PART I

ITEM 1. BUSINESS

General

Ames National Corporation (the "Company") is an Iowa corporation and bank holding company registered under the Bank Holding Company Act of 1956, as amended. The Company owns 100% of the stock of five banking subsidiaries consisting of two national banks and three state-chartered banks, as described below. All of the Company's operations are conducted in the State of Iowa and primarily within the central and north central Iowa counties of Boone, Hancock, Marshall, Polk and Story where the Company's banking subsidiaries are located. The Company does not engage in any material business activities apart from its ownership of its banking subsidiaries. The principal executive offices of the Company are located at 405 5th Street, Ames, Iowa 50010. The Company's telephone number is (515) 232-6251 and website address is www.amesnational.com.

The Company was organized and incorporated on January 21, 1975 under the laws of the State of Iowa to serve as a holding company for its principal banking subsidiary, First National Bank, Ames, Iowa ("First National") located in Ames, Iowa. In 1983, the Company acquired the stock of the State Bank & Trust Co. ("State Bank") located in Nevada, Iowa; in 1991, the Company, through a newly-chartered state bank known as Boone Bank & Trust Co. ("Boone Bank"), acquired certain assets and assumed certain liabilities of the former Boone State Bank & Trust Company located in Boone, Iowa; in 1995, the Company acquired the stock of the Reliance State Bank, ("Reliance Bank") located in Story City, Iowa; and in 2002, the Company chartered and commenced operations of a new national banking organization, United Bank & Trust NA ("United Bank"), located in Marshalltown, Iowa. First National, State Bank, Boone Bank, Reliance Bank and United Bank are each operated as a wholly owned subsidiary of the Company. These five financial institutions are referred to in this Form 10-K collectively as the "Banks" and individually as a "Bank".

The principal sources of Company revenue are: (i) interest and fees earned on loans made or held by the Company and Banks; (ii) interest on fixed income investments held by the Company and the Banks; (iii) fees on wealth management services; (iv) service charges on deposit accounts maintained at the Banks; (v) gain on the sale of loans; (vi) securities gains; and (vii) merchant and card fees. The Company's principal expenses are: (i) interest expense on deposit accounts and other borrowings; (ii) salaries and employee benefits; (iii) data processing costs primarily associated with maintaining the Banks' loan and deposit functions; (iv) occupancy expenses for maintaining the Banks' facilities; (v) professional fees; (vi) business development; (vii) Federal Deposit Insurance Corporation (the "FDIC") insurance assessments; and (viii) other real estate owned expenses. The largest component contributing to the Company's net income is net interest income, which is the difference between interest earned on earning assets (primarily loans and investments) and interest paid on interest bearing liabilities (primarily deposit accounts and other borrowings). One of management's principal functions is to manage the spread between interest earned on earning assets and interest paid

on interest bearing liabilities in an effort to maximize net interest income while maintaining an appropriate level of interest rate risk.

The Banks' lending activities consist primarily of short-term and medium-term commercial and agricultural real estate loans, residential real estate loans, agricultural and business operating loans and lines of credit, equipment loans, vehicle loans, personal loans and lines of credit, home improvement loans and origination of mortgage loans for sale into the secondary market. The Banks also offer a variety of demand, savings and time deposits, cash management services, merchant credit card processing, safe deposit boxes, wire transfers, direct deposit of payroll and social security checks and automated teller machine access. Four of the five Banks also offer trust services.

The Company provides various services to the Banks which include, but are not limited to, management assistance, internal auditing services, human resources services and administration, compliance management, marketing assistance and coordination, loan review and support with respect to computer systems and related procedures.

Banking Subsidiaries

First National Bank, Ames, Iowa. First National is a nationally-chartered, commercial bank insured by the FDIC. It was organized in 1903 and became a wholly owned subsidiary of the Company in 1975 through a bank holding company reorganization whereby the then shareholders of First National exchanged all of their First National stock for stock in the Company. On August 29, 2014 First National completed the purchase of the three bank offices of First Bank located in West Des Moines and Johnston, Iowa (the "First Bank Acquisition"). These offices were purchased for cash consideration of \$4.3 million. The contractual balance of loans receivable acquired was \$45.6 million and the contractual balance of the deposits assumed was \$81.8 million. As a result of the First Bank Acquisition, the Bank recorded a core deposit intangible asset of \$1.0 million and goodwill of \$1.1 million. First National provides full-service banking to businesses and residents within the Ames community through its three Ames offices and the Greater Des Moines area through its four offices located in Ankeny, West Des Moines and Johnston. It provides a variety of products and services designed to meet the needs of the markets it serves. It has an experienced staff of bank officers including many who have spent the majority of their banking careers with First National and who emphasize long-term customer relationships. First National conducts business out of three full-service offices, all located in the city of Ames, and 4 full-service offices in the Greater Des Moines area.

Table Of Contents

As of December 31, 2014, First National had capital of \$69,400,000 and 111 full-time equivalent employees. Full-time equivalents represent the number of people a business would employ if all its employees were employed on a full-time basis. It is calculated by dividing the total number of hours worked by all full and part-time employees by the number of hours a full-time individual would work for a given period of time. First National had net income for the years ended December 31, 2014, 2013 and 2012 of approximately \$7,490,000, \$7,200,000 and \$7,193,000, respectively. Total assets as of December 31, 2014, 2013 and 2012 were approximately \$706,185,000, \$629,414,000 and \$616,287,000, respectively.

State Bank & Trust Co., Nevada, Iowa. State Bank is an Iowa, state-chartered, FDIC insured commercial bank. State Bank was acquired by the Company in 1983 through a stock transaction whereby the then shareholders of State Bank exchanged all their State Bank stock for stock in the Company. State Bank was organized in 1939 and provides full-service banking to businesses and residents within the Nevada area from its main Nevada location and one office in Colo, Iowa. It has a strong presence in agricultural, commercial and residential real estate lending.

As of December 31, 2014, State Bank had capital of \$17,890,000 and 23 full-time equivalent employees. State Bank had net income for the years ended December 31, 2014, 2013 and 2012 of approximately \$2,280,000, \$2,122,000 and \$2,208,000, respectively. Total assets as of December 31, 2014, 2013 and 2012 were approximately \$157,894,000, \$154,405,000 and \$151,859,000, respectively.

Boone Bank & Trust Co., Boone, Iowa. Boone Bank is an Iowa, state-chartered, FDIC insured commercial bank. Boone Bank was organized in 1992 by the Company under a new state charter in connection with a purchase and assumption transaction whereby Boone Bank purchased certain assets and assumed certain liabilities of the former Boone State Bank & Trust Company in exchange for a cash payment. It provides full service banking to businesses and residents within the Boone community and surrounding area. It is actively engaged in agricultural, consumer and commercial lending, including real estate, operating and equipment loans. It conducts business from its main office and a full service office, both located in Boone.

As of December 31, 2014, Boone Bank had capital of \$13,653,000 and 26 full-time equivalent employees. Boone Bank had net income for the years ended December 31, 2014, 2013 and 2012 of approximately \$1,614,000, \$1,533,000 and \$1,764,000, respectively. Total assets as of December 31, 2014, 2013 and 2012 were approximately \$125,776,000, \$128,551,000 and \$123,829,000, respectively.

Reliance State Bank, Story City, Iowa. Reliance Bank is an Iowa, state-chartered, FDIC insured commercial bank. Reliance Bank was organized in 1928. Reliance Bank was acquired by the Company in 1995 through a stock transaction whereby the then shareholders of Reliance Bank exchanged all their Reliance Bank stock for stock in the Company. On April 27, 2012 Reliance Bank completed the purchase of two bank offices of Liberty Bank, F.S.B. located in Garner and Klemme, Iowa (the "Liberty Acquisition"). These offices were purchased for cash consideration

of \$5.4 million. The contractual balance of loans receivable acquired was \$47.0 million and the contractual balance of the deposits assumed was \$98.1 million. As a result of the LibertyAcquisition, the Bank recorded a core deposit intangible asset of \$1.5 million and goodwill of \$5.6 million. Reliance Bank provides full banking services to businesses and residents within the Story City, Garner and Klemme communities and surrounding areas. While its primary emphasis is in agricultural lending, Reliance Bank also provides the traditional lending services typically offered by community banks. It conducts business from its main office located in Story City and two full service offices located in Garner and Klemme.

As of December 31, 2014, Reliance Bank had capital of \$26,728,000 and 30 full-time equivalent employees. Reliance Bank had net income for the years ended December 31, 2014, 2013 and 2012 of approximately \$2,392,000, \$2,172,000 and \$1,833,000, respectively. Total assets as of December 31, 2014, 2013 and 2012 were approximately \$219,474,000, \$221,597,000 and \$221,799,000, respectively.

United Bank & Trust NA, Marshalltown, Iowa. United Bank is a nationally-chartered, commercial bank insured by the FDIC. It was newly chartered in June of 2002 and offers a broad range of deposit and loan products, as well as wealth management services to customers located in the Marshalltown and surrounding Marshall County area. It conducts business from its main office and a full service office, both located in Marshalltown.

As of December 31, 2014, United Bank had capital of \$13,883,000 and 22 full-time equivalent employees. United Bank had net income for the years ended December 31, 2014, 2013 and 2012 of approximately \$1,110,000, \$1,103,000 and \$1,269,000, respectively. Total assets as of December 31, 2014, 2013 and 2012 were approximately \$107,000,000, \$111,420,000 and \$107,627,000, respectively.

Table Of Contents

Business Strategy and Operations

As a multi-bank holding company for five community banks, the Company emphasizes strong personal relationships to provide products and services that meet the needs of the Banks' customers. The Company seeks to achieve growth and maintain a strong return on equity. To accomplish these goals, the Banks focus on small-to-medium size businesses that traditionally wish to develop an exclusive relationship with a single bank. The Banks, individually and collectively, have the size to give the personal attention required by business owners, in addition to the credit expertise to help businesses meet their goals.

The Banks offer a full range of deposit services that are typically available in most financial institutions, including checking accounts, savings accounts and time deposits of various types, ranging from money market accounts to longer-term certificates of deposit. One major goal in developing the Banks' product mix is to keep the product offerings as simple as possible, both in terms of the number of products and the features and benefits of the individual services. The transaction accounts and time certificates are tailored to each Bank's principal market area at rates competitive in that Bank's market. In addition, retirement accounts such as IRAs (Individual Retirement Accounts) are available. The FDIC insures all deposit accounts up to the maximum amount. The Banks solicit these accounts from small-to-medium sized businesses in their respective primary trade areas, and from individuals who live and/or work within these areas. No material portion of the Banks' deposits has been obtained from a single person or from a few persons. Therefore, the Company does not believe that the loss of the deposits of any person or of a few persons would have an adverse effect on the Banks' operations or erode their deposit base.

Loans are provided to creditworthy borrowers regardless of their race, color, national origin, religion, sex, age, marital status, disability, receipt of public assistance or any other basis prohibited by law. The Banks intend to fulfill this commitment while maintaining prudent credit standards. In the course of fulfilling this obligation to meet the credit needs of the communities which they serve, the Banks give consideration to each credit application regardless of the fact that the applicant may reside in a low to moderate income neighborhood, and without regard to the geographic location of the residence, property or business within their market areas.

The Banks provide innovative, quality financial products, such as Internet banking and trust services that meet the banking needs of their customers and communities. The loan programs and acceptance of certain loans may vary from time-to-time depending on the funds available and regulations governing the banking industry. The Banks offer all basic types of credit to their local communities and surrounding rural areas, including commercial, agricultural and consumer loans. The types of loans within these categories are as follows:

Commercial Loans. Commercial loans are typically made to sole proprietors, partnerships, corporations and other business entities such as municipalities where the loan is to be used primarily for business purposes. These loans are typically secured by assets owned by the borrower and often times involve personal guarantees given by the owners of

the business. Approximately 52% of the loan portfolio consists of loans made for commercial purposes.

The types of loans the Banks offer include:

- financing guaranteed under Small Business Administration programs
- operating and working capital loans
- loans to finance equipment and other capital purchases
- commercial real estate loans
 - business lines of credit
- term loans
- loans to professionals
- letters of credit

Agricultural Loans. The Banks, by nature of their location in central and north-central Iowa, are directly and indirectly involved in agriculture and agri-business lending. This includes short-term seasonal lending associated with cyclical crop and livestock production, intermediate term lending for machinery, equipment and breeding stock acquisition and long-term real estate lending. These loans are typically secured by the crops, livestock, equipment or real estate being financed. The basic tenet of the Banks' agricultural lending philosophy is a blending of strong, positive cash flow supported by an adequate collateral position, along with a demonstrated capacity to withstand short-term negative impact if necessary. Applicable governmental subsidies and affiliated programs are utilized if warranted to accomplish these parameters. Approximately 21% of the loan portfolio consists of loans made for agricultural purposes.

Table Of Contents

Consumer Loans. Consumer loans are typically available to finance home improvements and consumer purchases, such as automobiles, household furnishings and boats. These loans are made on both a secured and an unsecured basis. The following types of consumer loans are available:

- automobiles and trucks
- boats and recreational vehicles
- personal loans and lines of credit
- home equity lines of credit
- home improvement and rehabilitation loans
- consumer real estate loans

Other types of credit programs, such as loans to nonprofit organizations, to public entities, for community development and to other governmental programs also are available.

First National, Boone Bank, State Bank and United Bank offer wealth management services typically found in a commercial bank with trust powers, including the administration of estates, conservatorships, personal and corporate trusts and agency accounts. The Banks also provide farm management, investment and custodial services for individuals, businesses and non-profit organizations.

The Banks earn income from the origination of residential mortgages that are sold in the secondary real estate market without retaining the mortgage servicing rights.

The Banks offer traditional banking services, such as safe deposit boxes, wire transfers, direct deposit of payroll and social security checks, automated teller machine access and automatic drafts (ACH) for various accounts.

Lending Credit Management

The Company strives to achieve sound credit risk management. In order to achieve this goal, the Company has established uniform credit policies and underwriting criteria for the Banks' loan portfolios. The Banks diversify in the types of loans offered and are subject to regular credit examinations, annual internal and external loan audits and annual review of large loans, as well as quarterly reviews of loans experiencing deterioration in credit quality. The Company attempts to identify potential problem loans early, charge off loans promptly and maintain an adequate allowance for loan losses. The Company has established credit guidelines for the Banks' lending portfolios which include guidelines relating to the more commonly requested loan types, as follows:

Commercial Real Estate Loans - Commercial real estate loans, including agricultural real estate loans, are normally based on loan to appraisal value ratios of not to exceed 80% and secured by a first priority lien position. Loans are typically subject to interest rate adjustments no less frequently than 5 years from origination. Fully amortized monthly repayment terms normally do not exceed twenty years. Projections and cash flows that show ability to service debt within the amortization period are required. Property and casualty insurance is required to protect the Banks' collateral interests. Commercial and agricultural real estate loans represent approximately 47% of the loan portfolio. Major risk factors for commercial real estate loans, as well as the other loan types described below, include a geographic concentration in central Iowa; the dependence of the local economy upon several large governmental entities, including Iowa State University and the Iowa Department of Transportation; and the health of Iowa's agricultural sector that is dependent on weather conditions and government programs.

Commercial and Agricultural Operating Lines - These loans are made to businesses and farm operations with terms up to twelve months. The credit needs are generally seasonal with the source of repayment coming from the entity's normal business cycle. Cash flow reviews are completed to establish the ability to service the debt within the terms of the loan. A first priority lien on the general assets of the business normally secures these types of loans. Loan-to-value limits vary and are dependent upon the nature and type of the underlying collateral and the financial strength of the borrower. Crop and hail insurance is required for most agricultural borrowers. Loans are generally guaranteed by the principal(s).

Commercial and Agricultural Term Loans – These loans are made to businesses and farm operations to finance equipment, breeding stock and other capital expenditures. Terms are generally the lesser of five years or the useful life of the asset. Term loans are normally secured by the asset being financed and are often additionally secured with the general assets of the business. Loan to value is generally 75% of the cost or value of the assets. Loans are normally guaranteed by the principal(s). Commercial and agricultural operating and term loans represent approximately 27% of the loan portfolio.

Table Of Contents

Residential First Mortgage Loans – Proceeds of these loans are used to buy or refinance the purchase of residential real estate with the loan secured by a first lien on the real estate. Most of the residential mortgage loans originated by the Banks (including servicing rights) are sold in the secondary mortgage market due to the higher interest rate risk inherent in the 15 and 30 year fixed rate terms consumers prefer. Loans that are originated and not sold in the secondary market generally have fixed rates of up to fifteen years. The maximum amortization of first mortgage residential real estate loans is 30 years. The loan-to-value ratios normally do not exceed 90% without credit enhancements such as mortgage insurance. Property insurance is required on all loans to protect the Banks' collateral position. Loans secured by one to four family residential properties represent approximately 18% of the loan portfolio.

Home Equity Term Loans – These loans are normally for the purpose of home improvement or other consumer purposes and are secured by a junior mortgage on residential real estate. Loan-to-value ratios normally do not exceed 90% of market value.

Home Equity Lines of Credit - The Banks offer a home equity line of credit generally with a maximum term of 60 months. These loans are secured by a junior mortgage on the residential real estate and normally do not exceed a loan-to-market value ratio of 90% with the interest adjusted quarterly.

Consumer Loans – Consumer loans are normally made to consumers under the following guidelines. Automobiles - loans on new and used automobiles generally will not exceed 90% and 75% of the value, respectively. Recreational vehicles and boats will not exceed 90% and 66% of the value, respectively. Each of these loans is secured by a first priority lien on the assets and requires insurance to protect the Banks' collateral position. Unsecured - The term for unsecured loans generally does not exceed 12 months. Consumer and other loans represent approximately 2% of the loan portfolio.

Investments available-for-sale

The investment policy of the Company generally is to invest funds among various categories of investments and maturities based upon the Company's need for liquidity, to achieve the proper balance between its desire to minimize risk and maximize yield, and to fulfill the Company's asset/liability management policies. The Company's investment portfolios are managed in accordance with a written investment policy adopted by the Board of Directors. It is the Company's general policy to purchase investment securities which are U.S. Government securities, U.S. government agency, state and local government obligations, corporate debt securities and overnight federal funds.

Employees

At December 31, 2014, the Banks had a total of 212 full-time equivalent employees and the Company had an additional 12 full-time employees. The Company and Banks provide their employees with a comprehensive program of benefits, including comprehensive medical and dental plans, long-term and short-term disability coverage, and a 401(k) profit sharing plan. Management considers its relations with employees to be satisfactory. Unions represent none of the employees.

Market Area

The Company operates five commercial banks with locations in Boone, Hancock, Marshall, Polk and Story Counties in central and north central Iowa.

First National is headquartered in Ames, Iowa with a population of 61,792. The major employers are Iowa State University, National Center for Animal Health, Iowa Department of Transportation, Mary Greeley Medical Center, Ames Community Schools, City of Ames, Sauer-Danfoss and McFarland Clinic. The Bank maintains four offices in the Des Moines metro area with a population of approximately 600,000. The major employers in the Des Moines metro market are State of Iowa, Principal Financial Group, Wells Fargo, UnityPoint Health, Mercy Medical Center, Nationwide Insurance, DuPont Pioneer, Meredith Corporation and John Deere. First National's primary business includes providing retail banking services and business and consumer lending. First National has a minimum exposure to agricultural lending.

Boone Bank is located in Boone, Iowa with a population of 12,629. Boone is the county seat of Boone County. The major employers are Fareway Stores, Inc., Iowa National Guard, Union Pacific Railroad, Boone County Hospital and Communication Data Services. The Bank offers a full line of loan, deposit, and trust services. Boone Bank provides lending services to the agriculture, commercial and real estate markets.

State Bank is located in Nevada, Iowa with a population of 6,776. Nevada is the county seat of Story County. The major employers are Print Graphics, General Financial Supply, Mid-American Manufacturing, Mid-States Millwright & Builders, Inc., Burke Corporation and Almaco. State Bank provides various types of loans with a major agricultural presence. It provides a wide variety of banking services including wealth management, deposit, ATM and debit card, and merchant card processing.

Table Of Contents

Reliance Bank is headquartered in Story City, Iowa with a population of 3,426. The major employers in the Story City area are Bethany Manor, American Packaging, M.H. Eby, Inc. and Record Printing. The Bank also maintains offices in Garner, Iowa with a population of 3,098 and Klemme, Iowa with a population of 496. Garner is the county seat of Hancock County. The major employers in the Garner/Klemme area are Iowa Mold & Tooling and Stellar Industries. All locations are in major agricultural areas and the Bank has a strong presence in this type of lending. As a full service commercial bank, it provides a full line of products and services.

United Bank is located in Marshalltown, Iowa with a population of 27,844. The major employers are Iowa Veterans Home, Marshalltown School District, JBS Swift & Co., Emerson Process Management/Fisher Division, Lennox Industries and Marshalltown Medical & Surgical Center. Marshalltown is the county seat of Marshall County. The Bank offers a full line of loan, deposit, and trust services. Loan services include primarily commercial and consumer types of credit including operating lines, equipment loans, automobile financing and real estate loans.

Competition

The geographic market area served by the Banks is highly competitive with respect to both loans and deposits. The Banks compete principally with other commercial banks, savings and loan associations, credit unions, mortgage companies, finance divisions of auto and farm equipment companies, agricultural suppliers and other financial service providers. Some of these competitors are local, while others are statewide or nationwide. The major commercial bank competitors include Great Western Bank, U.S. Bank National Association and Wells Fargo Bank, each of which maintains an office or offices within the Banks' primary central Iowa trade areas. Among the advantages such larger banks have are their ability to finance extensive advertising campaigns and to allocate their investment assets to geographic regions of higher yield and demand. These larger banking organizations have much higher legal lending limits than the Banks and thus are better able to finance large regional, national and global commercial customers.

In order to compete with the other financial institutions in their primary trade areas, the Banks use, to the fullest extent possible, the flexibility which is accorded by independent status. This includes an emphasis on specialized services, local promotional activity and personal contacts by the Banks' officers, directors and employees. In particular, the Banks compete for deposits principally by offering depositors a wide variety of deposit programs, convenient office locations, hours and other services. The Banks compete for loans primarily by offering competitive interest rates, experienced lending personnel and quality products and services.

As of December 31, 2014, there were 44 FDIC insured institutions having approximately 112 locations within Boone, Hancock, Marshall, Polk and Story County, Iowa where the Banks' offices are located. First National, State Bank and Reliance Bank together have the largest percentage of deposits in Story County.

The Banks also compete with the financial markets for funds. Yields on corporate and government debt securities and commercial paper affect the ability of commercial banks to attract and hold deposits. Commercial banks also compete for funds with equity, money market, and insurance products offered by brokerage and insurance companies. This competitive trend will likely continue in the future.

The Company anticipates bank competition will continue to change materially over the next several years as more financial institutions, including the major regional and national banks, continue to consolidate. Credit unions, which are not subject to income taxes, have a significant competitive advantage and provide additional competition in the Company's local markets.

Supervision and Regulation

The following discussion refers to certain statutes and regulations affecting the banking industry in general. These references provide brief summaries and therefore do not purport to be complete and are qualified in their entirety by reference to those statutes and regulations. In addition, due to the numerous statutes and regulations that apply to and regulate the banking industry, many are not referenced below.

Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (*"the Dodd-Frank Act"*). In response to the last national and international economic recession and to strengthen supervision of financial institutions and systemically important nonbank financial institutions, Congress and the U.S. government have taken a variety of actions, including the enactment of the Dodd-Frank Act on July 21, 2010. The Dodd-Frank Act represents the most comprehensive change to banking laws since the Great Depression of the 1930s and mandates changes in several key areas: regulation and compliance (both with respect to financial institutions and systemically important nonbank financial companies), securities regulation, executive compensation, regulation of derivatives, corporate governance, transactions with affiliates, deposit insurance assessments and consumer protection. While the changes in the law required by the Dodd-Frank Act has most significantly effected larger institutions, even relatively small institutions such as the Company have been affected.

Table Of Contents

Pursuant to the Dodd-Frank Act, the Banks are subject to regulations promulgated by the consumer protection bureau housed within the Federal Reserve, known as the Bureau of Consumer Financial Protection (the “Bureau” or “BCFP”). The Bureau promulgates rules and orders with respect to consumer financial products and services and has substantial power to define the rights of consumers and responsibilities of lending institutions, such as the Banks. The Bureau will not, however, examine or supervise the Banks for compliance with such regulations; rather, enforcement authority will remain with the Banks’ primary federal regulator although the Banks may be required to submit reports or other materials to the Bureau upon its request.

Prohibition on Unfair, Deceptive and Abusive Acts and Practices. July 21, 2011 was the designated transfer date under the Dodd-Frank Act for the formal transfer of rulemaking functions under the federal consumer financial laws from each of the various federal banking agencies to a new governmental entity, the Bureau, which is charged with the mission of protecting consumer interests. The Bureau is responsible for administering and carrying out the purposes and objectives of the federal consumer financial laws and to prevent evasions thereof, with respect to all financial institutions that offer financial products and services to consumers. The Bureau is also authorized to prescribe rules applicable to any covered person or service provider identifying and prohibiting acts or practices that are unfair, deceptive or abusive in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service. With its broad rulemaking and enforcement powers, the Bureau has the potential to reshape the consumer financial laws through rulemaking, which may directly impact the business operations of financial institutions offering consumer financial products or services, including the Banks.

USA Patriot Act. The USA Patriot Act was enacted in 2001 which, together with regulations issued pursuant to this act, substantially broadened previously existing anti-money laundering laws and regulations, increased compliance, due diligence and reporting obligations for financial institutions, created new crimes and penalties and required federal banking agencies, in reviewing mergers and other acquisition transactions, to consider the effectiveness of the parties in combating money laundering activities. The act requires all financial institutions to establish certain anti-money laundering compliance and due diligence programs that are reasonably designed to detect and report instances of money laundering. The Company believes its compliance policies, procedures and controls satisfy the material requirements of the Patriot Act and regulations.

Sarbanes-Oxley Act. The Sarbanes-Oxley Act was enacted in 2002 to, among other things, increase corporate responsibility and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the federal securities laws. This act generally applies to all companies that are required to file periodic reports with the Securities and Exchange Commission under the Securities Exchange Act of 1934. The act implements significant changes in the responsibilities of officers and directors of public companies and makes certain changes to the corporate reporting obligation of those companies and their external auditors. Among the requirements and prohibitions addressed by the act are certifications required by CEOs and CFOs of periodic reports filed with the SEC; accelerated reporting of stock transactions by directors, officers and large shareholders; prohibitions against personal loans from companies to directors and executive officers (except loans made in the ordinary course of business); requirements for public companies’ audit committees; requirements for auditor independence; the forfeiture of bonuses or other incentive-based compensation and profits from the sale of an issuer’s securities by directors and executive officers in the 12-month period following initial publication of any financial statements that later require restatement;

various increased criminal penalties for violations of securities laws; and the creation of a public company accounting oversight board. Rules adopted by the SEC to implement various provisions of the act include CEO and CFO certifications related to fair presentation of financial statements and financial information in public filings, as well as management's evaluation of disclosure controls and procedures; disclosure of whether any audit committee members qualify as a "financial expert"; disclosures related to audit committee composition and auditor pre-approval policies; disclosure related to adoption of a written code of ethics; reconciling non-generally accepted accounting principles ("GAAP") financial information with GAAP in public communications; disclosure of off-balance sheet transactions; and disclosure related to director independence and the director nomination process. The Company has adopted modifications to its corporate governance procedures to comply with the provisions of the act and regulations.

The Company and the Banks are subject to extensive federal and state regulation and supervision. Regulation and supervision of financial institutions is primarily intended to protect depositors and the FDIC rather than shareholders of the Company. The laws and regulations affecting banks and bank holding companies have changed significantly over recent years. There is reason to expect that similar changes will continue in the future. Any change in applicable laws, regulations or regulatory policies may have a material effect on the business, operations and prospects of the Company. The Company is unable to predict the nature or the extent of the effects on its business and earnings that any fiscal or monetary policies or new federal or state legislation may have in the future.

The Company

The Company is a bank holding company by virtue of its ownership of the Banks, and is registered as such with the Board of Governors of the Federal Reserve System (the "Federal Reserve"). The Company is subject to regulation under the Bank Holding Company Act of 1956, as amended (the "BHCA"), which subjects the Company and the Banks to supervision and examination by the Federal Reserve. Under the BHCA, the Company files with the Federal Reserve annual reports of its operations and such additional information as the Federal Reserve may require.

Table Of Contents

Source of Strength to the Banks. The Federal Reserve takes the position that a bank holding company is required to serve as a source of financial and managerial strength to its subsidiary banks and may not conduct its operations in an unsafe or unsound manner. In addition, it is the Federal Reserve's position that in serving as a source of strength to its subsidiary banks, bank holding companies should use available resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity. It should also maintain the financial flexibility and capital raising capacity to obtain additional resources for providing assistance to its subsidiary banks. A bank holding company's failure to meet its obligation to serve as a source of strength to its subsidiary banks will generally be considered by the Federal Reserve to be an unsafe and unsound banking practice, or a violation of the Federal Reserve's regulations, or both.

Federal Reserve Approval. Bank holding companies must obtain the approval of the Federal Reserve before they: (i) acquire direct or indirect ownership or control of any voting stock of any bank if, after such acquisition, they would own or control, directly or indirectly, more than 5% of the voting stock of such bank; (ii) merge or consolidate with another bank holding company; or (iii) acquire substantially all of the assets of any additional banks.

Non-Banking Activities. With certain exceptions, the BHCA also prohibits bank holding companies from acquiring direct or indirect ownership or control of voting stock in any company other than a bank or a bank holding company unless the Federal Reserve finds the company's business to be incidental to the business of banking. When making this determination, the Federal Reserve in part considers whether allowing a bank holding company to engage in those activities would offer advantages to the public that would outweigh possible adverse effects. A bank holding company may engage in permissible non-banking activities on a de novo basis, if the holding company meets certain criteria and notifies the Federal Reserve within ten (10) business days after the activity has commenced.

Financial Holding Company. Under the Financial Services Modernization Act, eligible bank holding companies may elect (with the approval of the Federal Reserve) to become a "financial holding company." Financial holding companies are permitted to engage in certain financial activities through affiliates that had previously been prohibited activities for bank holding companies. Such financial activities include securities and insurance underwriting and merchant banking. At this time, the Company has not elected to become a financial holding company, but may choose to do so at some time in the future.

Control Transactions. The Change in Bank Control Act of 1978, as amended, requires a person or group of persons acquiring "control" of a bank holding company to provide the Federal Reserve with at least 60 days prior written notice of the proposed acquisition. Following receipt of this notice, the Federal Reserve has 60 days to issue a notice disapproving the proposed acquisition, but the Federal Reserve may extend this time period for up to another 30 days. An acquisition may be completed before the disapproval period expires if the Federal Reserve issues written notice of its intent not to disapprove the action. Under a rebuttable presumption established by the Federal Reserve, the acquisition of 10% or more of a class of voting stock of a bank holding company with a class of securities registered under Section 12 of the Securities Exchange Act of 1934, as amended, would constitute the acquisition of control. In addition, any "company" would be required to obtain the approval of the Federal Reserve under the BHCA before

acquiring 25% (or 5% if the "company" is a bank holding company) or more of the outstanding shares of the Company, or otherwise obtain control over the Company.

Affiliate Transactions. The Company and the Banks are deemed affiliates within the meaning of the Federal Reserve Act, and transactions between affiliates are subject to certain restrictions. Generally, the Federal Reserve Act: (i) limits the extent to which the financial institution or its subsidiaries may engage in "covered transactions" with an affiliate; and (ii) requires all transactions with an affiliate, whether or not "covered transactions," to be on terms substantially the same, or at least as favorable to the institution or subsidiary, as those provided to a non-affiliate. The term "covered transaction" includes the making of loans, purchase of assets, issuance of a guarantee and similar transactions.

State Law on Acquisitions. Iowa law permits bank holding companies to make acquisitions throughout the state. However, Iowa currently has a deposit concentration limit of 15% on the amount of deposits in the state that any one banking organization can control and continue to acquire banks or bank deposits (by acquisitions), which applies to all depository institutions doing business in Iowa.

Banking Subsidiaries

Applicable federal and state statutes and regulations governing a bank's operations relate, among other matters, to capital adequacy requirements, required reserves against deposits, investments, loans, legal lending limits, certain interest rates payable, mergers and consolidations, borrowings, issuance of securities, payment of dividends, establishment of branches and dealings with affiliated persons.

Table Of Contents

First National and United Bank are national banks subject to primary federal regulation and supervision by the Office of Comptroller of the Currency ("OCC"). The FDIC, as an insurer of the deposits, also has some limited regulatory authority over First National and United Bank. State Bank, Boone Bank and Reliance Bank are state banks subject to regulation and supervision by the Iowa Division of Banking. The three state Banks are also subject to regulation and examination by the FDIC, which insures their respective deposits to the maximum extent permitted by law. The federal laws that apply to the Banks regulate, among other things, the scope of their business, their investments, their reserves against deposits, the timing of the availability of deposited funds and the nature and amount of and collateral for loans. The laws and regulations governing the Banks generally have been promulgated to protect depositors and the deposit insurance fund of the FDIC and not to protect stockholders of such institutions or their holding companies.

The OCC and FDIC each have authority to prohibit banks under their supervision from engaging in what it considers to be an unsafe and unsound practice in conducting their business. The Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA") requires federal banking regulators to adopt regulations or guidelines in a number of areas to ensure bank safety and soundness, including internal controls, credit underwriting, asset growth, management compensation, ratios of classified assets to capital and earnings. FDICIA also contains provisions which are intended to change independent auditing requirements, restrict the activities of state-chartered insured banks, amend various consumer banking laws, limit the ability of "undercapitalized banks" to borrow from the Federal Reserve's discount window, require regulators to perform periodic on-site bank examinations and set standards for real estate lending.

Borrowing Limitations. Each of the Banks is subject to limitations on the aggregate amount of loans that it can make to any one borrower, including related entities. Subject to numerous exceptions based on the type of loans and collateral, applicable statutes and regulations generally limit loans to one borrower of 15% of total equity and reserves. Each of the Banks is in compliance with applicable loans to one borrower requirements.

FDIC Insurance. Under the Dodd-Frank Act, a permanent increase in deposit insurance was authorized to \$250,000. The coverage limit is per depositor, per insured depository institution for each account ownership category. The FDIC has adopted a risk-based insurance assessment system under which depository institutions contribute funds to the FDIC insurance fund based on their risk classification. The FDIC may terminate the deposit insurance of any insured depository institution if it determines after an administrative hearing that the institution has engaged or is engaging in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law.

Capital Adequacy Requirements. The Federal Reserve, the FDIC and the OCC (collectively, the "Agencies") have adopted risk-based capital guidelines for banks and bank holding companies that are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies and account for off-balance sheet items. Failure to achieve and maintain adequate capital levels may give rise to supervisory action through the issuance of a capital directive to ensure the maintenance of required capital levels. Each of the Banks is in compliance with applicable risk-based capital level requirements as of December 31, 2014.

The current guidelines require all federally regulated banks to maintain a minimum risk-based total capital ratio equal to 8%, of which at least 4% must be Tier 1 capital. Tier 1 capital includes common shareholders' equity, qualifying perpetual preferred stock and minority interests in equity accounts of consolidated subsidiaries, but excludes goodwill and most other intangibles and the allowance for loan and lease losses. Tier 2 capital includes the excess of any preferred stock not included in Tier 1 capital, mandatory convertible securities, hybrid capital instruments, subordinated debt and intermediate term preferred stock, 45% of unrealized gain of equity securities and general reserve for loan and lease losses up to 1.25% of risk weighted assets.

Under these guidelines, banks' assets are given risk weights of 0%, 20%, 50% or 100%. Most loans are assigned to the 100% risk category, except for first mortgage loans fully secured by residential property and, under certain circumstances, residential construction loans (both carry a 50% rating). Most investment securities are assigned to the 20% category, except for municipal or state revenue bonds (which have a 50% rating) and direct obligations of or obligations guaranteed by the United States Treasury or United States Government Agencies (which have a 0% rating).

The Agencies have also implemented a leverage ratio, which is equal to Tier 1 capital as a percentage of average total assets less intangibles, to be used as a supplement to the risk based guidelines. The principal objective of the leverage ratio is to limit the maximum degree to which a bank may leverage its equity capital base. The minimum required leverage ratio for top rated institutions is 3%, but most institutions are required to maintain an additional cushion of at least 100 to 200 basis points. Any institution operating at or near the 3% level is expected to be a strong banking organization without any supervisory, financial or operational weaknesses or deficiencies. Any institutions experiencing or anticipating significant growth would be expected to maintain capital ratios, including tangible capital positions, well above the minimum levels. The Banks Tier 1 ratios are considered well capitalized.

Table Of Contents

Basel III. In July 2013 federal regulators approved final rules (the “Basel III Capital Rules”) establishing a new comprehensive capital framework for U.S. banking organizations. The Basel III Capital Rules generally implement the Basel Committee on Banking Supervision’s (the “Basel Committee”) December 2010 final capital framework referred to as “Basel III” for strengthening international capital standards. The Basel III Capital Rules substantially revise the risk-based capital requirements applicable to bank holding companies and their depository institution subsidiaries, including the Company and the Banks, as compared to the current U.S. general risk-based capital rules. The Basel III Capital Rules revise the definitions and the components of regulatory capital, as well as address other issues affecting the numerator in banking institutions’ regulatory capital ratios. The Basel III Capital Rules also address asset risk weights and other matters affecting the denominator in banking institutions’ regulatory capital ratios and replace the existing general risk-weighting approach, which was derived from the Basel Committee’s 1988 “Basel I” capital accords, with a more risk-sensitive approach based, in part, on the “standardized approach” in the Basel Committee’s 2004 “Basel II” capital accords. In addition, the Basel III Capital Rules implement certain provisions of the Dodd-Frank Act, including the requirements of Section 939A to remove references to credit ratings from the federal agencies’ rules. The Basel III Capital Rules are effective for the Company and the Banks on January 1, 2015, subject to phase-in periods for certain of their components and other provisions.

Among other matters, the Basel III Capital Rules: (i) introduce a new capital measure called “Common Equity Tier 1” (“CET1”) and related regulatory capital ratio of CET1 to risk-weighted assets; (ii) specify that Tier 1 capital consists of CET1 and “Additional Tier 1 capital” instruments meeting certain revised requirements; (iii) mandate that most deductions/adjustments to regulatory capital measures be made to CET1 and not to the other components of capital; and (iv) expand the scope of the deductions from and adjustments to capital as compared to existing regulations. Under the Basel III Capital Rules, for most banking organizations, the most common form of Additional Tier 1 capital is non-cumulative perpetual preferred stock and the most common form of Tier 2 capital is subordinated notes and a portion of the allocation for loan and lease losses, in each case, subject to the Basel III Capital Rules’ specific requirements.

The Basel III Capital Rules also introduce a new “capital conservation buffer”, composed entirely of CET1, on top of these minimum risk-weighted asset ratios. The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum but below the capital conservation buffer will face constraints on dividends, equity repurchases and compensation based on the amount of the shortfall. Thus, when fully phased-in on January 1, 2019, the Banks will be required to maintain such additional capital conservation buffer of 2.5% of CET1, effectively resulting in minimum ratios of (i) CET1 to risk-weighted assets of at least 7%, (ii) Tier 1 capital to risk-weighted assets of at least 8.5%, and (iii) Total capital to risk-weighted assets of at least 10.5%.

The Basel III Capital Rules provide for a number of deductions from and adjustments to CET1. These include, for example, the requirement that deferred tax assets arising from temporary differences that could not be realized through net operating loss carrybacks and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such items, in the aggregate, exceed 15% of CET1.

In addition, under the current general risk-based capital rules, the effects of accumulated other comprehensive income or loss (“AOCI”) items included in shareholders’ equity (for example, mark-to-market of securities held in the available for sale portfolio) under U.S. GAAP are reversed for the purposes of determining regulatory capital ratios. Pursuant to the Basel III Capital Rules, the effects of certain AOCI items are not excluded; however, “non-advanced approaches banking organizations”, including the Company and the Banks, may make a one-time permanent election to continue to exclude these items. This election must be made concurrently with the first filing of certain of the Company’s and the Banks’ periodic regulatory reports in the beginning of 2015. The Company and the Banks expect to make this election in order to avoid significant variations in the level of capital depending upon the impact of interest rate fluctuations on the fair value of their securities portfolio. The Basel III Capital Rules also preclude certain hybrid securities, such as trust preferred securities, from inclusion in Tier 1 capital, subject to grandfathering in the case of companies that had less than \$15 billion in total consolidated assets as of December 31, 2009.

Implementation of the deductions and other adjustments to CET1 will begin on January 1, 2015 and will be phased-in over a 4-year period (beginning at 40% on January 1, 2015 and an additional 20% per year thereafter). The implementation of the capital conservation buffer will begin on January 1, 2016 at the 0.625% level and increase by 0.625% on each subsequent January 1, until it reaches 2.5% on January 1, 2019.

The Basel III Capital Rules prescribe a new standardized approach for risk weightings that expand the risk-weighting categories from the current four Basel I-derived categories (0%, 20%, 50% and 100%) to a larger and more risk-sensitive number of categories, depending on the nature of the assets, generally ranging from 0% for U.S. government and agency securities, to 600% for certain equity exposures, and resulting in higher risk weights for a variety of asset classes.

Should the Company or any of the Banks not meet the requirements of the Basel III Capital Rules, the Company and the Banks would be subject to adverse regulatory action, which action could result in material adverse consequences for the Company and the Banks. We believe that the Company and the Banks will be able to meet targeted capital ratios upon implementation of the revised requirements, as finalized.

Table Of Contents

Prompt Corrective Action. Regulations adopted by the Agencies impose even more stringent capital requirements under prompt corrective action. The FDIC and other Agencies must take certain "prompt corrective action" when a bank fails to meet capital requirements. The regulations establish and define five capital levels: (i) "well-capitalized," (ii) "adequately capitalized," (iii) "undercapitalized," (iv) "significantly undercapitalized" and (v) "critically undercapitalized." Increasingly severe restrictions are imposed on the payment of dividends and management fees, asset growth and other aspects of the operations of institutions that fall below the category of being "adequately capitalized." Undercapitalized institutions are required to develop and implement capital plans acceptable to the appropriate federal regulatory agency. Such plans must require that any company that controls the undercapitalized institution must provide certain guarantees that the institution will comply with the plan until it is adequately capitalized. As of December 31, 2014 each of the Banks was categorized as "well capitalized" under regulatory prompt corrective action provisions.

Restrictions on Dividends. The dividends paid to the Company by the Banks are the major source of Company cash flow. Various federal and state statutory provisions limit the amount of dividends banking subsidiaries are permitted to pay to their holding companies without regulatory approval. Federal Reserve policy further limits the circumstances under which bank holding companies may declare dividends. For example, a bank holding company should not continue its existing rate of cash dividends on its common stock unless its net income is sufficient to fully fund each dividend and its prospective rate of earnings retention appears consistent with its capital needs, asset quality and overall financial condition. In addition, the Federal Reserve and the FDIC have issued policy statements which provide that insured banks and bank holding companies should generally pay dividends only out of current operating earnings. Federal and state banking regulators may also restrict the payment of dividends by order.

First National Bank and United Bank, as national banks, generally may pay dividends, without obtaining the express approval of the OCC, in an amount up to its retained net profits for the preceding two calendar years plus retained net profits up to the date of any dividend declaration in the current calendar year. Retained net profits as defined by the OCC, consists of net income less dividends declared during the period. Boone Bank, Reliance Bank and State Bank are also restricted under Iowa law to paying dividends only out of their undivided profits. Additionally, the payment of dividends by the Banks is affected by the requirement to maintain adequate capital pursuant to applicable capital adequacy guidelines and regulations, and the Banks generally are prohibited from paying any dividends if, following payment thereof, the Bank would be undercapitalized.

Reserves Against Deposits

The Federal Reserve requires all depository institutions to maintain reserves against their transaction accounts (primarily checking accounts) and non-personal time deposits. Generally, reserves of 3% must be maintained against total transaction accounts of \$79,500,000 or less (subject to an exemption not in excess of the first \$12,400,000 of transaction accounts). A reserve of \$2,013,000 plus 10% of amounts in excess of \$79,500,000 must be maintained in the event total transaction accounts exceed \$79,500,000. The balances maintained to meet the reserve requirements imposed by the Federal Reserve may be used to satisfy applicable liquidity requirements. Because required reserves

must be maintained in the form of vault cash or a noninterest bearing account at a Federal Reserve Bank, the effect of this reserve requirement is to reduce the earning assets of the Banks.

Regulatory Enforcement Authority

The enforcement powers available to federal and state banking regulators are substantial and include, among other things, the ability to assess civil monetary penalties, to issue cease-and-desist or removal orders and to initiate injunctive actions against banking organizations and institution-affiliated parties. In general, enforcement actions must be initiated for violations of laws and regulations and unsafe or unsound practices. Other actions, or inactions, may provide the basis for enforcement action, including misleading or untimely reports filed with regulatory authorities. Applicable law also requires public disclosure of final enforcement actions by the federal banking agencies.

National Monetary Policies

In addition to being affected by general economic conditions, the earnings and growth of the Banks are affected by the regulatory authorities' policies, including the Federal Reserve. An important function of the Federal Reserve is to regulate the money supply, credit conditions and interest rates. Among the instruments used to implement these objectives are open market operations in U.S. Government securities, changes in reserve requirements against bank deposits and the Federal Reserve Discount Rate, which is the rate charged member banks to borrow from the Federal Reserve Bank. These instruments are used in varying combinations to influence overall growth and distribution of credit, bank loans, investments and deposits, and their use may also affect interest rates charged on loans or paid on deposits.

Table Of Contents

The monetary policies of the Federal Reserve have had a material impact on the operating results of commercial banks in the past and are expected to have a similar impact in the future. Also important in terms of effect on banks are controls on interest rates paid by banks on deposits and types of deposits that may be offered by banks. The Depository Institutions Deregulation Committee, created by Congress in 1980, phased out ceilings on the rate of interest that may be paid on deposits by commercial banks and savings and loan associations, with the result that the differentials between the maximum rates banks and savings and loans can pay on deposit accounts have been eliminated. The effect of deregulation of deposit interest rates has been to increase banks' cost of funds and to make banks more sensitive to fluctuation in market rates.

Availability of Information on Company Website

The Company files periodic reports with the Securities and Exchange Commission ("SEC"), including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K. The Company makes available on or through its website free of charge all periodic reports filed by the Company with the SEC, including any amendments to such reports, as soon as reasonably practicable after such reports have been electronically filed with the SEC. The address of the Company's website on the Internet is: www.amesnational.com.

The Company will provide a paper copy of these reports free of charge upon written or telephonic request directed to John P. Nelson, CFO, 405 5th Street, Ames, Iowa 50010 or (515) 232-6251 or by email request at info@amesnational.com. The information found on the Company's website is not part of this or any other report the Company files with the SEC.

Executive Officers of Company and Banks

The following table sets forth summary information about the executive officers of the Company and certain executive officers of the Banks. Unless otherwise indicated, each executive officer has served in his current position for the past five years.

Name	Age	Position with the Company or Bank and Principal Occupation and Employment During the Past Five Years
Scott T. Bauer	52	President and Director of First National.
	60	Vice President & Technology Director of the Company.

Kevin G.
Deardorff

Curtis A. Hoff 52 Named President and Director of United Bank on January 1, 2012. Previously served as an Executive Vice President of United Bank and Senior Vice President of State Bank.

Stephen C. McGill 60 President and Director of State Bank.

John P. Nelson 48 Chief Financial Officer, Vice President, Secretary, Treasurer and Director of the Company. Director and Chairman of Reliance Bank.

Thomas H. Pohlman 64 Chief Executive Officer, President and Director of the Company. Director and Chairman of First National, State Bank, Boone Bank and United Bank.

Jeffrey K. Putzier 53 President and Director of Boone Bank.

Richard J. Schreier 47 President and Director of Reliance Bank.

ITEM 1A. RISK FACTORS

Set forth below is a description of risk factors related to the Company's business, provided to enable investors to assess, and be appropriately apprised of, certain risks and uncertainties the Company faces in conducting its business. An investor should carefully consider the risks described below and elsewhere in this Report, which could materially and adversely affect the Company's business, results of operations or financial condition. The risks and uncertainties discussed below are also applicable to forward-looking statements contained in this Report and in other reports filed by the Company with the Securities and Exchange Commission. Given these risks and uncertainties, investors are cautioned not to place undue reliance on forward-looking statements.

Table Of Contents

Risks Related to General Business, Economic and Political Conditions

Our earnings and financial condition are affected by general business, economic and political conditions. For example, a depressed economic environment increases the likelihood of lower employment levels and recession, which could adversely affect our earnings and financial condition. General business and economic conditions that could affect us include short-term and long-term interest rates, inflation, fluctuations in both debt and equity capital markets and the strength of the national and local economies in which we operate. Political conditions can also affect our earnings through the introduction of new regulatory schemes and changes in tax laws.

Our financial performance generally, and in particular the ability of customers to pay interest on and repay principal of outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services we offer, is highly dependent upon the business environment not only in the markets where we operate but also in the state of Iowa generally and in the United States as a whole. A favorable business environment is generally characterized by, among other factors: economic growth; efficient capital markets; low inflation; low unemployment; high business and investor confidence; and strong business earnings. Unfavorable or uncertain economic and market conditions can be caused by: declines in economic growth, business activity, or investor or business confidence; limitations on the availability or increases in the cost of credit and capital; increases in inflation or interest rates; high unemployment; natural disasters; or a combination of these or other factors.

Overall, although showing signs of improvement, the business environment in recent years was unfavorable for many households and businesses in the United States. While economic conditions in our market, the state of Iowa, and the United States have generally improved since the recession, there can be no assurance that this improvement will continue or occur at a meaningful rate. Stagnant or declining economic conditions could materially and adversely affect our results of operations and financial condition.

Risks Related to Investments

As of December 31, 2014, the fair value of our securities portfolio was approximately \$542.5 million. Factors beyond our control can significantly influence the fair value of securities in our portfolio and can cause potential adverse changes to the fair value of those securities. These factors include, but are not limited to, changes in interest rates, an unfavorable change in the liquidity of an investment, rating agency downgrades of the securities, reinvestment risk, liquidity risk, defaults by the issuer or individual mortgagors with respect to the underlying securities, and instability in the credit markets. Any of the foregoing factors could cause us to recognize an other than temporary impairment (OTTI) in future periods and result in realized losses that negatively impact earnings. The success of any investment activity is affected by general economic conditions. Unexpected volatility or illiquidity in the markets in which we hold securities could reduce our liquidity and stockholders' equity. To mitigate these risks, we have access to lines of credit that provide additional liquidity, if needed.

Our investment securities are analyzed quarterly to determine whether, in the opinion of management, any of the securities have OTTI. To the extent that any portion of the unrealized losses in our portfolio of investment securities is determined to have OTTI and is credit loss related, we will recognize a charge to our earnings in the quarter during which such determination is made, and our capital ratios will be adversely impacted. Generally, a fixed income security is determined to have OTTI when it appears unlikely that we will receive all of the principal and interest due in accordance with the original terms of the investment. In addition to credit losses, losses are recognized for a security having an unrealized loss if we have the intent to sell the security or if it is more likely than not that we will be required to sell the security before collection of the principal amount.

Risks Related to Commercial Real Estate Loans

Commercial real estate loans were a significant portion of our total loan portfolio as of December 31, 2014. The market value of real estate can fluctuate significantly in a short period of time as a result of market conditions in the geographic area in which the real estate is located. Adverse developments affecting real estate values in one or more of our markets could increase the credit risk associated with our loan portfolio. Additionally, real estate lending typically involves higher loan principal amounts, and the repayment of the loans generally is dependent, in large part, on sufficient income from the properties securing the loans to cover operating expenses and debt service. Economic events or governmental regulations outside of the control of the borrower or lender could negatively impact the future cash flow and market values of the affected properties.

If the loans that are collateralized by real estate become troubled and the value of the real estate has been significantly impaired, then we may not be able to recover the full contractual amount of principal and interest that was anticipated at the time of originating the loan, which could cause an increase to our provision for loan losses and adversely affect our operating results and financial condition.

Table Of Contents

Risk Related to the Allowance for Loan Losses

We maintain an allowance for loan losses at a level believed to be adequate to absorb estimated losses inherent in the existing loan portfolio. The level of the allowance reflects management's continuing evaluation of industry concentrations; specific credit risks; credit loss experience; current loan portfolio quality; present economic, political and regulatory conditions; and unidentified losses inherent in the current loan portfolio.

Determination of the allowance is inherently subjective as it requires significant estimates and management's judgment of credit risks and future trends, all of which may undergo material changes. Continuing deterioration in economic conditions affecting borrowers, new information regarding existing loans, identification of additional problem loans and other factors, both within and outside of our control, may require an increase in the allowance for loan losses. In addition, bank regulatory agencies periodically review our allowance and may require an increase in the provision for loan losses or the recognition of additional loan charge-offs, based on judgments different from those of management. Also, if charge-offs in future periods exceed the allowance for loan losses, we will need additional provisions to increase the allowance. Any increases in provisions will result in a decrease in net income and capital and may have a material adverse effect on our financial condition and results of operations.

Risk Related to Other Real Estate Owned

Other real estate owned consists of real estate collateral that we have received in foreclosure or accepted in lieu of foreclosure on nonperforming loans. Management obtains independent appraisals or performs evaluations to determine that these properties are carried on our financial statements at the lower of the new cost basis or fair value less cost to sell. These independent appraisals or evaluations are performed periodically by management with respect to current and any future other real estate owned, and any subsequent write-downs will be recorded as a charge to operations, if necessary, to reduce the carrying value of a property to the lower of its cost or fair value less cost to sell. Due to potential changes in economic conditions, it is reasonably possible that changes in fair values will occur in the near term and that such changes could materially affect the amounts reported in our financial statements and reduce our earnings.

Rising Interest Rates

An increase in interest rates that may occur in connection with the recovery of the economy could negatively impact our net interest margin if interest expense increases more quickly than interest income. Our earning assets (primarily our loan and investment portfolio) have longer maturities than our interest bearing liabilities (primarily our deposits and other borrowings). Therefore, in a rising interest rate environment, interest expense will increase more quickly

than interest income, as the interest bearing liabilities reprice more quickly than earning assets, placing downward pressure on the net interest margin. A reduction in the net interest margin could negatively affect our results of operations, including earnings. In response to this challenge, we model quarterly the changes in income that would result from various changes in interest rates. Management believes our earning assets have the appropriate maturity and repricing characteristics to optimize earnings and interest rate risk positions.

Liquidity Risk

Maintaining adequate liquidity is essential to the banking business. An inability to raise funds through deposits, borrowing, sale of securities or other sources could have a substantial negative impact on our liquidity. Access to funding sources in amounts necessary to finance our activities or with terms that are acceptable to us could be impaired by factors that affect us specifically or the financial services industry or economy in general. Factors that could detrimentally impact our access to liquidity sources include a decrease in the level of our business activity as a result of a downturn in the markets or adverse regulatory action taken against us. Our ability to borrow could be impaired by factors such as a disruption in the financial markets or negative views and expectations of the prospects for the financial services industry in light of the challenges facing the industry.

We maintain liquidity primarily through customer deposits and other short-term funding sources, including advances from the Federal Home Loan Bank (FHLB), Federal Reserve Bank (FRB) overnight borrowings and purchased federal funds. If economic conditions change so that we do not have access to short-term credit, or our depositors withdraw a substantial amount of their funds for other uses, we might experience liquidity issues. Our efforts to monitor and manage liquidity risk may not be successful or sufficient to deal with dramatic or unanticipated reductions in our liquidity. In such events, our cost of funds may increase, thereby reducing our net interest income, or we may need to sell a portion of our investment portfolio, which, depending upon market conditions, could result in us realizing losses on such sales.

Table Of Contents

Concentration of Operations

Our operations are concentrated primarily in central and north central Iowa. As a result of this geographic concentration, our results may correlate to the economic conditions in this area. Any deterioration in economic conditions in central or north central Iowa, particularly in the industries on which the area depends (including agriculture which, in turn, is dependent upon weather conditions and government support programs), may adversely affect the quality of our loan portfolio and the demand for our products and services, and accordingly, its financial condition and results of operations.

Competition with Larger Financial Institutions

The banking and financial services business in our market area continues to be a competitive field and is becoming more competitive as a result of:

changes in regulations;
changes in technology and product delivery systems; and
the accelerating pace of consolidation among financial services providers.

It may be difficult for us to compete effectively in the market, and our results of operations could be adversely affected by the nature or pace of change in competition. We compete for loans, deposits and customers with various bank and non-bank financial services providers, many of which are much larger in total assets and capitalization, have greater access to capital markets and offer a broader array of financial services. Our strategic planning efforts continue to focus on capitalizing on our strengths in local markets while working to identify opportunities for improvement to gain competitive advantages.

Damage to our Reputation could Adversely Affect our Business

Our business depends upon earning and maintaining the trust and confidence of our customers, investors, and employees. Damage to our reputation could cause significant harm to our business. Harm to our reputation could arise from numerous sources, including employee misconduct, compliance failures, litigation, or governmental investigations, among other things. In addition, a failure to deliver appropriate standards of service, or a failure or perceived failure to treat customers and clients fairly, could result in customer dissatisfaction, litigation, and heightened regulatory scrutiny, all of which could lead to lost revenue, higher operating costs and harm to our reputation. Adverse publicity about us, whether or not true, may also result in harm to our business. Should any events

or circumstances that could undermine our reputation occur, there can be no assurance that the additional costs and expenses that we may incur in addressing such issues would not adversely affect our financial condition and results of operations.

Trading Volume

The trading volume in our common stock on the Nasdaq Capital Market is relatively limited compared to those of larger companies listed on the NASDAQ Capital Market, the NASDAQ Global Markets, the New York Stock Exchange or other consolidated reporting systems or stock exchanges. A change in the supply or demand for our common stock may have a more significant impact on the price of our stock than for more actively traded companies.

Technological Advances

The financial services industry is undergoing technological changes with frequent introductions of new technology-driven products and services. In addition to improving customer services, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our future success will depend, in part, on our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements and there is a risk we could become less competitive if we are unable to take advantage of these improvements.

Information Security

We depend on data processing, communication and information exchange on a variety of computing platforms and networks and over the internet. We cannot be certain all of our systems are entirely free from vulnerability to attack, despite safeguards which have been installed. Additionally, we rely on and do business with a variety of third-party service providers and vendors with respect to our business, data and communications needs. If information security is breached, or one of our service providers or vendors breaches compliance procedures, information could be lost or misappropriated, resulting in financial loss or costs to us or damage to others. If information security is breached, our financial condition, results of operations and future prospects could be adversely affected.

Table Of Contents

Our accounting policies and methods may require management to make estimates about matters that are inherently uncertain

Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. Our management must exercise judgment in selecting and applying many of these accounting policies and methods in order to ensure they comply with generally accepted accounting principles (GAAP) and reflect management's judgment as to the most appropriate manner in which to record and report our financial condition and results of operations. In some cases, management must select the accounting policy or method to apply from two or more alternatives, any of which might be reasonable under the circumstances. The application of that chosen accounting policy or method might result in us reporting different amounts than would have been reported under a different alternative. If management's estimates or assumptions are incorrect, we may experience a material loss.

We have identified four accounting policies as being "critical" to the presentation of our financial condition and results of operations because they require management to make particularly subjective and complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different conditions or using different assumptions. These critical accounting policies relate to (1) the fair value and possible OTTI of investment securities available for sale, (2) the valuation of other real estate owned, (3) the allowance for loan losses, and (4) impairment of goodwill. Because of the inherent uncertainty of these estimates, no assurance can be given that application of alternative policies or methods might not result in the reporting of different amounts of the fair value of securities available for sale, the fair value of other real estate owned, the allowance for loan losses, goodwill valuation and, accordingly, net income.

From time to time, the FASB and the SEC change the financial accounting and reporting standards or the interpretation of those standards that govern the preparation of our external financial statements. These changes are beyond our control, can be difficult to predict and could materially impact how we report our financial condition and results of operations.

Changes in these standards are continuously occurring, and given the current economic environment, more drastic changes may occur. The implementation of such changes could have a material adverse effect on our financial condition and results of operations.

Government Regulations

Current and future legislation and the policies established by federal and state regulatory authorities will affect our operations. We are subject to extensive supervision of, and examination by, federal and state regulatory authorities

which may limit our growth and the return to our shareholders by restricting certain activities, such as:

- the payment of dividends to our shareholders;
- the payment of dividends to us by our banking subsidiaries;
- possible mergers with or acquisitions of or by other institutions;
- investment policies;
- loans and interest rates on loans;
- interest rates paid on deposits;
- expansion of branch offices; and/or
- the possibility to provide or expand securities or trust services.

On July 21, 2010, the Dodd-Frank Act was signed into law. The Dodd-Frank Act represented a comprehensive overhaul of the financial services industry within the United States and, among many other things, established the new federal BCFP and required the BCFP and other federal agencies to implement many significant rules and regulations. Compliance with the law and regulations has resulted in additional costs, and not all the rules and regulations have been finalized.

We cannot predict what changes, if any, will be made to existing federal and state legislation and regulations or the effect that any changes may have on future business and earnings prospects. The cost of compliance with future regulatory requirements may adversely affect our net income.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table Of Contents

ITEM 2. PROPERTIES

The Company's office is housed in the main office of First National located at 405 5th Street, Ames, Iowa and occupies approximately 3,400 square feet. There are lease agreements between the Company and First National. The main office owned by First National, consists of approximately 45,000 square feet. In addition to its main office, First National conducts its business through six full-service offices, the University office, North Grand office, Ankeny office, West Glen office, Valley Junction office and Johnston office. The University office is located in a temporary leased space in proximity to Iowa State University campus in Ames, Iowa. The University office will be moving to a Bank owned office less than one mile from the rented space and is expected to be opened in 2015. The North Grand office is located in Ames, Iowa and consists of approximately 2,500 square feet. The office in Ankeny, Iowa occupies approximately 14,000 square feet, of which approximately 3,000 square feet is leased to four tenants for business purposes. The West Glenn office is located in West Des Moines, Iowa and occupies approximately 12,500 square feet and is leased from the Company. The West Glen office leases approximately 2,000 square feet to one tenant. The Valley Junction office is located in West Des Moines, Iowa and consists of approximately 2,600 square feet. The Johnston office is leased and consists of 3,800 square feet. All of the properties owned by the Company and First National are free of any mortgages.

State Bank conducts its business from its main office located at 1025 Sixth Street, Nevada, Iowa and from a full-service office located in Colo, Iowa. All of these properties are owned by State Bank free of any mortgage.

Boone Bank conducts its business from its main office located at 716 Eighth Street, Boone, Iowa and from one additional full-service office also located in Boone, Iowa. All properties are owned by Boone Bank free of any mortgage.

Reliance Bank conducts its business from its main office located at 606 Broad Street, Story City, Iowa. Approximately 12,400 square feet of the Story City office is leased to twelve tenants. Reliance also has full services offices located in Garner and Klemme, Iowa. All properties are owned by Reliance Bank free of any mortgage.

United Bank conducts its business from its main office located at 2101 South Center Street, Marshalltown, Iowa and from a full-service office also located in Marshalltown, Iowa. All properties are owned by United Bank free of any mortgage.

ITEM 3. LEGAL PROCEEDINGS

The Banks are from time-to-time parties to various legal actions arising in the normal course of business. The Company believes that there is no threatened or pending proceeding against the Company or the Banks, which, if determined adversely, would have a material adverse effect on the business or financial condition of the Company or the Banks.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

On February 27, 2015, the Company had approximately 399 shareholders of record and an estimated 1,004 additional beneficial owners whose shares were held in nominee titles through brokerage or other accounts. The Company’s common stock is traded on the NASDAQ Capital Market under the symbol “ATLO”. Trading in the Company’s common stock is, however, relatively limited. The closing price of the Company’s common stock was \$24.66 on February 27, 2015.

Based on information provided to and gathered by the Company on an informal basis, the Company believes that the high and low sales price for the common stock on a per share basis during the last two years is as follows:

	2014			2013	
	Market Price			Market Price	
Quarter	High	Low	Quarter	High	Low
1st	\$23.50	\$20.24	1st	\$22.91	\$19.92
2nd	\$23.35	\$21.15	2nd	\$23.15	\$18.50
3rd	\$24.37	\$22.13	3rd	\$23.94	\$19.87
4th	\$26.87	\$21.63	4th	\$23.05	\$21.09

Table Of Contents

The Company declared aggregate annual cash dividends in 2014 and 2013 of approximately \$6,704,000 and \$5,959,000, respectively, or \$0.72 per share in 2014 and \$0.64 per share in 2013. In February 2015, the Company declared a cash dividend of approximately \$1,862,000 or \$0.20 per share.

Quarterly dividends declared during the last two years were as follows:

Quarter	2014	2013
	Cash dividends declared per share	Cash dividends declared per share
1st	\$ 0.18	\$ 0.16
2nd	\$ 0.18	\$ 0.16
3rd	\$ 0.18	\$ 0.16
4th	\$ 0.18	\$ 0.16

The decision to declare cash dividends in the future and the amount thereof rests within the discretion of the Board of Directors of the Company and will be subject to, among other things, the future earnings, capital requirements and financial condition of the Company and certain regulatory restrictions imposed on the payment of dividends by the Banks. Such restrictions are discussed in greater detail in Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources and in Note 15 (Regulatory Matters) to the Company's financial statements included herein.

Table Of Contents

The following performance graph provides information regarding cumulative, five-year total return on an indexed basis of the Company's common stock as compared with the NASDAQ Composite Index, the SNL Midwest OTC_BB and Pink Banks ("Midwest OTC Bank Index") and the SNL Bank NASDAQ Index ("NASDAQ Bank Index") prepared by SNL Financial L.C. of Charlottesville, Virginia (www.snl.com). The Midwest OTC Bank Index reflects the performance of 129 bank holding companies operating principally in the Midwest as selected by SNL Financial. The NASDAQ Bank Index is comprised of 280 bank and bank holding companies listed on the NASDAQ market and operating throughout the United States. The indexes assume the investment of \$100 on December 31, 2009, in the Company's common stock, the NASDAQ Composite Index, Midwest OTC Bank Index and the NASDAQ Bank Index with all dividends reinvested. The Company's stock price performance shown in the following graph is not indicative of future stock price performance.

In November, 2014, the Board of Directors approved a Stock Repurchase Plan which provided for the repurchase of up to 100,000 shares of the Company's common stock. This Stock Repurchase Plan replaced the previous Stock Repurchase Plan (approved in November, 2013) that expired in November, 2014. The Company did not purchase any shares in 2014 or 2013 under either of the Stock Repurchase Plans that were in effect during 2014 or 2013.

Table Of Contents

The following table provides information with respect to purchases made by or on behalf of the Company or any “affiliated purchaser” (as defined in rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of the Company’s common stock during the three months ended December 31, 2014.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number of Shares that May Yet Be Purchased Under The Plan
October 1, 2014 to October 31, 2014 (1)	-	\$ -	-	100,000
November 1, 2014 to November 30, 2014 (1) and (2)	-	\$ -	-	100,000
December 1, 2014 to December 31, 2014 (2)	-	\$ -	-	100,000
Total	-		-	

The Stock Repurchase Plan adopted in November, 2013 expired on November 13, 2014 and no shares remain (1) available for purchase under this plan as a result of the expiration. No purchases were made under this plan during October or November, 2014.

(2) A successor Stock Repurchase Plan was approved and became effective on November 12, 2014 and authorized the purchase of 100,000 shares. This plan is scheduled to expire on November 12, 2015. No purchases were made under this plan during November or December, 2014.

Table Of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The following financial data of the Company for the five years ended December 31, 2010 through 2014 is derived from the Company's historical audited financial statements and related footnotes. The information set forth below should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operation" and the consolidated financial statements and related notes contained elsewhere in this Annual Report.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**Overview**

The following discussion is provided for the consolidated operations of the Company and its Banks. The purpose of this discussion is to focus on significant factors affecting the Company's financial condition and results of operations.

The Company does not engage in any material business activities apart from its ownership of the Banks and the managing of its own bond, equity and loan portfolios. Products and services offered by the Banks are for commercial and consumer purposes, including loans, deposits and wealth management services. The Banks also offer investment services through a third-party broker-dealer. The Company employs twelve individuals to assist with financial reporting, human resources, marketing, audit, compliance, technology systems and the coordination of management activities, in addition to 212 full-time equivalent individuals employed by the Banks.

The Company's primary competitive strategy is to utilize seasoned and competent Bank management and local decision-making authority to provide customers with prompt response times and flexibility in the products and services offered. This strategy is viewed as providing an opportunity to increase revenues through the creation of a competitive advantage over other financial institutions. The Company also strives to remain operationally efficient to improve profitability while enabling the Banks to offer more competitive loan and deposit rates.

The principal sources of Company revenues and cash flows are: (i) interest and fees earned on loans made or held by the Company and Banks; (ii) interest on fixed income investments held by the Company and the Banks; (iii) fees on wealth management services; (iv) service charges on deposit accounts maintained at the Banks; (v) gain on the sale of loans held for sale; (vi) securities gains; and (vii) merchant and card fees. The Company's principal expenses are: (i) interest expense on deposit accounts and other borrowings; (ii) salaries and employee benefits; (iii) data processing costs primarily associated with maintaining the Banks' loan and deposit functions; (iv) occupancy expenses for maintaining the Banks' facilities; (v) professional fees; (vi) business development; (vii) Federal Deposit Insurance Corporation (the "FDIC") insurance assessments; and (viii) other real estate owned expenses. The largest component contributing to the Company's net income is net interest income, which is the difference between interest earned on earning assets (primarily loans and investments) and interest paid on interest bearing liabilities (primarily deposit accounts and other borrowings). One of management's principal functions is to manage the spread between interest earned on earning assets and interest paid on interest bearing liabilities in an effort to maximize net interest income while maintaining an appropriate level of interest rate risk.

The Company reported net income of \$15,251,000 for the year ended December 31, 2014 compared to \$13,954,000 and \$14,182,000 reported for the years ended December 31, 2013 and 2012, respectively. This represents an increase in net income of 9.3% when comparing 2014 with 2013. The increase in net income in 2014 from 2013 was primarily the result of an increase in net interest income, gain on the sale of premises and equipment in 2014 and an increase in wealth management income, offset in part by increases salaries and benefits and other real estate owned expenses. The gain on the sale of premises and equipment was primarily due to the sale of First National's University office. The First Bank Acquisition, described in Item 1 of this Report, contributed to increases in net interest income, noninterest income and noninterest expense. The decrease in net income in 2013 from 2012 was primarily the result of higher provision for loan losses, higher salaries and benefits and lower gain on the sale of loans held for sale, offset in part by an increase in net interest income. The Liberty Acquisition, described in Item 1 of this Report, contributed to increases in net interest income, noninterest income and noninterest expense. Earnings per share for 2014 were \$1.64 compared to \$1.50 in 2013 and \$1.52 in 2012. All five Banks demonstrated profitable operations during 2014.

Table Of Contents

The Company's return on average equity for 2014 was 10.09% compared to 9.76% and 10.08% in 2013 and 2012, respectively, and the return on average assets for 2014 was 1.21% compared to 1.14% in 2013 and 1.24% in 2012. The increase in return on average equity and assets when comparing 2014 to 2013 was primarily a result of increased net income. The decrease in return on average equity and assets when comparing 2013 to 2012 was primarily a result of decreased net income.

The following discussion will provide a summary review of important items relating to:

- Challenges
- Key Performance Indicators
- Industry Results
- Critical Accounting Policies
- Income Statement Review
- Balance Sheet Review
- Asset Quality Review and Credit Risk Management
- Liquidity and Capital Resources
- Interest Rate Risk
- Inflation
- Forward-Looking Statements and Business Risks

Challenges

Management has identified certain events or circumstances that have the potential to negatively impact the Company's financial condition and results of operations in the future and is attempting to position the Company to best respond to those challenges.

If interest rates increase significantly over a relatively short period of time due to improving national employment levels or higher inflationary numbers, the interest rate environment may present a challenge to the Company. Increases in interest rates may negatively impact the Company's net interest margin if interest expense increases more quickly than interest income, thus placing downward pressure on net interest income. The Company's earning assets (primarily its loan and investment portfolio) have longer maturities than its interest bearing liabilities (primarily deposits and other borrowings); therefore, in a rising interest rate environment, interest expense will tend to increase more quickly than interest income as the interest bearing liabilities reprice more quickly than earning assets. In response to this challenge, the Banks model quarterly the changes in income that would result from various changes in interest rates. Management believes Bank earning assets have the appropriate maturity and repricing characteristics to optimize earnings and the Banks' interest rate risk positions.

If market interest rates in the three to five year term remain at low levels as compared to the short term interest rates, the interest rate environment may present a challenge to the Company. The Company's earning assets (typically priced at market interest rates in the three to five year range) will reprice at lower interest rates, but the deposits will not reprice at significantly lower interest rates, therefore the net interest income may decrease. Management believes Bank earning assets have the appropriate maturity and repricing characteristics to optimize earnings and the Banks' interest rate risk positions.

Other real estate owned amounted to \$8.4 million and \$8.9 million as of December 31, 2014 and 2013, respectively. Other real estate owned costs, net amounted to \$1,502,000, \$651,000 and \$483,000 for the years ended December 31, 2014, 2013 and 2012, respectively. Management obtains independent appraisals or performs evaluations to determine that these properties are carried at the lower of the new cost basis or fair value less cost to sell. It is at least reasonably possible that change in fair values will occur in the near term and that such changes, which would be charged against earnings, could have a negative impact on the Company's net income.

Table Of Contents**Key Performance Indicators**

Certain key performance indicators for the Company and the industry are presented in the following chart. The industry figures are compiled by the Federal Deposit Insurance Corporation (FDIC) and are derived from 6,812 commercial banks and savings institutions insured by the FDIC. Management reviews these indicators on a quarterly basis for purposes of comparing the Company's performance from quarter to quarter against the industry as a whole.

Selected Indicators for the Company and the Industry

	Year Ended December 31,									
	2014		2013		2012					
	Company	Industry	Company	Industry	Company	Industry	Company	Industry		
Return on assets	1.21 %	1.01 %	1.14 %	1.07 %	1.24 %	1.00 %				
Return on equity	10.09 %	9.03 %	9.76 %	9.56 %	10.08 %	8.92 %				
Net interest margin	3.31 %	3.14 %	3.18 %	3.26 %	3.35 %	3.42 %				
Efficiency ratio	53.37 %	61.88 %	52.78 %	60.54 %	52.33 %	61.60 %				
Capital ratio	11.97 %	9.46 %	11.67 %	9.41 %	12.31 %	9.15 %				

Key performance indicators include:

Return on Assets

This ratio is calculated by dividing net income by average assets. It is used to measure how effectively the assets of the Company are being utilized in generating income. The Company's return on assets ratio is higher than that of the industry, primarily as a result of the Company's net interest margin, provision for loan losses and non-interest expense relative to the industry.

Return on Equity

This ratio is calculated by dividing net income by average equity. It is used to measure the net income or return the Company generated for the shareholders' equity investment in the Company. The Company's return on equity ratio is higher than the industry primarily as a result of the Company's net interest margin, provision for loan losses and non-interest expense relative to the industry, offset in part by a higher capital ratio.

Net Interest Margin

This ratio is calculated by dividing net interest income by average earning assets. Earning assets consist primarily of loans and investments that earn interest. This ratio is used to measure how well the Company is able to maintain interest rates on earning assets above those of interest-bearing liabilities, which is the interest expense paid on deposit accounts and other borrowings. The Company's net interest margin is slightly higher than the industry, due primarily to a higher yields on earning assets at the Company as compared to the industry.

Efficiency Ratio

This ratio is calculated by dividing noninterest expense by net interest income and noninterest income. The ratio is a measure of the Company's ability to manage noninterest expenses. The Company's efficiency ratio is lower than the industry average, primarily as a result of the Company's lower non-interest expense.

Capital Ratio

The capital ratio is calculated by dividing average total equity capital by average total assets. It measures the level of average assets that are funded by shareholders' equity. Given an equal level of risk in the financial condition of two companies, the higher the capital ratio, generally the more financially sound the company. The Company's capital ratio is significantly higher than the industry average.

Table Of Contents

Industry Results

The FDIC Quarterly Banking Profile reported the following results for the fourth quarter of 2014:

Quarterly ROA Falls Below 1% for First Time in 2 Years

Strengthening loan growth helped lift revenues at most banks, but higher litigation expenses at a few large banks and lower noninterest income from sales, securitization, and servicing of residential mortgage loans caused the industry's fourth-quarter net income to fall below the level of a year earlier. A majority of banks, 61%, reported improved quarterly earnings, while the proportion of unprofitable institutions fell to 9.4% from 12.7% in fourth quarter 2013. However, fourth-quarter net income of \$36.9 billion was \$2.9 billion (7.3%) less than in fourth quarter 2013, as the four largest banks reported year-over-year declines in quarterly net income totaling \$4.1 billion. The average return on assets (ROA) fell to 0.96% from 1.09% the year before. This is the first time in two years that the average quarterly ROA has fallen below 1%.

Most Banks Report Increased Revenues

Net operating revenue, the sum of net interest income and total noninterest income, increased by \$923 million (0.6%) in the fourth quarter, compared with fourth quarter 2013. Net interest income was \$1.1 billion (1%) higher, while total noninterest income was \$160 million (0.3%) lower. The increase in net interest income was attributable to growth in interest-bearing assets, which increased 6.2% in the 12 months ended December 31. Almost 71% of all banks reported higher net interest income than a year earlier. The average net interest margin in the fourth quarter was 3.12%, compared with 3.27% in fourth quarter 2013 and 3.15% in third quarter 2014. The decline in noninterest income was primarily the result of a \$1.6 billion (30.8%) drop in revenue from the sale, securitization, and servicing of residential mortgage loans. More than half of all banks (54.4%) reported higher noninterest income than the year-earlier quarter.

Loss Provisions Rise for a Second Consecutive Quarter

For a second consecutive quarter, the amount that banks set aside for loan-loss provisions was higher than a year earlier. Loan-loss provisions totaled \$8.2 billion in the fourth quarter, up \$878 million (12%) versus fourth quarter 2013. Noninterest expenses were \$4.9 billion (4.8%) higher, as itemized litigation expenses at a few of the largest banks were \$4.4 billion more than the year-earlier quarter.

Full-Year Earnings Post First Decline in Five Years

Full-year 2014 net income totaled \$152.7 billion, \$1.7 billion (1.1%) less than the industry earned in 2013. This is the first decline in annual net income in five years. The full-year ROA was 1.01%, marking the third year in a row that annual ROA has been above 1%. Reduced revenues from mortgage sales, securitization, and servicing (down \$9.1 billion, or 35.1%), and increased litigation expenses (up \$6.5 billion) were the main contributors to the drop in full-year earnings. Almost two out of every three banks (64%) reported increased earnings in 2014, but 7 of the 10 largest banks reported lower earnings. Although more than two-thirds of all banks reported higher net operating revenue, the industry total was essentially unchanged from 2013, as net interest income rose by \$5.5 billion (1.3%), and noninterest income fell by \$5.5 billion (2.2%). This is the first time in four years that annual net interest income has increased. Full-year loan-loss provisions were \$2.7 billion (8.4%) lower in 2014. Noninterest expenses were \$5.2 billion (1.2%) higher, as the higher litigation expenses were offset in part by a \$3.5 billion (72.9%) reduction in goodwill impairment charges.

Net Charge-Off Rate Falls to an Eight-Year Low

Asset-quality indicators continued to improve in the fourth quarter, as net charge-offs (NCOs) posted a year-over-year decline for the 18th consecutive quarter. Fourth-quarter NCOs were \$2.2 billion (18.3%) lower than in fourth quarter 2013. The largest improvements were in retail loan categories. Residential mortgage loan NCOs fell by \$785 million (49.9%), while charge-offs of home equity lines of credit were \$446 million (39.1%) lower, and credit card NCOs were \$356 million (6.4%) less than in fourth quarter 2013. The average net charge-off rate in the fourth quarter fell to 0.48%, from 0.62% a year earlier. This is the lowest fourth quarter NCO rate since 2006.

The Noncurrent Loan Rate Falls Below 2%

The amount of loans that were noncurrent (90 days or more past due or in nonaccrual status) declined for the 19th quarter in a row. During the three months ended December 31, noncurrent loan balances fell by \$9.2 billion (5.4%). The biggest improvements occurred in real estate loan portfolios. Noncurrent residential mortgage balances fell by \$5.3 billion (4.9%) during the quarter, while noncurrent nonfarm nonresidential real estate loans declined by \$1.6 billion (9.4%), and noncurrent real estate construction and development loan balances declined by \$887 million (15.1%). The percentage of total loans and leases that were noncurrent fell from 2.11% to 1.96% during the quarter. This is the first time since the end of first quarter 2008 that the noncurrent rate has been below 2%.

Table Of Contents

The Industry Continues to Release Reserves

Insured institutions reduced their reserves for loan losses by \$2.6 billion (2.1%) in the fourth quarter, as net charge-offs of \$9.9 billion exceeded the \$8.2 billion that banks set aside in loan-loss provisions. This is the 19th consecutive quarter that the industry's loss reserves have declined. At the end of 2014, reserves totaled \$122.6 billion, the lowest since the end of first quarter 2008. The ratio of reserves to total loans and leases fell to 1.48% at year-end, a seven-year low. Despite the reduction in reserves, the industry's coverage ratio of reserves to noncurrent loans and leases improved for the ninth quarter in a row, rising from 72.9% to 75.4%. This is the highest level for the coverage ratio since third quarter 2008.

Retained Earnings Are More Than Double the Year-Ago Level

Equity capital increased by \$15.7 billion (0.9%) during the quarter. Retained earnings contributed \$13.9 billion to capital growth, more than twice the \$4.8 billion of a year earlier. Total risk-based capital rose by \$20.3 billion (1.3%). At the end of 2014, 98.6% of all insured institutions, representing 99.8% of industry assets, met or exceeded the requirements for the highest regulatory capital category, as defined for Prompt Corrective Action purposes.

12-Month Loan Growth Rate Rises Above 5%

Total assets increased by \$204.4 billion (1.3%), as loan and lease balances rose by \$149.4 billion (1.8%), holdings of U.S. Treasury securities increased by \$59.9 billion (17.3%), and balances at Federal Reserve banks grew by \$58.6 billion (4.4%). Loan growth was led by commercial and industrial (C&I) loans, which increased by \$42.2 billion (2.5%); credit cards, which posted a seasonal \$35.4 billion (5.2%) increase; nonfarm nonresidential real estate loans, which rose by \$16.7 billion (1.5%); and real estate construction and development loans, which grew by \$7.9 billion (3.4%). Loans to small businesses and farms increased by \$2.9 billion (0.4%), as small C&I loans rose by \$4.2 billion (1.4%). For the 12 months ended December 31, total loan and lease balances were up by 5.3%, the highest 12-month growth rate since mid-year 2008. Eighty percent of the increase in Treasury securities and 85% of the growth in Federal Reserve balances in the fourth quarter occurred at banks with assets greater than \$250 billion, which are subject to a new Liquidity Coverage Ratio rule.

Large Denomination Deposits Continue to Lead Growth in Liabilities

Deposits increased by \$167.3 billion (1.4%) in the fourth quarter, as balances in domestic offices rose by \$195.2 billion (1.9%), and deposits in foreign offices fell by \$27.9 billion (2%). Most of the growth in domestic deposits occurred in accounts with balances greater than \$250,000. Balances in these large denomination accounts increased by \$158.9 billion (3.1%), while balances in domestic accounts of less than \$250,000 rose by \$50.3 billion (1%). Time deposits posted their largest quarterly increase since third quarter 2008, rising by \$96.8 billion (6%). Nondeposit liabilities increased by \$22.5 billion (1.1%), as banks increased their Federal Home Loan Bank advances by \$21.1 billion (4.8%).

No New Charters Added in 2014

The number of FDIC-insured commercial banks and savings institutions reporting financial results fell to 6,509 at year-end, from 6,589 at the end of September, and 6,812 at the end of 2013. During the fourth quarter, mergers absorbed 75 institutions, while four insured institutions failed. For the full year, there were 274 institutions absorbed by mergers and 18 failures. This is the smallest number of bank failures in a year since 2007. In 2013, there were 24 failures. No new banks were chartered in 2014, marking the second time in the last three years that there have been no new bank charters. There were 2,047,879 full-time equivalent employees reported at year-end 2014, down 761 from September 30, and down 20,840 from year-end 2013. The number of banks on the FDIC's "Problem List" declined from 329 to 291 during the fourth quarter, and total assets of "problem" banks fell from \$102 billion to \$87 billion. The "Problem List" is at its lowest level since year-end 2008.

Critical Accounting Policies

The discussion contained in this Item 7 and other disclosures included within this Annual Report are based on the Company's audited consolidated financial statements which appear in Item 8 of this Annual Report. These statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The financial information contained in these statements is, for the most part, based on the financial effects of transactions and events that have already occurred. However, the preparation of these statements requires management to make certain estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses.

Table Of Contents

The Company's significant accounting policies are described in the "Notes to Consolidated Financial Statements" accompanying the Company's audited financial statements. Based on its consideration of accounting policies that involve the most complex and subjective estimates and judgments, management has identified the allowance for loan losses, valuation of other real estate owned, the assessment of other-than-temporary impairment for investment securities and the assessment of goodwill to be the Company's most critical accounting policies.

Allowance for Loan Losses

The allowance for loan losses is established through a provision for loan losses that is treated as an expense and charged against earnings. Loans are charged against the allowance for loan losses when management believes that collectability of the principal is unlikely. The Company has policies and procedures for evaluating the overall credit quality of its loan portfolio, including timely identification of potential problem loans. On a quarterly basis, management reviews the appropriate level for the allowance for loan losses, incorporating a variety of risk considerations, both quantitative and qualitative. Quantitative factors include the Company's historical loss experience, delinquency and charge-off trends, collateral values, known information about individual loans and other factors. Qualitative factors include various considerations regarding the general economic environment in the Company's market area. To the extent actual results differ from forecasts and management's judgment, the allowance for loan losses may be greater or lesser than future charge-offs. Due to potential changes in conditions, it is at least reasonably possible that changes in estimates will occur in the near term and that such changes could be material to the amounts reported in the Company's financial statements.

For further discussion concerning the allowance for loan losses and the process of establishing specific reserves, see the section of this Annual Report entitled "Asset Quality Review and Credit Risk Management" and "Analysis of the Allowance for Loan Losses".

Other Real Estate Owned

Real estate properties acquired through or in lieu of foreclosure are initially recorded at the fair value less estimated selling cost at the date of foreclosure. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan losses. Costs of significant property improvements are capitalized, whereas costs relating to holding property are expensed. The portion of interest costs relating to development of real estate is capitalized. Valuations are periodically performed by management and property held for sale is carried at the lower of the new cost basis or fair value less cost to sell and any subsequent write-downs are charged to operations. Impairment losses on property to be held and used are measured as the amount by which the carrying amount of a property exceeds its fair value less costs to sell. This evaluation is inherently subjective and requires estimates that are susceptible to significant revisions as more information becomes available. Due to potential changes in conditions, it is at least reasonably possible that changes in fair values will occur in the near term and that such changes could

materially affect the amounts reported in the Company's financial statements.

Other-Than-Temporary Impairment of Investment Securities

Declines in the fair value of available-for-sale securities below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers (1) the intent to sell the investment securities and the more likely than not requirement that the Company will be required to sell the investment securities prior to recovery (2) the length of time and the extent to which the fair value has been less than cost and (3) the financial condition and near-term prospects of the issuer. Due to potential changes in conditions, it is at least reasonably possible that changes in management's assessment of other-than-temporary impairment will occur in the near term and that such changes could be material to the amounts reported in the Company's financial statements.

Goodwill

Goodwill arose in connection with the First Bank Acquisition on August 29, 2014 and the Liberty Acquisition on April 27, 2012. Goodwill is tested annually for impairment or more often if conditions indicate a possible impairment. For the purposes of goodwill impairment testing, determination of the fair value of a reporting unit involves the use of significant estimates and assumptions. Impairment would arise if the fair value of a reporting unit is less than its carrying value. At December 31, 2014, Company management has completed the goodwill impairment analysis and determined goodwill was not impaired. Actual future test results may differ from the present evaluation of impairment due to changes in the conditions used in the current evaluation.

Table Of Contents**Income Statement Review**

The following highlights a comparative discussion of the major components of net income and their impact for the last three years.

Average Balances and Interest Rates

The following two tables are used to calculate the Company's net interest margin. The first table includes the Company's average assets and the related income to determine the average yield on earning assets. The second table includes the average liabilities and related expense to determine the average rate paid on interest bearing liabilities. The net interest margin is equal to the interest income less the interest expense divided by average earning assets. Refer to the net interest income discussion following the tables for additional detail.

ASSETS

Table Of Contents

Rate and Volume Analysis

The rate and volume analysis is used to determine how much of the change in interest income or expense is the result of a change in volume or a change in interest rate. For example, real estate loan interest income increased \$1,848,000 in 2014 compared to 2013. Increased volume of real estate loans increased income in 2014 by \$2,256,000 and lower interest rates decreased interest income in 2014 by \$408,000.

The following table sets forth, on a tax-equivalent basis, a summary of the changes in net interest income resulting from changes in volume and rates.

	2014 Compared to 2013			2013 Compared to 2012		
<i>(dollars in thousands)</i>	Volume	Rate	Total (1)	Volume	Rate	Total (1)

Edgar Filing: AMES NATIONAL CORP - Form 10-K

Other borrowed funds	207	(258)	(51)	(5)	(62)	(67)
Total interest-bearing liabilities	193	(721)	(528)	27	(704)	(677)
Net interest income-earning assets	\$1,989	\$793	\$2,782	\$3,892	\$(2,800)	\$1,092

(1) The change in interest due to both volume and yield/rate has been allocated to change due to volume and change due to yield/rate in proportion to the absolute value of the change in each.

Net Interest Income

The Company's largest contributing component to net income is net interest income, which is the difference between interest earned on earning assets and interest paid on interest bearing liabilities. The volume of and yields earned on earning assets and the volume of and the rates paid on interest bearing liabilities determine net interest income. Refer to the tables preceding this paragraph for additional detail. Interest earned and interest paid is also affected by general economic conditions, particularly changes in market interest rates, by government policies and the action of regulatory authorities. Net interest income divided by average earning assets is referred to as net interest margin. For the years December 31, 2014, 2013 and 2012, the Company's net interest margin was 3.31%, 3.18% and 3.35%, respectively.

Table Of Contents

Net interest income during 2014, 2013 and 2012 totaled \$36,417,000, \$33,359,000 and \$32,320,000, respectively, representing a 9.2% increase in 2014 compared to 2013 and a 3% increase in 2013 from 2012. Net interest income increased in 2014 as compared to 2013 due primarily to increases in the average balance of real estate loans and the average yield on taxable investment securities. Net interest income increased in 2013 as compared to 2012 due primarily to increases in average interest-earning assets and lower rates on deposits, offset in part by declines in yields on loans and investments.

The high level of competition in the local markets will continue to put downward pressure on the net interest margin of the Company. Currently, the Company's market in Ames, Iowa, has ten banks, six credit unions and several other financial investment companies. Multiple banks are also located in the Company's other communities creating similarly competitive environments.

Provision for Loan Losses

The provision for loan losses reflects management's judgment of the expense to be recognized in order to maintain an adequate allowance for loan losses. The Company's provision for loan losses for the year ended December 31, 2014 was \$429,000 compared to \$786,000 for the previous year. The lower provision for loan losses in 2014 as compared to 2013 was due primarily to improved credit quality indicators such as lower past due, impaired and classified loans, as well as a decrease in the allowance for loan loss on impaired loans, offset to a lesser extent due to an increase in the loans receivables. The Company's provision for loan losses for the year ended December 31, 2013 was \$786,000 compared to \$22,000 for the previous year. The higher provision for loan losses in 2013 as compared to 2012 was due primarily to an increase in the loans receivables and offset to a lesser extent due to improved credit quality indicators such as lower past due, impaired and classified loans, as well as a decrease in the allowance for loan loss on impaired loans. Refer to the "Asset Quality and Credit Risk Management" discussion for additional details with regard to loan loss provision expense.

Management believes the allowance for loan losses is adequate to absorb probable losses in the current portfolio. This statement is based upon management's continuing evaluation of inherent risks in the current loan portfolio, current levels of classified assets and general economic factors. The Company will continue to monitor the allowance and make future adjustments to the allowance as conditions dictate. Due to potential changes in conditions, it is at least reasonably possible that change in estimates will occur in the near term and that such changes could be material to the amounts reported in the Company's financial statements.

Noninterest Income and Expense

Total noninterest income is comprised primarily of fee-based revenues from trust and agency services, bank-related service charges on deposit activities, net securities gains, merchant and card fees related to electronic processing of merchant and cash transactions and gain on the sale of loans held for sale.

Noninterest income during the years ended 2014, 2013 and 2012 totaled \$9,252,000, \$7,718,000 and \$7,435,000, respectively. The higher non-interest income in 2014 as compared to 2013 related primarily to the gain on the sale of premises and equipment and wealth management income, offset in part by lower gains on the sale of loans held for sale. The increase in wealth management income was due primarily to market value driven account fees, as market values have increased on managed assets, and estate settlement fees. The gain on the sale of premises and equipment was due primarily to the sale of First National's University office which resulted in a \$1,257,000 gain. The decrease in gain on sale of loans held for sale is due primarily to lower loan origination volume due to higher market interest rates during 2014. The higher non-interest income in 2013 as compared to 2012 related primarily to an increase in securities gains combined with no other-than-temporary impairment in 2013, offset by a lower gain on the sale of loans held for sale. The decrease in gain on sale of loans held for sale is due primarily to lower loan origination volume due to higher market interest rates. Excluding securities gains and gain on sale of premises and equipment in 2014 and 2013, noninterest income increased 2.8% in 2014 as compared to 2013. Excluding securities gains in 2013 and 2012, noninterest income decreased 1.1% in 2013 as compared to 2012.

Noninterest expense for the Company consists of all operating expenses other than interest expense on deposits and other borrowed funds. Salaries and employee benefits are the largest component of the Company's operating expenses and comprise 58%, 61% and 60% of noninterest expense in 2014, 2013 and 2012, respectively.

Noninterest expense during the years ended 2014, 2013 and 2012 totaled \$24,373,000, \$21,679,000 and \$20,803,000, respectively, representing a 12.4% increase in 2014 compared to a 4.2% increase in 2013. The primary reason for the increase in 2014 was higher salaries and employee benefit costs benefits due primarily to normal salary increases, additional payroll costs associated with the First Bank Acquisition and higher incentive pay and higher other real estate owned expenses due to impairment write-downs. The primary reason for the increase in 2013 was higher salaries and employee benefit costs benefits due primarily to the impact of the Liberty Acquisition, increased staffing and normal salary increases. The percentage of noninterest expense to average assets was 1.93% in 2014, compared to 1.77% and 1.82% during 2013 and 2012, respectively.

Table Of Contents

Provision for Income Taxes

The provision for income taxes for 2014, 2013 and 2012 was \$5,616,000, \$4,658,000 and \$4,748,000, respectively. This amount represents an effective tax rate of 27%, 25% and 25% for 2014, 2013 and 2012, respectively. The Company's marginal federal income tax rate is currently 35%. The difference between the Company's effective and marginal tax rate is primarily related to investments made in tax exempt securities. The increase in the effective tax rate for 2014 is due primarily to tax-exempt interest income decreasing as a percent of income before income taxes.

Balance Sheet Review

The Company's assets are comprised primarily of loans and investment securities. Average earning asset maturity or repricing dates are five years or less for the combined portfolios as the assets are funded for the most part by short term deposits with either immediate availability or less than one year average maturities. This exposes the Company to risk with regard to changes in interest rates that are more fully explained in Item 7A of this Annual Report "Quantitative and Qualitative Disclosures about Market Risk".

Total assets increased to \$1,301,031,000 in 2014 compared to \$1,233,084,000 in 2013, a 5.5% increase. The increase in assets was due primarily to an increase in loans primarily from the First Bank Acquisition and growth at the affiliate banks. The increase in loans was offset in part by a decrease in securities available-for-sale.

Loan Portfolio

Net loans as of December 31, 2014 totaled \$658,441,000, an increase of 16.67% from the \$564,502,000 as of December 31, 2013. The increase in loans was primarily due the First Bank Acquisition as well as origination levels at the affiliated banks. This growth primarily resulted in increases in the commercial real estate, 1-4 family real estate and construction real estate portfolios. Loans are the primary contributor to the Company's revenues and cash flows. The average yield on loans was 174 and 204 basis points higher in 2014 and 2013, respectively, in comparison to the average tax-equivalent investment portfolio yields.

Types of Loans

Edgar Filing: AMES NATIONAL CORP - Form 10-K

The following table sets forth the composition of the Company's loan portfolio for the past five years ending at December 31, 2014.

	2014	2013	2012	2011	2010
<i>(dollars in thousands)</i>					
Real Estate					
Construction	\$36,016	\$23,928	\$17,077	\$23,631	\$19,597
1-4 family residential	122,777	108,289	104,268	94,262	88,933
Commercial	257,054	206,112	178,660	147,500	139,370
Agricultural	57,449	53,834	43,868	32,503	31,931
Commercial	92,703	86,823	80,264	75,958	78,173
Agricultural	85,609	81,326	77,483	52,179	45,630
Consumer and other	15,763	12,795	16,340	20,754	22,052
Total loans	667,371	573,107	517,960	446,787	425,686
Deferred loan fees, net	(92)	(34)	(62)	(231)	(71)
Total loans net of deferred fees	\$667,279	\$573,073	\$517,898	\$446,556	\$425,615

The Company's loan portfolio consists of real estate, commercial, agricultural and consumer loans. As of December 31, 2014, gross loans totaled approximately \$667 million, which equals approximately 63.4% of total deposits and 51.3% of total assets. The Company's peer group (consisting of 342 bank holding companies with total assets of \$1 to \$3 billion) loan to deposit ratio as of December 31, 2014 was a much higher 83%. The primary factor relating to the lower loan to deposit ratio for the Company compared to peer group averages is a more conservative underwriting philosophy and a higher level of deposits. As of December 31, 2014, the majority of the loans were originated directly by the Banks to borrowers within the Banks' principal market areas. There are no foreign loans outstanding during the years presented.

Table Of Contents

Real estate loans include various types of loans for which the Banks hold real property as collateral and consist of loans primarily on commercial properties and single family residences. Real estate loans typically have fixed rates for up to five years, with the Company's loan policy permitting a maximum fixed rate maturity of up to 15 years. The majority of construction loan volume is given to contractors to construct commercial buildings and these loans generally have maturities of up to 12 months. The Banks also originate residential real estate loans for sale to the secondary market for a fee.

Commercial loans consist primarily of loans to businesses for various purposes, including revolving lines to finance current operations, floor-plans, inventory and accounts receivable; capital expenditure loans to finance equipment and other fixed assets; and letters of credit. These loans generally have short maturities, have either adjustable or fixed rates and are unsecured or secured by inventory, accounts receivable, equipment and/or real estate.

Agricultural loans play an important part in the Banks' loan portfolios. Iowa is a major agricultural state and is a national leader in both grain and livestock production. The Banks play a significant role in their communities in financing operating, livestock and real estate activities for area producers.

Consumer loans include loans extended to individuals for household, family and other personal expenditures not secured by real estate. The majority of the Banks' consumer lending is for vehicles, consolidation of personal debts, household appliances and improvements.

The interest rates charged on loans vary with the degree of risk and the amount and maturity of the loan. Competitive pressures, market interest rates, the availability of funds and government regulation further influence the rate charged on a loan. The Banks follow a loan policy, which has been approved by both the board of directors of the Company and the Banks, and is overseen by both Company and Bank management. These policies establish lending limits, review and grading criteria and other guidelines such as loan administration and allowance for loan losses. Loans are approved by the Banks' board of directors and/or designated officers in accordance with respective guidelines and underwriting policies of the Company. Credit limits generally vary according to the type of loan and the individual loan officer's experience. Loans to any one borrower are limited by applicable state and federal banking laws.

Table Of Contents*Maturities and Sensitivities of Loans to Changes in Interest Rates as of December 31, 2014*

The contractual maturities of the Company's loan portfolio are as shown below. Actual maturities may differ from contractual maturities because individual borrowers may have the right to prepay loans with or without prepayment penalties.

	Within one year	After one year but within five years	After five years	Total
<i>(dollars in thousands)</i>

Loans Held For Sale

Mortgage origination funding awaiting delivery to the secondary market totaled \$705,000 and \$296,000 as of December 31, 2014 and 2013, respectively. Residential mortgage loans are originated by the Banks and sold to several secondary mortgage market outlets based upon customer product preferences and pricing considerations. The

mortgages are sold in the secondary market to eliminate interest rate risk and to generate secondary market fee income. It is not anticipated at the present time that loans held for sale will become a significant portion of total assets.

Table Of Contents

Investment Portfolio

Total investments as of December 31, 2014 were \$542,502,000, a decrease of \$37.5 million or 6.5% from the prior year end. As of December 31, 2014 and 2013, the investment portfolio comprised 42% and 47% of total assets, respectively.

The following table presents the fair values, which represent the carrying values due to the available-for-sale classification, of the Company's investment portfolio as of December 31, 2014, 2013 and 2012, respectively. This portfolio provides the Company with a significant amount of liquidity.

	2014	2013	2012
<i>(dollars in thousands)</i>			
U.S. government treasuries	\$ 1,448	\$-	\$-
U.S. government agencies	87,307	61,178	48,687
U.S. government mortgage-backed securities	120,985	155,142	191,957
State and political subdivisions	281,776	315,224	309,573
Corporate bonds	47,319	44,752	34,762
Equity securities	3,667	3,743	3,438
Total	\$542,502	\$ 580,039	\$ 588,417

Investments in states and political subdivisions represent purchases of municipal bonds located primarily in the state of Iowa and contiguous states.

The equity securities portfolio consisted primarily of a financial stock and other required stocks, such as the FHLB and FRB stock, as of December 31, 2014, 2013 and 2012.

During the years ended December 31, 2014, 2013 and 2012, the Company only recognized an other-than-temporary impairment on an equity security in 2012 of \$260,000. Management believes that there are no additional other-than-temporary impairments in the securities available-for-sale portfolio at December 31, 2014; however, it is possible that the Company may incur impairment losses in 2015 and thereafter.

As of December 31, 2014, the Company did not have securities from a single issuer, except for the United States Government or its agencies, which exceeded 10% of consolidated stockholders' equity.

The Company's securities available-for-sale portfolio is carried at fair value with "fair value" being defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact, and (iv) willing to transact.

Table Of Contents

The valuation techniques used are consistent with the market approach, the income approach, and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques are consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, a fair value hierarchy was established for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1: Inputs to the valuation methodology are quoted prices, unadjusted, for identical assets or liabilities in active markets. A quoted price in an active market provides the most reliable evidence of fair value and is used to measure fair value whenever available.

Level 2: Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatility, prepayment speeds, credit risk); or inputs derived principally from or can be corroborated by observable market data by correlation or other means.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using discounted cash flow methodologies, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, as well as U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. Other securities available-for-sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the terms and conditions, among other things.

The Company reviews the prices supplied by the independent pricing service, as well as their underlying pricing methodologies, for reasonableness and to ensure such prices are aligned with traditional pricing matrices. In general, the Company does not purchase investment portfolio securities that are esoteric or that have a complicated structure.

The Company's entire portfolio consists of traditional investments, nearly all of which are federal agency or mortgage pass-through securities, general obligation or revenue based municipal bonds or corporate bonds. Equity securities consist of common stock, FHLB stock and FRB stock. Pricing for such instruments is fairly generic and is easily obtained. From time to time, the Company will validate, on a sample basis, prices supplied by the independent pricing service by comparison to prices obtained from third-party sources.

Table Of Contents

Investment Maturities as of December 31, 2014

The investments in the following table are reported by contractual maturity. Expected maturities may differ from contractual maturities because issuers of the securities may have the right to call or prepay obligations with or without prepayment penalties.

	Within one year	After one year but within five years	After five years but within ten years	After ten years	Total
<i>(dollars in thousands)</i>

Total	3.42 %	2.95 %	3.01 %	4.45 %	3.04 %

(1) Yields on tax-exempt obligations of states and political subdivisions have been computed on a tax-equivalent basis.

At December 31, 2014 and 2013, the Company's investment securities portfolio included securities issued by 314 and 315 government municipalities and agencies located within 25 and 25 states with a fair value of \$281,776,320 and \$315,224,133, respectively. No one municipality or agency represents a concentration within this segment of the investment portfolio. The largest exposure to any one municipality or agency as of December 31, 2014 and 2013 was \$5.4 million and \$5.3 million (approximately 1.9% and 1.7% of the fair value of the governmental municipalities and agencies) both represented by the Dubuque, Iowa Community School District to be repaid by sales tax revenues, respectively.

The Company's procedures for evaluating investments in states, municipalities and political subdivisions include but are not limited to reviewing the offering statement and the most current available financial information, comparing yields to yields of bonds of similar credit quality, confirming capacity to repay, assessing operating and financial performance, evaluating the stability of tax revenues, considering debt profiles and local demographics, and for revenue bonds, assessing the source and strength of revenue structures for municipal authorities. These procedures, as applicable, are utilized for all municipal purchases and are utilized in whole or in part for monitoring the portfolio of municipal holdings. The Company does not utilize third party credit rating agencies as a primary component of determining if the municipal issuer has an adequate capacity to meet the financial commitments under the security for the projected life of the investment, and, therefore, does not compare internal assessments to those of the credit rating agencies. Credit rating downgrades are utilized as an additional indicator of credit weakness and as a reference point for historical default rates.

Table Of Contents

The following table summarizes the total general obligation and revenue bonds in the Company's investment securities portfolios as of December 31, 2014 and 2013 identifying the state in which the issuing government municipality or agency operates.

<i>(dollars in thousands)</i>	2014		2013	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value

Total revenue bonds	\$143,895	\$146,511	\$157,801	\$157,643
Total obligations of states and political subdivisions	\$277,328	\$281,776	\$314,177	\$315,224

As of December 31, 2014 and 2013, the revenue bonds in the Company's investment securities portfolios were issued by government municipalities and agencies to fund public services such as community school facilities, college and university dormitory facilities and water utilities. The revenue bonds are to be paid from 11 revenue sources in 2014 and 2013. The revenue sources that represent 5% or more, individually, as a percent of the total revenue bonds are summarized in the following table.

<i>(dollars in thousands)</i>	2014		2013

Total revenue bonds by revenue source	\$143,895	\$146,511	\$157,801	\$157,643

Deposits

Total deposits were \$1,052,123,000 and \$1,011,803,000 as of December 31, 2014 and 2013, respectively. The increase of \$40,320,000 can be attributed to the First Bank Acquisition, offset in part by a reduction in deposits due to a customer transferring funds from a commercial checking account to a daily repurchase agreement.

Table Of Contents

The Company's primary source of funds is customer deposits. The Banks attempts to attract noninterest-bearing deposits, which are a low-cost funding source. In addition, the Banks offer a variety of interest-bearing accounts designed to attract both short-term and longer-term deposits from customers. Interest-bearing accounts earn interest at rates established by Bank management based on competitive market factors and the Company's need for funds. While nearly 58% of the Banks' certificates of deposit mature in the next year, it is anticipated that a majority of these certificates will be renewed. Rate sensitive certificates of deposits in excess of \$100,000 are subject to somewhat higher volatility with regard to renewal volume as the Banks adjust rates based upon funding needs. In the event a substantial volume of certificates is not renewed, the Company has sufficient liquid assets and borrowing lines to fund significant runoff. A sustained reduction in deposit volume would have a significant negative impact on the Company's operation and liquidity. The Company had \$3,247,000 of brokered deposits as of December 31, 2014 and 2013.

Average Deposits by Type

The following table sets forth the average balances for each major category of deposit and the weighted average interest rate paid for deposits during the years ended December 31, 2014, 2013 and 2012.

	2014		2013		2012	
	Average		Average		Average	
	Amount	Rate	Amount	Rate	Amount	Rate
<i>(dollars in thousands)</i>						
Noninterest bearing demand deposits	\$ 171,407	0.00%	\$ 167,207	0.00%	\$ 147,438	0.00%
Interest bearing demand deposits	293,181	0.18%	294,767	0.20%	265,835	0.23%
Money market deposits	244,461	0.21%	233,344	0.21%	201,434	0.22%
Savings deposits	69,633	0.15%	62,933	0.16%	53,218	0.19%
Time certificates > \$100,000	96,244	0.97%	96,247	1.12%	102,033	1.27%
Time certificates < \$100,000	145,704	0.90%	149,934	1.07%	152,585	1.32%
	\$1,020,628		\$1,004,433		\$922,543	

Deposit Maturity

The following table shows the amounts and remaining maturities of time certificates of deposit that had balances of \$100,000 and over as of December 31, 2014, 2013 and 2012.

2014 2013 2012

(dollars in thousands)

3 months or less	\$ 18,632	\$ 18,230	\$ 15,073
Over 3 through 12 months	37,425	39,765	38,570
Over 12 through 36 months	29,308	28,722	32,084
Over 36 months	8,443	10,361	14,199
Total	\$ 93,808	\$ 97,078	\$ 99,926

Securities sold under an agreement to repurchase

Securities sold under agreements to repurchase totaled \$51,265,000 and \$39,617,000 as of December 31, 2014 and 2013, respectively. The increase of \$11,648,000 was primarily related to a commercial customer transferring funds to a daily repurchase account from a commercial checking account.

Borrowed Funds

Borrowed funds that may be utilized by the Company are comprised of FHLB advances, federal funds purchased and repurchase agreements. Borrowed funds are an alternative funding source to deposits and can be used to fund the Company's assets and unforeseen liquidity needs. FHLB advances are loans from the FHLB that can mature daily or have longer maturities for fixed or floating rates of interest. Federal funds purchased are borrowings from other banks that mature daily. Securities sold under agreement to repurchase (repurchase agreements) are similar to deposits as they are funds lent by various Bank customers; however, investment securities are pledged to secure such borrowings. The Company has repurchase agreements that generally reprice daily. Term repurchase agreements are funds lent by a third party with securities pledged to secure such borrowings. These term repurchase agreements have longer terms.

Table Of Contents

The following table summarizes the outstanding amount of, and the average rate on, borrowed funds as of December 31, 2014, 2013 and 2012.

	2014			2013			2012		
	Balance	Average Rate		Balance	Average Rate		Balance	Average Rate	
<i>(dollars in thousands)</i>									
Federal funds purchased and repurchase agreements	\$51,265	0.62	%	\$39,617	0.32	%	\$27,089	0.34	%
FHLB advances	14,468	2.68	%	14,541	2.70	%	14,611	2.86	%
Other borrowings	23,000	3.59	%	20,000	3.40	%	20,000	3.40	%
Total	\$88,733	1.73	%	\$74,157	1.62	%	\$61,700	1.93	%

Average Annual Borrowed Funds

The following table sets forth the average amount of, the average rate paid and maximum outstanding balance on, borrowed funds for the years ended December 31, 2014, 2013 and 2012.

	2014			2013			2012		
	Average Balance	Average Rate		Average Balance	Average Rate		Average Balance	Average Rate	
<i>(dollars in thousands)</i>									
Federal funds purchased and repurchase agreements	\$51,536	0.28	%	\$34,908	0.33	%	\$37,407	0.44	%
FHLB advances	15,888	2.50	%	16,879	2.40	%	14,670	2.88	%

Total	\$85,246	1.36	%	\$71,787	1.69	%	\$72,077	1.78	%

Maximum Amount Outstanding during the Year

Federal funds purchased and repurchase agreements	\$71,485	\$45,956	\$57,107
FHLB advances	\$39,598	\$45,077	\$15,179
Other borrowings	\$23,000	\$20,000	\$20,000

Off-Balance-Sheet Arrangements

The Company is party to financial instruments with off-balance-sheet risk in the normal course of business. These financial instruments include commitments to extend credit and standby letters of credit that assist customers with their credit needs to conduct business. The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheet. As of December 31, 2014, the most likely impact of these financial instruments on revenues, expenses, or cash flows of the Company would come from unidentified credit risk causing higher provision expense for loan losses in future periods. These financial instruments are not expected to have a significant impact on the liquidity or capital resources of the Company. For additional information, see Note 14 of the “Notes to Consolidated Statements” and the “Liquidity and Capital Resources” section of this discussion.

Table Of Contents

Contractual Obligations

The following table sets forth the balance of contractual obligations by maturity period as of December 31, 2014.

Contractual Obligations (dollars in thousands)	Total	Payments due by period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Deposits	\$1,052,123	\$949,719	\$81,098	\$21,306	\$-
Securities sold under agreements to repurchase	51,265	51,265	-	-	-
Federal funds purchased	-	-	-	-	-
FHLB advances and other borrowings (1)	37,468	75	5,158	26,668	5,567
Leases	430	90	185	155	-
Purchase obligations (2)	4,994	1,582	2,270	1,142	-
Total	\$1,146,280	\$1,002,731	\$88,711	\$49,271	\$5,567

FHLB advances consist of various FHLB borrowings with fixed rates with final maturities through 2025. \$11.5 million of the FHLB advances are callable quarterly and \$0.8 million of the FHLB advances are amortizing. Other (1) borrowings also include \$13.0 million of term repurchase agreements having maturities greater than one year and can be called by the issuing financial institution quarterly. The term repurchase agreements have final maturities through 2018. The other borrowings also include sold loans that did not qualify for sale accounting.

Purchase obligations include data processing, internet banking services and card processing contracts that include (2) termination provisions that would accelerate all future payments in the event the Company changed service providers prior to the contracts' expirations.

Asset Quality Review and Credit Risk Management

The Company's credit risk is centered in the loan portfolio, which on December 31, 2014, totaled \$658,441,000 as compared to \$564,502,000 as of December 31, 2013, an increase of 16.6%. Net loans comprise 51% of total assets as of the end of 2014. The object in managing loan portfolio risk is to reduce the risk of loss resulting from a customer's failure to perform according to the terms of a transaction and to quantify and manage credit risk on a portfolio basis. As the following chart indicates, the Company's non-performing assets have decreased by 4.5% from 2013 and total \$10,880,000 as of December 31, 2014. The Company's level of non-performing assets as a percentage of assets of 0.84% as of December 31, 2014, is lower than the average for the Company's peer group of FDIC insured institutions as of December 31, 2014, of 1.04%. Management believes that the allowance for loan losses remains adequate based on its analysis of the non-performing assets and the portfolio as a whole.

Non-performing Assets

The following table sets forth information concerning the Company's non-performing assets for the past five years ended December 31, 2014.

	2014	2013	2012	2011	2010
<i>(dollars in thousands)</i>					
Non-performing assets:					
Nonaccrual loans	\$2,407	\$2,508	\$5,567	\$7,915	\$6,277
Loans 90 days or more past due	36	27	-	152	21
Total non-performing loans	2,443	2,535	5,567	8,067	6,298
Securities available-for-sale	-	-	-	-	377
Other real estate owned	8,436	8,861	9,911	9,538	10,539
Total non-performing assets	\$10,879	\$11,396	\$15,478	\$17,605	\$17,214

Table Of Contents

The accrual of interest on nonaccrual and other impaired loans is generally discontinued at 90 days or when, in the opinion of management, the borrower may be unable to meet payments as they become due. When interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income is subsequently recognized only to the extent cash payments are received and principal obligations are expected to be recoverable. Interest income on restructured loans is recognized pursuant to the terms of the new loan agreement. Interest income on other impaired loans remaining on accrual is monitored and income is recognized based upon the terms of the underlying loan agreement. However, the recorded net investment in impaired loans, including accrued interest, is limited to the present value of the expected cash flows of the impaired loan or the observable fair value of the loan's collateral.

Impaired loans totaled \$2,407,000 as of December 31, 2014 and were \$314,000 lower than the impaired loans as of December 31, 2013. The Company considers impaired loans to generally include the non-performing loans (consisting of nonaccrual loans and loans past due 90 days or more and still accruing) and other loans that may or may not meet the former nonperforming criteria but are considered to meet the definition of impaired.

The allowance for loan losses related to these impaired loans was approximately \$337,000 and \$477,000 at December 31, 2014 and 2013, respectively. The average balances of impaired loans for the years ended December 31, 2014 and 2013 were \$2,172,000 and \$4,838,000, respectively. For the years ended December 31, 2014, 2013 and 2012, interest income, which would have been recorded under the original terms of nonaccrual loans, was approximately \$136,000, \$287,000 and \$366,000, respectively, with \$453,000, \$347,000 and \$23,000, respectively, recorded. There were \$36,000 of loans greater than 90 days past due and still accruing interest as of December 31, 2014 and there were \$27,000 of loans greater than 90 days past due and still accruing interest at December 31, 2013.

Summary of the Allowance for Loan Losses

The provision for loan losses represents an expense charged against earnings to maintain an adequate allowance for loan losses. The allowance for loan losses is management's best estimate of probable losses inherent in the loan portfolio as of the balance sheet date. Factors considered in establishing an appropriate allowance include: an assessment of the financial condition of the borrower; a realistic determination of value and adequacy of underlying collateral; historical charge-offs; the condition of the local economy; the condition of the specific industry of the borrower; an analysis of the levels and trends of loan categories; and a review of delinquent and classified loans.

The adequacy of the allowance for loan losses is evaluated quarterly by management and the respective Bank boards. This evaluation focuses on specific loan reviews, changes in the type and volume of the loan portfolio given the current economic conditions and historical loss experience. Any one of the following conditions may result in the review of a specific loan: concern about whether the customer's cash flow or collateral are sufficient to repay the loan; delinquent status; criticism of the loan in a regulatory examination; the accrual of interest has been suspended; or other reasons, including when the loan has other special or unusual characteristics which warrant special monitoring.

While management uses available information to recognize losses on loans, further reductions in the carrying amounts of loans may be necessary based on changes in local economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the estimated losses on loans. Such agencies may require the Company to recognize additional losses based on their judgment about information available to them at the time of their examination. Due to potential changes in conditions, it is at least reasonably possible that changes in estimates will occur in the near term and that such changes could be material to the amounts reported in the Company's financial statements.

Table Of Contents

Analysis of the Allowance for Loan Losses

The Company's policy is to charge-off loans when, in management's opinion, the loan is deemed uncollectible, although concerted efforts are made to maximize future recoveries. The following table sets forth information regarding changes in the Company's allowance for loan losses for the most recent five years.

	2014	2013	2012	2011	2010

	0.03	% 0.00	% 0.03	% 0.03	% 0.19
					%

Ratio of net charge-offs (recoveries) during the period to average loans outstanding

Ratio of allowance for loan losses to total loans net of deferred fees	1.32	%	1.50	%	1.50	%	1.77	%	1.77	%
--	------	---	------	---	------	---	------	---	------	---

The allowance for loan losses increased to \$8,838,000 at the end of 2014 in comparison to the allowance of \$8,572,000 at year end 2013 as a result of provisions of \$429,000 and net charge-offs of \$162,000. The lower provision for loan losses in 2014 as compared to 2013 was due primarily to improved credit quality indicators, excluding the loans acquired as a part of the First Bank Acquisition, such as past due loans, classified assets, impaired loans, as well as a decrease in the allowance for loan loss on impaired loans. This decrease was offset in part by provisions required due to an increase in the loan portfolio. The allowance for loan losses increased to \$8,572,000 at the end of 2013 in comparison to the allowance of \$7,773,000 at year end 2012 as a result of provisions of \$786,000 and net recoveries of \$13,000. The higher provision for loan losses in 2013 as compared to 2012 was due primarily to a higher provision required as a result of an increase in the loan portfolio. This increase was offset in part by to improved credit quality indicators such as lower impaired loans, as well as a decrease in the allowance for loan loss on impaired loans. The allowance for loan losses decreased to \$7,773,000 at the end of 2012 in comparison to the allowance of \$7,905,000 at year end 2011 as a result of net charge offs of \$154,000, offset in part by provisions of \$22,000. The lower provision for loan losses in 2012 as compared to 2011 was due primarily to improved credit quality indicators such as lower past due, watch, substandard and impaired loans, as well as a decrease in the allowance for loan loss on impaired loans. These factors were offset in part by an increase in the loan portfolio. The allowance for loan losses increased to \$7,905,000 at the end of 2011 in comparison to the allowance of \$7,521,000 at year end 2010 as a result of provisions in 2011 in the amount of \$533,000, offset in part by net charge offs of \$149,000. The lower provision for loan losses in 2011 as compared to 2010 was due primarily to lower net charge offs, offset in part by a higher provision for loan losses on impaired loans for the year ended December 31, 2011 as compared to the year ended December 31, 2010.

Table Of Contents

General reserves for loan categories normally range from 1.07% to 1.99% of the outstanding loan balances. In general as loan volume increases, the general reserve levels increase with that growth and as loan volume decreases, the general reserve levels decrease with that decline. The loan provisions recognized in 2014 were due primarily to increases in the loan portfolio, offset in part by lower provisions needed due to improved credit quality indicators, excluding loans acquired as a part of the First Bank Acquisition, impaired loans, as well as a decrease in the allowance for loan loss on impaired loans. The loan provisions recognized in 2013 were due primarily to increases in the loan portfolio, offset in part by lower impaired loans, as well as a decrease in the allowance for loan loss on impaired loans. The loan provisions recognized in 2012 were due primarily to increases in the loan portfolio, offset in part by improved credit quality indicators such as lower past due, watch, substandard and impaired loans, as well as a decrease in the allowance for loan loss on impaired loans. The allowance relating to commercial real estate, 1-4 family residential and commercial loans are the largest reserve components. Construction and commercial real estate loans have higher general reserve levels as a percentage than 1-4 family and agricultural real estate loans as management perceives more risk in this type of lending. Elements contributing to the higher risk level include a higher percentage of watch, special mention, substandard and impaired loans and less favorable economic conditions for those portfolios. As of December 31, 2014, commercial real estate loans have general reserves ranging from 1.26% to 1.63%.

Other factors considered when determining the adequacy of the general reserve include historical losses; watch, substandard and impaired loan volume; collecting past due loans; loan growth; loan-to-value ratios; loan administration; collateral values; and economic factors. The Company's concentration risks include geographic concentration in central Iowa; the local economy's dependence upon several large governmental entity employers, including Iowa State University and the Iowa Department of Transportation; and the health of Iowa's agricultural sector that, in turn, is dependent on weather conditions and government programs. No assurances can be made that losses will remain at the relatively favorable levels experienced over the past five years.

Loans that the Banks have identified as having higher risk levels are reviewed individually in an effort to establish adequate loss reserves. These reserves are considered specific reserves and are directly impacted by the credit quality of the underlying loans. Normally, as the actual or expected level of non-performing loans increase, the specific reserves also increase. As of December 31, 2014, the specific reserve decreased to \$337,000 from \$477,000, as the volume of problem credits decreased. As of December 31, 2013, the specific reserve decreased to \$477,000 from \$702,000, as the volume of problem credits decreased. As of December 31, 2012, the specific reserve decreased to \$702,000 from \$876,000, as the volume of problem credits decreased. As of December 31, 2011, the specific reserve increased to \$876,000 from \$445,000, as the volume of problem credits increased. As of December 31, 2010, the specific reserve decreased to \$445,000 from \$999,000, as the volume of problem credits decreased and economic conditions related to these borrowers stabilized. The specific reserves are dependent upon assumptions regarding the liquidation value of collateral and the cost of recovering collateral including legal fees. Changing the amount of specific reserves on individual loans has historically had the largest impact on the reallocation of the allowance among different parts of the portfolio.

Table Of Contents

Allocation of the Allowance for Loan Losses

The following table sets forth information concerning the Company's allocation of the allowance for loan losses.

<i>(dollars in thousands)</i>	2014		2013		2012		2011		2010

Liquidity and Capital Resources

Liquidity management is the process by which the Company, through its Banks' Asset and Liability Committees (ALCO), ensures adequate liquid funds are available to meet its financial commitments on a timely basis, at a reasonable cost and within acceptable risk tolerances. These commitments include funding credit obligations to borrowers, funding of mortgage originations pending delivery to the secondary market, withdrawals by depositors, maintaining adequate collateral for pledging for public funds, trust deposits and borrowings, paying dividends to shareholders, payment of operating expenses, funding capital expenditures and maintaining deposit reserve requirements.

Liquidity is derived primarily from core deposit growth and retention; principal and interest payments on loans; principal and interest payments, sale, maturity and prepayment of investment securities; net cash provided from operations; and access to other funding sources. Other funding sources include federal funds purchased lines, FHLB

advances and other capital market sources.

As of December 31, 2014, the level of liquidity and capital resources of the Company remain at a satisfactory level and compare favorably to that of other FDIC insured institutions. Management believes that the Company's liquidity sources will be sufficient to support its existing operations for the foreseeable future.

The liquidity and capital resources discussion will cover the following topics:

Review of the Company's Current Liquidity Sources

Review of the Consolidated Statements of Cash Flows

Review of Company Only Cash Flows

Review of Commitments for Capital Expenditures, Cash Flow Uncertainties and Known Trends in Liquidity and Cash Flow Needs

Capital Resources

Review of the Company's Current Liquidity Sources

Liquid assets of cash on hand, balances due from other banks, federal funds sold and interest-bearing deposits in financial institutions for December 31, 2014, 2013 and 2012 totaled \$55,200,000, \$47,898,000 and \$79,444,000, respectively. The higher balance of liquid assets at December 31, 2014 primarily relates to an increase in interest bearing deposits in financial institutions acquired as a part of the First Bank Acquisition.

Table Of Contents

Other sources of liquidity available to the Banks include borrowing capacity with the FHLB of \$137,399,000 and federal funds borrowing capacity at correspondent banks of \$115,479,000. As of December 31, 2014, the Company had outstanding FHLB advances of \$14,468,000, no federal funds purchased and securities sold under agreements to repurchase daily and term of \$51,265,000 and \$13,000,000, respectively. While the borrowing option is available, the Company has no Treasury Tax and Loan option notes are outstanding.

Total investments as of December 31, 2014, were \$542,502,000 compared to \$580,039,000 as of year-end 2013. As of December 31, 2014 and 2013, the investment portfolio as a percentage of total assets was 42% and 47%, respectively. This provides the Company with a significant amount of liquidity since all investments are classified as available-for-sale as of December 31, 2014 and 2013 and have pretax net unrealized gains of \$7,098,000 and \$716,000, respectively.

The investment portfolio serves an important role in the overall context of balance sheet management in terms of balancing capital utilization and liquidity. The decision to purchase or sell securities is based upon the current assessment of economic and financial conditions, including the interest rate environment, liquidity and credit considerations. The portfolio's scheduled maturities represent a significant source of liquidity.

Review of the Consolidated Statements of Cash Flows

Net cash provided by operating activities for the years ended December 31, 2014, 2013 and 2012 totaled \$19,508,000, \$23,525,000 and \$22,012,000, respectively. The decrease in net cash provided by operating activities in 2014 as compared to 2013 was primarily due to lower amortization of mortgage-backed securities, a decrease in other assets, higher gain on sale and disposal of bank premises and equipment, offset in part by an increase in net income and higher impairment of other real estate owned. The increase in net cash provided by operating activities in 2013 as compared to 2012 was primarily due to the decrease in other assets. Other assets decreased due primarily to the repayment of the FDIC prepaid assessment in 2013.

Net cash provided by (used in) investing activities for the years ended December 31, 2014, 2013 and 2012 was \$16,184,000, \$(47,923,000) and \$(76,955,000), respectively. The change in net cash provided by investing activities in 2014 was primarily due to changes in securities available-for-sale and cash acquired, net of cash paid for acquired bank offices acquired in the First Bank Acquisition, offset in part by the change in interest bearing deposits in financial institutions. The decrease in net cash used in investing activities in 2013 was primarily due to changes in securities available-for-sale and interest bearing deposits in financial institutions, offset in part by changes in loans and the cash acquired, net of cash paid for the bank offices acquired in the Liberty Acquisition.

Net cash provided by (used in) financing activities for the years ended December 31, 2014, 2013 and 2012 totaled \$(36,232,000), \$13,862,000 and \$66,919,000, respectively. The change in net cash (used in) financing activities in 2014 was due primarily to a change in deposits. The decrease in net cash provided by financing activities in 2013 was due primarily to a change in deposits, offset in part by the change in federal funds purchased and securities sold under agreements to repurchase. As of December 31, 2014, the Company did not have any external debt financing, off balance sheet financing arrangements or derivative instruments linked to its stock.

Review of Company Only Cash Flows

The Company's liquidity on an unconsolidated basis is heavily dependent upon dividends paid to the Company by the Banks. The Company requires adequate liquidity to pay its expenses and pay stockholder dividends. In 2014, dividends from the Banks amounted to \$7,600,000 compared to \$7,200,000 in 2013. Various federal and state statutory provisions limit the amount of dividends banking subsidiaries are permitted to pay to their holding companies without regulatory approval. Federal Reserve policy further limits the circumstances under which bank holding companies may declare dividends. For example, a bank holding company should not continue its existing rate of cash dividends on its common stock unless its net income is sufficient to fully fund each dividend and its prospective rate of earnings retention appears consistent with its capital needs, asset quality and overall financial condition. In addition, the Federal Reserve and the FDIC have issued policy statements which provide that insured banks and bank holding companies should generally pay dividends only out of current operating earnings. Federal and state banking regulators may also restrict the payment of dividends by order.

First National and United Bank, as national banks, generally may pay dividends, without obtaining the express approval of the Office of the Comptroller of the Currency ("OCC"), in an amount up to their retained net profits for the preceding two calendar years plus retained net profits up to the date of any dividend declaration in the current calendar year. Retained net profits, as defined by the OCC, consists of net income less dividends declared during the period. Boone Bank, Reliance Bank and State Bank are also restricted under Iowa law to paying dividends only out of their undivided profits. Additionally, the payment of dividends by the Banks is affected by the requirement to maintain adequate capital pursuant to applicable capital adequacy guidelines and regulations, and the Banks generally are prohibited from paying any dividends if, following payment thereof, the Bank would be undercapitalized.

Table Of Contents

The Company has unconsolidated cash, interest bearing deposits and marketable investment securities totaling \$8,404,000 that were available at December 31, 2014 to provide additional liquidity to the Banks.

Review of Commitments for Capital Expenditures, Cash Flow Uncertainties and Known Trends in Liquidity and Cash Flow Needs

Commitments to extend credit totaled \$159,527,000 as of December 31, 2014 compared to a total of \$115,278,000 at the end of 2013. The timing of these credit commitments varies with the underlying borrowers; however, the Company has satisfactory liquidity to fund these obligations as of December 31, 2014. The primary cash flow uncertainty would be a sudden decline in deposits causing the Banks to liquidate securities. Historically, the Banks have maintained an adequate level of short term marketable investments to fund the temporary declines in deposit balances. There are no other known trends in liquidity and cash flow needs as of December 31, 2014, that are of concern to management.

Capital Resources

The Company's total stockholders' equity increased to \$154,674,000 at December 31, 2014, from \$142,106,000 at December 31, 2013. At December 31, 2014 and 2013, stockholders' equity as a percentage of total assets was 11.9% and 11.5%, respectively. The increase in stockholders' equity was primarily the result of net income and higher fair value on the securities available-for-sale as reflected in the increase in accumulated other comprehensive income, offset in part by dividends. The capital levels of the Company currently exceed applicable regulatory guidelines as of December 31, 2014.

From time to time, the Company's board of directors has authorized stock repurchase plans. Stock repurchase plans allow the Company to proactively manage its capital position and return excess capital to shareholders. No shares of common stock were repurchased under stock repurchase plans in 2014 and 2013. Also see Part II, Item 5 - Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, included elsewhere in this Report.

Interest Rate Risk

Interest rate risk refers to the impact that a change in interest rates may have on the Company's earnings and capital. Management's objectives are to control interest rate risk and to ensure predictable and consistent growth of earnings

and capital. Interest rate risk management focuses on fluctuations in net interest income identified through computer simulations to evaluate volatility, varying interest rate, spread and volume assumptions. The risk is quantified and compared against tolerance levels.

The Company uses a third-party computer software simulation modeling program to measure its exposure to potential interest rate changes. For various assumed hypothetical changes in market interest rates, numerous other assumptions are made such as prepayment speeds on loans, the slope of the Treasury yield curve, the rates and volumes of the Company's deposits and the rates and volumes of the Company's loans. This analysis measures the estimated change in net interest income in the event of hypothetical changes in interest rates.

Another measure of interest rate sensitivity is the gap ratio. This ratio indicates the amount of interest-earning assets repricing within a given period in comparison to the amount of interest-bearing liabilities repricing within the same period of time. A gap ratio of 1.0 indicates a matched position, in which case the effect on net interest income due to interest rate movements will be minimal. A gap ratio of less than 1.0 indicates that more liabilities than assets reprice within the time period, while a ratio greater than 1.0 indicates that more assets reprice than liabilities.

The simulation model process provides a dynamic assessment of interest rate sensitivity, whereas a static interest rate gap table is compiled as of a point in time. The model simulations differ from a traditional gap analysis, as a traditional gap analysis does not reflect the multiple effects of interest rate movement on the entire range of assets and liabilities and ignores the future impact of new business strategies.

Inflation

The primary impact of inflation on the Company's operations is to increase asset yields, deposit costs and operating overhead. Unlike most industries, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates generally have a more significant impact on a financial institution's performance than they would on non-financial companies. Although interest rates do not necessarily move in the same direction or to the same extent as the price of goods and services, increases in inflation generally have resulted in increased interest rates. The effects of inflation can magnify the growth of assets and, if significant, require that equity capital increase at a faster rate than would be otherwise necessary.

Table Of Contents

Forward-Looking Statements and Business Risks

Certain statements contained in the foregoing Management's Discussion and Analysis and elsewhere in this Annual Report that are not statements of historical fact constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Act"), notwithstanding that such statements are not specifically identified. In addition, certain statements may be contained in the Company's future filings with the SEC, in press releases and in oral and written statements made by or with the Company's approval that are not statements of historical fact and constitute forward-looking statements within the meaning of the Act. Examples of forward-looking statements include, but are not limited to: (i) projections of revenues, expenses, income or loss, earnings or loss per share, the payment or nonpayment of dividends, capital structure and other financial items; (ii) statements of plans, objectives and expectations of the Company or its management, including those relating to products or services; (iii) statements of future economic performance; and (iv) statements of assumptions underlying such statements. Words such as "believes", "anticipates", "expects", "intends", "targeted", "projected", "continue", "remain", "will", "should", "may" similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements.

Forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from those in such statement. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to:

Local, regional and national economic conditions and the impact they may have on the Company and its customers, and management's assessment of that impact on its estimates including, but not limited to, the allowance for loan losses and fair value of other real estate owned. Of particular relevance are the economic conditions in the concentrated geographic area in central and north-central Iowa in which the Banks conduct their operations.

Changes in the level of nonperforming assets and charge-offs.

Changes in the fair value of securities available-for-sale and management's assessments of other-than-temporary impairment of such securities.

The effects of and changes in trade and monetary and fiscal policies and laws, including the changes in assessment rates established by the Federal Deposit Insurance Corporation for its Deposit Insurance Fund and interest rate policies of the Federal Open Market Committee of the Federal Reserve Board.

Changes in sources and uses of funds, including loans, deposits and borrowings, including the ability of the Banks to maintain unsecured federal funds lines with correspondent banks.

Changes imposed by regulatory agencies to increase capital to a level greater than the level required for well-capitalized financial institutions.

Inflation and interest rate, securities market and monetary fluctuations.

Political instability, acts of war or terrorism and natural disasters.

The timely development and acceptance of new products and services and perceived overall value of these products and services by customers.

Revenues being lower than expected.

Changes in consumer spending, borrowings and savings habits.

Changes in the financial performance and/or condition of the Company's borrowers.

Credit quality deterioration, which could cause an increase in the provision for loan losses.

Technological changes.

The ability to increase market share and control expenses.

Changes in the competitive environment among financial or bank holding companies and other financial service providers.

Table Of Contents

The effect of changes in laws and regulations with which the Company and the Banks must comply, including developments and changes related to the implementation of the recently-enacted Dodd-Frank Act.

Changes in the securities markets.

The effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters, including the International Financial Reporting Standards.

The costs and effects of legal and regulatory developments, including the resolution of regulatory or other governmental inquiries and the results of regulatory examinations or reviews.

The Company's success at managing the risks involved in the foregoing items.

Certain of the foregoing risks and uncertainties are discussed in greater detail under the heading "Risk Factors" in Item 1A herein.

These factors may not constitute all factors that could cause actual results to differ materially from those discussed in any forward-looking statement. The Company operates in a continually changing business environment and new facts emerge from time to time. It cannot predict such factors nor can it assess the impact, if any, of such factors on its financial position or its results of operations. Accordingly, forward-looking statements should not be relied upon as a predictor of actual results. The Company disclaims any responsibility to update any forward-looking statement provided in this document.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's market risk is comprised primarily of interest rate risk arising from its core banking activities of making loans and taking deposits. Interest rate risk is the risk that changes in market interest rates may adversely affect the Company's net interest income. Management continually develops and applies strategies to mitigate this risk. Management does not believe that the Company's primary market risk exposure and how that exposure was managed in 2014 changed when compared to 2013.

Based on a simulation modeling analysis performed as of December 31, 2014, the following table presents the estimated change in net interest income in the event of hypothetical changes in interest rates for the various rate shock levels:

Net Interest Income at Risk

Estimated Change in Net Interest Income for Year Ending December 31, 2015

	\$	%	
	Change	Change	
<i>(dollars in thousands)</i>			
+300 Basis Points	\$(5,296)	-13.97	%
+200 Basis Points	(3,337)	-8.81	%
+100 Basis Points	(1,622)	-4.28	%
-100 Basis Points	(1,376)	-3.63	%

Down 200 and 300 basis points are not presented due to the low interest rate environment.

As shown above, at December 31, 2015, the estimated effect of an immediate 300 basis point increase in interest rates would decrease the Company's net interest income by 13.97% or approximately \$5,296,000 in 2015. In an increasing interest rate environment, the assets are repricing slower than the liabilities, thus a decrease in net interest income. The estimated effect of an immediate 100 basis point decrease in rates would decrease the Company's net interest income by 3.63% or approximately \$1,376,000 in 2015. In a decreasing interest rate environment, a portion of the liabilities are not repricing downward due to their already historically low rates, thus a decrease in net interest income. The Company's Asset Liability Management Policy establishes parameters for a 200 basis point change in interest rates. Under this policy, the Company and the Banks' objective is to properly structure the balance sheet to prevent a 200 basis point change in interest rates from causing a decline in net interest income by more than 15% in one year compared to the base year that hypothetically assumes no change in interest rates.

Computations of the prospective effects of hypothetical interest rate changes are based on numerous assumptions. Actual values may differ from those projections set forth above. Further, the computations do not contemplate any actions the Company may undertake in response to changes in interest rates. Current interest rates on certain liabilities are at a level that does not allow for significant repricing should market interest rates decline considerably.

Table Of Contents

Contractual Maturity or Repricing

The following table sets forth the estimated maturity or re-pricing, and the resulting interest sensitivity gap, of the Company's interest-earning assets and interest-bearing liabilities and the cumulative interest sensitivity gap at December 31, 2014. The expected maturities are presented on a contractual basis. Actual maturities may differ from contractual maturities because of prepayment assumptions, early withdrawal of deposits and competition.

	Less than three months	Three months to one year	One to five years	Over five years	Cumulative Total
<i>(dollars in thousands)</i>					
Interest - earning assets					
Interest-bearing deposits	\$ 13,890	\$ 2,724	\$ 14,849	\$ -	\$ 31,463
Investments (1)	7,720	35,098	297,459	202,225	542,502
Loans	89,894	94,723	317,697	165,057	667,371
Loans held for sale	705	-	-	-	705
Total interest - earning assets	\$ 112,209	\$ 132,545	\$ 630,005	\$ 367,282	\$ 1,242,041
Interest - bearing liabilities					
Interest bearing demand deposits	\$ 298,582	\$ -	\$ -	\$ -	\$ 298,582
Money market and savings deposits	321,700	-	-	-	321,700
Time certificates > \$100,000	18,632	37,425	37,751	-	93,808
Time certificates < \$100,000	28,818	55,836	64,654	-	149,308
Other borrowed funds (2)	968	-	31,500	5,000	37,468
Total interest - bearing liabilities	\$ 668,700	\$ 93,261	\$ 133,905	\$ 5,000	\$ 900,866
Interest sensitivity gap	\$ (556,491)	\$ 39,284	\$ 496,100	\$ 362,282	\$ 341,175
Cumulative interest sensitivity gap	\$ (556,491)	\$ (517,207)	\$ (21,107)	\$ 341,175	\$ 341,175
Cumulative interest sensitivity gap as a percent of total assets	-42.77 %	-39.75 %	-1.62 %	26.22 %	

(1) Investments with maturities over 5 years include the market value of equity securities of \$3,668

(2) Includes \$14.3 million of advances from the FHLB. Of these advances, \$2.0 million are term advances, \$11.5 million are callable and \$1.0 million are 15 year amortizing. The term advances have been categorized based upon their maturity date. The \$11.5 million of callable advances were also categorized based upon maturity, because the interest rates on such advances are above current market rates. The \$1.0 million of amortizing advances are based upon put date, since the rates are above market rates. Includes \$13.0 million of term repurchase agreements, of which all are callable. The term repurchase agreements were categorized based upon maturity, because the interest

rates on such advances are above current market rates. Includes \$10.0 million of borrowings as a result of loans sold that do not qualify for sale accounting. These borrowings are included at their maturity dates.

As of December 31, 2014, the Company's cumulative gap ratios for assets and liabilities repricing within three months and within one year were a negative 43% and 43%, respectively, meaning more liabilities than assets are scheduled to reprice within these periods. This situation suggests that a decrease in market interest rates may benefit net interest income and that an increase in interest rates may negatively impact the Company. The liability sensitive gap position is largely the result of classifying the interest bearing NOW accounts, money market accounts and savings accounts as immediately repricable. Certain shortcomings are inherent in the method of analysis presented in the foregoing table. For example, although certain assets and liabilities may have similar maturities and periods to repricing, they may react differently to changes in market interest rates. Also, interest rates on assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other assets and liabilities may follow changes in market interest rates. Additionally, certain assets have features that restrict changes in the interest rates of such assets, both on a short-term basis and over the lives of such assets.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Ames National Corporation is responsible for establishing and maintaining adequate internal control over financial reporting. Ames National Corporation's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Ames National Corporation's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (2013)*. Based on our assessment we determined that, as of December 31, 2014, the Company's internal control over financial reporting is effective based on those criteria.

The Company's internal control over financial reporting as of December 31, 2014 has been audited by CliftonLarsonAllen LLP, an independent registered public accounting firm, as stated in their report which appears herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Ames National Corporation

Ames, Iowa

We have audited the accompanying consolidated balance sheets of Ames National Corporation and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2014. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion of these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Ames National Corporation and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Ames National Corporation and subsidiaries' internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 12, 2015 expressed an unqualified opinion.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Ames National Corporation

Ames, Iowa

We have audited Ames National Corporation and subsidiaries' internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Ames National Corporation's management is responsible for maintaining effective internal control over the financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Ames National Corporation and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based upon criteria established in *Internal Control – Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Ames National Corporation and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2014 and our report dated March 12, 2015 expressed an unqualified opinion.

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies

Description of business: Ames National Corporation and subsidiaries (the Company) operates in the commercial banking industry through its subsidiaries in Ames, Boone, Story City, Nevada and Marshalltown, Iowa. Loan and deposit customers are located primarily in Boone, Hancock, Polk, Marshall and Story Counties and adjacent counties in Iowa.

Segment information: The Company uses the “management approach” for reporting information about segments in annual and interim financial statements. The “management approach” is based on the way the chief operating decision-maker organizes segments within a company for making operating decisions and assessing performance. Based on the “management approach” model, the Company has determined that its business is comprised of one operating segment: banking. The banking segment generates revenues through personal, business, agricultural and commercial lending, management of the investment securities portfolio, deposit account services and wealth management services.

Consolidation: The consolidated financial statements include the accounts of Ames National Corporation (the Parent Company) and its wholly-owned subsidiaries, First National Bank, Ames, Iowa (FNB); State Bank & Trust Co., Nevada, Iowa (SBT); Boone Bank & Trust Co., Boone, Iowa (BBT); Reliance State Bank (RSB), Story City, Iowa; and United Bank & Trust NA, Marshalltown, Iowa (UBT) (collectively, the Banks). All significant intercompany transactions and balances have been eliminated in consolidation.

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, valuation of goodwill, other intangible assets and acquisitions and the assessment of other-than-temporary impairment for certain financial instruments.

Cash and due from banks: For purposes of reporting cash flows, cash and due from banks include cash on hand and amounts due from banks. The Company reports net cash flows for customer loan transactions, deposit transactions and short-term borrowings with maturities of 90 days or less.

Securities available-for-sale: The Company classifies all securities as available-for-sale. Securities available-for-sale are those securities the Company may decide to sell if needed for liquidity, asset-liability management or other reasons. Securities available-for-sale are reported at fair value, with the change in the net unrealized gains reported as other comprehensive income and as accumulated other comprehensive income, net of taxes, a separate component of stockholders' equity.

Gains and losses on the sale of securities are determined using the specific identification method based on amortized cost and are reflected in results of operation at the time of sale. Interest and dividend income, adjusted by amortization of purchase premium or discount over the estimated life of the security using the level yield method, is included in income as earned.

Declines in the fair value of securities available-for-sale below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers (1) the intent to sell the investment securities and the more likely than not requirement that the Company will be required to sell the investment securities prior to recovery (2) the length of time and the extent to which the fair value has been less than cost and (3) the financial condition and near-term prospects of the issuer. Due to potential changes in conditions, it is at least reasonably possible that changes in management's assessment of other-than-temporary impairment will occur in the near term and that such changes could be material to the amounts reported in the Company's financial statements.

Loans: Loans are stated at the principal amount outstanding, net of deferred loan fees and the allowance for loan losses. Interest on loans is credited to income as earned based on the principal amount outstanding. The Banks' policy is to discontinue the accrual of interest income on any loan 90 days or more past due unless the loans are well collateralized and in the process of collection. Income on nonaccrual loans is subsequently recognized only to the extent that cash payments are received and principal obligations are expected to be recoverable. Nonaccrual loans are returned to an accrual status when, in the opinion of management, the financial position of the borrower indicates there is no longer any reasonable doubt as to timely payment of principal or interest.

Acquired loans: Loans acquired in a business combination are stated at the principal amount outstanding with a discount attributable at least in part to credit quality. The difference between contractual payments at acquisition and the cash flows expected to be collected is referred to as the non-accretable difference. This amount is not recognized as a yield adjustment or as a loss accrual or a valuation allowance. Any excess of cash flows expected at acquisition over the estimated fair value is referred to as the accretable yield and is recognized into interest income over the remaining life of the loans when there is reasonable expectation about the amount and timing of such cash flows. Increases in expected cash flows subsequent to the initial investment are recognized prospectively through adjustment of the yield on the loan over its remaining estimated life. Decreases in expected cash flows are recognized immediately as impairment. If the Company does not have the information necessary to reasonable estimate cash flows to be expected, it may use the cost recovery method or cash basis method of income recognition. Valuation allowance on the acquired impaired loans reflect only losses after the acquisition.

Table Of Contents

Allowance for loan losses: The allowance for loan losses is established through a provision for loan losses and maintained at a level deemed appropriate by management to provide for known and inherent risks in the loan portfolio. The allowance is based upon an ongoing review of past loan loss experience, current economic conditions, the underlying collateral value securing the loans and other adverse situations that may affect the borrower's ability to repay. Loans which are deemed to be uncollectible are charged-off and deducted from the allowance. Recoveries on loans charged-off are added to the allowance. This evaluation is inherently subjective and requires estimates that are susceptible to significant revisions as more information becomes available. Due to potential changes in conditions, it is at least reasonably possible that changes in estimates will occur in the near term and that such changes could materially affect the amounts reported in the Company's financial statements.

The Company's allowance for possible loan losses consists of two components (i) specific reserves based on probable losses on specific loans and (ii) a general allowance based on historical loan loss experience, general economic conditions and other qualitative risk factors both internal and external to the Company.

The allowances established for probable losses on specific loans are based on a regular analysis and evaluation of problem loans. Loans are classified based on an internal credit risk rating process that evaluates, among other things: (i) the obligor's ability to repay; (ii) the underlying collateral, if any; and (iii) the economic environment and industry in which the borrower operates. A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Smaller balance homogeneous loans are evaluated for impairment in total. Such loans include residential first mortgage loans secured by one-to-four family residences, residential construction loans, and automobile loans. Commercial and agricultural loans and mortgage loans secured by other properties are evaluated individually for impairment when analysis of borrower operating results and financial condition indicates that underlying cash flows of the borrower's business are not adequate to meet its debt service requirements. Often this is associated with a delay or shortfall in payments of 90 days or more. Nonaccrual loans are often also considered impaired. Impaired loans, or portions thereof, are charged-off when deemed uncollectible.

The general component of the allowance for loan losses is based on historical loan loss experience, general economic conditions and other qualitative risk factors both internal and external to the Company. The general component is determined by evaluating, among other things: (i) actual charge offs; (ii) the experience, ability and effectiveness of the Company's lending management and staff; (iii) the effectiveness of the Company's loan policies, procedures and internal controls; (iv) changes in asset quality; (v) changes in loan portfolio volume; (vi) the composition and concentrations of credit; (vii) the impact of competition on loan structuring and pricing; (viii) the effectiveness of the internal audit loan review function; (ix) the impact of environmental risks on portfolio risks; and (x) the impact of rising interest rates on portfolio risk (collectively, the variables). Management evaluates the degree of risk that each one of these variables has on the quality of the loan portfolio on a quarterly basis. Each variable is determined to have either a high, moderate or low degree of risk. The results are then input into a "general allocation matrix" to determine an appropriate general allocation of the allowance for losses. Also included in the general component is an allocation for groups of loans with similar risk characteristics.

Loans held for sale: Loans held for sale are the loans the Banks have the intent to sell in the foreseeable future. They are carried at the lower of aggregate cost or fair value. Net unrealized losses, if any, are recognized through a valuation allowance by charges to income. Gains and losses on sales of loans are determined by the difference between the sale proceeds and the carrying value of the loans, recognized at settlement date and recorded as noninterest income.

Bank premises and equipment: Premises and equipment are stated at cost less accumulated depreciation. Depreciation expense is computed using straight-line and accelerated methods over the estimated useful lives of the respective assets. Depreciable lives range from 3 to 7 years for equipment and 15 to 39 years for premises.

Other real estate owned: Real estate properties acquired through or in lieu of foreclosure are initially recorded at the fair value less estimated selling cost at the date of foreclosure. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan losses. Costs of significant property improvements are capitalized, whereas costs relating to holding property are expensed. The portion of interest costs relating to development of real estate is capitalized. Valuations are periodically performed by management and property held for sale is carried at the lower of the new cost basis or fair value less cost to sell and any subsequent write-downs are charged to operations. Impairment losses on property to be held and used are measured as the amount by which the carrying amount of a property exceeds its fair value less costs to sell. This evaluation is inherently subjective and requires estimates that are susceptible to significant revisions as more information becomes available. Due to potential changes in conditions, it is at least reasonably possible that changes in fair values will occur in the near term and that such changes could materially affect the amounts reported in the Company's financial statements.

Table Of Contents

Goodwill and core deposit intangible: Goodwill represents the excess of cost over fair value of net assets acquired. Goodwill resulting from acquisitions is not amortized, but is tested for impairment annually or whenever events change and circumstances indicate that it is more likely than not that impairment has occurred. Goodwill is tested for impairment using a two-step process that begins with an estimation of the fair value of a reporting unit. The second step, if necessary, measures the amount of impairment.

Significant judgment is applied when goodwill is assessed for impairment. This judgment includes developing cash flow projections, selecting appropriate discount rates, identifying relevant market comparables, incorporating general economic and market conditions and selecting an appropriate control premium. At December 31, 2014, the Company management has completed the goodwill impairment analysis and determined goodwill was not impaired based on the fair value of the reporting unit.

The only other significant intangible asset is a core deposit intangible. The core deposit intangible asset is determined to have a definite life and is amortized over the estimated useful life. The core deposit intangible asset is a customer based relationship valuation attributed to the expectation of a lower net cost of these deposits versus alternative sources of funds. The core deposit intangible asset and other long-lived assets are reviewed for impairment whenever events occur or circumstances indicate that the carrying amount may not be recoverable.

Trust department assets: Property held for customers in fiduciary or agency capacities are not included in the accompanying consolidated balance sheets, as such items are not assets of the Banks.

Advertising costs: Advertising costs are expensed as incurred.

Income taxes: Deferred income taxes are provided on temporary differences between financial statement and income tax reporting. Temporary differences are differences between the amounts of assets and liabilities reported for financial statement purposes and their tax bases. Deferred tax assets are recognized for temporary differences that will be deductible in future years' tax returns and for operating loss and tax credit carry forwards. Deferred tax assets are reduced by a valuation allowance if it is deemed more likely than not that some or all of the deferred tax assets will not be realized. Deferred tax liabilities are recognized for temporary differences that will be taxable in future years' tax returns. Accounting for uncertainty in income taxes sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain tax positions. Benefits from tax positions taken or expected to be taken in a tax return are not recognized if the likelihood that the tax position would be sustained upon examination by a taxing authority is considered to be 50 percent or less. Interest and penalties are accounted for as a component of income tax expense.

The Company files a consolidated federal income tax return, with each entity computing its taxes on a separate company basis. For state tax purposes, the Banks file franchise tax returns, while the Parent Company files a corporate income tax return.

Comprehensive income: Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income. Certain changes in assets and liabilities, such as unrealized gains and losses on securities available-for-sale, are reported as accumulated other comprehensive income, a separate component of the stockholders' equity section of the consolidated balance sheet, and such items, along with net income, are components of the statement of comprehensive income. Gains and losses on securities available-for-sale are reclassified to net income as the gains or losses are realized upon sale of the securities. Other-than-temporary impairment charges are reclassified to net income at the time of the charge.

Financial instruments with off-balance-sheet risk: The Company, in the normal course of business, makes commitments to make loans which are not reflected in the consolidated financial statements. A summary of these commitments is disclosed in Note 14.

Transfers of financial assets and participating interests: Transfers of an entire financial asset or a participating interest in an entire financial asset are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

The transfer of a participating interest in an entire financial asset must also meet the definition of a participating interest. A participating interest in a financial asset has all of the following characteristics: (1) from the date of the transfer, it must represent a proportionate (pro rata) ownership in the financial asset, (2) from the date of transfer, all cash flows received, except any cash flows allocated as any compensation for servicing or other services performed, must be divided proportionately among participating interest holders in the amount equal to their share ownership, (3) the rights of each participating interest holder must have the same priority, and (4) no party has the right to pledge or exchange the entire financial asset unless all participating interest holders agree to do so.

Table Of Contents

Earnings per share: Basic earnings per share computations for the years ended December 31, 2014, 2013 and 2012, were determined by dividing net income by the weighted-average number of common shares outstanding during the years then ended. The Company had no potentially dilutive securities outstanding during the periods presented.

The following information was used in the computation of basic earnings per share (EPS) for the years ended December 31, 2014, 2013, and 2012.

	2014	2013	2012
Basic earning per share computation:			
Net income	\$15,251,207	\$13,953,644	\$14,182,308
Weighted average common shares outstanding	9,310,913	9,310,913	9,310,913
Basic EPS	\$1.64	\$1.50	\$1.52

Reclassifications:

Certain reclassifications have been made to the prior consolidated financial statements to conform to the current period presentation. These reclassifications had no effect on stockholders' equity and net income of the prior periods.

New Accounting Pronouncements:

In January 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-04, *Receivables—Troubled Debt Restructuring by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure*. The update clarifies when an in substance foreclosure occurs, that is, when a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan. This is the point when the consumer mortgage loan should be derecognized and the real property recognized. For public companies, this update will be effective for interim and annual periods beginning after December 31, 2014. The adoption of this guidance will not have a material impact on the Company's consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-11, *Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures*. The new guidance aligns the accounting for repurchase-to-maturity transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements. The amendments in the ASU also require expanded disclosures about the nature of collateral pledged in repurchase agreements and similar transactions accounted for as secured

borrowings. The amendments in this ASU are effective for public companies for the first interim or annual period beginning after December 15, 2014. The adoption of this ASU may result in additional disclosures but is not expected to impact significantly the Company's consolidated financial statements.

Note 2. Branch Acquisitions

On August 29, 2014, FNB completed the purchase of three bank branches of First Bank located in West Des Moines and Johnston, Iowa (the "First Bank Acquisition"). The First Bank Acquisition was consistent with the Bank's strategy to strengthen and expand its Iowa market share. The acquired assets and liabilities were recorded at fair value at the date of acquisition. These branches were purchased for cash consideration of \$4.1 million. As a result of the acquisition, the Company recorded a core deposit intangible asset of \$1,018,000 and goodwill of approximately \$1,131,000. The results of operations for this acquisition have been included since the transaction date of August 29, 2014. The fair value of credit deteriorated purchased loans related to the First Bank Acquisition is \$1,507,000. These purchase loans are included in the impaired loan category in the financial statements. Since the acquisition date, there has been no significant credit deterioration of the acquired loans.

On April 27, 2012, RSB completed the purchase of two bank offices of Liberty Bank, F.S.B. located in Garner and Klemme, Iowa. The Liberty acquisition was consistent with the Bank's strategy to strengthen and expand its Iowa market share. The acquired assets and liabilities were recorded at fair value at the date of acquisition. These branches were purchased for cash consideration of \$5.4 million. As a result of the acquisition, the Company recorded a core deposit intangible asset of \$1,500,000 and goodwill of approximately \$5,601,000. The results of operations for this acquisition have been included since the transaction date of April 27, 2012. Since the acquisition date, there has been no significant credit deterioration of the acquired loans.

Table Of Contents

The following table summarizes the fair value of the total consideration transferred as a part of the First Bank Acquisition and Liberty Acquisition as well as the fair value of identifiable assets acquired and liabilities assumed as of the effective date of the transactions.

	2014	2013	2012
Cash consideration transferred	\$4,147,680	\$ -	\$5,400,000
Recognized amounts of identifiable assets acquired and liabilities assumed:			
Cash and due from banks	\$20,576,661	\$ -	\$49,703,137
Interest bearing deposits in financial institutions	5,719,000	-	-
Securities available-for-sale	10,602,454	-	-
Loans receivable	44,620,021	-	46,103,022
Accrued interest receivable	230,332	-	514,760
Bank premises and equipment	3,864,900	-	864,500
Other real estate owned	1,267,720	-	-
Core deposit intangible asset	1,018,000	-	1,500,000
Other assets	748,511	-	-
Deposits	(81,962,650)	-	(98,766,558)
Securities sold under agreements to repurchase	(2,815,297)	-	-
Accrued interest payable and other liabilities	(853,439)	-	(119,610)
Total identifiable net assets (liabilities)	3,016,213	-	(200,749)
Goodwill	\$1,131,467	\$ -	\$5,600,749

On August 29, 2014, associated with the First Bank Acquisition, the contractual balance of loans receivable acquired was \$45,584,000 and the contractual balance of the deposits assumed was \$81,841,000. Loans receivable acquired include commercial real estate, 1-4 family real estate, commercial operating and consumer loans.

The acquired loans associated with the First Bank Acquisition at contractual values as of August 29, 2014 were determined to be risk rated as follows:

Pass	\$29,840,000
Watch	6,659,000
Special Mention	1,478,000
Substandard	5,460,000
Deteriorated credit	2,147,000

Total loans acquired at book value \$45,584,000

On April 27, 2012, associated with the Liberty Acquisition, the contractual balance of loans receivable acquired was \$46,972,000 and the contractual balance of the deposits assumed was \$98,109,000. Loans receivable acquired include agricultural real estate, commercial real estate, 1-4 family real estate, commercial operating, agricultural operating and consumer loans determined to be pass rated.

The core deposit intangible asset associated with the First Bank Acquisition is amortized to expense on a declining basis over a period of nine years. The loan market valuation is accreted to income on a declining basis over a six year period. The time deposits market valuation is amortized to expense on a declining basis over a two year period.

Table Of Contents

The excess cash in this transaction has been utilized through reductions in federal funds purchased and other borrowings at FNB. Going forward any excess cash will be used in the form of investment and or loan growth.

The core deposit intangible asset, associated with the Liberty Acquisition, is amortized to expense on a declining basis over a period of seven years. The loan market valuation is accreted to income on a declining basis over a nine year period. The time deposits market valuation is amortized to expense on a declining basis over a three year period.

Note 3. Concentrations and Restrictions on Cash and Due from Banks and Interest Bearing Deposits in Financial Institutions

The Federal Reserve Bank requires member banks to maintain certain cash and due from bank reserves. The subsidiary banks' reserve requirements totaled approximately \$6,376,000 and \$6,223,000 at December 31, 2014 and 2013, respectively.

At December 31, 2014, the Company had approximately \$15,795,000 on deposit at various financial institutions. Management does not believe these balances carry a significant risk of loss but cannot provide absolute assurance that no losses would occur if these institutions were to become insolvent.

Note 4. Debt and Equity Securities

The amortized cost of securities available-for-sale and their approximate fair values are summarized below:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
2014:				
U.S. government treasuries	\$ 1,431,392	\$ 16,050	\$-	\$ 1,447,442

Table Of Contents

The amortized cost and fair value of debt securities available-for-sale as of December 31, 2014, are shown below by contractual maturity. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
Due in one year or less	\$42,443,069	\$42,818,363
Due after one year through five years	292,052,292	297,458,655
Due after five years through ten years	184,567,184	185,508,940
Due after ten years	12,802,297	13,048,923
	531,864,842	538,834,881
Equity securities	3,539,100	3,667,500
	\$535,403,942	\$542,502,381

At December 31, 2014 and 2013, securities with a carrying value of approximately \$204,035,000 and \$189,116,000, respectively, were pledged as collateral on public deposits, securities sold under agreements to repurchase and for other purposes as required or permitted by law. Securities sold under agreements to repurchase are held by the Company's safekeeping agent.

The proceeds, gains and losses from securities available-for-sale are summarized below:

	2014	2013	2012
Proceeds from sales of securities available-for-sale	\$47,315,935	\$47,513,022	\$23,017,275
Gross realized gains on securities available-for-sale	1,263,600	1,152,961	648,851
Gross realized losses on securities available-for-sale	152,647	150,041	2,096
Tax provision applicable to net realized gains on securities available-for-sale	414,000	374,000	241,000

No other-than-temporary impairments was recognized as a component of income for the years ended December 31, 2014 and 2013. An impairment loss was recognized as a component of noninterest income of \$259,851 for the year ended December 31, 2012. The other-than-temporary impairment in 2012 related to an equity security.

Table Of Contents

Gross unrealized losses and fair value aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position as of December 31, 2014 and 2013, are summarized as follows:

2014:	Less than 12 Months		12 Months or More		Total

	\$224,489,193	\$(7,166,985)	\$27,008,405	\$(2,103,725)	\$251,497,598	\$(9,270,710)

At December 31, 2014, debt securities have unrealized losses of \$2,180,280. These unrealized losses are generally due to changes in interest rates or general market conditions. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and industry analysts' reports. Management concluded that the unrealized losses on debt securities were temporary. Due to potential changes in conditions, it is at least reasonably possible that changes in fair values and management's assessments will occur in the near term and that such changes could materially affect the amounts reported in the Company's financial statements.

Note 5. Loans Receivable and Credit Disclosures

The composition of loans receivable is as follows:

	2014	2013
Real estate - construction	\$36,015,565	\$23,927,507
Real estate - 1 to 4 family residential	122,776,915	108,289,500
Real estate - commercial	257,053,864	206,111,559
Real estate - agricultural	57,449,353	53,833,997
Commercial	92,703,021	86,822,960
Agricultural	85,608,954	81,326,382
Consumer and other	15,763,369	12,795,324
	667,371,041	573,107,229
Less:		
Allowance for loan losses	(8,838,181)	(8,571,813)
Deferred loan fees	(91,862)	(33,869)
	\$658,440,998	\$564,501,547

Construction loans are underwritten utilizing independent appraisals, sensitivity analysis of absorption, vacancy and lease rates and financial analysis of the developers and property owners. Construction loans are generally based upon estimates of costs and value associated with the complete project. These estimates may be inaccurate. Construction loans often involve the disbursement of funds with repayment substantially dependent on the success of the ultimate project. These loans are closely monitored by on-site inspections and are considered to have higher risks than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, general economic conditions and the availability of long-term financing. The Company may require guarantees on these loans. The Company's construction loans are secured primarily by properties located in its primary market area.

Table Of Contents

The Company originates 1-4 family real estate, consumer and other loans utilizing credit reports to supplement the underwriting process. The Company's manual underwriting standards for 1-4 family loans are generally in accordance with FHLMC and FNMA manual underwriting guidelines. Properties securing 1-4 four-family real estate loans are appraised by either staff appraisers or fee appraisers, both of which are independent of the loan origination function and have been approved by the Board of Directors. The loan-to-value ratios normally do not exceed 90% without credit enhancements such as mortgage insurance. The Company will lend up to 100% of the lesser of the appraised value or purchase price for conventional 1-4 family real estate loans, provided private mortgage insurance is obtained. The Company's 1-4 family real estate loans are secured primarily by properties located in its primary market area. The underwriting standards for consumer and other loans include a determination of the applicant's payment history on other debts and an assessment of their ability to meet existing obligations and payments on the proposed loan. To monitor and manage loan risk, policies and procedures are developed and modified, as needed by management. This activity, coupled with smaller loan amounts that are spread across many individual borrowers, minimizes risk. Additionally, market conditions are reviewed by management on a regular basis.

Commercial and agricultural real estate loans are subject to underwriting standards and processes similar to commercial and agricultural operating loans, in addition to those unique to real estate loans. These loans are viewed primarily as cash flow loans and, secondarily, as loans secured by real estate. Commercial and agricultural real estate lending typically involves higher loan principal amounts and the repayment of these loans is generally dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Loan-to-value generally does not exceed 80% of the cost or value of the assets. Appraisals on properties securing these loans are performed by fee appraisers approved by the Board of Directors. Because payments on commercial and agricultural real estate loans are often dependent on the successful operation or management of the properties, repayment of such loans may be subject to adverse conditions in the real estate market or the economy. Management monitors and evaluates commercial and agricultural real estate loans based on collateral and risk rating criteria. The Company may require guarantees on these loans. The Company's commercial and agricultural real estate loans are secured primarily by properties located in its primary market area.

Commercial and agricultural operating loans are underwritten based on the Company's examination of current and projected cash flows to determine the ability of the borrower to repay their obligations as agreed. This underwriting includes the evaluation of cash flows of the borrower, underlying collateral, if applicable, and the borrower's ability to manage its business activities. The cash flows of borrowers and the collateral securing these loans may fluctuate in value after the initial evaluation. A first priority lien on the general assets of the business normally secures these types of loans. Loan-to-value limits vary and are dependent upon the nature and type of the underlying collateral and the financial strength of the borrower. Crop and hail insurance is required for most agricultural borrowers. Loans are generally guaranteed by the principal(s). The Company's commercial and agricultural operating lending is primarily in its primary market area.

The Company maintains an internal audit department that reviews and validates the credit risk program on a periodic basis. Results of these reviews are presented to management and the audit committee. The loan review process complements and reinforces the risk identification and assessment decisions made by lenders and credit personnel, as well as the Company's policies and procedures.

Summary changes in the allowance for loan losses for the years ended December 31, 2014, 2013 and 2012 are as follows:

	2014	2013	2012
Balance, beginning	\$8,571,813	\$7,772,571	\$7,905,316
Provision for loan losses	429,140	786,390	22,277

Credit Quality Indicators. As part of the on-going monitoring of the credit quality of the Company's loan portfolio, management tracks certain credit quality indicators including trends related to (i) the risk ratings of construction, commercial and agricultural real estate loans and commercial and agricultural operating loans, (ii) the level of classified loans, (iii) net charge-offs, (iv) non-performing loans and (v) the general economic conditions in our market

area.

The Company utilizes a risk rating matrix to assign risk ratings to each of its construction, commercial and agricultural loans. Loans are rated on a scale of 1 to 7. A description of the general characteristics of the 7 risk ratings is as follows:

Ratings 1, 2 and 3 - These ratings include loans of average to excellent credit quality borrowers. These borrowers generally have significant capital strength, moderate leverage and stable earnings and growth commensurate to their relative risk rating. These ratings are reviewed at least annually. These ratings also include performing loans less than \$100,000.

Rating 4 - This rating includes loans on management's "watch list" and is intended to be utilized for pass rated borrowers where credit quality has begun to show signs of financial weakness that now requires management's heightened attention. This rating is reviewed at least quarterly.

Rating 5 - This rating is for "Special Mention" loans in accordance with regulatory guidelines. This rating is intended to be temporary and includes loans to borrowers whose credit quality has clearly deteriorated and are at risk of further decline unless active measures are taken to correct the situation. This rating is reviewed at least quarterly.

Rating 6 - This rating includes "Substandard" loans in accordance with regulatory guidelines, for which the accrual of interest has not been stopped. By definition under regulatory guidelines, a "Substandard" loan has defined weaknesses which make payment default or principal exposure likely, but not yet certain. Such loans are apt to be dependent upon collateral liquidation, a secondary source of repayment or an event outside of the normal course of business. This rating is reviewed at least quarterly.

Rating 7 - This rating includes "Substandard-Impaired" loans in accordance with regulatory guidelines, for which the accrual of interest has generally been stopped. This rating includes loans; (i) where interest is more than 90 days past due; (ii) not fully secured; (iii) loans where a specific valuation allowance may be necessary; (iv) unable to make contractual principle and interest payments. This rating is reviewed at least quarterly.

Table Of Contents

The credit risk profile by internally assigned grade, on a disaggregated basis, at December 31, 2014 and 2013 is as follows:

2014:	Construction Real Estate	Commercial Real Estate	Agricultural Real Estate	Commercial	Agricultural	Total

Table Of Contents

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payment of principal and interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. The Company will apply its normal loan review procedures to identify loans that should be evaluated for impairment. The following is a recap of impaired loans, on a disaggregated basis, at December 31, 2014, 2013 and 2012 and the average recorded investment and interest income recognized on these loans for the years ended December 31, 2014, 2013 and 2012:

2014:	Recorded	Unpaid	Related	Average	Interest

The interest foregone on nonaccrual loans for the years ended December 31, 2014, 2013 and 2012 was approximately \$136,000, \$287,000 and \$366,000, respectively.

Troubled Debt Restructurings. The restructuring of a loan is considered a “troubled debt restructuring” if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, principal forgiveness, restructuring amortization schedules and other actions intended to minimize potential losses.

Certain troubled debt restructurings are on nonaccrual status at the time of restructuring. These borrowings are typically returned to accrual status after sustained repayment performance in accordance with the restructuring agreement for a reasonable period of at least six months and management is reasonably assured of future performance. If the troubled debt restructuring meets these performance criteria and the interest rate granted at the modification is equal to or greater than the rate that the Company was willing to accept at the time of the restructuring for a new loan with comparable risk, then the loan will return to performing status.

For troubled debt restructurings that were on nonaccrual status before the modification, a specific reserve may already be recorded. In periods subsequent to modification, the Company will continue to evaluate all troubled debt restructurings for possible impairment and, as necessary recognizes impairment through the allowance. The Company had two charge offs related to TDRs for the year ended December 31, 2014 in the amount of \$48,000. The Company had no charge-offs related to modifying troubled debt restructurings for the year ended December 31, 2013 and 2012.

The Company had loans meeting the definition of troubled debt restructuring (TDR) of \$1,129,000 as of December 31, 2014, all of which were included as impaired and nonaccrual loans. The Company had loans meeting the definition of troubled debt restructuring (TDR) of \$1,424,000 as of December 31, 2013, all of which were included as impaired loans, \$1,237,000 was included as nonaccrual loans and \$187,000 was included as accrual loans.

Table Of Contents

The following table sets forth information on the Company's TDR, on a disaggregated basis, occurring in the years ended December 31:

	2014		2013	
	Pre-Modification Outstanding	Post-Modification Outstanding	Pre-Modification Outstanding	Post-Modification Outstanding
	Number of Recorded Con Investment	Recorded Investment	Number of Recorded Con Investment	Recorded Investment
Real estate - construction	-	\$ -	\$ -	\$ -
Real estate - 1 to 4 family residential	1	25,000	25,000	-
Real estate - commercial	3	384,000	384,000	-
Real estate - agricultural	-	-	-	-
Commercial	-	-	1	130,000
Agricultural	1	19,000	19,000	-
Consumer and other	1	6,000	6,000	46,000
	6	\$ 434,000	\$ 434,000	2 \$ 176,000 \$ 176,000

During the year ended December 31, 2014, the Company granted concessions to borrowers experiencing financial difficulties for six loans. A commercial real estate loan was restructured as an interest only loan for a period of time. An agricultural and consumer loans maturity date was extended one year with interest only until maturity. A 1-4 family residential loans terms were extended beyond normal terms. The interest rate was restructured on two commercial real estate loans at a below market rate.

During the year ended December 31, 2013, the Company granted concessions to borrowers experiencing financial difficulties for two loans. The commercial loan was restructured with a collateral shortfall. The consumer loan was restructured into a term loan from an overdraft.

There were no TDR loans modified during the years ended December 31, 2014 and 2013 with subsequent payment defaults. A TDR loan is considered to have payment default when it is past due 60 days or more.

There was no significant financial impact from specific reserves or from charge-offs for the TDR loans included in the previous table.

Edgar Filing: AMES NATIONAL CORP - Form 10-K

An aging analysis of the recorded investment in loans, on a disaggregated basis, as of December 31, 2014 and 2013, are as follows:

2014:	30-89 Days Past Due	90 Days or Greater Past Due	Total Past Due	Current	Total	90 Days or Greater Accruing

	\$1,182,000	\$821,000	\$2,003,000	\$571,104,000	\$573,107,000	\$27,000

There are no other known problem loans that cause management to have serious doubts as to the ability of such borrowers to comply with the present loan repayment terms.

As of December 31, 2014, there were no material commitments to lend additional funds to customers whose loans were classified as impaired.

Loans are made in the normal course of business to certain directors and executive officers of the Company and to their affiliates. The terms of these loans, including interest rates and collateral, are similar to those prevailing for comparable transactions with others and do not involve more than a normal risk of collectability. Loan transactions with related parties were as follows:

	2014	2013
Balance, beginning of year	\$7,911,436	\$8,762,305
New loans	17,264,513	19,442,541
Repayments	(16,837,127)	(20,920,256)
Change in status	178,834	626,846
Balance, end of year	\$8,517,656	\$7,911,436

Note 6. Bank Premises and Equipment

The major classes of bank premises and equipment and the total accumulated depreciation are as follows:

	2014	2013
Land	\$3,849,144	\$2,462,563
Buildings and improvements	17,470,675	16,149,479
Furniture and equipment	5,879,852	5,435,234
	27,199,671	24,047,276
Less accumulated depreciation	11,242,682	12,154,947
	\$15,956,989	\$11,892,329

Table Of Contents**Note 7. Other Real Estate Owned**

Changes in the other real estate owned are as follows:

	2014	2013
Balance, beginning of year	\$8,861,107	\$9,910,825
Transfer of loans	202,409	196,433
Acquired	1,267,720	-
Impairment	(1,744,366)	(670,000)
Net proceeds from sale	(265,694)	(626,596)
Gain on sale, net	95,036	50,445
Other changes	19,673	-
Balance, end of year	\$8,435,885	\$8,861,107

The following table provides the composition of other real estate owned as of December 31:

	2014	2013
Construction and land development	\$5,384,955	\$6,750,503
1 to 4 family residential houses	1,269,629	1,296,227
Commercial real estate	1,781,301	814,377
	\$8,435,885	\$8,861,107

The Company is actively marketing the assets referred to in the table above. Management uses appraised values and adjusts for trends observed in the market and for disposition costs in determining the value of other real estate owned. The assets above are primarily located in the Des Moines, Iowa metropolitan area.

Note 8. Goodwill

As of August 29, 2014, FNB acquired three bank branches located in West Des Moines and Johnston, Iowa, which resulted in the recognition of \$1.1 million of goodwill. Goodwill recognized in the First Bank Acquisition was primarily attributable to an expanded market share and economies of scale expected from combining the operations of the West Des Moines and Johnston, Iowa branches with FNB.

As of April 27, 2012, RSB acquired two bank offices located in Garner and Klemme, Iowa, which resulted in the recognition of \$5.6 million of goodwill. Goodwill recognized in the Liberty Acquisition was primarily attributable to an expanded market share and economies of scale expected from combining the operations of the Garner and Klemme branches with Reliance Bank.

The goodwill is not amortized but is evaluated for impairment at least annually. For income tax purposes, goodwill is amortized over 15 years.

Note 9. Core Deposit Intangible Asset

In conjunction with the First Bank Acquisition, the Company recorded \$1.0 million in core deposit intangible assets. In conjunction with the Liberty Acquisition, the Company recorded a \$1.5 million core deposit intangible asset. The following sets forth the carrying amounts and accumulated amortization of core deposit intangible assets at December 31, 2014 and 2013:

	2014		2013	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Core deposit intangible asset	\$2,518,000	\$ 788,000	\$1,500,000	\$ 471,000

The weighted average life of the core deposit intangible is 3 years and 5 years as of December 31, 2014 and 2013, respectively.

Table Of Contents

The amortization expense for the core deposit intangible asset totaled \$317,000, \$274,000 and \$197,000 for the years ended December 31, 2014, 2013 and 2012, respectively. Estimated remaining amortization expense on core deposit intangible for the years ending is as follows:

2015	\$422,000
2016	354,000
2017	299,000
2018	251,000
2019	127,000
After	277,000
	\$1,730,000

The following sets for the activity related to core deposit intangible assets for the years ended December 31, 2014, 2013 and 2012:

	2014	2013	2012
Beginning core deposit intangible, net	\$1,029,000	\$1,303,000	\$-
Purchases	1,018,000	-	1,500,000
Amortization	(317,000)	(274,000)	(197,000)
Ending core deposit intangible, net	\$1,730,000	\$1,029,000	\$1,303,000

Note 10. Deposits

At December 31, 2014, the maturities of time deposits are as follows:

2015	\$140,711,485
2016	51,755,767
2017	29,342,497
2018	12,431,942
2019	8,873,979
	\$243,115,670

Interest expense on deposits is summarized as follows:

	2014	2013	2012
NOW accounts	\$529,390	\$593,210	\$599,992
Savings and money market	612,632	582,502	553,142
Time deposits	2,243,077	2,686,001	3,319,203
	\$3,385,099	\$3,861,713	\$4,472,337

Deposits held by the Company from related parties at December 31, 2014 and 2013 amounted to approximately \$16,388,000 and \$17,679,000, respectively.

Table Of Contents**Note 11. Borrowings**

Securities sold under repurchase agreements (repurchase agreements) are short-term and are secured by securities available-for-sale.

At December 31, 2014, FHLB advances and other borrowings consisted of the following:

	Amount	Weighted Average Interest Rate	Features
FHLB advances maturing in:			
2016	\$ 1,000,000	0.75%	
2017	1,000,000	1.08%	
2018	11,500,000	2.94%	Includes \$4,500,000 callable in February 2015; \$7,000,000 callable in March 2015
After 2018	967,737	3.50%	15 year amortizing and puttable in 2015
Total FHLB advances	\$ 14,467,737	2.69%	
Other borrowings maturing in:			
2018	\$ 18,000,000	3.45%	\$13,000,000 term repurchase agreements callable quarterly in 2015 and thereafter; \$5,000,000 financing agreements with maturity date of January 2018
2022	5,000,000	4.12%	\$5,000,000 financing agreements with a maturity date of January 2022
Total other borrowings	\$ 23,000,000	3.59%	
Total FHLB and other borrowings	\$ 37,467,737	3.24%	

Borrowed funds at December 31, 2013 included FHLB advances and other borrowings of \$34,540,526. Such borrowings carried a weighted-average interest rate of 3.10% with maturities ranging from 2014 through 2025. At December 31, 2013, other borrowings consist of term repurchase agreements.

At December 31, 2014, other borrowings consist of term repurchase agreements and financing agreements as a result of sold loans that do not qualify for sale accounting. These financing agreements are recorded as financing transactions as effective control over the transferred loans maintained by FNB. The dollar amount of the loans underlying the sale agreement continues to be carried in our loan portfolio and the transfer is reported as a secured borrowing with these loans pledged as collateral. FHLB advances are collateralized by certain 1-4 family residential real estate loans, multifamily real estate loans, commercial real estate loans and agricultural real estate loans. The term repurchase agreements are collateralized with U.S. government agencies and mortgage-backed securities with a carrying and fair value of \$13,921,000 at December 31, 2014. The Banks had available borrowing capacity with the FHLB of Des Moines, Iowa of \$137,399,000 at December 31, 2014.

Note 12. Employee Benefit Plans

The Company has a qualified 401(k) profit-sharing plan. For the years ended December 31, 2014, 2013 and 2012, the Company matched employee contributions up to a maximum of 3% and also contributed an amount equal to 3% of the participating employee's compensation. For the years ended December 31, 2014, 2013 and 2012, Company contributions to the plan were approximately \$631,000, \$574,000, and \$548,000, respectively. The plan covers substantially all employees.

Table Of Contents**Note 13. Income Taxes**

The components of income tax expense are as follows:

	2014	2013	2012
Federal:			
Current	\$4,568,497	\$4,104,278	\$3,975,247
Deferred	16,322	(392,690)	(184,093)
	4,584,819	3,711,588	3,791,154
State:			
Current	1,014,567	973,694	954,724
Deferred	16,133	(27,360)	1,765
	1,030,700	946,334	956,489
Income tax expense	\$5,615,519	\$4,657,922	\$4,747,643

Total income tax expense differed from the amounts computed by applying the U.S. federal income tax rate of 35% to income before income taxes as a result of the following:

	2014	2013	2012
Income taxes at 35% federal tax rate	\$7,302,815	\$6,514,048	\$6,625,483
Increase (decrease) resulting from:			
Tax-exempt interest and dividends	(2,213,701)	(2,399,516)	(2,419,917)
State taxes, net of federal tax benefit	699,960	624,928	610,450
Other	(173,555)	(81,538)	(68,373)
Total income tax expense	\$5,615,519	\$4,657,922	\$4,747,643

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred liabilities are as follows:

	2014	2013
Deferred tax assets:		
Allowance for loan losses	\$3,134,667	\$2,961,646
Other real estate owned	2,393,507	1,756,144
Other-than-temporary impairment on securities	96,924	96,924

Edgar Filing: AMES NATIONAL CORP - Form 10-K

Accrued vacation	239,949	207,677
Other deferred tax assets	786,818	887,205
	6,651,865	5,909,596
Deferred tax liabilities:		
Net unrealized gains on securities available-for-sale	(2,626,423)	(264,952)
Bank premises and equipment	(971,570)	(381,903)
Other deferred tax liabilities	(420,695)	(235,638)
	(4,018,688)	(882,493)
Net deferred tax asset	\$2,633,177	\$5,027,103

Income taxes currently payable of approximately \$110,000 and \$221,000 are included in accrued expenses and other liabilities as of December 31, 2014 and 2013, respectively.

The Company and its subsidiaries file one income tax return in the U.S. federal jurisdiction and separate tax returns for the state of Iowa. The Company is no longer subject to U.S. federal income and state tax examinations for years before 2011.

Table Of Contents

The Company follows the accounting requirements for uncertain tax positions. Management has determined that the Company has no material uncertain tax positions and no material accrued interest or penalties as of or for the years ended December 31, 2014 and 2013 that would require recognition. The Company had no significant unrecognized tax benefits as of December 31, 2014, that if recognized, would affect the effective tax rate. The Company had no positions for which it deemed that it is reasonably possible that the total amounts of the unrecognized tax benefit will significantly increase or decrease within the 12 months as of December 31, 2014 and 2013.

Note 14. Commitments, Contingencies and Concentrations of Credit Risk

The Company is party to financial instruments with off-balance-sheet risk in the normal course of business. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheet.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as they do for on-balance-sheet instruments. A summary of the Company's commitments is as follows:

	2014	2013
Commitments to extend credit	\$ 159,527,000	\$ 115,278,000
Standby letters of credit	6,526,000	3,135,000
	\$ 166,053,000	\$ 118,413,000

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. At December 31, 2014 and 2013, approximately \$108,039,000 and \$85,045,000 of the commitments to extend credit were fixed interest rates. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Banks evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Banks upon extension of credit, is based on management's credit evaluation of the party.

Standby letters of credit are conditional commitments issued by the Banks to guarantee the performance of a customer to a third-party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Collateral held varies and is required in instances which the Banks deem necessary. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Banks would be

required to fund the commitment. The maximum potential amount of future payments the Banks could be required to make is represented by the contractual amount shown in the summary above. If the commitments were funded, the Banks would be entitled to seek recovery from the customer.

At December 31, 2014 and 2013, the Banks have established liabilities totaling \$481,000 and \$364,000, respectively to cover estimated credit losses for off-balance-sheet loan commitments and standby letters of credit.

In the normal course of business, the Company is involved in various legal proceedings. In the opinion of management, any liability resulting from such proceedings would not have a material adverse effect on the Company's financial statements.

Concentrations of credit risk: The Banks originate real estate, consumer, and commercial loans, primarily in Boone, Hancock, Marshall, Polk and Story Counties in Iowa, as well as adjacent counties. Although the Banks have diversified loan portfolios, a substantial portion of their borrowers' ability to repay loans is dependent upon economic conditions in the Banks' market areas.

Note 15. Regulatory Matters

The Company and the Banks are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and Banks' financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Banks must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action provisions are not applicable to bank holding companies. Regulators also have the ability to impose higher limits than those specified by capital adequacy guidelines if they so deem necessary.

Table Of Contents

Quantitative measures established by regulation to ensure capital adequacy require the Company and each subsidiary bank to maintain minimum amounts and ratios (set forth in the following table) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I capital (as defined) to average assets (as defined). Management believes, as of December 31, 2014 and 2013, that the Company and each subsidiary bank met all capital adequacy requirements to which they are subject.

As of December 31, 2014, the most recent notification from the federal banking regulators categorized the Banks as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Banks must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table. Management believes there are no conditions or events since that notification that have changed the institution's category. The Company's and each of the subsidiary bank's actual capital amounts and ratios as of December 31, 2014 and 2013 are also presented in the table.

	Actual Amount	Ratio		For Capital Adequacy Purposes Amount	Ratio		To Be Well Capitalized Under Prompt Corrective Action Provisions Amount	Ratio	
As of December 31, 2014:									
Total capital (to risk-weighted assets):									
Consolidated	\$ 151,146	16.6	%	\$ 72,879	8.0	%	N/A	N/A	
Boone Bank & Trust	13,948	15.7		7,123	8.0		\$ 8,904	10.0	%

United Bank & Trust	12,802	11.7	4,378	4.0	5,472	5.0

Federal and state banking regulations place certain restrictions on dividends paid and loans or advances made by the Banks to the Company. Dividends paid by each Bank to the Company would be prohibited if the effect thereof would cause the Bank's capital to be reduced below applicable minimum capital requirements. Except for the potential effect on the Company's level of dividends, management believes that these restrictions currently do not have a significant impact on the Company.

Note 16. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact, and (iv) willing to transact.

Table Of Contents

The standards require the use of valuation techniques that are consistent with the market approach, the income approach, and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques are consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the Company's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, a fair value hierarchy was established for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1: Inputs to the valuation methodology are quoted prices, unadjusted, for identical assets or liabilities in active markets. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.

Level 2: Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted process for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatility, prepayment speeds, credit risk); or inputs derived principally from or can be corroborated by observable market data by correlation or other means.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using discounted cash flow methodologies, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The following table presents the balances of assets measured at fair value on a recurring basis by level as of December 31, 2014 and 2013:

Description	Total	Level 1	Level 2	Level 3
-------------	-------	---------	---------	---------

2014

Edgar Filing: AMES NATIONAL CORP - Form 10-K

U.S. government treasuries	\$1,448,000	\$1,448,000	\$-	\$-
U.S. government agencies	87,307,000	-	87,307,000	-
U.S. government mortgage-backed securities	120,985,000	-	120,985,000	-
State and political subdivisions	281,776,000	-	281,776,000	-
Corporate bonds	47,319,000	-	47,319,000	-
Equity securities, common stock	758,000	758,000	-	-
Equity securities, other	2,909,000	-	2,909,000	-
	\$542,502,000	\$2,206,000	\$540,296,000	\$-

2013

U.S. government agencies	\$61,178,000	\$-	\$61,178,000	\$-
U.S. government mortgage-backed securities	155,142,000	-	155,142,000	-
State and political subdivisions	315,224,000	-	315,224,000	-
Corporate bonds	44,752,000	-	44,752,000	-
Equity securities, common stock	841,000	841,000	-	-
Equity securities, other	2,902,000	-	2,902,000	-
	\$580,039,000	\$841,000	\$579,198,000	\$-

Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, as well as U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. Other available-for-sale securities are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things.

Table Of Contents

Certain assets are measured at fair value on a nonrecurring basis; that is, they are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment or a change in previously recognized impairment). The following table presents the assets carried on the balance sheet (after specific reserves) by caption and by level with the valuation hierarchy as of December 31, 2014 and 2013:

Description	Total	Level 1	Level 2	Level 3
2014				
Loans	\$692,000	\$ -	\$ -	\$692,000
Other real estate owned	8,436,000	-	-	8,436,000
Total	\$9,128,000	\$ -	\$ -	\$9,128,000

2013

Loans	\$648,000	\$-	\$-	\$648,000
Other real estate owned	8,861,000	-	-	8,861,000
Total	\$9,509,000	\$-	\$-	\$9,509,000

Loans: Loans in the tables above consist of impaired credits held for investment. In accordance with the loan impairment guidance, impairment was measured based on the fair value of collateral less estimated selling costs for collateral dependent loans. Fair value for impaired loans is based upon appraised values adjusted for trends observed in the market. A valuation allowance was recorded for the excess of the loan's recorded investment over the amounts determined by the collateral value method. This valuation is a component of the allowance for loan losses. The Company considers these fair values level 3.

Other Real Estate Owned: Other real estate owned in the table above consists of real estate obtained through foreclosure. Other real estate owned is recorded at fair value less estimated selling costs, at the date of transfer. Subsequent to the transfer, other real estate owned is carried at the lower of cost or fair value, less estimated selling costs. The carrying value of other real estate owned is not re-measured to fair value on a recurring basis but is subject to fair value adjustments when the carrying value exceeds the fair value less estimated selling costs. Management uses appraised values and adjusts for trends observed in the market and for disposition costs in determining the value of other real estate owned. A valuation allowance was recorded for the excess of the asset's recorded investment over the amount determined by the fair value, less estimated selling costs. This valuation allowance is a component of the allowance for other real estate owned. The Company considers these fair values level 3.

Table Of Contents

The significant inputs used in the fair value measurements for Level 3 assets measured at fair value on a nonrecurring basis as of December 31, 2014 and 2013 are as follows:

2014				
	Fair Value	Valuation Techniques	Range of Unobservable Inputs	Range (Average)
Impaired Loans	\$ 692,000	Evaluation of collateral	Estimation of value	NM*
Other real estate owned	\$ 8,436,000	Appraisal	Appraisal adjustment	4%-10% (7%)
2013				
	Fair Value	Valuation Techniques	Range of Unobservable Inputs	Range (Average)
Impaired Loans	\$ 648,000	Evaluation of collateral	Estimation of value	NM*
Other real estate owned	\$ 8,861,000	Appraisal	Appraisal adjustment	6%-10% (8%)

* Not Meaningful. Evaluations of the underlying assets are completed for each impaired loan with a specific reserve. The types of collateral vary widely and could include accounts receivables, inventory, a variety of equipment and real estate. Collateral evaluations are reviewed and discounted as appropriate based on knowledge of the specific type of collateral. In the case of real estate, an independent appraisal may be obtained. Types of discounts considered included aging of receivables, condition of the collateral, potential market for the collateral and estimated disposal costs. These discounts will vary from loan to loan, thus providing a range would not be meaningful.

GAAP requires disclosure of the fair value of financial assets and financial liabilities, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or nonrecurring basis are discussed above. The methodologies for other financial assets and financial liabilities are discussed below.

Fair value of financial instruments: The following methods and assumptions were used by the Company in estimating fair value disclosures:

Cash and due from banks, federal funds sold and interest bearing deposits in financial institutions: The recorded amount of these assets approximates fair value.

Securities available-for-sale: Fair value measurement for Level 1 securities is based upon quoted prices. Fair value measurement for Level 2 securities are based upon quoted prices, if available. If quoted prices are not available, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things. Level 1 securities include equity securities traded on an active exchange, such as the New York Stock Exchange, as well as U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. Other securities available-for-sale are reported at fair value utilizing Level 2 inputs.

Loans held for sale: The fair value of loans held for sale is based on prevailing market prices.

Loans receivable: The fair value of loans is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates, which reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the historical experience, with repayments for each loan classification modified, as required, by an estimate of the effect of current economic and lending conditions. The effect of nonperforming loans is considered in assessing the credit risk inherent in the fair value estimate.

Deposit liabilities: Fair values of deposits with no stated maturity, such as noninterest-bearing demand deposits, savings and NOW accounts, and money market accounts, are equal to the amount payable on demand as of the respective balance sheet date. Fair values of certificates of deposit are based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. The fair value estimates do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market.

Table Of Contents

Securities sold under agreements to repurchase and federal funds purchased: The carrying amounts of securities sold under agreements to repurchase and federal funds purchased approximate fair value because of the generally short-term nature of the instruments.

FHLB advances and other borrowings: Fair values of FHLB advances and other borrowings are estimated using discounted cash flow analysis based on interest rates currently being offered with similar terms.

Accrued income receivable and accrued interest payable: The carrying amounts of accrued income receivable and accrued interest payable approximate fair value.

Commitments to extend credit and standby letters of credit: The fair values of commitments to extend credit and standby letters of credit are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreement and credit worthiness of the counterparties. The carrying value and fair value of the commitments to extend credit and standby letters of credit are not considered significant.

Limitations: Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The following table includes the carrying amounts and estimated fair values of financial assets and liabilities as of December 31, 2014 and 2013.

		2014		2013	
	Fair Value Hierarchy Level	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:					
Cash and due from banks	Level 1	\$23,730,257	\$23,730,000	\$24,270,031	\$24,270,000
Federal funds sold	Level 1	6,000	6,000	-	-
Interest bearing deposits	Level 1	31,463,382	31,463,000	23,628,117	23,628,000
Securities available-for-sale		542,502,381	542,502,000	580,039,080	580,039,000

	See previous table				
Loans receivable, net	Level 2	658,440,998	656,896,000	564,501,547	562,073,000
Loans held for sale	Level 2	704,850	705,000	295,618	296,000
Accrued income receivable	Level 1	7,471,023	7,471,000	7,437,673	7,438,000
Financial liabilities:					
Deposits	Level 2	\$1,052,123,257	\$1,052,082,000	\$1,011,803,178	\$1,014,150,000

Note 17. Subsequent Events

Management evaluated subsequent events through the date the financial statements were issued. There were no other significant events or transactions occurring after December 31, 2014, but prior to March 12, 2015, that provided additional evidence about conditions that existed at December 31, 2014. There were no other significant events or transactions that provided evidence about conditions that did not exist at December 31, 2014.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer of the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)). Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's current disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms.

Management's annual report on internal control over financial reporting is contained in Item 8 of this Report.

The attestation report of the Company's registered public accounting firm on the Company's internal control over financial reporting is contained in Item 8 of this Report.

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors

Refer to the information under the captions “Corporate Governance” and “Proposals to be Voted on at Meeting – Proposal 1 – Election of Directors” contained in the Company's definitive proxy statement prepared in connection with its Annual Meeting of Shareholders to be held April 29, 2015, as filed with the SEC on March 19, 2015 (the “Proxy Statement”), which information is incorporated herein by this reference.

Executive Officers

The information required by Item 10 regarding the executive officers appears in Item 1 of Part I of this Annual Report under the heading “Executive Officers of the Company and Banks”.

Section 16(a) Beneficial Ownership Reporting Compliance

Refer to the information under the caption “Section 16(a) Beneficial Ownership Reporting Compliance” in the Proxy Statement, which information is incorporated herein by this reference.

Audit Committee

The Company has established an Audit Committee as a standing committee of the Board of Directors. Refer to the information under the caption “Corporate Governance – Board Committees” in the Proxy Statement, which information is incorporated herein by this reference.

Table Of Contents

Audit Committee Financial Expert

The Board of Directors of the Company has determined that Warren R. Madden, a member of the Audit Committee, qualifies as an "audit committee financial expert" under applicable SEC rules. The Board of Directors has further determined that Mr. Madden qualifies as an "independent" director under applicable SEC rules and the corporate governance rules of the NASDAQ stock market. The Board's affirmative determination was based, among other things, upon Mr. Madden's experience as Vice President of Finance and Business of Iowa State University, a position in which he functions as the principal financial officer of the University.

Code of Ethics

The Company has adopted an Ethics and Confidentiality Policy that applies to all directors, officers and employees of the Company, including the Chief Executive Officer and the Chief Financial Officer of the Company. A copy of this policy is posted on the Company's website at www.amesnational.com. In the event that the Company makes any amendments to, or grants any waivers of, a provision of the Ethics and Confidentiality Policy that requires disclosure under applicable SEC rules, the Company intends to disclose such amendments or waiver and the reasons therefor on its website.

ITEM 11. EXECUTIVE COMPENSATION

Refer to the information under the caption "Executive Compensation" in the Proxy Statement, which information is incorporated herein by this reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

Refer to the information under the caption "Security Ownership of Management and Certain Beneficial Owners" in the Proxy Statement, which information is incorporated herein by this reference. The Company does not maintain any equity compensation plans covering its directors, officers or employees or the directors, officers or employees of the Banks.

ITEM 13. CERTAIN RELATIONSHIPS, RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Refer to the information under the captions “Loans to Directors and Executive Officers and Related Party Transactions” and “Corporate Governance – Director Independence” in the Proxy Statement, which information is incorporated herein by this reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Refer to the information under the caption "Relationship with Independent Registered Public Accounting Firm" in the Proxy Statement, which information is incorporated herein by this reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES
