Table Of Contents

NORTHWEST PIPE COMPANY

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation

The condensed consolidated financial statements include the accounts of Northwest Pipe Company (the “Company”) and its subsidiaries in which the Company exercises control as of the financial statement date. Intercompany accounts and transactions have been eliminated.

The accompanying unaudited condensed consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America. The financial information as of December 31, 2015 is derived from the audited consolidated financial statements presented in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015 (the “2015 Form 10-K”). Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). In the opinion of management, the accompanying condensed consolidated financial statements include all adjustments necessary (which are of a normal and recurring nature) for the fair statement of the results of the interim periods presented. The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto together with management’s discussion and analysis of financial condition and results of operations contained in the Company’s 2015 Form 10-K.

Certain amounts from the prior year financial statements have been reclassified in order to conform to the current year presentation.

Operating results for the three months ended March 31, 2016 are not necessarily indicative of the results that may be expected for the entire fiscal year ending December 31, 2016.

2. Inventories

Inventories are stated at the lower of cost or market and consist of the following (in thousands):

	March 31, 2016	December 31, 2015
Current inventories:		
Raw materials	\$22,370	\$ 21,486
Work-in-process	1,686	1,901
Finished goods	2,902	3,641
Supplies	2,421	2,447
	29,379	29,475
Non-current inventories:		
Finished goods	800	823
Total inventories	\$30,179	\$ 30,298

Long-term inventories are recorded in other assets.

3. Fair Value Measurements

The Company records its financial assets and liabilities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability, in the principal or most advantageous market for the asset or liability, in an orderly transaction between market participants at the measurement date.

The authoritative guidance establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. These levels are: Level 1 (inputs are quoted prices in active markets for identical assets or liabilities); Level 2 (inputs are other than quoted prices that are observable, either directly or indirectly through corroboration with observable market data); and Level 3 (inputs are unobservable, with little or no market data that exists, such as internal financial forecasts). The Company is required to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Table Of Contents

The following table summarizes information regarding the Company's financial assets and financial liabilities that are measured at fair value (in thousands):

Description	Balance at March 31, 2016	Level 1	Level 2	Level 3
Financial assets				
Deferred compensation plan	\$6,309	\$4,998	\$1,311	\$-
Financial liabilities				
Contingent consideration	\$(1,721)	\$-	\$-	\$(1,721)
Derivatives	(250)	-	(250)	-
Total liabilities	\$(1,971)	\$-	\$(250)	\$(1,721)

Description	Balance at December 31, 2015	Level 1	Level 2	Level 3
Financial assets				
Deferred compensation plan	\$ 6,357	\$5,075	\$1,282	\$-
Derivatives	296	-	296	-
Total assets	\$ 6,653	\$5,075	\$1,578	\$-
Financial liabilities				
Contingent consideration	\$ (2,974)	\$-	\$-	\$(2,974)

The deferred compensation plan assets consist of cash and several publicly traded stock and bond mutual funds, valued using quoted market prices in active markets classified as Level 1 within the fair value hierarchy, as well as securities that are not actively traded on major exchanges, valued using the Net Asset Value ("NAV") of the underlying investments classified as Level 2 within the fair value hierarchy.

The Company's derivatives consist of foreign currency forward contracts, which are accounted for as cash flow hedges, and are valued using various pricing models or discounted cash flow analyses that incorporate observable market parameters, such as interest rate yield curves and currency rates, classified as Level 2 within the valuation hierarchy. Derivative valuations incorporate credit risk adjustments that are necessary to reflect the probability of default by the counterparty or the Company.

The contingent consideration liability is associated with the acquisition of Permalok Corporation in December 2013 and represents the probability weighted average contingent payment as a percentage of high, mid, and low revenue projections. The inputs used to measure contingent consideration are classified as Level 3 within the valuation hierarchy. The valuation is not supported by market criteria and reflects the Company's internal revenue forecasts. Changes in the fair value of the contingent consideration obligation will be reflected in cost of sales during the period the change occurs.

The net carrying amounts of cash and cash equivalents, trade and other receivables, accounts payable, accrued liabilities and borrowings on line of credit approximate fair value due to the short-term nature of these instruments.

4. Derivative Instruments and Hedging Activities

The Company conducts business in various foreign countries and, from time to time, settles transactions in foreign currencies. The Company has established a program that utilizes foreign currency forward contracts to offset the risk associated with the effects of certain foreign currency exposures, typically arising from sales contracts denominated in Canadian currency. Instruments that do not qualify for cash flow hedge accounting treatment are remeasured at fair value on each balance sheet date and resulting gains and losses are recognized in income. As of March 31, 2016 and December 31, 2015, all derivative contracts held by the Company were designated as cash flow hedges. As of March 31, 2016 and December 31, 2015, the total notional amount of the derivative contracts designated as cash flow hedges was \$6.3 million (CAD\$8.2 million) and \$6.3 million (CAD\$8.7 million), respectively. Derivative assets are included within prepaid expenses and other current assets and derivative liabilities are included within accrued liabilities in the condensed consolidated balance sheets. All of the Company's foreign currency forward contracts are subject to an enforceable master netting arrangement. The Company presents the assets and liabilities associated with its foreign currency forward contracts at their gross fair values within the condensed consolidated balance sheets.

Table Of Contents

For each derivative contract entered into in which the Company seeks to obtain cash flow hedge accounting treatment, the Company formally documents all relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking the hedge transaction, the nature of the risk being hedged, how the hedging instrument's effectiveness in offsetting the hedged risk will be assessed prospectively and retrospectively, and a description of the method of measuring ineffectiveness. This process includes linking all derivatives to specific firm commitments or forecasted transactions and designating the derivatives as cash flow hedges. The Company also formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative contracts that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items. The effective portion of these hedged items is reflected in other comprehensive income in stockholders' equity. If it is determined that a derivative contract is not highly effective, or that it has ceased to be a highly effective hedge, the Company will be required to discontinue hedge accounting with respect to that derivative contract prospectively.

All of the Company's Canadian forward contracts have maturities of 12 months or less as of March 31, 2016.

For the three months ended March 31, 2016, and March 31, 2015, losses recognized in net sales from derivative contracts not designated as hedging instruments were \$212,000 and \$18,000, respectively. At March 31, 2016 and March 31, 2015, there were (\$78,000) and \$21,000, respectively, of unrealized pretax gains (losses) on outstanding derivatives in accumulated other comprehensive loss. Substantially all of the amount in accumulated other comprehensive loss at March 31, 2016 is expected to be reclassified to net sales within the next 12 months as a result of underlying hedged transactions also being recorded in net sales. See Note 10, "Accumulated Other Comprehensive Loss" for additional quantitative information regarding derivative gains and losses.

5. Commitments and Contingencies

Portland Harbor Superfund

On December 1, 2000, a section of the lower Willamette River known as the Portland Harbor Site was included on the National Priorities List at the request of the United States Environmental Protection Agency (the "EPA"). While the Company's Portland, Oregon manufacturing facility does not border the Willamette River, an outfall from the facility's stormwater system drains into a neighboring property's privately owned stormwater system and slip. Since the listing of the site, the Company was notified by the EPA and the Oregon Department of Environmental Quality ("ODEQ") of potential liability under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"). In 2008, the Company was asked to file information disclosure reports with the EPA (CERCLA 104 (e) information request). A remedial investigation and feasibility study ("RI/FS") of the Portland Harbor Site has been directed by a group of 14 potentially responsible parties known as the Lower Willamette Group (the "LWG") under agreement with the EPA. The remedial investigation report was finalized in February 2016. The draft feasibility study ("FS") was submitted by the LWG to the EPA in March 2012. A revised draft FS submitted in 2015 identifies six possible remedial alternatives which range in estimated cost from approximately \$790 million to \$2.5 billion and estimates it

will take up to 18 years to implement the remedial work, depending on the selected alternative. The report does not determine who is responsible for the costs of cleanup or how the cleanup costs will be allocated among the potentially responsible parties. As of the date of this filing, the revised FS is pending approval of the EPA.

In 2001, groundwater containing elevated volatile organic compounds (“VOCs”) was identified in one localized area of leased property adjacent to the Portland facility furthest from the river. Assessment work was conducted in 2002 and 2003 to further characterize the groundwater. In February 2005, the Company entered into a Voluntary Agreement for Remedial Investigation and Source Control Measures (the “Agreement”) with ODEQ. The Company performed RI work required under the Agreement and submitted a draft RI/Source Control Evaluation Report (“SCE”) in December 2005, a revised draft RI/SCE Report in January 2014, and a further revised RI/SCE Report in March 2015. In May 2015, and subsequently in August and October 2015, the Company received the EPA’s and ODEQ’s comments, respectively, requesting additional information and modifications to the revised RI/SCE Report, including the request to conduct additional groundwater sampling. The Company provided a Supplemental Groundwater Sampling Work Plan (“proposed Work Plan”) in December 2015. The DEQ and EPA provided comments to the proposed Work Plan in January 2016 and additional requests in February 2016. The Company expects to provide a Final Supplemental Groundwater Sampling Work Plan in the second quarter of 2016.

Concurrent with the activities of the EPA and ODEQ, the Portland Harbor Natural Resources Trustee Council (“Trustees”) sent some or all of the same parties, including the Company, a notice of intent to perform a Natural Resource Damage Assessment (“NRDA”) for the Portland Harbor Site to determine the nature and extent of natural resource damages under CERCLA section 107. The Trustees for the Portland Harbor Site consist of representatives from several Northwest Indian Tribes, three federal agencies and one state agency. The Trustees act independently of the EPA and ODEQ. The Trustees have encouraged potentially responsible parties to voluntarily participate in the funding of their injury assessments and several of those parties have agreed to do so. In June 2014, the Company agreed to participate in the injury assessment process, which included funding \$0.4 million of the assessment; of this amount, \$0.2 million was paid in July 2014 and the remainder was paid in January 2015. The Company has not assumed any additional payment obligations or liabilities with the participation with the NRDA.

Table Of Contents

The Company's potential liability is a portion of the costs of the remedy the EPA will select for the entire Portland Harbor Superfund Site. The cost of that remedy is expected to be allocated among more than 100 potentially responsible parties. Because of the large number of responsible parties and the variability in the range of remediation alternatives, the Company is unable to estimate an amount or an amount within a range of costs for its obligation with respect to the Portland Harbor Site matters, and no further adjustment to the consolidated financial statements has been recorded as of the date of this filing. The Company has insurance policies for defense costs, as well as indemnification policies it believes will provide reimbursement for any share of the remediation assessed. However, the Company can provide no assurance that those policies will cover all of the costs which the Company may incur.

In December 2014, a federal district court approved settlements between the Company and two of its insurance carriers. The Company released its interests in the related insurance policies, and received \$2.6 million in January 2015 for reimbursement of past indemnification and defense costs incurred by the Company associated with the Portland Harbor Site, substantially all of which reduced cost of sales in 2014. Notwithstanding these settlements, the Company continues to have insurance coverage for indemnification and defense costs related to the Portland Harbor Site as described above.

Houston Environmental Issue

In connection with the Company's sale of its oil country tubular goods ("OCTG") business, a Limited Phase II Environmental Site Assessment was conducted at the Houston, Texas plant and completed in March 2014, which revealed the presence of VOCs in the groundwater and certain metals in the soil. In June 2014, the Company was accepted into the Texas Commission on Environmental Quality ("TCEQ") Voluntary Cleanup Program ("VCP") to address these issues and obtain a Certificate of Completion from TCEQ. The cost of any potential assessment and cleanup will not be covered by insurance. However, any costs incurred will be reimbursed by the purchaser of the OCTG business if the purchaser exercises its option to purchase the property under certain circumstances after the Certificate of Completion is obtained.

The proposed remediation approach includes a municipal ordinance to prevent consumption of shallow groundwater from beneath the property, thereby eliminating the need for more costly remediation measures. In February 2016, the Company submitted an application to the City of Houston under the municipal ordinance, and is currently in the process of satisfying the requirements of the City and TCEQ to obtain approval of the application.

While the final remediation approach has not yet been determined, the Company has completed an initial assessment and currently estimates that the future costs associated with the VCP will be between \$0.2 million and \$2.2 million. At March 31, 2016, the Company has a \$0.3 million accrual for remediation costs based on the low-end estimate of future costs using a probability-weighted analysis of remediation approaches, and estimates that completion of the VCP process will occur between the second quarter of 2017 and the first quarter of 2019.

All Sites

The Company operates its facilities under numerous governmental permits and licenses relating to air emissions, storm water run-off, and other environmental matters. The Company's operations are also governed by many other laws and regulations, including those relating to workplace safety and worker health, principally the Occupational Safety and Health Act and regulations there under which, among other requirements, establish noise and dust standards. The Company believes it is in material compliance with its permits and licenses and these laws and regulations, and the Company does not believe that future compliance with such laws and regulations will have a material adverse effect on its financial position, results of operations or cash flows.

From time to time, the Company is involved in litigation relating to claims arising out of its operations in the normal course of its business. The Company maintains insurance coverage against potential claims in amounts that are believed to be adequate. To the extent that insurance does not cover legal, defense, and indemnification costs associated with a loss contingency, such costs will be expensed as incurred. The Company believes that it is not presently a party to any other litigation, the outcome of which would have a material adverse effect on its business, financial condition, results of operations or cash flows.

Table Of Contents*Guarantees*

The Company has entered into certain stand-by letters of credit that total \$2.0 million at March 31, 2016. The stand-by letters of credit relate to workers' compensation insurance.

6. Segment Information

The Company's business is the manufacturing of welded steel pipe. Within this business, the Company's operations are organized into two reportable segments: the Water Transmission Group and the Tubular Products Group. These reportable segments are based on the nature of the products and the manufacturing process. The two segments represent distinct business activities, which management evaluates based on segment gross profit and operating income. Transfers between segments in the periods presented were not material.

The Water Transmission Group manufactures large-diameter, high-pressure steel pipeline systems for use in water infrastructure applications, which are primarily related to drinking water systems. These products are also used for hydroelectric power systems, wastewater systems and other applications. In addition, the Water Transmission Group makes products for industrial plant piping systems and certain structural applications.

The Tubular Products Group manufactures and markets smaller diameter, electric resistance welded steel pipe used in a wide range of applications, including energy, construction, agriculture and industrial systems.

	Three Months Ended March 31, 2016 2015 (in thousands)	
Net sales:		
Water transmission	\$29,358	\$56,242
Tubular products	4,570	28,623
Total	\$33,928	\$84,865
Gross profit (loss):		
Water transmission	\$(5,750)	\$7,519
Tubular products	313	(3,628)
Total	\$(5,437)	\$3,891

Operating income (loss):

Water transmission	\$(7,256)	\$5,633
Tubular products	104	(4,617)
Corporate	(2,884)	(4,099)
Total	\$(10,036)	\$(3,083)

7. Share-based Compensation

The Company has one active stock incentive plan for employees and directors: the 2007 Stock Incentive Plan, which provides for awards of stock options to purchase shares of common stock, stock appreciation rights, restricted and unrestricted shares of common stock, restricted stock units (RSUs) and performance share awards (PSAs). In addition, the Company has one inactive stock option plan, the 1995 Stock Option Plan for Nonemployee Directors, under which previously granted options remain outstanding.

Table Of Contents

The Company recognizes compensation cost as service is rendered based on the fair value of the awards. The following table summarizes share-based compensation expense recorded (in thousands):

	Three Months Ended March 31, 2016 2015	
Cost of sales	\$(28)	\$81
Selling, general and administrative expenses	206	569
Total	\$178	\$650

As of March 31, 2016, unrecognized compensation expense related to the unvested portion of the Company's RSUs and PSAs was \$.8 million, which is expected to be recognized over a weighted average period of .8 years.

Stock Option Awards

A summary of the status of the Company's stock options as of March 31, 2016 and changes during the three months then ended is presented below:

	Options Outstanding	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value (In thousands)
Balance, January 1, 2016	28,000	\$ 25.21		
Options granted	-	-		
Options exercised	-	-		
Options cancelled	-	-		
Balance, March 31, 2016	28,000	25.21	3.52	\$ -
Exercisable, March 31, 2016	28,000	25.21	3.52	\$ -

Restricted Stock Units and Performance Stock Awards

A summary of the status of the Company's RSUs and PSAs as of March 31, 2016 and changes during the three months then ended is presented below:

	Number of RSUs and PSAs	Weighted Average Grant Date Fair Value
Balance, January 1, 2016	127,852	\$ 38.87
RSUs and PSAs granted	-	-
RSUs and PSAs vested	(12,212)	31.50
RSUs and PSAs canceled	(63,126)	36.93
Balance, March 31, 2016	52,514	42.91

RSUs and PSAs are measured at the estimated fair value on the date of grant. RSUs are service-based awards and vest according to vesting schedules, which range from immediate to ratably over a three-year period. PSAs are service-based awards that vest over a three-year period and have a market-based payout condition. Vesting of the market-based PSAs is dependent upon the performance of the market price of the Company's stock relative to a peer group of companies. The unvested balance of RSUs and PSAs at March 31, 2016 includes approximately 47,000 PSAs at a target level of performance; the actual number of common shares that will ultimately be issued will be determined by multiplying this number of PSAs by a payout percentage ranging from 0% to 200%.

Table Of Contents**8. Income Taxes**

The Company files income tax returns in the United States Federal jurisdiction, in a limited number of foreign jurisdictions, and in many state jurisdictions. Internal Revenue Service examinations have been completed for years prior to 2011. With few exceptions, the Company is no longer subject to U.S. Federal, state or foreign income tax examinations for years before 2012. The Company is currently under Colorado income tax audit for the years 2009 to 2013. It is reasonably possible that the Company will close the audit within the next 12-month period. Such resolution is not anticipated to have a significant impact on our results of operations. There are no other income tax audits in progress.

The Company had \$4.9 million of unrecognized tax benefits at March 31, 2016 and December 31, 2015, respectively. The Company does not believe it is reasonably possible that the total amounts of unrecognized tax benefits will change in the following twelve months; however, actual results could differ from those currently expected. Effectively all the unrecognized tax benefits would affect the Company's effective tax rate if recognized at some point in the future. The Company recognizes interest and penalties related to uncertain tax positions in income tax expense.

The Company recorded an income tax benefit at an estimated effective tax rate of 5.3% and 37.7% for the three months ended March 31, 2016, and March 31, 2015, respectively. The estimated effective tax rate for the three months ended March 31, 2016 is significantly lower than statutory rates because the Company's net operating losses from the period are subject to a valuation allowance.

9. Loss per Share

Loss per basic and diluted weighted average common share outstanding were calculated as follows for the three months ended March 31, 2016 and 2015 (in thousands, except per share data):

	Three Months Ended March 31,	
	2016	2015
Net loss	\$ (9,583)	\$ (2,101)
Basic weighted-average common shares outstanding	9,572	9,553
Effect of potentially dilutive common shares	-	-
Diluted weighted-average common shares outstanding	9,572	9,553

Loss per common share:

Loss per basic common share	\$(1.00) \$(0.22)
-----------------------------	---------------------

Loss per diluted common share	(1.00)	(0.22)
-------------------------------	---------	---------

Due to the Company's net loss in the three month periods ended March 31, 2016 and 2015, the assumed exercise of stock options and the vesting of restricted stock units and performance stock awards using the treasury stock method would have had an antidilutive effect and were therefore excluded from the computation of diluted loss per share. The weighted average number of such antidilutive shares not included in the computation of diluted loss per share was 94,000 and 204,000 for the three month periods ended March 31, 2016 and 2015, respectively.

Table Of Contents**10. Accumulated Other Comprehensive Loss**

The following tables summarize changes in the components of accumulated other comprehensive loss during the three months ended March 31, 2016 and March 31, 2015 (in thousands). All amounts are net of tax:

	Defined Benefit Pension Items	Gains (Losses) on Cash Flow Hedges	Total
Balance, December 31, 2015	\$ (1,624)	\$ 86	\$ (1,538)
Other comprehensive income (loss) before reclassifications	33	(86)	(53)
Amounts reclassified from accumulated other comprehensive income (loss)	67	(46)	21
Net current period other comprehensive income (loss)	100	(132)	(32)
Balance, March 31, 2016	\$ (1,524)	\$ (46)	\$ (1,570)

	Defined Benefit Pension Items	Gains (Losses) on Cash Flow Hedges	Total
Balance, December 31, 2014	\$ (1,862)	\$ 29	\$ (1,833)
Other comprehensive income before reclassifications	56	61	117
Amounts reclassified from accumulated other comprehensive income (loss)	53	(76)	(23)
Net current period other comprehensive income (loss)	109	(15)	94
Balance, March 31, 2015	\$ (1,753)	\$ 14	\$ (1,739)

The following table provides additional detail about accumulated other comprehensive income (loss) components that were reclassified to the condensed consolidated statement of operations during the three months ended March 31, 2016 and 2015 (in thousands):

**Three Months
Ended March
31,
2016 2015**

Details about Accumulated Other Comprehensive Income (Loss) Components	Amount reclassified from Accumulated Other Comprehensive Income (Loss)	
Pension liability adjustment	\$ (71)	\$ (85)
Net periodic pension cost	4	32
Associated tax benefit	\$ (67)	\$ (53)
Deferred gain on cash flow derivatives	\$ 74	\$ 122
Gain on cash flow derivatives	-	(1)
Hedge ineffectiveness	(28)	(45)
Associated tax expense	\$ 46	\$ 76
Total reclassifications for the period	\$ (21)	\$ 23

Table Of Contents

11. Recent Accounting and Reporting Developments

There have been no developments to recently issued accounting standards, including the expected dates of adoption and estimated effects on the Company's consolidated financial statements and footnote disclosures, from those disclosed in the Company's 2015 Annual Report on Form 10-K, except for the following:

In March 2016, the FASB issued Accounting Standards Update No. 2016-07, Investments – Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting (“ASU 2016-07”). Among other things, the amendments in ASU 2016-07 eliminate the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. Therefore, upon qualifying for the equity method of accounting, no retroactive adjustment of the investment is required. The amendments are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method. Early adoption is permitted. The Company is currently assessing the impact of this ASU on its consolidated financial statements.

In March 2016, the FASB issued Accounting Standards Update No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net) (“ASU 2016-08”). ASU 2016-08 clarifies the implementation guidance on principal versus agent considerations contained in Accounting Standards Update No. 2014-09 “Revenue from Contracts with Customers”. The guidance in ASU 2016-08 includes indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customers. The Company is currently assessing the impact of this ASU on its consolidated financial statements.

In March 2016, the FASB issued Accounting Standards Update No. 2016-09, Compensation – Stock Compensation (Topic 718) (“ASU 2016-09”). ASU 2016-09 identifies areas for simplification involving several aspects of accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, an option to recognize gross stock compensation expense with actual forfeitures recognized as they occur, as well as certain classifications on the statement of cash flows. The guidance will be effective for the fiscal year beginning after December 15, 2016, including interim periods within that year. The Company is currently assessing the impact of this ASU on its consolidated financial statements.

Table Of Contents

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This Management’s Discussion and Analysis of Financial Condition and Results of Operations and other sections of this Report contain forward-looking statements within the meaning of the Securities Litigation Reform Act of 1995 and Section 21E of the Exchange Act that are based on current expectations, estimates and projections about our business, management’s beliefs, and assumptions made by management. Words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “estimates,” “forecasts,” “should,” “could,” and variations of such words and similar expressions intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements as a result of a variety of important factors. While it is impossible to identify all such factors, those that could cause actual results to differ materially from those estimated by us include changes in demand and market prices for our products, product mix, bidding activity, the timing of customer orders and deliveries, production schedules, the price and availability of raw materials, price and volume of imported product, excess or shortage of production capacity, international trade policy and regulations and other risks discussed in our Annual Report on Form 10-K for the year ended December 31, 2015 (the “2015 Form 10-K”) and from time to time in our other SEC filings and reports. Such forward-looking statements speak only as of the date on which they are made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this Report. If we do update or correct one or more forward-looking statements, investors and others should not conclude that we will make additional updates or corrections with respect thereto or with respect to other forward-looking statements.

Overview

Water Transmission Group. We are the largest manufacturer of engineered steel pipe water systems in North America. With eight Water Transmission manufacturing facilities, we are positioned to meet North America’s growing needs for water and wastewater infrastructure. We serve a wide range of markets and our solutions-based products are a good fit for applications including water transmission, plant piping, tunnels and river crossings. With a history that dates back more than 100 years, we have become a leading manufacturer in the welded steel pipe industry. These pipeline systems are produced by our Water Transmission Group from eight manufacturing facilities, which are located in Portland, Oregon; Denver, Colorado; Adelanto, California; Parkersburg, West Virginia; Saginaw, Texas; Salt Lake City, Utah; St. Louis, Missouri; and Monterrey, Mexico. Our Water Transmission Group accounted for approximately 87% of our net sales in the first quarter of 2016.

Our water infrastructure products are sold generally to installation contractors, who include our products in their bids to municipal agencies or privately-owned water companies for specific projects. We believe our sales are substantially

driven by spending on new water infrastructure with a recent trend towards spending on water infrastructure replacement, repair and upgrade. Within the total range of pipe products, our products tend to fit the larger diameter, higher-pressure applications.

Tubular Products Group. Our Tubular Products Group manufactures ERW steel pipe at our Atchison, Kansas facility, producing a range of line pipe products used in several different applications including energy, industrial, construction, and agricultural. Our Tubular Products Group generated approximately 13% of our net sales in the first quarter of 2016. Our Tubular Products Group's sales volume is typically driven by energy spending, non-residential construction spending and general economic conditions. We announced on July 20, 2015 that we are in the process of exploring the sale of our remaining Energy Tubular Products business, which includes line, structural and standard pipe, and is located in Atchison, Kansas. This decision reflects our long-term objective to focus on our core Water Transmission business through organic growth initiatives as well as through merger and acquisition activity. The Atchison facility operated at reduced levels from April 2015 to January 2016, when we idled the Atchison facility to reduce operating expenses until market conditions improve or a sale is completed. We are continuing to sell previously manufactured tubular products inventory.

Our Current Economic Environment. We operate our Water Transmission Group with a long-term time horizon. Projects are often planned for many years in advance, and are sometimes part of fifty-year build out plans. Long-term demand for water infrastructure projects in the United States appears strong. However, in the near term, we expect strained governmental and water agency budgets and increased capacity from competitors to impact the Water Transmission Group. Fluctuating steel costs will also be a factor, as the ability to adjust our selling prices as steel costs fluctuate will depend on market conditions. Purchased steel represents a substantial portion of our cost of sales, and changes in our selling prices often correlate directly to changes in steel costs.

Table Of Contents

Demand for line pipe, the primary product of our Tubular Products Group, is correlated to oil and gas exploration activity in the United States, which is itself correlated to global oil prices. Historically low oil prices led to reduced demand in 2015, and we continue to expect weak demand in 2016.

In addition to the macroeconomic factors described above, we continue to face pressures from significant volumes of foreign imports of tubular products. We also face increased pressures due to recent domestic capacity expansions by our competitors.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates on an on-going basis. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. A description of our critical accounting policies and related judgments and estimates that affect the preparation of our condensed consolidated financial statements is set forth in our 2015 Form 10-K.

Recent Accounting Pronouncements

See Note 11 of the condensed consolidated financial statements in Part I—Item I, “Financial Statements” for a description of recent accounting pronouncements, including the dates of adoption and estimated effects on financial position, results of operations and cash flows.

Results of Operations

The following tables set forth, for the period indicated, certain financial information regarding costs and expenses expressed as a percentage of total net sales and net sales of our business segments.

	Three months ended		Three months ended	
	March 31, 2016		March 31, 2015	
	\$	% of Net Sales	\$	% of Net Sales
Net sales				
Water Transmission	\$29,358	86.5 %	\$56,242	66.3 %
Tubular Products	4,570	13.5	28,623	33.7
Total net sales	33,928	100.0	84,865	100.0
Cost of sales	39,365	116.0	80,974	95.4
Gross profit (loss)	(5,437)	(16.0)	3,891	4.6
Selling, general and administrative expense	4,599	13.6	6,974	8.2
Operating loss	(10,036)	(29.6)	(3,083)	(3.6)
Other income	40	0.1	44	-
Interest income	-	-	82	0.1
Interest expense	(119)	(0.3)	(417)	(0.5)
Loss before income taxes	(10,115)	(29.8)	(3,374)	(4.0)
Income tax benefit	(532)	(1.6)	(1,273)	(1.5)
Net loss	\$(9,583)	(28.2)%	\$(2,101)	(2.5)%
Gross profit (loss) as a percentage of segment net sales:				
Water Transmission		(19.6)%		13.4 %
Tubular Products		6.8		(12.7)

Three Months Ended March 31, 2016 Compared to Three Months Ended March 31, 2015

Net sales. Net sales decreased 60.0% to \$33.9 million for the first quarter of 2016 compared to \$84.9 million for the first quarter of 2015. Two customers in the Water Transmission segment, Garney Construction and Bar Constructors, Inc., accounted for 32.1% and 14.0%, respectively, of total net sales in the first quarter of 2016. No sales to a single customer were 10% or more of total net sales in the first quarter of 2015.

Water Transmission sales decreased 47.8% to \$29.4 million for the first quarter of 2016 compared to \$56.2 million for the first quarter of 2015. The decrease in sales in the first quarter of 2016 compared to the first quarter of 2015 was due to a 52% decrease in selling price per ton, partially offset by a 10% increase in tons produced. The decrease in selling prices per ton in the first quarter of 2016 was primarily due to a 39% decrease in steel costs per ton. Lower material costs generally lead to lower contract values and, therefore, lower net sales as contractors and municipalities are aware of the input costs and market conditions. The increase in tons produced was due to project timing. Bidding activity, backlog and production levels may vary significantly from period to period affecting sales volumes.

Table Of Contents

Tubular Products sales decreased 84.0% to \$4.6 million in the first quarter of 2016 compared to \$28.6 million in the first quarter of 2015. The sales decrease in the first quarter of 2016 compared to the first quarter of 2015 was due to a 73% decrease in tons sold and a 42% decrease in selling price per ton. We sold approximately 8,000 tons in the first quarter of 2016 compared to approximately 28,000 tons in the first quarter of 2015. The decrease in tons sold was primarily due to decreased demand for line pipe as a result of the worldwide downturn in crude oil prices and large volumes of imported pipe. Energy pipe sales volume decreased 77% from approximately 18,000 tons in the first quarter of 2015 to approximately 4,000 tons in the first quarter of 2016. The decrease in selling price per ton was also due to decreased demand, as well as due to a change in product mix. We are experiencing continued pricing pressures from imported pipe in 2016.

Gross profit. Gross profit decreased 240.0% to a \$5.4 million gross loss (negative 16.0% of total net sales) in the first quarter of 2016 compared to \$3.9 million gross profit (4.6% of total net sales) in the first quarter of 2015.

Water Transmission gross profit decreased \$13.3 million, or 176.5%, to a \$5.8 million gross loss (negative 19.6% of segment net sales) for the first quarter of 2016 compared to \$7.5 million (13.4% of segment net sales) for the first quarter of 2015. The decrease in gross profit as a percent of net sales in the first quarter of 2016 compared to the first quarter of 2015 was due to the significant competition that we have experienced on recent project bids which has led to decreased selling prices, combined with the mix of projects produced in the quarter.

Gross profit from Tubular Products increased \$3.9 million, to a \$0.3 million gross profit (6.8% of segment net sales) in the first quarter of 2016 compared to a \$3.6 million gross loss (negative 12.7% of segment net sales) in the first quarter of 2015. Gross profit in the quarter ended March 31, 2016 was positively impacted by higher realized selling prices than we expected when we recorded the lower of cost or market inventory adjustment in 2015. The gross profit in the quarter ended March 31, 2015 was negatively impacted by the recording of \$2.8 million of lower of cost or market inventory adjustments.

Selling, general and administrative expenses. Selling, general and administrative expenses decreased 34.1% to \$4.6 million (13.6% of total net sales) for the first quarter of 2016 compared to \$7.0 million (8.2% of total net sales) for the first quarter of 2015. The decrease for the first quarter of 2016 compared to the first quarter of 2015 was primarily due to a \$1.1 million reduction in wages and benefits due to lower headcount, a \$0.6 million decrease in professional fees and a \$0.2 million decrease in travel and entertainment expense.

Interest expense. Interest expense was \$0.1 million for the first quarter of 2016 compared to \$0.4 million for the first quarter of 2015. The decrease in interest expense primarily was a result of lower average borrowings, and lower capital lease balances at lower average rates, during the first quarter of 2016 compared to the first quarter of 2015.

Income taxes. The tax benefit was \$0.5 million in the first quarter of 2016 (an effective tax benefit rate of 5.3%) compared to a tax benefit of \$1.3 million in the first quarter of 2015 (an effective tax benefit rate of 37.7%).

The effective tax rate for the three months ended March 31, 2016 is significantly lower than statutory rates because our net operating losses from the period are subject to a valuation allowance. The effective income tax rate can change significantly depending on the relationship of permanent income tax deductions and tax credits to estimated pre-tax income or loss, and the changes in valuation allowances. Accordingly, the comparison of effective rates between periods is not meaningful in all situations.

Liquidity and Capital Resources

Sources and Uses of Cash

Our principal sources of liquidity generally include operating cash flows and our line of credit. From time to time our long-term capital needs may be met through the issuance of long-term debt or additional equity. Our principal uses of liquidity generally include capital expenditures, working capital and debt service. Information regarding our cash flows for the three months ended March 31, 2016 is presented in our consolidated statements of cash flows contained in this Form 10-Q, and is further discussed below.

As of March 31, 2016, our working capital (current assets minus current liabilities) was \$83.7 million compared to \$93.7 million as of December 31, 2015. The primary reasons for the decrease in working capital were decreases in trade and other receivables and net costs and estimated earnings in excess of billings on uncompleted contracts, due to lower sales, billings, and production in the first quarter of 2016. Net cash provided by operating activities in the first three months of 2016 was \$1.2 million. Cash from operating activities was primarily the result of our net loss, offset by fluctuations in working capital accounts that included the decrease in trade receivables and costs and estimated earnings in excess of billings on uncompleted contracts, net.

Table Of Contents

Fluctuations in our working capital accounts result from timing differences between production, shipment, invoicing, and collection, as well as changes in levels of production and costs of materials. We typically have a relatively large investment in working capital, as we generally pay for materials, labor, and other production costs in the initial stages of a project, while payments from our customers are generally received after finished product is delivered. Our revenues in the Water Transmission segment are recognized on a percentage-of-completion method; therefore, cash receipts typically occur subsequent to when revenue is recognized and the elapsed time between when revenue is recorded and when cash is received can be significant. As such, our payment cycle is a significantly shorter interval than our collection cycle, although the effect of this difference in the cycles may vary by project, and from period to period.

Net cash used in investing activities in the first three months of 2016 was \$0.7 million of capital expenditures, which was primarily standard capital replacement spending. Total capital expenditures are expected to be approximately \$3.0 million for 2016.

Net cash used in financing activities in the first three months of 2016 was \$1.4 million, primarily from the payment of contingent consideration in January 2016 for amounts earned on 2015 revenues of Permalok Corporation.

We anticipate that our existing cash and cash equivalents, cash flows expected to be generated by operations, and amounts available to borrow under our line of credit will be adequate to fund our working capital and capital requirements for the foreseeable future. To the extent necessary, we may also satisfy capital requirements through additional bank borrowings, senior notes, term notes, subordinated debt, and capital and operating leases, if such resources are available on satisfactory terms. We have from time to time evaluated and continue to evaluate opportunities for acquisitions and expansion. Any such transactions, if consummated, may use a portion of our working capital or necessitate additional bank borrowings or other sources of funding.

Borrowings on Line of Credit

At March 31, 2016, we had no outstanding borrowings, and \$2.0 million of outstanding letters of credit, under our Loan and Security Agreement (the “Agreement”) with Bank of America, N.A. dated October 26, 2015. The Agreement expires on October 25, 2018 and provides for revolving loans and letters of credit up to the maximum principal amount (the Revolver Commitment) of \$60 million, subject to a borrowing base. We have the ability to increase the Revolver Commitment to \$100 million, subject to the provisions of the Credit Agreement.

The borrowing base is calculated by applying various advance rates to eligible accounts receivable, costs and expected earnings in excess of billings, inventories, and fixed assets, subject to various exclusions, adjustments, and sublimits

by asset class. Additionally, the Agreement effectively limits availability under the borrowing base during times when our Fixed Charge Coverage Ratio, as defined in the Credit Agreement, is not met for the previous 12-month period. As of March 31, 2016, the Fixed Charge Coverage Ratio was not met, and therefore the availability limit applied. Including the effect of this limit, we had additional borrowing capacity of \$19.6 million, net of outstanding letters of credit, under the Agreement at March 31, 2016. Based on our business plan and forecasts of operations, we expect to have sufficient credit availability to support our operations in 2016.

Borrowings under the Agreement bear interest at rates related to LIBOR plus 1.75% to 2.25%, or at Bank of America's prime rate plus 0.75% to 1.25%. Borrowings under the Agreement are secured by substantially all of the Company's assets.

Capital Leases

We had a total of \$1.0 million in capital lease obligations outstanding at March 31, 2016. The weighted average interest rate on all of our capital leases is 4.79%. Our capital leases are for certain equipment used in the manufacturing process.

Off Balance Sheet Arrangements

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future material effect on our financial position, results of operations or cash flows.

Table Of Contents

Item 3. Quantitative and Qualitative Disclosure About Market Risk

For a discussion of the Company's market risk associated with foreign currencies and interest rates, see Item 7A, "Quantitative and Qualitative Disclosures about Market Risk" in Part II of the Company's 2015 Form 10-K.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act")) are designed to provide reasonable assurance that information required to be disclosed in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to our management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), as appropriate, to allow timely decisions regarding required disclosures.

In connection with the preparation of this Quarterly Report on Form 10-Q for the quarter ended March 31, 2016, our management, under the supervision and with the participation of our CEO and CFO, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2016. As a result of the assessment, our CEO and CFO have concluded that, as of March 31, 2016, our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There were no significant changes in the Company's internal control over financial reporting during the quarter ended March 31, 2016, that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Part II – Other Information

Item 1. Legal Proceedings

Information required by this Item 1 is contained in Note 5 to the condensed consolidated financial statements, Part I—Item 1, “Financial Statements” of this report, under the caption “Commitments and Contingencies.” The text under such caption is incorporated by reference into this Item 1.

Item 1A. Risk Factors

In addition to the other information set forth in this report, the factors discussed in Part I—Item 1A, “Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 could materially affect our business, financial condition or operating results. The risks described in our Annual Report on Form 10-K are not the only risks facing us. There are additional risks and uncertainties not currently known to us or that we currently deem to be immaterial, that may also materially adversely affect our business, financial condition, or operating results.
