EXPLANATORY NOTE

On December 15, 2011, Tamir Biotechnology, Inc. (formerly Alfacell Corporation), hereafter (“Tamir”), filed a Current Report on Form 8-K (the “Original Report”) to disclose that it had received an initial payment and signed a Memorandum of Understanding to negotiate a License Agreement with a third party. Tamir is filing this amendment to the Original Report, to correct certain information contained in the Original Report. The following disclosure replaces the disclosure contained in the Original Report in its entirety.

Item 1.01 Entry into Material and Definitive Agreement

On January 13, 2012, Tamir entered into a Memorandum of Understanding (MOU) with US Pharmacia (and including its affiliates “USPI”), pursuant to which Tamir and USPI agreed to negotiate in good faith to enter into a definitive license agreement (the “License Agreement”) pursuant to which USPI will be granted the exclusive marketing, sales, and distribution rights for a topical formulation of ONCONASE® for use in treating patients with Human Papilloma Virus (HPV) in Europe. The terms of the proposed License Agreement shall be based on the terms of the MOU. Pursuant to the MOU it is anticipated that the License Agreement shall be completed within 60 days from the date of the MOU. Pursuant to an oral understanding of the parties, it is anticipated that, in addition to royalties on net sales and milestones for achieving certain regulatory approvals and sales goals, USPI shall pay Tamir the sum of \$1,000,000.00 in installments under the proposed License Agreement provided Tamir achieves certain pre-clinical milestones. On December 8, 2011, Tamir received an initial payment of \$405,000.00 pursuant to such oral understanding. It is anticipated that USPI shall pay Tamir the balance of \$595,000.00 in installments for the achievement by Tamir of various pre-clinical milestones to be included in the proposed License Agreement. One such milestone payment is expected to be related to Tamir providing USPI with a successful Proof of Concept drug compound for HPV by June 30, 2012.
