents of $1,861,000. However, after considering the Company’s historical negative cash flow from operating activities as well as internal forecasts, such amount does not appear adequate to fund our anticipated cash needs for the next twelve months. Accordingly, the Company will be required to obtain additional debt or equity financing such as that available from its CEO to sustain operations. The Company received a commitment from the

CEO, and major shareholder, in July 2014 that he would provide the necessary level of financial support to enable the Company to pay its debts as they become due through November 15, 2015. Based on such commitment, the Company believes it will have sufficient funds to sustain its operations during the next twelve months as a result of the sources of funding detailed above.

Working Capital

Working capital decreased 50% or $1,423,000, to $1,426,000 for the nine months ended September 30, 2014 as compared to $2,849,000 for the year ended December 31, 2013. Working capital, excluding deferred revenue, decreased 43% or $1,742,000, to $2,306,000 as of September 30, 2014 as compared to $4,048,000 as of December 31, 2013. Deferred revenue balances represent historical contract sales for which we cannot immediately recognize revenue. We currently anticipate that the costs and expenses we will incur as these deferred revenue amounts are recognized as revenue will be insignificant. Consequently, we do not consider deferred revenue to be a factor that impacts our future cash requirements. The decrease in working capital excluding deferred revenue is primarily attributable to the decrease in revenue from our StoresOnline segment EPTA accounts receivable collections, resulting in the use of our cash and cash equivalents to fund operating activities.

Cash and Cash Equivalents

Cash and cash equivalents decreased 39% or $1,215,000, to $1,861,000 at September 30, 2014 as compared to $3,076,000 as of December 31, 2013. During the nine months ended September 30, 2014, we used $3,016,000 in cash for operating activities, investing activities provided $1,807,000, and used $6,000 in cash for financing activities.

Trade Receivables

Current and long-term trade receivables, net of allowance for doubtful accounts, decreased 39% or $467,000, to $739,000 at September 30, 2014 as compared to $1,206,000 at December 31, 2013. Long-term trade receivables, net of allowance for doubtful accounts, decreased 26% or $30,000, to $86,000 at September 30, 2014 as compared to $116,000 at December 31, 2013. We offer our customers a contract with payment terms between 24 and 36 months, as one of several payment options. The payments that become due more than 12 months after the end of the fiscal period are classified as long-term trade receivables. The decrease in our accounts receivable balance at September 30, 2014 is primarily related to cash collections of EPTA agreements of $293,000 for the nine month period ended September 30, 2014 and adjustments to EPTA receivables.

Accounts Payable

Accounts payable decreased 13% or $27,000, to $174,000 at September 30, 2014 as compared to $201,000 at December 31, 2013. Our accounts payable as of September 30, 2014 were generally within our vendors' terms of payment.

Capital

Total stockholders' equity decreased 43% or $2,868,000, to $3,833,000 at September 30, 2014 as compared to $6,701,000 at December 31, 2013. The significant changes in stockholders' equity during the nine months ended September 30, 2014 included an increase of additional paid-in capital of $612,000 for options granted, $48,000 in proceeds from stock option exercises, $134,000 for issuance of common stock related to the acquisition of One Stop Voice (Note 9), and $966,000 for issuance of common stock related to the prepayment of rent on the corporate headquarters (Note 10). In addition, we had a net loss of $4,628,000 for the nine month period ending September 30, 2014.

Off Balance Sheet Arrangements

As of June 30, 2014, we are not involved in any off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.Impact of Recent Accounting Pronouncements

Recently Issued Accounting Pronouncements - In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09 that introduces a new five-step revenue recognition model in which an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires disclosures sufficient to enable users to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers, including qualitative and quantitative disclosures about contracts with customers, significant judgments and changes in judgments, and assets recognized from the costs to obtain or fulfill a contract. This standard is effective for fiscal years beginning after December 15, 2016, including interim periods within that reporting period. The Company is currently evaluating the new guidance to determine the impact it will have on its consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. This ASU requires that a performance target that affects vesting and could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in ASC 718, Compensation-Stock Compensation, as it relates to such awards. ASU 2014-12 is effective for us in our first quarter of fiscal 2017 with early adoption permitted using either of two methods: (i) prospective to all awards granted or modified after the effective date; or (ii) retrospective to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter, with the cumulative effect of applying ASU 2014-12 as an adjustment to the opening retained earnings balance as of the beginning of the earliest annual period presented in the financial statements. The Company is currently assessing the impact of this pronouncement to its consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15. This ASU requires management to assess an entity’s ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards. Specifically, the ASU (1) provides a definition of the term substantial doubt, (2) requires an evaluation every reporting period including interim periods, (3) provides principles for considering the mitigating effect of management’s plans, (4) requires certain disclosures when substantial doubt is alleviated as a result of consideration of management’s plans, (5) requires an express statement and other disclosures when substantial doubt is not alleviated, and (6) requires an assessment for a period of one year after the date that the financial statements are issued (or available to be issued). This standard is effective for the fiscal years ending after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. The Company is currently evaluating the new guidance to determine the impact it will have on its consolidated financial statements.

Forward-Looking Statements and Factors That May Affect Future Results and Financial Condition

With the exception of historical facts, the statements contained in Management's Discussion and Analysis of Financial Condition and Results of Operations are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, which reflect our current expectations and beliefs regarding our future results of operations, performance and achievements. These statements are subject to risks and uncertainties and are based upon assumptions and beliefs that may or may not materialize. These forward-looking statements include, but are not limited to, statements concerning:

our belief that our target market will increasingly look to Internet solutions providers who leverage industry and customer practices, increase predictability of success of their Internet initiatives and decrease implementation risks by providing low-cost, scalable solutions with minimal lead time;

our belief that we can compete successfully by relying on our infrastructure and marketing strategies as well as techniques, systems and procedures, and by adding additional products and services in the future;

our belief that we can continue our success by periodic review and revision of our methods of doing business and by continuing our expansion into domestic and international markets;

our belief that a key component of our success comes from a number of new, recently developed proprietary technologies and that these technologies and advances distinguish our services and products from our competitors and further help to substantially reduce our operating costs and expenses;

our contention that we do not offer our customers a "business opportunity" or a "franchise" as those terms are defined in applicable statutes of the states in which we operate;

our belief that there is a large, fragmented and under-served population of small businesses and entrepreneurs searching for professional services firms that offer business-to-consumer e-commerce solutions coupled with support and continuing education;

our expectation that our offering of products and services will evolve as some products are replaced by new and enhanced products intended to help our customers achieve success with their Internet-related businesses;

our expectation that the costs and expenses we incur will be insignificant as deferred revenue amounts are recognized as product and other revenues when cash is collected.

We caution readers that our operating results are subject to various risks and uncertainties that could cause our actual results and outcomes to differ materially from those discussed or anticipated, including changes in economic conditions and internet technologies, interest rate fluctuations, and the factors set forth in the section entitled, "Risk Factors," under Part I, Item 1A of the 2013 Form 10-K. We also advise readers not to place any undue reliance on the forward-looking statements contained in this Form 10-Q, which reflect our beliefs and expectations only as of the date of this Report. We assume no obligation to update or revise these forward-looking statements to reflect new events or circumstances or any changes in our beliefs or expectations, other than as required by law.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Not required

Item 4. Controls and Procedures

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this Report, have concluded that, based on the evaluation of these controls and procedures, our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the nine months ended September 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

Item 1A. Risk Factors

There are many risk factors that may affect our business and the results of our operations, many of which are beyond our control. Information on certain risks that we believe are material to our business is set forth in "Part I – Item 1A. Risk Factors" of the 2013 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 6. Exhibits
