QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 31, 2017
or
TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Commission file number: 0-21419

BioCardia, Inc.
(Exact name of registrant as specified in its charter)
Delaware 23-2753988
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification Number)
125 Shoreway Road, Suite B
San Carlos, California 94070
(Address of principal executive offices)
(650) 226-0120
Registrant's telephone number, including area code
N/A
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if
any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T
(§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required
to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

There were 457,682,784 shares of the registrant's Common Stock issued and outstanding as of May 9, 2017.

FORWARD-LOOKING INFORMATION

This report contains forward-looking statements within the meaning of the U.S. federal securities laws that involve risks and uncertainties. Certain statements contained in this report are not purely historical including, without limitation, statements regarding our expectations, beliefs, intentions, anticipations, commitments or strategies regarding the future that are forward-looking. These statements include those discussed in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, including "Critical Accounting Policies and Estimates," "Results of Operations," "Liquidity and Capital Resources," and "Future Funding Requirements," and elsewhere in this report.

In this report, the words "may," "could," "would," "might," "will," "should," "plan," "forecast," "anticipate," "believe," "expect," "intend," "estimate," "predict," "potential," "continue," "future," "moving toward" or the negative of these terms or other similar expressions also identify forward-looking statements. Our actual results could differ materially from those forward-looking statements contained in this report as a result of a number of risk factors including, but not limited to, those listed in our Annual Report on Form 10-K and elsewhere in this report. You should

carefully consider these risks, in addition to the other information in this report and in our other filings with the SEC. All forward-looking statements and reasons why results may differ included in this report are made as of the date of this report, and we assume no obligation to update any such forward-looking statement or reason why such results might differ, except as required by law.

(1) Summary of Business and Basis of Presentation

(a) Description of Business

BioCardia, Inc., or the Company, is a clinical-stage regenerative medicine company developing novel therapeutics for cardiovascular diseases with large unmet medical needs. Its lead therapeutic candidate is the CardiAMP cell therapy system and its second therapeutic candidate is the CardiALLO cell therapy system. To date the Company has devoted substantially all of its resources to research and development efforts relating to its therapeutic candidates and biotherapeutic delivery systems including conducting clinical trials, developing manufacturing and sales capabilities, in-licensing related intellectual property, providing general and administrative support for these operations and protecting its intellectual property.

The Company has three enabling device product lines: (1) the CardiAMP cell processing system; (2) the Helix biotherapeutic delivery system, or Helix; and (3) the Morph vascular access product line, or Morph, which offers advanced catheter products for interventional medicine. The Company manages its operations as a single segment for the purposes of assessing performance and making operating decisions.

(b) Reverse Merger

On August 22, 2016, the Company, its wholly-owned subsidiary, Icicle Acquisition Corp, and BioCardia Lifesciences, Inc., or BioCardia Lifesciences (at the time named BioCardia, Inc.), entered into an Agreement and Plan of Merger, or the Merger Agreement. The transactions contemplated by the Merger Agreement closed on October 24, 2016, pursuant to which Icicle Acquisition Corp. merged with and into BioCardia Lifesciences, with BioCardia Lifesciences continuing as the surviving company, or the Merger. BioCardia Lifesciences was determined to be the accounting acquirer in the Merger based upon the terms of the Merger and other factors, including: (i) former BioCardia Lifesciences security holders owned approximately 54% of the combined company (on a fully diluted basis) immediately following the closing of the Merger, (ii) former BioCardia Lifesciences directors hold the majority of the board seats in the combined company, and (iii) former BioCardia Lifesciences management holds all of the key positions in the management of the combined company. Following the completion of the Merger, the Company changed its name to BioCardia, Inc.

Exchange Ratio

Pursuant to the Merger Agreement, each share of BioCardia Lifesciences common stock issued and outstanding prior to the Merger, including shares of common stock underlying outstanding preferred stock, convertible notes (which converted into common stock immediately prior to the Merger), and stock options were converted into the right to receive 19.3678009 shares of Company common stock, or the Exchange Ratio. The accompanying consolidated

financial statements and notes to the consolidated financial statements give retroactive effect to the capital structure as a result of the Merger.

(2) Significant Accounting Policies

(a) Basis of Preparation

The accompanying condensed consolidated balance sheets, statements of operations and cash flows as of March 31, 2017 and 2016 are unaudited. The condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (U.S. GAAP) and applicable rules and regulations of the Securities and Exchange Commission (SEC) for interim financial information and on a basis consistent with the annual financial statements and, in the opinion of management, reflect all adjustments which include only normal recurring adjustments, necessary to present fairly our financial position as of March 31, 2017, results of operations and cash flows for the three months ended March 31, 2017 and 2016. The results for the three months ended March 31, 2017 are not necessarily indicative of the results to be expected for the year ending December 31, 2017 or for any other interim period or for any other future year.

These condensed consolidated financial statements should be read in conjunction with the audited financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016, filed with the SEC on March 30, 2017.

(b) Liquidity

The Company has incurred net losses and negative cash flows from operations since its inception and had an accumulated deficit of \$63.0 million as of March 31, 2017. Management expects operating losses and negative cash flows to continue through at least the next several years.

Upon closing of the Merger Agreement, the combined company had approximately \$24.0 million in cash, including \$19.0 million of cash acquired as part of the Merger and \$4.4 million in net proceeds from the issuance of convertible notes in October 2016. Management believes cash of \$19.0 million as of March 31, 2017 is sufficient to fund the Company for at least the next twelve-month period following the date of issuance of these financial statements. The Company also plans to raise other additional capital, potentially including debt and equity arrangements, to finance its future operations. If adequate funds are not available, the Company may be required to reduce operating expenses, delay or reduce the scope of its product development programs, obtain funds through arrangements with others that may require the Company to relinquish rights to certain of its technologies or products that the Company would otherwise seek to develop or commercialize itself, or cease operations. While the Company believes in the viability of its strategy to raise additional funds, there can be no assurances to that effect.

(c) Use of Estimates

The preparation of the financial statements in accordance with U.S. GAAP requires Company management to make certain estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from those estimates. Significant items subject to such estimates and assumptions include the useful lives of property and equipment; allowances for doubtful accounts and sales returns; inventory valuation; fair value of the convertible preferred stock warrant liability; fair value of the maturity date preferred stock warrant liability; fair value of the convertible shareholder notes derivative liability; and share-based compensation.

(d) Principles of Consolidation

The condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiary. All intercompany accounts and transactions have been eliminated during the consolidation process.

(e) Significant Accounting Policies

The Company's significant accounting policies are described in Note 2 of the notes to the financial statements included in the 2016 Form 10-K. There have been no changes to those policies except as described below.

(f) Recently Adopted Accounting Pronouncement

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting (ASU 2016-09). The standard is intended to simplify several areas of accounting for share-based compensation arrangements, including the income tax impact, classification in the statement of cash flows and forfeitures. The Company adopted ASU 2016-09 effective January 1, 2017.

The impact of adopting ASU 2016-09 resulted in the following:

We will classify the excess income tax benefits from stock-based compensation arrangement as a discrete item within income tax expense, rather than recognizing such excess income tax benefits in additional paid-in capital. The adoption of this guidance had no material impact to our condensed consolidated financial statements due to a full valuation allowance recognized against our deferred tax assets.

We elected to recognize forfeitures as they occur. The cumulative effect adjustment as a result of the adoption of this guidance on a modified retrospective basis was insignificant.

We applied the change in classification of cash flows resulting from excess tax benefits and cash paid by us when directly withholding shares for tax-withholding purposes on a retrospective basis. The adoption of these provisions did not result in changes in our condensed consolidated statements of cash flow.

There were no other material impacts to our condensed consolidated financial statements as a result of adopting this updated standard.

(g) Recently Issued Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which provides comprehensive guidance for revenue recognition. ASU 2014-09 affects any entity which either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets. The core principle of the guidance provides that a company should recognize revenue when promised goods or services are transferred to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Additionally, qualitative and quantitative disclosures are required about customer contracts, significant judgments and changes in judgments, and assets recognized from the costs to obtain or fulfill a contract. The new standard can be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of the change recognized at the date of the initial application in retained earnings.

In August 2015, the FASB issued ASU 2015-14 Revenue from Contracts with Customers, which deferred the effective date for implementation of the standard. Public entities are to apply the new standard for annual and interim reporting periods beginning after December 15, 2017 and earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The Company has not elected early adoption and has not concluded on an adoption method. The Company has formed a task force that is beginning to assess the Company's customer contracts and the potential impacts the standard may have on previously reported revenues and future revenues. Given the relatively small volume of revenue arrangements, the Company believes that the analysis will be completed in sufficient time to adopt the new standard when required.

In February 2016, the FASB issued ASU 2016-02 Leases (Topic 842), which supersedes existing guidance on accounting for leases in "Leases (Topic 840)" and generally requires all leases to be recognized in the consolidated balance sheet. ASU 2016-02 is effective for annual and interim reporting periods beginning after December 15, 2018; early adoption is permitted. The Company does not plan to elect early adoption. The provisions of ASU 2016-02 are to be applied using a modified retrospective approach. The Company is currently assessing the future impact of this ASU on its consolidated financial statements.

Other recent accounting pronouncements issued by the FASB, including its Emerging Issues Task Force, and the American Institute of Certified Public Accountants did not or are not believed by management to have a material impact on the Company's financial statement presentation or disclosures.

(3) Fair Value Measurement

The fair value of financial instruments reflects the amounts that the Company estimates to receive in connection with the sale of an asset or paid in connection with the transfer of a liability in an orderly transaction between market participants at the measurement date (exit price). The Company follows a fair value hierarchy that prioritizes the use of inputs used in valuation techniques into the following three levels:

Level 1 – quoted prices in active markets for identical assets and liabilities

Level 2 – observable inputs other than quoted prices in active markets for identical assets and liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities

Level 3 – unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The following table sets forth the fair value of our financial assets measured on a recurring basis as of March 31, 2017 and indicates the fair value hierarchy utilized to determine such fair value (in thousands).

Assets:

Cash and cash equivalents \$19,032 \$ — \$ — \$19,032

The following table sets forth the fair value of our financial assets measured on a recurring basis as of December 31, 2016 and indicates the fair value hierarchy utilized to determine such fair value (in thousands).

Level 1
$$\frac{\text{Level}}{2} \frac{\text{Level}}{3}$$
 Total

Assets:

Cash and cash equivalents \$21,352 \$ — \$ — \$21,352

As discussed in Note 7, in 2015, the Company issued warrants to purchase preferred stock in connection with the note agreements to various shareholders as described below. The warrant liabilities were recorded at the fair value on the date of issuance and were remeasured each subsequent balance sheet date and as of the warrant exercise date, with fair value changes recognized as income (decrease in fair value) or expense (increase in fair value) in other income (expense) in the consolidated statements of operations. No warrants are outstanding as of March 31, 2017.

In May 2015, the Company entered into note agreements with various stockholders of the Company and other lenders for a total of \$7.2 million, or the 2015 Notes. As discussed more fully in Note 7, the 2015 Notes include embedded derivative features that were determined to be a compound embedded derivative requiring bifurcation and separate accounting at estimated fair value. The Company estimated the fair value of the compound embedded derivative utilizing a Monte Carlo simulation model from inception through June 30, 2016. The inputs used to determine the estimated fair value of the compound embedded derivative instrument include the probability of an underlying event triggering the redemption event and its timing prior to the maturity date of the 2015 Notes. The fair value measurement is based upon significant inputs not observable in the market. These assumptions are inherently subjective and involve significant management judgment. Upon the completion of the Merger, the valuation of the compound embedded derivative was determined based on the settlement value of the common stock exchanged for the notes on October 24, 2016. No notes are outstanding as of March 31, 2017.

(4) Inventories

Inventories are stated at the lower of cost or net realizable value using the average cost method. Inventories consist of the following (in thousands):

	March 31,	De 31		er
	2017	20	16	
Raw materials	\$ 53	\$	59	
Work in process	48			
Finished goods	43		76	
Total	\$ 144	\$	135	

Write downs for excess or expired inventory are based on management's estimates of forecasted usage of inventories and are included in cost of goods sold. A significant change in the timing or level of demand for certain products as compared to forecasted amounts may result in recording additional write downs for excess or expired inventory in the future. Charges to cost of goods sold for inventory write-downs, scrap, shrinkage and expired inventories totaled approximately \$9,000 and \$18,000 for the three months ended March 31, 2017 and 2016, respectively.

(5) Property and Equipment, Net

Property and equipment, net consist of the following (in thousands):

Edgar Filing: BioCardia, Inc. - Form 10-Q

	March Decei			ember	
	2017	20	16		
Computer equipment and software	\$ 172	\$	143		
Laboratory and manufacturing equipment	415		366		
Furniture and fixtures	48		48		
Leasehold improvements	326		325		
Property and equipment, gross	961		882		
Less accumulated depreciation	(784)		(771)	
Property and equipment, net	\$ 177	\$	111		

Depreciation expense totaled approximately \$13,000 and \$10,000 for the three months ended March 31,2017 and 2016, respectively.

(6) Accrued Liabilities

Accrued liabilities consisted of the following (in thousands):

	March 31,	December 31,
	2017	2016
Accrued expenses	\$ 572	\$ 478
Accrued clinical trial costs	86	_
Customer deposits	62	66
Total	\$ 720	\$ 544

(7) Convertible Notes

In May 2015, BioCardia Lifesciences entered into note agreements with various stockholders of BioCardia Lifesciences and other lenders for a total of \$7.2 million, or the 2015 Notes. The 2015 Notes accrued 8% annual simple interest, matured 18 months from the issue date and were callable after the maturity date by written demand of a majority of the holders of the outstanding note principle. If BioCardia Lifesciences closed an effective registration statement filed under the Securities Act of 1933, as amended, covering the sale of BioCardia Lifesciences common stock (an IPO) prior to maturity, the outstanding principle and accrued interest would have automatically converted into shares of common stock at 80% of the price of the shares of common stock purchased in the IPO. If at any time prior to the maturity date, the Company closed a private placement of the Company's preferred stock for aggregate sales proceeds of at least \$5.0 million excluding note conversions, at the note holder's option, or the Optional Conversion Right, the outstanding principle and interest may have been converted into shares of the preferred stock at a conversion price equal to 80% of the price of the preferred shares sold in such financing, plus preferred stock warrant coverage equal to 8% with an exercise price equal to the purchase price of the preferred stock sold in such financing. If the notes were held to maturity, subject to BioCardia Lifesciences authorizing sufficient shares of a new class of preferred stock, or the Maturity Date Preferred Stock, the holder would have had the option to convert the outstanding principle and interest to this new class of Maturity Date Preferred Stock at an exercise price of \$0.07 per share, plus 8% warrant coverage.

In August 2016, the Company and the holders of the 2015 Notes amended the 2015 Notes, pursuant to which the outstanding principal amount and all accrued interest through August 31, 2016 automatically converted into shares of BioCardia Lifesciences common stock at 80% of the conversion price of the convertible notes issued in October 2016. In addition, the amendment eliminated the payment of interest for the period subsequent to August 31, 2016, and through the date of the closing of the Merger. Upon the completion of the Merger, the 2015 Notes and accrued interest converted into shares of BioCardia Lifesciences common stock, which were then exchanged at the Exchange Ratio into 67,443,988 shares of the Company's common stock.

The 2015 Notes had redemption features that were determined to be a compound embedded derivative requiring bifurcation and separate accounting at estimated fair value. The changes in the estimated value are reflected in the change in fair value of convertible shareholder notes derivative liability in the consolidated statements of operations. We estimated the fair value of the compound embedded derivative utilizing a Monte Carlo simulation model. The inputs used to determine the estimated fair value of the compound embedded derivative instrument include the probability of an underlying event triggering the redemption event and its timing prior to the maturity date of the 2015 Notes. The fair value measurement is based upon significant inputs not observable in the market. These assumptions are inherently subjective and involve significant management judgment. Immediately prior to the closing of the Merger, the compound embedded derivative was remeasured based on the settlement value of the common stock exchanged for the notes, and we reclassified the balance of the convertible shareholder notes derivative liability to additional paid-in capital.

The Company recognized interest expense, including amortization of the debt discount of approximately \$0 and \$550,000 for the three months ended March 31, 2017 and 2016, respectively.

(8) Share-Based Compensation

BioCardia Lifesciences adopted, and the BioCardia Lifesciences shareholders approved, the 2002 Stock Plan in 2002, or the 2002 Plan, and the Company assumed the 2002 Plan in the Merger. We will not grant any additional awards under the 2002 Plan following the Merger. In 2016, BioCardia Lifesciences adopted, and the BioCardia Lifesciences shareholders approved, the 2016 Equity Incentive Plan, or the 2016 Plan, and the Company assumed the 2016 Plan in the Merger. We will grant awards, including incentive stock options and nonstatutory stock options, under the 2016 Plan following the Merger.

Stock compensation attributable to manufacturing operations was not significant and was expensed directly to cost of goods sold in the condensed consolidated statements of operations. Share-based compensation expense for the three months ended March 31, 2017 and 2016 was recorded as follows (in thousands):

	Three Mont ended Marc	hs I
	2017	2016
Cost of goods sold	\$41	\$ 1
Research and development	172	1
Selling, general and administrative	409	28
Share-based compensation expense	\$622	\$ 30

The following table summarizes the activity of stock options and related information:

Options outstanding

	Number of shares		Weighted average exercise price	
Balance, December 31, 2016	41,903,728		\$	0.15
Stock options granted	4,413,930			0.90
Stock options exercised	(107,153)		0.20
Stock options cancelled	(407,382)		0.04
Balance, March 31, 2017	45,803,123		\$	0.22

The weighted average grant-date fair value of options granted during the three months ended March 31, 2017 was \$0.72 per share.

Employee Share-Based Compensation (Stock Options)

During the three months ended March 31, 2017, the Company granted stock options to certain non-employee directors and employees to purchase 2,466,147 shares of common stock. The fair value of each option grant is estimated on the

date of the grant using the BSM option pricing model with the weighted average assumptions in the table below.

Risk-free interest rate 2.05-2.07%Volatility 88-89%Dividend yield None Expected terms (in years) 6.00-6.25

Unrecognized share-based compensation for employee options granted through March 31, 2017 is approximately \$4.1 million to be recognized over a remaining weighted average service period of 3.4 years.

Employee Share-Based Compensation (RSUs)

During the three months ended March 31, 2017, the Company granted to certain non-employee directors 736,000 restricted stock units, or RSUs. The fair value of each RSU is estimated on the closing market price on the grant date.

The following summarizes the activity of non-vested RSUs:

		Weighted average	
		grant date	
	Number of	fair value	
	shares	per share	
Non-vested units, December 31, 2016	_		
RSUs granted	736,000	\$ 0.92	
RSUs vested			
RSUs forfeited			
Non-vested units, March 31, 2017	736,000	\$ 0.92	

Unrecognized share-based compensation for employee RSUs granted through March 31, 2017 is approximately \$630,000 to be recognized over a remaining weighted average service period of 2.8 years.

Nonemployee Share-Based Compensation

During the three months ended March 31, 2017, the Company granted options to purchase 1,947,783 shares of common stock to consultants. These options were granted in exchange for consulting services to be rendered and vest over the term specified in the grant, which correlates to the period the services are rendered. The Company recorded approximately \$233,000 and \$1,000 for the three months ended March 31, 2017 and 2016, respectively, as nonemployee share-based compensation expense.

The Company accounts for share-based compensation arrangements with nonemployees, using the BSM option pricing model, based on the fair value as these instruments vest. Accordingly, at each reporting date, the Company revalues the unearned portion of the share-based compensation and the resulting change in fair value is recognized in the consolidated statements of operations over the period the related services are rendered. The following assumptions were used to value the awards as of March 31, 2017:

Risk-free interest rate 2.37 – 2.40%

Volatility 89%
Dividend yield None
Expected terms (in years) 9.4 - 9.8%

(9) Net Loss per Share

Basic net loss per share is computed by dividing net loss by the weighted-average number of common shares outstanding for the period. Since we were in a loss position for all periods presented, diluted net loss per share is the same as basic net loss per share for all periods as the inclusion of all potential common shares outstanding would have been anti-dilutive.

The following outstanding common stock equivalents were excluded from the computation of diluted net loss per share for the periods presented because including them would have been antidilutive:

March 31, 2017 2016

Stock options to purchase common stock Unvested restricted stock units 45,803,123 12,595,578

736,000
