SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 001-33508

Limelight Networks, Inc.  
(Exact name of registrant as specified in its charter)

Delaware  
(State or other jurisdiction of  
incorporation or organization)  
222 South Mill Avenue, 8<sup>th</sup> Floor  
Tempe, AZ 85281

20-1677033  
(I.R.S. Employer  
Identification No.)

(Address of principal executive offices, including Zip Code)  
(602) 850-5000  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller Reporting Company   
(Do not check if a smaller reporting company)

Edgar Filing: Limelight Networks, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The number of shares outstanding of the registrant's Common Stock, par value \$0.001 per share, as of October 28, 2015: 101,005,854 shares.

Note Regarding Forward-Looking Statement

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements contained in this Quarterly Report on Form 10-Q, other than statements of historical fact, are forward-looking statements. These statements include, among other things:

- our expectations regarding revenue, costs and expenses;
- our plans regarding investing in our content delivery network, as well as other products and technologies;
- our beliefs regarding the growth of, and competition within, the content delivery industry;
- our beliefs regarding the growth of our business and how that impacts our liquidity and capital resources requirements;
- our expectations regarding headcount;
- the impact of certain new accounting standards and guidance;
- our plans with respect to investments in marketable securities;
- our expectations and strategies regarding acquisitions;
- our expectations regarding the Akamai litigation and other pending or potential disputes;
- our estimations regarding taxes and belief regarding our tax reserves;
- our beliefs regarding the use of Non-GAAP financial measures;
- our approach to identifying, attracting and keeping new and existing customers, as well as our expectations regarding customer turnover;
- the sufficiency of our sources of funding;
- our belief regarding our interest rate risk; and
- our beliefs regarding the significance of our large customers;

as well as other statements regarding our financial condition and prospects, future operations, and business strategies.

Forward-looking statements generally can be identified by the words “may,” “will,” “expect,” “believe,” “anticipate,” “intend,” “could,” “estimate,” or “continue,” and similar expressions. We have based these forward-looking statements largely on our current expectations and projections about future events, as well as trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives, and financial needs. These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including those described under the caption “Risk Factors” in Part II, Item 1A in this Quarterly Report on Form 10-Q and those discussed in other documents we file with the Securities and Exchange Commission (SEC).

In addition, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the future events and trends discussed in this Quarterly Report on Form 10-Q may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

Unless expressly indicated or the context requires otherwise, the terms "Limelight," "we," "us," and "our" in this document refer to Limelight Networks, Inc., a Delaware corporation, and, where appropriate, its wholly owned subsidiaries.

Limelight Networks, Inc.

Notes to Unaudited Consolidated Financial Statements

September 30, 2015

1. Nature of Business

Limelight operates a globally distributed, high-performance network and provides a suite of integrated services including content delivery services, video content management services, performance services for website and web application acceleration and security, and cloud storage services.

We were incorporated in Delaware in 2003, and have operated in the Phoenix metropolitan area since 2001 and elsewhere throughout the United States since 2003. We began international operations in 2004.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. They do not include all of the information and footnotes required by U.S. generally accepted accounting principles (U.S. GAAP) for complete financial statements. Such interim financial information is unaudited but reflects all adjustments that are, in the opinion of management, necessary for the fair presentation of the interim periods presented and of a normal recurring nature. The results of operations presented in this quarterly report on Form 10-Q are not necessarily indicative of the results that may be expected for the year ending December 31, 2015, or for any future periods. This quarterly report on Form 10-Q should be read in conjunction with our audited financial statements and footnotes included in our annual report on Form 10-K for the fiscal year ended December 31, 2014. All information is presented in thousands, except per share amounts and where specifically noted.

The consolidated financial statements include accounts of Limelight and our wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated. In addition, certain other reclassifications have been made to prior year amounts to conform to the current year presentation.

Use of Estimates

The preparation of the consolidated financial statements and related disclosures in conformity with U.S. GAAP requires management to make judgments, assumptions, and estimates that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results and outcomes may differ from those estimates. The results of operations presented in this quarterly report on Form 10-Q are not necessarily indicative of the results that may be expected for the year ending December 31, 2015, or for any other future periods.

Recent Accounting Standards

Recently Adopted Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-08, which includes amendments that change the requirements for reporting discontinued operations and require additional disclosures about discontinued operations. Under the new guidance, only disposals representing a strategic shift in operations - that is, a major effect on the organization's operations and financial results - should be presented as discontinued operations. Examples include a disposal of a major geographic area, a major line of business, or a major equity method investment. Additionally, this ASU requires expanded disclosures about discontinued operations that will provide financial statement users with more information about the assets, liabilities, income, and expenses of discontinued operations. We adopted this guidance on January 1, 2015. The new guidance would only impact us upon the disposal of a business.

Recently Issued Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, which provides guidance for revenue recognition. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under today's guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In August 2015, the FASB issued ASU 2015-14, which defers the effective date of ASU 2014-09 for all

entities by one year. Accordingly, public business entities should apply the guidance in ASU 2014-09 to annual reporting periods (including interim periods within those periods)

8

---

Table of Contents

beginning after December 15, 2017. Early adoption is permitted but not before annual periods beginning after December 15, 2016. The standard permits the use of the retrospective or the modified approach method. We have not yet selected a transition method, and are currently in the process of evaluating the impact of adoption of this ASU on our consolidated financial statements and disclosures.

In August 2014, the FASB issued ASU 2014-15, which provides guidance for disclosure of uncertainties about an entity's ability to continue as a going concern. ASU 2014-15 defines management's responsibility to assess an entity's ability to continue as a going concern, and to provide related footnote disclosures in certain circumstances. This guidance will be effective for us in the first annual period ending after December 15, 2016, and interim periods within such year; however, early adoption is permitted. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In February 2015, the FASB issued ASU 2015-02, which provides a revised consolidation model for all reporting entities to use in evaluating whether they should consolidate certain legal entities. All legal entities will be subject to reevaluation under this revised consolidation model. The revised consolidation model, among other things, (i) modifies the evaluation of whether limited partnerships and similar legal entities are variable interest entities (VIEs) or voting interest entities, (ii) eliminates the presumption that a general partner should consolidate a limited partnership, and (iii) modifies the consolidation analysis of reporting entities that are involved with VIEs through fee arrangements and related party relationships. ASU 2015-2 is effective for fiscal years, and interim reporting periods within those fiscal years, beginning after September 1, 2016. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-03, which requires that all costs incurred to issue debt be presented in the balance sheet as a direct deduction from the carrying value of the debt, similar to the presentation of debt discounts. ASU 2015-03 is effective for public business entities for fiscal years beginning after December 15, 2015 and interim periods within those fiscal years, with early adoption permitted. We do not expect that the adoption of this standards update will have a material impact on our consolidated financial statements.

In August 2015, the FASB issued ASU No. 2015-15, which clarifies the treatment of debt issuance costs from line-of-credit arrangements after the adoption of ASU 2015-03. In particular, ASU 2015-15 clarifies that the SEC staff would not object to an entity deferring and presenting debt issuance costs related to a line-of-credit arrangement as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of such arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. We believe the adoption of ASU 2015-15 will not have a material impact on our consolidated financial statements.

In April 2015, the FASB issued ASU 2015-05, which provides guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance will not change U.S. GAAP for a customer's accounting for service contracts. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In June 2015, the FASB issued ASU 2015-10, which covers a wide range of topics in the codification. The amendments in this update represent changes to clarify the codification, correct unintended application of guidance, or make minor improvements to the codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost on most entities. We do not anticipate that the adoption of this standard will have a material impact on our consolidated financial statements and footnote disclosures.

In September 2015, the FASB issued ASU No. 2015-16 which requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. Prior to the issuance of the standard, entities were required to retrospectively apply adjustments made to provisional amounts recognized in a business combination. ASU 2015-16 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2015, and early adoption is permitted. We do not expect that the adoption of this standards update will have a material impact on our consolidated financial

statements.

Table of Contents

## 3. Investments in Marketable Securities

The following is a summary of marketable securities, designated as available-for-sale, at September 30, 2015:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Certificate of deposits	\$14,880	\$11	\$9	\$14,882
Corporate notes and bonds	19,283	19	21	19,281
Total marketable securities	\$34,163	\$30	\$30	\$34,163

At September 30, 2015, we evaluated our marketable securities and determined unrealized losses were due to fluctuations in interest rates. We do not believe any of the unrealized losses represented an other-than-temporary impairment based on our evaluation of available evidence as of September 30, 2015. Our intent is to hold these investments to such time as these assets are no longer impaired. We view our available-for-sale securities as available to fund current operations.

The amortized cost and estimated fair value of the marketable debt securities at September 30, 2015, by maturity, are shown below:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Available-for-sale securities				
Due in one year or less	\$20,119	\$17	\$2	\$20,134
Due after one year and through five years	14,044	13	28	14,029
	\$34,163	\$30	\$30	\$34,163

The following is a summary of marketable securities, designated as available-for-sale, at December 31, 2014:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Certificate of deposit	\$11,040	\$2	\$32	\$11,010
Commercial paper	1,498	—	1	1,497
Corporate notes and bonds	21,876	7	33	21,850
Convertible debt securities	1,000	—	—	1,000
Total marketable securities	\$35,414	\$9	\$66	\$35,357

The amortized cost and estimated fair value of the marketable debt securities at December 31, 2014, by maturity, are shown below:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Available-for-sale securities				
Due in one year or less	\$19,798	\$5	\$9	\$19,794
Due after one year and through five years	15,616	4	57	15,563
	\$35,414	\$9	\$66	\$35,357

## 4. Accounts Receivable, net

Accounts receivable, net include:

	September 30, 2015	December 31, 2014
Accounts receivable	\$28,865	\$24,456
Less: credit allowance	(460)	(380)
Less: allowance for doubtful accounts	(1,254)	(1,454)
Total accounts receivable, net	\$27,151	\$22,622

Table of Contents

## 5. Goodwill

We have recorded goodwill as a result of past business acquisitions. Goodwill is recorded when the purchase price paid for an acquisition exceeds the estimated fair value of the net identified tangible and intangible assets acquired. In each of our acquisitions, the objective of the acquisition was to expand our product offerings and customer base and to achieve synergies related to cross selling opportunities, all of which contributed to the recognition of goodwill.

We test goodwill for impairment on an annual basis or more frequently if events or changes in circumstances indicate that goodwill might be impaired. We concluded that we have one reporting unit and assigned the entire balance of goodwill to this reporting unit. The estimated fair value of the reporting unit is determined using our market capitalization as of our annual impairment assessment date or each reporting date if circumstances indicate the goodwill might be impaired. Items that could reasonably be expected to negatively affect key assumptions used in estimating fair value include but are not limited to:

- sustained decline in our stock price due to a decline in its financial performance due to the loss of key customers, loss of key personnel, emergence of new technologies or new competitors;
- decline in overall market or economic conditions leading to a decline in our stock price; and
- decline in observed control premiums paid in business combinations involving comparable companies.

No interim indicators of impairment were identified as of September 30, 2015. Foreign currency translation adjustments decreased the carrying amount of goodwill for the three and nine months ended September 30, 2015, by \$285 and \$37, respectively.

## 6. Property and Equipment, net

Property and equipment, net include:

	September 30, 2015	December 31, 2014
Network equipment	\$ 139,047	\$ 127,962
Computer equipment and software	11,208	9,079
Furniture and fixtures	2,491	2,498
Leasehold improvements	5,440	5,262
Other equipment	173	186
Total property and equipment	158,359	144,987
Less: accumulated depreciation and amortization	(118,282 )	(112,351 )
Total property and equipment, net	\$ 40,077	\$ 32,636

Depreciation and amortization expense related to property and equipment classified in operating expense was \$445 and \$566 for the three months ended September 30, 2015 and 2014, respectively, and was \$1,322 and \$1,934 for the nine months ended September 30, 2015 and 2014, respectively.

## 7. Other Current Liabilities

Other current liabilities include:

	September 30, 2015	December 31, 2014
Accrued compensation and benefits	\$ 5,980	\$ 5,266
Accrued cost of revenue	2,983	2,031
Deferred rent	923	1,277
Accrued legal fees	62	1,292
Other accrued expenses	3,024	4,517
Total other current liabilities	\$ 12,972	\$ 14,383

Table of Contents

## 8. Other Long Term Liabilities

Other long term liabilities include:

	September 30, 2015	December 31, 2014
Deferred rent	\$1,934	\$2,511
Income taxes payable	420	529
Total other long term liabilities	\$2,354	\$3,040

## 9. Contingencies

## Legal Matters

## Akamai Litigation

In June 2006, Akamai Technologies, Inc. (Akamai) and the Massachusetts Institute of Technology (MIT) filed a lawsuit against us in the United States District Court for the District of Massachusetts alleging that we were infringing two patents assigned to MIT and exclusively licensed by MIT to Akamai, United States Patent No. 6,553,413 (the '413 patent) and United States Patent No. 6,108,703 (the '703 patent). In September 2006, Akamai and MIT expanded their claims to assert infringement of a third patent United States Patent No. 7,103,645 (the '645 patent). Before trial, Akamai waived by stipulation its claims of indirect or induced infringement and proceeded to trial only on the theory of direct infringement. In February 2008, a jury returned a verdict in this lawsuit, finding that we infringed four claims of the '703 patent at issue and rejecting our invalidity defenses. The jury awarded an aggregate of approximately \$45,500, which includes lost profits, reasonable royalties and price erosion damages for the period April 2005 through December 31, 2007. In addition, the jury awarded prejudgment interest, which we estimated to be \$2,600 at December 31, 2007. We recorded an aggregate \$48,100 as a provision for litigation as of December 31, 2007. During 2008, we recorded a potential additional provision of approximately \$17,500 for potential additional infringement damages and interest. The total provision for litigation at December 31, 2008 was \$65,600.

On July 1, 2008, the District Court denied our Motions for Judgment as a Matter of Law (JMOL), Obviousness, and a New Trial. The District Court also denied Akamai's Motion for Permanent Injunction as premature and its Motions for Summary Judgment regarding our equitable defenses. The District Court conducted a bench trial in November 2008 regarding our equitable defenses. We also filed a motion for reconsideration of the District Court's earlier denial of our motion for JMOL. Our motion for JMOL was based largely upon a clarification in the standard for a finding of joint infringement articulated by the United States Court of Appeals for the Federal Circuit in the case of Muniauction, Inc. v. Thomson Corp., released after the District Court denied our initial motion for JMOL. On April 24, 2009, the District Court issued its order and memorandum setting aside the adverse jury verdict and ruling that we did not infringe Akamai's '703 patent and that we were entitled to JMOL. Based upon the District Court's April 24, 2009 order, we reversed the \$65,600 provision for litigation previously recorded for this lawsuit as we no longer believed that payment of any amounts represented by the litigation provision was probable. The District Court entered final judgment in our favor on May 22, 2009, and Akamai filed its notice of appeal of the District Court's decision on May 26, 2009. On December 20, 2010, the United States Court of Appeals for the Federal Circuit issued its opinion affirming the District Court's entry of judgment in our favor. On February 18, 2011, Akamai filed a motion with the Federal Circuit seeking a rehearing and rehearing en banc. On April 21, 2011, the Federal Circuit issued an order denying the petition for rehearing, granting the petition for rehearing en banc, vacating the December 20, 2010 opinion affirming the District Court's entry of judgment in our favor, and reinstated the appeal.

On August 31, 2012, the Federal Circuit issued its opinion in the case. The Federal Circuit stated that the District Court correctly determined that we did not directly infringe Akamai's '703 patent and upheld the District Court's decision to vacate the original jury's damages award. The Federal Circuit also held that we did not infringe Akamai's '413 or '645 patents. A slim majority in this three-way divided opinion also announced a revised legal theory of induced infringement, remanded the case to the District Court, and gave Akamai an opportunity for a new trial to attempt to prove that we induced our customers to infringe Akamai's patent under the Federal Circuit's new legal standard. On December 28, 2012, we filed a petition for writ of certiorari to the United States Supreme Court to appeal this sharply divided Federal Circuit decision. Akamai then filed a cross petition for consideration of the Court of Appeals' standard for direct infringement followed by an opposition to our petition. On January 10, 2014, the

Supreme Court granted our petition for writ of certiorari and did not act on Akamai's cross petition. On April 30, 2014, the Supreme Court heard oral argument in our case. On June 2, 2014, the Supreme Court issued its decision and reversed the Federal Circuit's decision, remanding the case back to that court.

Following the Supreme Court decision, on July 24, 2014, the Federal Circuit issued an order vacating its prior judgment, reinstating the appeals, dissolving its en banc status, and referring the case back to the original Court of Appeals

Table of Contents

panel for further proceedings. The Federal Circuit heard arguments on September 11, 2014, and on May 13, 2015, the Federal Circuit issued its opinion in the case, holding that we did not infringe Akamai's '703 patent. On June 12, 2015, Akamai filed a motion with the Federal Circuit seeking a rehearing en banc. On August 13, 2015, the Federal Circuit reversed its earlier decisions in our favor and reinstated the 2008 jury verdict holding us liable for direct infringement of the '703 patent. As a result of this reversal and due to the complexity of the remaining matters outstanding and the procedural status of the case, we believe a loss is reasonably possible, but not probable. If the ultimate outcome were to be unfavorable, we have estimated the loss could be up to \$76,000. We intend to continue vigorously defending our position in this ongoing dispute. As of September 30, 2015, we have not recorded a provision for a loss contingency related to this allegation in our consolidated financial statements.

Legal and other expenses associated with this case have been significant. We include these litigation expenses in general and administrative expenses as incurred, as reported in the consolidated statement of operations.

**Other Litigation**

We are subject to various other legal proceedings and claims, either asserted or unasserted, arising in the ordinary course of business. While the outcome of these claims cannot be predicted with certainty, management does not believe the outcome of any of these matters will have a material adverse effect on our business, financial position, results of operations, or cash flows. Litigation relating to the content delivery services industry is not uncommon, and we are, and from time to time have been, subject to such litigation. No assurances can be given with respect to the extent or outcome of any such litigation in the future.

**Other Matters**

We are subject to indirect taxation in various states and foreign jurisdictions. Laws and regulations that apply to communications and commerce conducted over the Internet are becoming more prevalent, both in the United States and internationally, and may impose additional burdens on us conducting business online or providing Internet-related services. Increased regulation could negatively affect our business directly, as well as the businesses of our customers, which could reduce their demand for our services. For example, tax authorities in various states and abroad may impose taxes on the Internet-related revenue we generate based on regulations currently being applied to similar but not directly comparable industries.

There are many transactions and calculations where the ultimate tax determination is uncertain. In addition, domestic and international taxation laws are subject to change. In the future, we may come under audit, which could result in changes to our tax estimates. We believe we maintain adequate tax reserves to offset potential liabilities that may arise upon audit. Although we believe our tax estimates and associated reserves are reasonable, the final determination of tax audits and any related litigation could be materially different than the amounts established for tax contingencies. To the extent these estimates ultimately prove to be inaccurate, the associated reserves would be adjusted, resulting in the recording of a benefit or expense in the period in which a change in estimate or a final determination is made.

**10. Net Loss per Share**

We calculate basic and diluted earnings per weighted average share based on net loss. We use the weighted-average number of shares of common stock outstanding during the period for the computation of basic earnings per share. Diluted earnings per share includes the dilutive effect of all potentially dilutive common stock, including awards granted under our equity incentive compensation plans in the weighted-average number of shares of common stock outstanding.

Table of Contents

The following table sets forth the components used in the computation of basic and diluted net loss per share for the periods indicated:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Loss from continuing operations	\$(7,762	) \$(5,071	) \$(19,807	) \$(19,849
(Loss) income from discontinued operations	\$—	) \$(4	) \$—	) \$265
Net loss	\$(7,762	) \$(5,075	) \$(19,807	) \$(19,584
Basic and diluted weighted average outstanding shares of common stock	100,552	98,458	99,676	98,274
Basic and diluted net loss per share:				
Continuing operations	\$(0.08	) \$(0.05	) \$(0.20	) \$(0.20
Discontinued operations	—	—	—	—
Total	\$(0.08	) \$(0.05	) \$(0.20	) \$(0.20

For the three months ended September 30, 2015 and 2014, potentially dilutive common stock, including awards granted under our equity incentive compensation plans of 3,597 (stock options 1,333, restricted stock units 1,760, employee stock purchase plan 504) and 2,593 (stock options 748, restricted stock units 1,738, employee stock purchase plan 107), respectively, were excluded from the computation of diluted net loss per share because including them would have been anti-dilutive.

For the nine months ended September 30, 2015 and 2014, potentially dilutive common stock, including awards granted under our equity incentive compensation plans of 5,065 (stock options 1,843, restricted stock units 2,718, employee stock purchase plan 504) and 2,323 (stock options 653, restricted stock units 1,563, employee stock purchase plan 107), respectively, were excluded from the computation of diluted net loss per share because including them would have been anti-dilutive.

## 11. Stockholders' Equity

### Common Stock

On February 12, 2014, our board of directors authorized a \$15,000 share repurchase program. Under this authorization, we may repurchase shares periodically in the open market or through privately negotiated transactions, in accordance with applicable securities rules regarding issuer repurchases. We did not purchase any shares during the three months ended September 30, 2015. During the nine months ended September 30, 2015, we purchased and canceled 293 shares for \$818, including commissions and expenses. During the three and nine months ended September 30, 2014, we purchased and canceled approximately 447 and 947 shares, respectively, for approximately \$1,267 and \$2,500, respectively, including commissions and expenses. All repurchased shares were canceled and returned to authorized but unissued status.

### Employee Stock Purchase Plan

In June 2013, our stockholders approved our 2013 Employee Stock Purchase Plan (ESPP). The ESPP allows participants to purchase our common stock at a 15% discount of the lower of the beginning or end of the offering period using the closing price on that day. We did not issue any shares under the ESPP during the three months ended September 30, 2015. During the nine months ended September 30, 2015, we issued 202 shares under the ESPP. Total cash proceeds from the purchase of shares under the ESPP was approximately \$451. As of September 30, 2015, shares reserved for issuance to employees under this plan totaled 3,394, and we held employee contributions of \$817 (included in other current liabilities) for future purchases under the ESPP.

## 12. Accumulated Other Comprehensive Loss

Changes in the components of accumulated other comprehensive loss, net of tax, for the nine months ended September 30, 2015, was as follows:

Table of Contents

	Foreign Currency		Unrealized Gains (Losses) on Available for Sale Securities	Total
Balance, December 31, 2014	\$(7,743	)	\$ (43	) \$ (7,786
Other comprehensive (loss) income before reclassifications	(3,184	)	58	(3,126
Amounts reclassified from accumulated other comprehensive income (loss)	—		—	—
Net current period other comprehensive (loss) income	(3,184	)	58	(3,126
Balance, September 30, 2015	\$(10,927	)	\$ 15	\$(10,912

## 13. Share-Based Compensation

The following table summarizes the components of share-based compensation expense included in our consolidated statement of operations:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Share-based compensation expense by type:				
Stock options	\$952	\$1,120	\$3,165	\$3,545
Restricted stock units	1,860	1,426	5,830	4,127
ESPP	312	41	478	128
Total share-based compensation expense	\$3,124	\$2,587	\$9,473	\$7,800
Share-based compensation expense included in the consolidated statements of operations:				
Cost of services	\$400	\$464	\$1,484	\$1,466
General and administrative expense	1,513	1,174	4,395	3,539
Sales and marketing expense	643	567	1,940	1,693
Research and development expense	568	382	1,654	1,102
Total share-based compensation expense	\$3,124	\$2,587	\$9,473	\$7,800

Unrecognized share-based compensation expense totaled approximately \$21,055 at September 30, 2015, of which \$6,480 related to stock options and \$14,575 related to restricted stock awards. We currently expect to recognize share-based compensation expense of \$2,882 during the remainder of 2015, \$10,047 in 2016 and the remainder thereafter based on scheduled vesting of the stock options and restricted stock units outstanding at September 30, 2015.

## 14. Leases and Commitments

## Operating Leases

We are committed to various non-cancellable operating leases for office space and office equipment that expire through 2022. Certain leases contain provisions for renewal options and rent escalations upon expiration of the initial lease terms. Approximate future minimum lease payments over the remaining lease periods as of September 30, 2015, are as follows:

Remainder of 2015	\$1,084
2016	3,817
2017	3,057
2018	2,841
2019	1,151
Thereafter	604
Total minimum payments	\$12,554

Table of Contents

## Purchase Commitments

We have long-term commitments for bandwidth usage and co-location with various networks and Internet service providers (ISPs).

The following summarizes minimum commitments as of September 30, 2015:

Remainder of 2015	\$12,127
2016	22,187
2017	6,030
2018	2,204
2019	715
Thereafter	78
Total minimum payments	\$43,341

## Capital Leases

We leased equipment under capital lease agreements that extended through 2017. The outstanding balance for capital leases was \$358 as of December 31, 2014. In March 2015, we paid \$323, which represented the outstanding balance of our capital lease obligations. As of September 30, 2015, we had no outstanding capital lease obligations. Interest expense for all periods presented was immaterial.

## 15. Concentrations

During the three and nine months ended September 30, 2015 and 2014, we had no customer who represented 10% or more of our total revenue.

Revenue from customers located within the United States, our country of domicile, was \$22,997 for the three months ended September 30, 2015, compared to \$21,536 for the three months ended September 30, 2014. For the nine months ended September 30, 2015, revenue from customers located within the United States was \$74,269, compared to \$70,820 for the nine months ended September 30, 2014.

During the three and nine months ended September 30, 2015 and 2014, we had two countries, based on customer location, the United States and Japan, that accounted for 10% or more of our total revenues.

## 16. Income Taxes

Income taxes for the interim periods presented have been included in the accompanying consolidated financial statements on the basis of an estimated annual effective tax rate. Based on an estimated annual effective tax rate and discrete items, income tax expense for the three months ended September 30, 2015 and 2014, was \$76 and \$98, respectively. For the nine months ended September 30, 2015 and 2014, income tax expense was \$221 and \$181, respectively. Income tax expense was different than the statutory income tax rate primarily due to us providing for a valuation allowance on deferred tax assets in certain jurisdictions, and the recording of state and foreign tax expense for the three and nine month periods.

We file income tax returns in jurisdictions with varying statutes of limitations. Tax years 2012 through 2014 remain subject to examination by federal tax authorities. Tax years 2011 through 2014 generally remain subject to examination by state tax authorities. As of September 30, 2015, our 2012 federal income tax return is under audit. As of September 30, 2015 we are not under any state examination for income taxes.

## 17. Segment Reporting and Geographic Areas

Our chief operating decision maker (whom is our Chief Executive Officer) reviews the financial information presented on a consolidated basis for purposes of allocating resources and evaluating our financial performance. We operate in one industry segment — content delivery and related services. We operate in three geographic areas — Americas, Europe, Middle East and Africa (EMEA) and Asia Pacific.

Revenue by geography is based on the location of the customer from which the revenue is earned. The following table sets forth revenue by geographic area:

Table of Contents

	Three Months Ended September 30,				Nine Months Ended September 30,							
	2015		2014		2015		2014					
Americas	\$24,541	58.4	%	\$23,553	60.4	%	\$78,768	61.5	%	\$76,757	63.2	%
EMEA	7,914	18.8	%	8,368	21.4	%	23,490	18.3	%	25,732	21.2	%
Asia Pacific	9,594	22.8	%	7,099	18.2	%	25,915	20.2	%	19,044	15.7	%
Total revenue	\$42,049	100.0	%	\$39,020	100.0	%	\$128,173	100.0	%	\$121,533	100.0	%

The following table sets forth long-lived assets by geographic area in which the assets are located:

	September 30, 2015	December 31, 2014
Americas	\$24,569	\$22,505
International	15,978	11,202
Total long-lived assets	\$40,547	\$33,707

## 18. Fair Value Measurements

As of September 30, 2015, and December 31, 2014, we held certain assets and liabilities that were required to be measured at fair value on a recurring basis.

The following is a summary of fair value measurements at September 30, 2015:

Description	Total	Fair Value Measurements at Reporting Date Using		
		Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Money market funds (2)	\$514	\$514	\$—	\$—
Corporate notes and bonds (1)	19,281	—	19,281	—
Certificate of deposit (1)	14,882	—	14,882	—
Total assets measured at fair value	\$34,677	\$514	\$34,163	\$—

(1) Classified in marketable securities

(2) Classified in cash and cash equivalents

The following is a summary of fair value measurements at December 31, 2014:

Description	Total	Fair Value Measurements at Reporting Date Using		
		Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Money market funds (2)	\$57	\$57	\$—	\$—
Corporate notes and bonds (1)	21,850	—	21,850	—
Commercial paper (1)	1,497	—	1,497	—
Certificate of deposit (1)	11,010	—	11,010	—
Convertible debt security (1)	1,000	—	—	1,000
Total assets measured at fair value	\$35,414	\$57	\$34,357	\$1,000

(1) Classified in marketable securities

(2) Classified in cash and cash equivalents

17

---

Table of Contents

During the nine months ended September 30, 2015, a \$1,000 convertible debt security, classified as Level 3 in the fair value hierarchy as of December 31, 2014, was converted into preferred shares of the issuing entity. As a result of the conversion, we recognized \$275 in gain, related to a beneficial conversion feature, which is included in other income (expense) in our statement of operations for the nine months ended September 30, 2015. After conversion, at September 30, 2015, the investment is carried at cost of \$1,275 and is evaluated for impairment quarterly or when events or changes in circumstances indicate the carrying value of the investment may exceed its fair value. We did not estimate the fair value of the investment because we did not identify any events or circumstances that would have a significant adverse effect on the fair value of the investment. Determining fair value is not practicable because the preferred shares are not publicly traded and information necessary to determine fair value is not available. The cost basis investment was reclassified to, and is included in, other assets in our consolidated balance sheet, and is no longer subject to fair value measurement disclosures and was accordingly transferred out of Level 3.

The carrying amount of cash equivalents approximates fair value because their maturity is less than three months. The carrying amount of short-term and long-term marketable securities approximates fair value as the securities are marked to market as of each balance sheet date with any unrealized gains and losses reported in stockholders' equity. The carrying amount of accounts receivable, accounts payable and accrued liabilities approximates fair value due to the short-term maturity of the amounts.

#### 19. Subsequent Events

In October 2015, our board of directors approved a restructuring and reduction in force plan of 44 employees, or approximately 8% of our global workforce. We estimate that we will incur restructuring charges in the quarter ended December 31, 2015 of approximately \$1,000, comprised of the write-off of intangible assets of \$500 and cash payments for severance costs of approximately \$500.

On November 2, 2015, we entered into a Credit Agreement with Silicon Valley Bank (SVB). The Credit Agreement provides for revolving credit borrowings up to a maximum principal amount of \$25,000. We are subject to a borrowing base calculation to determine the amount available to us. Our borrowing capacity is the lesser of the commitment amount or 80% of eligible accounts receivable. All outstanding borrowings owed under the Credit Agreement become due and payable no later than the final maturity date of November 2, 2017.

Borrowings under the Credit Agreement bear interest at our option of one, two, three or six-month LIBOR plus a margin of 2.75% or an Alternative Base Rate (ABR), which is defined as the higher of (a) Wall Street Journal prime rate or (b) Federal Funds Rate plus 0.50%, plus a margin of 0.50% or 1.50% depending on our minimum liquidity, as defined in the Credit Agreement. If we fall below a minimum liquidity of \$17,500, we are required to use the ABR interest rate. We incurred a commitment fee of 0.25% upon entering into the Credit Agreement and 0.20% to be paid on the one year anniversary of closing. In addition, there is an unused line fee of 0.375% if our minimum liquidity is greater than \$17,500. If our minimum liquidity falls below \$17,500, the unused line fee is 0.250%.

Any borrowings are secured by essentially all of our domestic personal property, with a negative pledge on intellectual property. SVB's security interest in our foreign subsidiaries is limited to 65% of voting stock of each such foreign subsidiary.

We are required to comply with various financial covenants under the Credit Agreement. Specifically, we are required to maintain a minimum tangible net worth, as defined in the Credit Agreement. In addition, we have a maximum unfinanced capital expenditures amount of \$30,000 for 2015 and \$25,000 per annum thereafter.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read together with our consolidated financial statements and related notes included in Part I, Item 1 of this Quarterly Report on Form 10-Q, as well as the audited consolidated financial statements and notes thereto and management's discussion and analysis of financial condition and results of operations for the year ended December 31, 2014, included in Part II of our annual report on Form 10-K filed with the SEC, on February 17, 2015.

Prior period information has been modified to conform to current year presentation. All information in this Item 2 is presented in thousands, except per share amounts, customer count and where specifically noted.

Overview

We were founded in 2001 as a provider of content delivery network services to deliver digital content over the Internet. We began development of our infrastructure in 2001 and began generating meaningful revenue in 2002.

Today, we operate a globally distributed, high-performance, computing platform (our global network) and provide a suite of integrated services including content delivery services, video content management services, performance services for website and web application acceleration and security, and cloud storage services.

We derive revenue primarily from the sale of components of the Orchestrate Platform. Our delivery services represented approximately 77% of our total revenue during the three and nine months ended September 30, 2015. We also generate revenue through the sale of professional services and other infrastructure services, such as transit and rack space services. We believe continued increases in content delivery traffic growth rates is an important trend that will continue to outpace declining average selling prices in the industry.

On August 13, 2015, the Federal Circuit reversed its earlier decisions in our favor and reinstated the 2008 jury verdict holding us liable for direct infringement of the '703 patent. As a result of this reversal and due to the complexity of the remaining matters outstanding and the procedural status of the case, we believe a loss is reasonably possible, but not probable. If the ultimate outcome were to be unfavorable, we have estimated the loss could be up to \$76,000. Please refer to Note 9 "Contingencies" of the Notes to Consolidated Financial Statements included in Part I of this Quarterly Report on Form 10-Q.

In October 2015, our board of directors approved a restructuring and reduction in force plan of 44 employees, or approximately 8% of our global workforce. The restructuring is part of an overall plan to create a more efficient, competitive and profitable company. We intend to reinvest the savings from the restructuring in our strategic priorities to drive growth. We estimate that we will incur restructuring charges in the quarter ended December 31, 2015 of approximately \$1,000, comprised of the write-off of intangible assets of \$500 and cash payments for severance costs of approximately \$500.

On November 2, 2015, we entered into a Credit Agreement with Silicon Valley Bank (SVB). The Credit Agreement provides for revolving credit borrowings up to a maximum principal amount of \$25,000. This Credit Agreement will provide additional liquidity as we continue to execute our growth strategy through innovative product development and select global market expansion.

We operate in markets that are highly competitive. We have experienced and expect to continue to experience increased competition in price, features, functionality, integration and other factors leading to customer churn and customers operating their own network. Although during the three and nine months ended September 30, 2015 and 2014, we had no customer who represented 10% or more of our total revenue, changes in revenue are driven by a small subset of large customers who have low contractually committed obligations.

In addition to these revenue-related trends, our profitability is impacted by trends in our costs of services and operating expenses. We continue to work with our vendors to renegotiate our fixed rate infrastructure contracts to variable rate in order to scale our operations based on traffic levels and lower bandwidth costs per unit. Our operating expenses are largely driven by payroll and related employee costs. We increased headcount from 520 at December 31, 2014, to 556 as of September 30, 2015, primarily in our research and development and sales organizations. Following our reduction in force in October 2015, we have approximately 512 employees.

Table of Contents

The following table summarizes our revenue, costs and expenses in thousands of dollars and as a percentage of total revenue.

	Three Months Ended September 30,					Nine Months Ended September 30,						
	2015		2014			2015		2014				
Revenues	\$42,049	100.0	%	\$39,020	100.0	%	\$128,173	100.0	%	\$121,533	100.0	%
Cost of revenue	26,138	62.2	%	22,879	58.6	%	77,594	60.5	%	74,251	61.1	%
Gross profit	15,911	37.8	%	16,141	41.4	%	50,579	39.5	%	47,282	38.9	%

## Use of Non-GAAP Financial Measures

To evaluate our business, we consider and use non-generally accepted accounting principles (Non-GAAP) net loss, EBITDA from continuing operations and Adjusted EBITDA as supplemental measures of operating performance. These measures include the same adjustments that management takes into account when it reviews and assesses operating performance on a period-to-period basis. We consider Non-GAAP net loss to be an important indicator of overall business performance. We define Non-GAAP net loss to be U.S. GAAP net loss, adjusted to exclude share-based compensation, litigation defense expenses, amortization of intangible assets, discontinued operations and the gain (loss) on sale of our web content management (WCM) business. We believe that EBITDA from continuing operations provides a useful metric to investors to compare us with other companies within our industry and across industries. We define EBITDA from continuing operations as U.S. GAAP net loss, adjusted to exclude interest and other (income) expense, interest expense, income tax expense, depreciation and amortization, discontinued operations and gain (loss) on sale of WCM. We define Adjusted EBITDA as EBITDA from continuing operations adjusted to exclude share-based compensation and litigation defense expenses. We use Adjusted EBITDA as a supplemental measure to review and assess operating performance. We also believe use of Adjusted EBITDA facilitates investors' use of operating performance comparisons from period to period, as well as across companies.

In our November 3, 2015, earnings press release, as furnished on Form 8-K, we included Non-GAAP net loss, EBITDA from continuing operations and Adjusted EBITDA. The terms Non-GAAP net loss, EBITDA from continuing operations and Adjusted EBITDA are not defined under U.S. GAAP, and are not measures of operating income, operating performance or liquidity presented in accordance with U.S. GAAP. Our Non-GAAP net loss, EBITDA from continuing operations and Adjusted EBITDA have limitations as analytical tools, and when assessing our operating performance, Non-GAAP net loss, EBITDA from continuing operations and Adjusted EBITDA should not be considered in isolation, or as a substitute for net loss or other consolidated income statement data prepared in accordance with U.S. GAAP. Some of these limitations include, but are not limited to:

• EBITDA from continuing operations and Adjusted EBITDA do not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;

• these measures do not reflect changes in, or cash requirements for, our working capital needs;

• these measures do not reflect the cash requirements necessary for litigation costs;  
• these measures do not reflect the interest expense, or the cash requirements necessary to service interest or principal payments, on our debt that we may incur;  
• these measures do not reflect income taxes or the cash requirements for any tax payments;  
• although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will be replaced sometime in the future, and EBITDA from continuing operations and Adjusted EBITDA do not reflect any cash requirements for such replacements;

Table of Contents

while share-based compensation is a component of operating expense, the impact on our financial statements compared to other companies can vary significantly due to such factors as the assumed life of the options and the assumed volatility of our common stock; and

other companies may calculate EBITDA from continuing operations and Adjusted EBITDA differently than we do, limiting their usefulness as comparative measures.

We compensate for these limitations by relying primarily on our U.S. GAAP results and using Non-GAAP net income (loss), EBITDA from continuing operations, and Adjusted EBITDA only as supplemental support for management's analysis of business performance. Non-GAAP net income (loss), EBITDA from continuing operations and Adjusted EBITDA are calculated as follows for the periods presented.

## Reconciliation of Non-GAAP Financial Measures

In accordance with the requirements of Item 10(e) of Regulation S-K, we are presenting the most directly comparable U.S. GAAP financial measures and reconciling the unaudited Non-GAAP financial metrics to the comparable U.S. GAAP measures.

Reconciliation of U.S. GAAP Net Loss to Non-GAAP Net Loss  
(Unaudited)

	Three Months Ended			Nine Months Ended	
	September 30, 2015	June 30, 2015	September 30, 2014	September 30, 2015	September 30, 2014

Table of Contents

## Critical Accounting Policies and Estimates

Our critical accounting policies and estimates are disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014. During the nine months ended September 30, 2015, there have been no significant changes in our critical accounting policies and estimates.

## Results of Continuing Operations

## Revenue

We derive revenue primarily from the sale of components of the Orchestrate Platform. We also generate revenue through the sale of professional services and other infrastructure services, such as transit and rack space services. The following table reflects our revenue for the three and nine months ended September 30, 2015, compared to the three and nine months ended September 30, 2014:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015	2014	\$ Change	% Change	2015	2014	\$ Change	% Change
Revenue	\$42,049	\$39,020	\$3,029	7.8 %	\$128,173	\$121,533	\$6,640	5.5 %

Our revenue increased during the three and nine months ended September 30, 2015, versus the comparable 2014 periods primarily due to an increase in our content delivery revenue, which was driven by volume increases with certain of our larger customers, partially offset by a decrease in average selling price.

The three and nine months ended September 30, 2014 included \$1,191 and \$11,417, respectively, of revenue from Netflix whose contract expired in July 2014. Our active customers worldwide decreased to 981 as of September 30, 2015, compared to 1,134 as of September 30, 2014. We are continuing our selective approach to accepting profitable business by establishing a clear process for identifying customers that value quality, performance, availability, and service.

During the three months ended September 30, 2015 and 2014, sales to our top 20 customers accounted for approximately 58% and 50%, respectively, of our total revenue. For the nine months ended September 30, 2015 and 2014, sales to our top 20 customers accounted for approximately 56% and 50%, respectively, of our total revenue. The customers that comprised our top 20 customers have continually changed, and our large customers may not continue to be as significant going forward as they have been in the past.

During the three and nine months ended September 30, 2015 and 2014, we had no customer who represented 10% or more of our total revenue.

Revenue by geography is based on the location of the customer from which the revenue is earned. The following table sets forth revenue by geographic area (in thousands and as a percentage of total revenue):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015	2014	%	%	2015	2014	%	%
Americas	\$24,541	\$23,553	58.4 %	60.4 %	\$78,768	\$76,757	61.5 %	63.2 %
EMEA	7,914	8,368	18.8 %	21.4 %	23,490	25,732	18.3 %	21.2 %
Asia Pacific	9,594	7,099	22.8 %	18.2 %	25,915	19,044	20.2 %	15.7 %
Total revenue	\$42,049	\$39,020	100.0 %	100.0 %	\$128,173	\$121,533	100.0 %	100.0 %

We invoice our customers primarily in U.S. dollars. However, we have certain customers invoiced in local currencies. The strengthening of the U.S. dollar compared to these local currencies resulted in a decrease in U.S. dollar revenues of approximately \$1,000 when comparing the average exchange rates for the three months ended September 30, 2015, versus the comparable 2014 period.

We expect revenues for the year ended December 31, 2015, to total between \$170,000 and \$174,000.

## Cost of Revenue

Cost of revenue consists primarily of fees paid to network providers for bandwidth and backbone, costs incurred for non-settlement free peering and connection to Internet Service Providers or ISPs, and fees paid to data center operators for

Table of Contents

housing of our network equipment in third party network data centers, also known as co-location costs. Cost of revenue also includes leased warehouse space and utilities, depreciation of network equipment used to deliver our content delivery services, payroll and related costs, and share-based compensation for our network operations and professional services personnel. Other costs include professional fees and outside services, travel and travel-related expenses and royalty expenses.

Cost of revenue was composed of the following (in thousands and as a percentage of total revenue):

	Three Months Ended September 30,			Nine Months Ended September 30,				
	2015	2014		2015	2014			
Bandwidth and co-location fees	\$15,207	36.2 %	\$12,027	30.8 %	\$44,023	34.3 %	\$41,449	34.1 %
Depreciation - network	4,636	11.0 %	4,207	10.8 %	13,164	10.3 %	12,688	10.4 %
Payroll and related employee costs	4,377	10.4 %	4,396	11.3 %	13,975	10.9 %	13,230	10.9 %
Share-based compensation	400	1.0 %	464	1.2 %	1,484	1.2 %	1,466	1.2 %
Other costs	1,518	3.6 %	1,785	4.6 %	4,948	3.9 %	5,418	4.5 %
Total cost of revenue	\$26,138	62.2 %	\$22,879	58.6 %	\$77,594	60.5 %	\$74,251	61.1 %

Our cost of revenue increased in aggregate dollars for the three and nine months ended September 30, 2015, versus the comparable 2014 periods. As a percentage of revenue, our cost of revenue increased during the three months ended September 30, 2015, and decreased for the nine months ended September 30, 2015, versus the comparable 2014 periods primarily as a result of the following:

increased bandwidth, peering and transit fees as a result of more traffic being delivered on our network. Additionally, during the three months ended September 30, 2014, we recorded a nonrecurring \$1,100 credit related to an over billing from one of our co-location providers; and

increased depreciation as a result of new servers and network equipment placed into service.

These increases were partially offset by decreases in other costs which were primarily other recurring cost of sales, professional fees, and other employee costs.

Effective April 1, 2015, we reorganized the job responsibilities of certain employees, and as a result, such employee expenses have moved from cost of services to research and development, on a prospective basis. This reorganization resulted in approximately \$650 of payroll and related employee costs in both the second and third quarters of 2015 being allocated to research and development, which were previously allocated to cost of services.

We anticipate an improvement in gross margin for the full year 2015 compared to 2014, and we anticipate that our depreciation expense related to our network equipment will increase compared to 2014, as we expect to increase our capital expenditures over 2014 levels.

#### General and Administrative

General and administrative expense was composed of the following (in thousands and as a percentage of total revenue)

	Three Months Ended September 30,			Nine Months Ended September 30,				
	2015	2014		2015	2014			
Payroll and related employee costs	\$2,544	6.1 %	\$2,553	6.5 %	\$8,255	6.4 %	\$7,714	6.3 %
Professional fees and outside services	896	2.1 %	2,177	5.6 %	3,376	2.6 %	4,928	4.1 %
Share-based compensation	1,513	3.6 %	1,174	3.0 %	4,395	3.4 %	3,539	2.9 %
Other costs	1,633	3.9 %	1,391	3.6 %	3,492	2.7 %	5,785	4.8 %
Total general and administrative	\$6,586	15.7 %	\$7,295	18.7 %	\$19,518	15.2 %	\$21,966	18.1 %

Our general and administrative expense decreased in aggregate dollars and as a percentage of total revenue for the three and nine months ended September 30, 2015, versus the comparable 2014 periods. For the three months ended September 30, 2015, the decreases were primarily as a result of the following:

decreased professional fees, primarily due to lower consulting and general legal fees.

Table of Contents

These decreases were partially offset by increased share-based compensation and increased other costs, which was primarily bad debt expense and litigation costs.

For the nine months ended September 30, 2015, the decreases were primarily as a result of the following:

- decreased other costs as a result of our negotiations with a vendor which reduced our legal fees by \$1,200, lower fees and licenses, and insurance; and

- decreased professional fees, primarily due to lower consulting and accounting fees.

These decreases were partially offset by increased payroll and related employee costs due to higher average salaries for general and administrative personnel and increased share-based compensation.

We expect our general and administrative expenses for 2015 to decrease from 2014 in aggregate dollars as a result of our restructuring.

**Sales and Marketing**

Sales and marketing expense was composed of the following (in thousands and as a percentage of total revenue):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015		2014		2015		2014	
Payroll and related employee costs	\$6,340	15.1 %	\$5,566	14.3 %	\$19,765	15.4 %	\$18,256	15.0 %
Share-based compensation	643	1.5 %	567	1.5 %	1,940	1.5 %	1,693	1.4 %
Marketing programs	392	0.9 %	321	0.8 %	1,366	1.1 %	1,101	0.9 %
Other costs	2,114	5.0 %	2,277	5.8 %	6,696	5.2 %	7,306	6.0 %
Total sales and marketing	\$9,489	22.6 %	\$8,731	22.4 %	\$29,767	23.2 %	\$28,356	23.3 %

Our sales and marketing expense increased in aggregate dollars for the three and nine months ended September 30, 2015, versus the comparable 2014 periods but remained consistent as a percentage of total revenue. The increase in sales and marketing expense for the three and nine month periods ended September 30, 2015, was primarily as a result of the following:

- increased payroll and related employee costs due to increased sales and marketing personnel and higher variable compensation; and

- increased marketing and public relations spending related to trade shows.

These increases were partially offset by decreased other costs, which was primarily lower consulting expense, fees and licenses.

We expect our sales and marketing expenses for 2015 to increase in aggregate dollars compared to 2014 as we have expanded our sales workforce.

**Research and Development**

Research and development expense was composed of the following (in thousands and as a percentage of total revenue):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015		2014		2015		2014	
Payroll and related employee costs	\$5,761	13.7 %	\$4,060	10.4 %	\$16,221	12.7 %	\$11,422	9.4 %
Share-based compensation	568	1.4 %	382	1.0 %	1,654	1.3 %	1,102	0.9 %
Other costs	1,100	2.6 %	1,072	2.7 %	3,463	2.7 %	2,427	2.0 %
Total research and development	\$7,429	17.7 %	\$5,514	14.1 %	\$21,338	16.6 %	\$14,951	12.3 %

Our research and development expense increased in aggregate dollars and as a percentage of total revenue for the three and nine months ended September 30, 2015, versus the comparable 2014 periods, primarily as a result of the following:

- increased payroll and related employee costs due to increased headcount as we expand our research and development activities; and

## Table of Contents

increased other costs primarily due to increased professional fees for consulting, facilities, and travel expenses and to a lesser extent increased fees and licenses.

Effective April 1, 2015, we reorganized the job responsibilities of certain employees, and as a result, such employee expenses have moved from cost of services to research and development, on a prospective basis. This reorganization resulted in approximately \$650 of payroll and related employee costs in both the second and third quarters of 2015 being allocated to research and development, which were previously allocated to cost of services.

We expect our research and development expenses for 2015 to increase in both aggregate dollars and as a percentage of revenue compared to 2014 due to the increased headcount and our investments in research and development.

### Depreciation and Amortization (Operating Expenses)

Depreciation and amortization expense was \$648, or 1.5% of revenue, for the three months ended September 30, 2015, versus \$825, or 2.1% of revenue, for the comparable 2014 period. For the nine months ended September 30, 2015, depreciation and amortization was \$1,924, or 1.5% of revenue versus \$2,868, or 2.4% of revenue for the comparable 2014 period. Depreciation expense consists of depreciation on equipment and furnishings used by general administrative, sales and marketing, and research and development personnel. Amortization expense consists of amortization of intangible assets acquired in business combinations.

### Interest Expense

Interest expense was \$-0- and \$4 for the three and nine months ended September 30, 2015, versus \$7 and \$26 for the comparable 2014 periods. Interest expense is primarily comprised of interest paid on capital leases that were paid in full in March 2015. As of September 30, 2015, we had no outstanding credit facilities.

### Interest Income

Interest income was \$82 and \$231 for the three and nine months ended September 30, 2015, versus \$66 and \$203 for the comparable 2014 periods. Interest income includes interest earned on invested cash balances and marketable securities.

### Other Income (Expense)

Other income was \$473 and \$1,192, respectively, for the three months ended September 30, 2015 and 2014. Other income consists primarily of foreign currency transaction gains and losses for the three months ended September 30, 2015. For the three months ended September 30, 2014, other income consists primarily of foreign currency transaction gains and losses and the gain on sale of assets.

For the nine months ended September 30, 2015 and 2014, other income was \$2,155 and \$1,014, respectively. For the nine months ended September 30, 2015, other income consists primarily of foreign currency transaction gains and losses and the \$275 gain on the conversion of our convertible debt security into preferred shares. For nine months ended September 30, 2014, other income consists primarily of foreign currency transaction gains and losses, the working capital adjustment associated with the sale of our WCM business, and the gain on sale of assets.

### Income Tax Expense

Based on an estimated annual effective tax rate and discrete items, the estimated income tax expense from continuing operations for the three and nine months ended September 30, 2015, was \$76 and \$221, respectively, versus \$98 and \$181 for the comparable 2014 periods. Income tax expense on the loss from continuing operations before income taxes was different than the statutory income tax rate primarily due to our providing for a valuation allowance on deferred tax assets in certain jurisdictions, and recording of state and foreign tax expense for the quarter and year to date periods. The effective income tax rate is based primarily upon forecasted income or loss for the year, the composition of the income or loss in different countries, and adjustments, if any, for the potential tax consequences, benefits or resolutions for tax audits.

### Income from Discontinued Operations

Discontinued operations relate to our EyeWonder and chors rich media advertising services. On September 1, 2011, we completed the sale of EyeWonder and chors to DG. During the three months ended June 30, 2014, we received approximately \$414 from DG for previously written-off receivables. We recorded \$269, net of tax of \$145, as income from discontinued operations during the second quarter of 2014. During the three months ended September 30, 2014, we recorded \$4 (net of tax) of expense related to discontinued operations.

## Table of Contents

### Liquidity and Capital Resources

As of September 30, 2015, our cash, cash equivalents and marketable securities classified as current totaled \$69,575. Included in this amount is approximately \$5,156 of cash and cash equivalents held outside the United States that would be subject to withholding taxes upon repatriation. Changes in cash, cash equivalents and marketable securities are dependent upon changes in, among other things, working capital items such as deferred revenues, accounts payable, accounts receivable, accrued provision for litigation and various accrued expenses, as well as purchases of property and equipment and changes in our capital and financial structure due to debt repurchases and issuances, stock option exercises, sales of equity investments and similar events.

We believe that our existing cash, cash equivalents and marketable securities, and available borrowing capacity will be sufficient to meet our anticipated cash needs for at least the next 12 months. If the assumptions underlying our business plan regarding future revenue and expenses change, or if unexpected opportunities or needs arise, we may seek to raise additional cash by selling equity or debt securities.

The major components of changes in cash flows for the nine months ended September 30, 2015 and 2014, are discussed in the following paragraphs.

### Operating Activities

Net cash used in operating activities of continuing operations was \$297 for the nine months ended September 30, 2015, versus net cash provided by operating activities of \$1,005 for the comparable 2014 period, a decrease of \$1,302. Changes in operating assets and liabilities of (\$3,837) during the nine months ended September 30, 2015, versus (\$2,048) in the comparable 2014 period were primarily due to:

accounts receivable increased \$5,267 during the nine months ended September 30, 2015, due to the timing of billings net of collections and an increase in our days sales outstanding (DSO) due to longer payment terms with certain large customers as compared to a \$1,496 increase in the comparable 2014 period;

other assets decreased \$1,587 during the nine months ended September 30, 2015, due to amortization of prepaid bandwidth expenses versus a decrease of \$991 for the comparable 2014 period; and

accounts payable and other current liabilities increased \$510 during the nine months ended September 30, 2015 versus an increase of \$1,099 for the comparable 2014 period due to timing of vendor payments, the payment of 2014 accrued compensation and the reversal of accrued legal fees.

Cash provided by operating activities of continuing operations may not be sufficient to cover new purchases of property and equipment during 2015 and potential litigation expenses associated with patent litigation. The timing and amount of future working capital changes and our ability to manage our DSO will also affect the future amount of cash used in or provided by operating activities.

### Investing Activities

Net cash used in investing activities of continuing operations was \$20,654 for the nine months ended September 30, 2015, versus \$15,689 for the comparable 2014 period. Net cash used in investing activities of continuing operations during the nine months ended September 30, 2015 and 2014, primarily relates to purchases of marketable securities, and capital expenditures consisting primarily of servers and network equipment associated with the build-out and expansion of our global computing platform, partially offset by cash received from maturities of marketable securities. We expect to have ongoing capital expenditure requirements as we continue to invest in and expand our content delivery network. During the nine months ended September 30, 2015, we made capital expenditures of \$20,754, which represented approximately 16% of our total revenue. We expect an increase in capital expenditures in 2015 compared to 2014, to support growth opportunities and to further upgrade our global network and systems.

### Financing Activities

Net cash used in financing activities of continuing operations was \$863 for the nine months ended September 30, 2015, versus \$3,400 for the comparable 2014 period. Net cash used in financing activities of continuing operations in the nine months ended September 30, 2015, related to payments of employee tax withholdings related to the net settlement of vested restricted stock units of \$2,279, cash paid for the repurchase of our common stock of \$957, and payments made on our capital lease obligations of \$358, offset by cash received from the exercise of stock options and our employee stock purchase plan of \$2,731.

Table of Contents

Net cash used in financing activities in the nine months ended September 30, 2014 related to cash paid for the repurchase of our common stock of \$2,500, payments of employee tax withholdings related to restricted stock units of \$1,455, and payments made on our capital lease obligations of \$412, offset by cash received from the exercise of stock options and our employee stock purchase plan of \$967.

**Share repurchases**

On February 12, 2014, our board of directors authorized a \$15,000 share repurchase program. During the nine months ended September 30, 2015, we have purchased and canceled approximately 293 shares. All repurchased shares were canceled and returned to authorized but unissued status. As of September 30, 2015, we have \$9,525 remaining under this share repurchase authorization.

**Capital leases**

On March 12, 2015, we paid in full the outstanding balance on our capital leases.

**Credit facility**

As of September 30, 2015, we had no outstanding credit facilities.

On November 2, 2015, we entered into a Credit Agreement with Silicon Valley Bank. The Credit Agreement provides for revolving credit borrowings up to a maximum principal amount of \$25,000. All outstanding borrowings owed under the Credit Agreement become due and payable no later than the final maturity date of November 2, 2017. For a more detailed discussion regarding our Credit Agreement, please refer to Note 19 "Subsequent Events" of the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

**Contractual Obligations, Contingent Liabilities, and Commercial Commitments**

In the normal course of business, we make certain long-term commitments for operating leases, primarily office facilities, bandwidth, and computer rack space. These leases expire on various dates ranging from 2015 to 2022. We expect that the growth of our business will require us to continue to add to and increase our long-term commitments in 2015 and beyond. As a result of our growth strategies, we believe that our liquidity and capital resources requirements will grow.

The following table presents our contractual obligations and commercial commitments, as of September 30, 2015, over the next five years and thereafter:

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
<b>Operating Leases</b>					
Bandwidth leases	\$23,128	\$17,459	\$5,347	\$306	\$16
Rack space leases	19,885	13,611	5,594	680	—
Real estate leases	12,554	4,057	6,062	2,113	322
Total operating leases	55,567	35,127	17,003	3,099	338
Other purchase obligations	328	328	—	—	—
Total commitments	\$55,895	\$35,455	\$17,003	\$3,099	\$338

**Off Balance Sheet Arrangements**

As of September 30, 2015, we are not involved in any off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

**Item 3. Quantitative and Qualitative Disclosures about Market Risk****Interest Rate Risk**

Our exposure to market risk for changes in interest rates relates primarily to our debt and investment portfolio. In our investment portfolio, we do not use derivative financial instruments. Our investments are primarily with our commercial and investment banks and, by policy, we limit the amount of risk by investing primarily in money market funds, United States

## Table of Contents

Treasury obligations, high quality corporate and municipal obligations, and certificates of deposit. We do not believe that a 10% change in interest rates would have a significant impact on our interest income, operating results, or liquidity.

### Foreign Currency Risk

We operate in the Americas, EMEA and Asia-Pacific. As a result of our international business activities, our financial results could be affected by factors such as changes in foreign currency exchange rates or economic conditions in foreign markets, and there is no assurance that exchange rate fluctuations will not harm our business in the future. We have foreign currency exchange rate exposure on our results of operations as it relates to revenues and expenses denominated in foreign currencies. A portion of our cost of revenues and operating expenses are denominated in foreign currencies as are our revenues associated with certain international customers. Approximately 17% of our revenue for the three and nine months ended September 30, 2015, was denominated in foreign currencies. To the extent that the U.S. dollar weakens, similar foreign currency denominated transactions in the future will result in higher revenues and higher cost of revenues and operating expenses, with expenses having the greater impact on our financial results. Similarly, our revenues and expenses will decrease if the U.S. dollar strengthens against these foreign currencies. Although we will continue to monitor our exposure to currency fluctuations, and, where appropriate, may use financial hedging techniques in the future to minimize the effect of these fluctuations, we are not currently engaged in any financial hedging transactions. Assuming a 10% weakening of the U.S. dollar relative to our foreign currency denominated revenues and expenses, our net loss for the year ended December 31, 2014, and the nine months ended September 30, 2015, would have been higher by approximately \$3,019 and \$2,389 respectively. There are inherent limitations in the sensitivity analysis presented, primarily due to the assumption that foreign exchange rate movements across multiple jurisdictions are similar and would be linear and instantaneous. As a result, the analysis is unable to reflect the potential effects of more complex markets or other changes that could arise, which may positively or negatively affect our results of operations.

### Inflation Risk

We do not believe that inflation has had a material effect on our business, financial condition, or results of operations. If our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could harm our business, financial condition and results of operations.

### Credit Risk

During any given fiscal period, a relatively small number of customers typically account for a significant percentage of our revenue. During the three months ended September 30, 2015 and 2014, sales to our top 20 customers accounted for approximately 58% and 50%, respectively, of our total revenue. During the three months ended September 30, 2015 and 2014, we had no customer who represented 10% or more of our total revenue.

For the nine months ended September 30, 2015 and 2014, sales to our top 20 customers accounted for approximately 56% and 50%, respectively, of our total revenue. During the nine months ended September 30, 2015 and 2014, we had no customer who represented 10% or more of our total revenue. In the past, the customers that comprised our top 20 customers have continually changed, and our large customers may not continue to be as significant going forward as they have been in the past.

## Item 4. Controls and Procedures

### Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

We are responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in SEC Rules 13a-15(e) and 15d-15(e). We maintain disclosure controls and procedures, as such term is defined in SEC Rules 13a-15(e) and 15d-15(e), that are designed to ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the

cost-benefit relationship of possible controls and procedures.

As required by SEC Rule 13a-15(b), we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of September 30, 2015. Based on the foregoing, our Chief

28

---

Table of Contents

Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting, as defined in SEC Rules 13a-15(f) and 15d-15(f), during the fiscal quarter ended September 30, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For a description of our material pending legal proceedings, please refer to Note 9 “Contingencies” of the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, which is incorporated herein by reference.

Item 1A. Risk Factors

Investing in our common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Quarterly Report on Form 10-Q, including the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Part I, Item II, and our consolidated financial statements and related notes, before making a decision to invest in our common stock. The risks and uncertainties described below may not be the only ones we face. If any of the risks actually occur, our business, financial condition, operating results and prospects could be materially and adversely affected. In that event, the market price of our common stock could decline, and you could lose part or all of your investment. All information is presented in thousands, except per share amounts, customer count, head count and where specifically noted.

Risks Related to Our Business

We currently face competition from established competitors and may face competition from others in the future. We compete in markets that are intensely competitive, rapidly changing and characterized by frequently declining prices, and vendors offering a wide range of alternate solutions. We have experienced and expect to continue to experience increased competition on price, features, functionality, integration and other factors. Many of our current competitors, as well as a number of our potential competitors, have longer operating histories, greater name recognition, broader customer relationships and industry alliances, and substantially greater financial, technical and marketing resources than we do. As a consequence of the competitive dynamics in our market, we have experienced reductions in our prices, and an increased requirement for product advancement and innovation in order to remain competitive, which in turn adversely affect our revenue, gross margin and operating results.

Our primary competitors for the content delivery service offering of our Orchestrate Platform include Akamai, Level 3 Communications, Amazon, CDNetworks, and Verizon Digital Media Services. In addition, a number of companies have recently entered or are currently attempting to enter our market, either directly or indirectly, as a result of the growth in the content delivery market. Some of these new entrants may become significant competitors in the future. Given the relative ease by which customers typically can switch among content delivery service providers, differentiated offerings or pricing by competitors could lead to a rapid loss of customers. Some of our current or potential competitors may bundle their offerings with other services, software or hardware in a manner that may discourage content providers from purchasing the services that we offer. In addition, we face different market characteristics and competition with local content delivery service providers as we expand internationally. Many of these international competitors are very well positioned within their local markets. Increased competition could result in price reductions and revenue shortfalls, loss of customers and loss of market share, which could harm our business, financial condition and results of operations.

Our primary competitors for the other service offerings of our Orchestrate Platform include Brightcove, Ooyala (acquired by Telstra), Fastly, Highwinds, Yotta, as well as open source products such as Kaltura. However, the competitive landscape is different from content delivery in this area in that the process of changing vendors can be more costly and complicated for the customer, which could make it difficult for us to attract new customers and increase our market share.

Many of our competitors have greater financial and sales resources than we do. Many have been offering similar services in the markets in which we compete longer than we have. We may not be able to successfully compete against these or new competitors. If we are unable to increase our customer base and increase our market share, our business, financial condition and results of operations may suffer.

We are a party to a lawsuit with a significant competitor, and an adverse outcome in that lawsuit is possible, which could have a significant, adverse effect on our financial condition and operations. If an injunction were entered against us, it could force us to cease providing a significant portion of our content delivery services.

We are currently a defendant in one significant lawsuit (see discussion in “Legal Proceedings” in Part II, Item 1 of this quarterly report on Form 10-Q).

---

Table of Contents

On August 31, 2012, the United States Court of Appeals for the Federal Circuit issued its opinion in Akamai Technologies, Inc. v. Limelight Networks, Inc. The Federal Circuit stated that the trial court correctly determined that we did not directly infringe Akamai's '703 patent, and as such it upheld the trial court's decision to vacate the original jury's damages award. The Federal Circuit also held that we did not infringe Akamai's '413 or '645 patents. However, a slim majority in this three-way divided opinion also announced a revised legal theory of induced infringement, remanded the case to the trial court, and gave Akamai an opportunity for a new trial to attempt to prove that we induced our customers to infringe Akamai's patent under the Federal Circuit's new legal standard. We filed a petition to appeal this sharply divided Court of Appeals decision to the United States Supreme Court. On January 10, 2014, the Supreme Court granted our petition for writ of certiorari and did not act on Akamai's cross petition. On April 30, 2014, the Supreme Court heard oral arguments in our case. On June 2, 2014, the Supreme Court issued its decision and reversed the Federal Circuit's decision, remanding the case back to that court.

Following the Supreme Court decision, on July 24, 2014, the Federal Circuit issued an order vacating its prior judgment, reinstating the appeals, dissolving its en banc status, and referring the case back to the original Court of Appeals panel for further proceedings. The Federal Circuit heard arguments on September 11, 2014, and on May 13, 2015, the Federal Circuit issued its opinion in the case, holding that we did not infringe Akamai's '703 patent. On June 12, 2015, Akamai filed a motion with the Federal Circuit seeking a rehearing en banc. On August 13, 2015, the Federal Circuit issued an opinion reversing its previous decision that we were not liable for direct infringement of the '703 patent.

If we are ultimately held liable for infringing Akamai's patent, it could seriously impact our ability to conduct our business and to offer our products and services to our customers. For example, a permanent injunction could prevent us from providing our content delivery services or from delivering certain types of traffic, which could impact the viability of those portions of our business. Any such finding of infringement would also harm our revenue, expenses, market share, reputation, liquidity and overall financial position.

We are from time to time party to other lawsuits in addition to that described above. The expenses of defending these lawsuits, particularly fees paid to our lawyers and expert consultants, have been significant and may continue to adversely affect our operating results during the pendency of such lawsuits. Lawsuits also require a diversion of management and technical personnel time and attention away from other activities to pursue the defense or prosecution of such matters. In addition, adverse rulings in such lawsuits either alone or cumulatively may have an adverse impact on our revenue, expenses, market share, reputation, liquidity and overall financial position.

Any unplanned interruption or degradation in the functioning or availability of our network or services, or attacks on or disruptions to our internal information technology systems, could lead to increased costs, a significant decline in our revenue and harm to our reputation.

Our business is dependent on providing our customers with fast, efficient, and reliable distribution of content delivery and digital asset management services over the Internet every minute of every day. Many of our customers depend primarily or exclusively on our services to operate their businesses. Consequently, any disruption, or substantial and extensive degradation, of our services could have a material impact on our customers' businesses. Our network or services could be disrupted by numerous events, including natural disasters, failure or refusal of our third-party network providers to provide the necessary capacity or access, failure of our software or global network infrastructure and power losses. In addition, we deploy our servers in third-party co-location facilities, and these third-party co-location providers could experience system outages or other disruptions that could constrain our ability to deliver our services. We may also experience disruptions caused by software viruses, unauthorized hacking of our systems, security breaches or other cyberattacks by unauthorized users. Any hacking of our systems or other cyberattacks could lead to the unauthorized release of confidential information that could damage our customers' business and reputation, as well as our own. The economic costs to us to eliminate or alleviate cyber or other security problems, viruses, worms, malicious software programs, and other security vulnerabilities could be significant, and our efforts to address these problems may not be successful and could result in interruptions, delays, cessation of service, and loss of existing or potential customers. In addition, our release of a security-related solution may increase our visibility as a security-focused company and make us a more attractive target for attacks on our infrastructure intended to steal information about our technology, financial data, or customer information or take other actions that would be

damaging to our customers and us.

We could experience a significant, unplanned disruption, or substantial and extensive degradation of our services, or our network may fail in the future. Despite our significant infrastructure investments, we may have insufficient communications and server capacity to address these or other disruptions, which could result in interruptions in our services. Any widespread interruption or substantial and extensive degradation in the functioning of our Orchestrate Platform services for any reason would reduce our revenue and could harm our business and financial results. If such a widespread interruption occurred, or if we failed to deliver content to users as expected during a high-profile media event, game release or other well-publicized circumstance, our reputation could be damaged severely. Moreover, any disruptions, significant degradation, cybersecurity threats, security breaches, or attacks on our internal information technology systems could undermine confidence in our

Table of Contents

services and cause us to lose customers or make it more difficult to attract new ones, either of which could harm our business and results of operations.

We have a history of losses and we may not achieve or maintain profitability in the future.

Since 2006, we have been profitable only one year, which was as a result of a reversal of a significant reserve for litigation. Our adoption of ASC 718 in 2006 substantially increased the amount of share-based compensation expense we record and has had a significant impact on our results of operations. This significant amount of share-based compensation expense reflects an increase in the level of stock options, restricted stock and restricted stock unit grants. We have also incurred, and may continue to incur, significant costs associated with litigation. Our share-based compensation expense and any material ongoing litigation costs could adversely affect our ability to achieve and maintain profitability in the future.

We also may not achieve sufficient revenue to achieve or maintain profitability and thus may continue to incur significant losses in the future for a number of reasons, including, among others:

- slowing demand for our services,
- increasing competition and competitive pricing pressures,
- any inability to provide our services in a cost-effective manner,
- the incurrence of unforeseen expenses, difficulties, complications and delays, and
- other risks described in this quarterly report on Form 10-Q.

If we fail to achieve and maintain profitability, the price of our common stock could decline, and our business, financial condition and results of operations could suffer.

If we are unable to sell our services at acceptable prices relative to our costs, our revenue and gross margins will decrease and our business and financial results will suffer.

Prices for content delivery services have fallen in recent years and are likely to fall further in the future. We have invested significant amounts in purchasing capital equipment to increase the capacity of our global content delivery network. Our investments in our infrastructure are based upon our assumptions regarding future demand, as well as prices that we will be able to charge for our services. These assumptions may prove to be wrong. If the price that we are able to charge customers to deliver their content falls to a greater extent than we anticipate, if we over-estimate future demand for our services, or if our costs to deliver our services do not fall commensurate with any future price declines, we may not be able to achieve acceptable rates of return on our infrastructure investments, and our gross profit and results of operations may suffer dramatically.

As we further expand our global network and the Orchestrate Platform, and as we refresh our network equipment, we are dependent on significant future growth in demand for our services to justify additional capital expenditures. If we fail to generate significant additional demand for our services, our results of operations will suffer, and we may fail to achieve planned or expected financial results. There are numerous factors that could, alone or in combination with other factors, impede our ability to increase revenue, moderate expenses or maintain gross margins, including:

- continued price declines arising from significant competition;
- increasing settlement fees for certain peering relationships;
- failure to increase sales of our Orchestrate Platform services;
- increases in electricity, bandwidth and rack space costs or other operating expenses, and failure to achieve decreases in these costs and expenses relative to decreases in the prices we can charge for our Orchestrate Platform services and products;
- failure of our current and planned services and software to operate as expected;
- loss of any significant customers or loss of existing customers at a rate greater than our increase in new customers or our sales to existing customers;
- failure to increase sales of our Orchestrate Platform services to current customers as a result of their ability to reduce their monthly usage of our services to their minimum monthly contractual commitment;
- failure of a significant number of customers to pay our fees on a timely basis or at all or to continue to purchase our Orchestrate Platform services in accordance with their contractual commitments; and
- inability to attract high quality customers to purchase and implement our current and planned services.

A significant portion of our revenue is derived collectively from our video content management services, performance services for website and web application acceleration, and cloud storage services. These services tend to have higher gross margins than our content delivery services. We do not have a long history of offering these services, and we may not be able to achieve the growth rates in revenue from such services that we or our investors expect or have experienced in the past. If we are

Table of Contents

unable to achieve the growth rates in revenue that we expect for these service offerings, our revenue and operating results could be significantly and negatively affected.

We may have difficulty scaling and adapting our existing architecture to accommodate increased traffic and technology advances or changing business requirements. This could lead to the loss of customers and cause us to incur unexpected expenses to make network improvements.

Our content delivery and other Orchestrate Platform services are highly complex and are designed to be deployed in and across numerous large and complex networks. Our global network infrastructure has to perform well and be reliable for us to be successful. The greater the user traffic and the greater the complexity of our solutions and services, the more resources we will need to invest in additional infrastructure and support. Further, as a result of our on-going litigation in the Akamai Technologies, Inc. v. Limelight Networks, Inc. lawsuit, we made significant investment in designing and implementing changes to our network architecture in order to implement our content delivery services in a manner we believe does not infringe the claims of Akamai's '703 patent as alleged in the February 2008 trial. We have spent and expect to continue to spend substantial amounts on the purchase and lease of equipment and data centers and the upgrade of our technology and network infrastructure to handle increased traffic over our network, implement changes to our network architecture and integrate existing solutions and to roll out new solutions and services. This expansion is expensive and complex and could result in inefficiencies, operational failures or defects in our network and related software. If we do not implement such changes or expand successfully, or if we experience inefficiencies and operational failures, the quality of our solutions and services and user experience could decline. From time to time, we have needed to correct errors and defects in our software or in other aspects of our network. In the future, there may be additional errors and defects that may harm our ability to deliver our services, including errors and defects originating with third party networks or software on which we rely. These occurrences could damage our reputation and lead to the loss of current and potential customers, which would harm our operating results and financial condition. We must continuously upgrade our infrastructure in order to keep pace with our customers' evolving demands. Cost increases or the failure to accommodate increased traffic or these evolving business demands without disruption could harm our operating results and financial condition.

If we are unable to develop new services and enhancements to existing services or fail to predict and respond to emerging technological trends and customers' changing needs, our operating results and market share may suffer. The market for our Orchestrate Platform services is characterized by rapidly changing technology, evolving industry standards, and new product and service introductions. Our operating results depend on our ability to understand user preferences or predict industry changes. Our operating results also depend on our ability to modify our solutions and services on a timely basis or develop and introduce new services into existing and emerging markets. The process of developing new technologies is complex and uncertain. We must commit significant resources to developing new services or enhancements to our existing services before knowing whether our investments will result in services the market will accept. Furthermore, we may not successfully execute our technology initiatives because of errors in planning or timing, technical hurdles that we fail to overcome in a timely fashion, misunderstandings about market demand or a lack of appropriate resources. As prices for content delivery services fall, we will increasingly rely on new product offerings and other Orchestrate Platform service offerings to maintain or increase our gross margins. Failures in execution, delays in bringing new or improved products or services to market, failure to effectively integrate service offerings, or market acceptance of new services we introduce could result in competitors providing those solutions before we do, which could lead to loss of market share, revenue and earnings.

We depend on a limited number of customers for a substantial portion of our revenue in any fiscal period, and the loss of, or a significant shortfall in demand from, these customers could significantly harm our results of operations. During any given fiscal period, a relatively small number of customers typically account for a significant percentage of our revenue. For the nine months ended September 30, 2015, sales to our top 20 customers accounted for approximately 56% of our total revenue. During the nine months ended September 30, 2015, we had no customer who represented 10% or more of our total revenue.

In the past, the customers that comprised our top 20 customers have continually changed, and we also have experienced significant fluctuations in our individual customers' usage of, or decreased usage of, our services. As a consequence, we may not be able to adjust our expenses in the short term to address the unanticipated loss of a large

customer during any particular period. As such, we may experience significant, unanticipated fluctuations in our operating results that may cause us to not meet our expectations or those of stock market analysts, which could cause our stock price to decline.

Rapidly evolving technologies or new business models could cause demand for our Orchestrate Platform services to decline or could cause these services to become obsolete.

Table of Contents

Customers, potential customers or third parties may develop technological or business model innovations that address digital delivery requirements in a manner that is, or is perceived to be, equivalent or superior to our Orchestrate Platform service offerings. This is particularly true as our customers increase their operations and begin expending greater resources on delivering their content using third party solutions. If we fail to offer content delivery, video content management and other related services that are competitive to in-sourced solutions, we may lose additional customers or fail to attract customers that may consider pursuing this in-sourced approach, and our business and financial results would suffer.

If competitors introduce new products or services that compete with or surpass the quality or the price or performance of our services, we may be unable to renew our agreements with existing customers or attract new customers at the prices and levels that allow us to generate attractive rates of return on our investment. We may not anticipate such developments and may be unable to adequately compete with these potential solutions. In addition, our customers' business models may change in ways that we do not anticipate, and these changes could reduce or eliminate our customers' needs for our services. If this occurred, we could lose customers or potential customers, and our business and financial results would suffer.

As a result of these or similar potential developments, it is possible that competitive dynamics in our market may require us to reduce our prices faster than we anticipate, which could harm our revenue, gross margin and operating results.

Failure to effectively enhance our sales capabilities could harm our ability to increase our customer base and achieve broader market acceptance of our services.

Increasing our customer base and achieving broader market acceptance of our services will depend to a significant extent on our ability to enhance our sales and marketing operations. We have a concentration of our sales force at our headquarters in Tempe, Arizona, but we also have a widely deployed field sales force. We have aligned our sales resources to improve our sales productivity and efficiency and to bring our sales personnel closer to our current and potential customers. Adjustments to our sales force has been and will continue to be expensive and could cause some near-term productivity impairments. As a result, we may not be successful in improving the productivity and efficiency of our sales force, which could cause our results of operations to suffer.

We believe that there is significant competition for both inside and direct sales personnel with the sales skills and technical knowledge that we require. Our ability to achieve significant growth in revenue in the future will depend, in large part, on our success in recruiting, training and retaining sufficient numbers of inside and direct sales personnel. New hires require significant training and, in most cases, take a significant period of time before they achieve full productivity. Our recent hires and planned hires may not become as productive as we would like, and we may be unable to hire or retain sufficient numbers of qualified individuals in the future in the markets where we do business. Our business will be seriously harmed if our sales force productivity efforts do not generate a corresponding significant increase in revenue.

Many of our significant current and potential customers are pursuing emerging or unproven business models, which, if unsuccessful, or ineffective at monetizing delivery of their content, could lead to a substantial decline in demand for our content delivery and other Orchestrate Platform services.

Because the proliferation of broadband Internet connections and the subsequent monetization of content libraries for distribution to Internet users are relatively recent phenomena, many of our customers' business models that center on the delivery of rich media and other content to users remain unproven. Some of our customers will not be successful in selling advertising, subscriptions, or otherwise monetizing the content we deliver on their behalf and consequently may not be successful in creating a profitable business model. This will result in some of our customers discontinuing their Internet or web-based business operations and discontinuing use of our services and solutions. Further, any deterioration and related uncertainty in the global financial markets and economy could result in, among other things, reductions in available capital and liquidity from banks and other providers of credit, fluctuations in equity and currency values worldwide, and concerns that portions of the worldwide economy may be in a prolonged recessionary period. Any one or more of these occurrences could materially adversely impact our customers' access to capital or willingness to spend capital on our services or, in some cases, ultimately cause the customer to file for protection from creditors under applicable insolvency or bankruptcy laws or simply go out of business. This uncertainty may also

impact our customers' levels of cash liquidity, which could affect their ability or willingness to timely pay for services that they will order or have already ordered from us. From time to time we discontinue service to customers for non-payment of services. We expect further customers may discontinue operations or not be willing or able to pay for services that they have ordered from us. Further loss of customers may adversely affect our financial results.

If we are unable to attract new customers or to retain our existing customers, our revenue could be lower than expected and our operating results may suffer.

To increase our revenue, we must add new customers and sell additional services to existing customers and encourage existing customers to increase their usage levels. If our existing and prospective customers do not perceive our services to be of

Table of Contents

sufficiently high value and quality, we may not be able to retain our current customers or attract new customers. We sell our services pursuant to service agreements that generally include some form of financial minimum commitment. Our customers have no obligation to renew their contracts for our services after the expiration of their initial commitment, and these service agreements may not be renewed at the same or higher level of service, if at all. Moreover, under some circumstances, some of our customers have the right to cancel their service agreements prior to the expiration of the terms of their agreements. Aside from minimum financial commitments, customers are not obligated to use our services for any particular type or amount of traffic. These facts, in addition to the changing competitive landscape in our market, means that we cannot accurately predict future customer renewal rates or usage rates. Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including:

- their satisfaction or dissatisfaction with our services;
- the quality and reliability of our content delivery network;
- the prices of our services;
- the prices of services offered by our competitors;
- discontinuation by our customers of their Internet or web-based content distribution business;
- mergers and acquisitions affecting our customer base; and
- reductions in our customers' spending levels.

If our customers do not renew their service agreements with us, or if they renew on less favorable terms, our revenue may decline and our business may suffer. Similarly, our customer agreements often provide for minimum commitments that are often significantly below our customers' historical usage levels. Consequently, even if we have agreements with our customers to use our services, these customers could significantly curtail their usage without incurring any penalties under our agreements. In this event, our revenue would be lower than expected and our operating results could suffer.

It also is an important component of our growth strategy to market our services and solutions to particular industries or market segments. As an organization, we may not have significant experience in selling our services into certain of these markets. We have only recently begun a number of these initiatives, and our ability to successfully sell our services into these markets to a meaningful extent remains unproven. If we are unsuccessful in such efforts, our business, financial condition and results of operations could suffer.

Rapid increase in the use of mobile and alternative devices to access the Internet present significant development and deployment challenges.

The number of people who access the Internet through devices other than PCs, including mobile devices, game consoles and television set-top devices, has increased dramatically in the past few years. The capabilities of these devices are advancing dramatically and the increasing need to provide a high quality video experience will present us and other providers with significant challenges. If we are unable to deliver our service offerings to a substantial number of alternative device users and at a high quality, or if we are slow to develop services and technologies that are more compatible with these devices, we may fail to capture a significant share of an increasingly important portion of the market. Such a failure could limit our ability to compete effectively in an industry that is rapidly growing and changing, which, in turn, could cause our business, financial condition and results of operations to suffer.

We need to defend our intellectual property and processes against patent or copyright infringement claims, which may cause us to incur substantial costs and threaten our ability to do business.

Companies, organizations or individuals, including our competitors and non-practicing entities, may hold or obtain patents or other proprietary rights that would prevent, limit or interfere with our ability to make, use or sell our services or develop new services, which could make it more difficult for us to operate our business. From time to time, we may receive inquiries from holders of patents inquiring whether we infringe their proprietary rights. Companies holding Internet-related patents or other intellectual property rights are increasingly bringing suits alleging infringement of such rights or otherwise asserting their rights and seeking licenses. Any litigation or claims, whether or not valid, could result in substantial costs and diversion of resources from the defense of such claims. In addition, many of our agreements with customers require us to defend and indemnify those customers for third-party intellectual property infringement claims against them, which could result in significant additional costs and diversion of resources. If we are determined to have infringed upon a third party's intellectual property rights, we may also be

required to do one or more of the following:

• cease selling, incorporating or using products or services that incorporate the challenged intellectual property;

• pay substantial damages;

• obtain a license from the holder of the infringed intellectual property right, which license may or may not be available on reasonable terms or at all; or

• redesign products or services.

35

---

Table of Contents

If we are forced to litigate any claims or to take any of these other actions, our business may be seriously harmed. Our business may be adversely affected if we are unable to protect our intellectual property rights from unauthorized use or infringement by third parties.

We rely on a combination of patent, copyright, trademark and trade secret laws and restrictions on disclosure to protect our intellectual property rights. We have applied for patent protection in the United States and a number of foreign countries. These legal protections afford only limited protection and laws in foreign jurisdictions may not protect our proprietary rights as fully as in the United States. Monitoring infringement of our intellectual property rights is difficult, and we cannot be certain that the steps we have taken will prevent unauthorized use of our intellectual property rights. Developments and changes in patent law, such as changes in interpretations of the joint infringement standard, could restrict how we enforce certain patents we hold. We also cannot be certain that any pending or future patent applications will be granted, that any future patent will not be challenged, invalidated or circumvented, or that rights granted under any patent that may be issued will provide competitive advantages to us. Our results of operations may fluctuate in the future. As a result, we may fail to meet or exceed the expectations of securities analysts or investors, which could cause our stock price to decline.

Our results of operations may fluctuate as a result of a variety of factors, many of which are outside of our control. If our results of operations fall below the expectations of securities analysts or investors, the price of our common stock could decline substantially. In addition to the effects of other risks discussed in this section, fluctuations in our results of operations may be due to a number of factors, including, among others:

- our ability to increase sales to existing customers and attract new customers to our content delivery and other Orchestrate Platform services;
- the addition or loss of large customers, or significant variation in their use of our content delivery and other Orchestrate Platform services;
- costs associated with current or future intellectual property lawsuits and other lawsuits;
- service outages or third party security breaches to our platform or to one or more of our customers' platforms;
- the amount and timing of operating costs and capital expenditures related to the maintenance and expansion of our business, operations and infrastructure;
- the timing and success of new product and service introductions by us or our competitors;
- the occurrence of significant events in a particular period that result in an increase in the use of our content delivery and other Orchestrate Platform services, such as a major media event or a customer's online release of a new or updated video game or operating system;
- changes in our pricing policies or those of our competitors;
- the timing of recognizing revenue;
- limitations of the capacity of our global network and related systems;
- the timing of costs related to the development or acquisition of technologies, services or businesses;
- the potential write-down or write-off of intangible or other long-lived assets;
- general economic, industry and market conditions (such as fluctuations experienced in the stock and credit markets during times of deteriorated global economic conditions) and those conditions specific to Internet usage;
- limitations on usage imposed by our customers in order to limit their online expenses; and
- war, threat of war or terrorist actions, including cyber terrorism targeted at us, our customers, or both, and inadequate cybersecurity.

We believe that our revenue and results of operations may vary significantly in the future and that period-to-period comparisons of our operating results may not be meaningful. You should not rely on the results of one period as an indication of future performance.

We generate our revenue primarily from the sale of content delivery services, and the failure of the market for these services to expand as we expect or the reduction in spending on those services by our current or potential customers would seriously harm our business.

While we offer our customers a number of services and solutions associated with our Orchestrate Platform, we generate the majority of our revenue from charging our customers for the content delivered on their behalf through our global network. We are subject to an elevated risk of reduced demand for these services. Furthermore, if the market

for delivery of rich media content in particular does not continue to grow as we expect or grows more slowly, then we may fail to achieve a return on the significant investment we are making to prepare for this growth. Our success, therefore, depends on the continued and increasing reliance on the Internet for delivery of media content and our ability to cost-effectively deliver these services. Many different factors may have a general tendency to limit or reduce the number of users relying on the Internet for media content,

Table of Contents

the amount of content consumed by our customers' users, or the number of providers making this content available online, including, among others:

- a general decline in Internet usage;
- third party restrictions on online content (including copyright restrictions, digital rights management and restrictions in certain geographic regions);
- system impairments or outages, including those caused by hacking or cyberattacks; and
- a significant increase in the quality or fidelity of offline media content beyond that available online to the point where users prefer the offline experience.

The influence of any of these or other factors may cause our current or potential customers to reduce their spending on content delivery services, which would seriously harm our operating results and financial condition.

We could incur charges due to impairment of goodwill and long-lived assets.

As of September 30, 2015, we had a goodwill balance of approximately \$76,096, which is subject to periodic testing for impairment. Our long-lived assets also are subject to periodic testing for impairment. A significant amount of judgment is involved in the periodic testing. Failure to achieve sufficient levels of cash flow could result in impairment charges for goodwill or fixed asset impairment for long-lived assets, which could have a material adverse effect on our reported results of operations. Our goodwill impairment analysis also includes a comparison of the aggregate estimated fair value of our reporting unit to our total market capitalization. If our stock trades below our book value a significant and sustained decline in our stock price and market capitalization could result in goodwill impairment charges. During times of financial market volatility, significant judgment will be used to determine the underlying cause of the decline and whether stock price declines are short-term in nature or indicative of an event or change in circumstances. Impairment charges, if any, resulting from the periodic testing are non-cash.

Our operations are dependent in part upon communications capacity provided by third party telecommunications providers. A material disruption of the communications capacity we have leased could harm our results of operations, reputation and customer relations.

We lease private line capacity for our backbone from third party providers. Our contracts for private line capacity generally have terms of three to four years. The communications capacity we have leased may become unavailable for a variety of reasons, such as physical interruption, technical difficulties, contractual disputes, or the financial health of our third party providers. Alternative providers are available; however, it could be time consuming and expensive to promptly identify and obtain alternative third party connectivity. Additionally, as we grow, we anticipate requiring greater private line capacity than we currently have in place. If we are unable to obtain such capacity from third party providers on terms commercially acceptable to us or at all, our business and financial results would suffer. Similarly, if we are unable to timely deploy enough network capacity to meet the needs of our customer base or effectively manage the demand for our services, our reputation and relationships with our customers would be harmed, which, in turn, could harm our business, financial condition and results of operations.

We face risks associated with international operations that could harm our business.

We have operations in numerous foreign countries and may continue to expand our sales and support organizations internationally. As part of our growth strategy, we intend to expand our sales and support organizations internationally, as well as to further expand our international network infrastructure. Expansion could require us to make significant expenditures, including the hiring of local employees, in advance of generating any revenue. As a consequence, we may fail to achieve profitable operations that will compensate our investment in international locations. We are subject to a number of risks associated with international business activities that may increase our costs, lengthen our sales cycle and require significant management attention. These risks include:

- increased expenses associated with sales and marketing, deploying services and maintaining our infrastructure in foreign countries;
- competition from local content delivery service providers, many of which are very well positioned within their local markets;
- challenges caused by distance, language and cultural differences;
- unexpected changes in regulatory requirements preventing or limiting us from operating our global network or resulting in unanticipated costs and delays;

interpretations of laws or regulations that would subject us to regulatory supervision or, in the alternative, require us to exit a country, which could have a negative impact on the quality of our services or our results of operations; longer accounts receivable payment cycles and difficulties in collecting accounts receivable;

Table of Contents

• corporate and personal liability for violations of local laws and regulations;  
• currency exchange rate fluctuations and repatriation of funds;  
• potentially adverse tax consequences;  
• credit risk and higher levels of payment fraud; and

• foreign exchange controls that might prevent us from repatriating cash earned in countries outside the United States. International operations are subject to significant additional risks not generally faced in our domestic operations, including, but not limited to, risks relating to legal systems that may not adequately protect contract and intellectual property rights, policies and taxation, the physical infrastructure of the country, as well as risks relating to potential political turmoil and currency exchange controls. There can be no assurance that these international risks will not materially adversely affect our business. For example, our operations include software development and quality assurance activities in Ukraine, which is currently experiencing a period of social unrest. Should there be significant productivity losses, or if we become unable to conduct operations in Ukraine in the future, and our contingency plans are unsuccessful in addressing the related risks, our business could be adversely affected.

Our business depends on continued and unimpeded access to third party controlled end-user access networks. Our content delivery services depend on our ability to access certain end-user access networks in order to complete the delivery of rich media and other online content to end-users. Some operators of these networks may take measures that could degrade, disrupt or increase the cost of our or our customers' access to certain of these end-user access networks. Such measures may include restricting or prohibiting the use of their networks to support or facilitate our services, or charging increased fees to us, our customers or end-users in connection with our services. A United States Court of Appeals ruling struck down FCC regulations that prohibited phone and cable companies from discriminating among content producers in delivering data over their networks. As a result, our customers could experience increased cost or slower data on these third-party networks. If we or our customers experience increased cost in delivering content to end users as a result of this ruling, or otherwise, or if end users perceive a degradation of quality, our business and that of our customers may be significantly harmed. This or other types of interference could result in a loss of existing customers, increased costs and impairment of our ability to attract new customers, thereby harming our revenue and growth.

In addition, the performance of our infrastructure depends in part on the direct connection of our global network to a large number of end-user access networks, known as peering, which we achieve through mutually beneficial cooperation with these networks. In some instances, network operators charge us for the peering connections. If, in the future, a significant percentage of these network operators elected to no longer peer with our network or peer with our network on less favorable economic terms, then the performance of our infrastructure could be diminished, our costs could increase and our business could suffer.

If our ability to deliver media files in popular proprietary content formats was restricted or became cost-prohibitive, demand for our content delivery services could decline, we could lose customers and our financial results could suffer. Our business depends on our ability to deliver media content in all major formats. If our legal right or technical ability to store and deliver content in one or more popular proprietary content formats, such as Adobe Flash, was limited, our ability to serve our customers in these formats would be impaired and the demand for our content delivery and other Orchestrate Platform services would decline by customers using these formats. Owners of propriety content formats may be able to block, restrict or impose fees or other costs on our use of such formats, which could lead to additional expenses for us and for our customers, or which could prevent our delivery of this type of content altogether. Such interference could result in a loss of existing customers, increased costs and impairment of our ability to attract new customers, which would harm our revenue, operating results and growth.

We use certain "open-source" software the use of which could result in our having to distribute our proprietary software, including our source code, to third parties on unfavorable terms, which could materially affect our business.

Certain of our service offerings use software that is subject to open-source licenses. Open-source code is software that is freely accessible, usable and modifiable. Certain open-source code is governed by license agreements, the terms of which could require users of such open-source code to make any derivative works of such open-source code available to others on unfavorable terms or at no cost. Because we use open-source code, we may be required to take remedial action to protect our proprietary software. Such action could include replacing certain source code used in our

software, discontinuing certain of our products or features or taking other actions that could divert resources away from our development efforts.

In addition, the terms relating to disclosure of derivative works in many open-source licenses are unclear. We periodically review our compliance with the open-source licenses we use and do not believe we will be required to make our

38

---

## Table of Contents

proprietary software freely available. Nevertheless, if a court interprets one or more such open-source licenses in a manner that is unfavorable to us, we could be required to make some components of our software available at no cost, which could materially and adversely affect our business and financial condition.

If we are unable to retain our key employees and hire qualified sales and technical personnel, our ability to compete could be harmed.

Our future success depends upon the continued services of our executive officers and other key technology, sales, marketing and support personnel who have critical industry experience and relationships that they rely on in implementing our business plan. There is increasing competition for talented individuals with the specialized knowledge to deliver Orchestrate Platform services and this competition affects both our ability to retain key employees and hire new ones. Historically, we have experienced a significant amount of employee turnover, especially with respect to our sales personnel. As a result, a significant number of our sales personnel are relatively new and may need time to become fully productive. The loss of the services of any of our key employees could disrupt our operations, delay the development and introduction of our services, and negatively impact our ability to sell our services.

We are subject to the effects of fluctuations in foreign exchange rates, which could affect our operating results. The financial condition and results of operations of our operating foreign subsidiaries are reported in the relevant local currency and are then translated into U.S. dollars at the applicable currency exchange rate for inclusion in our consolidated U.S. dollar financial statements. Also, although a large portion of our customer and vendor agreements are denominated in U.S. dollars, we may be exposed to fluctuations in foreign exchange rates with respect to customer agreements with certain of our international customers. Exchange rates between these currencies and U.S. dollars in recent years have fluctuated significantly and may do so in the future. In addition to currency translation risk, we incur currency transaction risk whenever one of our operating subsidiaries enters into a transaction using a different currency than the relevant local currency. Given the volatility of exchange rates, we may be unable to manage our currency transaction risks effectively. Currency fluctuations could have a material adverse effect on our future international sales and, consequently, on our financial condition and results of operations.

As part of our business strategy, we may acquire businesses or technologies and may have difficulty integrating these operations.

We have completed a number of business acquisitions and may seek to acquire businesses or technologies that are complementary to our business in the future. Acquisitions are often complex and involve a number of risks to our business, including, among others;

- the difficulty of integrating the operations, services, solutions and personnel of the acquired companies;
- the potential disruption of our ongoing business;
- the potential distraction of management;
- the possibility that our business culture and the business culture of the acquired companies will not be compatible;
- the difficulty of incorporating or integrating acquired technology and rights with or into our other services and solutions;
- expenses related to the acquisition and to the integration of the acquired companies;
- the impairment of relationships with employees and customers as a result of any integration of new personnel;
- employee turnover from the acquired companies or from our current operations as we integrate businesses;
- risks related to the businesses of acquired companies that may continue to impact the businesses following the merger; and
- potential unknown liabilities associated with acquired companies.

Any inability to integrate services, solutions, operations or personnel in an efficient and timely manner could harm our results of operations.

If we are not successful in completing acquisitions that we may pursue in the future, we may be required to reevaluate our business strategy, and we may incur substantial expenses and devote significant management time and resources without a productive result. In addition, future acquisitions will require the use of our available cash or dilutive issuances of securities. Future acquisitions or attempted acquisitions could also harm our ability to achieve profitability.

Internet-related and other laws relating to taxation issues, privacy, data security and consumer protection and liability for content distributed over our network, could harm our business.

Laws and regulations that apply to communications and commerce conducted over the Internet are becoming more prevalent, both in the United States and internationally, and may impose additional burdens on companies conducting business

Table of Contents

online or providing Internet-related services such as ours. Increased regulation could negatively affect our business directly, as well as the businesses of our customers, which could reduce their demand for our services. For example, tax authorities abroad may impose taxes on the Internet-related revenue we generate based on where our internationally deployed servers are located. In addition, domestic and international taxation laws are subject to change. Our services, or the businesses of our customers, may become subject to increased taxation, which could harm our financial results either directly or by forcing our customers to scale back their operations and use of our services in order to maintain their operations. Also, the Communications Act of 1934, as amended by the Telecommunications Act of 1996 (the Act), and the regulations promulgated by the Federal Communications Commission under Title II of the Act, may impose obligations on the Internet and those participants involved in Internet-related businesses. In addition, the laws relating to the liability of private network operators for information carried on, processed by or disseminated through their networks are unsettled, both in the United States and abroad. Network operators have been sued in the past, sometimes successfully, based on the content of material disseminated through their networks. We may become subject to legal claims such as defamation, invasion of privacy and copyright infringement in connection with content stored on or distributed through our network. In addition, our reputation could suffer as a result of our perceived association with the type of content that some of our customers deliver. If we need to take costly measures to reduce our exposure to the risks posed by laws and regulations that apply to communications and commerce conducted over the Internet, or are required to defend ourselves against related claims, our financial results could be negatively affected.

Several other federal laws also could expose us to liability and impose significant additional costs on us. For example, the Digital Millennium Copyright Act has provisions that limit, but do not eliminate, our liability for the delivery of customer content that infringe copyrights or other rights, so long as we comply with certain statutory requirements. In addition, the Children’s Online Privacy Protection Act restricts the ability of online services to collect information from minors and the Protection of Children from Sexual Predators Act of 1998 requires online service providers to report evidence of violations of federal child pornography laws under certain circumstances. Also, there are emerging regulation and industry standards regarding the collection and use of personal information and protecting the security of data on networks. Compliance with these laws, regulations and standards is complex and any failure on our part to comply with these regulations may subject us to additional liabilities.

Privacy concerns could lead to legislative and other limitations on our ability to use “cookies” and video player “cookies” that are crucial to our ability to provide services to our customers.

Our ability to compile data for customers depends on the use of “cookies” and video player “cookies” to identify certain online behavior that allows our customers to measure a website or video’s effectiveness. A cookie is a small file of information stored on a user’s computer that allows us to recognize that user’s browser or video player when the user makes a request for a web page or to play a video. Government authorities inside the United States concerned with the privacy of Internet users have suggested limiting or eliminating the use of cookies. Bills aimed at regulating the collection and use of personal data from Internet users are currently pending in United States Congress and many state legislatures. Attempts at such regulation may be drafted in such a way as to limit or prohibit the use of technology like cookies, thereby creating restrictions that could reduce our ability to use them. In addition, the Federal Trade Commission and the Department of Commerce have conducted hearings regarding user profiling, the collection of non-personally identifiable information and online privacy.

Our foreign operations may also be adversely affected by regulatory action outside the United States. For example, the European Union has adopted a directive addressing data privacy that limits the collection, disclosure and use of information regarding European Internet users. We have in the past relied on adherence to the Department of Commerce’s Safe Harbor Privacy Principles and compliance with the U.S.-EU and U.S.-Swiss Safe Harbor Frameworks as agreed to and set forth by the Department of Commerce, and the European Union and Switzerland, which established a means for legitimating the transfer of personally identifiable information by U.S. companies doing business in Europe from the European Economic Area to the U.S. As a result of the October 6, 2015 European Union Court of Justice (ECJ) opinion in Case C-362/14 (Schrems v. Data Protection Commissioner) regarding the adequacy of the U.S.-EU Safe Harbor Framework, the U.S.-EU Safe Harbor Framework is no longer deemed to be a valid method of compliance with the restrictions set forth in the data privacy directive (and member states’ implementations

thereof) regarding the transfer of data outside of the European Economic Area. In light of the ECJ opinion in Case C-362/14, we anticipate engaging in efforts to legitimize data transfers from the European Economic Area. We may be unsuccessful in establishing legitimate means of transferring data from the European Economic Area, we may experience hesitancy, reluctance, or refusal by European or multi-national customers to continue to use our services due to the potential risk exposure to such customers as a result of the ECJ ruling, and we and our customers are at risk of enforcement actions taken by an EU data protection authority until such point in time that we ensure that all data transfers to us from the European Economic Area are legitimized. We may find it necessary to establish systems to maintain EU-origin data in the European Economic Area, which may involve substantial expense and distraction from other aspects of our business. We publicly post our privacy policies and practices concerning our processing, use and disclosure of personally identifiable information. Our publication of our privacy policy and other statements we publish that provide promises and assurances about

Table of Contents

privacy and security can subject us to potential state and federal action if they are found to be deceptive or misrepresentative of our practices.

In addition, the European Union has enacted an electronic communications directive that imposes certain restrictions on the use of cookies and also places restrictions on the sending of unsolicited communications. Each European Union member country was required to enact legislation to comply with the provisions of the electronic communications directive. Germany has also enacted additional laws limiting the use of user profiling, and other countries, both in and out of the European Union, may impose similar limitations.

Internet users may directly limit or eliminate the placement of cookies on their computers by using third-party software that blocks cookies, or by disabling or restricting the cookie functions of their Internet browser software and in their video player software. Internet browser software upgrades also may result in limitations on the use of cookies. Technologies like the Platform for Privacy Preferences Project may limit collection of cookies. Plaintiffs' attorneys also have organized class action suits against companies related to the use of cookies and several companies, including companies in the Internet advertising industry, have had claims brought against them before the Federal Trade Commission regarding the collection and use of Internet user information. We may be subject to such suits in the future, which could limit or eliminate our ability to collect such information. If our ability to use cookies were substantially restricted due to the foregoing, or for any other reason, we would have to generate and use other technology or methods that allow the gathering of user data in order to provide services to customers. This change in technology or methods could require significant re-engineering time and resources, and may not be complete in time to avoid negative consequences to our business. In addition, alternative technology or methods might not be available on commercially reasonable terms, if at all. If the use of cookies is prohibited and we are not able to efficiently and cost effectively create new technology, our business, financial condition and results of operations would be materially adversely affected. In addition, any compromise of security that results in the release of Internet users' and/or our customers' data could seriously limit the adoption of our service offerings as well as harm our reputation and brand, expose us to liability and subject us to reporting obligations under various state laws, which could have an adverse effect on our business. The risk that these types of events could seriously harm our business is likely to increase as the amount of data stored for customers on our servers and the number of countries where we operate has been increasing, and we may need to expend significant resources to protect against security breaches, which could have an adverse effect on our business, financial condition or results of operations.

If we are required to seek funding, such funding may not be available on acceptable terms or at all.

We may need to obtain funding due to a number of factors, including a shortfall in revenue, increased expenses, final adverse judgments in litigation matters, increased investment in capital equipment or the acquisition of significant businesses or technologies. We believe that our cash, cash equivalents and marketable securities classified as current plus cash from operations will be sufficient to fund our operations and proposed capital expenditures for at least the next 12 months. However, we may need or desire funding before such time. If we do need to obtain funding, it may not be available on commercially reasonable terms or at all. If we are unable to obtain sufficient funding, our business would be harmed. Even if we were able to find outside funding sources, we might be required to issue securities in a transaction that could be highly dilutive to our investors or we may be required to issue securities with greater rights than the securities we have outstanding today. We might also be required to take other actions that could lessen the value of our common stock, including borrowing money on terms that are not favorable to us. If we are unable to generate or raise capital that is sufficient to fund our operations, we may be required to curtail operations, reduce our capabilities or cease operations in certain jurisdictions or completely.

Our business requires the continued development of effective business support systems to support our customer growth and related services.

The growth of our business depends on our ability to continue to develop effective business support systems. This is a complicated undertaking requiring significant resources and expertise. Business support systems are needed for:

- implementing customer orders for services;
- delivering these services; and
- timely and accurate billing for these services.

Because our business plan provides for continued growth in the number of customers that we serve and services offered, there is a need to continue to develop our business support systems on a schedule sufficient to meet proposed service roll-out dates. The failure to continue to develop effective business support systems could harm our ability to implement our business plans and meet our financial goals and objectives.

We have incurred, and will continue to incur significantly increased costs as a result of operating as a public company, and our management is required to devote substantial time to compliance initiatives.

Table of Contents

As a public company, we have incurred, and will continue to incur, significant expenses, including increased accounting, legal and other professional fees, insurance premiums, investor relations costs, and costs associated with compensating our independent directors. In addition, rules implemented by the SEC and the Nasdaq Global Select Market impose additional requirements on public companies, including requiring changes in corporate governance practices. For example, the listing requirements of the Nasdaq Global Select Market require that we satisfy certain corporate governance requirements relating to independent directors, audit committees, distribution of annual and interim reports, stockholder meetings, stockholder approvals, solicitation of proxies, conflicts of interest, stockholder voting rights and codes of conduct. Our management and other personnel need to devote a substantial amount of time to these compliance initiatives. Moreover, these rules and regulations have increased our legal and financial compliance costs and make some activities more time-consuming and costly. For example, these rules and regulations make it more difficult and more expensive for us to obtain director and officer liability insurance.

If the accounting estimates we make, and the assumptions on which we rely, in preparing our financial statements prove inaccurate, our actual results may be adversely affected.

Our financial statements have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments about, among other things, taxes, revenue recognition, share-based compensation costs, contingent obligations and doubtful accounts. These estimates and judgments affect the reported amounts of our assets, liabilities, revenue and expenses, the amounts of charges accrued by us, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. If our estimates or the assumptions underlying them are not correct, we may need to accrue additional charges or reduce the value of assets that could adversely affect our results of operations, investors may lose confidence in our ability to manage our business and our stock price could decline.

If we fail to maintain proper and effective internal controls or fail to implement our controls and procedures with respect to acquired or merged operations, our ability to produce accurate financial statements could be impaired, which could adversely affect our operating results, our ability to operate our business and investors' views of us. We must ensure that we have adequate internal financial and accounting controls and procedures in place so that we can produce accurate financial statements on a timely basis. We are required to spend considerable effort on establishing and maintaining our internal controls, which is costly and time-consuming and needs to be re-evaluated frequently.

We have operated as a public company since June 2007, and we will continue to incur significant legal, accounting and other expenses as we comply with the Sarbanes-Oxley Act of 2002, as well as new rules implemented from time to time by the SEC and the Nasdaq Global Select Market. These rules impose various requirements on public companies, including requiring changes in corporate governance practices, increased reporting of compensation arrangements and other requirements. Our management and other personnel will continue to devote a substantial amount of time to these compliance initiatives. Moreover, new rules and regulations will likely increase our legal and financial compliance costs and make some activities more time-consuming and costly. These rules and regulations could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, our board committees or as executive officers.

Section 404 of the Sarbanes-Oxley Act of 2002 requires that we include in our annual report our assessment of the effectiveness of our internal control over financial reporting and our audited financial statements as of the end of each fiscal year. Furthermore, our independent registered public accounting firm, Ernst & Young LLP (EY), is required to report on whether it believes we maintained, in all material respects, effective internal control over financial reporting as of the end of the year. Our continued compliance with Section 404 will require that we incur substantial expense and expend significant management time on compliance related issues, including our efforts in implementing controls and procedures related to acquired or merged operations. We currently do not have an internal audit group and use an international accounting firm to assist us with our assessment of the effectiveness of our internal controls over financial reporting. In future years, if we fail to timely complete this assessment, or if EY cannot timely attest, there may be a loss of public confidence in our internal controls, the market price of our stock could decline, and we could be subject to regulatory sanctions or investigations by the Nasdaq Global Select Market, the SEC or other regulatory

authorities, which would require additional financial and management resources. In addition, any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to timely meet our regulatory reporting obligations.

Changes in financial accounting standards or practices may cause adverse, unexpected financial reporting fluctuations and affect our reported results of operations.

A change in accounting standards or practices can have a significant effect on our operating results and may affect our reporting of transactions completed before the change is effective. New accounting pronouncements and varying interpretations

## Table of Contents

of existing accounting pronouncements have occurred and may occur in the future. Changes to existing rules or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business.

Divestiture of our businesses or product lines, including those that we have acquired or will acquire, may materially adversely affect our financial condition, results of operations or cash flows, or may result in impairment charges that may adversely affect our results of operations.

Divestitures involve risks, including difficulties in the separation of operations, services, products and personnel, the diversion of management's attention from other business concerns, the disruption of our business, the potential loss of key employees and the retention of uncertain contingent liabilities related to the divested business, any of which could result in a material adverse effect to our financial condition, results of operations or cash flows. Divestitures of previously acquired businesses may result in significant asset impairment charges, including those related to goodwill and other intangible assets, which could have a material adverse effect on our financial condition and results of operations. Future impairment may result from, among other things, deterioration in the performance of the acquired business or product line, adverse market conditions and changes in the competitive landscape, adverse changes in applicable laws or regulations, including changes that restrict the activities of the acquired business or product line, changes in accounting rules and regulations, and a variety of other circumstances. The amount of any impairment is recorded as a charge to the statement of operations. We may never realize the full value of our goodwill and intangible assets, and any determination requiring the write-off of a significant portion of these assets may have an adverse effect on our financial condition and results of operations. We cannot assure you that we will be successful in managing these or any other significant risks that we encounter in divesting a business or product line.

### Risks Related to Ownership of Our Common Stock

The trading price of our common stock has been, and is likely to continue to be, volatile.

The trading prices of our common stock and the securities of technology companies generally have been highly volatile. Factors affecting the trading price of our common stock will include:

- variations in our operating results;
- announcements of technological innovations, new services or service enhancements, strategic alliances or significant agreements by us or by our competitors;
- commencement or resolution of, our involvement in and uncertainties arising from, litigation, particularly our current litigation with Akamai and MIT;
- recruitment or departure of key personnel;
- changes in the estimates of our operating results or changes in recommendations by any securities analysts that elect to follow our common stock;
- developments or disputes concerning our intellectual property or other proprietary rights;
- the gain or loss of significant customers;
- market conditions in our industry, the industries of our customers and the economy as a whole; and
- adoption or modification of regulations, policies, procedures or programs applicable to our business.

In addition, if the market for technology stocks or the stock market in general experiences loss of investor confidence, the trading price of our common stock could decline for reasons unrelated to our business, operating results or financial condition. The trading price of our common stock might also decline in reaction to events or speculation of events that affect other companies in our industry even if these events do not directly affect us.

If securities or industry analysts do not publish research or reports about our business or if they issue an adverse or misleading opinion or report, our stock, our stock price and trading volume could decline.

The trading market for our common stock will be influenced by the research and reports that industry or securities analysts publish about us or our business. If any of the analysts who cover us issue an adverse or misleading opinion regarding our stock, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

Table of Contents

Insiders have substantial control over us and will be able to influence corporate matters.

As of September 30, 2015, our directors and executive officers and their affiliates beneficially owned, in the aggregate, approximately 35% of our outstanding common stock, including approximately 30% beneficially owned by investment entities affiliated with Goldman, Sachs & Co. These stockholders are able to exercise significant influence over all matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions, such as a merger or other sale of our company or its assets. This concentration of ownership could limit other stockholders' ability to influence corporate matters and may have the effect of delaying or preventing a third party from acquiring control over us.

Future equity issuances or a sale of a substantial number of shares of our common stock may cause the price of our common stock to decline.

Because we may need to raise additional capital in the future to continue to expand our business and our research and development activities, among other things, we may conduct additional equity offerings. If we or our stockholders sell substantial amounts of our common stock (including shares issued upon the exercise of options and warrants) in the public market, the market price of our common stock could fall. A decline in the market price of our common stock could make it more difficult for us to sell equity or equity-related securities in the future at a time and price that we deem appropriate.

Anti-takeover provisions in our charter documents and Delaware law could discourage, delay or prevent a change in control of our company and may affect the trading price of our common stock.

Provisions of our amended and restated certificate of incorporation and bylaws, as well as provisions of Delaware law, could make it more difficult for a third party to acquire us, even if doing so would benefit our stockholders. These provisions:

- establish that members of the board of directors may be removed only for cause upon the affirmative vote of stockholders owning a majority of our capital stock;
- authorize the issuance of "blank check" preferred stock that could be issued by our board of directors to increase the number of outstanding shares and thwart a takeover attempt;
- limit who may call special meetings of stockholders;
- prohibit stockholder action by written consent, thereby requiring stockholder actions to be taken at a meeting of the stockholders;
- establish advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted upon at stockholder meetings;
- provide for a board of directors with staggered terms; and
- provide that the authorized number of directors may be changed only by a resolution of our board of directors.

In addition, Section 203 of the Delaware General Corporation Law, which imposes certain restrictions relating to transactions with major stockholders, may discourage, delay or prevent a third party from acquiring us.
