UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES AND EXCHANGE ACT
OF 1934

For the fiscal year ended December 31, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES AND EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission File No.: 001-15465

Intellicheck Mobilisa, Inc.

(Exact name of Registrant as specified in its charter)

Edgar Filing: Intellicheck Mobilisa, Inc. - Form 10-K

Delaware 11-3234779
(State or Other Jurisdiction of (I.R.S. Employer
Incorporation or Organization) Identification No.)

100 Jericho Quadrangle, Suite 202, Jericho, NY 11753
(Address of Principal Executive Offices) (Zip Code)

Registrant's telephone number, including area code: (516) 992-1900

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, \$0.001 par value NYSE MKT
(Title of Class) (Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: Intellicheck Mobilisa, Inc. - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [X]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company [X]
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No [X]

State the aggregate market value of the voting and non-voting stock held by non-affiliates of the Issuer: \$13,574,041 (based upon the closing price of Issuer's Common Stock, \$0.001 par value, as of the last business day of the Issuer's most recently completed second fiscal quarter (June 30, 2015)).

Indicate the number of shares outstanding of each of the Registrant's classes of common stock, as of the latest practicable date.

Common Stock, \$0.001 Par Value	8,964,142
(Title of Class)	(No. of Shares Outstanding at March 25, 2016)

DOCUMENTS INCORPORATED BY REFERENCE: Proxy for Annual Meeting of Stockholders May 4, 2016

PART I

Item 1. Business

OVERVIEW

We were originally incorporated in the state of New York in 1994 as Intelli-Check, Inc. In August 1999, we reincorporated in Delaware. On March 14, 2008, our corporation was renamed Intelli-Check - Mobilisa, Inc. after the consummation of the merger with Mobilisa, Inc. (“Mobilisa”) (references to “Intelli-Check” in this annual report refer to the Company prior to the merger with Mobilisa). At the closing of the merger, our headquarters were moved to Mobilisa’s offices in Port Townsend, Washington. On October 27, 2009, we made a further change in our name to Intellicheck Mobilisa, Inc. (“Intellicheck Mobilisa,” “we,” “our,” “us,” or “the Company”). On August 31, 2009, the Company acquired 100% of the common stock of Positive Access Corporation (“Positive Access”), a developer of driver license reading technology. The acquisition of Positive Access expanded the Company’s technology portfolio and related product offerings and allowed the Company to reach a larger number of customers through Positive Access’s extensive distribution network. On October 27, 2015 we announced that our headquarters have been relocated to its Jericho, New York facility.

We are a technology company engaged in developing, integrating and marketing identity systems for various applications including mobile and handheld access control and security systems for the government, military and commercial markets. Our products include the Defense ID[®] and Fugitive Finder systems, advanced ID card access control products currently protecting military and federal locations, and ID-Check, a patented technology that instantly reads, analyzes, and verifies encoded data in magnetic stripes and barcodes on government-issue IDs from U.S. and Canadian jurisdictions designed to improve the customer experience for the financial, hospitality and retail sectors.

We plan to expand our business in the near term by pursuing a research and development strategy designed to move our technologies into new product markets that are expected to benefit from enhanced safety, regulatory compliance and fraud prevention. For example, we anticipate extending our technologies into the healthcare and first responder spaces and to online applications to provide enhanced safety, regulatory compliance and fraud prevention for the billions of transactions that occur there each day.

As a complement to these new offerings, we are also developing a data analytics platform to analyze the data we capture and to provide meaningful data, trend and predictive analysis to a variety of customers in the commercial and government spaces.

We sold our wireless enterprise assets on August 31, 2015 in order to focus the company resources on our core identity authentication business.

We plan to leverage our IP in the new markets we are targeting to strengthen our competitive position.

Our primary businesses include Identity Systems products, which include commercial applications of identity card reading and verification and government sales of defense security and identity card applications.

Our technologies address problems such as:

Commercial Fraud and Risk Management – which may lead to economic losses to merchants from check cashing, debit and credit card, as well as other types of fraud such as identity theft that principally use fraudulent identification cards as proof of identity;

Instant Credit Card Approval – retail stores use our technology to scan a driver license at a kiosk or at the Point Of Sale (POS) and send the information to a credit card underwriter to get instant approval for a loyalty-branded credit card. This technique protects consumer data and is significantly more likely to result in a completed transaction compared to in-store personnel asking customers to fill out a paper form;

Unauthorized Access – our systems and software are designed to increase security and deter terrorism at airports, shipping ports, rail and bus terminals, military installations, high profile buildings and infrastructure where security is a concern;

Inefficiencies Associated With Manual Data Entry – by reading encoded data contained in the bar code and magnetic stripe of an identification card with a quick swipe or scan of the card, where permitted by law, customers are capable of accurately and instantaneously inputting information into forms, applications and the like without the errors associated with manual data entry.

IDENTITY CARD READING AND VERIFICATION SECTOR

Background on Identification Documentation

Driver license

The driver license is the most widely used form of government issued photo identification in North America. The Real ID Act, which became federal law in May 2005, recognizes that the driver license is also a quasi-identification card. In addition to its primary function, the driver license is used to verify identity for social services, firearm sales, check cashing, credit card issuance and use and other applications. Our technology can read the electronically stored information on all currently issued driver licenses (even those that do not comply with the AAMVA/ANSI/ISO standards). Today, all 50 states, the District of Columbia and all 13 Canadian provinces/territories electronically store information on their driver license.

Non-driver identification card

Each U.S. and Canadian Jurisdiction also provides a non-driver identification card as an alternative form of identification for those unable to acquire a driver license. These identification cards are issued with most of the same data found on a driver license. Military documents also provide a means of identification and contain encoded data as well. Since driver licenses are the most widely used form of legally acceptable government documentation, we refer to all these identification documents as “driver licenses.” Our IDVCheck software is capable of performing its function on all these forms of identification.

Current Challenges Associated with Verifying Identification Documents

The high-tech revolution has created a major problem for those who rely on identification documents. In an age where scanners, computers and color printers are commonplace, fake IDs of the highest quality are easily obtainable from a number of locations including college campuses and from multiple sites on the Internet. These fakes appear so real,

even law enforcement agencies have encountered difficulty distinguishing them from legally issued documents. Additionally, these high-tech devices have the ability to easily alter properly issued ID. Therefore, anyone can gain access to a false identity that gives them the ability, in a commercial transaction, to present fake and stolen credit cards or checks that are supported by false identification. Additionally, starting with only a fraudulent driver license, an individual may be able to create multiple identities, commit fraud, buy age restricted products such as alcohol and tobacco while underage, evade law enforcement and engage in other criminal activities, such as:

- | | |
|---|---|
| committing identity theft; | gaining entrance to high profile buildings and sensitive infrastructures, |
| improperly boarding airplanes; | engaging in medical fraud; |
| committing credit card, debit card and check cashing fraud; | purchasing age restricted products such as alcohol and tobacco while under age; and |
| illegally purchasing firearms; | obtaining welfare or other government benefits. |
| unlawfully committing pharmacy fraud, including false narcotic prescriptions; | |
| committing refund fraud; | |

Given the ease with which identification can be falsified, simply looking at a driver license may not be sufficient to verify age or identity and determine whether or not it is fraudulent. Since merchants are facing significant economic losses due to these frauds, we believe that a document verification system which can accurately read the electronically stored information is needed. We possess patented technology that provides an analysis of the data contained on the encoded formats of these identification documents by reading and analyzing the encoded format on the magnetic stripe or bar code on the driver license and comparing it against known standards. We believe that we are the only company able to do this for all U.S. jurisdictions and that no other company could provide a similar service without infringing on our patents.

OUR PRODUCTS AND SERVICES

Our Products and Services are sold as Software as a Service (SaaS) where customers pay for cloud based service. Our Identity Systems are marketed to the Commercial and Government identification sectors.

Identity Systems Products and Services

Our Identity Systems are marketed to the Commercial and Government identification sectors.

Commercial Identification

ID√Chec® Family — Solutions and Benefits

Our patented ID√Chec® technology is our advanced document verification software. ID√Chec® is contained in our software products and is capable of reading and verifying in one swipe or scan the encoded format contained on U.S. and Canadian driver licenses, state issued non-driver identification cards, and military IDs. Our technology has the ability to verify the encoded formats on all currently encoded documents, even those that do not comply with the standards of the American Association of Motor Vehicle Administrators ('AAMVA'), the American National Standards Institute ('ANSI') and the International Standards Organization ('ISO').

We believe that ID√Chec® and our family of software solutions contain the most advanced, reliable and effective technology, providing users with an easy, reliable, and cost-effective method of document and age verification. We have received/acquired encoding formats from multiple sources. This information, combined with our patented technology, enables all of our ID√Chec® software products to read, decode, process and verify the encoded formats on driver licenses. As jurisdictions change their documents and guidelines, we believe our software can be adapted to these changes.

The ID√Chec® technology is embedded in many of our product lines including Retail ID™, Law ID™, Defense ID®, Age ID™, Guest ID™, Access ID™, and TWIC ID™ some of which are discussed below.

ID√Check® software does not require a connection to a central database to operate, thus negating privacy concerns. Many of our products have the ability to operate add-on peripherals such as printers, fingerprint readers and other devices.

The ID√Check® process is quick, simple and easy to use. After matching the driver license photograph to the person presenting the document for identification, the user simply scans or swipes the driver license through a data capture device. The software quickly determines if:

the format of the document is valid;

the document has been altered or is fake, by displaying the parsed, encoded data for comparison with the printed information;

the document has expired; and

the encoded data contains a date of birth equal to or greater than the legal age to purchase age restricted products, such as alcohol and tobacco.

Then, the ID√Check® software applications can:

respond to the user by displaying the format verification result and the parsed information;

save information that is permissible by law to memory; and

print a record of the transaction including the verification results if a printer is part of the hardware configuration.

ID√Chec® SDK

Our software product, ID√Chec® SDK, is designed for software developers that wish to incorporate our proprietary ID√Chec® technology into their applications. We currently have multiple license agreements with third parties for integration and sub-licensing of our software applications into their core applications. The SDK is available for multiple platforms such as Microsoft Windows, Windows Mobile, AIX, certain versions of Linux and is also offered as a Software as a Service (SaaS) product that provides a platform independent & centralized update solution for quicker and easier integration. It can easily be ported to other platforms as the need arises. New integrations are being sold as hosted cloud based Software as a Service (SaaS) products and the customer purchases annual (or longer) subscriptions for use of the software.

Retail ID™

Our Retail ID™ application is a proven identity authentication solution that can instantly and accurately authenticate identification documents such as a driver license. This solution is designed to deliver better service, increase loyalty and credit card programs and reduce fraud. Retail ID reduces liability risks and ensures compliance by checking all retrieved data against each state's privacy laws and regulatory requirements.

ID√Chec® POS

ID√Chec® POS is a software application that runs on multiple VeriFone devices, such as the Omni 37xx series. Our software uses both the onboard magnetic stripe reader and an optional external 2-D bar code reader that plugs into an open port on the back of the unit. The terminal has an integrated, high-speed thermal printer. The VeriFone devices are multi-application terminals that allow the ID√Chec® software to run side by side with credit card processing software as well as other value added software applications certified by VeriFone. We have been designated as a VeriFone value added partner.

ID√Chec® BHO

This software product, formerly called the Web Form Filler product, is a Browser Helper Object ("BHO") for the Microsoft Browser. The BHO allows our customers to seamlessly integrate our core ID√Chec® technology into their web based applications. The BHO can be programmed through a series of drop down menus to populate driver license data in the fields of specific web pages based on web page URLs and web page field names. The technology also provides the ability to check the encoded formats of ID documents.

Guest ID™

Guest ID™ is a software application that speeds up check-in and ID verification at hotels and motels. This product enhances user productivity by automating data entry thus improving accuracy. Guest ID™ speeds up the hotel check-in process and is incorporated into legacy Property Management Systems.

AssureScan™

AssureScan™ is an application that assists pharmacies with ID verification and tracking drug related purchases. This product focuses on capturing data from drivers' licenses and tracking the sale of controlled medicines such as pseudoephedrine. Many states are now monitoring the sale of controlled medicines and this product tracks those sales.

ID√Chec® PC

ID√Chec® PC is a standalone software solution that is designed to provide the features of ID√Chec® for Windows based platforms. It allows the user to instantly view data from government issued IDs such as driver licenses and contains features such as recurring entry and age verification.

Age ID™

Age ID™ is the designation for multiple hand held devices that we offer our customers. The form-factor is a small, lightweight mobile computer with a durable housing design that has 2-D bar code and magnetic stripe reading capabilities. By allowing the user to move between locations, Age ID™ products provide the ability to check the encoded format of ID documents at multiple entry points. It additionally has the capability of providing a yes/no response when used for age verification purposes.

State Aware Software

State Aware Software provides or restricts information that is electronically scanned from an ID based on the electronic reading laws according to the state in which the ID is scanned. For example, scanning an ID in New Hampshire for law enforcement purposes is allowed, whereas electronically scanning an ID for a mailing list is not allowed. With all the various uses of scanning and verifying an ID, it is important for responsible users to be aware of the different state laws. State Aware Software incorporates each state's requirements around electronic capture of ID barcode data directly into hosted ID Check software.

Data Collection Devices

Our software products are designed for use with multiple data collection devices, which are commercially available in various compact forms and may contain either one or both of 2-D bar code and magnetic stripe readers. These devices enable our software applications to be used on a variety of commercially available data processing devices, including credit card terminals, PDAs, tablets, laptops, desktops and point-of-sale terminals. Many of these devices contain an electronic serial number (ESN) to prevent unauthorized use of our software.

Instant Credit Application Kiosk Software Applications

These are custom software applications that Intellicheck Mobilisa has developed for a variety of major financial service companies and retail stores. The software installed on multiple kiosk devices provides the customers of the major financial service companies and retail stores with the ability to perform in-store instant credit approval on these devices. The hardware platforms, on which the software applications run, range from stationary devices to handhelds to tablet PCs. The process involves the swiping or scanning of the driver license to verify the encoded format and after verification, the information parsed from the encoded data is populated into the proper fields on the application displayed on the kiosk. The applicant then completes the application by entering the remaining required information

that is not encoded on the driver license, such as social security and telephone numbers. The software application then sends the data to the financial service company's backend "decisioning" tool for credit approval. If approved, the applicant is granted instant credit which can then be used to make purchases.

Upgrade Capability

Our IDvCheck® Products and related databases are constantly updated to stay current with identification formats and new forms ID.

Government Identification

Defense ID® System

Our Defense ID® System offers law enforcement personnel and military security officers additional information for protecting their facilities. The Defense ID System uses rugged, handheld, mobile devices and desktop visitor/vendor approval workstations to read barcodes, magnetic stripes, RFID (radio frequency identification) and OCR (optical character recognition) codes printed on current forms of identification cards. By scanning and comparing the information contained on the ID card to over 100 databases, Defense ID® can immediately determine if the card has been reported lost or stolen, the individual's identity information matches watch lists or law enforcement databases, or if they are on an authorized roster of previously-cleared personnel. In 2008, our Defense ID® System received a U.S. Navy-wide certification and accreditation referred to as an Authority to Operate ("ATO"), and in 2009, our Defense ID System received U.S. Army-wide, U.S. Marine Corps-wide and U.S. Air Force-wide ATOs. We believe these ATOs will facilitate further deployment of the Defense ID® System at military bases and facilities.

Law ID™

A mobile app for bona fide law enforcement officers that performs real time queries against State DMV, State Criminal Justice Databases and FBI NCIC (National Crime Information Center) records. Every day officers turn their backs on potentially dangerous persons. Now the Law Enforcement Officer (“LEO”) can instantly have DOL/DMV, State and Federal search results instantly while maintaining subject visibility. Without the need to return to a vehicle to enter driver license data or to contact dispatch by radio, the app uses the Smart Phone camera to extract the 2D barcode information from driver licenses and other identification documents, instantly returning to the officer query results from DOL/DMV, State and Federal criminal justice databases. These results include DOL/DMV photos, vehicle/weapon registration information and a wealth of additional information that may be critical to officer safety.

TWIC ID™

Provides, ports and facilities an innovative, integrated, efficient way to validate ID credentials of individuals requesting entry to secure areas. Our TWIC reading software and hardware meets all TSA requirements for portable readers and is listed on the TSA’s QTL (Qualified Technology List). The TWIC ID Reader is proving to be an instrumental component to port security as we continue to help many U.S. ports of all sizes in further protecting their facilities.

Visitor Center (IM 3000)

The Visitor Center is a component of our Defense ID® system and makes it faster and easier to process visitors and vendors. Using the visitor center system it pre-populates fields by scanning the government-issued ID, performs a real time background check utilizing over 100 databases to verify the individual is not on a wanted list and also if the individual has been pre-approved to access the facility or building. The Visitor Center can then take photos and prints a visit pass or new local ID card, all in a matter of seconds.

Upgrade Capability

Like our ID√Check® products, our Defense ID® products are constantly updated to stay current with identification formats and new forms of ID. In addition, we continuously update the databases related to lost or stolen cards, watch lists and law enforcement database updates, and authorized rosters of cleared personnel. Our Defense ID® Systems are maintained via annual subscriptions that are purchased by our customers.

STRATEGY

Our objective is to be a leading security company providing world class solutions in the identity sector. These solutions include our commercial identity systems focusing on work-flow, productivity enhancement, fraud protection and risk management segments; our government identity systems focusing on access control, vendor validation, and suspect identification. Key elements of our strategy are as follows:

Commercial Systems

Productivity Enhancement. We market our technology as a key productivity enhancement tool. Our patented ID√Chec® software can add functionality to virtually any given software application to automatically populate fields within a given form, when a government-issued photo ID is presented. Our ability to correctly read and authenticate all U.S. jurisdictions, coupled with our patented technology, is a key differentiator from our competitors. The automation that results from the intelligence added to the form dramatically increases throughput and data integrity, and it significantly enhances the customer's experience.

Develop Additional Strategic Alliances with Providers of Security Solutions. We have entered into strategic alliances to utilize our systems and software as the proposed or potential enrollment application for their technologies and to jointly market these security applications with multiple biometric companies: Lenel, AMAG Technology, Inc., in the defense industry; Zebra Technologies hardware manufacturers; and MorphoTrust USA now part of Safran, producers of driver licenses for approximately 85% of the jurisdictions in North America. We are an associate member of AAMVA and a member of AAMVA's Industry Advisory Board. We believe these relationships will broaden our marketing reach through their sales efforts and we intend to develop additional strategic alliances with additional providers of security solutions.

Strengthen Sales and Marketing Efforts. We intend to capitalize on the growth in demand for document verification and productivity enhancement by continuing to market and support our systems and software. Our sales and marketing departments are organized by target sector rather than geographic area to provide focus and create experts in each area. Our recent focus has been on Software as a Service (SaaS) license arrangements in the financial services, retail, and hospitality services industries.

Enter into Additional Licensing Agreements. We intend to continue to license our software for use with a customer's system. We are currently licensing our ID√Chec® SDK software product for Windows, Windows CE, Windows Mobile and other operating system platforms and intend to similarly continue to license our ID√Chec® PC, and ID√Chec® PDA software solutions. Our software is intended to be used with a compatible hardware device. We have entered into multiple licensing agreements to date.

Protect Intellectual Property. We intend to strongly protect our intellectual property portfolio in order to preserve value and obtain favorable settlements where warranted.

Government Identity Systems

Product Enhancement. Due to the success of Defense ID® in the military and government industry sectors, we have enhanced our product line to support other entities such as law enforcement, port security and commercial installations. We continue our ongoing efforts to research and implement the use of new identification cards, additional databases and upgraded equipment form factors in order to increase the efficiency and performance of the system.

TWIC Program. The TWIC program continues to undergo testing for final rules regarding the reader technology. We were on the first list of ICE readers and will continue to provide our software on additional hardware platforms to address the unique needs of each port. We have combined our Defense ID® and TWIC reader applications to provide customers with the benefits of each product in a single device and are the first company to have readers listed on the

TSA's QTL (Qualified Technology List).

Strengthen Sales and Marketing Efforts. As the need for access control systems continues to grow, our experienced sales and marketing departments are adjusting to target new sectors. Sales and marketing materials are specially designed to clearly outline the capabilities of the system and how it is valuable to each of these specific sectors. We have sales staff and office locations on the East and West Coasts, which allows a quick response to questions and personalized assistance for each customer based on location.

Additional Access to Multiple Databases. We continue to increase the data source information accessed through our Defense ID[®] system. This is achieved by increasing the capabilities of our internally-developed scraping programs for publicly-available information as well as by negotiating additional data source agreements with various law enforcement and government agencies. In addition to these general databases, we can customize databases for each individual customer based on information provided by the customer.

Our Revenue Sources

We derive our revenue from the following sources:

Sales of our systems by both our own direct sales force and marketing partners;

Per transaction or subscription fees (SaaS) from the licensed use of our technology;

Royalties and licensing fees from licensing our patented technology to third parties;

Revenue sharing and marketing arrangements through strategic alliances and partnerships;

Sale of software upgrades and extended maintenance programs; and

Government grants for research and development projects.

Our Target Industry Sectors

Commercial Identity Systems

The use of false identification cards, primarily driver licenses and non-driver identification cards, to engage in commercial fraud, to gain access to unauthorized areas and to gain entry to critical infrastructure is all too common. Given the ease with which identification can be falsified, we believe that simply looking at a driver license is not sufficient to verify identity and determine whether or not such an identification card is fraudulent. Since merchants are facing significant economic losses due to these frauds, we believe that what they need is a document verification system that can accurately read the electronically stored information. We target the industry sectors that would most benefit from our systems and software.

We also market our products to opportunities where our ID√Chec® technology can be used to enhance productivity. We have made significant progress in the sectors for the retail issuance of instant credit. We believe there are financial benefits and compelling business models for customers in this sector to utilize our technology.

Productivity Enhancement

Mass merchandisers and retailers	Auto dealerships and rental car agencies
Banks and other financial institutions	Casinos for enrollment of guests
Credit unions	Hospital patient admissions
Credit card issuers	Lodging Industry
Check cashing services	Airlines

Commercial fraud protection

Mass merchandisers and retailers	Auto dealerships and rental car agencies
Banks and other financial institutions	Casino cage operations
Credit unions	Hospitals, medical facilities and health plans
Credit card issuers	Lodging Industry
Check cashing services	Pharmacies

Access control

Airports and airlines	Prisons
Departments of Motor Vehicles	Law enforcement agencies
Notable buildings	Military establishments
Court houses	College campuses
Nuclear facilities	Department of Homeland Security
Oil refineries and storage facilities	Bus, rail and port facilities

Age verification

Bars and night clubs	Stadiums and arenas
Convenience stores	Casinos and gaming establishments
Grocery chains	Sellers of sexually explicit material
Restaurants	Firearm dealers

Government Identity Systems

Our Defense ID[®] system is tailored to locations that validate identification cards as a means of access. Historically, the military sector has been the primary focus, followed closely by Sea Ports, Oil Refineries and the law enforcement sector. Military bases, for example, are an ideal location for the use of the Defense ID[®] system because individual ID cards are checked prior to allowing base access and, in most cases, bases issue visitor/vendor passes to individuals needing access that do not possess a military ID.

Because Defense ID® is customizable, it can be used in many different environments. The information provided via instant access to multiple law enforcement databases proves invaluable to gate officers and law enforcement personnel ensuring the security of a facility. Current targets include:

Military

Army	Navy
Air Force	Marines
Coast Guard	Military Academies
Military and Veterans Hospitals	Oil Refineries
Airports and Seaports	

Law Enforcement/Government

FBI	Drug Enforcement Administration
State & Local Police	Local Sheriffs
Bureau of Alcohol, Tobacco, Firearms, and Explosives	Intelligence Agencies
Customs	Department of Transportation
Department of Homeland Security	Border Patrol

REPRESENTATIVE CUSTOMERS

Commercial Identity Systems

We have generated revenues from our customers from the sale of systems, licensing of software and sale of software upgrades. The following representative customers have used or are using our systems and software for commercial fraud protection and productivity enhancement:

Fidelity Information Services	Foxwoods Resorts and Casino
MGM Grand	Mohegan Sun Resort Casino
Caesar's Palace	Barclaycard USA
Enterprise	JPMorgan Chase
Toys R Us	LL Bean
Alliance Data	Synchrony Financial

Rooms to Go	AT&T
Walmart	Winn Dixie
Hertz	Verizon

The following representative customers and programs have used or are using our systems and software for access control:

John F. Kennedy International Airport in New York	Delaware Department of Motor Vehicles
O'Hare International Airport in Chicago	Port of Houston
Reagan National Airport in Washington, DC	Port of New Orleans
New York Stock Exchange	New Hampshire Dept. of Motor Vehicles
Fort Sam Houston	Port Authority of New York and New Jersey
Fort Hood	Port of Hawaii
Force Protection Industries	United States Supreme Court
New York Department of Motor Vehicles	Registered Traveler Program
Vermont Department of Motor Vehicles	Delaware Department of Motor Vehicles

The following representative customers are using or have used our systems and software for age verification:

Idaho State Liquor Dispensary Drake Petroleum
Sunoco Houston's Restaurants
Exxon/Mobil franchisees

Government Identity Systems

We have generated revenue from our customers from the sale of systems, licensing of software and sale of extended service agreements. The following representative customers have used or are using our systems and software for security and identification purposes.

The United States Air Force Academy	Fort Richardson
Fort Wainwright	Bolling AFB
Elmendorf Air Force Base ("AFB")	Fort Polk
Andrews AFB	Fort Dix
Fort Meade	Yuma Marine Corps Base
Fort Belvoir	Walter Reed Army Hospital
USMC Parris Island	McChord AFB
The U.S. Military Academy at West Point	Claremont County Sheriff Department
Bangor Naval Submarine Base	Fort Sill
Fort Jackson	29 Palms
Fort Leonard Wood	Camp Atterbury
Fort Benning	Fort Stewart

MARKETING AND DISTRIBUTION

Commercial Identity Systems

Our objective is to become the leading developer and distributor of document and age verification products. To date, our marketing efforts have been through direct sales by our sales and marketing personnel, through resellers and license agreements. We are marketing our products through direct marketing approaches such as web marketing, a small number of select trade shows and well known public interest and trade associations.

We generate revenues from the licensing of our software and the selling of bundled solutions that contain hardware and software. Depending on the specific needs of our clients, we tailor the right solution for them. Our bundled solutions are sold as a Software as a Service (SaaS).

Our ID√Chec® software is available to customers via the cloud (SaaS) and available for Microsoft Windows and Windows Mobile platforms in addition to devices such as credit card terminals and other operating systems such as Linux. We are marketing our ID√Chec® technology to the government, airlines, airports, high profile buildings or infrastructure, mass merchandisers, grocery, convenience and pharmacy chains, casinos and banks.

We have developed a comprehensive marketing plan to build customer awareness and develop brand recognition in our target industry sectors. We promote the advantages and ease of use of our products through:

Endorsements by nationally known public interest groups and trade associations;

Web seminars, as well as our own website; and

Trade publications;

Various conventions and industry specific seminars.

Trade shows;

We intend to continue to develop and market other related software applications.

Government Identity Solutions

We have sector-specific brochures for each product in our product line for both the military, port and law enforcement sectors that the sales force utilizes when demonstrating the Defense ID[®] system to potential customers. These brochures serve as a quick reference guide outlining the capabilities of our technology. Once customers have a clear understanding of our products, they can use these brochures to discuss their individual needs and ordering requirements.

When dealing with military and government entities, we must comply with applicable procurement regulations.

In addition to sole source awards, we also respond to Requests for Proposal (“RFPs”) and Requests for Qualifications (“RFQs”) when our technological capabilities meet that of the desired system. In many cases, we are the only company that is able to meet the requirements in the RFP, which can lead to a quick and easy award.

Also, we have all Defense ID[®] products, as well as individual labor services, listed on GSA Schedule 70. This makes it possible for government entities to make direct purchases of equipment and services for a pre-negotiated price without having to go through the formal RFP/Bid process.

We have offices in New York and Washington State to fully support our current and potential customers. This makes it easy to schedule and complete installations and maintenance in an efficient, time-conscious manner.

MAJOR CUSTOMERS

Although the composition of our largest customers has changed from year to year, a significant portion of our revenues have been attributable to a limited number of major customers. In 2015, our top ten customers accounted for approximately 59% of total revenues. In 2014, our top ten customers accounted for approximately 44% of total revenues. While we believe that one or more major customers could account for a significant portion of our sales for at least the next two years, we anticipate that our customer base will continue to expand and that in the future we will be less dependent on major customers.

REGULATION

The sale and use of the Company's Identity System products are not subject to regulation by government authorities. We believe we are currently in compliance with applicable United States, state and local laws and regulations relating to the protection of the environment.

COMPETITION

Commercial Identity Systems

We compete in an industry that is intensely competitive and rapidly changing. Unless a device can read, decode and analyze all of the information that is legally permitted to be analyzed, which is electronically stored on a driver license, the user may not obtain accurate and reliable confirmation that a driver license is valid and has not been altered or tampered with. We are aware of several companies that are currently offering products that electronically read and calculate age from a driver license. We have tested and compared some of these products to IDVCheck® and believe that our product is superior in quality and functionality. We believe that units unable to read bar codes are at a significant disadvantage because all states and Canadian provinces currently utilize bar codes to encode their driver licenses, as well as all U.S. military IDs and uniformed services cards.

In the government identity sector, there are several companies, including MorphoTrust USA, EID Passport and HID Global that are currently offering products that compete with the Defense ID® system. The U.S. government also has DBIDS and AIE that compete with our products.

We are also aware that Motorola and Honeywell are offering an embedded driver's license reading solution on a tether scanner.

We have experienced and expect to continue to experience increased competition in the document verification sector. If any of our competitors were to become the industry standard or were to enter into or expand relationships with significantly larger companies through mergers, acquisitions or otherwise, our business and operating results could be seriously harmed. In addition, potential competitors could bundle their products or incorporate functionality into existing products in a manner that discourages users from purchasing our products.

MANUFACTURING

We do not manufacture readers or input devices, but use products from several manufacturers. Some of these devices are private labeled and programmed by the supplier to work with our ID√Chec® technology. The majority of our hardware consists of commercial off-the-shelf ("COTS") products. We rely on a small number of suppliers to provide our COTS products.

Our government identity systems products are created with COTS items that we customize with software and specialized configurations. All products are customized, assembled, and tested in-house and then installed and placed by our employees in the field.

RESEARCH AND DEVELOPMENT

Our research and development efforts are mainly concentrated in two areas. The most significant effort is concentrated in the identity sector. We modify existing software applications based on customer's requirements, which are fee based. In addition, we develop new software solutions and make improvements to existing software platforms, which are funded internally. R&D spending during the years ended December 31, 2015 and 2014 was \$2,594,678 and \$1,823,147, respectively.

INTELLECTUAL PROPERTY

We currently hold twenty-two (22) U.S. patents, two (2) Canadian patents and one (1) United Kingdom patent. At present, we have other patent applications pending in the U.S. Patent and Trademark Office as well as internationally.

These patents cover commercially important aspects of our capabilities relating to the authentication and verification of identification documents, and relating to our Defense ID[®] System technology. We will continue to pursue patents for all of our new technologies arising from our research and development efforts.

In January 1999, the U.S. Patent and Trademark Office granted us a patent on our ID√Check[®] software technology. In October 2002, we were granted another patent relating to our document authentication and age verification technology. In January 2009, we were granted another patent that is a continuation of our patents relating to our document authentication and age verification technology. Upon our acquisition of the assets of IDentiScan, we also received equitable ownership and sole ownership rights to its intellectual property, including other patents and patent applications relating to age verification technology.

During 2010, we were granted two additional patents. The first patent was for a software key control for mobile devices. It is used to get a registration key for the parser that is based on the unique internal ID of one mobile device. The Mobile Key Manager communicates with the mobile device, reading its ID, and then requests a registration key specific for that ID from Intellicheck Mobilisa's server. This server maintains a database of all customers using IDecode Mobile Parsers, including the number of licenses they have purchased, the latest software version for which they have paid support, and the registration keys and unique device IDs associated with those licenses. The server generates a new registration key unique to the device ID, and returns it to the Mobile Key Manager to register that device. In this way, the customer can deploy the IDecode Mobile Parser to only one mobile device for each parser purchased.

The second patent was relating to a document comparison system and reinforces the innovative nature of Intellicheck Mobilisa's security solutions involving documents. The technology described in the patent relates to a system and method for comparing information contained in at least two documents. Like information on different documents is compared to determine whether the information is the same on each document. For instance, a name contained on an individual's driver's license is automatically compared with a name contained on the individual's airline boarding pass.

In 2011, we were issued another patent. This patent allows for verifying and authenticating the encoded information on driver licenses of all 50 states and other North American driver licenses, and allows the information to be electronically transferred in a secure environment to a local or remote jurisdiction for age verification, organ donor, or criminal activity checks critical in fighting both crime and terrorism.

In 2012, we were granted a patent relating to a system and method for comparing information contained in at least two documents, but not limited to just a driver license and passport. This patent compares “like information” on different documents to determine whether the information is the same on each document. As an example, a passport is compared to a boarding pass to determine “like information” matches, for instance name and birthdate.

We were also granted a patent related to a system that uses environmental information to determine a level of scrutiny that is to be applied to identification information received at a location where user identification is being checked. Depending on the level of scrutiny that is applied and on generated candidate scores, the system will display a number of potential persons of interest that match the received identification information.

In 2013, we were granted four patents that are continuations of earlier-filed applications we previously filed. One patent is related to a document comparison system that compares information contained in two documents to determine whether the information is substantially identical on each document. An indication is provided as to whether the two documents identify the same entity or do not identify the same entity. The second patent relates to improvements to software key control for mobile devices. The third patent relates to an apparatus for extracting date of birth information from driver’s licenses and displaying a calculated age along with a license background graphic. Finally, the fourth patent is related to a system that uses environmental information to determine a level of scrutiny that is to be applied to identification information received at a location and to display a number of potential persons of interest that match the received identification information based on the applied level of scrutiny.

In 2014, we were granted one patent that was also a continuation of an earlier-filed application. The patent is related to a document comparison system that compares information contained in two documents to determine whether certain information is substantially identical on each document. The system provides a positive or negative indication as to whether portions of the two documents are substantially identical.

In 2015, we acquired an intellectual property portfolio that includes four patents involving technologies for checking the validity of identification documents using a remote database. Certain patents in this portfolio address the use of biometric information and identification credentials as part of the process to control access to a secured area.

We were also granted two patents in 2015. The first patent is related to a system and method for comparing documents. The second patent is identity matching in response to threat levels.

We own multiple copyrights in the United States, which are effective in Canada and in other major industrial countries. The copyright protection covers software source codes and supporting graphics relating to the operation of IDVCheck® and other software products. We also have several trademarks relating to our company, its product names and logos.

In connection with the sales or licensing of our intellectual property, we have entered into an agreement with Mr. Kevin Messina, our former Senior Executive V.P. and Chief Technology Officer, under which we will pay royalties equal to 0.005% of cumulative gross sales for cumulative gross sales of \$2,000,000 to \$52,000,000 and 0.0025% of cumulative gross sales for cumulative gross sales in excess of \$52,000,000 pertaining to those patents on which Mr. Messina was identified as an inventor. Cumulatively, as of December 31, 2015, total fees paid under this agreement were about \$1,757.

Employees

As of March 24, 2016, we had twenty-two (22) full-time employees. Four (4) are engaged in executive management, eight (8) in information technology, five (5) in sales and marketing and five (5) in administration. All employees are employed “at will.” We believe our relations with our employees are generally positive and we have no collective bargaining agreements with any labor unions.

RECENT DEVELOPMENTS

Share Repurchase

On February 24, 2016, we entered into a Stock Repurchase Agreement (the “Agreement”) with Nelson Ludlow, the Company’s former chief executive officer and chairman of the board of directors, and Bonnie Ludlow, the Company’s former senior vice president and director. Pursuant to the Agreement, we agreed to repurchase 979,114 shares of our common stock owned by Nelson Ludlow and Bonnie Ludlow at a price of \$1.12 per share. The transaction closed on March 4, 2016.

Lease Amendment

On February 24, 2016, Mobilisa, Inc., our subsidiary, entered into the First Amendment to Lease Agreement (the “Lease Amendment”) with Eagle Coast, LLC, a Washington limited liability company (the “Landlord”). The Lease Amendment amends the Lease Agreement with the Landlord, dated August 1, 2007 (the “Lease”), for the Company’s offices located at 191 Otto Street, Port Townsend, Washington 98368, and provides for, among other things, a reduction in the size of the premises subject to the Lease effective March 31, 2016, and amends the expiration date of the lease from July 31, 2017 to December 31, 2016.

Pursuant to the Lease Amendment, Mobilisa, Inc. is required to pay \$100,000.00 to the Landlord in full satisfaction of its remaining payment obligations under the Lease. After such payment, Mobilisa, Inc. will not be required to pay any additional rent or other sums to the Landlord for its continued occupancy and possession of the premises through December 31, 2016.

Item 1A. Risk Factors

RISK FACTORS

Risks Related to Our Business and Industry

We have incurred principally losses since inception and losses may continue, which could result in a decline in the value of our securities and a loss of your investment.

We sustained net losses of \$5,333,951 and \$7,644,230 for the fiscal years ended December 31, 2015 and 2014, respectively, and our accumulated deficit was \$98,633,745 as of December 31, 2015. Since we expect to incur additional expenditures in line with the sales growth of our business, we may not achieve operating profits in the near future. This could lead to a decline in the value of our securities.

Our proprietary software relies on reference data provided by government and quasi-government agencies. If these governmental and quasi-government agencies were to stop sharing data with us, the utility of our proprietary software would be diminished in those jurisdictions and our business would be damaged.

Currently, the fifty states, ten Canadian provinces and the District of Columbia, which in most instances conform to the guidelines established by certain organizations responsible for implementing industry standards, cooperate with us by providing sample identification cards so that we may modify all of our hardware and software products to read and analyze the encoded information found on such jurisdiction's identification cards. In the event that one or more of these jurisdictions do not continue to provide this reference data, the utility of our proprietary software may be diminished in those jurisdictions.

Our business strategy exposes us to long sales and implementation cycles for our products.

Our target customers in the commercial fraud protection, access control and age verification industry sectors include large retailers and government agencies, which typically require longer sales and implementation cycles for our products than do our potential customer base solely interested in age verification, such as restaurant, bar and convenience store operators. The longer sales and implementation cycles for larger retail companies continue to have an adverse impact on the timing of realizing our revenues. In addition, budgetary constraints and potential economic

slowdowns may also continue to delay purchasing decisions by these prospective customers. These initiatives have costs associated with them, and we cannot assure you that they ultimately will prove successful, or result in, an increase to our revenues or profitability.

In addition, the loss or significant reduction in government spending by government entities could materially limit our ability to obtain government contracts. These limitations, if significant, could also have a material adverse effect on our business, financial condition and results of operations. In addition, we will need to develop additional strategic relationships with large government contractors in order to successfully compete for government contracts. Should we lose or fail to develop these strategic relationships we may not be able to implement our business strategy.

The industry for our systems and software is evolving and its growth is uncertain.

Demand and industry acceptance for recently introduced and existing systems, and software and sales from such systems and software, are subject to a high level of uncertainty and risk. With changing administration in government, changes in government budgets, and slowly evolving government standards on use of identity products, the government sector is slowly developing. The commercial sector has the ability to develop faster than the government sector, but it is also subject to a higher level of uncertainty because of potential uncertainty in the continued financial health of our commercial customers, as well as long sales cycles. Our business may suffer if the industry develops more slowly than anticipated and does not sustain industry acceptance.

Failure to manage our operations if they expand could impair our future growth.

If we are able to expand our operations, particularly through multiple sales to large retailers and government agencies in the document verification industry, the expansion will place significant strain on our management, financial controls, operating systems, personnel and other resources. Our ability to manage future growth, should it occur, will depend to a large extent upon several factors, including our ability to do the following:

build and train our sales force;

establish and maintain relationships with distributors;

develop customer support systems;

develop expanded internal management and financial controls adequate to keep pace with growth in personnel and sales, if they occur; and

manage the use of third-party manufacturers and suppliers.

If we are able to grow our business but do not manage our growth successfully, we may experience increased operating expenses, loss of customers, distributors or suppliers and declining or slowed growth of revenues.

We are subject to risks associated with product failure and technological flaws.

Products as complex as those offered by us may contain undetected errors or result in failures when first introduced or when new versions are released. Despite vigorous product testing efforts and testing by current and potential customers, it is possible that errors will be found in a new product or enhancement after commencement of commercial shipments. The occurrence of product defects or errors could result in adverse publicity, delay in product introduction, diversion of resources to remedy defects, loss of, or a delay in industry acceptance, claims by customers against us, or could cause us to incur additional costs, any of which could adversely affect our business.

Failure to protect our proprietary technology may impair our competitive position.

We continue to allocate significant resources to developing new and innovative technologies that are utilized in our products and systems. Because our continued success depends on, to a significant degree, our ability to offer products providing superior functionality and performance over those offered by our competitors, we consider the protection of

our technology from unauthorized use to be fundamental to our success. This is done by processes aimed at identifying and seeking appropriate protection for newly-developed intellectual property, including patents, trade secrets, copyrights and trademarks, as well as policies aimed at identifying unauthorized use of such property. These processes include:

contractual arrangements providing for nondisclosure of proprietary information;

maintaining and enforcing issued patents and filing patent applications on innovative solutions to commercially important problems;

protecting trade secrets;

protecting copyrights and trademarks by registration and other appropriate means;

establishing internal processes for identifying and appropriately protecting new and innovative technologies; and

establishing practices for identifying unauthorized use of intellectual property.

We are currently involved in two lawsuits as a plaintiff in order to enforce our patent rights. Litigation can be very costly and divert management's attention. An adverse outcome in any litigation may have a severe negative effect on our financial results. To determine the priority of inventions, we may have to participate in interference proceedings declared by the U.S. Patent and Trademark Office or oppositions in foreign patent and trademark offices, which could result in substantial cost and limitations on the scope or validity of our patents or trademarks.

Additionally, third parties, including our competitors or licensees, may seek to have our patents reviewed by the Patent Trial and Appeal Board of the United States Patent and Trademark Office in a post grant proceeding, such as post grant review or an inter parties review. Such proceedings, if instituted could cancel our patents or narrow the scope of our patent claims. We cannot predict the effect that such proceedings, if instituted, may have on our business or revenue received from licensing our patents.

In addition, foreign laws treat the protection of proprietary rights differently from laws in the United States. The failure of foreign laws or judicial systems to adequately protect our proprietary rights or intellectual property, including intellectual property developed on our behalf by foreign contractors or subcontractors, may have a material adverse effect on our business, operations and financial results.

If our future products incorporate technologies that infringe the proprietary rights of third parties, and we do not secure licenses from them, we could be liable for substantial damages.

We are not aware that our current products infringe the intellectual property rights of any third parties. We also are not aware of any third party intellectual property rights that may hamper our ability to provide future products and services. However, we recognize that the development of our services or products may require that we acquire intellectual property licenses from third parties so as to avoid infringement of those parties' intellectual property rights. These licenses may not be available at all or may only be available on terms that are not commercially reasonable. If third parties make infringement claims against us whether or not they are upheld, such claims could:

consume substantial time and financial resources;

divert the attention of management from growing our business and managing operations; and

disrupt product sales and shipments.

If any third party prevails in an action against us for infringement of its proprietary rights, we could be required to pay damages and either enter into costly licensing arrangements or redesign our products so as to exclude any infringing use. As a result, we would incur substantial costs, delays in product development, sales and shipments, and our revenues may decline substantially. Additionally, we may not be able to achieve the minimum necessary growth for our continued success.

Failure to attract and retain management and other personnel may damage our operations and financial results and cause our stock price to decline.

We depend to a significant degree on the skills, experience and efforts of our executive officers and other key management, technical, finance, sales and other personnel. Our failure to attract, integrate, motivate and retain existing or additional personnel could disrupt or otherwise harm our operations and financial results. We do not carry key man life insurance policies covering any employees. The loss of services of certain of our key employees, an inability to attract or retain qualified personnel in the future, or delays in hiring additional personnel could delay the development of our business and could cause our stock price to decline.

Our share price may be volatile and could decline substantially

The market price of our common stock, like the price of shares of technology companies generally, has been and may continue to be volatile. From January 1, 2002 to March 24, 2016, the closing price of our common stock has varied from a high of \$140.00 to a low of \$0.82 per share, as reported on the NYSE MKT. Many factors may cause the market price for our common stock to decline, including:

shortfalls in revenues, cash flows or continued losses from operations;

delays in development or roll-out of any of our products;

announcements by one or more competitors of new product acquisitions or technological innovations; and

unfavorable outcomes from outstanding litigation.

In addition, the stock market experiences extreme fluctuations in price and volume that particularly affect the market price of shares of emerging technology companies, such as ours. These price and volume fluctuations are often unrelated or disproportionate to the operating performance of the affected companies. Because of this volatility, we may fail to meet the expectations of our stockholders or of securities analysts and our stock price could decline as a result. Declines in our stock price for any reason, as well as broad-based market fluctuations or fluctuations related to our financial results or other developments, may adversely affect your ability to sell your shares at a price equal to or above the price at which you purchased them. Decreases in the price of our common stock may also lead to de-listing of our common stock.

We incur significant accounting and other control costs that impact our financial condition.

As a publicly traded corporation, we incur certain costs to comply with regulatory requirements. If regulatory requirements were to become more stringent or if controls thought to be effective later fail, we may be forced to make additional expenditures, the amounts of which could be material. Some of our competitors are privately owned, so their accounting and control costs could create a competitive advantage over us. Should our sales decline or if we are unsuccessful at increasing prices to cover higher expenditures for internal controls and audits, our costs associated with regulatory compliance will rise as a percentage of sales.

Securing government contracts typically involves a lengthy competitive bidding process. Often, unsuccessful bidders have the ability to challenge contract awards. Such challenges may increase costs, result in delays and risk the loss of the contract by the winning bidder. Protests or other delays related to material government contracts that may be awarded to us could result in revenue volatility. State and local government agency contracts may depend on the availability of matching funds from federal, state or local entities. State and local government agencies are subject to political, budgetary, purchasing and delivery constraints that may result in irregular revenue and operating results. Revenue volatility makes management of our business difficult. Outright loss of any material government contract through the protest process or otherwise, could significantly reduce our revenues.

We could be adversely affected by a negative audit by the U.S. government.

We, like other government contractors, are subject to various routine audits, reviews and investigations by U.S. government agencies, including the Defense Contract Audit Agency and various agency inspectors. These agencies review a contractor's performance under its contracts, cost structure and compliance with applicable laws, regulations, and standards. Any costs found to be misclassified may be subject to repayment. If an audit or investigation uncovers improper or illegal activities, we may be subject to civil or criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines, and suspension or prohibition from doing business with the U.S. government.

Our business strategy exposes us to long sales and implementation cycles for our products.

Historically, some of our primary target customers have been government agencies and branches of the U.S. military, both of which require long sales and implementation cycles for products, which may result in a long period of time prior to revenue realization. The loss or significant reduction in government spending could limit our ability to obtain government contracts. These limitations, if significant, could significantly reduce our revenues. We will need to develop additional strategic relationships with large government contractors in order to successfully compete for government contracts. Should we lose or fail to develop these strategic relationships, we may not be able to implement

our business strategy.

We cannot be certain that our backlog estimates will result in actual revenues in any particular fiscal period because our clients may modify or terminate projects or may decide not to exercise contract options.

Our backlog represents sales value of firm orders for products and services not yet delivered and, for long-term, executed contractual arrangements (contracts, subcontract and customer commitments), the estimated future sales value of product shipments, transactions processed and services to be provided over the term of the contractual arrangements, including anticipated renewal options. For contracts with indefinite quantities, our backlog is estimated based on current activity levels. Our backlog includes estimates of revenues, the receipt of which require future government appropriations, depend on option exercise by clients or are subject to contract modification or termination. At December 31, 2015, our backlog approximated \$339,000. These estimates are based on our experience under such contracts and similar contracts, and we believe that such estimates are reasonable. If we do not realize a substantial amount of our backlog, as we presently anticipate, our operations could be harmed and future revenues could be significantly reduced.

Long lead times for the components used in certain products creates uncertainty in our supply chain and may prevent us from making required deliveries to our customers on time.

We rely exclusively on commercial off-the-shelf technology in manufacturing our products. The lead-time for ordering certain components used in our products and for the production of products can be lengthy. As a result, we must, from time to time, order products based on forecasted demand. If demand for products lags significantly behind forecasts, we may purchase more product than we can sell. Conversely, if demand exceeds forecasts, we may not have enough products to meet our obligations to our customers.

We obtain certain hardware and services, as well as some software applications, from a limited group of suppliers, and our reliance on these suppliers involves significant risks, including reduced control over quality and delivery schedules.

Any financial instability of our suppliers could result in having to find new suppliers. We may experience significant delays in manufacturing and deliveries of products and services to customers if we lose our sources or if supplies and services delivered from these sources are delayed. As a result, we may be required to incur additional development, manufacturing and other costs to establish alternative supply sources. It may take several months to locate alternative suppliers, if required. We cannot predict whether we will be able to obtain replacement hardware within the required time frames at affordable costs, or at all. Any delays resulting from suppliers failing to deliver hardware or delays in obtaining alternative hardware, in sufficient quantities and of sufficient quality, or any significant increase in the cost of hardware from existing or alternative suppliers could result in delays on the shipment of product which, in turn, could result in the loss of customers we may not be able to successfully complete.

Our Defense ID[®] system relies on access to databases run by various government agencies. If these governmental agencies were to stop sharing data with us, the utility of the Defense ID system would be diminished and business would be damaged.

Currently, our Defense ID[®] system accesses over 100 separate databases run by various government and law enforcement agencies. We cannot be assured that each of these agencies will continue to cooperate with us. In the event that one or more of these agencies does not continue to provide access to these databases, the utility of the Defense ID[®] system may be diminished and, as a result, our sales could suffer.

Our Defense ID[®] system requires permission from each branch of the U.S. military in the form of an Authority to Operate (ATO). If an existing ATO is revoked, we would risk losing our ability to install our Defense ID[®] system at military bases.

We cannot be assured that these permissions will be renewed, and it is possible that they could be revoked. If one or more of these permissions is revoked or not renewed, then the sector for the Defense ID® system would be reduced and, as a result, our sales could suffer.

Our Defense ID® system manages private personal information and information related to sensitive government functions and a breach of the security systems protecting such information may result in a loss of suppliers or customers or result in litigation.

The protective security measures designed to protect sensitive information and contained in our products may not prevent all security breaches. Failure to prevent security breaches may disrupt our business, damage our reputation and expose us to litigation and liability. A party who is able to circumvent protective security measures used in these systems could misappropriate sensitive information or cause interruptions or otherwise damage our products, services and reputation as well as the property and privacy of customers. If unintended parties obtain sensitive data and information, or create bugs or viruses or otherwise sabotage the functionality of our products, we may receive negative publicity, incur liability to our customers or lose the confidence of our customers, any of which may cause the termination or modification of contracts. Further, our existing insurance coverage may be insufficient to cover losses and liabilities that may result from such events.

In addition, we may be required to expend significant capital and other resources to protect against the threat of security breaches or to alleviate problems caused by the occurrence of any such breaches. However, protective or remedial measures may not be available at a reasonable price or at all, or may not be entirely effective if commenced.

Future government regulation restricting the capture of information electronically stored on identification cards could adversely affect our business.

The Defense ID[®] system is designed to read, verify and capture information from identification cards. Currently, some jurisdictions have restrictions on what can be done with this information. Because issues of personal privacy continue to be a major topic of public policy debate, it is possible that, in the future, these or other jurisdictions may introduce similar or additional restrictions on capturing this information. Therefore, the implementation of unfavorable regulations or unfavorable interpretations of existing regulations by courts or regulatory bodies could require us to incur significant compliance costs, cause the development of the affected industry sectors to become impractical and reduce our revenues and potential revenues.

We are subject to risks associated with product failure and technological flaws.

Our products are complex and may contain undetected errors or result in failures when first introduced or when new versions are released. Despite vigorous product testing efforts and testing by current and potential customers, it is possible that errors will be found in a new product or enhancement after commercial shipments have commenced. The occurrence of product defects or errors could result in negative publicity, delays in product introduction and the diversion of resources to remedy defects and loss of or delay in industry acceptance or claims by customers against us and could cause us to incur additional costs, any one of which could adversely affect our business. Because of the risk of undetected error, we may be compelled to accept liability provisions that vary from our preferred contracting model in certain critical transactions. There is a risk that in certain contracts and circumstances we may not be successful in adequately minimizing product and related liabilities or that the protections negotiated will not ultimately be deemed enforceable.

We carry product liability insurance, but existing coverage may not be adequate to cover potential claims. The failure of our products to perform as promised could result in increased costs, lower margins, liquidated damage payment obligations and harm to our reputation.

We may not be able to keep up with rapid technological change.

The sectors for all of our products are characterized by rapid technological advancements. Significant technological change could render existing technology obsolete. If we are unable to successfully respond to these developments, or do not respond in a cost-effective manner, our business, financial condition and results of operations will be materially adversely affected.

Future capital requirements may require incurring debt or dilution of existing stockholders.

Acquisition and development opportunities and other contingencies may arise, which could require us to raise additional capital or incur debt. If we raise additional capital through the sale of equity, including preferred stock, or convertible debt securities, the percentage ownership of our then existing stockholders will be diluted.

Because we do not intend to pay dividends on our Common Stock, stockholders will benefit from an investment in our stock only if it appreciates in value.

We have never declared or paid any cash dividends on our shares of stock. We currently intend to retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we do not anticipate paying cash dividends in the foreseeable future. Any future determination as to the declaration and payment of cash dividends will be at the discretion of our Board of Directors and will depend on factors the Board of Directors deems relevant, including among others, our results of operations, financial condition and cash requirements, business prospects, and the terms of our credit facilities and other financing arrangements. Accordingly, realization of a gain on stockholders' investments will depend on the appreciation of the price of our stock. There is no guarantee that our stock will appreciate in value.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

Our corporate headquarters is currently located in Jericho, New York, where we occupy approximately 9,233 square feet of office space pursuant to a lease that expires on March 1, 2018. We also occupy approximately 5,840 square feet of office space in Port Townsend, Washington, pursuant to a lease that was to originally expire on July 31, 2017. On February 24, 2016, we entered into a lease amendment agreement to take effect March 31, 2016 which we will permanently vacate our office space and lease a small area to house our servers through December 31, 2016. Most U.S. sales, marketing and technical personnel for all product divisions are in these locations, with a small number of individuals operating out of home offices. We believe that our existing facilities are adequate to meet current requirements and that additional or substitute space will be available as needed to accommodate any expansion of operations.

Item 3. Legal Proceedings

We are not currently involved in any legal or regulatory proceeding, or arbitration, the outcome of which is expected to have a material adverse effect on our business.

Item 4. Mine Safety Disclosures

None

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

(a) Our common stock is traded on the NYSE MKT Stock Exchange under the symbol “IDN.” The following table indicates high and low sales prices for the periods indicated.

	Low	High
2014		
First quarter	\$3.44	\$13.04
Second quarter	\$4.64	\$7.76
Third quarter	\$3.86	\$6.00
Fourth quarter	\$2.95	\$4.29
2015		
First quarter	\$1.39	\$2.78
Second quarter	\$1.34	\$1.77
Third quarter	\$0.86	\$1.44
Fourth quarter	\$0.82	\$1.17
2016		
First quarter*	\$0.85	\$1.46

* Portion of first fiscal quarter through March 24, 2016.

(b) As of March 24, 2016, there were approximately 52 shareholders of record of our common stock.

(c) No cash dividends or other cash distributions made by us during the fiscal year ended December 31, 2015. Future dividend policy will be determined by our Board of Directors based on our earnings, financial condition, capital requirements and other then existing conditions. It is anticipated that cash dividends will not be paid to the holders of our common stock in the foreseeable future.

(d) Securities Authorized for Issuance Under Equity Compensation Plans

The following table provides information as of December 31, 2015, with respect to the shares of our common stock that may be issued under our existing equity compensation plans.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders ⁽¹⁾	1,868,375	\$ 1.38	255,827
Equity compensation plans not approved by security holders ⁽²⁾	100,000	\$ 3.09	n/a
Total	1,968,375	\$ 1.46	255,827

(1) Represents 1,665,456 options and 36,073 restricted stock units under the 2015 Omnibus Incentive Plan, 134,298 options and 31,004 restricted stock units under the 2006 Equity Incentive Plan, 1,250 options under the 2003 Stock Option Plan and 294 options under the 1999 Stock Option Plan.

(2) Represents options granted as an inducement to beginning employment to our Chief Revenue Officer.

(e) Recent Sales of Unregistered Securities

None.

(f) Repurchases of Equity Securities

There were no shares purchased during 2015.

(g) Reverse Stock Split

Effective on August 12, 2014 and commencing with the opening of trading on August 13, 2014, we effected a reverse stock split of our issued and outstanding common stock, \$0.001 par value per share, at a ratio of one-for-eight, with each eight (8) issued and outstanding shares of the common stock automatically combined and converted into one (1) issued and outstanding share of the common stock. The reverse stock split was approved by stockholders holding a majority of the outstanding voting power at a special meeting of stockholders held on August 12, 2014.

Item 6. Selected Financial Data

The following selected financial data presented under the captions “Statement of Operations Data” and “Balance Sheet Data” as of the end of each of the five years ended December 31, 2015, are derived from our financial statements. The selected financial data should be read in conjunction with the financial statements as of December 31, 2015 and 2014 and for each of the two years in the period ended December 31, 2015, the accompanying notes and the report of independent registered public accounting firms thereon, which are included elsewhere in this Form 10-K. Our consolidated financial statements include our accounts and our wholly owned subsidiaries, Mobilisa and Positive Access. The acquisition of Mobilisa was completed on March 14, 2008, and therefore Mobilisa’s results of operations are included in the financial statements beginning from March 15, 2008. The acquisition of Positive Access was completed on August 31, 2009, and therefore Positive Access’s results of operations are included in the financial statements beginning from September 1, 2009.

Years Ended December 31,
2011 2012 2013 2014 2015
(In thousands, except per share data)

Edgar Filing: Intellicheck Mobilisa, Inc. - Form 10-K

Statement of Operations Data:

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are a technology company that provides identity systems for various applications including mobile and handheld access control and security systems for the government, military and commercial markets. Our products include the Defense ID[®] and Fugitive Finder systems, advanced ID card access control products currently protecting military and federal locations, and ID√Check[®], a patented technology that instantly reads, analyzes, and verifies encoded data in magnetic stripes and barcodes on government-issue IDs from U.S. and Canadian jurisdictions designed to improve the Customer Experience for the financial, hospitality and retail sectors.

Critical Accounting Policies and the Use of Estimates

The preparation of our financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in our financial statements and accompanying notes. Significant estimates and assumptions that affect amounts reported in the financial statements include impairment of goodwill, valuation of intangible assets, deferred tax valuation allowances, allowance for doubtful accounts, revenue allocation of multi-element arrangements and the fair value of stock options granted under our stock-based compensation plans. Due to the inherent uncertainties involved in making estimates, actual results reported in future periods may be different from those estimates.

We believe that there are several accounting policies that are critical to understanding our historical and future performance, as these policies affect the reported amounts of revenue and the more significant areas involving management's judgments and estimates. These significant accounting policies relate to revenue recognition, stock based compensation, deferred taxes, goodwill and intangible asset valuation and impairment, and commitments and contingencies. These policies and our procedures related to these policies are described in detail below.

Valuation of goodwill and other long-lived assets

Our long-lived assets include property and equipment, goodwill and intangible assets. As of December 31, 2015, the balances of property and equipment, goodwill and intangible assets, all net of accumulated depreciation and amortization, were \$325,427, \$8,101,661 and \$2,470,127 respectively. As of December 31, 2014, the balances of property and equipment, goodwill and intangible assets, all net of accumulated depreciation and amortization, were \$346,915, \$8,101,661 and \$3,307,797 respectively.

We depreciate property and equipment and amortize intangible assets that have finite lives over their estimated useful lives. For purposes of determining whether there are any impairment losses, as further discussed below, management evaluates the carrying amounts of identifiable long-lived tangible and intangible assets, including their estimated useful lives, when indicators of impairment are present as more fully described below. Based on our review of the carrying amounts of the long-lived tangible and intangible assets with finite lives, we may also determine that shorter estimated useful lives are appropriate. In that event, we record depreciation and amortization over shorter future periods, which would reduce our earnings.

Goodwill

The excess of the purchase consideration over the fair value of the assets of the acquired businesses is considered goodwill. Under authoritative guidance, purchased goodwill is not amortized, but rather it is periodically reviewed for impairment. We had goodwill of \$8,101,661 at December 31, 2015 and 2014. This goodwill resulted from the acquisition of Mobilisa, Inc. and Positive Access Corporation.

For the years ended December 31, 2015 and 2014, we performed our annual impairment test of goodwill in the fourth quarter. Under authoritative guidance, we can use industry and Company specific qualitative factors to determine whether it is more likely than not that impairment exists, before using a two-step quantitative analysis. Events or changes in circumstances which could trigger an impairment review include macroeconomic conditions, industry and market conditions, cost factors, overall financial performance, other entity specific events and sustained decrease in share price. As a result of the qualitative factors in 2015 and 2014, specifically as a result of the decline in the stock price and the decrease in market multiples, we performed the first step of the goodwill impairment test in order to identify potential impairment by comparing our fair value of the Company to our carrying amount, including goodwill. The fair value was determined using the weighting of certain valuation techniques, including both income and market approaches which include a discounted cash flow analysis, an estimation of an implied control premium, in addition to our market capitalization on the measurement date. The implied control premium selected was developed based on certain observable market data of comparable companies. The market capitalization is sensitive to the volatility of our stock price. Although we believe that the factors considered in the impairment analysis are reasonable, changes in any one of the assumptions used could have produced a different result which may have led to an impairment charge. Any future impairment loss could have a material adverse effect on our long-term assets and operating expenses in the period in which impairment is determined to exist.

As of December 31, 2015, we determined that the fair value was in excess of our carrying amount and therefore the second step of the goodwill impairment test was not required.

As of December 31, 2014, we determined that our carrying value was in excess of the fair value and therefore it was necessary to complete Step 2 of the analysis. Completion of Step 2 of the goodwill impairment test indicated a reduction in fair value of goodwill and resulted us recording an impairment of \$4,207,000 in the fourth quarter of 2014.

We considered whether long-lived assets were also impaired. As required by ASC 360, compared the carrying amounts of the identified asset groups (including goodwill as required by ASC 360 to the undiscounted cash flow of the asset groups and determined that our intangible assets were not impaired at December 31, 2015 and 2014.

Intangible Assets

Intangible assets include trade names, patents, developed technology and non-contractual customer relationships as described more fully in Note 5. We use the straight line method to amortize these assets over their estimated useful lives. We review our long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be fully recoverable in accordance with ASC Topic 360. To determine recoverability of its long-lived assets, we evaluate the probability that future undiscounted net cash flows, without interest charges, will be less than the carrying amount of the assets. Impairment is measured at fair value. No impairments were recognized during the years ended December 31, 2015 and 2014.

Revenue Recognition and Deferred Revenue

Revenue is generally recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed and determinable, collectability is probable, and there is no future Company involvement or commitment. We sell our commercial products directly through its sales force and through distributors. Revenue from direct sales of products is recognized when shipped to the customer and title has passed.

Under the provisions of ASC Topic 605-25, “Revenue Arrangements with Multiple Deliverables,” for multi-element arrangements that include tangible products containing software essential to the tangible product’s functionality and undelivered software elements relating to the tangible product’s essential software, we allocate revenue to all deliverables based on their relative selling prices. In such circumstances, we use a hierarchy to determine the selling price to be used for allocating revenue to deliverables: (i) vendor-specific objective evidence of fair value (“VSOE”), (ii) third-party evidence of selling price and (iii) best estimate of the selling price (“ESP”). VSOE generally exists only when we sell the deliverable separately and is the price actually charged by us for that deliverable. ESPs reflect our best estimates of what the selling prices of elements would be if they were sold regularly on a stand-alone basis.

We also recognize revenues from licensing of its patented software to customers. The licensed software requires continuing service or post contractual customer support and performance; accordingly, a portion of the revenue is deferred based on its fair value and recognized ratably over the period in which the future service, support and performance are provided, which is generally one to three years. Royalties from the licensing of our technology are recognized as revenues in the period they are earned.

Revenue from research and development contracts are generally with government agencies under long-term cost-plus fixed-fee contracts, where revenue is based on time and material costs incurred. Revenue from these arrangements is recognized as time is spent on the contract and materials are purchased. Research and development costs are expensed as incurred.

We also perform consulting work for other companies. These services are billed based on time and materials. Revenue from these arrangements is also recognized as time is spent on the contract and materials are purchased.

Subscriptions to database information can be purchased for month-to-month, one, two, and three year periods. Revenue from subscriptions are deferred and recognized over the contractual period, which is typically three years.

We offer enhanced extended warranties for its sales of hardware and software at a set price. The revenue from these sales are deferred and recognized on a straight-line basis over the contractual period, which is typically one to three years.

Stock-Based Compensation

We account for the issuance of equity awards to employees in accordance with ASC Topic 718 and 505, which requires that the cost resulting from all share based payment transactions be recognized in the financial statements. This pronouncement establishes fair value as the measurement objective in accounting for share based payment arrangements and requires all companies to apply a fair value based measurement method in accounting for all share based payment transactions with employees.

Deferred Income Taxes

Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and net operating loss carry forwards. Deferred tax assets and liabilities are measured using expected tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. We have recorded a full valuation allowance for our net deferred tax assets as of December 31, 2015 and 2014, due to the uncertainty of the realizability of those assets.

Commitments and Contingencies

We are not currently involved in any legal or regulatory proceeding, or arbitration, the outcome of which is expected to have a material adverse effect on our business.

The above listing is not intended to be a comprehensive list of all of our accounting policies. In many cases, the accounting treatment of a particular transaction is specifically dictated by generally accepted accounting principles, with no need for management's judgment in their application. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result.

Results of Operations (All figures were rounded to the nearest \$1,000)

COMPARISON OF THE YEAR ENDED DECEMBER 31, 2015

TO THE YEAR ENDED DECEMBER 31, 2014

REVENUE. Total revenues were approximately 6% higher in the year ended December 31, 2015 as compared to the year ended December 31, 2014.

	Year Ended December 31,		
	2015	2014	% Change
Identity Systems	\$6,646,000	\$5,650,000	18 %
Wireless R&D	369,000	963,000	(61)%
	\$7,015,000	\$6,613,000	6 %

The increase in the Identity Systems revenues in 2015 is a result of increased commercial identity sales. The decrease in Wireless R&D and Other revenues in 2015 is a result of reduced wireless installation projects and the sale of the wireless assets on August 31, 2015.

As of December 31, 2015, our backlog, which represents non-cancelable sales orders for products not yet shipped and services to be performed, was approximately \$339,000. The backlog consists of Defense ID® contracts and commercial sales orders. Our backlog as of December 31, 2014 was approximately \$530,000. Period to period comparisons may not be indicative of future operating results, since we still face long sales cycles, and therefore, we cannot predict with certainty in which period the opportunities currently in the pipeline will develop into sales or if they will develop at all.

GROSS PROFIT. Gross profit increased by \$158,000 or 4% to \$4,008,000 for the year ended December 31, 2015 from \$3,850,000 in the year ended December 31, 2014. Our gross profit, as a percentage of revenues, was 57% and 58% in 2015 and 2014, respectively. The decrease in percentage in 2015 is due to increased sales of a particular type of equipment to a commercial customer that has a lower margin.

OPERATING EXPENSES. Operating expenses, which consist of selling, general and administrative and research and development expenses increased by \$2,201,000 or 30% to \$9,489,000 for the year ended December 31, 2015 from \$7,288,000 for the year ended December 31, 2014. Selling expenses increased 6% to \$1,450,000 for the year ended

December 31, 2015 from \$1,374,000 for the year ended December 31, 2014, principally as a result of increased salaries due to the hiring of sales representatives. General and administrative expenses increased 33% to \$5,444,000 for the year ended December 31, 2015 from \$4,091,000 for the year ended December 31, 2014, principally as a result of an amortization of the covenant not to compete, higher costs for stock-based compensation for stock options and restricted stock units issued during the current year and an increase in professional fees. Research and development expenses increased 42% to \$2,595,000 for the year ended December 31, 2015 from \$1,823,000 for the year ended December 31, 2014, principally as a result of the utilization of a specialized consulting firm for certain projects beginning the second quarter.

We completed our annual impairment testing of goodwill and other intangible assets in accordance with ASC Topic 350 "Goodwill and Other Intangible Assets" and ASC Topic 360 "Accounting for the Impairment or Disposal of Long-Lived Assets." Based upon this review, it was determined that there was no impairment of goodwill as of December 31, 2015 and an impairment of goodwill of \$4,207,000 as of December 31, 2014.

INTEREST AND OTHER INCOME. Interest and other income consisted primarily of the gain on the sale of the wireless assets on August 31, 2015 amounting to \$109,000. Interest and other income was insignificant for the year ended December 31, 2014.

INTEREST EXPENSE. Interest expense was insignificant in both periods presented.

INCOME TAXES. We have incurred net losses to date; therefore, we have paid nominal income taxes.

NET LOSS. As a result of the factors noted above, we incurred a net loss of \$5,334,000 for the year ended December 31, 2015 as compared to a net loss, after the \$4,207,000 goodwill impairment charge, of \$7,644,000 for the year ended December 31, 2014.

Liquidity and Capital Resources (All figures were rounded to the nearest \$1,000)

As of December 31, 2015, we had cash and cash equivalents of \$5,953,000, working capital (defined as current assets minus current liabilities) of \$5,659,000, total assets of \$18,473,000 and stockholders' equity of \$16,326,000.

During 2015, we increased our cash and cash equivalents by \$2,987,000. Cash used in operating activities was \$4,436,000 in 2015 as compared to cash used in operating activities of \$2,374,000 in 2014. The increase in cash used in operations in 2015 is primarily a result of increase in the net loss, excluding the prior year goodwill impairment. We used cash of \$177,000 in investing activities during 2015 compared to \$131,000 in 2014. Cash generated in financing activities was \$7,601,000 compared to \$5,247,000 in 2014.

On January 14, 2014, we announced the closing of an underwritten public offering of 1,118,375 shares of its common stock, offered to the public at \$3.60 per share. The offering netted us approximately \$3,644,000 in cash, after underwriting discounts and commissions. The underwriters received a warrant to purchase 48,625 shares of common stock, at the price of \$4.48, which will be exercisable one year after the date of the offering and will expire on the fifth anniversary of that offering.

On April 10, 2014, we completed a public offering of 327,125 shares of common stock at a price to the public of \$6.40 per share. Net proceeds from the offering, after underwriting discounts and commissions we paid, were \$1,852,437. The underwriter received a warrant to purchase 16,356 shares of common stock, at a price of \$8.00 per share (125% of the price of the shares sold in the offering), which will be exercisable one year after the date of the offering and will expire on the fifth anniversary of that offering.

On January 14, 2015, we announced the closing of an underwritten public offering of 4,857,143 shares of its common stock, offered to the public at \$1.75 per share. Net proceeds from this offering were approximately \$7,845,000 after deducting underwriting discounts and commissions we paid.

On August 31, 2015, we sold our wireless enterprise assets to the Jamestown S’Klallam Tribe (the “Buyer”) for total consideration of \$350,000 which consists of an upfront cash payment of \$30,000, the issuance of a promissory note totaling \$200,000 and contingent consideration up to a maximum of \$120,000 based on future earnings. We recognized a gain on the sale of approximately \$109,000 which is included in interest and other income for the year ended December 31, 2015. Total assets disposed include certain trade names associated with the wireless assets with a net book value of approximately \$65,000 and certain fixed assets with a net book value of approximately \$56,000. Any gain on contingent consideration will be recognized as it is earned. Under the terms of the promissory note, monthly payments in the amount of \$3,683 including principal and interest at 4%, are to be made over a 60-month term expiring in August 2020. At December 31, 2015, the total note receivable was \$187,861, of which \$37,365 and \$150,496 is included in Other Current Assets and Notes Receivable, net of current portion, respectively on the Consolidated Balance Sheets.

We entered into a revolving credit facility with Silicon Valley Bank. On October 5, 2015, we renewed and amended this facility. The amended maximum borrowing under the facility is \$2,000,000 less a sublimit of \$262,500 in pledged banking services and as defined in the agreement, the borrowings are secured by certain collateralized accounts including \$2,000,000 in collateralized accounts with Silicon Valley Bank. The facility bears interest at a rate of U.S. prime (3.50% at December 31, 2015). Interest is payable monthly and the principal is due upon maturity on October 5, 2017. At December 31, 2015, there were no amounts outstanding under this facility and unused availability under this facility was \$1,737,500.

We currently anticipate that our available cash, as well as cash from the previously mentioned stock offerings, and expected cash from operations and availability under the revolving credit agreement, will be sufficient to meet our anticipated working capitals and capital expenditure requirements for at least the next 12 months.

We keep the option open to raise additional funds to respond to business contingencies which may include the need to fund more rapid expansion, fund additional marketing expenditures, develop new markets for our technology, enhance our operating infrastructure, respond to competitive pressures, or acquire complementary businesses or necessary technologies. There can be no assurance that we will be able to secure the additional funds when needed or obtain such on terms satisfactory to us, if at all.

We have filed a universal shelf registration statement on Form S-3 with the Securities and Exchange Commission (“SEC”), which became effective July 19, 2010. Under the shelf registration statement, we may offer and sell, from time to time in the future in one or more public offerings, its common stock, preferred stock, warrants, and units. The aggregate initial offering price of all securities sold by us will not exceed \$25,000,000, and, pursuant to SEC rules, we may only sell up to one-third of the market cap held by non-affiliate stockholders in any 12-month period. We renewed this registration statement with the SEC on July 31, 2013 and it was declared effective August 6, 2013.

The specific terms of any future offering, including the prices and use of proceeds, will be determined at the time of any such offering and will be described in detail in a prospectus supplement which will be filed with the SEC at the time of the offering.

The shelf registration statement is designed to give us the flexibility to access additional capital at some point in the future when market conditions are appropriate.

We are not currently involved in any legal or regulatory proceeding, or arbitration, the outcome of which is expected to have a material adverse effect on our business.

Adjusted EBITDA

We use Adjusted EBITDA as a non-GAAP financial performance measurement. Adjusted EBITDA is calculated by adding back to net loss interest, income taxes, impairments of long-lived assets and goodwill, depreciation, amortization and stock-based compensation expense. Adjusted EBITDA is provided to investors to supplement the results of operations reported in accordance with GAAP. Management believes that Adjusted EBITDA provides an additional tool for investors to use in comparing our financial results with other companies that also use Adjusted

EBITDA in their communications to investors. By excluding non-cash charges such as impairments of long-lived assets and goodwill, amortization, depreciation and stock-based compensation, as well as non-operating charges for interest and income taxes, investors can evaluate our operations and can compare its results on a more consistent basis to the results of other companies. In addition, adjusted EBITDA is one of the primary measures management uses to monitor and evaluate financial and operating results.

We consider Adjusted EBITDA to be an important indicator of our operational strength and performance of our business and a useful measure of our historical operating trends. However, there are significant limitations to the use of Adjusted EBITDA since it excludes interest income and expense, impairments of long lived assets and goodwill, stock based compensation expense, all of which impact our profitability, as well as depreciation and amortization related to the use of long term assets which benefit multiple periods. We believe that these limitations are compensated by providing Adjusted EBITDA only with GAAP net loss and clearly identifying the difference between the two measures. Consequently, Adjusted EBITDA should not be considered in isolation or as a substitute for net loss presented in accordance with GAAP. Adjusted EBITDA as defined us may not be comparable with similarly named measures provided by other entities.

A reconciliation of GAAP net loss to Adjusted EBITDA follows:

	Year Ended December 31, (Unaudited)	
	2015	2014
Net loss	\$(5,333,951)	\$(7,644,230)
Reconciling items:		
Interest and other (income) expense	(146,258)	(939)
Depreciation and amortization	1,020,679	1,157,709
Stock-based compensation costs	878,112	188,640
Impairment of goodwill	-	4,207,000
Adjusted EBITDA	\$(3,581,418)	\$(2,091,820)

Related Party Transactions

Mobilisa leases office space from a company (“Lessor Company”) that is wholly-owned by two former directors, who were also members of management. The Company entered into a 10-year lease for the office space ending in 2017. The annual rent for this facility is currently \$96,010 and is subject to annual increases based on the increase in the CPI index plus 1%. For the years ended December 31, 2015 and 2014, total rent payments for this office space were \$94,783 and \$88,301, respectively.

On September 30, 2014, the CEO and a Senior Vice President (collectively, the “Executives”), who were also board members, retired from the Company and simultaneously resigned from the board of directors. In connection with the separation, we entered into a separation and consulting agreement with the Executives. Included as part of the arrangement, we committed to payments totaling \$587,500 to be made over a period of 15 months. In exchange for the consideration, the Executives agreed not to compete with the Company, solicit any employee, contractor or consultant of the Company to terminate employment or contractual relationship with the Company, as well refrain from other activities, as defined in the agreement. At September 30, 2014, we recorded the future payments of the agreement as a liability and as a non-compete intangible asset totaling \$587,500. The costs of the non-compete were amortized over the 15-month term of the agreement. For the years ended December 31, 2015 and 2014, amortization expense recognized was \$470,000 and \$117,500, respectively. The Company made payments under this agreement in 2015 and 2014 of \$417,500 and \$170,000, respectively and the balance was paid in full as of December 31, 2015.

Net Operating Loss Carry Forwards

As of December 31, 2015, we had net operating loss carryforwards (NOL's) for federal and New York State income tax purposes of approximately \$47.4 million. There can be no assurance that we will realize the benefit of the NOL's. The federal and state NOL's are available to offset future taxable income and expire from 2016 through 2036 if not utilized.

In March 2016, we completed a study which determined that a cumulative three-year ownership change in excess of 50% had occurred in March 2016 due to a share repurchase, see "Recent Developments." As a result, our Company's available NOLs were reduced from \$47.4 million to \$2.2 million during the first quarter of 2016.

Contractual Obligations

Below is a table, which presents our contractual obligations and commitments at December 31, 2015:

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating Leases	\$842,751	\$437,511	\$405,240	\$ -	\$ -
Consulting Agreements	-	-	-	-	-
Purchase Obligations	-	-	-	-	-
Total Contractual Obligations	\$842,751	\$437,511	\$405,240	\$ -	\$ -

Recently Issued Accounting Pronouncements Not Yet Effective

Except as discussed below, we do not expect the impact of the future adoption of recently issued accounting pronouncements to have a material impact on our financial statements.

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-09, “*Revenue from Contracts with Customers (Topic 606)*.” ASU 2014-09 completes the joint effort by the FASB and International Accounting Standards Board (“IASB”) to improve financial reporting by creating common revenue recognition guidance for U.S. GAAP and International Financial Reporting Standards (“IFRS”). ASU 2014-09 applies to all companies that enter into contracts with customers to transfer goods or services. ASU 2014-09 is effective for public entities for interim and annual reporting periods beginning in the first quarter of 2018. Early adoption is permitted beginning in the first quarter of 2017 for public companies. We are currently evaluating the requirements of ASU 2014-09 and have not yet determined its impact on our consolidated financial statements.

In August 2014, the FASB issued ASU No. 2014-15, “Presentation of Financial Statements – Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern”, which defines management’s responsibility to evaluate, at each annual and interim reporting period, whether there are conditions or events that raise substantial doubt about an entity’s ability to continue as a going concern within one year after the date the financial statements are issued and to provide related footnote disclosures in certain circumstances. In connection with each annual and interim period, management must assess if there is substantial doubt about the company’s ability to continue as a going concern within one year after the issuance date. Disclosures are required if conditions give rise to substantial doubt. This standard is effective for all companies in the first annual period ending after December 15,

2016, and interim periods thereafter, with early adoption permitted. We are currently evaluating the requirements of ASU 2014-15 and have not yet determined the impact on our consolidated financial statements.

In July 2015, the FASB issued Accounting Standards Update 2015-11, *Inventory (Topic 330): Simplifying the Measurement of Inventory* (“ASU 2015-11”) which changes the measurement principle for inventory from the lower of cost or market to the lower of cost and net realizable value. ASU 2015-11 defines net realizable value as estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. The new guidance must be applied on a prospective basis and is effective for periods beginning after December 15, 2016, with early adoption permitted. We are currently evaluating the effect that the new guidance will have on our financial statements and related disclosures.

In November 2015, the FASB issued ASU No. 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes* which simplifies the presentation of deferred income taxes by eliminating the separate classification of deferred income tax liabilities and assets into current and noncurrent amounts in the consolidated balance sheet. The amendments in the update require that all deferred tax liabilities and assets be classified as noncurrent in the consolidated balance sheet. The amendments in this update are effective for annual periods beginning after December 15, 2016, and interim periods therein and may be applied either prospectively or retrospectively to all periods presented. Early adoption is permitted. We are currently evaluating the impact this guidance is expected to have on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, *Leases*, which requires that lease arrangements longer than 12 months result in an entity recognizing an asset and liability. The pronouncement is effective for periods beginning after December 15, 2018 with early adoption permitted. We are currently evaluating the impact this guidance is expected to have on our consolidated financial statements.

Off-Balance Sheet Arrangements

We have never entered into any off-balance sheet financing arrangements and have never established any special purpose entities. We have not guaranteed any debt or commitments of other entities or entered into any options on non-financial assets.

Forward Looking Statements

This document contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, particularly statements anticipating future growth in revenues, loss from operations and cash flow. Words such as “anticipates,” “estimates,” “expects,” “projects,” “intends,” “plans,” “believes” and words and terms of similar substance in connection with any discussion of future operating or financial performance identify forward-looking statements. These forward-looking statements are based on management’s current expectations and beliefs about future events. As with any projection or forecast, they are inherently susceptible to uncertainty and changes in circumstances, and the Company is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements whether as a result of such changes, new information, subsequent events or otherwise.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Financial instruments, which subject us to concentrations of credit risk, consist primarily of cash and cash equivalents. We maintain cash between three financial institutions. The marketable securities and short term investments are invested in money market funds and bank certificates of deposit. We perform periodic evaluations of the relative credit standing of these institutions.

Item 8. Financial Statements and Supplementary Data

Our financial statements and supplementary data are attached hereto beginning on Page F-1.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

There have been no changes in or disagreements with our principal independent registered public accounting firm for the two-year period ended December 31, 2015.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and our Chief Financial Officer evaluated, with the participation of our management, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report on Form 10-K. As of December 31, 2015, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures, as defined in Securities Exchange Act Rule 13a-15I, were effective.

Our disclosure controls and procedures have been formulated to ensure (i) that information that we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 were recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and (ii) that the information required to be disclosed by us is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting that occurred during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Annual Report of Management on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 15d-15(f) under the Exchange Act) for the Company. Management, with the participation of our principal executive officer and our principal financial officer, evaluated the effectiveness of our internal control over financial reporting as of December 31, 2015 (the end of our fiscal year), based on the framework and criteria established in the 2013 Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2015.

Item 9B. Other Information

On May 11, 2015, we filed a Form 8-K, announcing the results of its Annual Stockholders Meeting held May 6, 2015. Our stockholders elected Vice Admiral Michael D. Malone, General Emil R. Bedard, General Jack A. Davis, Mr. William P. Georges and Mr. Guy L. Smith to serve as directors for one-year terms or until their respective successors have been duly elected and qualified; (ii) approved our 2015 Omnibus Incentive Plan; and (iii) ratified the appointment of EisnerAmper, LLP as our Independent Registered Public Accounting Firm for the fiscal year ending December 31, 2015.

On September 3, 2015, we filed a Form 8-K, which announced the August 31, 2015, sales of its wireless business assets to the Jamestown S'Klallam Tribe Economic Development Authority (the "Tribe") in Washington State. The sale to the Tribe includes the transition of the Wireless Assets and employment of our employees that support the Wireless Assets.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this Item is incorporated herein by reference from our 2016 definitive proxy statement (which will be filed with the SEC within 120 days after December 31, 2015 in connection with the solicitation of proxies for the Company's 2016 annual meeting of stockholders) ("2016 Proxy Statement") under the captions "Proposal 1—Election of Directors," "Other Information—Executive Officers," and "Beneficial Ownership Reporting Compliance under Section 16(a) of the Exchange Act."

Item 11. Executive Compensation

The information required by this Item is incorporated herein by reference from our 2016 Proxy Statement under the captions "Executive Compensation" and "Director Compensation."

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item is incorporated herein by reference from our 2016 Proxy Statement under the captions "Other Information—Security Ownership of Certain Beneficial Owners and Management" and "Other Information—Equity Compensation Plan Information."

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is incorporated herein by reference from our 2016 Proxy Statement under the captions “Other Information—Related Party Transactions Overview,” “Other Information—Certain Transactions with Related Persons” and “Director Attributes and Independence.”

Item 14. Principal Accounting Fees and Services

The information required by this Item is incorporated herein by reference from our 2016 Proxy Statement under the caption “Proposal 3—Ratification of the Selection of Independent Auditors.”

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders of

Intellicheck Mobilisa, Inc.

We have audited the accompanying consolidated balance sheets of Intellicheck Mobilisa, Inc. (the “Company”) as of December 31, 2015 and 2014, and the related consolidated statements of operations, stockholders’ equity, and cash flows for each of the years then ended. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Intellicheck Mobilisa, Inc. as of December 31, 2015 and 2014, and the consolidated results of their operations and their cash flows for each of the years then ended, in conformity with accounting principles generally accepted in the United States of America.

/s/ EisnerAmper LLP

INTELLICHECK MOBILISA, INC.

NOTES TO FINANCIAL STATEMENTS

1. NATURE OF BUSINESS

Business

Intellicheck Mobilisa, Inc. (the “Company” or “Intellicheck”) is a leading technology company that is engaged in developing, integrating and marketing threat identification and identity authentication solutions to address challenges that include retail fraud prevention, law enforcement threat identification, and mobile and handheld access control and security for the government, military and commercial markets. Intellicheck’s products include Retail ID™, the industry leading solution for preventing fraud in the retail industry; Age ID™, a smartphone or tablet-based solution for preventing sale of age-restricted products to minors; Law ID™, a smartphone-based solution used by law enforcement officers to identify and mitigate threats; and Defense ID®, a mobile and fixed infrastructure solution for threat identification, identity authentication and access control to military bases and other government facilities.

Intellicheck continues to develop and release innovative products based upon its rich patent portfolio consisting of over 25 patents.

Liquidity

For the year ended December 31, 2015, the Company incurred a net loss of \$5,333,951. As of December 31, 2015, the Company had cash and cash equivalents of \$5,953,257 and an accumulated deficit of \$98,633,745. In January 2015, the Company completed an equity raise with gross proceeds of \$8,500,000 before deducting the underwriting discount and other offering expenses. Based on our business plan and, cash resources, we expect our existing and future resources and revenues generated from operations to satisfy our working capital requirements for at least the next 12 months.

However, if performance expectations fall short or expenses exceed expectations, the Company may need to secure additional financing or reduce expenses to continue operations. Failure to do so would have a material adverse impact on its financial condition. There can be no assurance that any contemplated additional financing will be available on

terms acceptable, if at all. If required, the Company believes it would be able to reduce expenses to a sufficient level to continue as a going concern.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Mobilisa, Inc. (“Mobilisa”) and Positive Access Corporation (“Positive Access”). All intercompany balances and transactions have been eliminated upon consolidation.

2. SIGNIFICANT ACCOUNTING POLICIES

Cash and Cash Equivalents

Cash and cash equivalents include cash and highly liquid investments with original maturities of three months or less when purchased.

Allowance for Doubtful Accounts

The Company records its allowance for doubtful accounts based upon its assessment of various factors. The Company considers historical experience, the age of the accounts receivable balances, credit quality of the Company’s customers, current economic conditions and other factors that may affect customers’ ability to pay.

INTELLICHECK MOBILISA, INC.

NOTES TO FINANCIAL STATEMENTS

Inventory

Inventory is stated at the lower of cost or market and cost is determined using the first-in, first-out method. Inventory is primarily comprised of finished goods. As of December 31, 2015, the majority of our inventory related to Government and Commercial Identity products for intended near-term sales.

Long-Lived Assets and Impairment of Long-Lived Assets

The Company's long-lived assets include property and equipment, goodwill and intangible assets.

The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be fully recoverable in accordance with ASC topic 350 and ASC Topic 360 to determine recoverability of its long-lived assets, the Company evaluates the probability that future undiscounted net cash flows, without interest charges, will be less than the carrying amount of the assets. Impairment is measured at fair value.

Property and Equipment

Property and equipment are recorded at cost and are depreciated over their estimated useful lives ranging from three to ten-years using the straight-line method. Leasehold improvements are amortized utilizing the straight-line method over the lesser of the term of the lease or estimated useful life of the asset.

Goodwill

Goodwill represents the excess of acquisition cost over the fair value of net assets acquired in business combinations. Pursuant to ASC Topic 350, the Company tests goodwill for impairment on an annual basis in the fourth quarter, or between annual tests, in certain circumstances. Under guidance, the Company first assessed qualitative factors to determine whether it was necessary to perform the two-step quantitative goodwill impairment test. An entity is not required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. Events or changes in circumstances which could trigger an impairment review include macroeconomic conditions, industry and market conditions, cost factors, overall financial performance, other entity specific events and sustained decrease in share price.

The Company performed its annual impairment test of goodwill in the fourth quarter for the years ended December 31, 2015 and 2014. For the year ended December 31, 2015, the Company determined no impairment charge was required. For the year ended December 31, 2014, the Company recognized an impairment charge of \$4,207,000. See Note 5 for further details.

Intangible Assets

Intangible assets include trade names, patents, developed technology and non-contractual customer relationships as described more fully in Note 5. The Company uses the straight line method to amortize these assets over their estimated useful lives. The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be fully recoverable in accordance with ASC Topic 360. To determine recoverability of its long-lived assets, the Company evaluates the probability that future undiscounted net cash flows, without interest charges, will be less than the carrying amount of the assets. Impairment is measured at fair value. No impairments were recognized during the years ended December 31, 2015 and 2014.
