NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Triumph Bancorp, Inc. (collectively with its subsidiaries, “Triumph”, or the “Company” as applicable) is a financial holding company headquartered in Dallas, Texas. The accompanying consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries Triumph CRA Holdings, LLC (“TCRA”), TBK Bank, SSB (“TBK Bank”), TBK Bank’s wholly owned subsidiary Advance Business Capital LLC, which currently operates under the d/b/a of Triumph Business Capital (“TBC”), and TBK Bank’s wholly owned subsidiary Triumph Insurance Group, Inc. (“TIG”).

On March 16, 2018, the Company sold the assets of Triumph Healthcare Finance (“THF”) and exited its healthcare asset-based lending line of business. THF operated within the Company’s TBK Bank subsidiary. See Note 2 – Business Combinations and Divestitures for details of the THF sale and its impact on our consolidated financial statements.

Principles of Consolidation and Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of the Company have been prepared in accordance with United States Generally Accepted Accounting Principles (“GAAP”) for interim financial information and in accordance with guidance provided by the Securities and Exchange Commission. Accordingly, the condensed financial statements do not include all of the information and footnotes required by GAAP for complete financial statements. The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all normal and recurring adjustments considered necessary for a fair presentation. Transactions between the subsidiaries have been eliminated. These condensed consolidated financial statements should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2018. Operating results for the three months ended March 31, 2019 are not necessarily indicative of the results that may be expected for the year ending December 31, 2019.

The Company has three reportable segments consisting of Banking, Factoring, and Corporate. The Company’s Chief Executive Officer uses segment results to make operating and strategic decisions.

Premises and Equipment

The Company leases certain properties and equipment under operating leases. For leases in effect upon adoption of Accounting Standards Update 2016-02, “Leases (Topic 842)” at January 1, 2019 and for any leases commencing thereafter, the Company recognizes a liability to make lease payments, the “lease liability”, and an asset representing the right to use the underlying asset during the lease term, the “right-of-use asset”. The lease liability is measured at the present value of the remaining lease payments, discounted at the Company’s incremental borrowing rate. The right-of-use asset is measured at the amount of the lease liability adjusted for the remaining balance of any lease

incentives received, any cumulative prepaid or accrued rent if the lease payments are uneven throughout the lease term, any unamortized initial direct costs, and any impairment of the right-of-use-asset. Operating lease expense consists of a single lease cost calculated so that the remaining cost of the lease is allocated over the remaining lease term on a straight-line basis, variable lease payments not included in the lease liability, and any impairment of the right-of-use asset.

Certain of the Company's leases contain options to renew the lease; however, these renewal options are not included in the calculation of the lease liabilities as they are not reasonably certain to be exercised. The Company's leases do not contain residual value guarantees or material variable lease payments. The Company does not have any material restrictions or covenants imposed by leases that would impact the Company's ability to pay dividends or cause the Company to incur additional financial obligations.

The Company has made an accounting policy election to not apply the recognition requirements in Topic 842 to short-term leases. The Company has also elected to use the practical expedient to make an accounting policy election for property leases to include both lease and nonlease components as a single component and account for it as a lease.

The Company's leases are not complex; therefore there were no significant assumptions or judgements made in applying the requirements of Topic 842, including the determination of whether the contracts contained a lease, the allocation of consideration in the contracts between lease and nonlease components, and the determination of the discount rates for the leases.

Adoption of New Accounting Standards

In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-02, “Leases (Topic 842)” (“ASU 2016-02”). The FASB issued this ASU to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet by lessees for those leases classified as operating leases under current U.S. GAAP and disclosing key information about leasing arrangements. The new standard was adopted by the Company on January 1, 2019. ASU 2016-02 provides for a modified retrospective transition approach requiring lessees to recognize and measure leases on the balance sheet at the beginning of either the earliest period presented or as of the beginning of the period of adoption. The Company elected to apply ASU 2016-02 as of the beginning of the period of adoption (January 1, 2019) and will not restate comparative periods. Adoption of ASU 2016-02 resulted in the recognition of lease liabilities totaling \$21,918,000 and the recognition of right-of-use assets totaling \$22,123,000 as of the date of adoption. Lease liabilities and right-of-use assets are reflected in other liabilities and other assets, respectively. The initial balance sheet gross up upon adoption was primarily related to operating leases of certain real estate properties. The Company has no finance leases or material subleases or leasing arrangements for which it is the lessor of property or equipment. The Company has elected to apply the package of practical expedients allowed by the new standard under which the Company need not reassess whether any expired or existing contracts are leases or contain leases, the Company need not reassess the lease classification for any expired or existing lease, and the Company need not reassess initial direct costs for any existing leases. Adoption of ASU 2016-02 is not expected to materially change the Company’s recognition of lease expense in future periods. See Note 5 – Premises and Equipment for additional disclosures related to leases.

Newly Issued, But Not Yet Effective Accounting Standards

In June 2016, the FASB issued ASU 2016-13, “Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments” (“ASU 2016-13”). ASU 2016-13 makes significant changes to the accounting for credit losses on financial instruments and disclosures about them. The new current expected credit loss (CECL) impairment model will require an estimate of expected credit losses, measured over the contractual life of an instrument, which considers reasonable and supportable forecasts of future economic conditions in addition to information about past events and current conditions. The standard provides significant flexibility and requires a high degree of judgment with regards to pooling financial assets with similar risk characteristics, determining the contractual terms of said financial assets and adjusting the relevant historical loss information in order to develop an estimate of expected lifetime losses. In addition, ASU 2016-13 amends the accounting for credit losses on debt securities and purchased financial assets with credit deterioration. The amendments in ASU 2016-13 are effective for fiscal years beginning after December 31, 2019, and interim periods within those years for public business entities that are SEC filers. The Company will adopt ASU 2016-13 on January 1, 2020. Early adoption is permitted for fiscal years, and interim periods within those years, beginning after December 15, 2018, however, the Company does not currently plan to early adopt the ASU. ASU 2016-13 permits the use of estimation techniques that are practical and relevant to the Company’s circumstances, as long as they are applied consistently over time and faithfully estimate expected credit losses in accordance with the standard. The ASU lists several common credit loss methods that are acceptable such as a discounted cash flow (DCF) method, loss-rate method and roll-rate method. Depending on the nature of each identified pool of financial assets with similar risk characteristics, the Company currently plans on implementing a DCF method or a loss-rate method to estimate expected credit losses. The Company expects ASU 2016-13 to have a significant impact on the Company’s accounting policies, internal controls over financial reporting

and footnote disclosures. The Company has assessed its data and system needs and has begun designing its financial models to estimate expected credit losses in accordance with the standard. Further development, testing and evaluation of said models is required to determine the impact that adoption of this standard will have on the financial condition and results of operations of the Company.

NOTE 2 – Business combinations AND DIVESTITURES

First Bancorp of Durango, Inc. and Southern Colorado Corp.

Effective September 8, 2018 the Company acquired (i) First Bancorp of Durango, Inc. (“FBD”) and its community banking subsidiaries, The First National Bank of Durango and Bank of New Mexico and (ii) Southern Colorado Corp. (“SCC”) and its community banking subsidiary, Citizens Bank of Pagosa Springs, in all-cash transactions. The acquisitions expanded the Company’s market in Colorado and into New Mexico and further diversified the Company’s loan, customer, and deposit base.

The Company has recognized goodwill of \$72,075,000, which was calculated as the excess of both the consideration exchanged and the liabilities assumed as compared to the fair value of identifiable net assets acquired and was allocated to the Company's Banking segment. The goodwill in these acquisitions resulted from expected synergies and expansion in the Colorado market and into the New Mexico market. The goodwill will be deducted for tax purposes. The intangible assets recognized in the transactions will be amortized utilizing an accelerated method over their ten year estimated useful lives. The initial accounting for the acquisitions has not been completed because the fair values of the assets acquired and liabilities assumed have not yet been finalized.

In connection with the acquisitions, the Company acquired loans both with and without evidence of credit quality deterioration since origination. The acquired loans were initially recorded at fair value with no carryover of any allowance for loan and lease losses. Acquired loans were segregated between those considered to be purchased credit impaired ("PCI") loans and those without credit impairment at acquisition. The following table presents details of the estimated fair value of acquired loans at the acquisition date:

Interstate Capital Corporation

On June 2, 2018, the Company acquired substantially all of the operating assets of, and assumed certain liabilities associated with, Interstate Capital Corporation's ("ICC") accounts receivable factoring business and other related financial services. ICC operates out of offices located in El Paso, Texas and Santa Teresa, New Mexico and provides invoice factoring to small and medium-sized businesses.

A summary of the estimated fair values of assets acquired, liabilities assumed, consideration transferred, and the resulting goodwill is as follows:

| (Dollars in thousands) | |
|-----------------------------------|----------|
| Assets acquired: | |
| Cash and cash equivalents | \$75 |
| Factored receivables | 131,017 |
| Premises and equipment | 279 |
| Intangible assets | 13,920 |
| Other assets | 144 |
| | 145,435 |
| Liabilities assumed: | |
| Deposits | 7,389 |
| Other liabilities | 763 |
| | 8,152 |
| Fair value of net assets acquired | 137,283 |
| Consideration: | |
| Cash paid | 160,258 |
| Contingent consideration | 20,000 |
| Total consideration | 180,258 |
| Goodwill | \$42,975 |

ICC's net assets acquired were allocated to the Company's Factoring segment whose factoring operations were significantly expanded as a result of the transaction. The Company has recognized goodwill of \$42,975,000, which was calculated as the excess of both the fair value of cash consideration exchanged and the fair value of the contingent liability assumed as compared to the fair value of identifiable net assets acquired and was allocated to the Company's Factoring segment. The goodwill in this acquisition resulted from expected synergies and expansion in the factoring market. The goodwill will be deducted for tax purposes. The intangible assets recognized include a customer relationship intangible asset with an acquisition date fair value of \$13,500,000 which will be amortized utilizing an accelerated method over its eight year estimated useful life and a trade name intangible asset with an acquisition date fair value of \$420,000 which will be amortized on a straight-line basis over its three year estimated useful life.

Consideration paid included contingent consideration with an acquisition date fair value of \$20,000,000. The contingent consideration is based on a proprietary index designed to approximate the rise and fall of transportation invoice prices subsequent to acquisition and is correlated to monthly movements in average invoice prices historically experienced by ICC. At the end of a 30 month earnout period, a final average index price will be calculated and the contingent consideration will be settled in cash based on the final average index price. Final contingent consideration

payout will range from \$0 to \$22,000,000, and the fair value of the associated liability will be remeasured each reporting period with changes in fair value recorded in noninterest income in the consolidated statements of income. The fair value of the contingent consideration was \$21,006,000 at March 31, 2019.

Revenue and earnings of ICC since the acquisition date have not been disclosed as the acquired company was merged into the Company and separate financial information is not readily available. The initial accounting for the acquisition has not been completed because the fair values of the assets acquired and liabilities assumed have not yet been finalized.

Management evaluates debt securities for other than temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the security for a period of time sufficient to allow for any anticipated recovery in fair value.

At March 31, 2019, the Company had 144 debt securities in an unrealized loss position. Management does not have the intent to sell any of these securities and believes that it is more likely than not that the Company will not have to sell any such securities before a recovery of cost. The fair value is expected to recover as the securities approach their maturity date or repricing date or if market yields for such investments decline. Management does not believe that any of the securities are impaired due to reasons of credit quality. Accordingly, as of March 31, 2019, management believes that the unrealized losses detailed in the previous table are temporary and no other than temporary impairment loss has been recognized in the Company's consolidated statements of income.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The difference between the recorded investment and the unpaid principal is primarily (1) premiums and discounts associated with acquisition date fair value adjustments on acquired loans (both PCI and non-PCI) totaling \$17,861,000 and \$19,514,000 at March 31, 2019 and December 31, 2018, respectively, and (2) net deferred origination and factoring fees totaling \$2,710,000 and \$2,579,000 at March 31, 2019 and December 31, 2018, respectively.

At March 31, 2019 and December 31, 2018, the Company had \$54,295,000 and \$58,566,000, respectively, of customer reserves associated with factored receivables. These amounts represent customer reserves held to settle any payment disputes or collection shortfalls, may be used to pay customers' obligations to various third parties as directed by the customer, are periodically released to or withdrawn by customers, and are reported as deposits in the consolidated balance sheets.

Loans with carrying amounts of \$971,582,000 and \$847,523,000 at March 31, 2019 and December 31, 2018, respectively, were pledged to secure Federal Home Loan Bank borrowing capacity.

Credit Quality Information

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt, including: current collateral and financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans as to credit risk on a regular basis. Large groups of smaller balance homogeneous loans, such as consumer loans, are analyzed primarily based on payment status. The Company uses the following definitions for risk ratings:

Pass – Pass rated loans have low to average risk and are not otherwise classified.

Classified – Classified loans are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the repayment of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. Certain classified loans have the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

PCI – At acquisition, PCI loans had the characteristics of classified loans and it was probable, at acquisition, that all contractually required principal and interest payments would not be collected. The Company evaluates these loans on a projected cash flow basis with this evaluation performed quarterly.

As of March 31, 2019 and December 31, 2018, based on the most recent analysis performed, the risk category of loans is as follows:

| (Dollars in thousands) | | | | |
|--------------------------------------|--------------|------------|-----------|--------------|

During the three months ended March 31, 2019, the Company had one relationship consisting of seven loans modified as a troubled debt restructuring with a recorded investment of \$688,000 for which there was a payment default within twelve months following the modification. During the three months ended March 31, 2018, the Company had one loan modified as a troubled debt restructuring with a recorded investment of \$156,000 for which there was a payment default within twelve months following the modification. Default is determined at 90 or more days past due.

Residential Real Estate Loans In Process of Foreclosure

At March 31, 2019, the Company had \$748,000 in 1-4 family residential real estate loans for which formal foreclosure proceedings were in process.

Purchased Credit Impaired Loans

The Company has loans that were acquired, for which there was, at acquisition, evidence of deterioration of credit quality since origination and for which it was probable, at acquisition, that all contractually required payments would not be collected. The outstanding contractually required principal and interest and the carrying amount of these loans included in the balance sheet amounts of loans are as follows:

| | March 31, 2019 | December 31, 2018 |
|---|-------------------|-------------------------|

NOTE 5 – PREMISES AND EQUIPMENT

The Company leases certain premises and equipment under operating leases. At March 31, 2019, the Company had lease liabilities totaling \$21,609,000 and right-of-use assets totaling \$21,793,000 related to these leases. Lease liabilities and right-of-use assets are reflected in other liabilities and other assets, respectively. For the three months ended March 31, 2019, the weighted average remaining lease term for operating leases was 6.7 years and the weighted average discount rate used in the measurement of operating lease liabilities was 3.4%.

Lease costs were as follows:

| | Three Months Ended March 31, 2019 |
|------------------------|---|
| (Dollars in thousands) | |
| Operating lease cost | \$ 1,053 |
| Short-term lease cost | — |
| Variable lease cost | 114 |
| Total lease cost | \$ 1,167 |

Rent expense for the three months ended March 31, 2018, prior to the adoption of ASU 2016-02, was \$599,000.

There were no sale and leaseback transactions, leveraged leases, or lease transactions with related parties during the three months ended March 31, 2019. At March 31, 2019, the Company had leases that had not yet commenced, but will create approximately \$1,500,000 of additional lease liabilities and right-of-use assets for the Company.

A maturity analysis of operating lease liabilities and reconciliation of the undiscounted cash flows to the total operating lease liability is as follows:

| (Dollars in thousands) | March 31, 2019 |

NOTE 7 – Variable Interest Entities

Collateralized Loan Obligation Funds – Closed

The Company holds investments in the subordinated notes of the following closed CLO funds:

| (Dollars in thousands) | Offering Date | Offering Amount |
|------------------------------------|--------------------|--------------------|
| Trinitas CLO IV, LTD (Trinitas IV) | June 2, 2016 | \$406,650 |
| Trinitas CLO V, LTD (Trinitas V) | September 22, 2016 | \$409,000 |
| Trinitas CLO VI, LTD (Trinitas VI) | June 20, 2017 | \$717,100 |

The carrying amounts of the Company's investments in the subordinated notes of the CLO funds, which represent the Company's maximum exposure to loss as a result of its involvement with the CLO funds, totaled \$8,499,000 and \$8,487,000 at March 31, 2019 and December 31, 2018, respectively, and are classified as held to maturity securities within the Company's consolidated balance sheets.

The Company performed a consolidation analysis to confirm whether the Company was required to consolidate the assets, liabilities, equity or operations of the closed CLO funds in its financial statements. The Company concluded that the closed CLO funds were variable interest entities and that the Company holds variable interests in the entities in the form of its investments in the subordinated notes of entities. However, the Company also concluded that the Company does not have the power to direct the activities that most significantly impact the entities' economic performance. As a result, the Company was not the primary beneficiary and therefore was not required to consolidate the assets, liabilities, equity, or operations of the closed CLO funds in the Company's financial statements.

NOTE 8 - Legal Contingencies

Various legal claims have arisen from time to time in the normal course of business which, in the opinion of management, do not have a material effect on the Company's consolidated financial statements.

NOTE 9 - OFF-BALANCE SHEET LOAN COMMITMENTS

From time to time, the Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheet. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments.

The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet financial instruments.

| Standby letters of credit | 1,807 | 4,063 | 5,870 | 2,285 | 3,931 | 6,216 |
| Mortgage warehouse commitments | — | 306,508 | 306,508 | — | 266,458 | 266,458 |

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being fully drawn upon, the total commitment amounts disclosed above do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if considered necessary by the Company, upon extension of credit, is based on management's credit evaluation of the customer.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. In the event of nonperformance by the customer, the Company has rights to the underlying collateral, which can include commercial real estate, physical plant and property, inventory, receivables, cash and marketable securities. The credit risk to the Company in issuing letters of credit is essentially the same as that involved in extending loan facilities to its customers.

Mortgage warehouse commitments are unconditionally cancellable and represent the unused capacity on mortgage warehouse facilities the Company has approved. The Company reserves the right to refuse to buy any mortgage loans offered for sale by a customer, for any reason, at the Company's sole and absolute discretion.

The Company records an allowance for loan and lease losses on off-balance sheet lending-related commitments through a charge to other noninterest expense on the Company's consolidated statements of income. At March 31, 2019 and December 31, 2018, the allowance for loan and lease losses on off-balance sheet lending-related commitments totaled \$537,000 and \$538,000, respectively, and was included in other liabilities on the Company's consolidated balance sheets.

In addition to the commitments above, the Company had overdraft protection available in the amounts of \$2,776,000 and \$3,087,000 at March 31, 2019 and December 31, 2018, respectively.

NOTE 10 - Fair Value Disclosures

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2 – Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Significant unobservable inputs that reflect a company’s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The methods of determining the fair value of assets and liabilities presented in this note are consistent with the methodologies disclosed in Note 15 of the Company’s 2018 Form 10-K.

On June 2, 2018, the Company acquired substantially all of the operating assets of, and assumed certain liabilities associated with, Interstate Capital Corporation's ("ICC") accounts receivable factoring business and other related financial services. Consideration for the acquisition included contingent consideration, which is based on a proprietary index designed to approximate the rise and fall of transportation invoice prices subsequent to acquisition. The index is calculated by a third party data analytics firm and is correlated to monthly movements in average invoice prices historically experienced by ICC. At the end of a 30 month earnout period after closing, a final average index price will be calculated and the contingent consideration will be settled in cash based on the final average index price, with a payout ranging from \$0 to \$22,000,000. The fair value of the contingent consideration is calculated each reporting period, and changes in the fair value of the contingent consideration are recorded in noninterest income in the consolidated statements of income. At March 31, 2019 and December 31, 2018, the ICC contingent consideration liability was the only recurring fair value measurement with Level 3 unobservable inputs. At March 31, 2019 and December 31, 2018, the fair value calculation of the contingent consideration resulted in a payout of \$22,000,000, and discount rates of 2.6% and 2.9%, respectively, were applied to calculate the present value of the contingent consideration. A reconciliation of the opening balance to the closing balance of the fair value of the contingent consideration is as follows:

Impaired Loans with Specific Allocation of ALLL: A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due pursuant to the contractual terms of the loan agreement. Impairment is measured by estimating the fair value of the loan based on the present value of expected cash flows, the market price of the loan, or the underlying fair value of the loan's collateral. For real estate loans, fair value of the impaired loan's collateral is determined by third party appraisals, which are then adjusted for the estimated selling and closing costs related to liquidation of the collateral. For this asset class, the actual valuation methods (income, sales comparable, or cost) vary based on the status of the project or property. For example, land is generally based on the sales comparable method while construction is based on the income and/or sales comparable methods. The unobservable inputs may vary depending on the individual assets with no one of the three methods being the predominant approach. The Company reviews the third party appraisal for appropriateness and adjusts the value downward to consider selling and closing costs, which typically range from 5% to 8% of the appraised value. For non-real estate loans, fair value of the impaired loan's collateral may be determined using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business.

OREO: OREO is primarily comprised of real estate acquired in partial or full satisfaction of loans. OREO is recorded at its estimated fair value less estimated selling and closing costs at the date of transfer, with any excess of the related loan balance over the fair value less expected selling costs charged to the ALLL. Subsequent changes in fair value are reported as adjustments to the carrying amount and are recorded against earnings. The Company outsources the valuation of OREO with material balances to third party appraisers. For this asset class, the actual valuation methods (income, sales comparable, or cost) vary based on the status of the project or property. For example, land is generally based on the sales comparable method while construction is based on the income and/or sales comparable methods. The unobservable inputs may vary depending on the individual assets with no one of the three methods being the predominant approach. The Company reviews the third party appraisal for appropriateness and adjusts the value downward to consider selling and closing costs, which typically range from 5% to 8% of the appraised value.

NOTE 11 - Regulatory Matters

The Company (on a consolidated basis) and TBK Bank are subject to various regulatory capital requirements administered by federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's or TBK Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and TBK Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and TBK Bank to maintain minimum amounts and ratios (set forth in the table below) of total, common equity Tier 1, and Tier 1 capital to risk weighted assets, and of Tier 1 capital to average assets. Management believes, as of March 31, 2019 and December 31, 2018, the Company and TBK Bank meet all capital adequacy requirements to which they are subject.

As of March 31, 2019 and December 31, 2018, TBK Bank's capital ratios exceeded those levels necessary to be categorized as "well capitalized" under the regulatory framework for prompt corrective action. To be categorized as "well capitalized," TBK Bank must maintain minimum total risk based, common equity Tier 1 risk based, Tier 1 risk based, and Tier 1 leverage ratios as set forth in the table below. There are no conditions or events since March 31, 2019 that management believes have changed TBK Bank's category.

Dividends paid by TBK Bank are limited to, without prior regulatory approval, current year earnings and earnings less dividends paid during the preceding two years.

Beginning in January 2016, the implementation of the capital conservation buffer set forth by the Basel III regulatory capital framework was effective for the Company starting at 0.625% of risk weighed assets above the minimum risk based capital ratio requirements and increasing 0.625% each year thereafter, until it reached 2.5% on January 1, 2019. The capital conservation buffer was 2.5% and 1.875% at March 31, 2019 and December 31, 2018, respectively. The capital conservation buffer is designed to absorb losses during periods of economic stress and requires increased capital levels for the purpose of capital distributions and other payments. Failure to meet the full amount of the buffer will result in restrictions on the Company's ability to make capital distributions, including dividend payments and stock repurchases, and to pay discretionary bonuses to executive officers. At March 31, 2019 and December 31, 2018, the Company's and TBK Bank's risk based capital exceeded the required capital conservation buffer.

Restricted Stock Awards

A summary of changes in the Company's nonvested Restricted Stock Awards ("RSAs") under the Omnibus Incentive Plan for the three months ended March 31, 2019 were as follows:

| Nonvested RSAs | Shares | Weighted-Average Grant-Date Fair Value |
|------------------------------|----------|--|
| Nonvested at January 1, 2019 | 101,213 | \$ 31.47 |
| Granted | 8,063 | 31.25 |
| Vested | (7,028) | 30.88 |
| Forfeited | (1,276) | 30.65 |
| Nonvested at March 31, 2019 | 100,972 | \$ 31.50 |

RSAs granted to employees under the Omnibus Incentive Plan typically vest over three to four years, but vesting periods may vary. Compensation expense for RSAs will be recognized over the vesting period of the awards based on the fair value of the stock at the issue date. At March 31, 2019, there was \$1,417,000 of unrecognized compensation cost related to nonvested RSAs. The cost is expected to be recognized over a remaining weighted average period of 2.69 years.

Restricted Stock Units

A summary of changes in the Company's nonvested Restricted Stock Units ("RSUs") under the Omnibus Incentive Plan for the three months ended March 31, 2019 were as follows:

| Nonvested RSUs | Shares | Weighted Average Grant Date Fair Value |
|------------------------------|----------|---|
| Nonvested at January 1, 2019 | 59,658 | \$ 38.75 |
| Granted | — | — |
| Vested | — | — |
| Forfeited | (1,258) | 38.75 |
| Nonvested at March 31, 2019 | 58,400 | \$ 38.75 |

RSUs granted to employees under the Omnibus Incentive Plan vest after five years. Compensation expense for the RSUs will be recognized over the vesting period of the awards based on the fair value of the stock at the issue date. At March 31, 2019, there was \$1,848,000 of unrecognized compensation cost related to the nonvested RSUs. The cost is expected to be recognized over a remaining period of 4.09 years.

Performance Stock Units

A summary of changes in the Company's nonvested Performance Stock Units ("PSUs") under the Omnibus Incentive Plan for the three months ended March 31, 2019 were as follows:

| Nonvested PSUs | Shares | Weighted Average Grant Date Fair Value |
|------------------------------|----------|---|
| Nonvested at January 1, 2019 | 59,658 | \$ 38.57 |
| Granted | — | — |
| Vested | — | — |
| Forfeited | (1,258) | 38.57 |
| Nonvested at March 31, 2019 | 58,400 | \$ 38.57 |

PSUs granted to employees under the Omnibus Incentive Plan vest after five years. The number of shares issued upon vesting will range from 0% to 175% of the PSUs granted based on the Company's relative total shareholder return ("TSR") as compared to the TSR of a specified group of peer banks. Compensation expense for the PSUs will be recognized over the vesting period of the awards based on the fair value of the award at the grant date. The fair value of PSUs granted is estimated using a Monte Carlo simulation. Expected volatilities are determined based on the historical volatilities of the Company and the specified peer group. The risk-free interest rate for the performance period is derived from the Treasury constant maturities yield curve on the valuation date.

At March 31, 2019, there was \$1,839,000 of unrecognized compensation cost related to the nonvested PSUs. The cost is expected to be recognized over a remaining period of 4.09 years.

Stock Options

A summary of changes in the Company's stock options under the Omnibus Incentive Plan for the three months ended March 31, 2019 were as follows:

| Stock Options | Shares | Exercise Price | Weighted-Average | Aggregate |
|---|----------|----------------|---------------------------------------|--------------------------------|
| | | | Remaining Contractual Term (In Years) | Intrinsic Value (In Thousands) |
| Outstanding at January 1, 2019 | 231,467 | \$ 23.43 | | |
| Granted | — | — | | |
| Exercised | — | — | | |
| Forfeited or expired | (3,082) | 28.78 | | |
| Outstanding at March 31, 2019 | 228,385 | \$ 23.36 | 7.68 | \$ 1,852 |
| Fully vested shares and shares expected to vest at March 31, 2019 | 228,385 | \$ 23.36 | 7.68 | \$ 1,852 |
| Shares exercisable at March 31, 2019 | 75,550 | \$ 17.73 | 7.09 | \$ 881 |

Information related to the stock options for the three months ended March 31, 2019 and 2018 was as follows:

| | Three Months Ended March 31, 2019 | 2018 |
|--|-----------------------------------|-------|
| (Dollars in thousands, except per share amounts) | | |
| Aggregate intrinsic value of options exercised | \$— | \$ 10 |
| Cash received from option exercises | \$— | \$ — |
| Tax benefit realized from option exercises | \$— | \$ 2 |
| Weighted average fair value of options granted | \$— | \$ — |

Stock options awarded to employees under the Omnibus Incentive Plan are generally granted with an exercise price equal to the market price of the Company's common stock at the date of grant, vest over four years, and have ten year contractual terms. Contractual terms of exercisable options may be shortened due to termination of a participant's

employment. The fair value of stock options granted is estimated at the date of grant using the Black-Scholes option-pricing model. Expected volatilities are determined based on a blend of the Company's historical volatility and historical volatilities of a peer group of companies with a similar size, industry, stage of life cycle, and capital structure. The expected term of options granted is determined based on the SEC simplified method, which calculates the expected term as the mid-point between the weighted average time to vesting and the contractual term. The risk-free interest rate for the expected term of options is derived from the Treasury constant maturity yield curve on the valuation date.

At March 31, 2019, there was \$496,000 of unrecognized compensation cost related to nonvested stock options. The cost is expected to be recognized over a remaining weighted average period of 2.68 years.

NOTE 15 – BUSINESS SEGMENT INFORMATION

The following table presents the Company's operating segments. The accounting policies of the segments are the same as those described in the "Summary of Significant Accounting Policies" in Note 1 of the Company's 2018 Form 10-K. Transactions between segments consist primarily of borrowed funds. Beginning in 2019, intersegment interest expense is allocated to the Factoring segment based on Federal Home Loan Bank advance rates. Prior to 2019, intersegment interest was calculated based on the Company's prime rate. The provision for loan loss is allocated based on the segment's allowance for loan loss determination. Noninterest income and expense directly attributable to a segment are assigned to it. Taxes are paid on a consolidated basis but not allocated for segment purposes. The Factoring segment includes only factoring originated by TBC. General factoring services not originated through TBC are included in the Banking segment.

Management's Discussion and Analysis of

Financial Condition and Results of Operations

This section presents management's perspective on our financial condition and results of operations. The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the Company's interim consolidated financial statements and the accompanying notes included elsewhere in this Quarterly Report on Form 10-Q and with the consolidated financial statements and accompanying notes and other detailed information appearing in the Company's Annual Report on Form 10-K for the year ended December 31, 2018. To the extent that this discussion describes prior performance, the descriptions relate only to the periods listed, which may not be indicative of our future financial outcomes. In addition to historical information, this discussion contains forward-looking statements that involve risks, uncertainties and assumptions that could cause results to differ materially from management's expectations. See the "Forward-Looking Statements" section of this discussion for further information on forward-looking statements.

Overview

We are a financial holding company headquartered in Dallas, Texas and registered under the Bank Holding Company Act. Through our wholly owned bank subsidiary, TBK Bank, we offer traditional banking services as well as commercial finance product lines focused on businesses that require specialized financial solutions. Our banking operations include a full suite of lending and deposit products and services focused on our local market areas. These activities generate a stable source of core deposits and a diverse asset base to support our overall operations. Our commercial finance product lines include accounts receivable factoring, asset based lending, equipment lending and premium finance products offered on a nationwide basis. As of March 31, 2019, we had consolidated total assets of \$4.530 billion, total loans held for investment of \$3.613 billion, total deposits of \$3.314 billion and total stockholders' equity of \$646.2 million.

A key element of our strategy is to supplement the asset generation capacity in our community banking markets with commercial finance product lines which are offered on a nationwide basis and which serve to enhance the overall yield of our portfolio. These products include our factoring services, provided principally in the transportation sector, and our asset based lending, equipment finance, and premium finance products. Our aggregate outstanding balances for these products decreased \$69.3 million, or 5.5%, to \$1.187 billion as of March 31, 2019, primarily as a result of a decrease in our ending period factored receivables balance as well as a decrease in our asset based lending portfolio.

The following table sets forth our commercial finance product lines:

| | March 31, | December |
|--------------------------------|-------------|-------------|
| (Dollars in thousands) | 2019 | 31, 2018 |
| Commercial finance | | |
| Equipment | \$364,447 | \$352,037 |
| Asset based lending (general) | 174,447 | 214,110 |
| Premium finance | 77,389 | 72,302 |
| Factored receivables | 570,663 | 617,791 |
| Total commercial finance loans | \$1,186,946 | \$1,256,240 |

Most of our products and services share basic processes and have similar economic characteristics. However, our factoring subsidiary, Triumph Business Capital, operates in a highly specialized niche and earns substantially higher

yields on its factored accounts receivable portfolio than our other lending products. This business also has a legacy and structure as a standalone company. We have determined our reportable segments are Banking, Factoring, and Corporate. For the three months ended March 31, 2019, our Banking segment generated 68% of our total revenue (comprised of interest and noninterest income), our Factoring segment generated 31% of our total revenue, and our Corporate segment generated 1% of our total revenue.

First Quarter 2019 Overview

Net income available to common stockholders for the three months ended March 31, 2019 was \$14.8 million, or \$0.55 per diluted share, compared to net income available to common stockholders for the three months ended March 31, 2018 of \$11.9 million, or \$0.56 per diluted share. Excluding material gains and expenses related to merger and acquisition related activities, including divestitures, adjusted net income to common stockholders was \$11.1 million, or \$0.52 per diluted share, for the three months ended March 31, 2018. There were no merger and acquisition related activities during the three months ended March 31, 2019. For the three months ended March 31, 2019, our return on average common equity was 9.30% and our return on average assets was 1.33%.

At March 31, 2019, we had total assets of \$4.530 billion, including gross loans held for investment of \$3.613 billion, compared to \$4.560 billion of total assets and \$3.609 billion of gross loans held for investment at December 31, 2018. Organic loan growth totaled \$4.2 million during the three months ended March 31, 2019. Our commercial finance product lines decreased from \$1,256.2 million in aggregate as of December 31, 2018 to \$1.187 billion as of March 31, 2019, a decrease of 5.5%, and constitute 33% of our total loan portfolio at March 31, 2019.

At March 31, 2019, we had total liabilities of \$3.884 billion, including total deposits of \$3.314 billion, compared to \$3.923 billion of total liabilities and \$3.450 billion of total deposits at December 31, 2018. Deposits decreased \$135.9 million during the three months ended March 31, 2019.

At March 31, 2019, we had total stockholders' equity of \$646.2 million. During the three months ended March 31, 2019, total stockholders' equity increased \$9.6 million, primarily due to our net income for the period, offset in part by common stock repurchased during the period. Capital ratios remained strong with Tier 1 capital and total capital to risk weighted assets ratios of 11.76% and 13.62%, respectively, at March 31, 2019.

At March 31, 2019, there were 130 clients utilizing the TriumphPay platform, which is an increase of 17 clients, or 15.0%. For the quarter ended March 31, 2019, TriumphPay processed 114,066 invoices paying 22,932 distinct carriers a total of \$141.0 million.

2019 Items of Note

Stock Repurchase Program

On October 29, 2018, the Company announced that its board of directors had authorized the repurchase of up to \$25.0 million of its outstanding common stock in open market transactions or through privately negotiated transactions. No repurchases were made under this program during the year ended December 31, 2018; however, during the three months ended March 31, 2019, we repurchased 247,312 shares into treasury stock under our stock repurchase program at an average price of \$30.51, for a total of \$7.6 million.

2018 Items of Note

First Bancorp of Durango, Inc. and Southern Colorado Corp.

Effective September 8, 2018, we acquired First Bancorp of Durango, Inc. ("FBD") and its two community banking subsidiaries, The First National Bank of Durango and Bank of New Mexico, which were merged into TBK Bank upon closing, in an all-cash transaction for \$134.7 million. On the same date, we acquired Southern Colorado Corp. ("SCC") and its community banking subsidiary, Citizens Bank of Pagosa Springs, which was merged into TBK Bank upon closing, in an all-cash transaction for \$13.3 million. As part of the FBD and SCC acquisitions, we acquired a combined \$287.8 million of loans held for investment, assumed a combined \$674.7 million of deposits, and recorded a

combined \$14.1 million of core deposit intangible assets and \$72.1 million of goodwill.

Interstate Capital Corporation

On June 2, 2018 we acquired substantially all of the operating assets of, and assumed certain liabilities associated with, Interstate Capital Corporation's ("ICC") accounts receivable factoring business and other related financial services for total consideration of \$180.3 million, which was comprised of \$160.3 million in cash and contingent consideration with an initial fair value of \$20.0 million. As part of the ICC acquisition, we acquired \$131.0 million of factored receivables and recorded \$13.9 million of intangible assets and \$43.0 million of goodwill.

Common Stock Offering

On April 12, 2018, we completed an underwritten common stock offering issuing 5.4 million shares of our common stock, including 0.7 million shares sold pursuant to the underwriters' full exercise of their option to purchase additional shares, at \$37.50 per share for total gross proceeds of \$202.7 million. Net proceeds after underwriting discounts and offering expenses were \$192.1 million. A significant portion of the net proceeds of this offering were used to fund the FBD, SCC and ICC acquisitions and for general corporate purposes.

Triumph Healthcare Finance

On January 19, 2018, we entered into an agreement to sell the assets (the “Disposal Group”) of Triumph Healthcare Finance (“THF”) and exit the healthcare asset-based lending line of business. The decision to sell THF was made prior to the end of the fourth quarter of 2017, and at December 31, 2017, the fair value of the Disposal Group exceeded its carrying amount. As a result of this decision, the \$71.4 million carrying amount of the Disposal Group was transferred to assets held for sale as of December 31, 2017. The sale was finalized on March 16, 2018 and resulted in a net pre-tax contribution to earnings for the three months ended March 31, 2018 of \$1.1 million, or approximately \$0.8 million net of tax.

For further information on the above transactions, see Note 2 – Business Combinations and Divestitures in the accompanying condensed notes to the consolidated financial statements included elsewhere in this report.

⁽¹⁾The Company uses certain non-GAAP financial measures to provide meaningful supplemental information regarding the Company's operational performance and to enhance investors' overall understanding of such financial performance. The non-GAAP measures used by the Company include the following:

“Adjusted diluted earnings per common share” is defined as adjusted net income available to common stockholders divided by adjusted weighted average diluted common shares outstanding. Excluded from net income available to common stockholders are material gains and expenses related to merger and acquisition related activities, including divestitures, net of tax. In our judgment, the adjustments made to net income available to common stockholders allow management and investors to better assess our performance in relation to our core net income by removing the volatility associated with certain acquisition related items and other discrete items that are unrelated to our core business. Weighted average diluted common shares outstanding are adjusted as a result of changes in their dilutive properties given the gain and expense adjustments described herein.

- “Tangible common stockholders’ equity” is common stockholders’ equity less goodwill and other intangible assets.
- “Total tangible assets” is defined as total assets less goodwill and other intangible assets.
- “Tangible book value per share” is defined as tangible common stockholders’ equity divided by total common shares outstanding. This measure is important to investors interested in changes from period-to-period in book value per share exclusive of changes in intangible assets.

•“Tangible common stockholders’ equity ratio” is defined as the ratio of tangible common stockholders’ equity divided by total tangible assets. We believe that this measure is important to many investors in the marketplace who are interested in relative changes from period-to period in common equity and total assets, each exclusive of changes in intangible assets.

•“Return on average tangible common equity” is defined as net income available to common stockholders divided by average tangible common stockholders’ equity.

•“Adjusted efficiency ratio” is defined as noninterest expenses divided by our operating revenue, which is equal to net interest income plus noninterest income. Excluded are material gains and expenses related to merger and acquisition related activities, including divestitures. In our judgment, the adjustments made to operating revenue allow management and investors to better assess our performance in relation to our core operating revenue by removing the volatility associated with certain acquisition related items and other discrete items that are unrelated to our core business.

•“Adjusted net noninterest expense to average total assets” is defined as noninterest expenses net of noninterest income divided by total average assets. Excluded are material gains and expenses related to merger and acquisition related activities, including divestitures. This metric is used by our management to better assess our core operating efficiency.

(2) Performance ratios include discount accretion on purchased loans for the periods presented as follows:

(3) Asset quality ratios exclude loans held for sale.

(4) Net charge-offs to average loans ratios are for the three months ended March 31, 2019 and the year ended December 31, 2018.

GAAP Reconciliation of Non-GAAP Financial Measures

We believe the non-GAAP financial measures included above provide useful information to management and investors that is supplementary to our financial condition, results of operations and cash flows computed in accordance with GAAP; however, we acknowledge that our non-GAAP financial measures have a number of limitations. The following reconciliation table provides a more detailed analysis of the non-GAAP financial measures:

Results of Operations

Three months ended March 31, 2019 compared with three months ended March 31, 2018

Net Income

We earned net income of \$14.8 million for the three months ended March 31, 2019 compared to \$12.1 million for the three months ended March 31, 2018, an increase of \$2.7 million.

As discussed in the First Quarter 2019 Overview above, there were no merger and acquisition related activities during the three months ended March 31, 2019 and therefore, no adjustments were made to net income to arrive at an adjusted net income for the period. The results for the three months ended March 31, 2018 were impacted by our sale of THF, which resulted in a pre-tax gain on sale in the amount of \$1.1 million included in noninterest income. Excluding the impact of the THF sale transaction, we earned adjusted net income of \$11.1 million for the three months ended March 31, 2018 compared to \$14.8 million for the three months ended March 31, 2019, an increase of \$3.7 million. The adjusted increase was primarily the result of a \$14.2 million increase in net interest income, a \$1.5 million decrease in the provision for loan losses and a \$3.5 million increase in adjusted noninterest income offset by a \$14.4 million increase in noninterest expense and a \$1.1 million increase in adjusted income tax expense.

Details of the changes in the various components of net income are further discussed below.

Net Interest Income

Our operating results depend primarily on our net interest income, which is the difference between interest income on interest earning assets, including loans and securities, and interest expense incurred on interest bearing liabilities, including deposits and other borrowed funds. Interest rate fluctuations, as well as changes in the amount and type of interest earning assets and interest bearing liabilities, combine to affect net interest income. Our net interest income is affected by changes in the amount and mix of interest earning assets and interest bearing liabilities, referred to as a “volume change.” It is also affected by changes in yields earned on interest earning assets and rates paid on interest bearing deposits and other borrowed funds, referred to as a “rate change.”

| Total loan yield | 7.99 | % | 7.65 | % |

⁽¹⁾ Includes loans held for sale for the three months ended March 31, 2018.

We earned net interest income of \$61.3 million for the three months ended March 31, 2019 compared to \$47.1 million for the three months ended March 31, 2018, an increase of \$14.2 million, or 30.1%, primarily driven by the following factors.

Interest income increased \$19.1 million, or 35.4% as a result of an increase in total average interest earning assets of \$890 million, or 28.2%, which was attributable to the impact of the FBD and SCC acquisitions which closed subsequent to March 31, 2018 and contributed a combined \$287.8 million of loans and \$270.7 million of securities. The increase is also attributable to growth in our factored receivable operations as a result of the ICC acquisition and organic factored receivables growth. Additional interest income also resulted from organic growth in our loan portfolio. The average balance of our higher yielding commercial finance loans increased \$244.8 million, or 25.8%, from \$949.9 million for the three months ended March 31, 2018 to \$1.195 billion for the three months ended March 31, 2019 as a result of the continued execution of our growth strategy for such products. Our average mortgage warehouse lending balance was \$235.5 million for the quarter compared to \$187.5 million for the three months ended March 31, 2018. We also experienced increased average balances in our other community banking lending products, including commercial real estate and general commercial and industrial loans, due to organic growth period over period as well as the aforementioned acquisitions of FBD and SCC.

A component of interest income consists of discount accretion on acquired loan portfolios. We recognized discount accretion on purchased loans of \$1.6 million and \$2.0 million for the three months ended March 31, 2019 and 2018, respectively. Subject to future acquisitions, we anticipate that the contribution of this discount accretion to our interest income will continue to decline over time, but we expect that any resulting decreases in aggregate yield on our loan portfolio will be offset in part by continued growth in our higher yielding specialized commercial finance product lines.

Interest expense increased \$5.0 million or 71.1% as a result of growth in customer deposits and other borrowings as well as higher average rates. Average total interest bearing deposits increased \$668 million, or 33.1%, primarily due to a combined \$674.7 million of customer deposits assumed in the FBD and SCC acquisitions. Excluding the acquired customer deposits, we also experienced growth in our certificates of deposit and brokered deposits as these higher cost deposit products were used to fund our growth period over period. We decreased our use of other interest bearing borrowings, consisting primarily of FHLB advances, period over period however, the decrease in the average balance was more than offset by an increase in average rate.

Net interest margin increased to 6.15% for the three months ended March 31, 2019 from 6.06% for the three months ended March 31, 2018, an increase of 9 basis points or 1.5%.

The increase in our net interest margin primarily resulted from an increase in yields on our interest earning assets. Our average yield on interest earning assets increased 39 basis points to 7.35% for the three months ended March 31, 2019 from 6.96% for the three months ended March 31, 2018, primarily due to a change in the mix within our loan portfolio period over period. The average commercial finance products as a percentage of the average total portfolio decreased from 34.3% for the three months ended March 31, 2018 to 33.8% for the three months ended March 31, 2019 however, higher yielding average factored receivables as a percentage of the average total commercial finance portfolio increased from 38.9% at March 31, 2018 to 48.0% at March 31, 2019 contributing to the increase in yields on our interest earning assets. The increased yield resulting from the change in the mix of our loan portfolio was negatively impacted by a change in our transportation factoring balances, which generate a higher yield than our non-transportation factoring balances. These transportation factoring balances decreased as a percentage of the overall factoring portfolio to 76% at March 31, 2019 compared to 80% at March 31, 2018.

Also impacting our net interest margin was an increase in our average cost of interest bearing liabilities of 40 basis points. This increase was caused by an increased use of higher rate certificates of deposit and brokered deposits to fund our growth period over period, and higher rates on short term and floating rate FHLB advances as a result of higher interest rates in the macro economy. This increase was partially offset by a change in the mix of our interest bearing deposits resulting from lower cost customer deposits assumed in the FBD and SCC acquisitions.

The following table shows the effects changes in average balances (volume) and average interest rates (rate) had on the interest earned in our interest earning assets and the interest incurred on our interest bearing liabilities:

Provision for Loan Losses

The provision for loan losses is the amount of expense that, based on our judgment, is required to maintain the allowance for loan and lease losses (“ALLL”) at an appropriate level to absorb estimated incurred losses in the loan portfolio at the balance sheet date. The determination of the amount of the allowance is complex and involves a high degree of judgment and subjectivity.

Our ALLL was \$27.6 million at March 31, 2019 and December 31, 2018, representing an ALLL to total loans ratio of 0.76% at the end of each period.

Our provision for loan losses was \$1.0 million for the three months ended March 31, 2019 compared to \$2.5 million for the three months ended March 31, 2018, a decrease of \$1.5 million, or 60.0%.

The decreased provision for loan losses was primarily the result of a decrease in loan growth period over period. During the three months ended March 31, 2019, outstanding loans increased \$4.2 million from December 31, 2018. During the three months ended March 31, 2018, outstanding loans increased \$63.1 million from December 31, 2017. The relatively small increase in outstanding loan balances within the three months ended March 31, 2019 compared to the larger increase in loan balances within the three months ended March 31, 2018 was the primary contributor to the decrease in the provision for loan loss. The decreased provision was also impacted to a lesser extent by changes in the mix of the loan portfolio as well as loss rates used to calculate the ALLL which reflect the improved credit quality in the loan portfolio. The decrease in the provision for loan loss was partially offset by an increase in net new specific reserves. We recorded net new specific reserves of \$1.2 million during the three months ended March 31, 2019 compared to net new specific reserves of \$0.8 million recorded during the three months ended March 31, 2018. We experienced lower total net charge-offs of \$1.0 million in the three months ended March 31, 2019 compared to \$1.3 million for the same period in 2018. However, approximately \$0.5 million and \$0.8 million of the charge-offs for the three months ended March 31, 2019 and 2018, respectively, had specific reserves previously recorded and as such, the impact of net charge-offs on the change in provision period over period was minimal.

Noninterest Income

The following table presents the major categories of noninterest income:

| (Dollars in thousands) | Three Months Ended March 31, | | | |
|---|------------------------------|----------------|----------------|---------------|
| | 2019 | 2018 | Change | % Change |
| Service charges on deposits | \$1,606 | \$1,145 | \$461 | 40.3 % |
| Card income | 1,844 | 1,244 | 600 | 48.2 % |
| Net OREO gains (losses) and valuation adjustments | 209 | (88) | 297 | 337.5 % |
| Net gains (losses) on sale of securities | (11) | (272) | 261 | 96.0 % |
| Fee income | 1,612 | 800 | 812 | 101.5 % |
| Insurance commissions | 919 | 714 | 205 | 28.7 % |
| Gain on sale of subsidiary or division | — | 1,071 | (1,071) | (100.0 %) |
| Other | 1,359 | 558 | 801 | 143.5 % |
| Total noninterest income | \$7,538 | \$5,172 | \$2,366 | 45.7 % |

Noninterest income increased \$2.4 million, or 45.7%. Noninterest income for the three months ended March 31, 2018 was impacted by the realization of the \$1.1 million gain associated with the sale of THF during the quarter. Excluding the gain on sale of THF, we earned adjusted noninterest income of \$4.1 million for the three months ended March 31, 2018, resulting in an adjusted increase in noninterest income of \$3.5 million, or 83.8% period over period. Changes in selected components of noninterest income in the above table are discussed below.

Service charges on deposits. Service charges on deposit accounts, including overdraft and non-sufficient funds fees, increased \$0.5 million, or 40.3%, primarily due to additional service charges associated with the increase in customer deposits due to the FBD and SCC acquisitions and to a lesser extent, organic growth in deposits.

Card Income. Debit and credit card income increased \$0.6 million, or 48.2%, primarily due to additional customer debit and credit card activity associated with the increase in issued cards resulting from the FBD and SCC acquisitions.

Fee Income. Fee income increased \$0.8 million, or 101.5%, primarily due to increased check and wire fees resulting from the FBD, SCC and ICC acquisitions.

Other. Other noninterest income, including income associated with bank-owned life insurance and other miscellaneous activities, increased \$0.8 million, or 143.5%. During the three months ended March 31, 2019, the bank

benefited from a \$0.4 million gain related to an interest in the sale of a property owned by a borrower. There were no other significant increases or decreases in the components of other noninterest income period over period.

Noninterest Expense

The following table presents the major categories of noninterest expense:

| (Dollars in thousands) | Three Months Ended March 31, | | | |
|---|------------------------------|----------|----------|----------|
| | 2019 | 2018 | Change | % Change |
| Salaries and employee benefits | \$26,439 | \$19,404 | \$7,035 | 36.3 % |
| Occupancy, furniture and equipment | 4,522 | 3,054 | 1,468 | 48.1 % |
| FDIC insurance and other regulatory assessments | 299 | 199 | 100 | 50.3 % |
| Professional fees | 1,865 | 1,640 | 225 | 13.7 % |
| Amortization of intangible assets | 2,402 | 1,117 | 1,285 | 115.0 % |
| Advertising and promotion | 1,604 | 1,029 | 575 | 55.9 % |
| Communications and technology | 4,874 | 3,359 | 1,515 | 45.1 % |
| Travel and entertainment | 1,025 | 656 | 369 | 56.3 % |
| Other | 5,536 | 3,584 | 1,952 | 54.5 % |
| Total noninterest expense | \$48,566 | \$34,042 | \$14,524 | 42.7 % |

Noninterest expense increased \$14.5 million, or 42.7%. Details of the more significant changes in the various components of noninterest expense are further discussed below.

Salaries and Employee Benefits. Salaries and employee benefits expenses increased \$7.0 million, or 36.3%. We experienced a significant increase in the total size of our workforce between these periods as our average full-time equivalent employees were 1,131.5 and 820.4 for the three months ended March 31, 2019 and 2018, respectively. Sources of this increased headcount were primarily employees added through the FBD and SCC acquisitions. In addition, employees were hired to support enterprise growth and other strategic initiatives. Other factors contributing to the increase in salaries and employee benefits include merit increases for existing employees, higher health insurance benefit costs, incentive compensation, and 401(k) expense.

Occupancy, Furniture and Equipment. Occupancy, furniture and equipment expenses increased \$1.5 million, or 48.1%, primarily due to expenses associated with the infrastructure and facilities added through the FBD, SCC and ICC acquisitions.

Amortization of intangible assets. Amortization of intangible assets increased \$1.3 million, or 115.0%, primarily due to the addition of intangible assets resulting from the FBD, SCC and ICC acquisitions.

Advertising and promotion. Advertising and promotion expenses increased \$0.6 million, or 55.9%, primarily due to ongoing advertising and brand-awareness activities in connection with the FBD and SCC acquisitions as well as various internal initiatives associated with the overall growth of operations period over period.

Communications and Technology. Communications and technology expenses increased \$1.5 million, or 45.1% as a result of increased usage and transaction volumes resulting from the FBD, SCC and ICC acquisitions as well as growth in our organic operations.

Travel and entertainment. Travel and entertainment expenses increased \$0.4 million, or 56.3%, primarily due to additional travel required to efficiently integrate the recent acquisitions as well as additional travel in the normal course of business.

Other. Other noninterest expense includes loan-related expenses, software amortization, training and recruiting, postage, insurance, business travel and subscription services. Other noninterest expense increased \$2.0 million or 54.5% primarily due to increased operations driven by Company growth through acquisition and organic means. There were no significant increases or decreases in the individual components of other noninterest expense

period over period.

48

Income Taxes

The amount of income tax expense is influenced by the amount of pre-tax income, the amount of tax-exempt income, the statutory rate and the effect of changes in valuation allowances maintained against deferred tax benefits.

Income tax expense increased \$0.9 million, or 25.0%, from \$3.6 million for the three months ended March 31, 2018 to \$4.5 million for the three months ended March 31, 2019. The increase in income tax expense period over period is consistent with the increase in pre-tax income for the same periods. The effective tax rate was flat at 23% for the three months ended March 31, 2018 and March 31, 2019.

Operating Segment Results

Our reportable segments are Banking, Factoring, and Corporate, which have been determined based upon their business processes and economic characteristics. This determination also gave consideration to the structure and management of various product lines. The Banking segment includes the operations of TBK Bank. Our Banking segment derives its revenue principally from investments in interest earning assets as well as noninterest income typical for the banking industry. The Banking segment also includes certain factored receivables which are purchased by TBK Bank. The Factoring segment includes the operations of Triumph Business Capital with revenue derived from factoring services. Corporate includes holding company financing and investment activities and management and administrative expenses to support the overall operations of the Company.

Reported segments and the financial information of the reported segments are not necessarily comparable with similar information reported by other financial institutions. Additionally, because of the interrelationships of the various segments, the information presented is not indicative of how the segments would perform if they operated as independent entities. Furthermore, changes in management structure or allocation methodologies and procedures may result in future changes to previously reported segment financial data. The accounting policies of the segments are the same as those described in the "Summary of Significant Accounting Policies" in Note 1 of the Company's 2018 Form 10-K. Transactions between segments consist primarily of borrowed funds. Beginning in 2019, intersegment interest expense is allocated to the Factoring segment based on Federal Home Loan Bank advance rates. Prior to 2019, intersegment interest was calculated based on the Company's prime rate. The provision for loan loss is allocated based on the segment's ALLL determination which considers the effects of charge-offs. Noninterest income and expense directly attributable to a segment are assigned accordingly. Taxes are paid on a consolidated basis and are not allocated for segment purposes.

Our Banking segment's operating income increased \$0.1 million, or 0.8%.

Interest income increased primarily as a result of increases in the balances of our interest earning assets, primarily loans, due to the continued growth of our commercial finance products, including equipment loans, asset based loans and premium finance loans. In addition, we acquired a combined \$287.8 million of loans and \$270.7 million of investment securities in our Banking segment as part of the FBD and SCC acquisitions which closed during the third quarter of 2018. Average loans in our Banking segment increased 29.5% from \$2.674 billion for the three months ended March 31, 2018 to \$3.462 billion for the three months ended March 31, 2019.

Interest expense increased primarily as a result of growth in average customer deposits and other borrowings due to a combined \$674.7 million of customer deposits assumed in the FBD and SCC acquisitions. Excluding the acquired

customer deposits, we also experienced growth in our certificates of deposit and brokered deposits as these higher cost deposit products were used to fund our growth period over period. We decreased our use of other interest bearing borrowings, consisting primarily of FHLB advances, period over period however, the decrease in the average balance was more than offset by an increase in average rate on these borrowings.

The decreased provision for loan losses was primarily the result of a change in the mix of our Banking segment's loan growth period over period. During the three months ended March 31, 2019, outstanding loans at our Banking segment excluding balances eliminated in consolidation increased \$67.6 million from December 31, 2018. During the three months ended March 31, 2018, outstanding loans excluding balances eliminated in consolidation increased \$37.0 million from December 31, 2017. Typically, an increase in underlying loan balance results in increased provision for loan loss however, the loan growth experienced during the current period was primarily in our community banking lending products which are typically reserved at a lower rate than our commercial finance products which experienced significant growth during the same period in the prior year. The decreased provision for loan losses was also impacted to a lesser extent by changes in the mix of the loan portfolio as well as loss rates used to calculate the ALLL which reflect the improved credit quality in the loan portfolio. The decrease in the provision for loan losses was also driven by a decrease in net new specific reserves at our Banking segment. We recorded net new specific reserves of \$0.4 million during the three months ended March 31, 2019 compared to net new specific reserves of \$0.8 million recorded during the three months ended March 31, 2018. We recorded total net charge-offs of \$1.0 million at our Banking segment for the three months ended March 31, 2019 compared to \$0.7 million of net charge-offs for the same period in the prior year. Approximately \$0.5 million and \$0.3 million of the charge-offs for the three months ended March 31, 2019 and 2018, respectively, had specific reserves previously recorded.

Noninterest income at our Banking segment increased primarily due to additional service charges, fee income and card income associated with the increase in customer deposit and credit/debit card accounts acquired in the FBD and SCC acquisitions. Included in other non-interest income for the three months ended March 31, 2019 is a \$0.4 million gain related to an interest in the sale of a property owned by a borrower. The increase in noninterest income period over period was partially offset by a \$1.1 million pre-tax gain on the sale of THF.

Noninterest expense increased due to incremental costs associated with the growth in our Banking segment personnel and infrastructure in conjunction with our acquisitions of FBD and SCC, as well as personnel, facilities and infrastructure to support the continued organic growth in our lending operations. In addition, increases due to merit increases for existing employees, higher health insurance benefit costs, incentive compensation, and 401(k) expense contributed to the increase.

| Net new clients | 191 | 280 |
| Period end clients | 6,382 | 3,438 |

Our Factoring segment's operating income increased \$3.6 million, or 69.7%.

Our average invoice size decreased 4.2% from \$1,751 for the three months ended March 31, 2018 to \$1,678 for the three months ended March 31, 2019, however the number of invoices purchased increased 51.3% period over period.

Net interest income increased due to a 45.2% increase in accounts receivable purchased during the three months ended March 31, 2019 compared to the three months ended March 31, 2018. Accounts receivable purchases are a function of the total number of invoices purchased and the average invoice price. For the three months ended March 31, 2019, the number of invoices purchased increased by 51.3% and the average invoice price decreased by 4.2% compared to the same period in the prior year. The increase in invoices purchased was the result of our acquisition of the operations of ICC as well as organic growth in the factored receivables portfolio. Our transportation factoring purchases, which generate a higher yield than our non-transportation factoring balances, decreased as a percentage of the overall Factoring segment portfolio, and ending transportation factored receivables represented 81% of the factored receivable period end balance at March 31, 2019 compared to 86% of the factored receivable period end balance at March 31, 2018.

The decreased provision for loan losses was primarily the result of a decrease in period end factored receivables growth period over period. During the three months ended March 31, 2019, outstanding factored receivables at our Factoring segment decreased \$54.3 million from December 31, 2018. During the three months ended March 31, 2018, outstanding factored receivables increased \$26.5 million from December 31, 2017. The contraction in factored receivables within the three months ended March 31, 2019 compared to the increase in factored receivable balances within the three months ended March 31, 2018 was the primary contributor to the decrease in the provision for loan loss. The decrease in the provision for loan loss was partially offset by an increase in net new specific reserves at our Factoring segment. We recorded net new specific reserves of \$0.8 million during the three months ended March 31, 2019 compared to no net new specific reserves during the three months ended March 31, 2018. We recorded no net charge-offs at our Factoring segment for the three months ended March 31, 2019 compared to \$0.6 million of net charge-offs for the same period in the prior year. Approximately \$0.5 million of the charge-offs for the three months ended March 31, 2018 had specific reserves previously recorded.

The increase in noninterest expense was driven primarily by increased personnel, operating and technology costs incurred in connection with the ICC acquisition and growth in our factoring portfolio, particularly the increase in the number of clients and number of invoices processed period over period. The increase in noninterest income was also the result of continued growth in the client portfolio.

The Corporate segment reported an operating loss of \$1.9 million for the three months ended March 31, 2019 compared to an operating loss of \$1.7 million for the three months ended March 31, 2018 with no significant fluctuations in accounts period over period.

Financial Condition

Assets

Total assets were \$4.530 billion at March 31, 2019, compared to \$4.560 billion at December 31, 2018, a decrease of \$30 million, the components of which are discussed below.

Loan Portfolio

Loans held for investment were \$3.613 billion at March 31, 2019, compared with \$3.609 billion at December 31, 2018.

The following table shows our total loan portfolio by portfolio segments as of March 31, 2019 and December 31, 2018:

| Total Loans | \$3,612,869 | 100 % | \$3,608,644 | 100 % | \$4,225 | 0.1 % |

Commercial Real Estate Loans. Our commercial real estate loans increased \$101.8 million, or 10.3%, due to new loan origination activity and conversion of construction and development loans during the period offset by paydowns for the period.

Construction and Development Loans. Our construction and development loans decreased \$34.6 million, or 19.3%, due to paydowns and conversion of certain construction and development loans to commercial real estate loans at construction completion. The decrease was slightly offset by origination activity during the period.

Residential Real Estate Loans. Our one-to-four family residential loans increased \$3.9 million, or 2.0%, due primarily to modest origination activity that outpaced paydowns during the quarter.

Farmland Loans. Our farmland loans decreased \$14.2 million, or 8.4%, due to paydowns for the period that outpaced new loan origination activity.

Commercial Loans. Our commercial loans held for investment increased \$2.7 million, or 0.2%, due to growth in equipment finance and premium finance loans as we continue to execute on our growth strategy for such products. In addition, our other commercial lending products, comprised primarily of general commercial loans originated in our community banking markets, increased \$29.5 million, or 8.9%. We experienced a decrease in asset based lending during three months ended March 31, 2019 and our average ABL balance for the three months ended March 31, 2019 was \$195.1 million compared to \$231.4 million for the three months ended December 31, 2018. The following table shows our commercial loans:

| | March 31, | December 31, | \$ | % |

| Total commercial loans | \$1,117,640 | \$1,114,971 | 2,669 | 0.2 % |

Factored Receivables. Our factored receivables decreased \$47.1 million, or 7.6%, as a result of a decrease in purchase volumes at Triumph Business Capital, which typically experiences a seasonal downturn during the first quarter of the year. Such purchases were \$1.325 billion during the three months ended March 31, 2019 which was a decrease of \$216.2 million or 14.0% from purchases of \$1.541 billion during the three months ended December 31, 2018.

Consumer Loans. Our consumer loans decreased \$1.9 million, or 6.3%, due to paydowns in excess of new loan origination activity during the period.

Mortgage Warehouse. Our mortgage warehouse facilities decreased \$6.3 million, or 2.0%, due to lower utilization by our clients due to typical seasonality associated with the mortgage business during the period. Mortgage warehouse average balance for the quarter was \$235.5 million compared to an average balance of \$242.9 million during the three months ended December 31, 2018. Client utilization of mortgage warehouse facilities may experience significant fluctuation on a day-to-day basis given mortgage origination market conditions.

The following tables set forth the contractual maturities, including scheduled principal repayments, of our loan portfolio and the distribution between fixed and floating interest rate loans.

As of March 31, 2019, most of the Company's non-factoring business activity is with customers located within certain states. The states of Texas (23%), Colorado (26%), Illinois (15%), and Iowa (7%) make up 71% of the Company's gross loans, excluding factored receivables. Therefore, the Company's exposure to credit risk is affected by changes in the economies in these states. At December 31, 2018, the states of Texas (24%), Colorado (27%), Illinois (15%) and Iowa (7%) made up 73% of the Company's gross loans, excluding factored receivables.

Further, a majority (76%) of our factored receivables, representing approximately 12% of our total loan portfolio as of March 31, 2019, are receivables purchased from trucking fleets, owner-operators, and freight brokers in the transportation industry. Although such concentration may cause our future interest income with respect to our factoring operations to be correlated with demand for the transportation industry in the United States generally, and small-to-mid-sized operators in such industry specifically, we feel that the credit risk with respect to our outstanding portfolio is appropriately mitigated as we limit the amount of receivables acquired from individual debtors and creditors thereby achieving diversification across a number of companies and industries. At December 31, 2018, 79% of our factored receivables, representing approximately 14% of our total loan portfolio, were receivables purchased from trucking fleets, owner-operators, and freight brokers in the transportation industry.

Nonperforming Assets

We have established procedures to assist us in maintaining the overall quality of our loan portfolio. In addition, we have adopted underwriting guidelines to be followed by our lending officers and require senior management review of proposed extensions of credit exceeding certain thresholds. When delinquencies exist, we monitor them for any negative or adverse trends. Our loan review procedures include approval of lending policies and underwriting guidelines by the Board of Directors of our bank subsidiary, independent loan review, approval of large credit relationships by our bank subsidiary's Management Loan Committee and loan quality documentation procedures. We, like other financial institutions, are subject to the risk that our loan portfolio will be subject to increasing pressures from deteriorating borrower credit due to general economic conditions.

The following table sets forth the allocation of our nonperforming assets among our different asset categories as of the dates indicated. We classify nonperforming assets as nonperforming loans, OREO, other repossessed assets and nonaccrual loans included in assets held for sale. Nonperforming loans consist of nonaccrual loans (including nonaccrual PCI loans), troubled debt restructurings ("TDRs") and factored receivables greater than 90 days past due. The balances of nonperforming loans reflect the recorded investment in these assets, including adjustments for deferred fees and costs as well as purchase discounts.

| Nonperforming assets to total assets | 0.84 | % | 0.84 | % |
| Nonperforming loans to total loans held for investment | 0.95 | % | 1.00 | % |
| Past due loans to total loans held for investment | 2.33 | % | 2.41 | % |

Nonperforming loans, including nonaccrual PCI loans, decreased \$1.8 million, or 5.1%, primarily due to the removal of a \$3.6 million nonaccrual asset based lending loan that was paid in full during the three months ended March 31, 2019. The decrease was partially offset by the addition of a \$1.7 million commercial loan relationship to nonaccrual during the period. The remaining activity in nonperforming loans was also impacted by additions and removals of smaller credits to and from nonperforming loans.

OREO increased \$1.0 million, or 49.2%, due to the addition of individually insignificant OREO properties as well as valuation adjustments made throughout the period.

Other repossessed assets increased \$0.7 million, or 429.7%, due to the addition of individually insignificant assets during the period.

As a result of the above activity, the ratio of nonperforming loans to total loans decreased to 0.95% at March 31, 2019 compared to 1.00% at December 31, 2018, and our ratio of nonperforming assets to total assets remained flat at 0.84% at March 31, 2019 and December 31, 2018.

Past due loans to total loans decreased to 2.33% at March 31, 2019 compared to 2.41% at December 31, 2018, partially due to the decrease in the nonperforming loans described above as well as other payment performance activity.

Potential problem loans consist of loans that are performing in accordance with contractual terms but for which management has concerns about the ability of an obligor to continue to comply with repayment terms because of the obligor's potential operating or financial difficulties. Management monitors these loans and reviews their performance on a regular basis. Potential problem loans contain potential weaknesses that could improve, persist or further deteriorate. At March 31, 2019, we had \$8.7 million in loans of this type which are not included in any of the nonperforming loan categories.

Allowance for Loan and Lease Losses

ALLL is a valuation allowance for probable incurred credit losses. Loan losses are charged against the ALLL when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the ALLL. Management estimates the ALLL balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions and other factors. Allocations of the ALLL may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off.

In addition, the product types associated with fluctuations within the loan portfolio also contribute to the allowance allocation, as different loan products require different levels of ALLL based upon their credit risk characteristics. Loan loss valuation allowances are recorded on specific at-risk balances, typically consisting of impaired loans and factored invoices greater than 90 days past due with negative cash reserves.

Under accounting standards for business combinations, acquired loans are recorded at fair value on the date of acquisition. This fair value adjustment eliminates any of the seller's ALLL associated with such loans as of the purchase date as any credit exposure associated with such loans is incorporated into the fair value adjustment. A provision for loan losses is recorded for the emergence of new incurred and estimable losses on acquired loans after the acquisition date in excess of the recorded discount.

The following table sets forth the ALLL by category of loan:

The ALLL increased \$34 thousand, or 0.1%, which was driven by \$1.0 million of net charge-offs (which carried a reserve of \$0.5 million at the time of charge-off) and \$1.2 million of net new specific allowances recorded on impaired loans, offset by limited growth in the underlying portfolio during the three months ended March 31, 2019 and changes to loss rates used to calculate the ALLL which reflect improved credit quality in the loan portfolio.

The following table presents the unpaid principal and recorded investment for loans at March 31, 2019. The difference between the unpaid principal balance and recorded investment is primarily (1) premiums and discounts associated with acquisition date fair value adjustments on acquired loans (both PCI and non-PCI) totaling \$17.9 million at March 31, 2019 and (2) net deferred origination and factoring costs and fees totaling \$2.7 million at March 31, 2019. The net difference can provide protection from credit loss in addition to the ALLL as future potential charge-offs for an individual loan is limited to the recorded investment plus unpaid accrued interest.

At March 31, 2019 and December 31, 2018, we had on deposit \$54.3 million and \$58.6 million, respectively, of customer reserves associated with factored receivables. These deposits represent customer reserves held to settle any payment disputes or collection shortfalls, may be used to pay customers' obligations to various third parties as directed by the customer, are periodically released to or withdrawn by customers, and are reported as deposits on our consolidated balance sheets.

The following table provides an analysis of the provisions for loan losses, net charge-offs and recoveries and the effects of those items on our ALLL:

Securities

As of March 31, 2019, we held equity securities with a fair value of \$5.2 million, an increase of \$0.2 million from \$5.0 million at December 31, 2018. These securities represent investments in a publicly traded Community Reinvestment Act mutual fund and are subject to market pricing volatility with changes in fair value reflected in earnings.

As of March 31, 2019, we held debt securities classified as available for sale with a fair value of \$339.5 million, an increase of \$3.1 million from \$336.4 million at December 31, 2018. The increase is attributable to the purchase of \$59.0 million of higher yielding CLO securities during the three months ended March 31, 2019 which replaced lower yielding state and municipal securities that were sold or matured during the period. Our available for sale securities can be used for pledging to secure FHLB borrowings and public deposits, or can be sold to meet liquidity needs.

As of March 31, 2019 and December 31, 2018, we held investments classified as held to maturity with an amortized cost of \$8.5 million. These held to maturity securities represent a minority investment in the unrated subordinated notes of issued CLOs managed by Trinitas Capital Management.

The following tables set forth the amortized cost and average yield of our debt securities, by type and contractual maturity:

Liabilities

Total liabilities were \$3.884 billion as of March 31, 2019, compared to \$3.923 billion at December 31, 2018, a decrease of \$40 million, the components of which are discussed below.

Deposits

The following table summarizes our deposits:

| (Dollars in thousands) | March 31, 2019 | December 31, 2018 | \$ Change | % Change |
|--------------------------------|-------------------|----------------------|-------------|-------------|
| Noninterest bearing demand | \$667,597 | \$724,527 | \$(56,930) | (7.86 %) |

| Total deposits | \$3,314,440 | \$3,450,349 | \$(135,909) | (3.94 %) |

Our total deposits decreased \$135.9 million, or 3.9%, primarily due to decreases in all deposit products with the exception of increases in savings deposits and certificates of deposit. As of March 31, 2019, interest bearing demand deposits, noninterest bearing deposits, money market deposits and savings deposits accounted for 61% of our total deposits, while individual retirement accounts, certificates of deposit, and brokered deposits made up 39% of total deposits.

Customer Repurchase Agreements

The following provides a summary of our customer repurchase agreements as of and for the three months ended March 31, 2019 and the year ended December 31, 2018:

| (Dollars in thousands) | March 31, 2019 | December 31, 2018 |
|--|-------------------|-------------------------|
| Amount outstanding at end of period | \$ 3,727 | \$ 4,485 |
| Weighted average interest rate at end of period | 0.02 | % 0.01 |
| Average daily balance during the period | \$ 4,056 | \$ 8,648 |
| Weighted average interest rate during the period | 0.01 | % 0.02 |
| Maximum month-end balance during the period | \$ 3,727 | \$ 13,844 |

Our customer repurchase agreements generally mature overnight. Variances in these balances are attributable to normal customer behavior and seasonal factors affecting their liquidity positions.

FHLB Advances

The following provides a summary of our FHLB advances as of and for the three months ended March 31, 2019 and the year ended December 31, 2018:

| (Dollars in thousands) | March 31, 2019 | December 31, 2018 |
|--|-------------------|-------------------------|
| Amount outstanding at end of period | \$ 405,000 | \$ 330,000 |
| Weighted average interest rate at end of period | 2.53 % | 2.52 % |
| Average amount outstanding during the period | \$ 332,611 | \$ 345,388 |
| Weighted average interest rate during the period | 2.60 % | 1.96 % |
| Highest month-end balance during the period | \$ 480,000 | \$ 455,000 |

Our FHLB advances are collateralized by assets, including a blanket pledge of certain loans. At March 31, 2019 and December 31, 2018, we had \$565.7 million and \$516.4 million, respectively, in unused and available advances from the FHLB.

Subordinated Notes

On September 30, 2016, we issued \$50.0 million of Fixed-to-Floating Rate Subordinated Notes due 2026 (the “Notes”). The Notes initially bear interest at 6.50% per annum, are payable semi-annually in arrears, to, but excluding, September 30, 2021, and, thereafter and to, but excluding, the maturity date or earlier redemption, interest shall be payable quarterly in arrears, at an annual floating rate equal to three-month LIBOR as determined for the applicable quarterly period, plus 5.345%. We may, at our option, beginning on September 30, 2021 and on any scheduled interest payment date thereafter, redeem the Notes, in whole or in part, at a redemption price equal to 100% of the principal amount of the Notes to be redeemed plus accrued and unpaid interest to, but excluding, the date of redemption.

The Notes are included on our consolidated balance sheet as liabilities; however, for regulatory purposes, the carrying value of these obligations is eligible for inclusion in Tier 2 regulatory capital.

Issuance costs related to the Notes totaled \$1.3 million, including an underwriting discount of 1.5%, or \$0.8 million, and have been netted against the subordinated notes liability on the consolidated balance sheets. The underwriting discount and other debt issuance costs are being amortized using the effective interest method over the life of the Notes as a component of interest expense. The carrying value of the Notes totaled \$49.0 million at March 31, 2019.

Junior Subordinated Debentures

The following provides a summary of our junior subordinated debentures as of March 31, 2019:

| (Dollars in thousands) | Face Value | Carrying Value | Maturity Date | Interest Rate |
|---------------------------------------|------------|----------------|----------------|---------------|
| National Bancshares Capital Trust II | \$15,464 | \$13,004 | September 2033 | LIBOR + 3.00% |
| National Bancshares Capital Trust III | 17,526 | 12,623 | July 2036 | LIBOR + 1.64% |
| ColoEast Capital Trust I | 5,155 | 3,494 | September 2035 | LIBOR + 1.60% |
| ColoEast Capital Trust II | 6,700 | 4,571 | March 2037 | LIBOR + 1.79% |
| Valley Bancorp Statutory Trust I | 3,093 | 2,858 | September 2032 | LIBOR + 3.40% |
| Valley Bancorp Statutory Trust II | 3,093 | 2,650 | July 2034 | LIBOR + 2.75% |
| | \$51,031 | \$39,200 | | |

These debentures are unsecured obligations and were issued to trusts that are unconsolidated subsidiaries. The trusts in turn issued trust preferred securities with identical payment terms to unrelated investors. The debentures may be called by the Company at par plus any accrued but unpaid interest; however, we have no current plans to redeem them prior to maturity. Interest on the debentures is calculated quarterly, based on a contractual rate equal to three month LIBOR plus a weighted average spread of 2.24%. As part of the purchase accounting adjustments made with the National Bancshares, Inc. acquisition on October 15, 2013, the ColoEast acquisition on August 1, 2016, and the Valley acquisition on December 9, 2017, we adjusted the carrying value of the junior subordinated debentures to fair value as of the respective acquisition dates. The discounts on the debentures will continue to be amortized through maturity and recognized as a component of interest expense.

The debentures are included on our consolidated balance sheet as liabilities; however, for regulatory purposes, these obligations are eligible for inclusion in regulatory capital, subject to certain limitations. All of the carrying value of

\$39.2 million was allowed in the calculation of Tier I capital as of March 31, 2019.

Capital Resources and Liquidity Management

Capital Resources

Our stockholders' equity totaled \$646.2 million at March 31, 2019, compared to \$636.6 at December 31, 2018, an increase of \$9.6 million. Stockholders' equity increased during this period primarily due to net income for the period of \$14.8 million offset in part by 247,312 shares of common stock repurchased into treasury stock during the period under our stock repurchase program at an average price of \$30.51, for a total of \$7.6 million.

Liquidity Management

We define liquidity as our ability to generate sufficient cash to fund current loan demand, deposit withdrawals, or other cash demands and disbursement needs, and otherwise to operate on an ongoing basis.

We manage liquidity at the holding company level as well as that of our bank subsidiary. The management of liquidity at both levels is critical, because the holding company and our bank subsidiary have different funding needs and sources, and each are subject to regulatory guidelines and requirements which require minimum levels of liquidity. We believe that our liquidity ratios meet or exceed those guidelines and our present position is adequate to meet our current and future liquidity needs.

Our liquidity requirements are met primarily through cash flow from operations, receipt of pre-paid and maturing balances in our loan and investment portfolios, debt financing and increases in customer deposits. Our liquidity position is supported by management of liquid assets and liabilities and access to other sources of funds. Liquid assets include cash, interest earning deposits in banks, federal funds sold, securities available for sale and maturing or prepaying balances in our investment and loan portfolios. Liquid liabilities include core deposits, federal funds purchased, securities sold under repurchase agreements and other borrowings. Other sources of funds include the sale of loans, brokered deposits, the issuance of additional collateralized borrowings such as FHLB advances, the issuance of debt securities and the issuance of common securities. For additional information regarding our operating, investing and financing cash flows, see the Consolidated Statements of Cash Flows provided in our consolidated financial statements.

In addition to the liquidity provided by the sources described above, our subsidiary bank maintains correspondent relationships with other banks in order to sell loans or purchase overnight funds should additional liquidity be needed. As of March 31, 2019, TBK Bank had a total of \$137.5 million of available unsecured federal funds lines of credit with seven unaffiliated banks.

Regulatory Capital Requirements

Our capital management consists of providing equity to support our current and future operations. We are subject to various regulatory capital requirements administered by federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's or TBK Bank's financial statements. For further information regarding our regulatory capital requirements, see Note 11 – Regulatory Matters in the accompanying condensed notes to the consolidated financial statements included elsewhere in this report.

Contractual Obligations

The following table summarizes our contractual obligations and other commitments to make future payments as of March 31, 2019. The amount of the obligations presented in the table reflects principal amounts only and excludes the amount of interest we are obligated to pay. Also excluded from the table are a number of obligations to be settled in cash. These excluded items are reflected in our consolidated balance sheet and include deposits with no stated maturity, trade payables, and accrued interest payable.

Off-Balance Sheet Arrangements

In the normal course of business, we enter into various transactions, which, in accordance with GAAP, are not included in our consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby and commercial letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in the consolidated balance sheets. For further information, see Note 9 – Off-Balance Sheet Loan Commitments in the accompanying condensed notes to the consolidated financial statements included elsewhere in this report.

Critical Accounting Policies and Estimates

Our accounting policies are fundamental to understanding our management’s discussion and analysis of our results of operations and financial condition. We have identified certain significant accounting policies which involve a higher degree of judgment and complexity in making certain estimates and assumptions that affect amounts reported in our consolidated financial statements. The significant accounting policy which we believe to be the most critical in preparing our consolidated financial statements is the determination of the allowance for loan and lease losses. Since December 31, 2018, there have been no changes in critical accounting policies as further described under “Critical Accounting Policies and Estimates” and in Note 1 to the Consolidated Financial Statements in our 2018 Form 10-K.

Recently Issued Accounting Pronouncements

See Note 1 – Summary of Significant Accounting Policies in the accompanying condensed notes to consolidated financial statements included elsewhere in this report for details of recently issued accounting pronouncements and their expected impact on our consolidated financial statements.

Forward-Looking Statements

This document contains forward-looking statements pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements reflect our current views with respect to, among other things, future events and our financial performance. These statements are often, but not always, made through the use of words or phrases such as “may,” “should,” “could,” “predict,” “potential,” “believe,” “will likely result,” “expect,” “will,” “anticipate,” “seek,” “estimate,” “intend,” “plan,” “projection,” “would” and “outlook,” or the negative version of those other comparable of a future or forward-looking nature. These forward-looking statements are not historical facts and are based on current expectations, estimates and projections about our industry, management’s beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Accordingly, we caution you that any such forward-looking statements are not guarantees of future performance and are subject to risks, assumptions and uncertainties that are difficult to predict. Although we believe that the expectations reflected in these forward-looking statements are reasonable as of the date made, actual results may prove to be materially different from the results expressed or implied by the forward-looking statements.

There are or will be important factors that could cause our actual results to differ materially from those indicated in these forward-looking statements, including, but are not limited to, the following:

- business and economic conditions generally and in the bank and non-bank financial services industries, nationally and within our local market areas;
- our ability to mitigate our risk exposures;
- our ability to maintain our historical earnings trends;
- risks related to the integration of acquired businesses (including our acquisitions of First Bancorp of Durango, Inc., Southern Colorado Corp., and the operating assets of Interstate Capital Corporation and certain of its affiliates) and

any future acquisitions;

our ability to successfully identify and address the risks associated with our recent, pending and possible future acquisitions, and the risks that our prior and planned future acquisitions make it more difficult for investors to evaluate our business, financial condition and results of operations, and impairs our ability to accurately forecast our future performance;

changes in management personnel;

interest rate risk;

concentration of our factoring services in the transportation industry;

- credit risk associated with our loan portfolio;
- lack of seasoning in our loan portfolio;
- deteriorating asset quality and higher loan charge-offs;
- time and effort necessary to resolve nonperforming assets;
- inaccuracy of the assumptions and estimates we make in establishing reserves for probable loan losses and other estimates;
- lack of liquidity;
 - fluctuations in the fair value and liquidity of the securities we hold for sale;
- impairment of investment securities, goodwill, other intangible assets or deferred tax assets;
- our risk management strategies;
- environmental liability associated with our lending activities;
- increased competition in the bank and non-bank financial services industries, nationally, regionally or locally, which may adversely affect pricing and terms;
- the accuracy of our financial statements and related disclosures;
- material weaknesses in our internal control over financial reporting;
- system failures or failures to prevent breaches of our network security;
- the institution and outcome of litigation and other legal proceedings against us or to which we become subject;
- changes in carry-forwards of net operating losses;
- changes in federal tax law or policy;
- the impact of recent and future legislative and regulatory changes, including changes in banking, securities and tax laws and regulations, such as the Dodd-Frank Act and their application by our regulators;
- governmental monetary and fiscal policies;
- changes in the scope and cost of FDIC, insurance and other coverages;
- failure to receive regulatory approval for future acquisitions; and
- increases in our capital requirements.

The foregoing factors should not be construed as exhaustive. If one or more events related to these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. Accordingly, you should not place undue reliance on any such forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made and we do not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. New factors emerge from time to time and it is not possible for us to predict which will arise. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

ITEM 3

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

Asset/Liability Management and Interest Rate Risk

The principal objective of our asset and liability management function is to evaluate the interest rate risk within the balance sheet and pursue a controlled assumption of interest rate risk while maximizing net income and preserving adequate levels of liquidity and capital. The Board of Directors of our subsidiary bank has oversight of our asset and

liability management function, which is managed by our Chief Financial Officer. Our Chief Financial Officer meets with our senior executive management team regularly to review, among other things, the sensitivity of our assets and liabilities to market interest rate changes, local and national market conditions and market interest rates. That group also reviews our liquidity, capital, deposit mix, loan mix and investment positions.

As a financial institution, our primary component of market risk is interest rate volatility. Fluctuations in interest rates will ultimately impact both the level of income and expense recorded on most of our assets and liabilities, and the fair value of all interest earning assets and interest bearing liabilities, other than those which have a short term to maturity. Interest rate risk is the potential of economic losses due to future interest rate changes. These economic losses can be reflected as a loss of future net interest income and/or a loss of current fair values.

We manage our exposure to interest rates primarily by structuring our balance sheet in the ordinary course of business. We do not typically enter into derivative contracts for the purpose of managing interest rate risk, but we may elect to do so in the future. Based upon the nature of our operations, we are not subject to material foreign exchange or commodity price risk. We do not own any trading assets.

We use an interest rate risk simulation model to test the interest rate sensitivity of net interest income and the balance sheet. Instantaneous parallel rate shift scenarios are modeled and utilized to evaluate risk and establish exposure limits for acceptable changes in projected net interest margin. These scenarios, known as rate shocks, simulate an instantaneous change in interest rates and use various assumptions, including, but not limited to, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, reinvestment and replacement of asset and liability cash flows. We also analyze the economic value of equity as a secondary measure of interest rate risk. This is a complementary measure to net interest income where the calculated value is the result of the fair value of assets less the fair value of liabilities. The economic value of equity is a longer term view of interest rate risk because it measures the present value of all future cash flows. The impact of changes in interest rates on this calculation is analyzed for the risk to our future earnings and is used in conjunction with the analyses on net interest income.

The following table summarizes simulated change in net interest income assuming a static balance sheet versus unchanged rates as of March 31, 2019 and December 31, 2018:

| | March 31, 2019 | | | | December 31, 2018 | | | | |
|-------------------|----------------|---------|-----------|-----------|-------------------|---|-----------|------|---|
| | Months | | | | Months | | | | |
| | Following | | Following | | Following | | Following | | |
| | 12 Months | 3-24 | % | 12 Months | 3-24 | % | 12 Months | 3-24 | % |
| +400 basis points | 9.1 % | 5.1 % | | 6.8 % | 4.7 % | | | | |
| +300 basis points | 6.6 % | 3.5 % | | 5.0 % | 3.4 % | | | | |
| +200 basis points | 4.0 % | 1.9 % | | 3.2 % | 2.2 % | | | | |
| +100 basis points | 1.4 % | 0.3 % | | 1.4 % | 0.9 % | | | | |
| Flat rates | 0.0 % | 0.0 % | | 0.0 % | 0.0 % | | | | |
| -100 basis points | (3.8 %) | (3.7 %) | | (2.4 %) | (2.1 %) | | | | |

The following table presents the change in our economic value of equity as of March 31, 2019 and December 31, 2018, assuming immediate parallel shifts in interest rates:

| Economic Value of Equity at Risk (%) | March 31, 2019 | December 31, 2018 |
|--------------------------------------|----------------|-------------------|
|--------------------------------------|----------------|-------------------|

Edgar Filing: Triumph Bancorp, Inc. - Form 10-Q

| | | | | |
|-------------------|------|----|------|----|
| +400 basis points | 8.9 | % | 10.6 | % |
| +300 basis points | 8.0 | % | 9.8 | % |
| +200 basis points | 6.4 | % | 8.2 | % |
| +100 basis points | 3.8 | % | 3.7 | % |
| Flat rates | 0.0 | % | 0.0 | % |
| -100 basis points | (5.8 | %) | (5.2 | %) |

Many assumptions are used to calculate the impact of interest rate fluctuations. Actual results may be significantly different than our projections due to several factors, including the timing and frequency of rate changes, market conditions and the shape of the yield curve. The computations of interest rate risk shown above do not include actions that our management may undertake to manage the risks in response to anticipated changes in interest rates, and actual results may also differ due to any actions taken in response to the changing rates.

As part of our asset/liability management strategy, our management has emphasized the origination of shorter duration loans as well as variable rate loans to limit the negative exposure to a rate increase. We also desire to acquire deposit transaction accounts, particularly noninterest or low interest bearing non-maturity deposit accounts, whose cost is less sensitive to changes in interest rates.

ITEM 4

CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management was required to apply judgment in evaluating its controls and procedures. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) were effective as of the end of the period covered by this report.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended March 31, 2019, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

From time to time we are a party to various litigation matters incidental to the conduct of our business. We are not presently party to any legal proceedings the resolution of which we believe would have a material adverse effect on our business, prospects, financial condition, liquidity, results of operation, cash flows or capital levels.

Item 1A. Risk Factors

There have been no material changes in the Company's risk factors from those disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2018.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Edgar Filing: Triumph Bancorp, Inc. - Form 10-Q

On October 29, 2018, the Company announced that its board of directors had authorized the repurchase of up to \$25.0 million of its outstanding common stock in open market transactions or through privately negotiated transactions for a period of one year. The following repurchases were made under this program during the three months ended March 31, 2019:

| Period | (a) Total number of shares (or units) purchased | (b) Average price paid per share (or unit) | (c) Total number of shares (or units) purchased as part of publicly announced plans or programs | (d) Maximum number (or approximate dollar value) of shares (or units) that may yet be purchased under the plans or programs |
|--------------------------------------|--|---|---|--|
| January 1, 2019 - January 31, 2019 | 240,206 | \$ 30.50 | 240,206 | \$ 17,674,000 |
| February 1, 2019 - February 28, 2019 | 7,106 | 30.84 | 7,106 | \$ 17,454,000 |
| Total | 247,312 | \$ 30.51 | 247,312 | |

Item 3. Defaults Upon Senior Securities
