Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission file number 001-33393

GENCO SHIPPING & TRADING LIMITED

(Exact name of registrant as specified in its charter)

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-Q

Republic of the Marshall Islands 98-043-9758
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

299 Park Avenue, 12th Floor, New York, New York 10171

(Address of principal executive offices) (Zip Code)

(646) 443-8550

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	Accelerated filer	Non-accelerated filer	Smaller reporting company
		(Do not check if a smaller reporting company)	Emerging growth company

If emerging growth company, indicate by checkmark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards pursuant to Section 13(a) of the Exchange Act

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes
No

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes No

The number of shares outstanding of each of the issuer's classes of common stock, as of August 8, 2018: Common stock, \$0.01 per share — 41,547,004 shares.

Genco Shipping & Trading Limited

(U.S. Dollars in Thousands, Except Per Share and Share Data)

Notes to Condensed Consolidated Financial Statements (unaudited)

1 - GENERAL INFORMATION

The accompanying condensed consolidated financial statements include the accounts of Genco Shipping & Trading Limited (“GS&T”) and its direct and indirect wholly-owned subsidiaries (collectively, the “Company”). The Company is engaged in the ocean transportation of drybulk cargoes worldwide through the ownership and operation of drybulk carrier vessels. GS&T is incorporated under the laws of the Marshall Islands, and as of June 30, 2018, is the direct or indirect owner of all of the outstanding shares or limited liability company interests of the following subsidiaries: Genco Ship Management LLC; Genco Investments LLC; Genco RE Investments LLC; Genco Shipping Pte. Ltd.; Genco Shipping A/S; Baltic Trading Limited; and the ship-owning subsidiaries as set forth below under “Other General Information.” As of June 30, 2018, Genco Ship Management LLC is the sole owner of all of the outstanding limited liability company interests of Genco Management (USA) LLC (“Genco (USA)”).

On June 19, 2018, the Company closed an equity offering of 7,015,000 shares of common stock at an offering price of \$16.50 per share. The Company received net proceeds of \$109,675 after deducting underwriters’ discounts and commissions and other expenses.

On November 15, 2016, the Company entered into stock purchase agreements (the “Purchase Agreements”) effective as of October 4, 2016 with funds or related entities managed Centerbridge Partners, L.P. or its affiliates (“Centerbridge”), Strategic Value Partners, LLC (“SVP”) and Apollo Global Management, LLC (“Apollo”). Pursuant to the Purchase Agreements, the Company completed the private placement of 27,061,856 shares of Series A Convertible Preferred Stock (“Series A Preferred Stock”) which included 25,773,196 shares at a price per share of \$4.85 and an additional 1,288,660 shares issued as a commitment fee on a pro rata basis. The Company received net proceeds of \$120,789 after deducting placement agents’ fees and expenses. On January 4, 2017, the Company’s shareholders approved at a Special Meeting of Shareholders the issuance of up to 27,061,856 shares of common stock of the Company upon the conversion of shares of the Series A Preferred Stock, par value \$0.01 per share, which were purchased by certain investors in a private placement (the “Conversion Proposal”). As a result of shareholder approval of the Conversion Proposal, all outstanding 27,061,856 shares of Series A Preferred Stock were automatically and mandatorily converted into 27,061,856 shares of common stock of the Company on January 4, 2017.

Other General Information

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-Q

Below is the list of the Company's wholly owned ship-owning subsidiaries as of June 30, 2018, together with the subsidiaries we subsequently formed to own the vessels we have agreed to purchase as disclosed in Note 4 — Vessel Acquisitions and Dispositions and Note 16 — Subsequent Events:

- (1) The delivery date for these vessels represents the date that the vessel was purchased from Baltic Trading Limited (“Baltic Trading”).
- (2) The delivery date for these vessels represents the date that the vessel was delivered to Baltic Trading.
- (3) Built dates and dates for vessel being delivered in the future are estimates based on guidance received from the respective sellers.
- (4) The Genco Surprise was sold on August 7, 2018. Refer to Note 16 — Subsequent Events.

2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation

The accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) which includes the accounts of GS&T and its direct and indirect wholly-owned subsidiaries, including Baltic Trading. All intercompany accounts and transactions have been eliminated in consolidation.

Table of Contents

Basis of presentation

The accompanying condensed consolidated financial statements have been prepared in accordance with U.S. GAAP for interim financial information and the rules and regulations of the Securities and Exchange Commission (the “SEC”). In the opinion of management of the Company, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position and operating results have been included in the statements. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the financial statements and notes thereto included in the Company’s annual report on Form 10-K for the year ended December 31, 2017 (the “2017 10-K”). The results of operations for the three and six months ended June 30, 2018 are not necessarily indicative of the operating results to be expected for the year ending December 31, 2018.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include vessel valuations, the valuation of amounts due from charterers, performance claims, residual value of vessels, useful life of vessels and the fair value of derivative instruments, if any. Actual results could differ from those estimates.

Segment reporting

The Company reports financial information and evaluates its operations by charter revenues and not by the length of ship employment for its customers, i.e., spot or time charters. Each of the Company’s vessels serve the same type of customer, have similar operations and maintenance requirements, operate in the same regulatory environment, and are subject to similar economic characteristics. Based on this, the Company has determined that it operates in one reportable segment which is engaged in the ocean transportation of drybulk cargoes worldwide through the ownership and operation of drybulk carrier vessels.

Restricted cash

Current and non-current restricted cash includes cash that is restricted pursuant to our credit facilities. Refer to Note 7 — Debt. The following table provides a reconciliation of cash, cash equivalents and restricted cash reported within the Condensed Consolidated Balance Sheets that sum to the total of the same amounts shown in the Condensed Consolidated Statements of Cash Flows:

	June 30, 2018	December 31, 2017	June 30, 2017	December 31, 2016
Cash and cash equivalents	\$ 269,996	\$ 174,479	\$ 147,153	\$ 133,400
Restricted cash - current	—	7,234	8,335	8,242
Restricted cash - noncurrent	315	23,233	25,507	27,426
Cash, cash equivalents and restricted cash	\$ 270,311	\$ 204,946	\$ 180,995	\$ 169,068

Inventories

Inventories consists of consumable bunkers and lubricants, which are stated at the lower of cost or market value, if required. During the three months ended March 31, 2018, the Company opted to break out these inventory assets that were previously classified as Prepaid expenses and other current assets into its own financial statement line item in the Condensed Consolidated Balance Sheets to provide a greater level of detail in the face of the financial statements. Inventories have been increasing as the result of the employment of vessels on spot market voyage charters, which result in higher bunker inventories. This change was made retrospectively for comparability purposes, and there was no effect on the Total current assets as of June 30, 2018 and December 31, 2017 in the Condensed Consolidated Balance Sheets.

Table of Contents

Vessels held for sale

On June 27, 2018, the Company reached agreements to sell the Genco Explorer and Genco Progress and these vessel assets have been classified as held for sale in the Condensed Consolidated Balance Sheet as of June 30, 2018. Refer to Note 4 — Vessel Acquisitions and Dispositions for details of the agreements.

Vessels, net

Vessels, net is stated at cost less accumulated depreciation. Included in vessel costs are acquisition costs directly attributable to the acquisition of a vessel and expenditures made to prepare the vessel for its initial voyage. The Company also capitalizes interest costs for a vessel under construction as a cost which is directly attributable to the acquisition of a vessel. Vessels are depreciated on a straight-line basis over their estimated useful lives, determined to be 25 years from the date of initial delivery from the shipyard. Depreciation expense for vessels for the three months ended June 30, 2018 and 2017 was \$15,246 and \$16,892, respectively. Depreciation expense for vessels for the six months ended June 30, 2018 and 2017 was \$30,919 and \$33,598, respectively.

Depreciation expense is calculated based on cost less the estimated residual scrap value. The costs of significant replacements, renewals and betterments are capitalized and depreciated over the shorter of the vessel's remaining estimated useful life or the estimated life of the renewal or betterment. Undepreciated cost of any asset component being replaced that was acquired after the initial vessel purchase is written off as a component of vessel operating expense. Expenditures for routine maintenance and repairs are expensed as incurred. Scrap value is estimated by the Company by taking the estimated scrap value of \$310 per lightweight ton ("lwt") times the weight of the ship noted in lwt.

Deferred revenue

Deferred revenue primarily relates to cash received from charterers prior to it being earned. These amounts are recognized as income when earned. Additionally, deferred revenue includes estimated customer claims mainly due to time charter performance issues. As of June 30, 2018 and December 31, 2017, the Company had an accrual of \$359 and \$327, respectively, related to these estimated customer claims.

Revenue recognition

Since the Company's inception, revenues have been generated from time charter agreements, spot market voyage charters, pool agreements and spot market-related time charters. A time charter involves placing a vessel at the charterer's disposal for a set period of time during which the charterer may use the vessel in return for the payment by the charterer of a specified daily hire rate, including any ballast bonus payments received pursuant to the time charter agreement. Spot market-related time charters are the same as other time charter agreements, except the time charter rates are variable and are based on a percentage of the average daily rates as published by the Baltic Dry Index ("BDI"). Voyage revenues also include the sale of bunkers consumed during short-term time charters pursuant to the terms of the time charter agreement.

The Company records time charter revenues over the term of the charter as service is provided. Revenues are recognized on a straight-line basis as the average revenue over the term of the respective time charter agreement. The Company records spot market-related time charter revenues over the term of the charter as service is provided based on the rate determined based on the BDI for each respective billing period. As such, the revenue earned by the Company's vessels that are on spot market-related time charters is subject to fluctuations of the spot market.

Under pool arrangements, the vessels operate under a time charter agreement whereby the cost of bunkers and port expenses are borne by the pool and operating costs including crews, maintenance and insurance are typically paid by the owner of the vessel. Since the members of the pool share in the revenue less voyage expenses generated by the entire group of vessels in the pool, and the pool operates in the spot market, the revenue earned by these vessels is subject to the fluctuations of the spot market. The Company recognizes revenue from these pool arrangements based on its portion

Table of Contents

of the net distributions reported by the relevant pool, which represents the net voyage revenue of the pool after voyage expenses and pool manager fees.

Pursuant to the new revenue recognition guidance as disclosed in Note 12 — Voyage Revenue, which was adopted during the three months ended March 31, 2018, revenue for spot market voyage charters is now recognized ratably over the total transit time of each voyage, which commences at the time the vessel arrives at the loading port and ends at the time the discharge of cargo is completed at the discharge port.

Voyage expense recognition

In time charters, spot market-related time charters and pool agreements, operating costs including crews, maintenance and insurance are typically paid by the owner of the vessel and specified voyage costs such as fuel and port charges are paid by the charterer. These expenses are borne by the Company during spot market voyage charters. As such, there are significantly higher voyage expenses for spot market voyage charters as compared to time charters, spot market-related time charters and pool agreements. Refer to Note 12 — Voyage Revenue for further discussion of the accounting for fuel expenses for spot market voyage charters as a result of the new revenue recognition guidance adopted during the three months ended March 31, 2018. There are certain other non-specified voyage expenses, such as commissions, which are typically borne by the Company. At the inception of a time charter, the Company records the difference between the cost of bunker fuel delivered by the terminating charterer and the bunker fuel sold to the new charterer as a gain or loss within voyage expenses. Additionally, the Company records lower of cost or market adjustments to re-value the bunker fuel on a quarterly basis, as required. These differences in bunkers, including any lower of cost or market adjustments, resulted in a net gain of \$1,034 and \$1,440 during the three months ended June 30, 2018 and 2017, respectively, and \$1,889 and \$935 during the six months ended June 30, 2018 and 2017, respectively. Additionally, voyage expenses include the cost of bunkers consumed during short-term time charters pursuant to the terms of the time charter agreement.

United States Gross Transportation Tax

The Company did not qualify for the Section 883 exemption for the year ended December 31, 2017 and believes that it will not qualify for the Section 883 exemption for the year ended December 31, 2018. In the absence of the exemption, 50% of the Company's gross shipping income attributable to transportation beginning or ending in the U.S. (but not both beginning and ending in the U.S.) will be subject to a 4% tax without allowance for deductions (the "U.S. gross transportation tax"). The Company has recorded estimated U.S. gross transportation tax of \$167 and \$61 during the three months ended June 30, 2018 and 2017, respectively, and \$380 and \$97 during the six months ended June 30, 2018 and 2017, respectively. U.S. gross transportation tax has been recorded in Voyage expenses in the Condensed Consolidated Statements of Operation.

Charter hire expenses

During the second quarter of 2018, the Company began chartering-in third-party vessels. The costs to charter-in these vessels, which primarily include the daily charter hire rate net of commissions, are recorded as Charter hire expenses.

Impairment of vessel assets

During the three months ended June 30, 2018 and 2017, the Company recorded \$184 and \$3,339, respectively, related to the impairment of vessel assets in accordance with Accounting Standards Codification (“ASC”) 360 — “Property, Plant and Equipment” (“ASC 360”). Additionally, during the six months ended June 30, 2018 and 2017, the Company recorded \$56,586 and \$3,339, respectively, related to the impairment of vessel assets in accordance with ASC 360.

On July 24, 2018, the Company entered into an agreement to sell the Genco Surprise, a 1998-built Panamax vessel, for \$5,300 less a 3.0% broker commission payable to a third party. As the anticipated undiscounted cash flows, including the net sales price, did not exceed the net book value of the vessel as of June 30, 2018, the vessel value for the

Table of Contents

Genco Surprise was adjusted to its net sales price of \$5,141 as of June 30, 2018. This resulted in an impairment loss of \$184 during the three and six months ended June 30, 2018. Refer to Note 16 — Subsequent Events for further detail regarding the sale.

On February 27, 2018, the Board of Directors determined to dispose of the Company's following nine vessels; the Genco Cavalier, the Genco Loire, the Genco Lorraine, the Genco Muse, the Genco Normandy, the Baltic Cougar, the Baltic Jaguar, the Baltic Leopard and the Baltic Panther, at times and on terms to be determined in the future. Given this decision, and that the estimated future undiscounted cash flows for each of these older vessels did not exceed the net book value for each vessel, we have adjusted the values of these older vessels to their respective fair market values during the three months ended March 31, 2018. This resulted in an impairment loss of \$56,402 during the six months ended June 30, 2018.

At June 30, 2017, the Company determined that the sum of the estimated undiscounted future cash flows attributable to the Genco Surprise did not exceed the carrying value of the vessel at June 30, 2017 and reduced the carrying value of the Genco Surprise, a 1998-built Panamax vessel, to its fair market value as of June 30, 2017. This resulted in an impairment loss of \$3,339 during the three and six months ended June 30, 2017.

Gain on sale of vessels

There were no gains related to the sale of the vessels recorded during the three and six months ended June 30, 2018.

During the three and six months ended June 30, 2017, the Company recorded a net gain of \$1,343 and \$7,712, respectively, related to the sale of vessels. The net gain of \$1,343 recorded during the three months ended June 30, 2017 related primarily to the sale of the Genco Prosperity and the net gain of \$7,712 recorded during the six months ended June 30, 2017 related primarily to the sale of the Genco Wisdom, the Genco Reliance, the Genco Carrier, the Genco Success and the Genco Prosperity.

Loss on debt extinguishment

During the three and six months ended June 30, 2018, the Company recorded \$4,533 related to the loss on the extinguishment of debt in accordance with ASC 470-50 — "Debt – Modifications and Extinguishments" ("ASC 470-50"). This loss was recognized as a result of the refinancing of the \$400 Million Credit Facility, the \$98 Million Credit Facility and the 2014 Term Loan Facilities with the \$460 Million Credit Facility on June 5, 2018 as described in Note 7 — Debt.

Recent accounting pronouncements

In May 2017, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2017-09, “Compensation – Stock Compensation (Topic 718), Scope of Modification Account” (“ASU 2017-09”). This ASU provides guidance on determining which changes to the terms and conditions of share-based payment awards require an entity to apply modification accounting. This ASU is effective for fiscal years beginning after December 15, 2017, and for interim periods within those years and early adoption is permitted. ASU 2017-09 must be applied prospectively to an award modified on or after the adoption date. The Company adopted ASU 2017-09 during the first quarter of 2018 and there was no effect on its consolidated financial statements.

In November 2016, the FASB issued ASU No. 2016-18, “Statement of Cash Flows (Topic 230): Restricted Cash” (“ASU 2016-18”). This ASU adds or clarifies the guidance in ASC 230 – Statement of Cash Flows regarding the classification and presentation of restricted cash in the statement of cash flows. ASU 2016-18 requires entities to show the changes in the total of cash, cash equivalents, restricted cash and restricted cash equivalents in the statement of cash flow. This ASU is effective for fiscal years beginning after December 15, 2017, and for interim periods within those years and early adoption is permitted. ASU 2016-18 must be adopted retrospectively. The Company early adopted ASU 2016-18 during the fourth quarter of 2017. The retrospective application of ASU 2016-18 resulted in restricted cash being reclassified as a component of cash, cash equivalents and restricted cash in the Condensed Consolidated Statements of Cash Flows for the six months ended June 30, 2017.

Table of Contents

In August 2016, the FASB issued ASU No. 2016-15, “Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments” (“ASU 2016-15”). This ASU adds or clarifies the guidance in ASC 230 – Statement of Cash Flows regarding the classification of certain cash receipts and payments in the statement of cash flows. This ASU is effective for fiscal years beginning after December 15, 2017, and for interim periods within those years and early adoption is permitted. This ASU shall be applied retrospectively to all periods presented, but may be applied prospectively from the earliest date practicable if retrospective application would be impracticable. The Company adopted ASU 2016-15 during the first quarter of 2018. The retrospective application of ASU 2016-15 resulted in insurance proceeds for protection and indemnity claims and loss of hire claims to be separately disclosed in the cash flows from operating activities and resulted in insurance proceeds for hull and machinery claims to be separately disclosed in the cash flows from investing activities. These amounts were previously recorded in the cash flows from operating activities as the change in prepaid expenses and other current assets. Additionally, as part of ASU 2016-15, any cash payments for debt prepayment or debt extinguishment costs (including third-party costs, premiums paid and other fees paid to lenders) must be classified as cash outflows for financing activities. Lastly, for any debt instruments that contain interest payable in-kind, any cash payments attributable to the payment of in-kind interest will be classified as cash outflows for operating activities. There were no cash payments for in-kind interest during the six months ended June 30, 2017. Refer to the Condensed Consolidated Statements of Cash Flows.

In February 2016, the FASB issued ASU No. 2016-02, “Leases (Topic 842),” which replaces the existing guidance in ASC 840 – Leases. This ASU requires a dual approach for lessee accounting under which a lessee would account for leases as finance leases or operating leases. Both finance leases and operating leases will result in the lessee recognizing a right-of-use asset and a corresponding lease liability for leases with lease terms of more than twelve months. For finance leases, the lessee would recognize interest expense and amortization of the right-of-use asset and for operating leases, the lessee would recognize a straight-line total lease expense. Accounting by lessors will remain largely unchanged from current U.S. GAAP. The requirements of this standard include an increase in required disclosures. This ASU is effective for fiscal years beginning after December 15, 2018, and for interim periods within those fiscal years. Lessees and lessors will be required to apply the new standard at the beginning of the earliest period presented in the financial statements in which they first apply the new guidance, using a modified retrospective transition method. The requirements of this standard include a significant increase in required disclosures. The Company is currently evaluating the impact of this adoption on its consolidated financial statements and related disclosures.

In January 2016, the FASB issued ASU No. 2016-01, “Recognition and Measurement of Financial Assets and Financial Liabilities” (“ASU 2016-01”). This ASU requires that equity investments be measured at fair value with changes in fair value recognized in net income (loss). ASU 2016-01 is effective for annual periods beginning after December 15, 2017, and interim periods within those years. The Company adopted ASU 2016-01 during the first quarter of 2018 and there was no impact on the Company’s consolidated financial statements as the Company currently does not have any equity investments.

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers” (“ASU 2014-09”), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle is that a company should recognize revenue when promised goods or services are transferred to customers in an amount that reflects the

consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five-step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP. The standard is effective for annual periods beginning after December 15, 2017, and interim periods therein, and shall be applied either retrospectively to each period presented or as a cumulative effect adjustment as of the date of adoption (the “modified retrospective transition method”). In May 2016 and, the FASB issued ASU No. 2016-12, “Revenue from Contracts with Customers - Narrow Scope Improvements and Practical Expedients.” This update provides further guidance on applying collectability criterion to assess whether the contract is valid and represents a substantive transaction on the basis whether a customer has the ability and intention to pay the promised consideration. The requirements of this standard include an increase in required disclosures. The Company adopted ASU 2014-09 during the first quarter of 2018 using the modified retrospective transition method applied to those spot market voyage charter contracts which were not completed as of January 1, 2018. Upon adoption, the Company recognized the cumulative effect of adopting this guidance as an adjustment to its opening balance of retained earnings as of January 1, 2018. Prior periods were not retrospectively

Table of Contents

adjusted. The adoption of ASU 2014-09 did not have a financial impact on the recognition of revenue generated from time charter agreements, spot market-related time charters and pool agreements. Refer to Note 12 — Voyage Revenue for further discussion of the financial impact on the Company's consolidated financial statements.

3 - CASH FLOW INFORMATION

For the six months ended June 30, 2018, the Company had non-cash investing activities not included in the Condensed Consolidated Statement of Cash Flows for items included in Accounts payable and accrued expenses consisting of \$135 for the Purchase of vessels, including deposits, and \$97 for the Purchase of other fixed assets. For the six months ended June 30, 2018, the Company had non-cash financing activities not included in the Condensed Consolidated Statement of Cash Flows for items included Accounts payable and accrued expenses consisting of \$162 for the Payment of deferred financing fees and \$526 for the Payment of common stock issuance costs.

For the six months ended June 30, 2017, the Company had non-cash investing activities not included in the Condensed Consolidated Statement of Cash Flows for items included in Accounts payable and accrued expenses consisting of \$9 for the Purchase of vessels, including deposits, and \$52 for the Purchase of other fixed assets.

During the six months ended June 30, 2018 and 2017, cash paid for interest was \$14,061 and \$12,174, respectively, excluding the PIK interest paid as a result of the refinancing of the \$400 Million Credit Facility. Refer to Note 7 — Debt.

During the six months ended June 30, 2018 and 2017, there was no cash paid for estimated income taxes.

On May 15, 2018, the Company issued 14,268 restricted stock units to certain members of the Board of Directors. The aggregate fair value of these restricted stock units was \$255.

On February 27, 2018, the Company issued 37,346 restricted stock units and options to purchase 122,608 shares of the Company's stock at an exercise price of \$13.69 to certain individuals. The fair value of these restricted stock units and stock options were \$512 and \$926, respectively.

On May 17, 2017, the Company issued 25,197 restricted stock units to certain members of the Board of Directors. The aggregate fair value of these restricted stock units was \$255.

On March 23, 2017, the Company issued 292,398 restricted stock units and options to purchase 133,000 shares of the Company's stock at an exercise price of \$11.13 per share to John C. Wobensmith, Chief Executive Officer and President. The fair value of these restricted stock units and stock options were \$3,254 and \$853, respectively.

Refer to Note 14 — Stock-Based Compensation for further information regarding the aforementioned grants.

The Company adopted ASU 2016-15 during the first quarter of 2018 as noted in Note 2 — Summary of Significant Accounting Policies. The retrospective application of ASU 2016-15 resulted in insurance proceeds for protection and indemnity claims and loss of hire claims for the six months ended June 30, 2017 to be separately disclosed in the cash flows from operating activities and resulted in insurance proceeds for hull and machinery claims to be separately disclosed in the cash flows from investing activities. These amounts were previously recorded in the cash flows from operating activities as the change in prepaid expense and other current assets. The cash flow information for the six months ended June 30, 2017 has been updated to reflect the adoption of ASU 2016-15 as presented in the table below:

	As Reported June 30, 2017	As Adjusted June 30, 2017	Effect of Change
Cash Flow Data:			
Net cash used in operating activities (1)	\$ (585)	\$ (1,169)	\$ 584
Net cash provided by investing activities (1)	15,196	15,780	(584)

Table of Contents

- (1) Insurance proceeds reclassified from operating activities to investing activities as a result of the Company's adoption of ASU 2016-15 for the six months ended June 30, 2017 was \$584.

4 - VESSEL ACQUISITIONS AND DISPOSITIONS

On June 27, 2018, the Company reached agreements to sell the Genco Explorer and the Genco Progress, both 1999-built Handysize vessels, to a third party for \$5,600 each less a 3.0% broker commission payable to a third party. The sales are expected to be completed during the fourth quarter of 2018. These vessels do not serve as collateral under any of the Company's credit facilities, therefore the Company is not required to pay down any indebtedness with the proceeds from the sales. The sales are subject to completion of definitive documentation and customary conditions. These vessel assets have been classified as held for sale in the Condensed Consolidated Balance Sheet as of June 30, 2018.

On June 6, 2018, the Company entered into an agreement for the en bloc purchase of four drybulk vessels including two Capesize drybulk vessels and two Ultramax drybulk vessels for approximately \$141,000. Each vessel was built with a fuel-saving "eco" engine. The Genco Weatherly, a 2014-built Ultramax vessel, was delivered on July 26, 2018. The remaining three vessels, which are to be renamed the Genco Columbia, the Genco Endeavour and the Genco Resolute, are expected to be delivered to the Company during the third quarter of 2018. As of June 30, 2018, there is \$885 deposits on vessels related to these vessels. The Company intends to use a combination of cash on hand and proceeds from the Company's anticipated new credit facility to finance or reimburse to the Company a portion of the purchase price as described in Note 16 — Subsequent Events.

On December 19, 2016, the Board of Directors unanimously approved selling the Genco Prosperity, a 1997-built Handymax vessel, and on December 21, 2016, the Company reached an agreement to sell the Genco Prosperity to a third party for \$3,050 less a 3.5% broker commission payable to a third party. The sale was completed on May 16, 2017.

On December 5, 2016, the Board of Directors unanimously approved selling the Genco Success, a 1997-built Handymax vessel, and on December 15, 2016, the Company reached an agreement to sell the Genco Success to a third party for \$2,800 less a 3.0% broker commission payable to a third party. The sale was completed on March 19, 2017.

During January 2017, the Board of Directors unanimously approved selling the Genco Carrier, a 1998-built Handymax vessel, and on January 25, 2017, the Company reached an agreement to sell the Genco Carrier to a third party for \$3,560 less a \$92 broker commission payable to a third party. The sale was completed on February 16, 2017.

During January 2017, the Board of Directors unanimously approved selling the Genco Reliance, a 1999-built Handysize vessel, and on January 12, 2017, the Company reached an agreement to sell the Genco Reliance to a third party for \$3,500 less a 3.5% broker commission payable to a third party. The sale was completed on February 9, 2017.

On December 19, 2016, the Board of Directors unanimously approved selling the Genco Wisdom, a 1997-built Handymax vessel. On December 21, 2016, the Company reached an agreement to sell the Genco Wisdom to a third party for \$3,250 less a 3.5% broker commission payable to a third party. The sale was completed on January 9, 2017.

Refer to Note 1 — General Information for a listing of the delivery dates for the vessels in the Company's fleet and the estimated delivery dates for vessels for which the Company has entered into agreements to purchase.

5 - NET LOSS PER SHARE

The computation of basic net loss per share is based on the weighted-average number of common shares outstanding during the reporting period. The computation of diluted net loss per share assumes the vesting of nonvested stock awards and the exercise of stock options (refer to Note 14 — Stock-Based Compensation), for which the assumed proceeds upon vesting are deemed to be the amount of compensation cost attributable to future services and are not yet recognized using the treasury stock method, to the extent dilutive. Of the 253,438 and 340,455 nonvested shares and RSUs outstanding and the 255,608 and 133,000 stock options outstanding at June 30, 2018 and 2017, respectively, (refer

Table of Contents

to Note 14 — Stock-Based Compensation), all are anti-dilutive. The Company's diluted net loss per share will also reflect the assumed conversion of the equity warrants issued when the Company emerged from bankruptcy on July 9, 2014 (the "Effective Date") and MIP Warrants issued by the Company (refer to Note 14 — Stock-Based Compensation) if the impact is dilutive under the treasury stock method. The equity warrants have a 7-year term which commenced on the day following the Effective Date and are exercisable for one tenth of a share of the Company's common stock. Of the 0 and 713,122 of unvested MIP Warrants outstanding at June 30, 2018 and 2017, respectively, and 3,936,761 of equity warrants outstanding at June 30, 2018 and 2017, all are anti-dilutive.

The components of the denominator for the calculation of basic and diluted net loss per share are as follows:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2018	2017	2018	2017
Common shares outstanding, basic:				
Weighted-average common shares outstanding, basic	35,516,058	34,430,766	35,049,615	33,965,835
Common shares outstanding, diluted:				
Weighted-average common shares outstanding, basic	35,516,058	34,430,766	35,049,615	33,965,835
Dilutive effect of warrants	—	—	—	—
Dilutive effect of stock options	—	—	—	—
Dilutive effect of restricted stock awards	—	—	—	—
Weighted-average common shares outstanding, diluted	35,516,058	34,430,766	35,049,615	33,965,835

6 - RELATED PARTY TRANSACTIONS

During the three and six months ended June 30, 2018 and 2017, the Company did not identify any related party transactions.

As of June 30, 2018 and December 31, 2017, \$16,063 and \$9,032 of deferred financing costs, respectively, were presented as a direct deduction within the outstanding debt balance in the Company's Condensed Consolidated Balance Sheet. Amortization expense for deferred financing costs was \$666 and \$580 for the three months ended June 30, 2018 and 2017, respectively, and \$1,239 and \$1,153 for the six months ended June 30, 2018 and 2017, respectively. This amortization expense is recorded as a component of Interest expense in the Condensed Consolidated Statements of Operations.

Effective June 5, 2018, the portion of the unamortized deferred financing costs for the \$400 Million Credit Facility and 2014 Term Loan Facilities that was identified as a debt modification, rather than an extinguishment of debt, is being amortized over the life of the \$460 Million Credit Facility in accordance with ASC 470-50.

\$460 Million Credit Facility

On May 31, 2018, the Company entered into a five-year senior secured credit facility for an aggregate amount of up to \$460,000 (the "\$460 Million Credit Facility") with Nordea Bank AB (publ), New York Branch ("Nordea"), as Administrative Agent and Security Agent, the various lenders party thereto, and Nordea, Skandinaviska Enskilda Banken AB (publ), ABN AMRO Capital USA LLC, DVB Bank SE, Crédit Agricole Corporate & Investment Bank, and Danish Ship Finance A/S as Bookrunners and Mandated Lead Arrangers. Deutsche Bank AG Filiale Deutschlandgeschäft, and CTBC Bank Co. Ltd. are Co-Arrangers under the \$460 Million Credit Facility. On June 5, 2018, proceeds of \$460,000 under the \$460 Million Credit Facility were used, together with cash on hand, to refinance all of the Company's existing credit facilities (the \$400 Million Credit Facility, \$98 Million Credit Facility and 2014 Term Loan Facilities, as defined below) into one facility, and pay down the debt on seven of the Company's oldest vessels, which have been identified for sale.

As of June 30, 2018, there was no availability under the \$460 Million Credit Facility. Total debt repayments of \$0 were made during the three and six months ended June 30, 2018 and 2017, respectively, under the \$460 Million Credit Facility. As of June 30, 2018 and December 31, 2017, the total outstanding net debt balance was \$443,937 and \$0,

respectively.

The \$460 Million Credit Facility provides for the following key terms:

- The final maturity date of the \$460 Million Credit Facility is May 31, 2023.
- Borrowings under the \$460 Million Credit Facility will bear interest at the London Interbank Offered Rate (“LIBOR”) plus 3.25% through December 31, 2018 and LIBOR plus a range of 3.00% and 3.50% thereafter, dependent upon the Company’s ratio of total net indebtedness to the last twelve months EBITDA. Schedule amortization payments are \$15,000 per quarter commencing on December 31, 2018, with a final payment of \$190,000 due on the maturity date.
- Scheduled amortization payments may be recalculated upon the Company’s request based on changes in collateral vessels, prepayments of the loan made as a result of a collateral vessel disposition as part of the

Table of Contents

Company's fleet renewal program, or voluntary prepayments, subject in each case to a minimum repayment profile under which the loan will be repaid to nil when the average age of the vessels serving as collateral from time to time reaches 17 years. Mandatory prepayments are applied to remaining amortization payments pro rata, while voluntary prepayments are applied to remaining amortization payments in order of maturity.

- Acquisitions and additional indebtedness are allowed subject to compliance with financial covenants, a collateral maintenance test, and other customary conditions.
- Dividends may be paid after December 31, 2018 (or potentially earlier if the Company elects to change the date of its first amortization payment due December 31, 2018 to an earlier date) subject to customary conditions and a limitation of 50% of consolidated net income for the quarter preceding such dividend payment if the collateral maintenance test ratio is 200% or less for such quarter.
- Collateral vessels can be sold or disposed of without prepayment of the loan if a replacement vessel or vessels meeting certain requirements are included as collateral within 120 days of such sale or disposition. In addition:
 - we must be in compliance with the collateral maintenance test;
 - the replacement vessels must become collateral for the loan; and either
 - the replacement vessels must have an equal or greater appraised value than the collateral vessels for which they are substituted, or
 - ratio of the aggregate appraised value of the collateral vessels (including replacement vessels) to the outstanding loan amount after the collateral disposition (accounting for any prepayments of the loan by the time the replacement vessels become collateral vessels) must equal or exceed the aggregate appraised value of the collateral vessels to the outstanding loan before the collateral disposition.
- Key financial covenants include:
 - minimum liquidity, with unrestricted cash and cash equivalents to equal or exceed the greater of \$30 million and 7.5% of total indebtedness (no restricted cash is required);
 - minimum working capital, with consolidated current assets (excluding restricted cash) minus consolidated current liabilities (excluding the current portion of long-term indebtedness) to be not less than zero;
 - debt to capitalization, with the ratio of total indebtedness to total capitalization to be not more than 70%; and

- collateral maintenance, with the aggregate appraised value of collateral vessels to be at least 135% of the principal amount of the loan outstanding under the \$460 Million Credit Facility.
- Collateral includes the current vessels in the Company's fleet other than the seven oldest vessels in the fleet which have been identified for sale, collateral vessel earnings and insurance, and time charters in excess of 24 months in respect of the collateral vessels.

As of June 30, 2018, the Company believed it was in compliance with all of the financial covenants under the \$460 Million Credit Facility.

Table of Contents

\$400 Million Credit Facility

On November 10, 2016, the Company entered into a senior secured term loan facility, the \$400 Million Credit Facility, in an aggregate principal amount of up to \$400,000 with Nordea Bank Finland plc, New York Branch, Skandinaviska Enskilda Banken AB (publ), DVB Bank SE, ABN AMRO Capital USA LLC, Crédit Agricole Corporate and Investment Bank, Deutsche Bank AG Filiale Deutschlandgeschäft, Crédit Industriel et Commercial and BNP Paribas. On November 15, 2016, the proceeds under the \$400 Million Credit Facility were used to refinance six of the Company's prior credit facilities. The \$400 Million Credit Facility was collateralized by 45 of the Company's vessels and at December 31, 2016, required the Company to sell five remaining unencumbered vessels, which were sold during the year ended December 31, 2017. Refer to Note 4 — Vessel Acquisitions and Dispositions. On November 14, 2016, the Company borrowed the maximum available amount of \$400,000.

The \$400 Million Credit Facility had maturity date of November 15, 2021, and the principal borrowed under the facility bore interest at the LIBOR for an interest period of three months plus a margin of 3.75%. The Company had the option to pay 1.50% of such rate in-kind ("PIK interest") through December 31, 2018, of which was payable on the maturity date of the facility. The Company opted to make the PIK interest election through September 29, 2017 and as of June 30, 2018 and December 31, 2017, had recorded \$0 and \$5,341 of PIK interest which was recorded in Long-term debt in the Condensed Consolidated Balance Sheet as of December 31, 2017. The \$400 Million Credit Facility originally had scheduled amortization payments of (i) \$100 per quarter through December 31, 2018, (ii) \$7,610 per quarter from March 31, 2019 through December 31, 2020, (iii) \$18,571 per quarter from March 31, 2021 through September 30, 2021 and (iv) \$282,605 upon final maturity on November 15, 2021, which did not include PIK interest. Pursuant to the credit facility agreement, upon the payment of any excess cash flow to the lenders (see below), the scheduled repayments were adjusted to reflect the reduction of future amortization amounts.

There was no collateral maintenance testing for the \$400 Million Credit Facility prior to June 30, 2018. Thereafter, there was to be required collateral maintenance testing with a gradually increasing threshold calculated as the value of the collateral under the facility as a percentage of the loan outstanding as follows: 105% from June 30, 2018 to December 30, 2018, 115% from December 31, 2018 to December 30, 2020 and 135% thereafter.

The \$400 Million Credit Facility required the Company to comply with a number of covenants substantially similar to those in the Company's other credit facilities, including financial covenants related to debt to total book capitalization, minimum working capital, minimum liquidity, and dividends; collateral maintenance requirements (as described above); and other customary covenants. The Company was required to maintain a ratio of total indebtedness to total capitalization of not greater than 0.70 to 1.00 at all times. Minimum working capital as defined in the \$400 Million Credit Facility was not to be less than \$0 at all times. The \$400 Million Credit Facility had minimum liquidity requirements at all times for all vessels in its fleet of (i) \$250 per vessel to and including December 31, 2018, (ii) \$400 per vessel from January 1, 2019 to and including December 31, 2019 and (iii) \$700 per vessel from January 1, 2020 and thereafter. The Company was prohibited from paying dividends without lender consent through December 31, 2020. The Company was able establish non-recourse subsidiaries to incur indebtedness or make investments, but it was restricted from incurring indebtedness or making investments (other than through non-recourse subsidiaries). Excess cash from the collateralized vessels under the \$400 Million Credit Facility was subject to a cash sweep. The cash flow sweep was 100% of excess cash flow through December 31, 2018, 75% through December 31, 2020 and the lesser of 50% of excess cash flow or an amount that would reflect a 15-year average vessel age

repayment profile thereafter; provided no prepayment under the cash sweep was required from the first \$10,000 in aggregate of the prepayments otherwise required under the cash sweep. During the three and six months ended June 30, 2018, the Company repaid \$4,094 and \$15,428 , respectively, for the excess cash flow sweep.

At June 30, 2018 and December 31, 2017, the Company had deposited \$0 and \$11,180, respectively, that has been reflected as noncurrent restricted cash which represents restricted pledged liquidity amounts pursuant to the \$400 Million Credit Facility.

Total debt repayments of \$393,507 (which includes \$5,341 of PIK interest) and \$100 were made during the three months ended June 30, 2018 and 2017, respectively, and total debt repayments of \$404,941 (which includes \$5,341 of PIK interest) and \$200 were made during the six months ended June 30, 2018 and 2017, respectively, under the \$400 Million Credit Facility.

Table of Contents

On June 5, 2018, the \$400 Million Credit Facility was refinanced with the \$460 Million Credit Facility; refer to the “\$460 Million Credit Facility” section above. As of June 30, 2018 and December 31, 2017, the total outstanding net debt balance, including PIK interest as defined below, was \$0 and \$398,609, respectively.

\$98 Million Credit Facility

On November 4, 2015, thirteen of the Company’s wholly-owned subsidiaries entered into a Facility Agreement, by and among such subsidiaries as borrowers (collectively, the “Borrowers”); Genco Holdings Limited, a newly formed direct subsidiary of Genco of which the Borrowers are direct subsidiaries (“Holdco”); certain funds managed or advised by Hayfin Capital Management, Breakwater Capital Ltd, or their nominee, as lenders; and Hayfin Services LLP, as agent and security agent (the “\$98 Million Credit Facility”). The Borrowers borrowed the maximum available amount of \$98,271 under the facility on November 10, 2015.

Borrowings under the facility were available for working capital purposes. The facility had a final maturity date of September 30, 2020, and the principal borrowed under the facility bore interest at LIBOR for an interest period of three months plus a margin of 6.125% per annum. The facility had no fixed amortization payments for the first two years and fixed amortization payments of \$2,500 per quarter thereafter. To the extent the value of the collateral under the facility was 182% or less of the loan amount outstanding, the Borrowers were to prepay the loan from earnings received from operation of the thirteen collateral vessels after deduction of the following amounts: costs, fees, expenses, interest, and fixed principal repayments under the facility; operating expenses relating to the thirteen vessels; and the Borrowers’ pro rata share of general and administrative expenses based on the number of vessels they owned.

The Facility Agreement required the Borrowers and, in certain cases, the Company and Holdco to comply with a number of covenants substantially similar to those in the other credit facilities of Genco and its subsidiaries, including financial covenants related to maximum leverage, minimum consolidated net worth, minimum liquidity, and dividends; collateral maintenance requirements; and other customary covenants. The Company was prohibited from paying dividends under this facility until December 31, 2018. Following December 31, 2018, the amount of dividends the Company could pay was limited based on the amount of the repayment of at least \$25,000 of the loan under such facility, as well as the ratio of the value of vessels and certain other collateral pledged under such facility. The Facility Agreement included usual and customary events of default and remedies for facilities of this nature.

Borrowings under the facility were secured by first priority mortgage on the vessels owned by the Borrowers, namely the Genco Constantine, the Genco Augustus, the Genco London, the Genco Titus, the Genco Tiberius, the Genco Hadrian, the Genco Knight, the Genco Beauty, the Genco Vigour, the Genco Predator, the Genco Cavalier, the Genco Champion, and the Genco Charger, and related collateral. Pursuant to the Facility Agreement and a separate Guarantee executed by the Company, the Company and Holdco were acting as guarantors of the obligations of the

Borrowers and each other under the Facility Agreement and its related documentation.

On November 15, 2016, the Company entered into an Amending and Restating Agreement which amended and restated the credit agreements and the guarantee for the \$98 Million Credit Facility (the “Restated \$98 Million Credit Facility”). The Restated \$98 Million Credit Facility provided for the following: reductions in the minimum liquidity requirements consistent with the \$400 Million Credit Facility, except the minimum liquidity amount for the collateral vessels under this facility was \$750 per vessel, which was reflected as restricted cash; netting of certain amounts against the measurements of the collateral maintenance covenant, which remained in place with a 140% value to loan threshold; a portion of amounts required to be maintained under the minimum liquidity covenant for this facility may, under certain circumstances, have been used to prepay the facility to maintain compliance with the collateral maintenance covenant; elimination of the original maximum leverage ratio and minimum net worth covenants; and restrictions on incurring indebtedness, making investments (other than through non-recourse subsidiaries) or paying dividends, similar to those provided for in the \$400 Million Credit Facility. The minimum working capital and the total indebtedness to total capitalization were the same as the \$400 Million Credit Facility.

As of June 30, 2018 and December 31, 2017, the Company had deposited \$0 and \$7,234, respectively, that was reflected as current restricted cash. As of June 30, 2018 and December 31, 2017, the Company had deposited \$0 and

Table of Contents

\$11,738, respectively, that was reflected as noncurrent restricted cash. These amounts included certain restricted deposits associated with the Debt Service Account, Capex Account and minimum liquidity amount as defined in the \$98 Million Credit Facility.

Total debt repayments of \$91,397 and \$0 were made during the three months ended June 30, 2018 and 2017, respectively, and total debt repayments of \$93,939 and \$0 were made during the six months ended June 30, 2018 and 2017, respectively, under the \$98 Million Credit Facility.

On June 5, 2018, the \$98 Million Credit Facility was refinanced with the \$460 Million Credit Facility; refer to the “\$460 Million Credit Facility” section above. As of June 30, 2018 and December 31, 2017, the total outstanding net debt balance was \$0 and \$92,569, respectively.

2014 Term Loan Facilities

On October 8, 2014, Baltic Trading and its wholly-owned subsidiaries, Baltic Hornet Limited and Baltic Wasp Limited, each entered into a loan agreement and related documentation for a credit facility in a principal amount of up to \$16,800 with ABN AMRO Capital USA LLC and its affiliates (the “2014 Term Loan Facilities”) to partially finance the newbuilding Ultramax vessel that each subsidiary acquired, namely the Baltic Hornet and Baltic Wasp, respectively. Amounts borrowed under the 2014 Term Loan Facilities were not allowed to be reborrowed. The 2014 Term Loan Facilities had a ten-year term, and the facility amount was to be the lowest of 60% of the delivered cost per vessel, \$16,800 per vessel, and 60% of the fair market value of each vessel at delivery. The 2014 Term Loan Facilities were insured by the China Export & Credit Insurance Corporation (Sinasure) in order to cover political and commercial risks for 95% of the outstanding principal plus interest, which was recorded in deferred financing fees. Borrowings under the 2014 Term Loan Facilities bore interest at the three or six-month LIBOR rate plus an applicable margin of 2.50% per annum. Borrowings were to be repaid in 20 equal consecutive semi-annual installments of 1/24 of the facility amount plus a balloon payment of 1/6 of the facility amount at final maturity. Principal repayments commenced six months after the actual delivery date for each respective vessel.

Borrowings under the 2014 Term Loan Facilities were secured by liens on the vessels acquired with borrowings under these facilities, namely the Baltic Hornet and Baltic Wasp, and other related assets. The Company guaranteed the obligations of the Baltic Hornet and Baltic Wasp under the 2014 Term Loan Facilities.

On November 15, 2016, the Company entered into Supplemental Agreements with lenders under our 2014 Term Loan Facilities which, among other things, amended the Company’s collateral maintenance covenants under the 2014 Term Loan Facilities to provide that such covenants would not be tested through December 30, 2017 and the minimum collateral value to loan ratio was 100% from December 31, 2017, 105% from June 30, 2018, 115% from December 31, 2018 and 135% from December 31, 2019. These Supplemental Agreements also provided for certain other

amendments to the 2014 Term Loan Facilities, which included reductions in the minimum liquidity requirements consistent with the \$400 Million Credit Facility and restrictions on incurring indebtedness, making investments (other than through non-recourse subsidiaries) or paying dividends, similar to the \$400 Million Credit Facility. Additionally, the minimum working capital required was the same as under the \$400 Million Credit Facility. Lastly, the maximum leverage requirement was equivalent to the debt to total capitalization requirement in the \$400 Million Credit Facility.

Total debt repayments of \$24,863 and \$700 were made during the three months ended June 30, 2018 and 2017, respectively, and total debt repayments of \$25,544 and \$1,381 were made during the six months ended June 30, 2018 and 2017, respectively, under the 2014 Term Loan Facilities.

On June 5, 2018, the 2014 Term Loan Facilities were refinanced with the \$460 Million Credit Facility; refer to the “\$460 Million Credit Facility” section above. At June 30, 2018 and December 31, 2017, the total outstanding net debt balance was \$0 and \$24,214, respectively.

Table of Contents

Interest rates

The following table sets forth the effective interest rate associated with the interest expense for the Company's debt facilities noted above, including the cost associated with unused commitment fees, if applicable. The following table also includes the range of interest rates on the debt, excluding the impact of unused commitment fees, if applicable:

	For the Three Months Ended				For the Six Months Ended			
	June 30,		2017		June 30,		2017	
Effective Interest Rate	6.25	%	5.27	%	6.04	%	5.14	%
Range of Interest Rates (excluding unused commitment fees)	4.06 % to		3.50 % to		3.83 % to		3.36 % to	
	8.43	%	7.42	%	8.43	%	7.42	%

8 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair values and carrying values of the Company's financial instruments at June 30, 2018 and December 31, 2017 which are required to be disclosed at fair value, but not recorded at fair value, are noted below.

	June 30, 2018		December 31, 2017	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Cash and cash equivalents	\$ 269,996	\$ 269,996	\$ 174,479	\$ 174,479
Restricted cash	315	315	30,467	30,467
Floating rate debt	460,000	460,000	524,424	524,424

The carrying value of the borrowings under the \$460 Million Credit Facility as of June 30, 2018 and the \$400 Million Credit Facility, \$98 Million Credit Facility and the 2014 Term Loan Facilities as of December 31, 2017 approximate

their fair value due to the variable interest nature thereof as each of these credit facilities represent floating rate loans. Refer to Note 7 — Debt for further information regarding the Company's credit facilities. The \$460 Million Credit Facility was utilized to refinance the \$400 Million Credit Facility, \$98 Million Credit Facility and 2014 Term Loan Facilities on June 5, 2018. The carrying amounts of the Company's other financial instruments at June 30, 2018 and December 31, 2017 (principally Due from charterers and Accounts payable and accrued expenses) approximate fair values because of the relatively short maturity of these instruments.

ASC Subtopic 820-10, "Fair Value Measurements & Disclosures" ("ASC 820-10"), applies to all assets and liabilities that are being measured and reported on a fair value basis. This guidance enables the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The fair value framework requires the categorization of assets and liabilities into three levels based upon the assumption (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 requires significant management judgment. The three levels are defined as follows:

- Level 1—Valuations based on quoted prices in active markets for identical instruments that the Company is able to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these instruments does not entail a significant degree of judgment.
- Level 2—Valuations based on quoted prices in active markets for instruments that are similar, or quoted prices in markets that are not active for identical or similar instruments, and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Cash and cash equivalents and restricted cash are considered Level 1 items as they represent liquid assets with short-term maturities. Floating rate debt is considered to be a Level 2 item as the Company considers the estimate of

Table of Contents

rates it could obtain for similar debt or based upon transactions amongst third parties. Nonrecurring fair value measurements include vessel impairment assessments completed during the interim period and at year-end as determined based on third-party quotes, which are Level 2 inputs. During the three and six months ended June 30, 2018, the vessels assets for one and ten, respectively, of the Company's vessels were written down as part of the impairment recorded during the three and six months ended June 30, 2018, respectively. As of June 30, 2017, the vessel asset for the Genco Surprise was written down as part of the impairment recorded during the three and six months ended June 30, 2017. Refer to "Impairment of vessel assets" section in Note 2 — Summary of Significant Accounting Policies. The Company did not have any Level 3 financial assets or liabilities as of June 30, 2018 and December 31, 2017.

9 - PREPAID EXPENSES AND OTHER CURRENT ASSETS

Prepaid expenses and other current assets consist of the following:

	June 30, 2018	December 31, 2017
Vessel stores	\$ 667	\$ 642
Capitalized contract costs	665	—
Prepaid items	2,495	1,452
Insurance receivable	1,421	3,498
Other	2,123	1,746
Total prepaid expenses and other current assets	\$ 7,371	\$ 7,338

10 - FIXED ASSETS

Fixed assets, net consists of the following:

	June 30, 2018	December 31, 2017
Fixed assets, at cost:		
Vessel equipment	\$ 1,696	\$ 1,375
Furniture and fixtures	462	462
Computer equipment	180	180
Total costs	2,338	2,017

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-Q

Less: accumulated depreciation and amortization	(1,091)	(1,003)
Total fixed assets, net	\$ 1,247	\$ 1,014

Depreciation and amortization expense for fixed assets for the three months ended June 30, 2018 and 2017 was \$73 and \$68, respectively. Depreciation and amortization expense for fixed assets for the six months ended June 30, 2018 and 2017 was \$144 and \$136, respectively.

11 - ACCOUNTS PAYABLE AND ACCRUED EXPENSES

Accounts payable and accrued expenses consist of the following:

	June 30, 2018	December 31, 2017
Accounts payable	\$ 10,751	\$ 9,863
Accrued general and administrative expenses	3,733	2,978
Accrued vessel operating expenses	11,908	10,389
Total accounts payable and accrued expenses	\$ 26,392	\$ 23,230

Table of Contents

12 – VOYAGE REVENUE

Total voyage revenue includes revenue earned on fixed rate time charters, spot market voyage charters, spot market-related time charters and vessel pools, as well as the sale of bunkers consumed during short-term time charters. For the three months ended June 30, 2018 and 2017, the Company earned \$86,157 and \$45,370 of voyage revenue, respectively. Included in voyage revenue for the three months ended June 30, 2018 and 2017 was \$0 and \$942 of net profit sharing revenue, respectively. For the six months ended June 30, 2018 and 2017, the Company earned \$163,073 and \$83,619 of voyage revenue, respectively. Included in voyage revenue for the six months ended June 30, 2018 and 2017, the Company earned \$0 and \$2,324 of net profit sharing revenue, respectively.

On January 1, 2018 the Company adopted the revenue recognition guidance under ASU 2014-09 (refer to Note 2 — Summary of Significant Accounting Policies) using the modified retrospective method applied to contracts that were not completed as of January 1, 2018. The financial results for reporting periods beginning after January 1, 2018 are presented under the new guidance, while prior period amounts are not adjusted and will be continued to be reported under previous guidance.

As a result of the adoption of the new revenue recognition guidance on January 1, 2018, the Company recorded a net increase to the opening retained deficit of \$659 for the cumulative impact of adopting the new guidance. The impact related primarily to the change in accounting for spot market voyage charters. Prior to the adoption of the new guidance, revenue for spot market voyage charters was recognized ratably over the total transit time of the voyage, which previously commenced the latter of when the vessel departed from its last discharge port and when an agreement was entered into with the charterer, and ended at the time the discharge of cargo was completed at the discharge port. As a result of the adoption of the new guidance, revenue for spot market voyage charters is now being recognized ratably over the total transit time of the voyage which now begins when the vessel arrives at the loading port and ends at the time the discharge of cargo is completed at the discharge port. Additionally, the Company has identified that the contract fulfillment costs of spot market voyage charters consist primarily of the fuel consumption that is incurred by the Company from the latter of the end of the previous vessel employment and the contract date until the arrival at the loading port, as well as any charter hire expenses for third-party vessels that are chartered-in. The fuel consumption during this period is capitalized and recorded in Prepaid expenses and other current assets in the Condensed Consolidated Balance Sheet and is amortized ratably over the total transit time of the voyage from arrival at the loading port until the vessel departs from the discharge port and expensed as part of Voyage Expenses. Refer also to Note 9 — Prepaid Expenses and Other Current Assets.

13 - COMMITMENTS AND CONTINGENCIES

Effective April 4, 2011, the Company entered into a seven-year sub-sublease agreement for additional office space in New York, New York. The term of the sub-sublease commenced June 1, 2011, with a free base rental period until October 31, 2011. Following the expiration of the free base rental period, the monthly base rental payments were \$82 per month until May 31, 2015 and thereafter will be \$90 per month until the end of the seven-year term. Pursuant to the sub-sublease agreement, the sublessor was obligated to contribute \$472 toward the cost of the Company's alterations to the sub-subleased office space. The Company has also entered into a direct lease with the over-landlord of such office space that will commence immediately upon the expiration of such sub-sublease agreement, for a term covering the period from May 1, 2018 to September 30, 2025; the direct lease provides for a free base rental period from May 1, 2018 to September 30, 2018. Following the expiration of the free base rental period, the monthly base rental payments will be \$186 per month from October 1, 2018 to April 30, 2023 and \$204 per month from May 1,

2023 to September 30, 2025. For accounting purposes, the sub-sublease agreement and direct lease agreement with the landlord constitutes one lease agreement. As a result of the straight-line rent calculation generated by the free rent period and the tenant work credit, the monthly straight-line rental expense for the term from the Effective Date to September 30, 2025 is \$150. The Company had a long-term lease obligation at June 30, 2018 and December 31, 2017 of \$3,127 and \$2,588, respectively. Rent expense pertaining to this lease for the three months ended June 30, 2018 and 2017 was \$452 during both periods and \$904 during the six months ended June 30, 2018 and 2017.

Future minimum rental payments on the above lease for the next five years and thereafter are as follows: \$557 for the remainder of 2018, \$2,230 annually for 2019, 2020, 2021 and 2022, and a total of \$6,671 for the remaining term of the lease.

14 - STOCK-BASED COMPENSATION

2014 Management Incentive Plan

On the Effective Date, pursuant to the Chapter 11 Plan, the Company adopted the Genco Shipping & Trading Limited 2014 Management Incentive Plan (the "MIP"). An aggregate of 966,806 shares of Common Stock were available for award under the MIP. Awards under the MIP took the form of restricted stock grants and three tiers of MIP Warrants with staggered strike prices based on increasing equity values. The number of shares of common stock available under the Plan represented approximately 1.8% of the shares of post-emergence Common Stock outstanding as

Table of Contents

of the Effective Date on a fully-diluted basis. Awards under the MIP were available to eligible employees, non-employee directors and/or officers of the Company and its subsidiaries (collectively, “Eligible Individuals”). Under the MIP, a committee appointed by the Board from time to time (or, in the absence of such a committee, the Board) (in either case, the “Plan Committee”) may grant a variety of stock-based incentive awards, as the Plan Committee deems appropriate, to Eligible Individuals. The MIP Warrants are exercisable on a cashless basis and contain customary anti-dilution protection in the event of any stock split, reverse stock split, stock dividend, reclassification, dividend or other distributions (including, but not limited to, cash dividends), or business combination transaction.

On August 7, 2014, pursuant to the MIP, certain individuals were granted MIP Warrants whereby each warrant can be converted on a cashless basis for the amount in excess of the respective strike price. The MIP Warrants were issued in three tranches for 238,066, 246,701 and 370,979 shares and have exercise prices of \$259.10 (the “\$259.10 Warrants”), \$287.30 (the “\$287.30 Warrants”) and \$341.90 (the “\$341.90 Warrants”) per whole share, respectively. The fair value of each warrant upon emergence from bankruptcy was \$7.22 for the \$259.10 Warrants, \$6.63 for the \$287.30 Warrants and \$5.63 for the \$341.90 Warrants. The warrant values were based upon a calculation using the Black-Scholes-Merton option pricing formula. This model uses inputs such as the underlying price of the shares issued when the warrant is exercised, volatility, cost of capital interest rate and expected life of the instrument. The Company has determined that the warrants should be classified within Level 3 of the fair value hierarchy by evaluating each input for the Black-Scholes-Merton option pricing formula against the fair value hierarchy criteria and using the lowest level of input as the basis for the fair value classification. The Black-Scholes-Merton option pricing formula used a volatility of 43.91% (representing the six-year volatility of a peer group), a risk-free interest rate of 1.85% and a dividend rate of 0%. The aggregate fair value of these awards upon emergence from bankruptcy was \$54,436. The warrants vested 33.33% on each of the first three anniversaries of the grant date, with accelerated vesting upon a change in control of the Company.

For the three and six months ended June 30, 2018 and 2017, the Company recognized amortization expense of the fair value of these warrants, which is included in General and administrative expenses, as follows:

	For the Three Months Ended June 30, 2018		For the Six Months Ended June 30, 2017	
General and administrative expenses	\$ —	\$ 377	\$ —	\$ 749

As of June 30, 2018, there was no unamortized stock-based compensation for the warrants and all warrants were vested.

The following table summarizes certain information about the warrants outstanding as of June 30, 2018:

Edgar Filing: GENCO SHIPPING & TRADING LTD - Form 10-Q

Weighted Average Exercise Price of Outstanding Warrants	Warrants Outstanding and Unvested, June 30, 2018			Warrants Outstanding and Exercisable, June 30, 2018		
	Number of Warrants	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Number of Warrants	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
\$ 303.12	—	\$ —	—	8,557,461	\$ 303.12	2.11

As of June 30, 2018 and December 31, 2017, a total of 8,557,461 of warrants were outstanding.

The nonvested stock awards granted under the MIP vested ratably on each of the three anniversaries of August 7, 2014. As of June 30, 2018, all stock awards granted under the MIP were vested.

Table of Contents

There were no shares that vested under the MIP during the six months ended June 30, 2018 and 2017. The total fair value is calculated as the number of shares vested during the period multiplied by the fair value on the vesting date.

For the three and six months ended June 30, 2018 and 2017, the Company recognized nonvested stock amortization expense for the MIP restricted shares, which is included in General and administrative expenses, as follows:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2018	2017	2018	2017
General and administrative expenses	\$ —	\$ 154	\$ —	\$ 306

The Company amortized these grants over the applicable vesting periods, net of anticipated forfeitures. As of June 30, 2018, there was \$0 of unrecognized compensation cost.

2015 Equity Incentive Plan

On June 26, 2015, the Company's Board of Directors approved the 2015 Equity Incentive Plan for awards with respect to an aggregate of 400,000 shares of common stock (the "2015 Plan"). Under the 2015 Plan, the Company's Board of Directors, the compensation committee, or another designated committee of the Board of Directors may grant a variety of stock-based incentive awards to the Company's officers, directors, employees, and consultants. Awards may consist of stock options, stock appreciation rights, dividend equivalent rights, restricted (nonvested) stock, restricted stock units, and unrestricted stock. As of June 30, 2018, the Company has awarded restricted stock units, restricted stock and stock options under the 2015 Plan.

On March 23, 2017, the Board of Directors approved an amendment and restatement of the 2015 Plan. This amendment and restatement increases the number of shares available for awards under the plan from 400,000 to 2,750,000, subject to shareholder approval; sets the annual limit for awards to non-employee directors and other individuals as 500,000 and 1,000,000 shares, respectively; and modifies the change in control definition. The Company's shareholder's approved the increase in the number of shares at the Company's 2017 Annual Meeting of Shareholders on May 17, 2017.

Stock Options

On March 23, 2017, the Company issued options to purchase 133,000 of the Company's shares of common stock to John C. Wobensmith, Chief Executive Officer and President, with an exercise price of \$11.13 per share. One third of the options become exercisable on each of the first three anniversaries of October 15, 2016, with accelerated vesting upon a change in control of the Company, and all unexercised options expire on the sixth anniversary of the grant date. The fair value of each option was estimated on the date of the grant using the Black-Scholes-Merton pricing formula, resulting in a value of \$6.41 per share, or \$853 in the aggregate. The assumptions used in the Black-Scholes-Merton option pricing formula are as follows: volatility of 79.80% (representing a blend of the Company's historical volatility and a peer-based volatility estimate), a risk-free interest rate of 1.68%, a dividend yield of 0%, and expected life of 3.78 years (determined using the simplified method as outlined in Staff Accounting Bulletin 14 – Share-Based Payment ("SAB Topic 14") due to lack of historical exercise data).

On February 27, 2018, the Company issued options to purchase 122,608 of the Company's shares of common stock to certain individuals with an exercise price of \$13.69 per share. One third of the options become exercisable on each of the first three anniversaries of February 27, 2018, with accelerated vesting that may occur following a change in control of the Company, and all unexercised options expire on the sixth anniversary of the grant date. The fair value of each option was estimated on the date of the grant using the Black-Scholes-Merton pricing formula, resulting in a value of \$7.55 per share, or \$926 in the aggregate. The assumptions used in the Black-Scholes-Merton option pricing formula are as follows: volatility of 71.94% (representing a blend of the Company's historical volatility and a peer-based volatility estimate), a risk-free interest rate of 2.53%, a dividend yield of 0%, and expected life of 4.00 years (determined using the simplified method as outlined in SAB Topic 14 due to lack of historical exercise data).

Table of Contents

For the three and six months ended June 30, 2018 and 2017, the Company recognized amortization expense of the fair value of these options, which is included in General and administrative expenses, as follows:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2018	2017	2018	2017
General and administrative expenses	\$ 214	\$ 198	\$ 337	\$ 218

Amortization of the unamortized stock-based compensation balance of \$929 as of June 30, 2018 is expected to be expensed \$394, \$392, \$127 and \$16 during the remainder of 2018 and during the years ended December 31, 2019, 2020 and 2021, respectively. The following table summarizes the unvested option activity for the six months ended June 30, 2018:

	Number of Options	Weighted Average Exercise Price	Weighted Average Fair Value
Outstanding at January 1, 2018 - Unvested	88,667	\$ 11.13	\$ 6.41
Granted	122,608	13.69	7.55
Exercisable	—	—	—
Exercised	—	—	—
Forfeited	—	—	—
Outstanding at June 30, 2018 - Unvested	211,275	\$ 12.62	\$ 7.07

The following table summarizes certain information about the options outstanding as of June 30, 2018:

Options Outstanding and Unvested, June 30, 2018				Options Outstanding and Exercisable, June 30, 2018		
Weighted Average Exercise Price of Outstanding Options	Number of Options	Weighted Average Exercise Price	Remaining Contractual Life	Number of Warrants	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
\$ 12.36	211,275	\$ 12.62	5.27	44,333	\$ 11.13	4.73

As of June 30, 2018 and December 31, 2017, a total of 255,608 and 133,000 stock options were outstanding, respectively.

Restricted Stock Units

The Company has issued restricted stock units (“RSUs”) under the 2015 Plan to certain members of the Board of Directors and certain executives and employees of the Company, which represent the right to receive a share of common stock, or in the sole discretion of the Company’s Compensation Committee, the value of a share of common stock on the date that the RSU vests. As of June 30, 2018 and December 31, 2017, 118,838 and 118,838 shares of the Company’s common stock were outstanding in respect of the RSUs, respectively. Such shares of common stock will only be issued in respect of vested RSUs issued to directors when the director’s service with the Company as a director terminates. Such shares of common stock will only be issued to executives and employees when their RSUs vest under the terms of their grant agreements and the amended 2015 Plan described above. On May 17, 2017, 18,234 shares of common stock were issued to Eugene Davis, the former Chairman of the Audit Committee, in respect of vested RSUs following his departure from the Board.

Table of Contents

The RSUs that have been issued to certain members of the Board of Directors generally vest on the date of the annual shareholders meeting of the Company following the date of the grant. The RSUs that have been issued to other individuals vest ratably on each of the three anniversaries of the determined vesting date. The table below summarizes the Company's unvested RSUs for the six months ended June 30, 2018:

	Number of RSUs	Weighted Average Grant Date Price
Outstanding at January 1, 2018	220,129	\$ 11.01
Granted	51,704	14.84
Vested	(25,197)	10.12
Forfeited	—	—
Outstanding at June 30, 2018	246,636	\$ 11.91

The total fair value of the RSUs that vested during the six months ended June 30, 2018 and 2017 was \$450 and \$675, respectively. The total fair value is calculated as the number of shares vested during the period multiplied by the fair value on the vesting date.

The following table summarizes certain information of the RSUs unvested and vested as of June 30, 2018:

Unvested RSUs June 30, 2018			Vested RSUs June 30, 2018	
Number of RSUs	Weighted Average Grant Date Price	Weighted Average Remaining Contractual Life	Number of RSUs	Weighted Average Grant Date Price
246,636	\$ 11.91	1.48	196,769	\$ 11.23

The Company is amortizing these grants over the applicable vesting periods, net of anticipated forfeitures. As of June 30, 2018, unrecognized compensation cost of \$1,376 related to RSUs will be recognized over a weighted-average period of 1.48 years.

For the three and six months ended June 30, 2018 and 2017, the Company recognized nonvested stock amortization expense for the RSUs, which is included in General and administrative expenses as follows:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2018	2017	2018	2017
General and administrative expenses	\$ 421	\$ 833	\$ 788	\$ 992

Table of Contents

Restricted Stock

Under the 2015 Plan, grants of restricted common stock issued to executives ordinarily vest ratably on each of the three anniversaries of the determined vesting date. The table below summarizes the Company's nonvested stock awards for the six months ended June 30, 2018 which were issued under the 2015 Plan:

	Number of Shares	Weighted Average Grant Date Price
Outstanding at January 1, 2018	6,802	\$ 5.20
Granted	—	—
Vested	—	—
Forfeited	—	—
Outstanding at June 30, 2018	6,802	\$ 5.20

There were no shares that vested under the 2015 Plan during the six months ended June 30, 2018 and 2017. The total fair value is calculated as the number of shares vested during the period multiplied by the fair value on the vesting date.

For the three and six months ended June 30, 2018 and 2017, the Company recognized nonvested stock amortization expense for the 2015 Plan restricted shares, which is included in General and administrative expenses, as follows:

	For the Three Months Ended June 30, 2018		For the Six Months Ended June 30, 2017	
General and administrative expenses	\$ 3	\$ 8	\$ 6	\$ 16

The Company is amortizing these grants over the applicable vesting periods, net of anticipated forfeitures. As of June 30, 2018, unrecognized compensation cost of \$5 related to nonvested stock will be recognized over a weighted-average period of 0.38 years.

15 - LEGAL PROCEEDINGS

In April 2015, six class action complaints were filed in the Supreme Court of the State of New York, County of New York. On May 26, 2015, the six actions were consolidated under the caption In Re Baltic Trading Ltd. Stockholder Litigation, Index No. 651241/2015, and a consolidated class action complaint was filed on June 10, 2015 (the “Consolidated Complaint”). The Consolidated Complaint is purported to be brought by and on behalf of Baltic Trading’s shareholders and alleges that the then-proposed July 2015 merger did not fairly compensate Baltic Trading’s shareholders and undervalued Baltic Trading. The Consolidated Complaint names as defendants the Company, Baltic Trading, the individual members of Baltic Trading’s board, and the Company’s merger subsidiary. The claims generally allege (i) breaches of fiduciary duties of good faith, due care, disclosure to shareholders, and loyalty, including for failing to maximize shareholder value, and (ii) aiding and abetting those breaches. Among other relief, the complaints seek an injunction against the merger, declaratory judgments that the individual defendants breached fiduciary duties, rescission of the merger agreement, and unspecified damages.

On July 9, 2015, plaintiffs in that action moved to enjoin the merger vote, scheduled to take place on July 17, 2015. The motion to enjoin the vote was denied on July 15, 2015. Plaintiffs sought an emergency injunction and temporary restraining order from the New York State Appellate Division, First Department the following day, on July 16, 2015. The Appellate Division denied the request, and the vote, and subsequent merger, proceeded as scheduled on July 17, 2015. Plaintiffs thereafter withdrew that appeal.

On June 30, 2015, defendants had moved to dismiss the Consolidated Complaint in its entirety. Plaintiffs subsequently served an Amended Consolidated Complaint, and defendants directed their motion to dismiss to that amended complaint. The motion to dismiss was granted and the Amended Consolidated Complaint was dismissed with

Table of Contents

prejudice on August 29, 2016. By a Decision and Order dated April 26, 2018, the New York State Appellate Division, First Department affirmed the dismissal of the amended complaint. The time for plaintiffs to file a motion for leave to appeal to the New York State Court of Appeals has expired.

From time to time, the Company may be subject to legal proceedings and claims in the ordinary course of its business, principally personal injury and property casualty claims. Such claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources. The Company is not aware of any legal proceedings or claims that it believes will have, individually or in the aggregate, a material effect on the Company, its financial condition, results of operations or cash flows besides those noted above.

16 – SUBSEQUENT EVENTS

On July 26, 2018, the Company took delivery of the Genco Weatherly, a 61,556 dwt 2014-built Ultramax vessel. The Company utilized cash on hand to pay the remaining balance of \$22,313 for the Genco Weatherly and expects to utilize proceeds from the anticipated new credit facility as described below to reimburse to the Company a portion of the purchase price.

On July 24, 2018, the Company entered into an agreement to sell the Genco Surprise, a 1998-built Panamax vessel, to a third party. On August 7, 2018, the Company completed the sale of the Genco Surprise. This vessel does not serve as collateral under any of the Company's credit facilities; therefore the Company is not required to pay down any indebtedness with the proceeds from the sale. Refer to Note 2 — Summary of Significant Accounting Policies regarding the impairment recorded for this vessel during the second quarter of 2018.

On July 12, 2018, the Company entered into agreements to purchase two modern, high specification 2016-built Capesize drybulk vessels for an aggregate purchase price of \$98,000. These vessels are to be renamed the Genco Defender and Genco Liberty. The vessels are expected to be delivered to the Company during the third quarter of 2018. The Company intends to use a combination of cash on hand and proceeds from the anticipated new credit facility as described below.

On July 13, 2018, the Company entered into a commitment letter for a new five-year senior secured credit facility (the "New Credit Facility") to be led by Crédit Agricole Corporate & Investment Bank. The Company intends to use proceeds from the New Credit Facility to finance or reimburse to the Company a portion of the purchase price for six vessels, two of which are noted above and four of which are referenced in Note 4 — Vessel Acquisitions and Dispositions, which are to serve as collateral. The aggregate principal amount of the New Credit Facility is estimated to be approximately \$107,000, representing 45% of the appraised value of the six vessels. Such amount may be drawn down in up to six borrowings. The commitment letter provides for the following additional key terms:

- Borrowings under the New Credit Facility will bear interest at LIBOR plus 2.50% through September 30, 2019 and LIBOR plus a range of 2.25% to 2.75% thereafter, dependent upon the Company's ratio of total net indebtedness to the last twelve months EBITDA.

Scheduled amortization payments under the New Credit Facility are to reflect a repayment profile whereby the facility shall have been repaid to nil when the average vessel aged of the collateral vessels reaches 20 years. Assuming borrowing of the full amount estimated above under the New Credit Facility with the third quarter of 2018, such payments are anticipated to be approximately \$1,600 per quarter commencing on December 31, 2018, with a final balloon payment on the maturity date.

- Mandatory prepayments are to be applied to remaining amortization payments pro rata, while voluntary prepayments are to be applied to remaining amortization payments in order of maturity.
- Dividends may be paid subject to customary conditions and a limitation of 50% of consolidated net income for the quarter preceding such dividend payment if the collateral maintenance test ratio is 200% or less for such quarter.
- Acquisitions and additional indebtedness are allowed subject to compliance with financial covenants, a collateral maintenance test, and other customary conditions.

Table of Contents

- Key financial covenants, which are expected to be based on those in the Company's \$460 Million Credit Facility, include:
- minimum liquidity, with unrestricted cash and cash equivalents to equal or exceed the greater of \$30,000 and 7.5% of total indebtedness;
- minimum working capital, with consolidated current assets (excluding restricted cash) minus consolidated current liabilities (excluding the current portion of long-term indebtedness) to be not less than zero;
- debt to capitalization, with the ratio of total indebtedness to total capitalization to be not more than 70%; and
- collateral maintenance, with the aggregate appraised value of collateral vessels to be at least 135% of the principal amount of the loan outstanding under the New Credit Facility.

Other key provisions are to be based on the \$460 Million Credit Facility. Refer to Note 7 — Debt. The New Credit Facility is subject to definitive documentation, and borrowings thereunder are expected to be subject to customary conditions.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

"Safe Harbor" Statement Under the Private Securities Litigation Reform Act of 1995

This report contains forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements use words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," and other words and terms of similar meaning in connection with a discussion of potential future events, circumstances or future operating or financial performance. These forward-looking statements are based on our management's current expectations and observations. Included among the factors that, in our view, could cause actual results to differ materially from the forward looking statements contained in this report are the following: (i) declines or sustained weakness in demand in the drybulk shipping industry; (ii) continuation of weakness or declines in drybulk shipping rates; (iii) changes in the supply of or demand for drybulk products, generally or in particular regions; (iv) changes in the supply of drybulk carriers including newbuilding of vessels or lower than anticipated scrapping of older vessels; (v) changes in rules and regulations applicable to the cargo industry, including, without limitation, legislation adopted by international organizations or by individual countries and actions taken by regulatory authorities; (vi) increases in costs and expenses including but not limited to: crew wages, insurance, provisions, lube oil, bunkers, repairs, maintenance, general and administrative expenses, and management fee expenses; (vii) whether our insurance arrangements are adequate; (viii) changes in general domestic and international political conditions; (ix) acts of war, terrorism, or piracy; (x) changes in the condition of the Company's vessels or applicable maintenance or regulatory standards (which may affect, among other things, our anticipated drydocking or maintenance and repair costs) and unanticipated drydock expenditures; (xi) the Company's acquisition or disposition of vessels; (xii) the amount of offhire time needed to complete repairs on vessels and the timing and amount of any reimbursement by our insurance carriers for insurance claims, including offhire days; (xiii) the completion of definitive documentation with respect to charters; (xiv) charterers' compliance with the terms of their charters in the current market environment; (xv) the extent to which our operating results continue to be affected by weakness in market conditions and freight and charter rates; (xvi) our ability to maintain contracts that are critical to our operation, to obtain and maintain acceptable terms with our vendors, customers and service providers and to retain key executives, managers and employees; (xvii) the completion of definitive documentation and fulfillment of conditions precedent under our proposed New Credit Facility; (xviii) completion of documentation for vessel transactions and the performance of the terms thereof by buyers or sellers of vessels and us; and other factors listed from time to time in our filings with the Securities and Exchange Commission, including, without limitation, our Annual Report on Form 10-K for the year ended December 31, 2017 and subsequent reports on Form 8-K and Form 10-Q.

The following management's discussion and analysis should be read in conjunction with our historical consolidated financial statements and the related notes included in this Form 10-Q.

General

We are a Marshall Islands company that transports iron ore, coal, grain, steel products and other drybulk cargoes along worldwide shipping routes through the ownership and operation of drybulk carrier vessels. After the expected delivery of the four Capesize vessels and one Ultramax vessel and the sale of two Handysize vessels as described below, our fleet will consist of 63 drybulk vessels, including 17 Capesize drybulk carriers, five Panamax drybulk carriers, six Ultramax drybulk carriers, 21 Supramax drybulk carriers, one Handymax drybulk carriers and 13 Handysize drybulk carriers, with an aggregate carrying capacity of approximately 5,400,000 dwt and an average age of approximately 9.2 years. We seek to deploy our vessels on time charters, spot market voyage charters, spot market-related time charters or in vessel pools trading in the spot market, to reputable charterers. The majority of the vessels in our current fleet are presently engaged under time charter, spot market voyage charters and spot market-related time charter contracts that expire (assuming the option periods in the time charters are not exercised) between August 2018 and June 2019.

See pages 46 - 50 for a table of all vessels in our fleet.

Table of Contents

In 2017, we began implementing certain initiatives to expand our commercial platform and more actively manage the employment of our vessels. We hired commercial directors for our major bulk and minor bulk fleets and began employment of our vessels directly with cargo owners under cargo contracts. To better capitalize on opportunities to employ our vessels in markets around the world, we expanded our global commercial presence with the establishment of new offices in Singapore and Denmark. Additionally, we have withdrawn all of our vessels from their respective pools and are reallocating our freight exposure to the Atlantic basin to seek to capture the earnings premium historically offered. Overall, our fleet deployment strategy remains weighted towards short-term fixtures, which provide optionality in a potentially rising freight rate environment. In addition to both short and long-term time charters, we fix our vessels on spot market voyage charters as well as spot market-related time charters depending on market conditions and management's outlook.

On July 12, 2018, we entered into agreements to purchase two modern, high specification Capesize drybulk vessels for an aggregate purchase price of \$98.0 million. These vessels are to be renamed the Genco Defender and Genco Liberty. The vessels are expected to be delivered during the third quarter of 2018. We intend to use a combination of cash on hand and proceeds from the anticipated new credit facility as described in Note 16 — Subsequent Events in our Condensed Consolidated Financial Statements.

On June 6, 2018, we entered into an agreement for the en bloc purchase of four drybulk vessels including two Capesize drybulk vessels and two Ultrabulk drybulk vessels for approximately \$141.0 million. Each vessel was built with a fuel-saving "eco" engine. The Genco Weatherly, a 2014-built Ultramax vessel, was delivered on July 26, 2018. The remaining three vessels, which are to be renamed the Genco Columbia, the Genco Endeavour and the Genco Resolute, are expected to be delivered during the third quarter of 2018. The Company intends to use a combination of cash on hand and proceeds from the anticipated new credit facility as described in Note 16 — Subsequent Events in our Condensed Consolidated Financial Statements.

On July 24, 2018, we entered into an agreement to sell the Genco Surprise, a 1998-built Panamax vessel. On August 7, 2018, the Company completed the sale of the Genco Surprise. This vessel does not serve as collateral under any of our credit facilities; therefore we are not required to pay down any indebtedness with the proceeds from the sale.

On June 27, 2018, we reached agreements to sell the Genco Explorer and Genco Progress, both 1999-built Handysize vessels, and these vessel assets have been classified as held for sale in the Condensed Consolidated Balance Sheet as of June 30, 2018. The sales of these vessels are expected to be completed during the fourth quarter of 2018. These vessels do not serve as collateral under any of our credit facilities, therefore we are not required to pay down any indebtedness with the proceeds from the sales. The sales are subject to completion of definitive documentation and customary conditions.

We report financial information and evaluate our operations by charter revenues and not by the length of ship employment for our customers, i.e., spot or time charters. Each of our vessels serves the same type of customer, has similar operations and maintenance requirements, operates in the same regulatory environment, and is subject to similar economic characteristics. Based on this, we have determined that we operate in one reportable segment in which we are engaged in the ocean transportation of drybulk cargoes worldwide through the ownership and operation of drybulk carrier vessels.

Our management team and our other employees are responsible for the commercial and strategic management of our fleet. Commercial management includes the negotiation of charters for vessels, managing the mix of various types of charters, such as time charters, spot market voyage charters and spot market-related time charters, and monitoring the performance of our vessels under their charters. Strategic management includes locating, purchasing, financing and selling vessels. We currently contract with two independent technical managers to provide technical management of our fleet at a lower cost than we believe would be possible in-house. Technical management involves the day-to-day management of vessels, including performing routine maintenance, attending to vessel operations and arranging for crews and supplies. Members of our New York City-based management team oversee the activities of our independent technical managers.

On October 27, 2016, at the 70th session of the Marine Environment Protection Committee (“MEPC”), the MEPC announced the results from a vote to ratify and formalize regulations mandating a reduction in sulfur emissions

Table of Contents

from 3.5% currently to 0.5% as of the beginning of 2020 rather than pushing the deadline back to 2025. By 2020, ships will now have to either remove sulfur from emissions through the use of emission scrubbers or buy fuel with low sulfur content. If a vessel is not retrofitted with a scrubber, it will need to use low sulfur fuel, which is more expensive than standard marine fuel. This increased demand for low sulfur fuel may result in an increase in prices for such fuel.

We are currently evaluating whether we will install scrubbers on our vessels or use low sulfur fuel, which will depend on such factors as relative cost and the feasibility of the technology. We currently estimate that scrubbers would cost approximately \$2-\$4 million per vessel to install on any of our existing vessels.

Definitions

In order to understand our discussion of our results of operations, it is important to understand the meaning of the following terms used in our analysis and the factors that influence our results of operations.

(1) Ownership days. We define ownership days as the aggregate number of days in a period during which each vessel in our fleet has been owned by us. Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during a period.

(2) Chartered-in days. We define chartered-in days as the aggregate number of days in a period during which we chartered-in third-party vessels.

(3) Available days (owned and chartered-in fleet). We define available days, which we have recently updated and incorporated in the table above to better demonstrate the manner in which we evaluate our business, as the number of our ownership days and chartered-in days less the aggregate number of days that our vessels are off-hire due to familiarization upon acquisition, repairs or repairs under guarantee, vessel upgrades or special surveys. Amounts for available days in the table above for the periods ended June 30, 2017 have been adjusted for our updated method of calculating available days. Companies in the shipping industry generally use available days to measure the number of days in a period during which vessels should be capable of generating revenues.

(4) Available days (owned fleet). We define available days for the owned fleet as available days less chartered-in days.

(5) Operating days. We define operating days as the number of our total available days in a period less the aggregate number of days that our vessels are off-hire due to unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels actually generate revenues. Amounts for operating days in the table above for the periods ended June 30, 2017 have been adjusted for our updated method of calculating available days.

(6) Fleet utilization. We calculate fleet utilization, which we have recently updated and incorporated in the table above to better demonstrate the manner in which we evaluate our business, as the number of our operating days during a period divided by the number of ownership days plus chartered-in days less drydocking days. Amounts for fleet utilization in the table above for the period ended June 30, 2017 have been adjusted for our updated method of calculating fleet utilization.

(7) TCE rates. We define TCE rates as our voyage revenues less voyage expenses and charter-hire expenses, divided by the number of the available days of our owned fleet during the period, which is consistent with industry standards. TCE rate is a common shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charterhire rates for vessels on

Table of Contents

voyage charters are generally not expressed in per-day amounts while charterhire rates for vessels on time charters generally are expressed in such amounts.

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2018	2017	2018	2017
Voyage revenues (in thousands)	\$ 86,157	\$ 45,370	\$ 163,073	\$ 83,619
Voyage expenses (in thousands)	25,983	951	47,075	4,192
Charter hire expenses (in thousands)	509	—	509	—
	59,665	44,419	115,489	79,427
Total available days for owned fleet	5,442	5,319	10,777	10,853
Total TCE rate	\$ 10,964	\$ 8,351	\$ 10,716	\$ 7,318

(8) Daily vessel operating expenses. We define daily vessel operating expenses to include crew wages and related costs, the cost of insurance expenses relating to repairs and maintenance (excluding drydocking), the costs of spares and consumable stores, tonnage taxes and other miscellaneous expenses. Daily vessel operating expenses are calculated by dividing vessel operating expenses by ownership days for the relevant period.

Table of Contents

(1) EBITDA represents net (loss) income plus net interest expense, taxes and depreciation and amortization. EBITDA is included because it is used by management and certain investors as a measure of operating performance. EBITDA is used by analysts in the shipping industry as a common performance measure to compare results across peers. Our management uses EBITDA as a performance measure in our consolidated internal financial statements, and it is presented for review at our board meetings. We believe that EBITDA is useful to investors as the shipping industry is capital intensive which often results in significant depreciation and cost of financing. EBITDA presents investors with a measure in addition to net income to evaluate our performance prior to these costs. EBITDA is not an item recognized by U.S. GAAP (i.e. non-GAAP measure) and should not be considered as an alternative to net income, operating income or any other indicator of a company's operating performance required by U.S. GAAP. EBITDA is not a measure of liquidity or cash flows as shown in our Condensed Consolidated Statements of Cash Flows. The definition of EBITDA used here may not be comparable to that used by other companies. The following table demonstrates our calculation of EBITDA and provides a reconciliation of EBITDA to net (loss) income for each of the periods presented above:

	For the Three Months Ended		For the Six Months Ended	
	June 30, 2018	2017	June 30, 2018	2017
Net loss	\$ (1,120)	\$ (14,513)	\$ (56,931)	\$ (30,112)
Net interest expense	7,582	7,226	14,912	14,190
Income tax expense	—	—	—	—
Depreciation and amortization	16,450	18,185	33,336	36,358
EBITDA (1)	\$ 22,912	\$ 10,898	\$ (8,683)	\$ 20,436

Results of Operations

The following tables set forth information about the current employment of the vessels in our fleet as of August 7, 2018:

-
- (1) The charter expiration dates presented represent the earliest dates that our charters may be terminated in the ordinary course. Under the terms of certain contracts, the charterer is entitled to extend the time charter from two to four months in order to complete the vessel's final voyage plus any time the vessel has been off-hire.
- (2) Time charter rates presented are the gross daily charterhire rates before third-party brokerage commission generally ranging from 1.25% to 6.25%. In a time charter, the charterer is responsible for voyage expenses such as bunkers, port expenses, agents' fees and canal dues.

Table of Contents

- (3) We have reached an agreement with Oldendorff Carriers GmbH & Co. KG on a time charter for approximately 40 days at a rate of \$17,450 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on June 24, 2018.
- (4) The vessel redelivered to Genco on July 9, 2018 and is currently drydocking for scheduled maintenance.
- (5) We have reached an agreement with Pan Ocean Co., Ltd. on a time charter for approximately 45 days at a rate of \$19,500 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 23, 2018.
- (6) We have reached an agreement with Nippon Yusen Kabushiki Kaisha on a time charter for approximately 2.5 to 5.5 months at a rate of \$14,500 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on April 28, 2018.
- (7) We have reached an agreement with Pacific Bulk Cape Company Ltd. on a time charter for 9.5 to 14.5 months at a rate of \$15,300 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on January 20, 2018.
- (8) We have reached an agreement with Classic Maritime Inc. on a time charter for approximately 35 days at a rate of \$14,892 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on June 28, 2018.
- (9) We have reached an agreement with Hyundai Glovis Co. Ltd., Seoul on a time charter for approximately 35 days at a rate of \$19,100 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 7, 2018.
- (10) We have reached an agreement with Nippon Yusen Kabushiki Kaisha on a time charter for 3 to 6 months at a rate of \$16,500 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on April 4, 2018.
- (11) We have reached an agreement with Rainbow Success Shipping Ltd. on a time charter for approximately 25 days at a rate of \$8,200 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on August 7, 2018. The vessel had redelivered to Genco on August 3, 2018.
- (12) We have reached an agreement with Rainbow Success Shipping Ltd. on a time charter for approximately 20 days at a rate of \$8,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 12, 2018. The vessel had redelivered to Genco on July 7, 2018.
- (13)

We have reached an agreement with United Bulk Carriers International S.A. on a spot market-related time charter for 10 to 14 months at a rate based on 96% of the Baltic Panamax Index (BPI), published by the Baltic Exchange, as reflected in daily reports. Hire is paid every 15 days in arrears less a 5.00% third-party brokerage commission. The vessel is expected to deliver to charterers on or about August 22, 2018. A ballast bonus was awarded.

- (14) We have reached an agreement with Nordic Bulk Carriers A/S on a time charter for approximately 40 days at a rate of \$11,000 per day. The rate then increased to \$14,000 for an additional 40 days approximately. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on June 14, 2018.
- (15) We have reached an agreement with Ultrabulk African Services on a time charter for approximately 55 days at a rate of \$14,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on June 12, 2018.
- (16) We have reached an agreement with Ultrabulk A/S on a time charter for a minimum of two months and maximum up to September 30, 2018 at a rate of \$12,500 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on May 27, 2018.

Table of Contents

- (17) We have reached an agreement with MUR Shipping B.V. on a time charter for approximately 25 days at a rate of \$10,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 8, 2018 after repositioning. A ballast bonus was awarded after the repositioning period. The vessel had redelivered to Genco on July 2, 2018.
- (18) We have reached an agreement with Pan Ocean Co., Ltd. on a time charter for 3 to 5.5 months at a rate of \$13,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 4, 2018.
- (19) We have reached an agreement with Amaggi S.A., Lausanne on a time charter for approximately 45 days at a rate of \$15,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 3, 2018 after repositioning.
- (20) We have reached an agreement with European Metals Recycling on a time charter for approximately 20 days at a rate of \$14,000 per day. Hire is paid every 15 days in advance less a 6.25% third-party brokerage commission. The vessel is expected to deliver to charterers on or about August 11, 2018.
- (21) We have reached an agreement with Cargill International S.A. on a time charter for approximately 40 days at a rate of \$13,500 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 23, 2018.
- (22) We have reached an agreement with Flame S.A. on a time charter for approximately 30 days at a rate of \$10,900 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on June 28, 2018.
- (23) We have reached an agreement with Oldendorff Carriers GmbH & Co. KG on a time charter for approximately 45 days at a rate of \$14,250 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel is delivered to charterers on June 26, 2018.
- (24) We have reached an agreement with Atlantic Bulk Carriers Management Ltd. on a time charter for approximately 35 days at a rate of \$14,500 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 22, 2018. The vessel had redelivered to Genco on July 3, 2018.
- (25) We have reached an agreement with Oldendorff Carriers GmbH & Co. KG on a time charter for approximately 40 days at a rate of \$13,500 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 16, 2018.

- (26) We have reached an agreement with Ultrabulk African Services on a time charter for approximately 55 days at a rate of \$12,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 18, 2018.
- (27) We have reached an agreement with Western Bulk Pte. Ltd. on a time charter for approximately 50 days at a rate of \$17,750 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on August 7, 2018.
- (28) We have reached an agreement with Chun An Chartering Co. Ltd. on a time charter for approximately 15 days at a rate of \$9,100 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on August 1, 2018.
- (29) We have reached an agreement with DS Norden A/S on a time charter for approximately 30 days at a rate of \$11,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on August 6, 2018

Table of Contents

- (30) We have reached an agreement with Western Bulk Pte. Ltd. on a time charter for approximately 35 days at a rate of \$9,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 13, 2018. The vessel had redelivered to Genco on July 4, 2018.
- (31) We have reached an agreement with Oldendorff Carriers GmbH & Co. KG on a time charter for approximately 25 days at a rate of \$11,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 12, 2018.
- (32) We have reached an agreement with Cargill International S.A. on a time charter for 2.5 to 5.5 months days at a rate of \$9,750 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on June 18, 2018.
- (33) We have reached an agreement with Louis Dreyfus Company Suisse S.A. on a time charter for approximately 35 days at a rate of \$11,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 5, 2018.
- (34) We have reached an agreement with Taurus International Shipping Ltd. on a time charter for approximately 30 days at a rate of \$8,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 19, 2018. The vessel had redelivered to Genco on July 18, 2018.
- (35) We have reached an agreement with Cargill International S.A. on a time charter for approximately 30 days at a rate of \$9,500 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on July 18, 2018.
- (36) We have reached an agreement with Guardian Navigation Worldwide Inc. on a time charter for approximately 20 days at a rate of \$6,000 per day. Hire is paid every 15 days in advance less a 5.00% third-party brokerage commission. The vessel delivered to charterers on August 5, 2018.

Three months ended June 30, 2018 compared to the three months ended June 30, 2017

VOYAGE REVENUES-

For the three months ended June 30, 2018, voyage revenues increased by \$40.8 million, or 89.9%, to \$86.2 million as compared to \$45.4 million for the three months ended June 30, 2017. The increase in voyage revenues was primarily due to the employment of vessels on spot market voyage charters as well as higher spot market rates achieved by the majority of our vessels.

The average Time Charter Equivalent (“TCE”) rate of our fleet increased 31.3% to \$10,964 a day for the three months ended June 30, 2018 from \$8,351 a day for the three months ended June 30, 2017. The increase in TCE rates was primarily due to higher rates achieved by the majority of the vessels in our fleet during the second quarter of 2018 as compared to the same period last year. During the second quarter of 2018, the drybulk freight market strengthened relative to the first quarter with sequential increases in Capesize, Supramax and Handysize average earnings as reported by the Baltic Exchange. The demand for raw materials remains strong as global steel production has increased by 4.6% in the year-to-date lead primarily by China and India at 6.0% and 5.1% growth rates, respectively. On the supply side, net fleet growth remains low at under 2.0% since the end of last year as newbuilding deliveries have fallen significantly. In the third quarter of 2018, TCE booked to date has been negatively impacted by the timing of strategic positioning for select Capesize and minor bulk vessels in anticipation of stronger export volumes towards the end of the third quarter and into the fourth quarter in the specific regions to which these vessels are being positioned.

For the three months ended June 30, 2018 and 2017, we had 5,460.0 and 5,505.2 ownership days, respectively. The decrease in ownership days is a result of the sale of five of our vessels during the first half of 2017. Fleet utilization increased marginally to 98.4% during the three months ended June 30, 2018 from 96.7% during the three months ended June 30, 2017.

Table of Contents

VOYAGE EXPENSES-

In time charters, spot market-related time charters and pool agreements, operating costs including crews, maintenance and insurance are typically paid by the owner of the vessel and specified voyage costs such as fuel and port charges are paid by the charterer. These expenses are borne by the Company during spot market voyage charters. There are certain other non-specified voyage expenses such as commissions which are typically borne by us. Voyage expenses include port and canal charges, fuel (bunker) expenses and brokerage commissions payable to unaffiliated third parties. Port and canal charges and bunker expenses primarily increase in periods during which vessels are employed on spot market voyage charters because these expenses are for the account of the vessel owner. At the inception of a time charter, we record the difference between the cost of bunker fuel delivered by the terminating charterer and the bunker fuel sold to the new charterer as a gain or loss within voyage expenses and the cost of bunkers consumed during short-term time charters pursuant to the terms of the time charter agreement. Additionally, we record the lower of cost or market adjustments to re-value the bunker fuel on a quarterly basis, if required. Refer to Note 2 — Summary of Significant Accounting Policies in our Condensed Consolidated Financial Statements.

Voyage expenses increased by \$25.0 million from \$1.0 million during the three months ended June 30, 2017 as compared to \$26.0 million during the three months ended June 30, 2018. This increase was primarily due to the employment of vessels on spot market voyage charters during the second quarter of 2018 which incur significantly higher voyage expenses as compared to time charters, spot market-related time charters and pool arrangements. Additionally, there was an increase in the costs of bunkers consumed during short-term time charters during the second quarter of 2018 as compared to the second quarter of 2017.

VESSEL OPERATING EXPENSES-

Vessel operating expenses decreased marginally by \$0.2 million from \$23.9 million during the three months ended June 30, 2017 to \$23.7 million during the three months ended June 30, 2018. This decrease was primarily due to the operation of a smaller fleet as a result of the sale of five vessels during the first half of 2017.

Daily vessel operating expenses increased marginally to \$4,344 per vessel per day for the three months ended June 30, 2018 from \$4,333 per day for the three months ended March 31, 2017. We believe daily vessel operating expenses are best measured for comparative purposes over a 12-month period in order to take into account all of the expenses that each vessel in our fleet will incur over a full year of operation. Our actual daily vessel operating expenses per vessel for the three months ended June 30, 2018 were \$96 below the weighted-average budgeted rate of \$4,440 per vessel per day for the entire year.

Our vessel operating expenses, which generally represent fixed costs for each vessel, increase to the extent our fleet expands. Other factors beyond our control, some of which may affect the shipping industry in general, including, for

instance, developments relating to market prices for crewing, lubes, and insurance, may also cause these expenses to increase.

CHARTER HIRE EXPENSES-

During the second quarter of 2018, we time chartered-in two third-party vessels which resulted in total expenses of \$509. We did not time charter-in any vessels prior to the second quarter of 2018.

GENERAL AND ADMINISTRATIVE EXPENSES-

We incur general and administrative expenses which relate to our onshore non-vessel-related activities. Our general and administrative expenses include our payroll expenses, including those relating to our executive officers, rent, legal, auditing and other professional expenses. General and administrative expenses include nonvested stock amortization expense which represent the amortization of stock-based compensation that has been issued to our Directors and employees pursuant to Management Incentive Program (the “MIP”) and the 2015 Equity Incentive Plan. Refer to Note 14 — Stock-Based Compensation in our Condensed Consolidated Financial Statements. General and administrative expenses also include legal and professional fees associated with our credit facilities which are not

Table of Contents

capitalizable to deferred financing costs. We expect to incur additional general and administrative expenses during 2018 as a result of our global expansion to Singapore and Denmark.

For the three months ended June 30, 2018 and 2017, general and administrative expenses were \$6.5 million and \$5.8 million, respectively. The \$0.7 million increase was primarily due to an increase in legal and professional fees associated with the refinancing of our debt with the \$460 Million Credit Facility (refer to Note 7 — Debt in our Condensed Consolidated Financial Statements) as well as an increase in compensation expense. These increases were partially offset by a decrease in nonvested stock amortization expense. Refer to Note 14 — Stock-Based Compensation in our Condensed Consolidated Financial Statements for further information.

TECHNICAL MANAGEMENT FEES-

We incur management fees to third-party technical management companies for the day-to-day management of our vessels, including performing routine maintenance, attending to vessel operations and arranging for crews and supplies.

Technical management fees increased marginally to \$2.0 million during the three months ended June 30, 2018 as compared to \$1.9 million during the three months ended June 30, 2017.

DEPRECIATION AND AMORTIZATION-

We depreciate the cost of our vessels on a straight-line basis over the expected useful life of each vessel. Depreciation is based on the cost of the vessel less its estimated residual value. We estimate the useful life of our vessels to be 25 years and we estimate the residual value by taking the estimated scrap value of \$310 per lightweight ton times the weight of the ship in lightweight tons.

Depreciation and amortization expense decreased by \$1.7 million to \$16.5 million during the three months ended June 30, 2018 as compared to \$18.2 million during the three months ended June 30, 2017. This decrease was primarily due to the decrease in depreciation expense for the nine vessels that were deemed to be impaired as of February 27, 2018. These vessels were reduced to their respective fair market values on those date and are being depreciated over their remaining useful life. Additionally, there was a decrease in depreciation expense for the five vessels that were deemed to be impaired as of August 4, 2017 and the Genco Surprise which was initially deemed to be impaired as of June 30, 2017. Refer to Note 2 — Summary of Significant Accounting Policies in our Condensed Consolidated Financial Statements for further information.

IMPAIRMENT OF VESSEL ASSETS-

During the three months ended June 30, 2018 and 2017, we recorded \$0.2 million and \$3.3 million of impairment of vessel assets, respectively. On July 24, 2018, the Company entered into an agreement to sell the Genco Surprise. As the anticipated undiscounted cash flows, including the net sales price, did not exceed the net book value of the vessel as of June 30, 2018, we reduced the carrying value of the Genco Surprise to the net sales price on June 30, 2018. This resulted in an impairment loss of \$0.2 million during the three months ended June 30, 2018.

At June 30, 2017, we determined that the sum of the estimated undiscounted future cash flows attributable to the Genco Surprise did not exceed the carrying value of the vessel at June 30, 2017. As such, we reduced the carrying value of the Genco Surprise to its fair market value as of June 30, 2017, which resulted in an impairment loss of \$3.3 million during the three months ended June 30, 2017.

Refer to Note 2 — Summary of Significant Accounting Policies in our Condensed Consolidated Financial Statement for further information.

GAIN ON SALE OF VESSELS-

During the second quarter of 2017, we recorded a net gain on sale of vessels of \$1.3 million related to the sale of the Genco Prosperity on May 16, 2017. There were no vessels sold during the second quarter of 2018.

Table of Contents

OTHER (EXPENSE) INCOME-

NET INTEREST EXPENSE –

Net interest expense increased by \$0.4 million from \$7.2 million during the three months ended June 30, 2017 to \$7.6 million during the three months ended June 30, 2018. Net interest expense during the three months ended June 30, 2018 and 2017 consisted of interest expense under our credit facilities and amortization of deferred financing costs for those facilities. The increase in net interest expense is primarily due to a \$0.9 million increase in interest expense as a result of higher interest rates during the second quarter of 2018 as compared to the second quarter of 2017. This increase was partially offset by a \$0.5 million increase in interest income earned during the second quarter of 2018 as compared to the same period during 2017 primarily as a result of interest income earned on time deposits and our cash accounts. Refer to Note 7 — Debt in our Condensed Consolidated Financial Statements for information regarding our credit facilities.

LOSS ON DEBT EXTINGUISHMENT –

During the three months ended June 30, 2018, we recorded a \$4.5 million loss on debt extinguishment as a result of the refinancing of our \$400 Million Credit Facility, \$98 Million Credit Facility and 2014 Term Loan Facilities with the \$460 Million Credit Facility on June 5, 2018. Refer to Note 7 — Debt in our Condensed Consolidated Financial Statements for information regarding our credit facilities.

Six months ended June 30, 2018 compared to the six months ended June 30, 2017

VOYAGE REVENUES-

For the six months ended June 30, 2018, voyage revenues increased by \$79.5 million, or 95.0%, to \$163.1 million as compared to \$83.6 million for the six months ended June 30, 2017. The increase in voyage revenues was primarily due to the employment of vessels on spot market voyage charters as well as higher spot market rates achieved by the majority of our vessels.

The average Time Charter Equivalent (“TCE”) rate of our fleet increased 46.4% to \$10,716 a day for the six months ended June 30, 2018 from \$7,318 a day for the six months ended June 30, 2017. The increase in TCE rates was primarily due to higher rates achieved by the majority of the vessels in our fleet during the six months ended June 30, 2018 as compared to the same period last year.

For the six months ended June 30, 2018 and 2017, we had 10,860.0 and 11,167.4 ownership days, respectively. The decrease in ownership days is a result of the sale of five of our vessels during the first half of 2017. Fleet utilization increased marginally to 98.5% during the six months ended June 30, 2018 from 97.9% during the six months ended June 30, 2017.

VOYAGE EXPENSES-

Voyage expenses increased by \$42.9 million from \$4.2 million during the six months ended June 30, 2017 as compared to \$47.1 million during the six months ended June 30, 2018. This increase was primarily due to the employment of vessels on spot market voyage charters during the six months ended June 30, 2018 which incur significantly higher voyage expenses as compared to time charters, spot market-related time charters and pool arrangements. Additionally, there was an increase in the costs of bunkers consumed during short-term time charters during the first half 2018 as compared to the first half of 2017.

VESSEL OPERATING EXPENSES-

Vessel operating expenses decreased by \$1.2 million from \$48.7 million during the six months ended June 30, 2017 to \$47.5 million during the six months ended June 30, 2018. This decrease was primarily due to the operation of a smaller fleet as a result of the sale of five vessels during the first half of 2017.

Table of Contents

Daily vessel operating expenses increased marginally to \$4,373 per vessel per day for the six months ended June 30, 2018 from \$4,364 per day for the six months ended June 30, 2017. We believe daily vessel operating expenses are best measured for comparative purposes over a 12-month period in order to take into account all of the expenses that each vessel in our fleet will incur over a full year of operation. Our actual daily vessel operating expenses per vessel for the six months ended June 30, 2018 were \$67 below the weighted-average budgeted rate of \$4,440 per vessel per day for the entire year.

CHARTER HIRE EXPENSES-

During the six months ended June 30, 2018, we time chartered-in two third-party vessels which resulted in total expenses of \$509. We did not time charter-in any vessels prior to the six months ended June 30, 2018.

GENERAL AND ADMINISTRATIVE EXPENSES-

For the six months ended June 30, 2018 and 2017, general and administrative expenses were \$11.7 million and \$10.7 million, respectively. The \$1.0 million increase was primarily due to an increase in compensation expense as well as an increase in legal and professional fees associated with the refinancing of our debt with the \$460 Million Credit Facility (refer to Note 7 — Debt in our Condensed Consolidated Financial Statements). These increases were partially offset by a decrease in nonvested stock amortization expense. Refer to Note 14 — Stock-Based Compensation in our Condensed Consolidated Financial Statements for further information.

DEPRECIATION AND AMORTIZATION-

Depreciation and amortization expense decreased by \$3.1 million to \$33.3 million during the six months ended June 30, 2018 as compared to \$36.4 million during the three months ended June 30, 2017. This decrease was primarily due to the decrease in depreciation expense for the five vessels that were deemed to be impaired as of August 4, 2017 and the Genco Surprise which was initially deemed to be impaired as of June 30, 2017. Additionally, there was a decrease in depreciation expense for the nine vessels that were deemed to be impaired as of February 27, 2018. These vessels were reduced to their respective fair market values on those date and are being depreciated over their remaining useful life. There was also a decrease in the amortization of drydocking assets as there were less vessels that completed drydocking during the six months ended June 30, 2018 as compared to the same period during 2017. Refer to Note 2 — Summary of Significant Accounting Policies in our Condensed Consolidated Financial Statements for further information regarding impairment.

IMPAIRMENT OF VESSEL ASSETS-

During the six months ended June 30, 2018 and 2017, we recorded \$56.6 million and \$3.3 million of impairment of vessel assets, respectively.

On July 24, 2018, the Company entered into an agreement to sell the Genco Surprise. As the anticipated undiscounted cash flows, including the net sales price, did not exceed the net book value of the vessel as of June 30, 2018, we reduced the carrying value of the Genco Surprise to the net sales price on June 30, 2018. This resulted in an impairment loss of \$0.2 million during the six months ended June 30, 2018.

On February 27, 2018, our Board of Directors determined to dispose of the Company's following nine vessels; the Genco Cavalier the Genco Loire, the Genco Lorraine, the Genco Muse, the Genco Normandy, the Baltic Cougar, the Baltic Jaguar, the Baltic Leopard and the Baltic Panther, at times and on terms to be determined in the future. Given this decision, and that the estimated future undiscounted cash flows for each of these older vessels did not exceed the net book value for each vessel, we have adjusted the values of these older vessels to their respective fair market values during the six months ended June 30, 2018. This resulted in an impairment loss of \$56.4 million during the six months ended June 30, 2018.

At June 30, 2017, we determined that the sum of the estimated undiscounted future cash flows attributable to the Genco Surprise did not exceed the carrying value of the vessel at June 30, 2017. As such, we reduced the carrying

Table of Contents

value of the Genco Surprise to its fair market value as of June 30, 2017, which resulted in an impairment loss of \$3.3 million during the six months ended June 30, 2017.

Refer to Note 2 — Summary of Significant Accounting Policies in our Condensed Consolidated Financial Statement for further information.

GAIN ON SALE OF VESSELS-

During the six months ended June 30, 2017, we recorded a net gain on sale of \$7.7 million related primarily to the sale of the Genco Prosperity, the Genco Success, the Genco Carrier, the Genco Reliance and the Genco Wisdom for which the sales were completed during the first half of 2017. There were no vessels sold during the six months ended June 30, 2018.

OTHER (EXPENSE) INCOME-

NET INTEREST EXPENSE –

Net interest expense increased by \$0.7 million from \$14.2 million during the six months ended June 30, 2017 to \$14.9 million during the six months ended June 30, 2018. Net interest expense during the six months ended June 30, 2018 and 2017 consisted of interest expense under our credit facilities and amortization of deferred financing costs for those facilities. The increase in net interest expense is primarily due to a \$1.9 million increase in interest expense as a result of higher interest rates during the first half of 2018 as compared to the first half of 2017. This increase was partially offset by a \$1.2 million increase in interest income earned during the six months ended June 30, 2018 as compared to the same period during 2017, primarily as a result of interest income earned on time deposits and our cash accounts. Refer to Note 7 — Debt in our Condensed Consolidated Financial Statements for information regarding our credit facilities.

LOSS ON DEBT EXTINGUISHMENT –

During the six months ended June 30, 2018, we recorded a \$4.5 million loss on debt extinguishment as a result of the refinancing of our \$400 Million Credit Facility, \$98 Million Credit Facility and 2014 Term Loan Facilities with the \$460 Million Credit Facility on June 5, 2018. Refer to Note 7 — Debt in our Condensed Consolidated Financial Statements for information regarding our credit facilities.

LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity are cash flow from operations, cash on hand, equity offerings and credit facility borrowings. We currently use our funds primarily for the acquisition of vessels generally and under our ongoing fleet renewal program, drydocking for our vessels, and satisfying working capital requirements as may be needed to support our business and make required payments under our indebtedness. Our ability to continue to meet our liquidity needs is subject to and will be affected by cash utilized in operations, the economic or business environment in which we operate, weakness in shipping industry conditions, the financial condition of our customers, vendors and service providers, our ability to comply with the financial and other covenants of our indebtedness, and other factors.

On June 19, 2018, we closed an equity offering of 7,015,000 shares of common stock at an offering price of \$16.50 per share. We received net proceeds of approximately \$109.7 million after deducting underwriters' discounts and commissions and other expenses. We plan to use the net proceeds to finance a portion of the purchase price for two Capesize and two Ultramax vessels that we have agreed to acquire for a purchase price of approximately \$141 million, as identified in Note 4 — Vessel Acquisitions and Dispositions.

On July 13, 2018, we entered into a commitment letter for a new five-year senior secured credit facility (the "New Credit Facility") to be led by Crédit Agricole Corporate & Investment Bank. We intend to use proceeds from the New Credit Facility to finance or reimburse to us a portion of the purchase price for six vessels, as identified in Note 4 — Vessel Acquisitions and Dispositions and Note 16 — Subsequent Events of our Condensed Consolidated Financial Statements, which are to serve as collateral. The aggregate principal amount of the New Credit Facility is estimated to

Table of Contents

be approximately \$107.0 million, representing 45% of the appraised value of the six vessels. Such amount may be drawn down in up to six borrowings. The commitment letter provides for the following additional key terms:

- Borrowings under the New Credit Facility will bear interest at LIBOR plus 2.50% through September 30, 2019 and LIBOR plus a range of 2.25% to 2.75% thereafter, dependent upon our ratio of total net indebtedness to the last twelve months EBITDA.
- Scheduled amortization payments under the New Credit Facility are to reflect a repayment profile whereby the facility shall have been repaid to nil when the average vessel aged of the collateral vessels reaches 20 years. Assuming borrowing of the full amount estimated above under the New Credit Facility with the third quarter of 2018, such payments are anticipated to be approximately \$1.6 million per quarter commencing on December 31, 2018, with a final balloon payment on the maturity date.
- Mandatory prepayments are to be applied to remaining amortization payments pro rata, while voluntary prepayments are to be applied to remaining amortization payments in order of maturity.
- Dividends may be paid subject to customary conditions and a limitation of 50% of consolidated net income for the quarter preceding such dividend payment if the collateral maintenance test ratio is 200% or less for such quarter.
- Acquisitions and additional indebtedness are allowed subject to compliance with financial covenants, a collateral maintenance test, and other customary conditions.
- Key financial covenants, which are expected to be based on those in the Company's \$460 Million Credit Facility, include:
 - minimum liquidity, with unrestricted cash and cash equivalents to equal or exceed the greater of \$30,000 and 7.5% of total indebtedness (no restricted cash is required);
 - minimum working capital, with consolidated current assets (excluding restricted cash) minus consolidated current liabilities (excluding the current portion of long-term indebtedness) to be not less than zero;
 - debt to capitalization, with the ratio of total indebtedness to total capitalization to be not more than 70%; and
 - collateral maintenance, with the aggregate appraised value of collateral vessels to be at least 135% of the principal amount of the loan outstanding under the New Credit Facility.

Other key provisions are to be based on the \$460 Million Credit Facility. The New Credit Facility is subject to definitive documentation, and borrowings thereunder are expected to be subject to customary conditions.

On May 31, 2018, we entered into a five-year \$460 million senior secured credit facility (the “\$460 Million Credit Facility”). On June 5, 2018, proceeds of \$460.0 million from the \$460 Million Credit Facility were used, together with cash on hand, to refinance all of our prior credit facilities (the \$400 Million Credit Facility, the \$98 Million Credit Facility and the 2014 Term Loan Facilities as defined in Note 7 – Debt of our Condensed Consolidated Financial Statements) into one facility, and pay down the debt of seven of the Company’s oldest vessels, which have been identified for sale. The final maturity date of the facility is May 31, 2023. Borrowings under the facility bear interest at LIBOR plus 325 basis points through December 31, 2018 and LIBOR plus a range of 300 to 350 basis points thereafter, dependent upon our ratio of total net indebtedness to the last twelve months EBITDA. The mandated lead arrangers and bookrunners for this facility are Nordea Bank AB (publ), New York Branch, Skandinaviska Enskilda Banken AB (publ), ABN AMRO Capital USA LLC, DVB Bank SE, Crédit Agricole Corporate & Investment Bank, and Danish Ship Finance A/S. Under the terms of the \$460 Million Credit Facility, amortization is based on a repayment profile in which the loan will be repaid to nil when the average age of the vessels serving as collateral from time to time reaches 17 years,

Table of Contents

following an initial non-amortization period ending December 31, 2018; the first scheduled quarterly amortization payment on December 31, 2018 is \$15.0 million, with a final payment of \$190.0 million due on May 31, 2023; the amortization amounts are to be recalculated based on changes in collateral vessels upon our request; acquisitions and additional indebtedness will no longer be prohibited per the terms of our current credit facilities but will be subject to compliance with financial covenants, a collateral maintenance test, and other customary conditions; dividends may be paid after December 31, 2018 (or potentially earlier if the Company elects to accelerate its first amortization payment due December 31, 2018) subject to customary conditions and a limitation of 50% of consolidated net income for any period during which the collateral maintenance test ratio is 200% or less; and collateral vessels can be sold or disposed of without prepayment of the loan if replaced with a new vessel within 120 days having an equal or greater appraised value if we are in compliance with the collateral maintenance test. Key covenants include minimum liquidity, with unrestricted cash and cash equivalents to equal or exceed the greater of \$30 million and 7.5% of total indebtedness; minimum working capital, with consolidated current assets (excluding restricted cash) minus consolidated current liabilities (excluding the current portion of long-term indebtedness) to be not less than zero; debt to capitalization, with the ratio of total indebtedness to total capitalization to be not more than 70%; and collateral maintenance, with the aggregate appraised value of collateral vessels to be at least 135% of the principal amount of the loan outstanding under the facility. Collateral includes the current vessels in our fleet other than the seven vessels identified for sale; collateral vessel earnings and insurance; and time charters in excess of 24 months in respect of the collateral vessels.

At June 30, 2018, we believe we were in compliance with all financial covenants under the \$460 Million Credit Facility.

While supply and demand fundamentals have been improving since 2017, persistent, historically low rates prior to 2017 resulted in decreases in our prior period revenues. As a result, we experienced negative cash flows, and in turn, our liquidity had been negatively impacted. To address our liquidity and covenant compliance issues at the time, in November 2016 we refinanced or amended our credit facilities and completed a \$125 million capital raise. Based on current market conditions, we believe these measures are sufficient to address such issues and that our capital resources are sufficient to fund our operations for at least the next twelve months.

In the future, we may require capital to fund acquisitions or to improve or support our ongoing operations and debt structure. We may from time to time seek to raise additional capital through equity or debt offerings, selling vessels or other assets, pursuing strategic opportunities, or otherwise. We may also from time to time seek to refinance our indebtedness or obtain waivers or modifications to our credit agreements to obtain more favorable terms, enhance flexibility in conducting our business, or otherwise. We may seek to accomplish any of these independently or in conjunction with one or more of these actions. However, if market conditions are unfavorable, we may be unable to accomplish any of the foregoing on acceptable terms or at all.

Dividends

Our \$460 Million Credit Facility currently does not allow us to pay dividends through December 31, 2018 unless we elect to change the date of our first amortization payment due under the \$460 Million Credit Facility on December 31, 2018 to an earlier date. Following December 31, 2018, under the terms of our \$460 Million Credit Facility, the amount of dividends we pay is subject to customary conditions and a limitation of 50% of consolidated net income for the quarter preceding such dividend payment if the collateral maintenance test ratio is 200% or less for such quarter. The commitment letter entered into on July 13, 2018 for the New Credit Facility (refer to Note 16 — Subsequent Events in our Condensed Consolidated Financial Statements) reflects the same requirements for the amount of dividends as the \$460 Million Credit Facility. Moreover, we would make dividend payments to our shareholders only if our Board of Directors, acting in its sole discretion, determines that such payments would be in our best interest and in compliance with relevant legal and contractual requirements. The principal business factors that our Board of Directors would consider when determining the timing and amount of dividend payments would be our earnings, financial condition and cash requirements at the time. Marshall Islands law generally prohibits the declaration and payment of dividends other than from surplus. Marshall Islands law also prohibits the declaration and payment of dividends while a company is insolvent or would be rendered insolvent by the payment of such a dividend.

Table of Contents

Cash Flow

Net cash provided by operating activities for the six months ended June 30, 2018 was \$25.0 million as compared to net cash used in operating activities for the six months ended June 30, 2017 of \$1.2 million. Included in the net loss during the six months ended June 30, 2018 were \$56.6 million of non-cash impairment charges, as well as a \$4.5 million loss on the extinguishment of debt and a \$5.3 million payment on the \$400 Million Credit Facility. Included in the net loss during the six months ended June 30, 2017 was a gain on sale of vessels in the amount of \$7.7 million due to the sale of five vessels and paid in kind interest incurred of \$3.0 million related to the \$400 Million Credit Facility. Depreciation and amortization expense for the six months ended June 30, 2018 decreased by \$3.0 million primarily due to the revaluation of six of our vessels that were written down to their estimated fair market value during the second and third quarters of 2017, as well as the revaluation of an additional nine of our vessels that were written down to their estimated fair market value during the first quarter of 2018. Additionally, the fluctuation in inventories decreased by \$7.9 million due to additional fuel inventory for our vessels as the result of the employment of our vessels on spot market voyage charters. There was also a \$6.1 million decrease in the fluctuation in due from charterers due to the timing of payments received from charterers. These decreases were partially offset by a \$3.8 million decrease in deferred drydocking costs incurred because there were less vessels that completed drydocking during the six months ended June 30, 2018 as compared to the same period during 2017. Lastly, there was an increase in the fluctuation in accounts payable and accrued expenses of \$3.7 million and an increase in the fluctuation in prepaid expenses and other current assets of \$4.9 million due to the timing of payments.

Net cash provided by investing activities was \$1.9 million during the six months ended June 30, 2018 as compared to \$15.8 million during the six months ended June 30, 2017. The decrease is primarily due to \$15.5 million proceeds from the sale of five vessels during the six months ended June 20, 2017 as compared to no vessels sold during the six months ended June 30, 2018. This decrease was partially offset by a \$2.5 million increase in the insurance proceeds received for hull and machinery claims primarily due to the receipt of the remaining settlement of the main engine repair claim for the Genco Tiger during the six months ended June 30, 2018.

Net cash provided by financing activities during the six months ended June 30, 2018 was \$38.5 million as compared to net cash used in financing activities of \$2.7 million during the six months ended June 30, 2017. Net cash provided by financing activities of \$38.5 million for the six months ended June 30, 2018 consisted primarily of the \$460.0 million drawdown on the \$460 Million Credit Facility and the net proceeds from the issuance of common stock on June 19, 2018 of \$110.2 million partially offset by the following: \$399.6 million repayment of debt under the \$400 Million Credit Facility; \$93.9 million repayment of debt under the \$98 Million Credit Facility; \$25.5 million repayment of debt under the 2014 Term Loan Facilities; \$9.7 million payment of deferred financing costs; and \$3.0 million payment of debt extinguishment costs. On June 5, 2018, the \$460 Million Credit Facility refinanced the following three existing credit facilities; the \$400 Million Credit Facility, the \$98 Million Credit Facility and the 2014 Term Loan Facilities. Net cash used in financing activities of \$2.7 million for the six months ended June 30, 2017 consisted of the following: \$1.4 million repayment of debt under the 2014 Term Loan Facilities; \$1.1 million payment of Series A Preferred Stock issuance costs; and \$0.2 million repayment of debt under the \$400 Million Credit Facility.

Credit Facilities

Refer to Note 7 — Debt in our Condensed Consolidated Financial Statements for information regarding our current credit facilities, including the underlying financial and non-financial covenants. We entered in to the \$460 Million Credit Facility on May 31, 2018 which was used to refinance our prior credit facilities: the \$400 Million Credit Facility, the \$98 Million Credit Facility and the 2014 Term Loan Facilities on June 5, 2018.

At June 30, 2018, we believed we were in compliance with all of the financial covenants under the \$460 Million Credit Facility.

Interest Rate Swap Agreements, Forward Freight Agreements and Currency Swap Agreements

At June 30, 2018 and December 31, 2017, we did not have any interest rate swap agreements. As part of our business strategy, we may enter into interest rate swap agreements to manage interest costs and the risk associated with

Table of Contents

changing interest rates. In determining the fair value of interest rate derivatives, we would consider the creditworthiness of both the counterparty and ourselves immaterial. Valuations prior to any adjustments for credit risk would be validated by comparison with counterparty valuations. Amounts would not and should not be identical due to the different modeling assumptions. Any material differences would be investigated.

As part of our business strategy, we may enter into arrangements commonly known as forward freight agreements, or FFAs, to hedge and manage market risks relating to the deployment of our existing fleet of vessels. These arrangements may include future contracts, or commitments to perform in the future a shipping service between ship owners, charterers and traders. Generally, these arrangements would bind us and each counterparty in the arrangement to buy or sell a specified tonnage freighting commitment “forward” at an agreed time and price and for a particular route. Although FFAs can be entered into for a variety of purposes, including for hedging, as an option, for trading or for arbitrage, if we decided to enter into FFAs, our objective would be to hedge and manage market risks as part of our commercial management. It is not currently our intention to enter into FFAs to generate a stream of income independent of the revenues we derive from the operation of our fleet of vessels. If we determine to enter into FFAs, we may reduce our exposure to any declines in our results from operations due to weak market conditions or downturns, but may also limit our ability to benefit economically during periods of strong demand in the market. We have not entered into any FFAs as of June 30, 2018 and December 31, 2017.

Contractual Obligations

The following table sets forth our contractual obligations and their scheduled maturity dates as of June 30, 2018. The table reflects the agreements to acquire four Capesize vessels and two Ultramax vessels for an aggregate purchase price of \$239 million, refer to Note 4 — Vessel Acquisitions & Dispositions and Note 16 — Subsequent Events of our Condensed Consolidated Financial Statements. We plan to finance these acquisitions with a combination of cash on hand and proceeds from the anticipated “New Credit Facility” as described in Note 16 — Subsequent Events of our Condensed Consolidated Financial Statements. The table also incorporates the employment agreement entered into in September 2007 with our Chief Executive Officer and President, John C. Wobensmith, which was amended on March 23, 2017. The interest and borrowing fees and scheduled credit agreement payments below reflect the \$460 Million Credit Facility, as well as other fees associated with the facility. The following table also incorporates the future lease payments associated with the lease for our current space. Refer to Note 13 — Commitments and Contingencies in our Condensed Consolidated Financial Statements for further information regarding the terms of our current lease agreement.

	Total	Less Than One Year (1)	One to Three Years	Three to Five Years	More than Five Years
	(U.S. dollars in thousands)				
Credit Agreements	\$ 460,000	\$ 15,000	\$ 120,000	\$ 120,000	\$ 205,000
Interest and borrowing fees	93,686	13,161	44,743	31,101	4,681
	238,250	238,250	—	—	—

(2)

Executive employment agreement	144	144	—	—	—
Office leases	16,148	557	4,460	4,460	6,671
Totals	\$ 808,228	\$ 267,112	\$ 169,203	\$ 155,561	\$ 216,352

(1) Represents the six-month period ending December 31, 2018.

(2) The timing of these obligations is based on the estimated delivery dates for the Genco Columbia, Genco Endeavour, Genco Resolute, Genco Defender and Genco Liberty. During July 2018 we paid the remaining purchase price of \$22.3 million for the Genco Weatherly, which delivered on July 26, 2018.

Interest expense has been estimated using 2.35% based on three-month LIBOR plus the applicable margin of 3.25% for the \$460 Million Credit Facility.

Table of Contents

Capital Expenditures

We make capital expenditures from time to time in connection with our vessel acquisitions. After the expected delivery of the four Capesize vessels and one Ultramax vessel and the sale of two Handysize vessels, our fleet will consist of 63 drybulk vessels, including 17 Capesize drybulk carriers, five Panamax drybulk carriers, six Ultramax drybulk carriers, 21 Supramax drybulk carriers, one Handymax drybulk carriers and 13 Handysize drybulk carriers.

As previously announced, we have initiated a fuel efficiency upgrade program for certain of our vessels. We believe this program will generate considerable fuel savings going forward and increase the future earnings potential for these vessels. The upgrades have been successfully installed on 16 of our vessels, which completed their respective planned drydockings during 2014 and 2015. We did not install fuel efficiency upgrades on any vessels during 2016. During the second quarter of 2017, we installed the fuel efficiency upgrade on the Genco London for approximately \$0.2 million during its planned drydocking.

Under U.S. Federal law and 33 CFR, Part 151, Subpart D, U.S. approved ballast water treatment systems (“BWTS”) will be required to be installed in all vessels at the first out of water drydocking after January 1, 2016 if these vessels are to discharge ballast water inside 12 nautical miles of the coast of the U.S. U.S. authorities did not approve ballast water treatment systems until December 2016. Therefore, the U.S. Coast Guard (“USCG”) has granted us extensions for our vessels with 2016 drydocking deadlines until January 1, 2018; however, an alternative management system (“AMS”) may be installed in lieu. For example, in February 2015, the USCG added Bawat to the list of ballast water treatment systems that received AMS acceptance. An AMS is valid for five years from the date of required compliance with ballast water discharge standards, by which time it must be replaced by an approved system unless the AMS itself achieves approval. Furthermore, we received extensions for vessels drydocking in 2016 which allowed for further extensions to the vessels’ next scheduled drydockings in year 2021. Additionally, for our vessels scheduled to drydock in 2017 and 2018, the USCG has granted an extension that enables us to defer installation to the next scheduled out of water drydocking. Any newbuilding vessels that we acquire will have a USCG approved system or at least an AMS installed when the vessel is being built.

In addition, on September 8, 2016, the Ballast Water Management (“BWM”) Convention was ratified and had an original effective date of September 8, 2017. However, on July 7, 2017, the effective date of the BWM Convention was extended two years to September 8, 2019 for existing ships. This will require vessels to have a BWTS installed to coincide with the vessels’ next International Oil Pollution Prevention Certificate (“IOPP”) renewal survey after September 8, 2019. In order for a vessel to trade in U.S. waters, it must be compliant with the installation date as required by the USCG as outlined above.

The cost of these systems will vary based on the size of the vessel, and based on current available quotations assuming the BWTS will be installed in China, the Company estimates the cost of the systems to be \$1.0 million for Capesize, \$0.7 million for Panamax, \$0.7 million for Supramax, \$0.6 million for Handymax and \$0.6 million for Handysize vessels. These costs will be capitalized and depreciated over the remainder of the life of the vessel, assuming the

system the Company installs becomes approved by both the International Maritime Organization (“IMO”) and the USCG. These amounts would be in addition to the amounts budgeted for drydocking below.

In addition to acquisitions that we may undertake in future periods, we will incur additional expenditures due to special surveys and drydockings for our fleet. We estimate our drydocking costs, including capitalized costs incurred during drydocking related to vessel assets and vessel equipment, BWTS costs and scheduled off-hire days for our fleet through 2019 to be:

Year	Estimated Drydocking Cost (U.S. dollars in millions)	Estimated BWTS Cost (U.S. dollars in millions)	Estimated Off-hire Days
2018 (July 1 - December 31, 2018)	\$ 1.7 (1)	\$ 0.6 (2)	40 (3)
2019	\$ 18.9 (1)	\$ 15.4 (2)	510 (3)

Table of Contents

- (1) Estimated drydocking costs during the remainder of 2018 and 2019 include \$0.9 million and \$8.0 million of costs, respectively, for vessels that could potentially be sold which were impaired during the year ended December 31, 2017 or during the six months ended June 30, 2018.
- (2) Estimated BWTS costs during the remainder of 2018 and 2019 include \$0.6 million and \$6.3 million of costs, respectively, for vessels that could potentially be sold which were impaired during the year ended December 31, 2017 or during the six months ended June 30, 2018.
- (3) Estimated offhire days during the remainder of 2018 and 2019 include 20 days and 210 days, respectively, for vessels that could potentially be sold which were impaired during the year ended December 31, 2017 or during the six months ended June 30, 2018.

The costs reflected are estimates based on drydocking our vessels in China. Actual costs will vary based on various factors, including where the drydockings are actually performed. We expect to fund these costs with cash from operations. These costs do not include drydock expense items that are reflected in vessel operating expenses and fuel efficiency upgrades as noted above.

Actual length of drydocking will vary based on the condition of the vessel, yard schedules and other factors. Higher repairs and maintenance expense during drydocking for vessels which are over 15 years old typically result in a higher number of off-hire days depending on the condition of the vessel.

During the six months ended June 30, 2018 and 2017, we incurred a total of \$1.5 million and \$5.3 million of drydocking costs, respectively, excluding costs incurred during drydocking that were capitalized to vessel assets or vessel equipment.

Two of our vessels completed drydockings during the six months ended June 30, 2018. We estimate that two of our vessels will be drydocked during the remainder of 2018 and 23 of our vessels will be drydocked during 2019.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Inflation

Inflation has only a moderate effect on our expenses given current economic conditions. In the event that significant global inflationary pressures appear, these pressures would increase our operating, voyage, general and administrative, and financing costs.

CRITICAL ACCOUNTING POLICIES

There have been no changes or updates to our critical accounting policies as disclosed in the 2017 10-K.

Vessels and Depreciation

We record the value of our vessels at their cost (which includes acquisition costs directly attributable to the vessel and expenditures made to prepare the vessel for its initial voyage) less accumulated depreciation. We depreciate our drybulk vessels on a straight-line basis over their estimated useful lives, estimated to be 25 years from the date of initial delivery from the shipyard. Depreciation is based on cost less the estimated residual scrap value of \$310/lwt based on the 15-year average scrap value of steel. An increase in the residual value of the vessels will decrease the annual depreciation charge over the remaining useful life of the vessels. Similarly, an increase in the useful life of a drybulk vessel would also decrease the annual depreciation charge. Comparatively, a decrease in the useful life of a drybulk vessel or in its residual value would have the effect of increasing the annual depreciation charge. However, when regulations place limitations over the ability of a vessel to trade on a worldwide basis, we will adjust the vessel's useful life to end at the date such regulations preclude such vessel's further commercial use.

Table of Contents

The carrying value of each of our vessels does not represent the fair market value of such vessel or the amount we could obtain if we were to sell any of our vessels, which could be more or less. Under U.S. GAAP, we would not record a loss if the fair market value of a vessel (excluding its charter) is below our carrying value unless and until we determine to sell that vessel or the vessel is impaired as discussed in the 2017 10-K. Excluding the three Bourbon vessels we resold immediately upon delivery to MEP at our cost, we have sold thirteen of our vessels since our inception and realized a profit in each instance, with the exception of the Genco Marine which was scrapped on May 17, 2016. Additionally, we incurred a \$53.8 million loss from the forfeiture of our deposit and related interest when we determined to cancel an acquisition of six drybulk newbuildings in November 2008.

During the three and six months ended June 30, 2018, we recorded losses of \$0.2 million and \$56.6 million, respectively, related to the impairment of vessel assets. There was \$0.2 million of impairment expense recorded during the three and six months ended June 30, 2018 for the Genco Surprise. On July 24, 2018 we entered into an agreement to sell the Genco Surprise. As the anticipated undiscounted cash flows, including the net sales price, did not exceed the net book value of the vessel at June 30, 2018, the vessel value was adjusted to its net sales price as of June 30, 2018. Additionally, there was \$56.4 million of impairment expense recorded during the six months ended June 30, 2018 for nine of our vessels; the Genco Cavalier, the Genco Loire, the Genco Lorraine, the Genco Muse, the Genco Normandy, the Baltic Cougar, the Baltic Jaguar, the Baltic Leopard and the Baltic Panther. On February 27, 2018, our Board of Directors determined to dispose of these vessels at times and on terms to be determined in the future. As such, the future undiscounted cash flows did not exceed the net book value of these vessels and the vessel values were adjusted to their respective fair market values which resulted in an impairment loss. Refer to Note 2 — Summary of Significant Accounting Policies in our Condensed Consolidated Financial Statements for further information.

During the three and six months ended June 30, 2017, we recorded loss of \$3.3 million related to the impairment of vessel assets for the Genco Surprise. At June 30, 2017, we determined that the future undiscounted cash flows did not exceed the net book value for the Genco Surprise; therefore we adjusted the value of the Genco Surprise to its fair market value which resulted in an impairment loss of \$3.3 million. Refer to Note 2 — Summary of Significant Accounting Policies in our Condensed Consolidated Financial Statements for further information.

Pursuant to our credit facilities, we regularly submit to the lenders valuations of our vessels on an individual charter free basis in order to evidence our compliance with the collateral maintenance covenants under our credit facilities. Such a valuation is not necessarily the same as the amount any vessel may bring upon sale, which may be more or less, and should not be relied upon as such. We were in compliance with the collateral maintenance covenant under our \$460 Million Credit Facility as of June 30, 2018. Refer to Note 7 — Debt in our Condensed Consolidated Financial Statements for further details. We obtained valuations for all of the vessels in our fleet pursuant to the terms of the \$460 Million Credit Facility. In the chart below, we list each of our vessels, the year it was built, the year we acquired it, and its carrying value at June 30, 2018 and December 31, 2017. Vessels have been grouped according to their collateralized status as of June 30, 2018. The carrying value of the Genco Cavalier, Genco Loire, Genco Lorraine, Genco Muse, Genco Normandy, Genco Surprise, Baltic Cougar, Baltic Jaguar, Baltic Leopard and Baltic Panther at June 30, 2018 reflect the impairment loss recorded during 2018 for these vessels. The carrying value of the Genco Surprise, Genco Beauty, Genco Explorer, Genco Knight, Genco Progress and Genco Vigour at June 30, 2018 and December 31, 2017 reflect the impairment loss recorded during 2017 for these vessels.

At June 30, 2018, the vessel valuations of all of our vessels for covenant compliance purposes under our credit facility as of the most recent compliance testing date were lower than their carrying values at June 30, 2018, with the exception of the Baltic Lion, Genco Tiger, the nine vessels that were written down to their fair market value during the six months ended June 30, 2018 as noted above (Genco Cavalier, Genco Loire, Genco Lorraine, Genco Muse, Genco Normandy, Baltic Cougar, Baltic Jaguar, Baltic Leopard and Baltic Panther), and the six vessels that were written down to their fair market value during the year ended December 31, 2017 as noted above (Genco Surprise, Genco Beauty, Genco Explorer, Genco Knight, Genco Progress and Genco Vigour). At December 31, 2017, the vessel valuations of all of our vessels for covenant compliance purposes under our credit facilities as of the most recent compliance testing date were lower than their carrying values at December 31, 2017, with the exception of the Baltic Lion, Genco Tiger and the six aforementioned vessels that were written down to their fair market value during the year ended December 31, 2017.

Table of Contents

The amount by which the carrying value at June 30, 2018 of all of the vessels in our fleet, with the exception of the 17 aforementioned vessels, exceeded the valuation of such vessels for covenant compliance purposes ranged, on an individual vessel basis, from \$3.1 million to \$13.2 million per vessel, and \$280.4 million on an aggregate fleet basis. The amount by which the carrying value at December 31, 2017 of all of the vessels in our fleet, with the exception of the eight aforementioned vessels, exceeded the valuation of such vessels for covenant compliance purposes ranged, on an individual vessel basis, from \$3.7 million to \$15.2 million per vessel, and \$395.5 million on an aggregate fleet basis. The average amount by which the carrying value of our vessels exceeded the valuation of such vessels for covenant compliance purposes was \$6.5 million at June 30, 2018 and \$7.6 million as of December 31, 2017. However, neither such valuation nor the carrying value in the table below reflects the value of long-term time charters, if any, related to some of our vessels.

Vessels	Year Built	Year Acquired	Carrying Value (U.S. dollars in thousands) as of	
			June 30, 2018	December 31, 2017
\$460 Million Credit Facility				
Genco Commodus	2009	2009	39,221	40,191

TOTAL			\$ 37,696	\$ 42,959
Consolidated Total			\$ 1,179,689	\$ 1,265,577

If we were to sell a vessel or hold a vessel for sale, and the carrying value of the vessel were to exceed its fair market value, we would record a loss in the amount of the difference. Refer to Note 2 — Summary of Significant Accounting Policies and Note 4 — Vessel Acquisitions and Dispositions in our Condensed Consolidated Financial Statements for information regarding the sale of vessel assets and the classification of the vessel assets held for sale as of June 30, 2018.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate risk

We are exposed to the impact of interest rate changes. Our objective is to manage the impact of interest rate changes on our earnings and cash flow in relation to our borrowings. At June 30, 2018 and December 31, 2017, we did not have any interest rate swap agreements to manage interest costs and the risk associated with changing interest rates.

We are subject to market risks relating to changes in LIBOR rates because we have significant amounts of floating rate debt outstanding. During the three and six months ended June 30, 2018 and 2017, we were subject to the following interest rates on the outstanding debt under our credit facilities:

- \$460 Million Credit Facility — three-month LIBOR plus 3.25% effective June 5, 2018, when the draw down on this facility was made

Table of Contents

- \$400 Million Credit Facility — three-month LIBOR plus 3.75% until June 5, 2018, when this credit facility was refinanced with the \$460 Million Credit Facility
- \$98 Million Credit Facility — three-month LIBOR plus 6.125% until June 5, 2018, when this credit facility was refinanced with the \$460 Million Credit Facility
- 2014 Term Loan Facilities — three-month or six-month LIBOR plus 2.50% until June 5, 2018, when this credit facility was refinanced with the \$460 Million Credit Facility

A 1% increase in LIBOR would result in an increase of \$2.5 million in interest expense for the six months ended June 30, 2018.

Derivative financial instruments

As part of our business strategy, we may enter into interest rate swap agreements to manage interest costs and the risk associated with changing interest rates. As of June 30, 2018 and December 31, 2017, we did not have any derivative financial instruments.

Refer to “Interest rate risk” section above for further information regarding interest rate swap agreements.

Currency and exchange rates risk

The international shipping industry’s functional currency is the U.S. Dollar. Virtually all of our revenues and most of our operating costs are in U.S. Dollars. We incur certain operating expenses in currencies other than the U.S. dollar, and the foreign exchange risk associated with these operating expenses is immaterial.

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our Chief Executive Officer and President and our Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures as defined in Rule 13a-15(e) and 15d-15(e) of the Exchange Act as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and President and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There have been no changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In April 2015, six class action complaints were filed in the Supreme Court of the State of New York, County of New York. On May 26, 2015, the six actions were consolidated under the caption In Re Baltic Trading Ltd. Stockholder Litigation, Index No. 651241/2015, and a consolidated class action complaint was filed on June 10, 2015 (the “Consolidated Complaint”). The Consolidated Complaint is purported to be brought by and on behalf of Baltic Trading’s shareholders and alleges that the then-proposed July 2015 merger did not fairly compensate Baltic Trading’s shareholders and undervalued Baltic Trading. The Consolidated Complaint names as defendants the Company, Baltic

Table of Contents

Trading, the individual members of Baltic Trading's board, and the Company's merger subsidiary. The claims generally allege (i) breaches of fiduciary duties of good faith, due care, disclosure to shareholders, and loyalty, including for failing to maximize shareholder value, and (ii) aiding and abetting those breaches. Among other relief, the complaints seek an injunction against the merger, declaratory judgments that the individual defendants breached fiduciary duties, rescission of the merger agreement, and unspecified damages.

On July 9, 2015, plaintiffs in that action moved to enjoin the merger vote, scheduled to take place on July 17, 2015. The motion was thereafter fully briefed and argued on July 15, 2015. The motion to enjoin the vote was denied on July 15, 2015. Plaintiffs sought an emergency injunction and temporary restraining order from the New York State Appellate Division, First Department the following day, on July 16, 2015. The Appellate Division denied the request, and the vote, and subsequent merger, proceeded as scheduled on July 17, 2015. Plaintiffs thereafter withdrew that appeal.

On June 30, 2015, defendants had moved to dismiss the Consolidated Complaint in its entirety. Plaintiffs subsequently served an Amended Consolidated Complaint, and defendants directed their motion to dismiss to that amended complaint. The motion to dismiss was granted and the Amended Consolidated Complaint was dismissed with prejudice on August 29, 2016. By a Decision and Order dated April 26, 2018, the New York State Appellate Division, First Department affirmed the dismissal of the amended complaint. The time for plaintiffs to file a motion for leave to appeal to the New York State Court of Appeals has expired.

We have not been involved in any other legal proceedings which we believe are likely to have, or have had a significant effect on our business, financial position, results of operations or cash flows, nor are we aware of any proceedings that are pending or threatened which we believe are likely to have a significant effect on our business,

financial position, results of operations or liquidity. From time to time, we may be subject to legal proceedings and claims in the ordinary course of business, principally personal injury and property casualty claims. We expect that these claims would be covered by insurance, subject to customary deductibles. Those claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in the 2017 10-K, which could materially affect our business, financial condition or future results. Below is updated information for the risk factor entitled, "We are subject to regulation and liability under environmental and operational safety laws that could require significant expenditures and affect our cash flows and net income and could subject us to increased liability under applicable law or regulation":

On October 27, 2016, at the 70th session of the Marine Environment Protection Committee (“MEPC”), the MEPC announced the results from a vote to ratify and formalize regulations mandating a reduction in sulfur emissions from 3.5% currently to 0.5% as of the beginning of 2020 rather than pushing the deadline back to 2025. By 2020, ships will now have to either remove sulfur from emissions through the use of emission scrubbers or buy fuel with low sulfur content. If a vessel is not retrofitted with a scrubber, it will need to use low sulfur fuel, which is more expensive than standard marine fuel. This increased demand for low sulfur fuel may result in an increase in prices for such fuel.

We are currently evaluating whether we will install scrubbers on our vessels or use low sulfur fuel, which will depend on such factors as relative cost and the feasibility of the technology. We currently estimate that scrubbers would cost approximately \$2-\$4 million per vessel to install on any of our existing vessels.

ITEM 6. EXHIBITS
