ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the fiscal year ended December 31, 2016

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission file number: 814-00830

Firsthand Technology Value Fund, Inc.
(Exact name of registrant as specified in its charter)

Maryland 27-3008946
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

150 Almaden Boulevard, Suite 1250
San Jose, California 95113
(Address and zip code of principal executive offices)

(408) 886-7096
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$0.001 par value	The NASDAQ Global Market

Securities registered pursuant to Section 12(g) of the Act:

None

Edgar Filing: Firsthand Technology Value Fund, Inc. - Form 10-K/A

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the issuer has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in the definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act). (check one):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>	Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>
--	---	---	--

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the Common Stock held by non-affiliates of the registrant as of December 31, 2016 was approximately \$47 million (computed using the closing price of \$7.67 per share of Common Stock on December 31, 2016, as reported by the NASDAQ Global Market).

As of March 15, 2017, Firsthand Technology Value Fund had 7,430,697 shares of common stock, par value \$0.001 per share, outstanding.

Filed solely to include a corrected cover sheet

DEAR FELLOW SHAREHOLDERS

Initial public offerings continued their relatively slow pace in 2016, despite a robust stock market rally. Against this backdrop, we are pleased that Firsthand Technology Value Fund enjoyed one IPO (Nutanix) and three M&A transactions (Tapad, Mattson, and Gilt Groupe) in its portfolio this past year. I am disappointed to report, however, that lagging performance in other investments led the Fund's net asset value (NAV) lower 12.07% during the year, and our stock finished down 6.12%.

THINGS THAT WORKED

The biggest news for the Fund this year was the acquisition of Tapad by Telenor in March 2016. The Fund's initial investment in Tapad, an advertising technology company, was in 2013, and our total investment was approximately \$10.15 million. The Fund received roughly \$17.45 million in proceeds from the acquisition, representing a realized gain of approximately \$7.3 million (a 72% gain on investment).

Mattson Technology represented another M&A exit for the Fund, with the semiconductor company being bought out by Beijing E-Town Dragon Semiconductor Industry Investment Center in May 2016. The Fund made its initial investment in Mattson in late 2013 and realized a gain of approximately \$4 million, representing a 49% gain on investment.

During the year, the Fund also enjoyed its seventh IPO since inception, with Nutanix (Nasdaq: NTNX). We made our initial purchase of Nutanix stock in 2015 and added to our position in the summer of 2016, leading up to its late-September IPO. The company went public at \$16.00 per share and, after peaking at over \$40 per share in October, settled into a range between \$25 and \$30 for the remainder of 2016. The Fund's ability to sell the stock is restricted until the end of March 2017, per a lock-up agreement associated with the pre-IPO shares. As of December 31, 2016, we have an unrealized gain of approximately \$3.6 million in the stock (note that our valuation policy dictates that we value our Nutanix position at a 10% discount to the market price for the remainder of the lockup period).

PROGRESS FOR PRIVATE COMPANIES

IntraOp Medical (the portfolio's largest holding at 19.1% as of the end of December) continues to report impressive results in treating several forms of cancer. To date, more than 15,000 cancer patients worldwide have been treated with IntraOp's IntraOperative Radiation Therapy (IORT) device, the Mobetron, including more than 7,500 breast cancer patients. In late 2016, researchers from Harvard and Massachusetts General Hospital announced the results of a clinical study that demonstrated a 43% increase in survival rates for pancreatic cancer patients who were treated with electron beam IORT at the time of surgery versus those receiving surgery alone. Because pancreatic cancer has such a high mortality rate, we believe that this study offers IntraOp an opportunity to dramatically increase its profile in the industry.

Pivotal Systems, one of the Fund's largest holdings, announced that Q3 2016 was a record quarter for revenues and more than \$4 million in bookings. The company also announced the closing of a new \$8 million round of funding that will support its manufacturing expansion in Asia. That investment round was led by Anzu Partners and included participation from Firsthand and other existing investors. As of December 31, 2016, Pivotal represented 16.6% of the Fund's portfolio, and we remain excited about its potential value as an acquisition target. Its mass flow controller technology offers superior performance to other devices in the market, and it is aggressively taking market share from the industry leaders.

Venture capital investors have overlooked the semiconductor industry for some time, which has led to attractive valuations for investors interested in this space. Such was the case with Revasum, a Q4 investment of the Fund. Like Pivotal, Revasum is a supplier of semiconductor manufacturing equipment. The company provides specialized equipment that semiconductor manufacturers use to grind, flatten, and polish semiconductor wafers. In particular,

Revasum has expertise in dealing with exotic materials such as sapphire and silicon carbide.

SOME COMPANIES STRUGGLING

While most of our portfolio companies continue to show meaningful progress, some are having a more difficult time finding success. Several of our investments in the consumer electronics field disappointed in 2016. The market for wearable technology has underperformed relative to the expectations of many market observers. Despite the early successes of Apple Watch and Fitbit products, wearables took a step back in 2016, leading to struggles for Jawbone, Telepathy, and Vufine. We also divested our position in Hiku this past year, reflecting the limited progress made by the grocery scanner company since our initial investment in 2014.

FORWARD LOOKING STATEMENTS

This report, and other statements that we may make, may contain forward-looking statements, which relate to future events or our future performance or financial condition. We use words such as “anticipates,” “believes,” “expects,” “plans,” “will,” “may,” “continues,” “seeks,” “likely,” “intends,” and similar expressions to identify forward-looking statements. The forward-looking statements contained in this Annual Report on Form 10-K involve risks and uncertainties, including forward-looking statements as to:

- our future operating results,
- our business prospects and the prospects of our prospective portfolio companies,
- the impact of investments that we expect to make,
- our contractual arrangements and relationships with third parties,
- the dependence of our future success on the general economy and its impact on the industries in which we invest,
- the ability of our prospective portfolio companies to achieve their objectives,
- our expected financings and investments,
- the adequacy of our cash resources and working capital, and
- the timing of cash flows, if any, from the operations of our prospective portfolio companies.

Our actual results could differ materially from those projected in the forward-looking statements for any reason, including the factors set forth in “Risk Factors” and elsewhere in this Annual Report on Form 10-K. In addition, several factors that could materially affect our actual results are the ability of the portfolio companies in which we invest to achieve their objectives; our ability to source favorable private investments; changes in the securities markets, especially the markets for technology companies including those that may be early stage or micro-cap companies; the dependence of our future success of the general economy and its impact on the industries in which we invest and other factors discussed in our periodic filings with the Securities and Exchange Commission (the “SEC”).

Unpredictable or unknown factors could also have material adverse effects on us. Since our actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements, we cannot give any assurance that any of the events anticipated by the forward-looking statements will occur, or, if any of them do, what impact they will have on our results of operations and financial condition. All forward-looking statements included in this Annual Report on Form 10-K are expressly qualified in their entirety by the foregoing cautionary statements. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. We do not undertake any obligation to update, amend or clarify these forward-looking statements or the risk factors contained in this Annual Report on Form 10-K, whether as a result of new information, future events or otherwise, except as may be required under the federal securities laws. Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make directly to you or through reports that we in the future may file with the SEC.

GENERAL

Firsthand Technology Value Fund, Inc. (“we,” “us,” “our,” the “Company” or “SVVC”) is an externally managed, closed-end, non-diversified management investment company organized as a Maryland corporation that has elected to be treated as a business development company (“BDC”) under the Investment Company Act of 1940 (the “1940 Act”). As such, we are required to comply with certain regulatory requirements. For instance, we generally have to invest at least 70 percent of our total assets in “qualifying assets,” including securities of private or micro-cap public U.S. companies, cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less. In addition, for tax purposes we have elected to be treated as a regulated investment company, or RIC, under Subchapter M of the Internal Revenue Code of 1986, as amended, which we refer to as the “Code.” Firsthand Capital

Management, Inc. (the “Investment Adviser”, the “Adviser”, or “FCM”) serves as our investment adviser and manages the investment process on a daily basis.

4

We were incorporated under the Maryland General Corporation Law in April 2010 and acquired our initial portfolio of securities through the reorganization (the “Reorganization”) into us of Firsthand Technology Value Fund (“TVF”), an open-end mutual fund and a series of Firsthand Funds, which is a Delaware statutory trust. The reorganization was completed on April 15, 2011 and we commenced operations on April 18, 2011.

Our investment objective is to seek long-term growth of capital, principally by seeking capital gains on our equity and equity-related investments. There can be no assurance that we will achieve our investment objective. Under normal circumstances, we invest at least 80 percent of our total assets for investment purposes in technology companies. We consider technology companies to be those companies that derive at least 50 percent of their revenues from products and/or services within the information technology sector and in the “cleantech” sector. Information technology companies include, but are not limited to, those focused on computer hardware, software, telecommunications, networking, Internet, and consumer electronics. While there is no standard definition of cleantech, it is generally regarded as including goods and services designed to harness renewable energy and materials, eliminate emissions and waste, and reduce the use of natural resources. In addition, under normal circumstances we invest at least 70 percent of our assets in privately held companies and public companies with market capitalizations less than \$250 million. Our portfolio is primarily composed of equity and equity derivative securities of technology and cleantech companies (as defined above). These investments generally range between \$1 million and \$10 million each, although the investment size will vary proportionately with the size of our capital base. We acquire our investments through direct investments in private companies, negotiations with selling shareholders, and in organized secondary marketplaces for private securities.

While our primary focus is to invest in illiquid private technology and cleantech companies, we may also invest in micro-cap publicly traded companies. In addition, we may invest up to 30% of the portfolio in opportunistic investments that do not constitute the private companies and micro-cap public companies described above. These other investments may include investments in securities of public companies that are actively traded. These other investments may also include investments in high-yield bonds, distressed debt, or securities of public companies that are actively traded; and securities of companies located outside of the United States. Our investment activities are managed by FCM.

Neither our investments nor an investment in us are intended to constitute a balanced investment program. We expect to be risk-seeking rather than risk-averse in our investment approach. There is no assurance that our investment objective will be achieved.

We invest a substantial portion of our assets in securities that we consider to be private venture capital equity investments. These private venture capital equity investments usually do not pay interest or dividends and usually are subject to legal or contractual restrictions on resale that may adversely affect the liquidity and marketability of such securities. We expect to make speculative venture capital investments with limited marketability and a greater risk of investment loss than less-speculative investments. Subject to the diversification requirements applicable to a regulated investment company (“RIC”), we may commit all of our assets to only a few investments.

Subject to continuing to meet the compliance tests applicable to BDCs, there are no limitations on the types of securities or other assets in which we may invest. Investments may include the following:

- Venture capital investments, whether in corporate, partnership, or other form, including development-stage or start-up entities;
- Equity, equity-related securities (including options and warrants), and debt with equity features from either private or public issuers;
- Debt obligations of all types having varying terms with respect to security or credit support, subordination, purchase price, interest payments, and maturity;
- Foreign securities;
-

Intellectual property or patents or research and development in technology or product development that may lead to patents or other marketable technology; and
Miscellaneous investments.

5

Edgar Filing: Firsthand Technology Value Fund, Inc. - Form 10-K/A

Fair value for our private company holdings was determined in good faith by our board of directors on December 31, 2016. For public companies, the figure represents the market value of our securities on December 31, 2016, less any discount due to resale restriction on the security.

²Public company.

INVESTMENTS AND STRATEGIES

The following is a summary description of the types of assets in which we may invest, the investment strategies we may use, and the attendant risks associated with our investments and strategies.

VENTURE CAPITAL INVESTMENTS

We define venture capital as the money and resources made available to privately held start-up firms and privately held and publicly traded small businesses with exceptional growth potential. These businesses can range in stage from pre-revenue to generating positive cash flow. Most of our long-term venture capital investments are in thinly capitalized, unproven, small companies focused on commercializing risky technologies. These businesses also tend to lack management depth, have limited or no history of operations, and have not attained profitability. Because of the speculative nature of these investments, these securities have a significantly greater risk of loss than traditional investment securities. Some of our venture capital investments will never realize their potential, and some will be unprofitable or result in the complete loss of our investment.

We acquire our investments through direct investments in private companies, negotiations with selling shareholders, and in organized secondary marketplaces for private securities. Our current focus is on investing in late-stage private companies, particularly those with potential for near-term realizations by way of IPO or acquisition.

In connection with our venture capital investments, we may participate in providing a variety of services to our portfolio companies, including the following:

- Recruiting management,
- Formulating operating strategies,
- Formulating intellectual property strategies,
- Assisting in financial planning,
- Providing management in the initial start-up stages, and
- Establishing corporate goals.

We may assist in raising additional capital for these companies from other potential investors and may subordinate our own investment to that of other investors. We typically find it necessary or appropriate to provide additional capital of our own. We may introduce these companies to potential joint venture partners, suppliers, and customers. In addition, we may assist in establishing relationships with investment bankers and other professionals. We may also assist with mergers and acquisitions (“M&As”). We do not currently derive income from these companies for the performance of any of the above services.

We may control, be represented on, or have observer rights on the Board of Directors of a portfolio company through one or more of our officers or directors, who may also serve as officers of the portfolio company. We indemnify our officers and directors for serving on the Boards of Directors or as officers of portfolio companies, which exposes us to additional risks. Particularly during the early stages of an investment, we may, in rare instances, in effect be conducting the operations of the portfolio company. Our goal is to assist each company in establishing its own independent capitalization, management, and Board of Directors. As a venture capital-backed company emerges from the developmental stage with greater management depth and experience, we expect that our role in the portfolio company’s operations will diminish.

EQUITY, EQUITY-RELATED SECURITIES AND DEBT WITH EQUITY FEATURES

We may invest in equity, equity-related securities, and debt with equity features. These securities include common stock, preferred stock, debt instruments convertible into common or preferred stock, limited partnership interests, other beneficial ownership interests and warrants, options, or other rights to acquire any of the foregoing.

We may make investments in companies with operating histories that are unprofitable or marginally profitable, that have negative net worth, or that are involved in bankruptcy or reorganization proceedings. These investments would involve businesses that management believes have potential through the infusion of additional capital and management assistance. In addition, we may make investments in connection with the acquisition or divestiture of companies or divisions of companies. There is a significantly greater risk of loss with these types of securities than is the case with traditional investment securities.

Warrants, options, and convertible or exchangeable securities generally give the investor the right to acquire specified equity securities of an issuer at a specified price during a specified period or on a specified date. Warrants and options fluctuate in value in relation to the value of the underlying security and the remaining life of the warrant or option, while convertible or exchangeable securities fluctuate in value both in relation to the intrinsic value of the security without the conversion or exchange feature and in relation to the value of the conversion or exchange feature, which is like a warrant or an option. When we invest in these securities, we incur the risk that the option feature will expire worthless, thereby either eliminating or diminishing the value of our investment.

Most of our current portfolio company investments are in the equity securities of private companies. Investments in equity securities of private companies often involve securities that are restricted as to sale and cannot be sold in the open market without registration under the Securities Act of 1933 or pursuant to a specific exemption from these registrations. Opportunities for sale are more limited than in the case of marketable securities, although these investments may be purchased at more advantageous prices and may offer attractive investment opportunities. Even if one of our portfolio companies completes an IPO, we are typically subject to a lock-up agreement for 180 days, and the stock price may decline substantially before we are free to sell.

7

We may also invest in publicly traded securities of whatever nature, including relatively small, emerging growth companies that management believes have long-term growth potential. These investments may be through open-market transactions or through private placements in publicly traded companies (“PIPEs”). Securities purchased in PIPE transactions are typically subject to a lock-up agreement for 180 days, or are issued as unregistered securities that are not freely available for six months.

Even if we have registration rights to make our investments in privately held and publicly traded companies more marketable, a considerable amount of time may elapse between a decision to sell or register the securities for sale and the time when we are able to sell the securities. The prices obtainable upon sale may be adversely affected by market conditions or negative conditions affecting the issuer during the intervening time. We may elect to hold formerly restricted securities after they have become freely marketable, either because they remain relatively illiquid or because we believe that they may appreciate in value, during which holding period they may decline in value and be especially volatile as unseasoned securities. If we need funds for investment or working capital purposes, we might need to sell marketable securities at disadvantageous times or prices.

DEBT OBLIGATIONS

We may hold debt securities, including in privately held and thinly traded public companies, for income and as a reserve pending more speculative investments. Debt obligations may include U.S. government and agency securities, commercial paper, bankers’ acceptances, receivables or other asset-based financing, notes, bonds, debentures, or other debt obligations of any nature and repurchase agreements related to these securities. These obligations may have varying terms with respect to security or credit support; subordination; purchase price; interest payments; and maturity from private, public, or governmental issuers of any type located anywhere in the world. We may invest in debt obligations of companies with operating histories that are unprofitable or marginally profitable, that have negative net worth or are involved in bankruptcy or reorganization proceedings, or that are start-up or development-stage entities. In addition, we may participate in the acquisition or divestiture of companies or divisions of companies through issuance or receipt of debt obligations. As of December 31, 2016, the debt obligations held in our portfolio consisted of convertible bridge notes and term notes. The convertible bridge notes generally do not generate cash payments to us, nor are they held for that purpose. Our convertible bridge notes and the interest accrued thereon are held for the purpose of potential conversion into equity at a future date. The term notes we hold are income generating.

Our investments in debt obligations may be of varying quality, including non-rated, unsecured, highly speculative debt investments with limited marketability. Investments in lower-rated and non-rated securities, commonly referred to as “junk bonds,” including our venture debt investments, are subject to special risks, including a greater risk of loss of principal and non-payment of interest. Generally, lower-rated securities offer a higher return potential than higher-rated securities, but involve greater volatility of price and greater risk of loss of income and principal, including the possibility of default or bankruptcy of the issuers of these securities. Lower-rated securities and comparable non-rated securities will likely have large uncertainties or major risk exposure to adverse conditions and are predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal in accordance with the terms of the obligation. The occurrence of adverse conditions and uncertainties to issuers of lower-rated securities would likely reduce the value of lower-rated securities held by us, with a commensurate effect on the value of our shares.

The markets in which lower-rated securities or comparable non-rated securities are traded generally are more limited than those in which higher-rated securities are traded. The existence of limited markets for these securities may restrict our ability to obtain accurate market quotations for the purposes of valuing lower-rated or non-rated securities and calculating net asset value or to sell securities at their fair value. Any economic downturn could adversely affect the ability of issuers’ lower-rated securities to repay principal and pay interest thereon. The market values of lower-rated and non-rated securities also tend to be more sensitive to individual corporate developments and changes in economic conditions than higher-rated securities. In addition, lower-rated securities and comparable non-rated securities generally present a higher degree of credit risk. Issuers of lower-rated securities and comparable non-rated securities are often highly leveraged and may not have more traditional methods of financing available to them, so that their

ability to service their debt obligations during an economic downturn or during sustained periods of rising interest rates may be impaired. The risk of loss owing to default by these issuers is significantly greater because lower-rated securities and comparable non-rated securities generally are unsecured and frequently are subordinated to the prior payment of senior indebtedness. We may incur additional expenses to the extent that we are required to seek recovery upon a default in the payment of principal or interest on our portfolio holdings.

8

The market value of investments in debt securities that carry no equity participation usually reflects yields generally available on securities of similar quality and type at the time purchased. When interest rates decline, the market value of a debt portfolio already invested at higher yields can be expected to rise if the securities are protected against early call. Similarly, when interest rates increase, the market value of a debt portfolio already invested at lower yields can be expected to decline. Deterioration in credit quality also generally causes a decline in market value of the security, while an improvement in credit quality generally leads to increased value.

FOREIGN SECURITIES

We may make investments in securities of issuers whose principal operations are conducted outside the United States, and whose earnings and securities are stated in foreign currency. In order to maintain our status as a BDC, our investments in non-qualifying assets, including the securities of companies organized outside the U.S., would be limited to 30 percent of our assets, because we must invest at least 70 percent of our assets in “qualifying assets,” and securities of foreign companies are not “qualifying assets.”

Compared to otherwise comparable investments in securities of U.S. issuers, currency exchange risk of securities of foreign issuers is a significant variable. The value of these investments to us will vary with the relation of the currency in which they are denominated to the U.S. dollar, as well as with intrinsic elements of value such as credit risk, interest rates, and performance of the issuer. Investments in foreign securities also involve risks relating to economic and political developments, including nationalization, expropriation of assets, currency exchange freezes, and local recession. Securities of many foreign issuers are less liquid and more volatile than those of comparable U.S. issuers. Interest and dividend income and capital gains on our foreign securities may be subject to withholding and other taxes that may not be recoverable by us. We may seek to hedge all or part of the currency risk of our investments in foreign securities through the use of futures, options, and forward currency purchases or sales.

INTELLECTUAL PROPERTY

We believe there is a role for organizations that can assist in technology transfer. Scientists and institutions that develop and patent intellectual property perceive the need for and rewards of entrepreneurial commercialization of their inventions. Our form of investment may be:

- Funding research and development in the development of a technology,
- Obtaining licensing rights to intellectual property or patents,
- Acquiring intellectual property or patents, or
- Forming and funding companies or joint ventures to commercialize further intellectual property.

Income from our investments in intellectual property or its development may take the form of participation in licensing or royalty income, fee income, or some other form of remuneration. In order to satisfy RIC requirements, these investments will normally be held in an entity taxable as a corporation. Investment in developmental intellectual property rights involves a high degree of risk that can result in the loss of our entire investment as well as additional risks, including uncertainties as to the valuation of an investment and potential difficulty in liquidating an investment. Further, investments in intellectual property generally require investor patience, as investment return may be realized only after or over a long period. At some point during the commercialization of a technology, our investment may be transformed into ownership of securities of a development-stage or start-up company, as discussed under “Venture Capital Investments” above.

REPURCHASE OF SHARES

Our shareholders do not have the right to compel us to redeem our shares. We may, however, purchase outstanding shares of our common stock from time to time, subject to approval of our Board of Directors and in compliance with applicable corporate and securities laws. The Board of Directors may authorize public open-market purchases or privately negotiated transactions from time to time when deemed to be in the best interest of our shareholders. Public purchases would be conducted only after notification to shareholders through a press release or other means. The

Board of Directors may or may not decide to undertake any purchases of our common stock.

Our repurchases of our common shares would decrease our total assets and would therefore likely have the effect of increasing our expense ratio. Subject to our investment restrictions, we may borrow money to finance the repurchase of our common stock in the open market pursuant to any tender offer. Interest on any borrowings to finance share repurchase transactions would reduce our net assets. If, because of market fluctuations or other reasons, the value of our assets falls below the required 1940 Act coverage requirements, we may have to reduce our borrowed debt to the extent necessary to comply with the requirement. To achieve a reduction, it is possible that we may be required to sell portfolio securities at inopportune times when it may be disadvantageous to do so.

9

PORTFOLIO COMPANY TURNOVER

Changes with respect to portfolio companies will be made as our management considers necessary in seeking to achieve our investment objective. The rate of portfolio turnover will not be treated as a limiting or relevant factor when circumstances exist that are considered by management to make portfolio changes advisable.

Although we expect that many of our investments will be relatively long term in nature, we may make changes in particular portfolio holdings whenever it is considered that an investment no longer has substantial growth potential or has reached its anticipated level of performance, or (especially when cash is not otherwise available) that another investment appears to have a relatively greater opportunity for capital appreciation. We may also make general portfolio changes to increase our cash to position us in a defensive posture. We may make portfolio changes without regard to the length of time we have held an investment, or whether a sale results in profit or loss, or whether a purchase results in the reacquisition of an investment that we may have only recently sold. Our investments in privately held companies are illiquid, which limits portfolio turnover. The portfolio turnover rate may vary greatly during a year as well as from year to year and may also be affected by cash requirements.

COMPETITION

We compete for investments with a number of business development companies and other investment funds (including private equity funds and venture capital funds), reverse merger and special purpose acquisition company (“SPACs”) sponsors, investment bankers that underwrite initial public offerings, hedge funds that invest in private investments in public equities (PIPEs), traditional financial services companies such as commercial banks, and other sources of financing. Many of these entities have greater financial and managerial resources than we do. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act will impose on us as a business development company. We believe we compete with these entities primarily on the basis of our willingness to make smaller, non-controlling investments, the experience and contacts of our investment professionals within our targeted industries, our responsive and efficient investment analysis and decision-making processes, and the investment terms that we offer. We do not seek to compete primarily on the deal terms we offer to potential portfolio companies. We use the industry information available to FCM to assess investment risks and determine appropriate pricing for our investments in portfolio companies. In addition, we believe that the relationships of Kevin Landis (FCM’s President and Chief Investment Officer), and the other senior investment professionals FCM retains, enable us to learn about, and compete effectively for, financing opportunities with attractive companies in the industries in which we seek to invest. For additional information concerning the competitive risks we face, see “Risk Factors—Risks relating to our business and structure—We operate in a highly competitive market for investment opportunities.”

REGULATION

The Small Business Investment Incentive Act of 1980 added the provisions of the 1940 Act applicable only to BDCs. BDCs are a special type of investment company. After a company files its election to be treated as a BDC, it may not withdraw its election without first obtaining the approval of holders of a majority of its outstanding voting securities. The following is a brief description of the 1940 Act provisions applicable to BDCs, qualified in its entirety by reference to the full text of the 1940 Act and the rules issued thereunder by the Securities and Exchange Commission (“SEC”).

Generally, to be eligible to elect BDC status, a company must primarily engage in the business of furnishing capital and making significant managerial assistance available to companies that do not have ready access to capital through conventional financial channels. Such companies that satisfy certain additional criteria described below are termed “eligible portfolio companies.” In general, in order to qualify as a BDC, a company must: (i) be a domestic company; (ii) have registered a class of its securities pursuant to Section 12 of the Securities Exchange Act of 1934 (the “Exchange Act”); (iii) operate for the purpose of investing in the securities of certain types of portfolio companies, including early-stage or emerging companies and businesses suffering or just recovering from financial distress (see

following paragraph); (iv) make available significant managerial assistance to such portfolio companies; and (v) file a proper notice of election with the SEC.

10

An eligible portfolio company generally is a domestic company that is not an investment company or a company excluded from investment company status pursuant to exclusions for certain types of financial companies (such as brokerage firms, banks, insurance companies, and investment banking firms) and that: (i) has a fully diluted market capitalization of less than \$250 million and has a class of equity securities listed on a national securities exchange, (ii) does not have a class of securities listed on a national securities exchange, or (iii) is controlled by the BDC by itself or together with others (control under the 1940 Act is presumed to exist where a person owns at least 25 percent of the outstanding voting securities of the portfolio company) and the BDC has a representative on the Board of Directors of such company.

We may be examined periodically by the SEC for compliance with the 1940 Act.

As with other companies regulated by the 1940 Act, a BDC must adhere to certain substantive regulatory requirements. A majority of our directors must be persons who are not interested persons, as that term is defined in the 1940 Act. Additionally, we are required to provide and maintain a bond issued by a reputable fidelity insurance company to protect the BDC. Furthermore, as a BDC, we are prohibited from protecting any director or officer against any liability to us or our shareholders arising from willful malfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of such person's office.

The 1940 Act provides that we may not make an investment in non-qualifying assets unless at the time at least 70 percent of the value of our total assets (measured as of the date of our most recently filed financial statements) consists of qualifying assets. Qualifying assets include: (i) securities of eligible portfolio companies; (ii) securities of certain companies that were eligible portfolio companies at the time we initially acquired their securities and in which we retain a substantial interest; (iii) securities of certain controlled companies; (iv) securities of certain bankrupt, insolvent, or distressed companies; (v) securities received in exchange for or distributed in or with respect to any of the foregoing; and (vi) cash items, U.S. government securities, and high quality short-term debt. The SEC has adopted a rule permitting a BDC to invest its cash in certain money market funds. The 1940 Act also places restrictions on the nature of the transactions in which, and the persons from whom, securities can be purchased in some instances in order for the securities to be considered qualifying assets.

We are permitted by the 1940 Act, under specified conditions, to issue multiple classes of debt and a single class of preferred stock if our asset coverage, as defined in the 1940 Act, is at least 200 percent after the issuance of the debt or the preferred stock (i.e., such senior securities may not be in excess of our net assets). Under specific conditions, we are also permitted by the 1940 Act to issue warrants.

Except under certain conditions, we may sell our securities at a price that is below the prevailing net asset value per share only during the 12-month period after (i) a majority of our directors and our disinterested directors have determined that such sale would be in the best interest of us and our stockholders, and (ii) the holders of a majority of our outstanding voting securities and the holders of a majority of our voting securities held by persons who are not affiliated persons of ours approve our ability to make such issuances. A majority of the disinterested directors must determine in good faith that the price of the securities being sold is not less than a price that closely approximates the market value of the securities, less any distribution discount or commission.

Certain transactions involving certain closely related persons of the Company, including its directors, officers, and employees, may require the prior approval of the SEC. However, the 1940 Act ordinarily does not restrict transactions between us and our portfolio companies.

SUBCHAPTER M STATUS

We elected to be treated as a RIC, taxable under Subchapter M of the Internal Revenue Code of 1986 (the "Code"), for federal income tax purposes. In general, a RIC is not taxable on its income or gains to the extent it distributes such income or gains to its shareholders. In order to qualify as a RIC, we must, in general, (1) annually derive at least 90

percent of our gross income from dividends, interest, and gains from the sale of securities and similar sources (the “Income Source Rule”); (2) quarterly meet certain investment asset diversification requirements; and (3) annually distribute at least 90 percent of our investment company taxable income as a dividend (the “Income Distribution Rule”). Any taxable investment company income not distributed will be subject to corporate level tax. Any taxable investment company income distributed generally will be taxable to shareholders as dividend income.

11

Although we may retain income and gains subject to the limitations described above (including paying corporate level tax on such amounts), we could be subject to an additional four percent excise tax if we fail to distribute 98 percent of our aggregate annual taxable income.

As noted above, in order to qualify as a RIC, we must meet certain investment asset diversification requirements each quarter. Because of the specialized nature of our investment portfolio, in some years we have been able to satisfy the diversification requirements under Subchapter M of the Code primarily as a result of receiving certifications from the SEC under the Code with respect to each taxable year beginning after 1998 that we were “principally engaged in the furnishing of capital to other corporations which are principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available” for such year.

Although we generally intend to qualify as a RIC for each taxable year, under certain circumstances we may choose to take action with respect to one or more taxable years to ensure that we would be taxed under Subchapter C of the Code (rather than Subchapter M) for such year or years. We will choose to take such action only if we determine that the result of the action will benefit us and our shareholders.

INVESTMENT OPPORTUNITY

SVVC invests primarily in equity securities of private technology companies in the United States. We believe that the growth potential exhibited by private technology companies, including cleantech companies, creates an attractive investment environment for SVVC.

The last 15 years has been marked by dramatic changes in the initial public offering (“IPO”) market. Since the dot-com bubble burst in 2000, emerging technology companies have often chosen to stay private longer. The combination of volatile equity markets, increased regulatory requirements (such as the Sarbanes-Oxley Act of 2002), and a lack of investment research coverage has made it less attractive for companies to access the public markets through an IPO. We believe the result is an environment with more opportunities to invest in relatively mature private companies, either directly via primary investments or by purchasing shares in the growing secondary market.

At the same time we believe there are a number of powerful trends creating opportunities for innovative companies and investors alike. The dramatic growth of social networking, cloud computing, and powerful, connected mobile computing devices has enabled new ways of communicating, doing business, and accessing information anytime, anywhere. The Company was established to benefit from convergence of exciting technologies and the growth of private investment opportunities.

COMPETITIVE ADVANTAGES

We believe that we have the following competitive advantages over other capital providers in technology and cleantech companies:

MANAGEMENT EXPERTISE

Kevin Landis, our Chief Executive Officer and Chief Financial Officer, has principal management responsibility for Firsthand Capital Management, Inc. as its owner, President and Chief Investment Officer. Mr. Landis has more than 20 years of experience in technology sector investing, and he intends to dedicate a substantial portion of his time to managing the Company. Mr. Landis controls FCM and is a trustee of Firsthand Funds and a director of the Company.

DISCIPLINED INVESTMENT APPROACH

The Investment Adviser employs a disciplined approach in selecting investments. The Investment Adviser's investment philosophy focuses on ensuring that our investments have an appropriate return profile relative to risk. When market conditions make it difficult for us to invest according to our criteria, the Investment Adviser intends to be highly selective in deploying our capital. We believe this approach enables us to build an attractive investment portfolio that meets our return and value criteria over the long term.

We believe it is critical to conduct extensive due diligence on investment targets. In evaluating new investments we, through the Investment Adviser, conduct a rigorous due diligence process that draws from the Investment Adviser's investment experience, industry expertise, and network of contacts.

FOCUSING ON INVESTMENTS THAT CAN GENERATE POSITIVE RISK-ADJUSTED RETURNS

The Investment Adviser seeks to maximize the potential for capital appreciation. In making investment decisions the Investment Adviser seeks to pursue and invest in companies that meet several of the following criteria:

- outstanding technology,
- barriers to entry (i.e., patents and other intellectual property rights),
- experienced management team,
- established financial sponsors that have a history of creating value with portfolio companies,
- strong and competitive industry position, and
- viable exit strategy.

Assuming a potential investment meets most or all of our investment criteria, the Investment Adviser intends to be flexible in adopting transaction structures that address the needs of prospective portfolio companies and their owners. Our investment philosophy is focused on internal rates of return over the life of an investment. Given our investment criteria and due diligence process, we structure our investments so they correlate closely with the success of our portfolio companies.

ABILITY TO SOURCE AND EVALUATE TRANSACTIONS THROUGH THE INVESTMENT ADVISER'S RESEARCH CAPABILITY AND ESTABLISHED NETWORK

FCM's investment management team has overseen investments in dozens of private companies across various industries while employed by FCM and its affiliates since 1994. We believe the expertise of the Investment Adviser's management team enables FCM to identify, assess, and structure investments successfully across all levels of a company's capital structure and to manage potential risk and return at all stages of the economic cycle.

We seek to identify potential investments both through active origination and through dialogue with numerous management teams, members of the financial community, and corporate partners with whom Mr. Landis has long-standing relationships. We believe that the team's broad network of contacts within the investment, commercial banking, private equity and investment management communities in combination with their strong reputation in investment management, enables us to attract well-positioned prospective portfolio companies.

LONGER INVESTMENT HORIZON WITH ATTRACTIVE PUBLICLY TRADED MODEL

Unlike private equity and venture capital funds, we are not subject to standard periodic capital return requirements. Such requirements typically stipulate that funds raised by a private equity or venture capital fund, together with any capital gains on such invested funds, must be returned to investors after a pre-agreed time period. These provisions often force private equity and venture capital funds to seek returns on their investments through mergers, public equity offerings, or other liquidity events more quickly than they otherwise might, potentially resulting in both a lower overall return to investors and an adverse impact on their portfolio companies. While we are required to distribute substantially all realized gains, we believe that with our dividend reinvestment plan and our flexibility to make investments with a long-term view and without the capital return requirements of traditional private investment

vehicles provide us with the opportunity to generate returns on invested capital and at the same time enable us to be a better long-term partner for our portfolio companies.

13

INVESTMENTS

FCM seeks to create a diversified portfolio of equity securities by making initial investments of approximately \$1 million to \$10 million of capital, on average, in the securities of micro-cap public and private companies.

Our portfolio consists primarily of equity securities of private companies and cash and we expect that our portfolio will continue to consist primarily of, equity positions in private companies and cash. These investments include holdings in several private technology and cleantech companies. Moreover, we may acquire investments in the secondary market and, in analyzing such investments, we will employ the same analytical process as we use for our primary investments. For description of our current investments, see “Portfolio Investments.”

We generally seek to invest in companies from the broad variety of industries in which the Investment Adviser has expertise. The following is a representative list of the industries in which we may elect to invest.

- Advanced Materials
- Advertising Technology
- Automotive
- Biofuels
- Cloud Computing
- Computer Hardware
- Computer Peripherals
- Computer Software
- Electronic Components
- Energy Efficiency
- Fuel Cells
- Medical Devices
- Mobile Computing
- Semiconductors
- Social Networking
- Solar Photovoltaics
- Solid-state Lighting
- Telecommunications
- Water Purification
- Wearable Technology
- Wind-Generated Electricity

We may invest in other industries if we are presented with attractive opportunities.

We may on a limited basis purchase or sell options on indexes or securities. We may engage in these transactions to manage risks or otherwise protect the value of the portfolio, and to use these strategies to a limited extent on an opportunistic basis.

INVESTMENT SELECTION

The Investment Adviser seeks to maximize the potential for capital appreciation.

PROSPECTIVE PORTFOLIO COMPANY CHARACTERISTICS

We have identified several criteria that we believe are important in identifying and investing in prospective portfolio companies. These criteria provide general guidelines for our investment decisions; however, we caution you that no single portfolio company (or prospective portfolio company) will meet all of these criteria. Generally, we use our experience and access to market information generated to identify investment candidates and to structure investments

quickly and effectively.

14

Outstanding Technology

Our investment philosophy places a premium on identifying companies that have developed disruptive technologies, that is, technologies with the potential to dramatically alter the economics or performance of a particular type of product or service.

Barriers to Entry

We believe having defensible barriers to entry, in the form of patents or other intellectual property rights, is critically important in technology industries, in which change happens very rapidly. We seek out companies that have secured protection of key technologies through patents, trademarks, or other means.

Experienced management and established financial sponsor relationship

We generally require that our portfolio companies have an experienced management team. We also require the portfolio companies to have in place proper incentives to induce management to succeed and to act in concert with our interests as investors, including having significant equity interests. In addition, we focus our investments in companies backed by strong financial sponsors that have a history of creating value and with whom members of our investment adviser have an established relationship.

Strong and defensible competitive market position in industry

We seek to invest in target companies that have developed leading market positions within their respective markets and are well positioned to capitalize on growth opportunities. We seek companies that demonstrate significant competitive advantages versus their competitors, which should help to protect their market position and profitability.

Viable exit strategy

We seek to invest in companies that we believe will provide a steady stream of cash flow to reinvest in their respective businesses. In addition, we also seek to invest in companies whose business models and expected future cash flows offer attractive exit possibilities. These companies include candidates for strategic acquisition by other industry participants and companies that may repay our investments through an initial public offering of common stock or another capital market transaction. In today's market environment, we believe that a strategic sale is more likely than an IPO for many of our portfolio companies, although IPOs cannot be ruled out. We believe that an acquisition by a strategic buyer is possible at any time for any of our companies.

DUE DILIGENCE

We believe it is critical to conduct extensive due diligence on investment targets. In evaluating new investments, we, through the Investment Adviser, conduct a rigorous due diligence process that draws from the Investment Adviser's investment experience, industry expertise, and network of contacts. The Investment Adviser conducts extensive due diligence investigations in their investment activities. In conducting due diligence, the Investment Adviser uses publicly available information as well as information from its relationships with former and current management teams, consultants, competitors, and investment bankers.

Our due diligence typically includes:

- review of historical and prospective financial information;
- review of technology, product, and business plan;
- on-site visits;
- interviews with management, employees, customers, and vendors of the potential portfolio company;
- background checks; and
- research relating to the company's management, industry, markets, products and services, and competitors.

Upon the completion of due diligence, the Investment Adviser's investment committee determines whether to pursue the potential investment. Additional due diligence with respect to any investment may be conducted on our behalf by attorneys and accountants prior to the closing of the investment, as well as other outside consultants, experts, and/or

advisers, as appropriate. To the extent unaffiliated, third-party consultants, experts, and/or advisers are used, we will be responsible for those expenses.

INVESTMENT STRUCTURE

Once we have determined that a prospective portfolio company is suitable for investment, we work with the management of that company and its other capital providers to structure an investment. We negotiate among these parties to agree on how our investment is expected to perform relative to the other capital in the portfolio company's capital structure.

15

MANAGERIAL ASSISTANCE

As a business development company, we offer, and must provide upon request, managerial assistance to certain of our portfolio companies. This assistance could involve, among other things, monitoring the operations of our portfolio companies, participating in board and management meetings, consulting with and advising officers of portfolio companies, and providing other organizational and financial guidance. We may receive fees for these services. FCM will provide such managerial assistance on our behalf to portfolio companies that request this assistance. For a description of relationships between us and our portfolio companies, please see “Portfolio Companies.”

ONGOING RELATIONSHIPS WITH PORTFOLIO COMPANIES

Monitoring

FCM monitors our portfolio companies on an ongoing basis. Specifically, FCM monitors the financial trends of each portfolio company to determine if they are meeting their respective business plans and to assess the appropriate course of action for each company.

FCM has several methods of evaluating and monitoring the performance and fair value of our investments, which may include the following:

- Assessment of success in adhering to portfolio company’s technology development, business plan and compliance with covenants;
- Periodic and regular contact with portfolio company management and, if appropriate, the financial or strategic sponsor, to discuss financial position, requirements, and accomplishments;
- Comparisons to other portfolio companies in the industry, if any;
 - Attendance at and participation in board meetings; and
- Review of monthly and quarterly financial statements and financial projections for portfolio companies.

Valuation Process

The following is a description of the steps we take each quarter to determine the value of our portfolio. Investments for which market quotations are readily available are recorded in our financial statements at such market quotations. With respect to investments for which market quotations are not readily available, our board of directors undertakes a multi-step valuation process each quarter, as described below under “Determination of Net Asset Value.”

We expect that all of our portfolio investments will be recorded at fair value as determined under the valuation process discussed above. As a result, there will be uncertainty with respect to the value of our portfolio investments.

INVESTMENT MANAGEMENT AGREEMENT

MANAGEMENT SERVICES

FCM has entered into an Investment Management Agreement (the “Investment Management Agreement”) with us whereby FCM provides investment management services. Subject to the overall supervision of our board of directors, the Investment Adviser manages the day-to-day operations of, provides investment management services to, and serves as portfolio manager for us. Mr. Landis, FCM’s President and Chief Investment Officer, has been primarily responsible for our portfolio management since our inception. Under the terms of the Investment Management Agreement, FCM will:

- determine the composition of our portfolio, the nature and timing of the changes to our portfolio, and the manner of implementing such changes;
- identify, evaluate and negotiate the structure of the investments we make (including performing due diligence on our prospective portfolio companies); and
- close and monitor the investments we make.

FCM's services under the Investment Management Agreement are not exclusive, and it is free to furnish similar services to other entities so long as its services to us are not impaired. FCM currently serves as investment manager to Firsthand Funds, a family of open-end mutual funds.

16

INVESTMENT MANAGEMENT FEE

Pursuant to the Investment Management Agreement, we pay FCM a fee for investment management services consisting of two components—a base management fee and an incentive fee.

The base management fee will be calculated at an annual rate of 2.00% of our gross assets. For services rendered under the Investment Management Agreement, the base management fee will be payable quarterly in arrears. The base management fee will be calculated based on the average of (1) the value of our gross assets at the end of the current calendar quarter and (2) the value of our gross assets at the end of the preceding calendar quarter; and appropriately adjusted for any share issuances or repurchases during the current calendar quarter. Base management fees for any partial month or quarter will be pro-rated. The incentive fee is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Management Agreement, as of the termination date), and equals 20% of our realized capital gains, if any, on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid incentive fees.

Mathematically, the formula for computing the annual incentive fee can be written as:

$$\text{Incentive fee} = 20\% \times \left(\frac{\text{Cumulative realized gains}}{\text{Cumulative realized losses}} - \frac{\text{Unrealized depreciation}}{\text{Previously paid incentive fees}} \right)$$

For the purposes of calculating realized capital gains, the cost basis of each security acquired in the Reorganization shall be equal to the greater of the original purchase price of that security by Firsthand Funds or the fair market value of the security at the time of the Reorganization.

EXAMPLE INCENTIVE FEE CALCULATION

EXAMPLE: INCENTIVE FEE ON CAPITAL GAINS:

Assumptions

Year 1 = no net realized capital gains or losses

Year 2 = \$50,000 realized capital gains and \$20,000 realized capital losses and unrealized capital depreciation. Capital gain incentive fee = 20% x (realized capital gains for year computed net of all realized capital losses and unrealized capital depreciation at year end)

Calculation of Incentive Fee

Year 1 incentive fee	= 20% x (0)
	= 0
	= no incentive fee
Year 2 incentive fee	= 20% x (\$50,000 - \$20,000)
	= 20% x \$30,000
	= \$6,000

AVAILABLE INFORMATION

Additional information about us, including quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, are available free of charge on our website at www.firsthandtvf.com. Information on our website is not part of this Annual Report on Form 10-K.

EMPLOYEES

We do not currently have any direct employees. Mr. Landis, our chief executive officer and chief financial officer, is the majority owner and chief investment officer of the Investment Adviser. The Investment Adviser currently employs a staff of 12, including investment, legal, and administrative professionals.

17

Item 1A. Risk Factors

Investing in Firsthand Technology Value Fund involves a number of significant risks relating to our business and investment objective. As a result, there can be no assurance that we will achieve our investment objective.

RISKS RELATING TO OUR BUSINESS AND STRUCTURE

WE HAVE A LIMITED OPERATING HISTORY.

We were incorporated in April 2010 and commenced operations on April 15, 2011. We are subject to all of the business risks and uncertainties associated with any business, including the risk that we will not achieve our investment objective and that the value of your investment could decline substantially. The net assets of SVVC, as of December 31, 2016, were approximately \$149 million.

WE ARE DEPENDENT UPON FCM'S KEY PERSONNEL FOR OUR FUTURE SUCCESS.

If the Investment Adviser is unable to hire and retain qualified personnel, or if it loses any key member of its management team, our ability to achieve our investment objective could be significantly impaired.

We depend on the diligence, skill, and access to the network of business contacts of the management of FCM, including Mr. Landis, the owner, president and chief executive officer of FCM. We also depend, to a significant extent, on FCM's access to the investment information and deal flow generated by Mr. Landis and any other investment professionals of FCM. Mr. Landis and other management personnel of FCM evaluate, negotiate, structure, close, and monitor our investments. Our future success depends on the continued service of Mr. Landis and other management personnel of FCM. The resignation of FCM, or the departure of Mr. Landis or any other key managers hired by FCM could have a material adverse effect on our ability to achieve our investment objective. In addition, we can offer no assurance that FCM will remain the Investment Adviser.

THE INVESTMENT ADVISER AND ITS MANAGEMENT HAS LIMITED EXPERIENCE MANAGING A BUSINESS DEVELOPMENT COMPANY.

The 1940 Act imposes numerous constraints on the operations of business development companies. For example, business development companies are required to invest at least 70% of their total assets primarily in securities of private or micro-cap U.S. public companies, cash, cash equivalents, U.S. government securities, and other high quality debt investments that mature in one year or less. These constraints may hinder the Investment Adviser's ability to take advantage of attractive investment opportunities and to achieve our investment objective. Under the 1940 Act, our ability to own publicly-traded securities with market capitalizations in excess of \$250 million is limited. While Mr. Landis has more than 20 years of experience managing technology stock mutual funds investments and more than 15 years of experience managing private equity investments, Mr. Landis and FCM have only managed a business development company since April 2011, when they began managing SVVC. The investment philosophy and techniques used by Mr. Landis and FCM may differ from those of other funds. Accordingly, we can offer no assurance that SVVC will replicate the historical performance of other investment companies with which Mr. Landis has been affiliated, and we caution you that our investment returns could be substantially lower than the returns achieved by such other companies.

THE INVESTMENT ADVISER AND ITS MANAGEMENT MANAGE OTHER FUNDS.

In addition to managing SVVC, FCM is also the investment adviser to two open-end mutual funds in the Firsthand Funds family: Firsthand Technology Opportunities Fund and Firsthand Alternative Energy Fund. Mr. Landis, who has primary responsibility for SVVC, also serves as portfolio manager of Firsthand Alternative Energy Fund and Firsthand Technology Opportunities Fund. This may reduce the time FCM and its investment management team have to devote to the affairs of SVVC. The other funds managed by FCM have stated investment objectives which differ from our own. Accordingly, there may be times when the interests of FCM's management team differ from our interests.

THE INVESTMENT ADVISER MAY NOT BE ABLE TO ACHIEVE THE SAME OR SIMILAR RETURNS TO THOSE ACHIEVED BY ITS INVESTMENT PROFESSIONALS WHILE THEY WERE EMPLOYED AT PRIOR JOBS.

Although Mr. Landis has been a portfolio manager of a number of open-end mutual funds in the Firsthand Funds family, Mr. Landis's track record and achievements are not necessarily indicative of future results that will be achieved by FCM on our behalf. FCM and its investment professionals' skills and expertise may not be as well suited to our objectives, strategies and requirements as they are for certain other funds. FCM and many of its investment professionals are relatively inexperienced in managing closed end funds and our investment objectives, policies and regulatory limitations differ substantially from the other funds FCM and its investment professionals have managed. Similarly, while the research and operational professionals that support Mr. Landis in his management of Firsthand Funds are substantially the same individuals that will be supporting us, there is no assurance that they will be able to provide the same level of services to us as they did (or currently do) for Firsthand Funds.

18

OUR FINANCIAL CONDITION AND RESULTS OF OPERATION WILL DEPEND ON OUR ABILITY TO MANAGE FUTURE GROWTH EFFECTIVELY.

Our ability to achieve our investment objective will depend on our ability to grow, which will depend, in turn, on FCM's ability to identify, invest in, and monitor companies that meet our investment criteria.

Accomplishing this result on a cost-effective basis will be largely a function of FCM's structuring of the investment process, its ability to provide competent, attentive, and efficient services to us and our access to financing on acceptable terms. The management team of FCM will have substantial responsibilities under the Investment Management Agreement. In addition, the employees of FCM may also be called upon to provide managerial assistance to our portfolio companies as the principals of our administrator. Such demands on their time may distract them or slow our rate of investment. Any failure to manage our future growth effectively could have a material adverse effect on our business, financial condition, and results of operations.

WE OPERATE IN A HIGHLY COMPETITIVE MARKET FOR INVESTMENT OPPORTUNITIES.

A number of entities will compete with us to make the types of investments that we plan to make. We will compete with other venture capital firms and venture capital funds, various public and private investment funds, including hedge funds, other business development companies, commercial and investment banks, commercial financing companies, and various technology and alternative energy companies' internal venture capital arms. Many of our potential competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some competitors may have a stronger network of contacts and better connections for deal flows or have access to funding sources that are not available to us. In addition, some of our competitors have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act will impose on us as a business development company. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we can offer no assurance that we will be able to identify and make investments that are consistent with our investment objective.

REGULATIONS GOVERNING OUR OPERATION AS A BUSINESS DEVELOPMENT COMPANY WILL AFFECT OUR ABILITY TO, AND THE WAY IN WHICH WE, RAISE ADDITIONAL CAPITAL.

We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock at a price below the current net asset value of the common stock, or sell warrants, options, or rights to acquire such common stock, at a price below the current net asset value of the common stock if our board of directors determines that such sale is in the best interests SVVC, and our stockholders approve SVVC's policy and practice of making such sales. Our stockholders have not approved a policy or practice of selling our common stock below our net asset value per share. However, our board of directors may ask our stockholders to vote on such a policy and practice at upcoming stockholders meetings. In any such case, the price at which our securities are to be issued and sold may not be less than a price which, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount).

WE INTEND TO ELECT TO BE TREATED AS A REGULATED INVESTMENT COMPANY (RIC), AND WE WILL BE SUBJECT TO CORPORATE-LEVEL INCOME TAX IF WE ARE UNABLE TO QUALIFY AS A RIC.

To qualify as a RIC under the Code and obtain RIC tax benefits, we must meet certain income source, asset diversification, and annual distribution requirements. The annual distribution requirement for a RIC is satisfied if we distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, to our stockholders on an annual basis. To qualify as a RIC, we must also meet certain asset diversification requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Any such dispositions could be made at disadvantageous prices and may result in losses. If we fail to qualify for RIC tax benefits for any reason and remain or become subject to corporate income tax, the resulting corporate taxes could substantially reduce

our net assets, the amount of income available for distribution, and the amount of our distributions. Such a failure would have a material adverse effect on us and our stockholders.

19

ANY FAILURE ON OUR PART TO MAINTAIN OUR STATUS AS A BUSINESS DEVELOPMENT COMPANY WOULD REDUCE OUR OPERATING FLEXIBILITY.

If we do not remain a business development company, we might be regulated as a closed-end investment company under the 1940 Act, which would subject us to substantially more regulatory restrictions under the 1940 Act and correspondingly decrease our operating flexibility and increase our cost of doing business. Furthermore, any failure to comply with the requirements imposed on business development companies by the 1940 Act could cause the SEC to bring an enforcement action against us or expose us to claims of private litigants.

IF WE DO NOT INVEST A SUFFICIENT PORTION OF OUR ASSETS IN QUALIFYING ASSETS, WE COULD FAIL TO QUALIFY AS A BUSINESS DEVELOPMENT COMPANY OR BE PRECLUDED FROM INVESTING ACCORDING TO OUR CURRENT BUSINESS STRATEGY.

As a business development company, we may not acquire any assets other than “qualifying assets” unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. See “Regulation.”

We may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could lose our status as a business development company, which would have a material adverse effect on our business, financial condition, and results of operations. Similarly, these rules could prevent us from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to comply with the 1940 Act. If we need to dispose of such investments quickly, it would be difficult to dispose of such investments on favorable terms. For example, we may have difficulty in finding a buyer and, even if we do find a buyer, we may have to sell the investments at a substantial loss.

WE ARE A NON-DIVERSIFIED INVESTMENT COMPANY WITHIN THE MEANING OF THE 1940 ACT, AND THEREFORE WE ARE NOT LIMITED WITH RESPECT TO THE PROPORTION OF OUR ASSETS THAT MAY BE INVESTED IN SECURITIES OF A SINGLE ISSUER.

We are classified as a non-diversified investment company within the meaning of the 1940 Act, which means that we are not limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer. To the extent that we assume large positions in the securities of a small number of issuers, our net asset value may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market’s assessment of the issuer. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. Beyond our income tax diversification requirements, we do not have fixed guidelines for diversification, and our investments could be concentrated in relatively few portfolio companies.

WE WILL NEED TO RAISE ADDITIONAL CAPITAL TO GROW.

We will need additional capital to fund growth in our investments once we have fully invested the cash (and other liquid assets, if any) received, we may issue equity securities in order to obtain this additional capital. A reduction in the availability of new capital could limit our ability to grow or pursue business opportunities. We will be required to distribute at least 90% of our ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, to our stockholders to maintain our RIC status. As a result, if stockholders opt out of reinvesting those distributions back into SVVC, these earnings will not be available to fund new investments. If we fail to obtain additional capital to fund our investments, this could limit our ability to grow, which may have an adverse effect on the value of our securities.

MANY OF OUR PORTFOLIO INVESTMENTS WILL BE RECORDED AT FAIR VALUE AS DETERMINED IN GOOD FAITH BY OUR BOARD OF DIRECTORS. AS A RESULT, THERE WILL BE UNCERTAINTY AS TO THE VALUE OF OUR PORTFOLIO INVESTMENTS.

A large percentage of our portfolio investments will be in the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable. We will value

these securities quarterly at fair value according to our written valuation procedures and as determined in good faith by our board of directors. Our board of directors may use the services of a nationally recognized independent valuation firm to aid it in determining the fair value of these securities. The methods for valuing these securities may include: fundamental analysis (sales, income, or earnings multiples, etc.), discounts from market prices of similar securities, purchase price of securities, subsequent private transactions in the security or related securities, or discounts applied to the nature and duration of restrictions on the disposition of the securities, as well as a combination of these and other factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time, and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. Our net asset value could be adversely affected if our determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such securities.

20

THE LACK OF LIQUIDITY IN OUR INVESTMENTS MAY ADVERSELY AFFECT OUR BUSINESS.

We primarily make investments in private companies. Substantially all of these securities will be subject to legal and other restrictions on resale or will otherwise be less liquid than publicly traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. In addition, we may face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we have material non-public information regarding such portfolio company.

WE MAY EXPERIENCE FLUCTUATIONS IN OUR QUARTERLY RESULTS.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the performance of the portfolio securities we hold; the level of our expenses; variations in, and the timing of the recognition of, realized and unrealized gains or losses; the degree to which we encounter competition in our markets and general economic conditions. As a result of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

THERE ARE SIGNIFICANT POTENTIAL CONFLICTS OF INTEREST THAT COULD IMPACT OUR INVESTMENT RETURNS.

Our executive officers and directors may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do or of investment funds managed by affiliates of FCM that may be formed in the future. Accordingly, if this occurs, they may have obligations to investors in those entities, the fulfillment of which might not be in the best interests of us or our stockholders.

In the course of our investing activities, we will pay investment management and incentive fees to FCM, and will reimburse FCM for certain expenses it incurs. As a result, investors in our common stock will invest on a “gross” basis and receive distributions on a “net” basis after expenses, resulting in a lower rate of return than an investor might achieve through direct investments. Accordingly, there may be times when the management team of FCM has interests that differ from those of our stockholders, giving rise to a conflict.

Several members of the board of directors of the Company are also trustees of the Board of Trustees of Firsthand Funds. Of the six directors of the Company, Messrs. Landis, Burglin, and Lee all serve as both directors for the Company and trustees for Firsthand Funds. Messrs. FitzGerald, Petredis, and Yee are the only directors of the Company who are not also trustees of Firsthand Funds. The Company believes such a commonality of the board brings continuity of oversight and allows the board of the Company to maintain the institutional knowledge and experience of overseeing illiquid securities and their pricing methods.

OUR INCENTIVE FEE MAY INDUCE FCM TO MAKE SPECULATIVE INVESTMENTS AND THESE FEES WILL, IN EFFECT, BE BORNE BY OUR COMMON STOCKHOLDERS.

The incentive fee payable by us to FCM may create an incentive for FCM to make investments on our behalf that are risky or more speculative than would be the case in the absence of such compensation arrangement. The incentive fee payable to the Investment Adviser is calculated based on a percentage of our return on invested capital. This may encourage the Investment Adviser to invest in higher risk investments in the hope of securing higher returns.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, as well as other special purpose vehicles set up by third parties for investment in a particular private company. To the extent we so invest, we will bear our ratable share of any such investment company’s expenses, including management and incentive fees. We will also remain obligated to pay investment advisory fees, consisting of a base management fee and incentive fees, to FCM with respect to the assets invested in the securities and instruments of other investment companies under the Investment Management Agreement (as defined under “Discussion of Expected Operating Plans—Contractual Obligations”). With respect to any such investments, each of our stockholders will bear his or her share of the investment advisory fees of FCM as well as indirectly bearing the

investment advisory fees and other expenses of any investment companies in which we invest.

CHANGES IN LAWS OR REGULATIONS GOVERNING OUR OPERATIONS MAY ADVERSELY AFFECT OUR BUSINESS.

We and our portfolio companies will be subject to regulation by laws at the local, state, and federal levels. These laws and regulations, as well as their interpretation, may be changed from time to time. Accordingly, any change in these laws or regulations could materially and adversely affect our business.

21

PROVISIONS OF THE MARYLAND GENERAL CORPORATION LAW AND OF OUR CHARTER AND BYLAWS COULD DETER TAKEOVER ATTEMPTS AND HAVE AN ADVERSE IMPACT ON THE PRICE OF OUR COMMON STOCK.

The Maryland General Corporation Law, our charter, and our bylaws contain provisions that may discourage, delay or make more difficult a change in control of the Company or the removal of the Company's directors. We are subject to the Maryland Business Combination Act, the application of which is subject to any requirements of the 1940 Act. Our board of directors has adopted a resolution exempting from the Maryland Business Combination Act any business combination between us and any other person, subject to prior approval of such business combination by our board, including approval by a majority of our disinterested directors. If the resolution exempting business combinations is repealed or our board does not approve a business combination, the Maryland Business Combination Act may discourage third parties from trying to acquire control of us and increase the difficulty of consummating such an offer. Our bylaws exempt from the Maryland Control Share Acquisition Act acquisitions of our common stock by any person. If we amend our bylaws to repeal the exemption from the Maryland Control Share Acquisition Act, the Maryland Control Share Acquisition Act also may make it more difficult for a third party to obtain control of us and increase the difficulty of consummating such an offer.

We have also adopted other measures that may make it difficult for a third party to obtain control of us, including provisions of our charter classifying our board of directors in three classes serving staggered three-year terms and until their successors are duly elected and qualify, and provisions of our charter authorizing our board of directors (all without stockholder approval) to classify or reclassify shares of our stock in one or more classes or series, to cause the issuance of additional shares of our stock, and to amend our charter to increase or decrease the number of shares of stock that we have authority to issue. These provisions, as well as other provisions of our charter and bylaws, may delay, defer, or prevent a transaction or a change in control that might otherwise be in the best interests of our stockholders.

OUR BOARD OF DIRECTORS MAY CHANGE OUR INVESTMENT OBJECTIVE, OPERATING POLICIES, AND STRATEGIES WITHOUT PRIOR NOTICE OR STOCKHOLDER APPROVAL.

Our board of directors has the authority to modify or waive certain of our operating policies and strategies without prior notice and without stockholder approval (except as required by the 1940 Act). However, absent stockholder approval, we may not change the nature of our business so as to cease to be, or withdraw our election as, a business development company. We cannot predict the effect any changes to our current operating policies and strategies would have on our business, operating results, and value of our stock. Nevertheless, the effects may adversely affect our business and impact our ability to make distributions.

RISKS RELATED TO OUR INVESTMENTS

OUR INVESTMENTS IN PROSPECTIVE PORTFOLIO COMPANIES MAY BE RISKY, AND YOU COULD LOSE ALL OR PART OF YOUR INVESTMENT.

Equity Investments. We make equity investments primarily in equity securities and equity derivatives (such as options, warrants, rights, etc.) of privately placed venture capital stage technology and alternative energy companies as well as publicly traded micro-cap companies (those with market capitalizations of less than \$250 million). Our goal is ultimately to dispose of these equity interests and realize gains upon our disposition of such interests. However, the equity interests we receive may not appreciate in value and, in fact, may decline in value or lose all value. Accordingly, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience.

In addition, investing in privately placed technology and clean tech companies involves a number of significant risks, including that private companies generally have limited operating history and are not as well capitalized as public companies. In addition, private company valuations may fluctuate more dramatically than those of public companies and they frequently have less diverse product lines and smaller market presence than larger competitors. These factors could adversely affect our investment returns as compared to companies investing primarily in the securities of public

companies.

WE MAY INVEST IN MICRO-CAP PUBLIC COMPANIES AND COMPANIES WE MAY HOPE WILL HAVE SUCCESSFUL INITIAL PUBLIC OFFERINGS.

Although micro-cap companies may have potential for rapid growth, they are subject to wider price fluctuations due to factors inherent in their size, such as lack of management experience and financial resources and limited trade volume and frequency. To make a large sale of securities of micro-cap companies that trade in limited volumes, SVVC may need to sell portfolio holdings at a discount or make a series of small sales over an extended period of time.

22

We have invested in, and we expect to continue to invest in, companies that we believe are likely to issue securities in initial public offerings (“IPOs”). Although there is a potential the pre-IPO securities that we buy may increase in value if the company does issue securities in an IPO, IPOs are risky and volatile and may cause the value of our securities to fall dramatically. Also, because securities of pre-IPO companies are generally not freely or publicly tradeable, we may not have access to purchase securities in these companies in the amounts or at the prices we desire. Securities issued by these privately-held companies have no trading history, and information about such companies may be available for very limited periods. The companies that we anticipate holding successful IPOs may not ever issues shares in an IPO and a liquid market for their securities may never develop, which may negatively affect the price at which we can sell any such securities and make it more difficult to sell such securities, which could also adversely affect our liquidity.

WE EXPECT TO PURCHASE SECURITIES IN IPOs, WHICH INVOLVE SIGNIFICANT RISKS FOR US, AND WE MAY NOT BE ABLE TO PARTICIPATE IN OFFERINGS TO THE EXTENT DESIRED OR AT ALL.

Securities purchased in IPOs are often subject to the general risk associated with investments in companies with smaller market capitalizations, and typically to a heightened degree. Securities issued in IPOs have no trading history, and information about companies may be available for very limited periods. In addition, under certain market conditions, a relatively small number of companies may issue securities in IPOs. Our investment performance during periods when we are unable to invest significantly or at all in IPOs may be lower than during periods when we are able to do so.

IPO securities may be volatile, and we cannot predict whether investments in IPOs will be successful. If the Company grows in size, the possible positive effects of IPO investments on the Company may decrease.

WE HAVE NOT YET IDENTIFIED ALL OF THE PORTFOLIO COMPANY INVESTMENTS WE INTEND TO ACQUIRE

The Investment Adviser will select our investments, and our stockholders will have no input with respect to such investment decisions. These factors increase the uncertainty, and thus the risk, of investing in our shares.

ECONOMIC RECESSIONS OR DOWNTURNS COULD IMPAIR OUR PORTFOLIO COMPANIES AND HARM OUR OPERATING RESULTS.

Many of our portfolio companies are susceptible to economic slowdowns or recessions and may fail or require additional capital investments from us during those periods. Therefore, our non-performing assets are likely to increase and the value of our portfolio is likely to decrease during these periods. These events could harm our operating results.

OUR FAILURE TO MAKE FOLLOW-ON INVESTMENTS IN OUR PORTFOLIO COMPANIES COULD IMPAIR THE VALUE OF OUR PORTFOLIO.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as “follow-on” investments, in order to:

- increase or maintain in whole or in part our equity ownership percentage; or
- exercise warrants, options, or convertible securities that were acquired in the original or subsequent financing.

We have the discretion to make any follow-on investments, subject to the availability of capital resources and the availability of securities in the applicable public company. We may elect not to make follow-on investments in a portfolio company and we may lack sufficient funds to make those investments. The failure to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our concentration of risk, because we prefer other opportunities, or because we are inhibited by compliance with business development company requirements or the desire to maintain our tax status.

WE FREQUENTLY DO NOT HOLD CONTROLLING EQUITY INTERESTS IN OUR PORTFOLIO COMPANIES AND WE MAY NOT BE IN A POSITION TO EXERCISE CONTROL OVER OUR PORTFOLIO COMPANIES OR TO PREVENT DECISIONS BY MANAGEMENT OF OUR PORTFOLIO COMPANIES THAT COULD DECREASE THE VALUE OF OUR INVESTMENTS.

Although we may do so occasionally, we do not anticipate routinely taking controlling equity positions in our portfolio companies. As a result, we will be subject to the risk that a portfolio company may make business decisions with which we disagree, and the stockholders and management of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity for the equity investments that we will typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company, and may therefore suffer a decrease in the value of our investments.

23

AN INVESTMENT STRATEGY FOCUSED PRIMARILY ON PRIVATELY HELD COMPANIES PRESENTS CERTAIN CHALLENGES, INCLUDING THE LACK OF AVAILABLE INFORMATION ABOUT THESE COMPANIES, A DEPENDENCE ON THE TALENTS AND EFFORTS OF ONLY A FEW KEY PORTFOLIO COMPANY PERSONNEL, AND A GREATER VULNERABILITY TO ECONOMIC DOWNTURNS.

We invest primarily in privately held companies. Generally, little public information exists about these companies, and we will be required to rely on the ability of FCM's investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Also, privately held companies frequently have less diverse product lines and a smaller market presence than larger competitors. These factors could adversely affect our investment returns as compared to companies investing primarily in the securities of public companies.

OUR PORTFOLIO COMPANIES MAY ISSUE ADDITIONAL SECURITIES OR INCUR DEBT THAT RANKS EQUAL OR SENIOR TO OUR INVESTMENTS IN SUCH COMPANIES.

We also invest primarily in equity securities issued by our portfolio companies. The portfolio companies may be permitted to issue additional securities or incur other debt that ranks equally with, or senior to, the equity securities in which we invest. By their terms, such other securities (especially if they are debt securities) may provide that the holders are entitled to receive payment of interest or principal before we are entitled to receive any distribution from the portfolio companies. Also, in the event of insolvency, liquidation, dissolution, reorganization, or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our equity investment in that portfolio company would typically be entitled to receive payment in full before equity investors like us may receive any distribution in respect of our investment. After repaying such senior creditors, the portfolio company may not have any remaining assets to distribute to us.

WE MAY PURCHASE OR SELL OPTIONS ON SECURITIES AND INDEXES, WHICH MAY EXPOSE US, AND YOUR INVESTMENT IN OUR COMMON STOCK, TO CERTAIN RISKS.

We may on a limited basis purchase or sell options on indexes or securities. The use of options has risks and our ability to successfully use these techniques depends on our ability to predict pertinent market movements, which cannot be assured. The use of options may result in losses greater than if they had not been used, may require us to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation we can realize on an investment or may cause us to hold a security we might otherwise sell.

OUR INVESTMENTS IN FOREIGN SECURITIES MAY INVOLVE SIGNIFICANT RISKS IN ADDITION TO THE RISKS INHERENT IN U.S. INVESTMENTS.

Our investment strategy involves potential investments in equity securities of foreign companies. Investing in foreign companies may expose us to additional risks not typically associated with investing in U.S. companies. These risks include changes in exchange control regulations; political and social instability; expropriation; imposition of foreign taxes; less liquid markets and less available information than is generally the case in the United States; higher transaction costs; less government supervision of exchanges, brokers and issuers; less developed bankruptcy laws; difficulty in enforcing contractual obligations; lack of uniform accounting and auditing standards; and greater price volatility.

Although most of our investments will be U.S. dollar-denominated, any investments denominated in a foreign currency will be subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short-term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation, and political developments. We may employ hedging techniques to minimize these risks, but we can offer no assurance that we will, in fact, hedge currency risk, or, if we do, that such strategies will be effective.

Item 2. Properties

Under the terms of the Investment Management Agreement, Firsthand Capital Management, Inc. is responsible for providing office space to the Company and for the costs associated with providing such space. Our offices are located at 150 Almaden Blvd., Suite 1250, San Jose, CA 95113.

Item 3. Legal Proceedings

We are not currently subject to any material pending legal proceedings.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters, and Issuer Purchases of Equity Securities

MARKET INFORMATION

Our common stock is traded on the Nasdaq Global Market under the symbol "SVVC." The following table sets forth the range of the high and low closing sales prices of the Company's shares during each quarter during the last fiscal year, as reported by Nasdaq Global Market. The quarterly stock prices quoted represent interdealer quotations and do not include markups, markdowns, or commissions.

2016 Quarter Ending	Low	High
March 31	\$6.47	\$8.64
June 30	\$7.24	\$7.65
September 30	\$6.88	\$7.85
December 31	\$7.67	\$8.38

SHAREHOLDERS

As of February 28, 2017, there were approximately 1,800 shareholders of record and approximately 16,000 beneficial owners of the Company's common stock.

DIVIDENDS

There were no distributions in 2016.

RECENT SALES OF UNREGISTERED SECURITIES

The Company did not issue any unregistered securities during the year ended December 31, 2016.

PERFORMANCE GRAPH

The graph and table below compares the cumulative total return of holders of our common stock with the cumulative total returns of the S&P 500 Index and the NASDAQ Composite Index. The comparison assumes that the value of the investment in our common stock and in the index (including reinvestment of dividends) was \$10,000 on April 18, 2011 (our inception date), and tracks it through December 31, 2016.

STOCK TRANSFER AGENT

BNY Mellon Shareowner Services, 301 Bellevue Parkway, Wilmington, Delaware 19809 (1.800.331.1710) serves as our transfer agent.

Item 6. Selected Financial Data

The information below was derived from the audited Consolidated Financial Statements included in this report. This information should be read in conjunction with those Consolidated Financial Statements and Supplementary Data and the notes thereto. These historical results are not necessarily indicative of the results to be expected in the future.

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The information contained in this section should be read in conjunction with our 2016 Consolidated Financial Statements and notes thereto.

OVERVIEW

We are an externally managed, closed-end, non-diversified management investment company organized as a Maryland corporation that has elected to be treated as a BDC under the 1940 Act. As such, we are required to comply with certain regulatory requirements. For instance, we generally have to invest at least 70% of our total assets in “qualifying assets,” including securities of private or micro-cap public U.S. companies, cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less. In addition, for tax purposes we have elected to be treated as a RIC under Subchapter M of the Code. FCM serves as our investment adviser and manages the investment process on a daily basis.

Our investment objective is to seek long-term growth of capital, principally by seeking capital gains on our equity and equity-related investments. There can be no assurance that we will achieve our investment objective. Under normal circumstances, we invest at least 80% of our net assets for investment purposes in technology companies. We consider technology companies to be those companies that derive at least 50% of their revenues from products and/or services within the information technology sector or in the “cleantech” sector. Information technology companies include, but are not limited to, those focused on computer hardware, software, telecommunications, networking, Internet, and consumer electronics. While there is no standard definition of cleantech, it is generally regarded as including goods and services designed to harness renewable energy and materials, eliminate emissions and waste, and reduce the use of natural resources. In addition, under normal circumstances we invest at least 70% of our total assets in privately held companies and public companies with market capitalizations of less than \$250 million. Our portfolio is primarily composed of equity and equity derivative securities of technology and cleantech companies (as defined above). These investments generally range between \$1 million and \$10 million each, although the investment size will vary proportionately with the size of our capital base. We acquire our investments through direct investments in private companies, negotiations with selling shareholders, and in organized secondary marketplaces for private securities.

While our primary focus is to invest in illiquid private technology and cleantech companies, we also may invest in micro-cap publicly traded companies. In addition, we may invest up to 30 percent of the portfolio in opportunistic investments that do not constitute the private companies and micro-cap public companies described above. These other investments may include investments in securities of public companies that are actively traded or in actively traded derivative securities such as options on securities or security indices. These other investments may also include investments in high-yield bonds, distressed debt, or securities of public companies that are actively traded and securities of companies located outside of the United States. Our investment activities are managed by FCM.

The following table summarizes the fair value of our investment portfolio by industry sector as of December 31, 2016 and December 31, 2015.

	December 31, 2016	December 31, 2015
Medical Devices	19.2%	15.2%
Semiconductor Equipment	18.1%	19.9%
